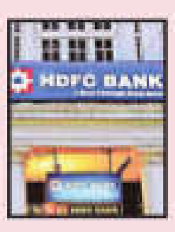
HDFC BANK RAISES RECORD $1.75-BN OVERSEAS BONDS



HDFC BANK HAS issued $1.75-billion senior unsecured bonds via its GIFT City branch, the most after ICICI Bank's $1-billion raise in July this year, reports **fe Bureau**. The bank has raised funds across two tenures — three years and five years. S&P Global Ratings has assigned a BBB rating to its fixed-rate senior notes of up to $1.75 billion. Moody's has assigned a Baa3 rating with a stable outlook, a regulatory filing on Thursday stated.

Core sector growth eases to 5.4% in July

MDR LIKELY TO BE SET AT 0.3%

Transaction fees on UPI in 2 weeks

PRASANTA SAHU
New Delhi, August 20

A MERCHANT DISCOUNT rate (MDR) of 0.3% on UPI transactions of ₹2,000 and above is expected to be announced within two weeks, sources said on Thursday.

The Department of Financial Services will likely issue a gazette notification within a week specifying the electronic payment modes that would continue to receive statutory protection from charges. Thereafter, the UPI and Services Steering Committee, headed by the National Payments Corporation of India (NPCI), will determine the MDR, its scope and structure, sources said.

MDR is a fee paid by businesses to payment processors for accepting digital payments.

The government has assured that UPI transactions will remain free for consumers. The assurance was made during a debate in Parliament on the Taxation and Other Laws (Amendment) Bill, 2026, which amended Section 10A of the Payment and Settlement Systems Act, 2007, to pave the way for MDR on UPI transactions above a certain threshold.

An MDR of up to 0.3% of the transaction value applied to UPI person-to-merchant transactions until December 2019. Zero MDR was introduced in January 2020 to accelerate digital payment adoption and encourage a shift from cash to digital payments. The government subsequently introduced an incentive scheme to support banks and other ecosystem participants and encourage digital payments by providing an incentive equivalent to 0.15% MDR on UPI transactions up to ₹2,000.

CS SETTY, CHAIRMAN, STATE BANK OF INDIA

'Consumption demand to sustain'

State Bank of India Chairman **CS Setty** *believes the rationalisation of the goods and services tax (GST) last September will continue to support consumption demand. In an interview with* **Manju AB** *and* **Joydeep Ghosh**, *Setty said banks will see a structural shift in their balance sheets over the next five to 10 years as they explore alternative funding sources. Excerpts:*

AKASH PATIL

Is last year's rationalisation of GST continuing to drive consumption demand?

We started FY27 very strongly, and not just SBI — other banks did as well. SBI recorded credit growth of almost 18% across sectors. I see consumption demand in the system sustaining. There is a flywheel effect from consumption. The retail segment is doing well. In fact, we have been continuously performing better than other banks. I see that trend continuing through the year.

Banks cannot depend solely on public deposits to fund balance-sheet growth. How do you see this changing?

Over the next five to 10 years, there will be a significant shift in bank balance sheets. Credit growth will remain sustained. India is one of the world's fastest-growing large economies, and GDP and credit growth are mutually reinforcing — they feed into each other.

Banks in India mobilise household and corporate savings through deposits and use them to fund their balance sheets. But a structural shift will take place, just as it has in the composition of household savings. We will have to find different ways of accessing these savings and managing the cost. Even today, deposits are not necessarily cheap. Household savings are predominantly deployed in fixed deposits. In our book, too, 60% of deposits are fixed deposits. Of course, this provides considerable stability to our funding and helps avoid significant asset-liability mismatches.

How will FCNR(B) deposit flows help banks?

It is a good move by the RBI. Though there is a cost involved, there are larger objectives to be achieved. For banks, FCNR(B) deposits will provide timely liquidity. The additional deposit flows will also help soften interest rates in the system.

The RBI has asked banks to disclose bulk deposit rates from October. Will this lead to lower rates?

It will bring greater transparency to bulk deposit pricing. But it is too early to say how the system will respond. Ultimately, rates — whether displayed on a bank's website or not — will be determined by its funding requirements.

AGM delay may be costing Tata Trusts ₹56 lakh daily

● Trusts unlikely to move court against SRTT meeting ban

URVI MALVANIA
Mumbai, August 20

THE DELAY IN approving Tata Sons' ₹4,479-crore dividend could cost the Tata Trusts around ₹56 lakh a day in potential investment income, even as the Trusts are unlikely to approach the Bombay High Court for relief from the restriction on the Sir Ratan Tata Trust (SRTT) holding meetings, people with knowledge of the proceedings said.

The Tata Sons annual general meeting on August 18, which was expected to consider the declaration of the dividend, was adjourned for want of quorum. Of the total dividend recommended by the Tata Sons board, around ₹2,900 crore is attributable to the Tata Trusts, which collectively hold about 66% of the holding company.

At an assumed annual return of 7%, ₹2,900 crore would generate potential investment income of around ₹55.6 lakh for every day it remains unavailable. A delay of 60 days would translate into around ₹33.4 crore in potential foregone income, while every additional week could cost approximately ₹3.9 crore. If the delay stretches to six months, the potential income foregone could exceed ₹100 crore.

Duty-free import, stock limit: Moves to curb sugar price

● Food companies push back on lower inventory ceiling ahead of festivals

SANDIP DAS

New Delhi/Mumbai, August 20

THE GOVERNMENT ON Thursday allowed duty-free imports of sugar after 10 years and imposed a 15-day stock-holding limit on bulk consumers to rein in soaring prices ahead of the festival season. The curb on stocking drew immediate pushback from food processors, who said the move could disrupt production without addressing the primary cause behind the recent price surge — the diversion of sugarcane towards ethanol production.

The average retail price of sugar stood at ₹54.06 a kg on Thursday, up 17% from a year earlier and 13% over the past month, according to the Department of Consumer Affairs' price monitoring cell.

Amid the price concerns, the government on Thursday said bulk consumers using 10 tonne or more of sugar a month will be allowed to hold stocks equivalent to only 15 days of their requirements from September 1 to November 30.

Food companies typically maintain at least a month's inventory of sugar, industry executives said, making the new limit a significant operational constraint.

Derivative market sees first net exits in 11 yrs

● Sebi curbs put the brakes on retail rush

KUSHAN SHAH
Mumbai, August 20

THE ENTHUSIASM OF retail investors for the derivatives market showed its first clear signs of waning in FY26 after tighter regulations introduced by the Securities and Exchange Board of India (Sebi) kicked in, according to a study by the market regulator.

The number of traders exiting the equity derivatives segment exceeded new entrants in FY26 — the first time this has happened since FY15. In all, exits exceeded new entrants by about 2.5 million during the year.

The number of active equity derivatives traders also declined for the first time since FY15, falling 18% during the year. This ended a decade-long rise during which the number of active traders increased 12.5 times, from 0.7 million to 8.75 million. The average loss per trader, however, increased marginally to about ₹1.17 lakh in FY26.

Trading activity remained heavily concentrated in contracts close to expiry. Around 59% of index options turnover came from contracts expiring on the same day, while 75% was generated by contracts expiring within one day and 97% by those expiring within a week.

Options trading accounted for about 92% of the aggregate losses incurred by individual traders, according to the study.

COUNTRIES HELPING TEHRAN WARNED OF 'TREMENDOUS' CONSEQUENCES; CHINA CALLS FOR DIPLOMACY

Trump declares 'economic warfare' against Iran

DEREK WALLBANK
& PATRICK SYKES
August 20

US PRESIDENT DONALD Trump threatened Iran and its trading partners with economic isolation after months of military strikes and a maritime blockade failed to force Tehran to capitulate.

Trump didn't specify what measures he would take or which countries would be targeted, but his threat put an immediate focus on China, which buys the bulk of Iran's oil. Brent crude prices advanced for a fifth day to about $94 a barrel, reaching the highest this month.

In its first reaction to Trump's comments, Beijing said sanctions and pressure wouldn't work and called for a diplomatic resolution. Iran, meanwhile, said Trump's threats were a "diversion" from America's own crises of unprecedented debt and surging interest costs.

"Doubling down on failed policies will only bring further defeat — and enmity of Iranians," Iranian Foreign Minister Abbas Araghchi said on X. "US economic terrorism threatens global economy and sovereignty worldwide."

It's unclear what new economic punishment the US could impose, if any, that Tehran hasn't already endured. Targeting Iranian oil sales would also risk fresh confrontation with China, the buyer of almost all Iranian crude exports. That would complicate Trump's bid to extend a tariff truce with President Xi Jinping, who is set to visit the US next month.

"I don't think there's a magic bullet," said Daniel Fried, a former US ambassador to Poland. "Is there more leverage we could apply against the Iranian economy? Probably. But I think they've got the workarounds pretty much in place right now. Our leverage is not great in the short run." Trump's comments signal how the US, beset by munitions shortages and rising costs, wants to pivot from a military campaign that's eliminated most of Iran's top leaders and battered its economy, but has so far failed to bring about its surrender.

In a lengthy Truth Social post, the US president said, "No one has given...Iran a greater opportunity to make a deal than me. Tragically, for them, they have failed to take it. Therefore, today, I am announcing the most crushing economic operation ever taken against any country! This will be economic warfare and isolation on an unprecedented scale."

"I am also announcing that any country that allows its financial institutions, businesses, airports, or government entities to provide any type of lifeline to Iran will itself face tremendous economic consequences.... This will be an ECONOMIC D-DAY, and we need all of our allies to stand with the United States of America to isolate, and defeat, the Iran threat," he added.

INDIAN OIL SIGNS FUEL SUPPLY DEAL WITH MAURITIUS

INDIAN OIL ON Thursday said it had signed a multi-year fuel supply agreement with Mauritius' State Trading Corporation, deepening energy ties between the two countries and securing an export outlet for India's largest refiner. The agreement, backed by both governments, underscores India's push to expand its energy footprint in the Indian Ocean region as it competes with China for influence among island nations. IOC said on X the agreement covers a five-year supply of petroleum products to the Mauritian state buyer and forms part of a government-to-government memorandum of understanding on cooperation in petroleum and gas, biofuels, sustainability and other emerging energy areas.

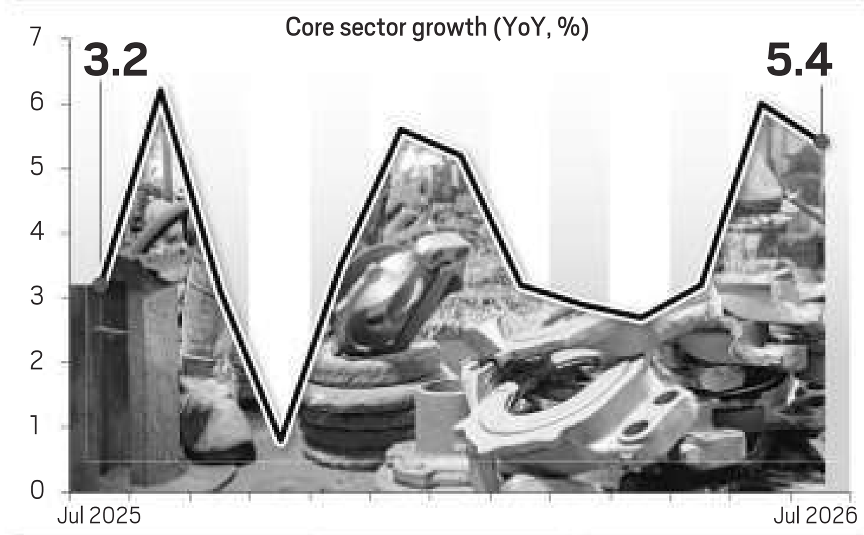
FIVE OF NINE SECTORS SEE SLOWER GROWTH

Core sector growth slows to 5.4% in July

SHUBHAM RANA
New Delhi, August 20

OUTPUT MODERATION



■ Iron ore production declined sharply to 29.5% from June's 44.5% y-o-y growth rate

■ Electricity generation slowed to 9.0% growth in July from 11.4% in June

■ Steel output declined to 2.9% last month, marking lowest level in new series since April

GROWTH IN THE output of core industries moderated to 5.4% in July, from an upwardly revised 6.0% in June, with five of the nine sectors seeing slower growth last month, data released by the Department for Promotion of Industry and Internal Trade on Thursday showed.

The growth print for nine core industries for June was revised sharply higher from the provisional 5%.

Core sector output grew 3.2% in July 2025.

One reason for the moderation in July was the sharp fall in the growth in iron ore output to 29.5% from 44.5% in June 2026. This was partly because of an unfavourable base.

"This alone exerted a downward pressure to the tune of 95 basis points on the core output print in July relative to the previous month," Icra Chief Economist Aditi Nayar said. Iron ore production tends to be highly volatile as it is driven by seasonal factors and demand from the steel industry.

Electricity generation growth slowed to 9.0% in July from 11.4% in June, while steel production fell to 2.9% last month, the lowest in the new series, which has data since April 2024.

"Slowdown in electricity generation was possibly due to reduced demand, following temperature reduction unlike peak summers," said Devendra Pant, chief economist, India Ratings and Research.

This is only the second set of data based on the new ICI, which now covers nine sectors instead of eight in the old series. The revised ICI series, released in July, updates the base year to 2022–23 (April-March) from 2011-12 in the previous series.

The nine core industries together make up 32.88% of the Index of Industrial Production (IIP) in the new series, down from 40.27% in the previous series.

With a slowdown in core sector growth, economists expect the Index of Industrial Production growth to also moderate to around 6% in July from 7.3% in June.

Fertiliser output saw steeper year-on-year contraction of 8.0% in July

Iron ore, electricity, steel, fertilisers, and crude oil saw slower output growth in July compared to June, weighing on the headline growth. These five sectors account for nearly 64% of the ICI.

The fertiliser output saw steeper year-on-year contraction of 8.0% in July, compared with a 3.3% fall in June. "Fertiliser output has contracted for the fifth consecutive month, reflecting the impact of the West Asia conflict," Nayar said.

Crude oil output also saw a larger contraction of 5.3% last month compared to a 4.2% decline in June, also likely impacted by the war in West Asia and disruption to energy supplies. Natural gas output fell 3.7% year-on-year in July, a slower decline than 4.8% in June.

Coal output growth hit an 11-month high of 7.6% in July, up from 1.4% in June. Growth in cement production also rose to a 7-month high of 13.1% in July.

Higher growth in cement output suggests healthy construction and infrastructure activity in the country, economists said. "The replenishment of inventory after the extended period for construction activity in June 2026 owing to the sizeable monsoon deficit in the month, is likely to have supported cement output in July 2026," Nayar said.

RESERVOIR LEVELS IMPROVE 8%, STILL BELOW 2025 LEVEL

RESERVOIRS ACROSS THE country saw water levels rise by 8% in a week to over 64% of their capacity on Thursday, up from 59% reported a week ago, thanks to spurt in monsoon rains since early July. However, overall water storage across all 166 major reservoirs stayed over 17% below the level from a year ago and just 2.96% below the normal or 10-year average level, reports **Sandip Das**.

According to the Central Water Commission, water levels in 53 major dams in western region — Goa, Gujarat and Maharashtra — are filled over 80% of their combined capacities. Water levels of 47 major dams in Southern India are currently 56.22% of their combined capacity, higher than 54.83% last week.

Solar project costs may rise 20% in 6-8 months on more local sourcing

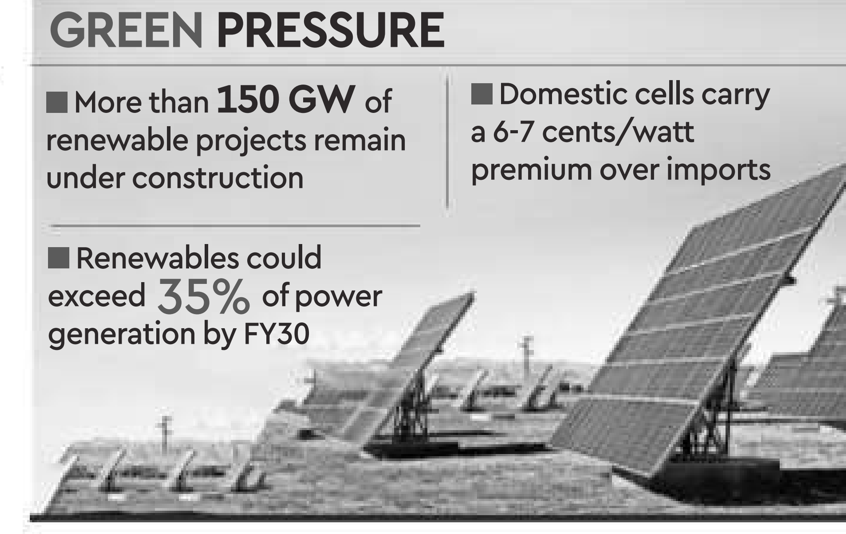
SAURAV ANAND
New Delhi, August 20

GREEN PRESSURE

■ More than **150 GW** of renewable projects remain under construction

■ Renewables could exceed 35% of power generation by FY30

■ Domestic cells carry a 6-7 cents/watt premium over imports



THE COST OF setting up solar power projects in India could rise by around 20% over the next six-eight months as higher domestic sourcing requirements push up project costs.

Rising input, freight and supply-chain costs linked to the West Asia conflict are also adding to the pressure on project economics, just as the country prepares for another large renewable capacity build-out.

The cost shock comes with more than 150 GW of renewable projects under construction as on June 30, 2026. Rating agency Icra expects renewable energy, including large hydro, to contribute over 35% of India's power generation by FY30, against 22% in FY25, making execution, transmission and storage availability increasingly critical.

A key pressure point is the price differential between domestic and imported solar cells. Icra estimates a module manufactured by a domestic OEM using imported cells costs around 16 cents/watt, compared with 22.5 cents/watt using domestic cells, a premium of 6-7 cents.

The gap comes despite a rapid expansion in module manufacturing. ALMM-registered module capacity surged to 215.5 GW in July 2026 from 173 GW in March, while domestic cell capacity stood at only 31.8 GW, against 31 GW in June. Icra expects module overcapacity to trigger consolidation, with vertically integrated manufacturers better positioned.

Higher costs are arriving as bidding activity loses momentum. Renewable capacity awards dropped from 40.6 GW in FY25 to 14.7 GW in FY26, with only 4.7 GW awarded till August 10 in FY27. Unsigned PPA capacity remained sizeable at 40-45 GW as of April 2026.

"While the bidding activity has moderated, a notable feature is decline in the bids for normal solar and wind and more focus on firm and dispatchable renewable energy and round-the-clock power," said Girishkumar Kadam, senior vice-president and group head, Corporate Ratings, Icra.

Kadam said SECI's latest demand-based supply tender discovered a tariff of ₹5.25/unit, below most new thermal plants costing above ₹6/unit and exposed to fuel-cost escalation.

Grid constraints, however, are emerging as another threat to returns. Around 37% of capacity at impacted substations across the northern, western and southern regions operates under temporary GNA, with curtailment of 30-50% during solar hours, according to Icra. Peak curtailment has reached 8,617 MW in the western region and 5,573 MW in the north.

"Timely execution of intra-state and inter-state transmission infrastructure and enhancement of storage capacity will be critical to protect project economics and sustain the pace of capacity addition," Kadam said.

Legal scrubbing of India-EU FTA over

FE BUREAU
New Delhi, August 20

PACT PROGRESS

■ The FTA is on track to be signed by the end of this year

■ Taken together, India and the EU account for 25% of the global GDP

■ The two partners also account for roughly **$11 trn** of global trade

■ India secured EU market access for **99%** of exports

THE TEXT OF India-European Union (EU) Free Trade Agreement (FTA) has been legally scrubbed and it is on track to be signed by the end of this year, a senior official said on Thursday.

Legal scrubbing is the technical post-negotiation phase where legal experts and trade lawyers from both sides review the text of the draft treaty.

It ensures that the broad political compromises reach airtight legal clarity, verifying that terms, terminology, definitions, and cross-references are consistent, unambiguous, and aligned across all official languages without altering the underlying economic substance.

With the legal vetting complete, the master text is currently being translated into all official EU languages, alongside initial institutional clearances across various European forums. The finalised text will be made public prior to the formal signing, the official added.

Once the text is verified and translated into the EU's official languages, the European Commission will formally propose it to the Council of the European Union. The agreement has to be approved by the European Council that is composed of heads of state or government of EU countries before signing. After signing, the European Parliament votes on it.

India-EU FTA has been intentionally designed as an "exclusive" agreement as it covers only trade matters. The exclusive agreement only requires approval by the European Parliament and not by Parliaments of all 27 member states. After ratification by European Parliament and Indian Cabinet, both sides would announce dates for implementation of the agreement.

Taken together, India and the EU account for 25% of the global GDP and one-third (about $ 11 trillion) of international trade. India and EU had announced the conclusion of negotiations on their FTA on January 27 this year after negotiations that lasted almost two decades. The first attempt for the FTA lasted from 2007 to 2013 but was abandoned due to differences over duties on automobiles and spirits.

India turns to Venezuela for crude supply diversification

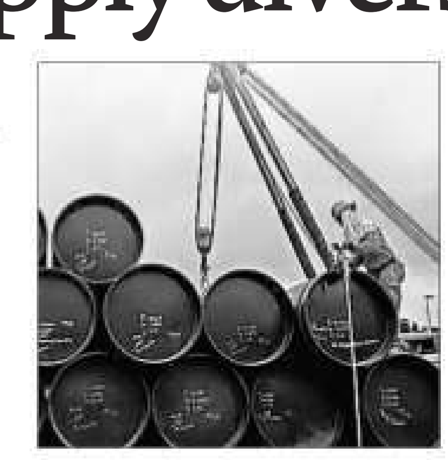
PRESS TRUST OF INDIA
New Delhi, August 20

INDIA IS WIDENING its crude oil sourcing to Latin America as disruptions linked to the Iran conflict and the Strait of Hormuz push the world's third-largest oil consumer to diversify supplies, ship tracking data showed.

Indian crude imports from Venezuela have risen sharply in August, making the South American producer the country's fourth-largest supplier, according to data from Kpler.

Venezuelan supplies reached about 444,000 barrels per day, ahead of Iraq's 118,000 bpd and the United States' 153,000 bpd, the data showed.

Venezuela's position in India's supply mix has risen rapidly since imports resumed in April.



Indian refiners increased purchases of Venezuelan, Brazilian and African crude after disruptions to West Asian supplies, while continuing to rely heavily on Russian oil.

Russia remains the dominant supplier, with imports close to 2 million bpd in August. Russian crude imports reached around 2.6 million bpd in June-July, accounting for more than half of India's crude intake and effectively providing a hedge against disruption to traditional West Asian supply routes.

Crude oil is the raw material which refineries turn into fuels like petrol and diesel.

"India's strategy is increasingly operating on several fronts at once: increasing domestic upstream production where possible, diversifying overseas crude suppliers and transportation routes, building strategic and commercial inventories, and accelerating alternatives such as gas, biofuels, EVs and renewables," said Sumit Ritolia, senior manager - modelling at Kpler.

Govt asks industry to utilise FTAs

PRESS TRUST OF INDIA
New Delhi, August 20

THE GOVERNMENT ON Thursday nudged the industry to utilise free trade agreements (FTAs), focus on value addition, build resilient supply chains, and actively diversify export markets to boost manufacturing and strengthen the country's position in global trade.

All trade agreements which India has signed "is a door, but doors, however magnificently crafted, do not open themselves. It is the industry that must walk through them," said Yashvir Singh, additional secretary in the department of commerce.

He said the industry should use FTAs to expand market access, attract investment and technology, diversify supply chains, and build manufacturing ecosystems that can withstand global shocks.

The ambition is not merely to participate in global manufacturing but to make India a reliable, competitive, and trusted partner in global value chains, he said said at a manufacturing conclave.

"I place before this audience five imperatives, not suggestions, but strategic obligations. First, invest in FTA utilisation. Understand the rules of origin requirements. Map your supply chains to qualify for preferential tariffs. The duty savings are real. The competitive advantage is immediate," he said adding "move up the value chain".

The share of capital goods in India's export basket has already risen from 13% in 2014 to 19% today, but that trajectory must be accelerated, he said.

He also called for building supply chain resilience as China's concentration in upstream materials is a risk for the world.

India 10-15 years away from battery self-sufficiency

SAURAV ANAND
New Delhi, August 20

CELL STRUGGLE

■ Domestic content reaching **100%** could raise capex by **30%**

■ Commissioned cell capacity stands at just **2 GWh**

■ Battery demand pipeline from tenders totals approximately **260 GWh**

■ China has 2,695 GWh cumulative cell capacity

■ It controls 85-98% of key battery components

■ New BESS tenders require 20% domestic content

■ India has 154% cost advantage over Japan, 9% over South Korea

■ Only four players have commissioned gigafactories in India

INDIA COULD REMAIN 10-15 years away from a globally competitive, self-sufficient battery cell industry, while pushing domestic content in grid-scale battery storage projects to 100% could increase project capital costs by around 30%.

It highlights the cost and supply-chain challenge confronting the country's rapidly expanding storage market.

The gap is already stark. India has only 2 GWh of commissioned cell manufacturing capacity in 2026, accounting for less than 1% of the approximately 260 GWh battery demand pipeline from competitive tenders, according to Wood Mackenzie's Chasing Self-Sufficiency: Cost of Building an Indigenous Battery Storage Supply Chain in India report.

While more than 226 GWh of cell manufacturing capacity has been announced for construction through 2035, execution delays, financial viability challenges and dependence on Chinese and Korean technology licensors could slow localisation.

"India's battery storage ambitions are credible, but the gap between policy intent and operational capacity is wide," said Ankita Chauhan, director, Wood Mackenzie.

"The near-term opportunity lies in downstream components such as containers, EMS, and battery packs, where localisation is both technically feasible and commercially attractive."

China, in comparison, has 2,695 GWh of cumulative cell manufacturing capacity and controls between 85% and 98% of global capacity across cathodes, anodes, separators and electrolytes.

India is therefore expected to pursue a downstream-first strategy. Containers, energy management systems, SCADA and battery packs could see localisation over the next two-three years, supported by the 20% domestic content requirement being applied to new grid-scale BESS tenders.

However, Wood Mackenzie estimates that raising domestic content requirements from below 20% to 100% adds about 30% to total capex for a benchmark 100-MW, two-hour battery storage project.

Locally manufactured cells themselves are expected to cost 25-40% more than imported cells, reflecting limited scale, higher financing costs and an underdeveloped supplier ecosystem.

Yet, India has a 154% cost advantage over Japan and 9% over South Korea, placing it behind only China among major manufacturing destinations.

Scale remains crucial to economics.

Only four players have commissioned gigafactories in India as of 2026.

A 5-GWh facility operates at -10% Ebitda, while breakeven is achieved at 10 GWh and positive margins require at least 20 GWh, the report said.

Cell manufacturing is expected to expand with imported inputs over the next two-five years, while full domestic refining capabilities could take more than a decade.

"India's cost position is genuinely competitive in a global context," said Priya Shrivastava, senior research analyst, Wood Mackenzie. "The challenge is closing the execution gap fast enough to capture that opportunity before other emerging manufacturing hubs do."

INDIA AND SINGAPORE on Thursday discussed ways to expand collaboration in capital markets as Singapore Exchange (SGX) is keen to collaborate with National Stock Exchange (NSE), Deputy Prime Minister of Singapore Gan Kim Yong said.

"They (SGX and NSE) are exploring different alternatives including derivatives and possibility of dual listing so that the business entities in India will have greater access to the capital around this region as well as world leveraging on SGX connection and depth of the capital markets," he told reporters.

Gan was addressing the media after the fourth India-Singapore Ministerial Roundtable (ISMR) held in Singapore on Thursday. The mechanism of ISMR was launched in 2022 with the first meeting being held in New Delhi in September that year. It is a platform to drive cooperation in new and emerging areas.

Finance minister Nirmala Sitharaman, External Affairs Minister S Jaishankar, Commerce and industry Minister Piyush Goyal and Minister of State in the Ministry of Electronics and Information Technology Jitin Prasada participated in the meeting from the Indian side.

Both sides also discussed expanding the collaboration between United Payment Interface (UPI) and Singapore's PayNow, which was entered into in 2023. "I think it is progressing well but we are hoping to be able to facilitate participation by more banks and merchants."

"One initiative that we hope to realise soon is Project Nexus that will bring multiple nations together (in UPI-PayNow type) collaboration. I think according to the current schedule, by 2027 the Nexus will come online," Gan said.

Gan said the meeting focused on six key pillars of collaboration including advanced manufacturing and semiconductors. Many semiconductor plants are coming up in India and they are also looking to bring in their suppliers, which include some companies from Singapore. "We discussed with India how to make that move or relocation or entry into India more smooth," he said.

The Deputy Prime Minister of Singapore also said the country is particularly interested in upgrading and training the Indian workforce for semiconductors and advanced manufacturing.

The two countries also signed agreements to strengthen bilateral cooperation in telecommunications and broadcasting as well as maritime heritage and food safety, the finance ministry said.

The countries discussed how to work together to explore how India and Singapore can work together to ensure continued supply of food from India to Singapore, along with potential for investment in food processing and research and development.

At the meeting, two Memorandum of Understanding (MoUs) and Letter of Intent were exchanged. One was between the Food Safety and Standards Authority of India (FSSAI) and Singapore Food Agency regarding cooperation in the area of food safety.

Another one was between the Ministry of Culture, Community and Youth of the Republic of Singapore and the India's Ministry of Ports, Shipping and Waterways for maritime heritage cooperation.

Coal India plans trading hub in Singapore for critical assets

SETHURAMAN N R
& NEHA ARORA
New Delhi, August 20

THE WORLD'S LARGEST coal producer, Coal India, is setting up its first overseas trading office in Singapore, aiming to diversify into trading iron ore and critical and strategic minerals, two sources said.

The move comes as the public sector companies step up efforts to secure overseas supplies of critical minerals such as lithium and bauxite in order to reduce dependence on China, though such efforts have so far borne little fruit.

Coal India has applied with Singapore authorities to register the office, which will also support efforts to acquire mineral assets overseas, said the sources.

The Singapore office will help Coal India expand its critical minerals business, pursue overseas asset acquisitions and support its iron ore business, one source said.

Coal India did not immediately respond to a request for comment.

Coal India is also evaluating opportunities in several mineral-rich regions, including bauxite assets in Ghana and other parts of Africa, the source said, adding that the miner was also looking at rare earth minerals.

For lithium, the miner is focusing on Chile while also evaluating opportunities in Canada and Australia for other critical mineral assets, though opportunities are at a preliminary stage, the second source said. The company has already begun diversifying into other mineral sectors.

India, Japan oppose actions impeding maritime freedom

PRESS TRUST OF INDIA
New Delhi, August 20

INDIA AND JAPAN on Thursday sealed a pact to bolster their maritime security ties and vowed to synergise bilateral military cooperation to work towards a free and open Indo-Pacific, an assertion that came amid China's increasing military muscle-flexing in the region. In their talks, Defence Minister Rajnath Singh and his Japanese counterpart Shinjiro Koizumi expressed their strong opposition to any unilateral actions that impede freedom and safety of navigation and overflight, as well as attempts to change the status-quo by force or coercion.

The remarks are seen as directed against China as both India and Japan are concerned over Beijing's offensive military posturing in South and East China seas.

In taking forward their robust defence ties, India and Japan agreed to explore the possibility of joint naval shipbuilding and design by leveraging Japan's technological expertise and India's production capabilities besides agreeing to establish a working group to advance cooperation in intelligence, equipment, technology and industrial domains.

The two sides also agreed to promote cooperation through the Indo-Pacific Logistics Network (IPLN) to support partner countries in the event of natural disasters.

With a view to taking a comprehensive perspective of the Indo-Pacific and contributing jointly to peace and stability in the region and the world, Singh and Koizumi concurred on deepening cooperation with third countries, through high level exchanges, exercises and other relevant initiatives, a joint statement said. It said the two ministers affirmed their commitment, to further deepen defence cooperation to realise a free and open Indo-Pacific.

"The two ministers concurred on the importance of sharing assessments of the regional and international security environment between the two countries at a time of heightened global tensions," it said.

"They expressed their strong opposition to any unilateral actions that impede freedom and safety of navigation and overflight as well as to any attempts to change the status-quo by force or coercion," the joint statement noted without directly naming any country.

The two defence ministers signed the Memorandum of Arrangement (MoA) on maritime security cooperation that provides a framework for further advancing ties in the field of maritime security.

Specifically, it includes the strengthening of cooperation between the Japan Maritime Self-Defense Force and the Indian Navy, including information sharing in the field of maritime domain awareness as well as enhanced cooperation in areas such as search and rescue.

Singh and Koizumi agreed on moving swiftly to realise concrete maritime security cooperation including maximising synergies to enhance mine countermeasures capabilities and explore the possibility of joint development in naval shipbuilding and design by leveraging Japan's technological expertise and India's production capabilities.

With a view to further advancing cooperation among the services of the two countries, the two ministers concurred in promoting exchanges between their respective special operations forces and pursuing cooperation with India's integrated theatre commands following their establishment. "The two ministers affirmed that they would strengthen coordination between both sides for the protection of sea lines of communications through mutual visits by naval ships and units and joint exercises," according to the joint statement.

BOOSTING TIES

- India and Japan agreed to explore the possibility of joint naval shipbuilding and design
- The countries agreed to promote cooperation through the Indo-Pacific Logistics Network to support partner countries
- The two defence ministers signed MoA on maritime security cooperation
- The remarks are seen as directed against China as over its offensive military posturing in South and East China seas

DGFT permits exporters to receive payments in rupee

THE GOVERNMENT ON Thursday amended certain provisions of the Foreign Trade Policy to make it easier for exporters to invoice overseas sales and receive payments in rupee. The amendments cover exports to all countries, although the rules vary by destination.

Two paragraphs of the Foreign Trade Policy (FTP) 2023 have been amended "to align the provisions relating to denomination of export contracts and eligibility for FTP benefits in respect of export realisation in Indian Rupee with the Foreign Exchange Management (Manner of Receipt and Payment) Regulations 2023," the Directorate General of Foreign Trade (DGFT) said in a notification.

For countries outside the Asian Clearing Union (ACU), export contracts and invoices may now be denominated in any foreign currency or rupee.

Earlier, export earnings generally had to be received in a freely convertible currency.

Commenting on the notification, economic think tank GTRI said eligible rupee payments for exports to any country other than Nepal and Bhutan will now qualify for FTP benefits and count towards fulfilment of export obligations.

Rupee earnings received through approved banking channels will therefore be treated on par with export payments received in foreign currency, it said, adding that exports financed through EXIM Bank or Government of India lines of credit may also be invoiced in rupee.

The ACU is a regional payment arrangement established in 1974 to facilitate trade settlements and reduce repeated transfers of foreign exchange by periodically settling the net obligations of its members.

INDIAN FIRM'S FALCON 2 RANKS HIGHER THAN OPENAI'S REALTIME API

Murf's AI voice model hits the right notes on debut

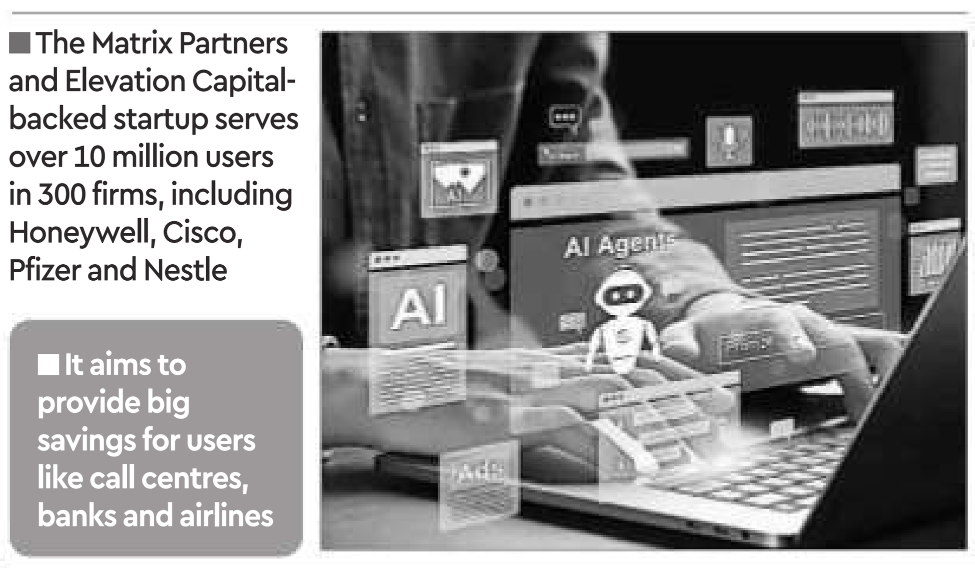
IIT TRIO'S STARTUP TAKES ON GIANTS

- The Matrix Partners and Elevation Capital-backed startup serves over 10 million users in 300 firms, including Honeywell, Cisco, Pfizer and Nestle
- It aims to provide big savings for users like call centres, banks and airlines



- Falcon 2 priced at **$0.01 per** generated minute making it attractive for conversational AI, real-time voice agents
- It is faster than many competitors, responding in under **100** milliseconds

A BENGALURU-BASED startup has entered the crowded race to build artificial voices that sound human, with an AI model that garners high scores versus systems from OpenAI and ElevenLabs.

Murf AI's text-to-speech Falcon 2, publicly available from August 20, ranked higher than some platforms from better-funded players such as OpenAI's Realtime API in benchmarks on Artificial Analysis, the independent platform that tracks AI performance.

Like other voice foundation models, it aims to provide big savings for users like call centers, banks and airlines, which hope to employ the technology to handle large volumes of customer communications.

Falcon 2 is priced at $0.01 per generated minute — a fifth of the price of larger competitors such as ElevenLabs — making it attractive for conversational AI and real-time voice agents. It's also faster than many competitors, responding in under 100 milliseconds.

Murf AI was founded in 2020 by the engineer trio of Sneha Roy, Ankur Edkie and Divyanshu Pandey, alumni of the premier Indian Institute of Technology Kharagpur.

The Matrix Partners and Elevation Capital-backed startup serves over 10 million users in 300 companies including Honeywell International, Cisco Systems, Pfizer, VMware, Nestle and Air France-KLM.

Falcon 2 was in limited release to select clients ahead of the broader rollout.

The startup's India-based engineering team developed the platform to take on a central challenge in real-time voice AI: balancing natural-sounding speech with faster speeds and lower prices. It supports over 150 voices in more than 35 languages, the company said.

"For years, the most important AI models have largely emerged from the US," Roy, Murf AI's chief operating officer, said in a statement.

Falcon 2 is "competing directly with established global models on independent benchmarks, while being engineered around the economics and deployment requirements of enterprise production."

The price difference becomes noticeable at scale. For every million minutes of generated speech, Falcon 2 costs $10,000, compared with $50,000 for ElevenLabs Turbo and Flash.

Falcon 2's training included real-world interactions such as live customer calls and booking flows rather than just scripted narration. It's built to interpret the meaning of a sentence while adjusting pace, emphasis and pronunciation around the context. "We work with real voice actors who consent to having their voices used, with transparent contracts, ongoing royalties and data protection," Roy said in an interview via email.

NCR mandate puts CV makers on EV track

NITIN KUMAR
New Delhi, August 20

SHIFTING INTO ELECTRIC LANE

- Move may impact commercial vehicle players, including Tata Motors, Ashok Leyland
- Directive likely to accelerate expansion of electric offerings in LCV segment
- From January 1, 2027, only electric N1-category LGVs to be eligible for new registrations in Delhi
- Restriction will also be extended to Gurugram, Faridabad, Sonipat, Ghaziabad, Gautam Buddha Nagar from July 1, 2027

DELHI-NCR'S COMMERCIAL VEHICLE market is set for a sharp shift towards electric vehicles, with a new mandate from the Commission for Air Quality Management (CAQM) effectively phasing out fresh registrations of petrol, diesel and CNG light goods vehicles (LGV) across the region from 2027.

The move is set to reshape product strategies of commercial vehicle makers and accelerate the adoption of electric vehicles by fleet operators in e-commerce, food and grocery delivery, FMCG distribution and urban logistics.

The mandate will directly affect Tata Motors, Mahindra & Mahindra, Ashok Leyland, Maruti Suzuki and VE Commercial Vehicles, as their conventional powertrain models in the N1 and N2 categories will progressively become ineligible for new registrations across the NCR. From January 1, 2027, only electric N1 vehicles, with gross vehicle weight (GVW) of up to 3.5 tonne, will be eligible for fresh registrations in Delhi. The restriction will extend to Gurugram, Faridabad, Sonipat, Ghaziabad and Gautam Buddha Nagar from July 1, 2027, and to other NCR districts from January 1, 2028.

The first phase is unlikely to pose a major product availability challenge, as the electric N1 market has already begun to develop. Nine vehicle manufacturers currently offer 20 electric N1 models, with Tata Motors, Mahindra & Mahindra, Ashok Leyland through Switch Mobility and VE Commercial Vehicles among those with electric products in the segment. Electric vehicle penetration in the small commercial vehicle and pickup segment is already close to 10%, according to industry estimates.

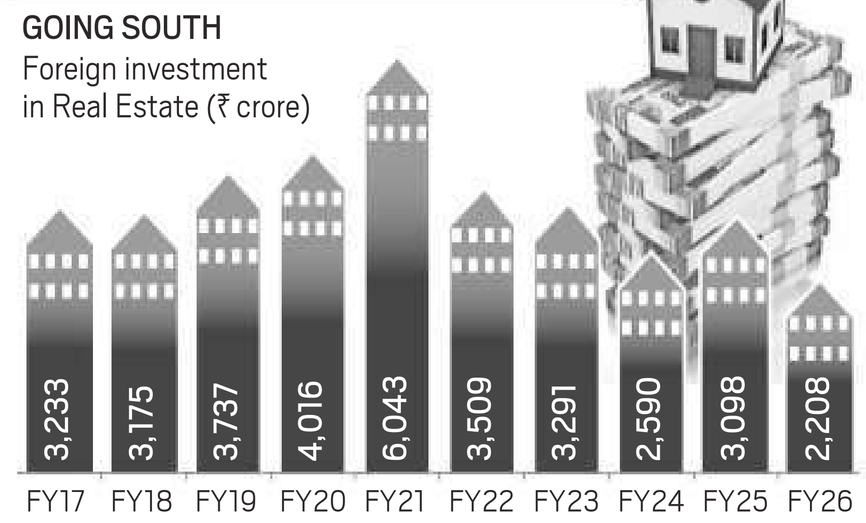
The bigger challenge could emerge in the N2 segment, covering vehicles with GVW of more than 3.5 tonne and up to 7.5 tonne. The transition for these vehicles will begin in Delhi from January 1, 2028, before extending to high-vehicle-density districts from July 1, 2028 and the remaining NCR districts from January 1, 2029. Only four manufacturers currently offer six electric N2 models, indicating that manufacturers will need to expand their electric portfolios as the mandate moves beyond smaller urban delivery vehicles.

For commercial fleet operators, the policy could accelerate replacement of conventional vehicles, particularly in segments where vehicles are used intensively. CAQM's analysis shows LGVs account for only around 1.2% of the active vehicle stock in the NCR but contribute about 3.3% of particulate matter emissions.

Global investors rethink their India realty bet

RAGHAVENDRA KAMATH
Mumbai, August 20

A THIRD OF 2021 PEAK



FOREIGN CAPITAL INFLOWS into Indian real estate have plunged to nearly a third of their peak in financial year 2020-21, as higher global interest rates, tighter financial conditions and geopolitical uncertainty have weakened the appeal of Indian property to overseas investors.

Inflows fell to ₹2,208 crore in FY26 from a peak of ₹6,043 crore in FY21, according to data compiled by Anarock Capital. The decline continued in FY26, with inflows dropping 29% from Rs 3,098 crore in FY25.

The retreat in foreign capital comes even as global investors are showing greater willingness to take on development risk in India, marking a shift from their earlier preference for completed assets, said Shobhit Agarwal, chief executive at Anarock Capital.

Vivek Rathi, national director of research at Knight Frank India, said higher interest rates in developed markets have made them relatively more attractive for investors, particularly after accounting for currency risks in emerging markets such as India.

"It was expected that rates would come down there, but war and inflation kept rates high. With high cost of money, investors felt developed markets were safe bets and attractive," Rathi said.

Though Indian assets offered a yield of 6.5-7%, investors had to take on currency risk, making it a less attractive proposition, he said.

With a yield of 6.5% and a currency loss of 3.5%, investors would have made a return of 3%. Even if they hedged and earned a return of 5-6%, they would have made similar returns in the US, but without currency or developing-country risks, he said.

"Either elevated rates should come down in the source market or returns should go up in investment markets, or both should happen for returns to go up substantially," he said.

Shift to greenfield

Despite the overall decline, the composition of foreign investment is changing, with large global investors increasingly willing to take on development risk — an area they had traditionally approached with caution, Agarwal said.

For instance, US-based fund house Blackstone has invested in developing warehousing properties and data centres through its arms. Earlier, it bought shopping malls and offices to build its portfolio and listed them as real estate investment trusts, or REITs, with its partners.

Mumbai slot squeeze speeds up cargo transition to Navi Mumbai

CARGO OPS GETS NEW CENTRE

- Adani has started denying slots to ad-hoc cargo operators at CSMIA
- Development expected to push more freighter operators towards Navi Mumbai airport
- Operator targeting complete shift of freighter ops from CSMIA to NMIA by August 26

A SQUEEZE ON ad-hoc slots at Mumbai's Chhatrapati Shivaji Maharaj International Airport (CSMIA) is accelerating the shift of dedicated freighter operations to Navi Mumbai International Airport (NMIA), with more cargo operators expected to move services over the next few weeks.

Adani Airport Holdings, which operates CSMIA, has started denying slots to some ad-hoc cargo operators for services from late August, sources said. The development is expected to push more freighter operators towards NMIA, which is seeking to establish itself as an alternative cargo gateway for the Mumbai region.

The airport operator is targeting a complete shift of dedicated freighter operations from CSMIA to NMIA by August 26, *FE* has learnt.

However, industry sources said the deadline was ambitious and some carriers would need more time to relocate their operations.

Several ad-hoc cargo operators, including YTO Cargo Airlines, Suparna Airlines and Challenge Group, currently operate services to Mumbai and are among those expected to consider shifting their freighter operations to NMIA.

NMIA has already begun building its international cargo operations. Hong Kong Cargo and AfCOM Cargo have started scheduled international freighter services from the new airport, which recently handled its first scheduled international freighter service.

The airport is looking to build scale in cargo as CSMIA also undertakes planned readjustments of parking bays and taxiways, which could require cargo operations to be shifted, at least temporarily.

However, the migration is unlikely to extend uniformly across Mumbai's cargo market. Major international cargo carriers that depend on the belly capacity of passenger aircraft are yet to show a similar willingness to shift operations to NMIA.

Emirates SkyCargo, Singapore Airlines Cargo, Cathay Cargo and Lufthansa Cargo are among the carriers that use CSMIA's passenger network to move cargo in the belly holds of their aircraft.

Sewing machine capacity trailing demand: Usha

NARAYANAN V
Chennai, August 20

ONCE A FIXTURE in living rooms and tailoring corners, the humble sewing machine had all but disappeared from the modern household. Now, it is quietly stitching its way back, with demand running at least 1.5 times the industry's production capacity, according to Usha International.

"If I were to look at sewing machines, one would say, who buys sewing machines today? But the reality is that demand for sewing machines is at least 1.5 times production today," Anil Dua, chief operating officer of the consumer durables firm, told *FE*.

The revival is being driven by a mix of house-hold consumption, government schemes aimed at supporting livelihoods among underprivileged communities, and the mushrooming of boutiques across the country, Dua said.

According to industry players, the PM Vishwakarma scheme, which provides support to traditional artisans and craftspeople, has also emerged as a catalyst for the sewing-machine market.

ANIL DUA, CHIEF OPERATING OFFICER, USHA INTERNATIONAL

> Every boutique carries 3 sewing machines. So, demand is significantly growing

Demand is also being supported by growing interest in creativity, DIY sewing, skill development and home-based entrepreneurship, encouraging consumers to move beyond basic machines towards more advanced sewing solutions. "Every boutique carries three sewing machines. So, the demand for sewing machines is significantly growing," Dua said.

VW to foray into compact SUV space in 2027

COMPETITION GROWS

- Volkswagen has historically been over-reliant on its European, particularly German, engineering set-up, but is now looking to distribute capabilities across regions
- Volkswagen is also evaluating a local partnership as it reassesses its India strategy

THOMAS SCHÄFER, CEO, VOLKSWAGEN PASSENGER CARS

> We have aspirations to grow significantly in India, not incrementally
>
> Our growth was limited because we only play in very limited segments

GERMAN CARMAKER VOLKSWAGEN is set to foray into the sub-4-metre compact SUV space with a launch lined up for next year. The new model, which will be based on the highly localised MQB-A0-IN platform, is expected to help Volkswagen enter one of India's fastest growing passenger vehicle segments.

"We have aspirations to grow significantly in India, not incrementally," Thomas Schäfer, CEO, Volkswagen passenger cars, said.

"Our growth was limited because we only play in very limited segments. Now we need to open up into other segments to really grow."

The India push comes as Volkswagen restructures its global operations around regional markets amid geopolitical changes and a shift towards a "local for local" approach. Schäfer said India would be an important beneficiary of the realignment, with the group planning to build greater capacity in the country.

"We will build up capacity in India because it is not only cost-efficient, it's also from the skills and availability of focused tech, it is really good in India," he said.

Schäfer said Volkswagen had historically been over-reliant on its European, particularly German, engineering set-up, but was now looking to distribute capabilities across regions.

"So a lot more focus on India for two reasons. A, because we need to right-size Europe, but at the same time, we need to build this up because there's also local opportunity that can be used for local markets plus exports and upcoming FTA," he said.

India already has a growing engineering footprint within the group, including its Technology Centre in Pune. The country has also emerged as an export base, with more than 700,000 vehicles shipped to over 40 countries.

Volkswagen is also evaluating a local partnership as it reassesses its India strategy, with Schäfer confirming that discussions have been held with several potential partners, although no decision has been announced. "We have also been talking to local partners, talking to a few, and we believe that's a good way forward, but it's too early to announce anything," he said. "It's not there yet. It's not years away."

Schäfer said India's cost-efficient manufacturing and development base could gain further importance as free trade agreements open opportunities for exports, while also allowing Volkswagen to potentially bring niche models from Europe to India at more competitive costs. "India, for us, has been an export country. It has exported to more than 40 countries over the past years," Schäfer said.

YEIDA

Building Viksit Bharat@2047 through SAPTA DHARA - the 7 streams of development

Sapta Dhara is a seven-pillar vision of the Prime Minister of India for building a Viksit Bharat by 2047.

It emphasizes manufacturing, agriculture, technology, connectivity, defence self-reliance, green growth, and cultural influence.

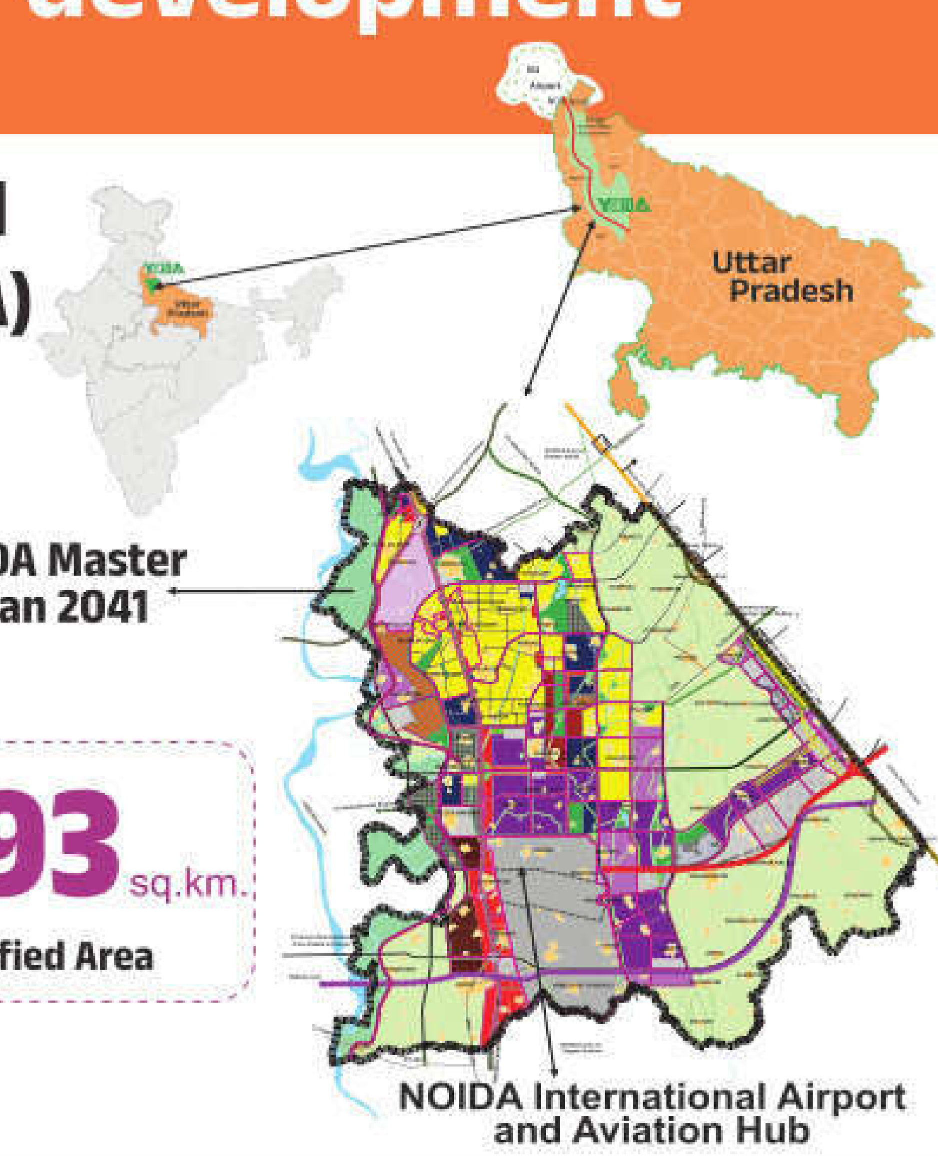
The initiative aims to make India a global hub for innovation and production.

YEIDA is working on a comprehensive roadmap for a prosperous and developed India by 2047.

Yamuna Expressway Industrial Development Authority (YEIDA)

6 Districts | **3,352** sq.km. YEIDA Notified Area

2 Phases | **759** sq.km. Phase-1 Notified Area | **2,593** sq.km. Phase-2 Notified Area



Twenty-five years ago, the Yamuna Expressway Industrial Development Authority (YEIDA) began with a vision of planned development along one of Uttar Pradesh's most important emerging corridors. Today, that vision is taking shape as a powerful ecosystem where industry, infrastructure, mobility, technology, commerce and urban development converge.

Strategically located between the National Capital Region and the major industrial and commercial centres of western Uttar Pradesh, YEIDA has emerged as one of the country's most promising growth destinations. Its location provides access to Noida, Greater Noida, Delhi-NCR, Agra and the wider northern Indian market, while its expanding network of expressways, rail links and aviation infrastructure is creating a compelling proposition for investors and enterprises.

The transformation is already reflected in the numbers. Between 1 April 2017 and 28 February 2026, YEIDA allotted 2,282 industrial plots covering 2,730.85 acres, attracting investments of Rs 50,546.68 crore and generating an estimated 3,91,212 employment opportunities. These are not merely numbers of investment; they represent the emergence of a new industrial and employment landscape.

1. Gati Shakti and Connectivity

Expanding Seamless, High - speed multi-modal infrastructure

Noida International Airport

India's New Global Gateway situated at the Doorsteps of YEIDA

Spread over 11,742 acres, the airport became operational for commercial passenger services on 15 June 2026, making it NCR's second major airport. Phase 1 has an annual passenger-handling capacity of 12 million, with the larger airport designed for substantial future expansion. IndiGo already connects 16+ destinations (Amritsar, Bengaluru, Bareilly, Bhopal, Chandigarh, Dehradun, Dharamshala, Hyderabad, Jaipur, Jammu, Jodhpur, Kishangarh (Ajmer), Lucknow, Pantnagar, Navi Mumbai, Srinagar) from here.

AVIATION HUB

The airport has earmarked 40 acres for a dedicated Maintenance, Repair and Overhaul (MRO) facility, supporting its emergence as a major aviation services hub.

A Corridor Designed for Seamless Connectivity

Connectivity is at the heart of YEIDA's growth story.

The 165.5 km, six-lane Yamuna Expressway (expandable to eight lanes) provides the principal north-south spine linking Greater Noida with Agra. The region is further strengthened by the Eastern Peripheral Expressway, connecting the corridor with Palwal, Manesar, Ghaziabad, Baghpat, and Meerut. A dedicated road link connects the airport with the Delhi-Mumbai Expressway, while the planned Palwal-Khurja Expressway will further expand regional connectivity. A 130 metre-wide road links Greater Noida with the YEIDA region, with a network of wide internal roads providing additional access to industrial and urban sectors. The multimodal network goes beyond roads: the Eastern Dedicated Freight Corridor, with connectivity through New Chola and planned airport-DFC linkages, will facilitate efficient movement of industrial cargo. The region is also set to benefit from the Orbital Rail, the proposed RRTS-cum-Metro, and the planned high-speed rail corridor between Delhi and Varanasi, with a station at Noida International Airport. YEIDA has also proposed metro connectivity linking the region with Greater Noida, Noida, and Delhi.

Logistics Park: The proposed 364-acre park at Tappal-Bajna Urban Centre is being planned as a strategic logistics hub to meet growing cargo requirements, particularly for Noida International Airport. Designed to leverage air, rail, and road connectivity, it will support industrial growth and serve an extended regional catchment across Uttar Pradesh, Haryana, Rajasthan, and Delhi.

FROM MANUFACTURING TO MARKETS - FASTER

Turning connectivity into commerce

The airport's dedicated cargo infrastructure gives YEIDA a decisive edge for high-value, time-sensitive and export-oriented industry.

Operated by AISATS, the cargo facility opens with an initial handling capacity of 200,000 metric tonnes a year — scalable to 1.5 million tonnes. Digital cargo systems, warehousing and logistics infrastructure are built to serve e-commerce, freight forwarders and time-sensitive supply chains across electronics, medical devices, apparel and handicrafts.

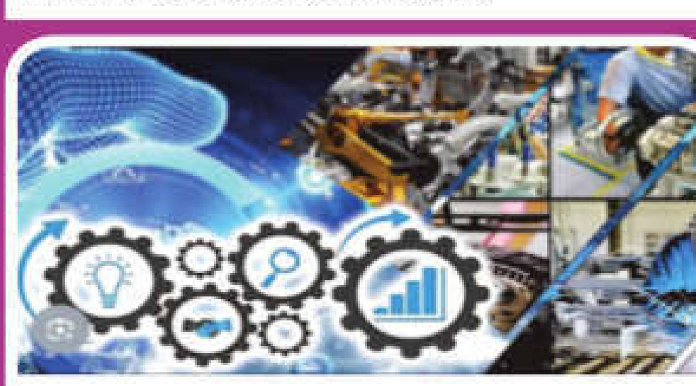
MANUFACTURE HERE
MOVE FASTER
REACH MARKETS FURTHER

Combined with expressway connectivity and the wider NCR market, YEIDA's cargo capability compresses the distance between the factory floor and the global customer.

2. MANUFACTURING POWER

Building Complete value chains from design to production to make India a trusted global supply chain hub.
YEIDA's industrial strategy is built around specialised clusters rather than a one-size-fits-all industrial model

Apparel Park: The 175 acre Apparel Park is being developed as a dedicated production-and-export ecosystem, with provision for around 100 units and a Common Facility Centre offering testing, design, training, R&D and marketing support.



MSME Park: The 288 acre MSME Park is designed to support a diverse base of small and medium enterprises.

Handicraft Park: The 123 acre Handicraft Park provides a dedicated ecosystem for handicrafts and related manufacturing.

Toy Park: The 100-acre Toy Park in Sector 33 has provision for a Common Facility Centre, green spaces, transportation and commercial facilities, with plots ranging from 1,000 to 10,500 sq. metres.

Japanese, Singapore, Taiwan and Korean City

YEIDA's international orientation is reflected in the 500-acre Japanese City in Sector 5A and the 500-acre Korean City in Sector 4A and Singapore City in Sector-7, and 300-acre in Taiwan City in Sector-6, located approximately 4 km and 5 km respectively from Noida International Airport, creating dedicated spaces for global businesses, investment, and international collaboration.

Medical Devices Park:

The 350-acre park is a specialised hub for indigenous medical-device manufacturing, targeting cancer-care and radiotherapy equipment, radiology and imaging, anaesthetics, cardio-respiratory devices, renal-care equipment, and implantable electronic devices. 124 plots allotted in Phase 1 to companies making products from orthopaedic implants and X-ray machines to ventilators, oxygen concentrators, and anaesthesia equipment.

3. TECHNOLOGY & INNOVATION

Focusing on Advanced Technology

SEMICONDUCTORS: BUILDING THE TECHNOLOGY BACKBONE

The Semiconductor Park with a 1000 acre land bank across Sector 28 & 10 is designed for the manufacturing & fabrication of semiconductors and semiconductor devices supported by high capacity power, water and sewage infrastructure. Existing investments and allotments involve India Chip Private Limited (JV of Foxconn and HCL Group), to set up an Outsourced Semiconductor Assembly and Test (OSAT) facility at Sector-28, YEIDA. The advanced OSAT facility is expected to be operational by 2028.

ELECTRONICS MANUFACTURING CLUSTER PARK (EMC)

Building the Technology Backbone ELECTRONICS MANUFACTURING CLUSTER (EMC) PARK Yamuna Expressway Industrial Development Authority is developing ELECTRONICS MANUFACTURING CLUSTER (EMC) PARK in Sector-10 YEIDA that provides integrated infrastructure for electronics manufacturers-rather than functioning as a standard industrial estate. It includes industrial plots, flatted factories, common facility centres, internal roads, utility services, skill development centres, employee accommodation, and commercial spaces, so manufacturers can set up operations quickly while sharing infrastructure and supply-chain connectivity. The total area of the EMC Park is 206.40 acre. The big allotments in EMC Park are M/s Havells India Ltd. (Anchor Unit), M/s Polynomous Industries Pvt. Ltd. & M/s Ascent K Circuit Pvt. Ltd.

DATA CENTRE PARK

The Data Centre Park in Sector 28 adds another dimension to the digital economy. A 50 acre park, with two plots totalling 10 acres already allotted, is strategically located close to the aviation hub.

SOFTWARE/IT PARK:

The Software/IT Park, spread over 60 acres, is planned with 19 plots and dedicated infrastructure, including high-capacity power, water supply and a 60-MLD STP.

Its proximity to the aviation hub is intended to support technology-driven businesses and services.

4. AGRICULTURE AND FOOD PARK

Moving Beyond Basic Crop Production Toward Advanced Food Processing And Farm Modernization

430 acre of land reserved in sector 24 for agriculture food park, food processing unit and Herbal products unit.
A modern mandi for marketing of agriculture produce coming up in sector 36

5. GREEN ECONOMY

Promoting renewable energy

YEIDA is operating 3 hydrogen buses under green hydrogen based mobility project.

YEIDA is operating 25 electric buses to be expanded to 100 within short period.

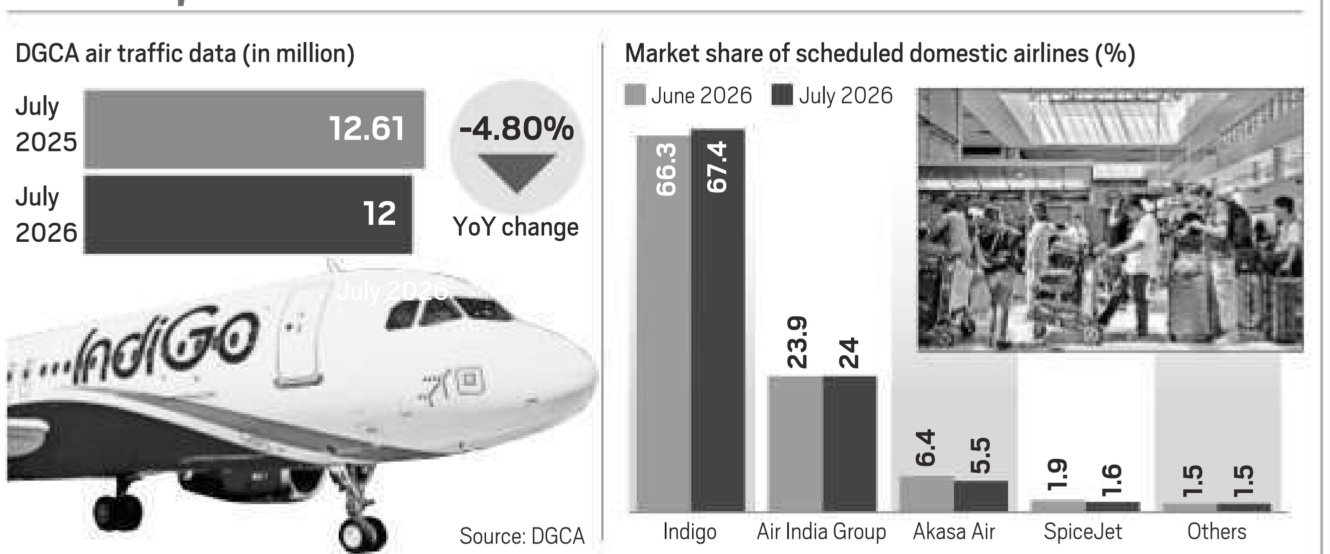
MKT LEADER NOW AT 67.4%; SPICEJET HITS MULTI-YEAR LOW AT 1.6%

IndiGo gains market share despite fall in July air traffic

NITIN KUMAR
New Delhi, August 20

INDIGO, TATA GROUP CORNER OVER 90% MARKET



THE DOMESTIC AVIATION market witnessed another month of contraction in July, with passenger traffic falling 4.8% sequentially as airlines continued to rationalise capacity. Market leader IndiGo, though, further strengthened its dominance taking its market share beyond 67% for the first time.

On the other hand, SpiceJet hit a multi-year low across key operational metrics during the month, with its domestic market share plunging to just 1.6% down from 3.9% in January 2026.

According to data released by the Directorate General of Civil Aviation (DGCA) on Thursday, domestic airlines carried 12 million passengers in July compared to 12.6 million passengers in July 2025. Traffic was also lower than the 13.46 million passengers in June 2026.

The decline comes after the sharp summer travel peak in May with airlines continuing to calibrate capacity and network deployment amid changing demand conditions.

Despite the contraction in monthly traffic, passenger numbers during the first seven months of the year remained marginally higher than last year.

Domestic airlines carried 98.4 million passengers during January-July 2026, up 0.64% from 97.78 million passengers in the corresponding period last year.

IndiGo emerged as the biggest beneficiary of the capacity realignment, with its domestic market share rising to a record 67.4% in July, up from 66.3% in June. The airline carried 8.08 million passengers during the month, accounting for more than two-thirds of all domestic air traffic.

The increase further consolidates IndiGo's position in the domestic market at a time when overall traffic is contracting. The airline's market share has risen steadily through the year, from 63.6% in January to 67.4% in July.

The Air India Group, meanwhile, retained a 24% share of the domestic market in July, broadly unchanged from 23.9% in June. The group carried 2.88 million passengers during the month, compared with 3.22 million in June.

Together, IndiGo and the Air India Group accounted for 91.4% of domestic passenger traffic in July, highlighting the increasing concentration of the Indian aviation market around the two major airline groups.

Akasa Air's market share declined to 5.5% in July from 6.4% in June, while SpiceJet's share fell further to 1.6% from 1.9%. Akasa carried 0.67 million passengers during the month, while SpiceJet carried 0.19 million.

Regional carriers Alliance Air, Star Air, Fly91 and IndiaOne Air continued to account for a relatively small portion of the market.

Passenger load factors remained healthy despite the decline in traffic, suggesting that airlines have been able to align capacity with demand. Akasa Air recorded the highest load factor among the major carriers at 91.9%, followed by Air India Group at 83.2% and IndiGo at 82.4%.

Swiggy bets on inventory model for Instamart ops

ABINAYA V & PRAVEEN PARAMASIVAM
August 20

SHAREHOLDER APPROVAL FOR Swiggy's foreign ownership cap will let its quick-commerce unit Instamart switch to a potentially more profitable inventory model as the delivery platform plays catch-up with market leader Blinkit in a highly competitive sector.

Instamart has operated under a marketplace model since launching in August 2020, earning commissions on products sold in India's \$11.5 billion quick-commerce market. The approval gives Prosus-backed Swiggy the status of an Indian-owned and controlled company (IOCC), required under the country's foreign investment rules to hold inventory.

"The first benefit is bulk-buying advantage. Second, they can share data analytics with their brand partners and third, wastage will be less," Anand Rathi analyst Shobit Singhal said.

An inventory-led model could improve Instamart's margins, particularly in higher-value categories, while giving it greater control over pricing, assortment and supply chains, analysts said.

Swiggy has said the transition could add about 80 basis points to Instamart's contribution margin, which measures revenue after variable costs. "That's about ₹4-5 an order — about a sixth of the ₹30 an order it needs to break even," said Samarth Patel, associate vice president, Equirus Securities.

Instamart's first-quarter contribution margin was negative 0.2%, against negative 1.8% in the previous quarter.

Eternal's Blinkit, which moved to an inventory-led model last year, has logged overall margin improvement for five straight quarters, turning positive in the March 2026 quarter.

The company attributed this to inventory ownership, supply-chain efficiencies and a move into higher-margin categories including electronics, home decor and gourmet foods.

Swiggy, which went public in 2024, is yet to turn profitable. Earlier this month, it set a fiscal 2031 target to turn earnings per share positive.

The shift, however, would result in higher working capital to fund purchases and manage stock, brokerage Jefferies said in a note. Eternal said last month that working capital at Blinkit was "largely driven by inventory ownership".

Swiggy and Eternal have been investing heavily in quick commerce to expand beyond groceries into higher-margin categories, jostling for consumer attention alongside deep-pocketed rivals such as Amazon India, Walmart's Flipkart and Reliance. —REUTERS

Adfactors PR buys majority holding in Australian firm

FE BUREAU
New Delhi, August 20

ADFACTORS PR, THE country's largest reputation and critical issues advisory firm, has acquired a majority stake in Australia-based independent communications consultancy SenateSHJ, expanding its presence in the Asia Pacific region. SenateSHJ will retain its identity and continue to operate from Sydney and Melbourne under co-founder and Chair Angela Scaffidi AM and CEO Darren Behar. Adfactors CEO Nijay N Nair will join the SenateSHJ board.

Adfactors co-founder and Managing Director Madan Bahal said the two firms had strong alignment in how they viewed clients, people and the role of communications, adding that India and Australia were emerging as a strategic business corridor. "We hope to explore more opportunities in the region to create a strong Asia Pacific presence," he said.

Adfactors co-founder and Chairman Rajesh Chaturvedi said the partnership would expand the firm's relationship capital into Australia.

Scaffidi said the problems clients bring to the firms increasingly cross borders and the partnership would allow SenateSHJ to address more of them without changing what has made this firm what it is.

NSE plans allowing shares to trade on own platform

- NSE may need Sebi nod for the arrangement

RAJESH MASCARENHAS

STRATEGIC MOVE

- Move could eventually shift trading volumes and pave the way for stock's inclusion in NSE's benchmark indices
- Shares could trade in the "permitted to trade" category though they would list on the BSE
- About 250 companies that aren't listed on NSE currently trade on its platform
- For investors, NSE shares could become available for trading on its own platform
- The bourse is targeting to lauch the IPO in the second half of September
- Arrangement could give NSE shares access to liquidity on both the exchanges

THE NATIONAL STOCK Exchange may allow its shares to trade on its own platform after listing them on the BSE, sources said. The move could eventually shift trading volumes and pave the way for the stock's inclusion in NSE's benchmark indices.

The possibility was discussed with global investors during recent road shows for the exchange's proposed initial public offering, the people said, asking not to be identified because the deliberations are private. Under the proposal, NSE shares could trade in the "permitted to trade" category even though they would formally list on BSE, sources said.

The present regulations do not provide for the self-listing of a stock exchange. The NSE, which is classified as a market infrastructure institution, would need approval from the Securities and Exchange Board of India (Sebi) to allow its shares to trade on its own platform, the people said.

Discussions are ongoing and any such move would ultimately depend on regulatory approval, they said. A representative for NSE didn't respond to requests for comment.

The "permitted to trade" framework allows securities to trade on the NSE without being formally listed, with their compliance and disclosure obligations unchanged, according to NSE's website. The NSE revised index eligibility rules in 2019 to allow such securities to qualify for inclusion in the Nifty indexes, India's most broadly followed gauges. Previously, only shares formally listed and traded on the exchange were eligible.

About 250 companies that aren't listed on NSE currently trade on its platform under the permitted-to-trade category. They include Elantas Beck India, Goodyear India and Novartis India.

The arrangement could give NSE shares access to liquidity on both the exchanges while retaining BSE as the primary listing venue, adding another dimension to what is expected to be one of India's most closely watched IPOs.

The NSE expects to receive Sebi's approval for its draft prospectus by the end of August and is targeting an IPO launch in the second half of September, people familiar with the matter have said.

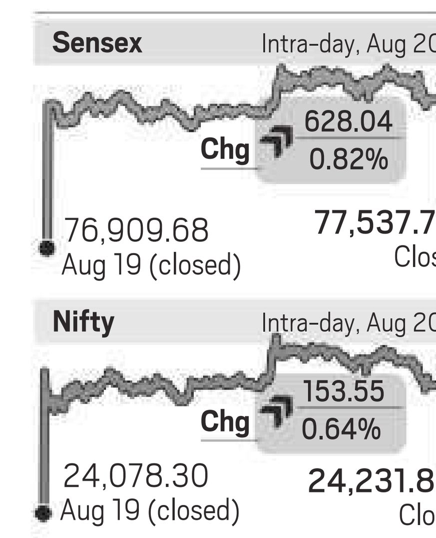
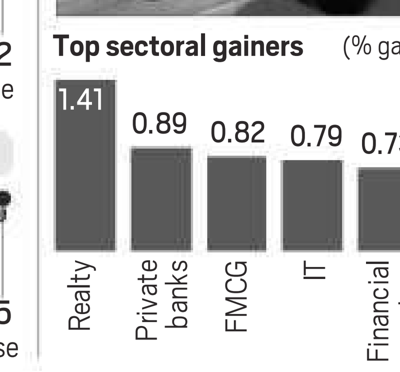
Indices snap 7-day losing streak, Sensex up 628 pts

KISHOR KADAM
Mumbai, August 20

GLOBAL BOOST





SNAPPING A SEVEN-DAY losing streak, the benchmark equity indices gained by around 0.82% on Thursday, tracking a rally across other Asian markets following stabilisation in global bond markets. Sentiment improved after the US Treasury announced measures to increase buybacks of long-duration debt by at least double, easing concerns over rising global yields.

The Sensex jumped 628.04 points, or 0.82%, to close at 77,537.72, while the Nifty gained 153.55 points, or 0.64%, ending the session at 24,231.85.

In the preceding seven sessions, the Sensex and Nifty had declined by about 2% each, marking their longest losing streak in nearly a year, as concerns over rising oil prices and geopolitical uncertainty continued to weigh on market sentiment.

"Markets found much-needed relief after the US Treasury stepped in to contain the surge in global bond yields, triggering a strong broad-based rebound and ending the domestic market's week-long losing streak," said Vinod Nair, head of research, Geojit Investments.

The intervention dragged down the dollar, which, along with a firmer rupee and easing yield pressures, boosted the attractiveness of emerging markets, Nair added.

A stronger rupee and short covering following the recent correction further supported the recovery, said Ajit Mishra, senior vice president — research, Religare Broking.

However, Brent crude remained elevated near $94 per barrel amid continuing geopolitical tensions and uncertainty surrounding the Strait of Hormuz, keeping inflation and external-sector risks on investors' radar, Mishra added.

Investors' wealth rose by ₹2.71 lakh crore on Thursday, recouping nearly half of the ₹5.46 lakh-crore loss recorded during the preceding seven sessions. The overall market breadth was positive, with 2,450 gainers against 1,874 losers on the BSE.

ACKNOWLEDGE HAWKISH TONE IN MPC MINUTES

Economists don't see RBI hiking rate in October

FE BUREAU
Mumbai, August 20

AT A GLANCE

- QuantEco said December has now become a "live option" for the rate hike
- Trigger for tightening to curb demand was still absent, says Nomura
- SBI Research maintains its call for a prolonged pause through FY27

THE MINUTES OF the Reserve Bank of India's latest monetary policy meeting have signalled a shift in the debate from further monetary easing to policy normalisation, raising the prospect of a rate hike later this year, even as the October review is likely to see another pause.

"The debate within the committee has now shifted from how much further accommodation is available to when normalisation ought to begin," QuantEco Research said, pointing to a clear change in the tone of the minutes from the previous policy cycle. It expects the RBI to hold rate in October, but said December has now become a "live option" for the rate hike.

The minutes were hawkish than the August policy statement, with Governor Sanjay Malhotra referring to the possibility of recalibration and Deputy Governor Poonam Gupta flagging a case for a hike. The shift comes even though there is, as yet, no clear evidence that the recent increase in food prices is broadening into a more persistent, demand-driven inflation problem.

Nomura said the minutes were "more hawkish than we expected" but argued that the trigger for tightening to curb demand was still absent. It said a rate move could eventually be justified by inflation settling at higher levels and the normalisation of real interest rates, even without a significant increase in core inflation.

For now, the MPC is likely to wait for more evidence. By the October meeting, it will have two additional inflation prints, first-quarter GDP data and greater clarity on the monsoon. The trajectory of crude oil prices and geopolitical risks will also be clearer.

"The uniform preference of almost all members to wait for more evidence and clarity suggests that a rate hike in the October policy is unlikely," ICICI Securities Primary Dealership said.

It estimates the current odds of an October hike at around 20%, although a sharp upside surprise in inflation or sustained crude prices of $85-95 a barrel could alter that assessment.

'FY27 GDP growth may be close to 7%'

FE BUREAU
Chennai, August 20

POONAM GUPTA,
DEPUTY GOVERNOR, RBI

Our inflation-targeting framework has served us well

INDIA'S REAL GDP growth in FY27 could well surpass the Reserve Bank of India's 6.7% projection, driven by resilient domestic economic activity, even as the triple challenges of US tariffs, higher oil prices and heightened global uncertainty continue to unfold, Reserve Bank of India (RBI) Deputy Governor Poonam Gupta said on Thursday.

Gupta said while growth in the first quarter is likely to be upwards of 7% based on the high-performance indicators, some private forecasters have projected it as high as 7.5%. "It means that a year-around growth rate can be much higher, close to 7%."

Gupta said the growth outlook comes against the backdrop of a triple shock of higher oil prices, US tariffs and extreme global uncertainty. "You have a possibility of rainfall not being as conducive, and your economy is growing close to 7%. That speaks to the resilience of the economy."

She was addressing an event hosted by the Madras School of Economics.

At its MPC meeting earlier this month, the RBI projected real GDP growth at 6.7% for FY27, with growth estimated at 7% in the first quarter, 6.4% in the second, 6.5% in the third and 6.8% in the fourth quarter. Gupta said domestic growth had accelerated, become more stable and broad-based, while inflation had declined steadily over the past decade and remained relatively stable.

She also noted that the financial sector is not just resilient but has become much more efficient

Other members of the central board include Revathy Iyer, a retired officer from the Indian Audit & Accounts Service, who went on to become the deputy comptroller and auditor general, government accounts, and Sachin Chaturvedi, Director General of think tank Research and Information System for Developing Countries. —PTI

'Capital position to improve further with stake sales in SBI Funds & NSE'

MANJU AB
& JOYDEEP GHOSH

What are some of the new structures that will come up to fund bank balance sheets?

In most Western countries, bank funding is a judicious mix of market borrowings and deposits. We may not get into that situation immediately because we still have a long way to go in terms of moving towards market borrowings. But it is better that the banking system prepares for that.

Securitisation could be one of the ways. The question is how we bring liquidity to the illiquid asset pool on our balance sheets. If we develop good securitisation structures, there are pension funds and insurance companies that require long-term paper.

If you look at the market today, there is not much long-term papers available other than G-Secs. Corporate bonds are typically for five years. So, whether banks can provide longer-term paper is something we will have to seriously examine. Mortgages typically start with a tenure of 25 years, but their average life is 12-15 years. Banks can, therefore, issue 10-year term papers.

You have guided for credit growth of 14-15% for FY27, while deposits are expected to grow at 10-11%. Will this imbalance remain a concern?

We have a huge deposit base of ₹60 lakh crore. Even at a 10% growth, it generates very significant liquidity on our balance sheet.

We also have more than ₹4 lakh crore of excess SLR. That gives us the opportunity to maintain a balancing act, particularly on the bulk-deposit side. This has helped us manage our liabilities very efficiently.

> MOST NOTABLE CHANGE WE HAVE MADE OVER THE PAST 2-3 YEARS IS USING DIGITAL AND DATA ECOSYSTEM TO UNDERWRITE MSME LOANS

Credit demand suddenly seems to be powered by data centres, AI and certain new sectors. Estimates peg the funding requirement at around ₹30 lakh crore. How is SBI gearing up to meet that challenge?

Historically, majority of such funding requirements in India have been met by banks as they are the primary mobilisers of household savings. In my opinion, banks will continue to have a major presence in the funding landscape in the near future as well.

With its centre of excellence — CHAKRA, SBI is strengthening its institutional capability to understand these emerging sectors, design specialised financing solutions and partner with the ecosystem to enable projects that meaningfully contribute to the nation's development journey.

However, I also believe that we may need more institutions like NaBFID and the NIIF (National Investment and Infrastructure Fund) for the specific purpose of addressing long-term financing gaps in the infrastructure sector. The entire financial system has to contribute to the capital pool.

A growth lever that the RBI has opened up for domestic banks is M&A financing. Has SBI made progress on this?

We have done four transactions worth around ₹11,000 crore. We have a pipeline with visibility of another ₹15,000 crore, comprising six-seven deals.

Besides manufacturing, we are seeing opportunities in non-conventional sectors such as software, which normally do not borrow from us. There could be consolidation in many of these sectors. We will evaluate those funding opportunities and build the book in a very calibrated manner.

This is not a scale-oriented business. But in many cases, both the acquirer and the target company are our customers. To that extent, it becomes easier for us to understand the transaction.

Strengthening the bank's capital position was one of your key agendas when you took over at the helm in August 2024. How has it progressed?

When I took over, our CET1 and CRAR were 10.25% and 13.86%. We are looking to maintain CET1 capital of 12% and CRAR of 15% through the cycles.

With the capitalisation we have undertaken so far and the profit accretion that happens every year, I am confident that we will be able to maintain these ratios even if a robust credit growth continues.

We raised ₹25,000 crore last year through one of the largest QIPs in the industry. We also had a couple of monetisations on our radar. The recently concluded stake sale in SBI Funds Management and the proposed NSE divestment will further augment our capital position.

You had said around 70% of people with salary accounts at SBI had not been tapped for wealth management. How has that progressed over the past couple of years?

It is progressing well. Over the past two years, we have strengthened our integrated wealth-management platform and our relationship teams, largely by hiring from the market.

But we also realised that apart from wealth customers looking for investment products, there is a large number of high relationship-value customers who primarily want good-quality service. They also bring in more deposits. For them, we have created virtual relationship manager teams.

We are looking to have at least 2,000 virtual relationship managers, with each serving around 400-500 customers.

We are following a different model. It is not private banking, and it is not completely focused on investments. We want customers to be comfortable. Initially, they come to us with their savings. When they become comfortable moving into investments, we are ready to service them.

> IF WE DEVELOP GOOD SECURITISATION STRUCTURES, THERE ARE PENSION FUNDS AND INSURANCE COMPANIES THAT REQUIRE LONG-TERM PAPER

It is not about pushing them every day to buy something. That is the ecosystem we would like to create around wealth management.

The government seems to be giving the MSME segment a push. How do you see the opportunity?

Most mainstream banks have returned to MSME lending in a big way because there is greater visibility today in their operations, sales and revenue models.

Over the past five to six years, we have strengthened our relationship teams for MSME funding across the country. Today, SBI deploys more than 2,000 dedicated personnel for MSME lending. I do not think any bank has such a large number of relationship managers on the ground.

The most notable change we have made over the past two-three years is using the digital and data ecosystem to underwrite MSME loans. Credit growth in the MSME segment is now around 20%.

Make more in India

Pixel shift offers India a chance to scale up its manufacturing game to win business

GOOGLE IS REPORTEDLY planning to move the production of its Pixel smartphones, smartwatches, and wireless earbuds out of China from 2027. The move is hardly surprising: persistent US-China tensions are prompting technology majors to diversify their supply chains and reduce their dependence on one country. Vietnam and India are expected to be the principal beneficiaries, although Vietnam has an early advantage. Google already has a well-established supplier network there and has reportedly begun developing and manufacturing its high-end Pixel smartphones in the country. This is an opportunity India can't afford to miss. Admittedly, India cannot yet boast of a manufacturing ecosystem as large or sophisticated as China's. Nor does it possess Vietnam's product-development and design capabilities or its Samsung-led network of smartphone suppliers, engineers, and factories. But these gaps are precisely what India must now work to close.

India's efforts to position itself as a global manufacturing hub have begun to yield results. Apple, which started assembling iPhones in Bengaluru through Wistron, now works with several manufacturers including Tata Electronics and Foxconn. India produces roughly one in every five iPhones sold globally, while iPhone exports from the country crossed $23 billion in calendar year 2025. More than 40 companies now reportedly make components and accessories for Apple devices. Overall electronics exports touched a record of nearly $48 billion in FY26, signalling that the country is becoming an important part of global electronics supply chains. Critics rightly point out that domestic value addition remains relatively low, at around 20-22%, and that manufacturers continue to depend heavily on imported sub-assemblies and high-value components such as semiconductors and displays. But the ability to manufacture sophisticated products cannot be built overnight. The real concern would be if India remained content with assembly instead of acquiring the technological and design capabilities required to move up the value chain.

Google may not initially shift the development and manufacture of its most advanced Pixel devices to India. Even so, India must secure a meaningful portion of the production technology companies relocate from China. While the production-linked incentive scheme has demonstrated that targeted incentives can help overcome hudles, subsidies cannot permanently compensate for deficiencies in infrastructure, logistics, skilled labour, and the ease of doing business. Global manufacturers need reliable power, efficient ports, predictable regulation, and a deep base of local suppliers. They also need confidence that factories can be established and expanded without being slowed by multiple clearances, policy uncertainty, or high compliance costs. The next phase of policy must therefore concentrate as much on strengthening the component ecosystem and developing skills as on attracting headline investments.

This matters well beyond electronics. At a time when India is seeking larger flows of foreign direct investment, an advanced manufacturing base capable of handling complex production can become a powerful magnet for global capital. Yet manufacturing's share of real GDP has remained broadly unchanged at around 17-18%, well short of the long-standing ambition of raising it to 25%. As geopolitical tensions persist and multinationals diversify their risks, India has a rare opening to become a reliable link in global supply chains across industries. Apple has shown what is possible when policy support and corporate strategy come together. The task now is to replicate that success across more companies and products — and ensure that India does not merely make more, but makes more of the value embedded in them.

Off-grid data centres will not be good neighbours

AS A FOREST of pitchforks approaches America's data centres, Big Tech can turn to a time-tested strategy: Hiding. As in, behind the meter. That phrase refers to onsite power generation that can offer backup for data centres or, at the extreme, let them bypass the electricity grid completely.

The latter seems increasingly attractive because of years-long wait times for a grid hookup, now compounded by growing general opposition to data centres. When Governor Greg Abbott of Texas unexpectedly paused grid connections for data centres earlier this month, shares of traditional power plant operators took a hit, but stocks bounced for companies that make the engines and turbines for generating power separately. As if to punctuate this, it emerged that Amazon.com has begun work on a giant data-centre campus in West Texas hosting up to 7.65 gigawatts of gas-fuelled power, more than the entire generating capacity of some states.

But going off-grid comes at a steep cost and could actually make the hyperscalers bigger targets, not smaller ones. Just like hospitals or even houses, data centres routinely install some backup power to keep running if the grid falters. That's different from going off-grid altogether. The benefit of going it alone is that companies avoid waiting perhaps four years or more for the local utility to connect them, with onsite generation up and running in something more like 18 months — a significant advantage in the accelerating AI arms race. Self-powering also offers a rebuttal to criticism that data centres are raising utility bills for their neighbours.

LIAM DENNING

Bloomberg

It's a beguiling argument, but half-baked. Maddening as the power grid can be, it has three advantages: It's the cheapest source of electricity; it is not perfect but still remarkably reliable; and it already exists. There is a reason hyperscalers previously tried to cut deals to hive off some of that valuable grid for themselves (helping fuel the backlash against data centres).

Going off-grid means obtaining not just the generators but all the associated equipment, too, much of which is also backlogged. You also have to install more than you need to replicate the grid's big selling point — redundancy — because your turbines can also go down. That reduces utilisation, raising unit costs further, which can then be compounded if your data centre does hook up to the regular grid.

Hyperscalers aren't known for their sensitivity to energy costs, so maybe none of the inefficiencies matter to them. If the US is engaged in a battle for AI supremacy with existential consequences, why not reach for the quickest, if imperfect, solutions?

Most Americans don't view data centres as essential defence assets but rather as unsightly, resource-hogging nuisances that enrich the superwealthy and make a "product" that could put them out of a job. Despite AI's potential, and real tax windfalls for some localities that host data centres, they have an image problem that has festered. Hyperscalers fumbled the important selling point that, done right, the extra load that data centres put on the grid could actually reduce bills by spreading the network's fixed costs across more kilowatt-hours. Withdrawing from the grid would kick away that pitch and magnify the disconnect between AI factories and local communities.

The pollution aspect is also important. There is already a legal battle over gas turbines installed without an air permit to power a Memphis data centre owned by xAI, a unit of SpaceX. The Sierra Club and Public Citizen contend that another data-centre project, in San Antonio, is effectively bypassing regulatory obligations for significant sources of pollution and have signalled their intent to file suit.

There are other routes to solving AI's power quandary, which involve a mix of demand response, batteries and, yes, behind-the-meter generation — but in the context of also being active participants on the grid. Retreating to islands, and letting everyone around cope with the consequences, isn't going to fly. Rather, developers must work harder to demonstrate benefits they can offer to the communities in which they land and must integrate somehow.

GREEN SOLUTION

INDIA COULD SOON PRODUCE UREA USING LITTLE MORE THAN WATER, AIR, AND SUNLIGHT

Urea self-reliance within reach

CHANDRA BHUSHAN

CEO, iFOREST

UREA IS THE fertiliser Indian farmers rely on most. While its widespread misuse has contributed to soil infertility and to air and water pollution, it is equally true that without urea, India would struggle to sustain food production for a population of 1.45 billion and growing. India therefore needs to do two things simultaneously: optimise urea use in its fields and ensure that farmers get it without disruption.

A few months ago, that supply was severely disrupted by the US-Iran war. Since more than 80% of the urea India uses is either made from imported natural gas or bought directly from other countries, the shock was severe. The price of imported urea doubled to ₹90,000-95,000 a tonne, and suppliers were reluctant to ship to India. Prices have since halved and supplies have been restored, but the calm is deceptive. The fuse lit in West Asia will keep sparking, and with it the price of natural gas — and of the urea — on which Indian agriculture depends. The lesson is clear: India must learn to produce urea without depending on imported natural gas.

Made from air and water

For years, making urea without natural gas seemed like alchemy. That alchemy now has a name: green urea — fertiliser made, quite literally, from air and water. This is how it is produced: Renewable electricity from solar and wind is used to split water into hydrogen and oxygen. The hydrogen is combined with nitrogen drawn directly from the air (remember 70% of air is nitrogen) to make green ammonia. The ammonia is then reacted with carbon dioxide (CO_2) captured from the flue gas of factories that would otherwise release it into the atmosphere and warm the planet. The result is urea made without fossil fuels.

Policy complementarity

Green urea, long dismissed as too expensive to be practical, is now within reach because of two developments.

The first is that green ammonia has become much cheaper. The National Green Hydrogen Mission, launched in 2023 to make India a global hub for green hydrogen and ammonia, has driven down prices through competitive bidding. Green ammonia is now available at about ₹50-60 a kg — the tipping point at which green urea becomes competitive with urea made from natural gas.

The second is the availability of CO_2. Here lies an irony: the gas whose billions of tonnes of annual emissions are the chief cause of global warming is also the hardest input for a urea maker to secure affordably, because urea synthesis needs concentrated, high-purity CO_2. Two government policies — neither designed with urea in mind — have changed the scenario.

One is the regulation to clean up thermal power. In 2015, the environment ministry directed power plants to install air pollution-control equipment, called flue-gas desulphurisation, to curb sulphur dioxide emissions. Scrubbing flue gas off from sulphur also makes the CO_2 in it far cheaper to capture. Power plants that installed these units to comply with a pollution rule are now among the country's largest potential CO_2 suppliers — and can earn from selling what they once vented.

The other is the ethanol programme. India's drive to blend petrol with ethanol to cut oil imports has quietly become its cheapest source of CO_2. Ethanol plants release roughly a tonne of high-purity CO_2 for every tonne of ethanol — exactly the grade urea synthesis needs — and the technology to capture it is already in wide use in India. At current ethanol production capacity, at least 10 million tonnes of CO_2 could be diverted to urea-making every year — enough to produce 13.5 million tonnes of green urea, more than India currently imports. A programme meant to cut oil imports is now providing feedstock that can cut urea and gas imports as well.

> **In a single move, India can cut its urea imports, reduce natural gas imports, save billions of dollars through import substitution, insulate its farmers from wars fought far away, and create thousands of jobs**

The beauty of green urea is that it does not need the few giant, integrated plants that dominate the industry today. It can be made in smaller merchant factories that buy green ammonia and CO_2 from nearby suppliers and combine them in a urea-synthesis unit. Smaller, local plants can produce urea close to where it is consumed, spread economic opportunity across the country, and create jobs in smaller towns. They would also shrink the massive freight bill — running into thousands of crores every year — that the government foots to move urea from ports and large plants to distant districts.

The windfall

The economics now make sense, and the government has noticed. The ministry of chemicals and fertilisers has recently issued an expression of interest inviting companies to set up green urea plants. With cheap green ammonia and CO_2, green urea can be produced today for under ₹45,000 a tonne — comparable to the cost of imported urea, but without the stress of import disruptions. By 2030, as clean energy becomes cheaper still, the price is expected to fall below ₹40,000 a tonne — cheaper even than urea made domestically from natural gas. Economic modelling by my colleagues shows that if India installs five million tonnes of green urea capacity by 2030 to replace imports, it will save about ₹1.5 lakh crore over 20 years.

Global fertiliser majors have understood this economics and are investing in green ammonia and urea because they see the future in it. Yara of Norway, the world's largest ammonia trader, for example, is aggressively developing partnerships for green ammonia in Saudi Arabia and India. When the industry's most hard-nosed players start locking in green supplies, the direction is not hard to read.

The prize of the green urea transition, therefore, is considerable. In a single move, India can cut its urea imports, reduce its natural gas imports, save billions of dollars through import substitution, insulate its farmers from wars fought far away, and create thousands of new jobs. That is what Atmanirbhar Bharat looks like in practice. What is needed now is to convert favourable economics into installed capacity. The technology is proven, the inputs are at hand, and the economics have turned. The only question is how quickly India chooses to act.

Direct listing route needs investor remedy

ANAND SHRIVAS

Assistant Professor of Law, Sai University, Chennai

IFSCA should come up with a definitive remedy to hold companies accountable for material misstatements; it can be used by investors to seek compensation

A COMPANY THAT does not need money may still need a market. A consultation paper on direct listing released by the International Financial Services Centres Authority (IFSCA) proceeds from that insight. In a direct listing, a company's outstanding shares are admitted to trading on a stock exchange without an IPO. Listing and capital raising, in other words, need not be the same economic event.

The commercial logic is sound. A company built on founders' capital and successive rounds of institutional investment may have no use for fresh funds yet still want visibility, a market valuation, and an orderly exit for early investors. Direct listing is now a well-established mechanism in jurisdictions with well-developed markets — such as the US, the UK, and Japan — that have permitted it. Spotify's listing on the New York Stock Exchange in 2018 is a great example of a prominent company using this route to go public.

Given its nature, direct listing rests on a foundation of trust. For investors, a company that has never made a public offer has no history of standardised reporting to fall back on. The information document is effectively the principal issuer-prepared disclosure document available to them at the time of listing. Recognising this limitation, the consultation paper prescribes eligibility conditions, due diligence by a registered investment banker, a valuation-based price, and a special pre-open price discovery session. What it does not do, however, is state what happens when any information provided in such a document turns out to be false or misleading.

The American experience shows why such omission matters. In the case of Slack's 2019 direct listing, an investor alleged, after the share price subsequently declined, that the registration statement contained material misstatements. The Supreme Court held that a claim under Section 11 of the Securities Act of 1933 required him to prove that the shares he bought were traceable to the defective statement. Since the two classes had become indistinguishable in ordinary trading, that was close to impossible, and the decision made Section 11 claims extremely difficult in such direct-listing circumstances. *Slack Technologies, LLC v. Pirani*, 598 U.S. 759 (2023), does not dictate the answer for India, but it warns that market innovation can move faster than liability law. The consultation paper falls short of accounting for a domestic version of the same problem.

Although the consultation paper provides that the issuer must file the information document through a registered investment banker, there is no provision that recognises an investor's right to compensation for any misrepresentation by the company.

The Companies Act, 2013, is built around misstatements in a prospectus and provides criminal liability under Section 34 and civil compensation under Section 35, the latter for those who have subscribed for securities on the basis of a misleading prospectus and suffered loss as a consequence. Section 35, however, may not readily protect a direct-listing purchaser because a purchaser does not subscribe to securities through a prospectus. Investors may buy an existing share from another shareholder through the market. It is unclear whether an information document qualifies as a prospectus, as neither the consultation paper nor the draft circular addresses this. The gap is wider for foreign issuers, to whom the Act may not apply, leaving no clear statutory basis for investor remedies.

> **Liability should follow control over the content of the information document and benefit from the sale of shares it made possible**

The proposed Securities Markets Code, 2025, Bill also does not fully plug this gap and may allow the regulator to use disgorged unlawful gains to compensate identifiable investors. But this depends on regulatory action and is limited to the gain recovered. It does not give a direct-listing purchaser an express right to recover losses.

Hence, IFSCA would be well advised to come up with a definitive remedy to hold companies using the direct listing route accountable for material misstatements, which investors can use to seek compensation. The simplest route is to treat the information document as a prospectus for purposes of civil liability so that the settled law applies to such a document. If that sits awkwardly with a regime run by IFSCA under its own statute and is open to foreign issuers, the alternative is a self-contained remedy in the circular: giving any person who acquires the securities the right to recover the loss attributable to the misstatement.

Two features of such a remedy matter more than the rest. The first is the class of claimants. It should cover buyers in the opening auction and those who buy until, say, the issuer's first post-listing results, because that is the period when the document is likely to remain the principal source of issuer-specific information. Once continuing disclosure begins, the link between the document and the price weakens and a claim founded on it becomes harder to justify. Defining the class by time of purchase also avoids the trap Slack exposed. Where every share in the market is an existing share, a traceability requirement works not as a filter but as a bar.

Second, liability should attach to those who control the content of the document and those who benefit from the sale of shares that the listing makes possible. The first captures the issuer, its directors, the banker who certifies due diligence, and the auditors, valuers, and other experts whose work the document adopts, each answering only for the portions attributed to them. The second captures selling promoters and controlling shareholders. Everyone other than the issuer should have a due-diligence defence, and fraud should attract stricter consequences.

None of this makes the reform unattractive. Liability that is unlimited, or undefined, will deter issuers and advisers alike. Liability bounded by a defined class, period, and set of defendants will not. A listing without an IPO may be commercially efficient. A listing without an enforceable remedy would not be credible.

LETTERS TO THE EDITOR

Indo-Bangla ties

Apropos of "Resetting Bangla ties" (*FE*, August 20) the new leadership in Dhaka has made its position clear: Bangladesh First. The extradition of Sheikh Hasina has become a precondition for engagement. India must handle this matter with sensitivity and in accordance with established processes. At the same time, we cannot ignore the strategic importance of Bangladesh. It is our largest trading partner in the region and crucial for connecting the Northeast. Dialogue between leaders is the only way forward. Tough preconditions will only delay progress. India must show flexibility and a genuine willingness to move forward. A stable and cooperative Bangladesh is in our interest. The reset must be built on mutual respect, equality, and shared prosperity.

Security interests

Apropos of "A quest for peace in West Asia" (*FE*, August 20), taking India-Israel ties forward is not in the best interest of our security. The military understanding among Pakistan, Turkey, and Saudi Arabia, through the Mecca agreement under which an attack on one is treated as an attack on all, is a strategic concern. It could embolden Pakistan to indulge in further provocations against India under a wider security umbrella. India must strengthen its strategic partnership with Russia, particularly to ensure reliable long-term access to defence equipment, ammunition, and critical military supplies. A balanced diplomacy, not overdependence on any single bloc, is essential to safeguard security.

Hygiene as competitive advantage

RECENT MUMBAI FOOD SAFETY CRACKDOWN ON QUICK COMMERCE PLAYERS GIVES THEM AN OPPORTUNITY TO SHARPEN THEIR SAFETY CREDENTIALS

CHRISTINA MONIZ

In 2026, building a strong brand in the fast-growing quick commerce market is no longer about being the loudest... or the fastest.

The Maharashtra Food and Drug Administration (FDA) recently suspended 14 licences of quick commerce dark stores across the state following an August 2026 inspection drive targeting hygiene and safety violations. For the sector that processes over 9.5 million daily orders, and is expected to reach \$40 billion by 2030, maintaining hygiene standards isn't just about ticking compliance boxes; it's a crucial "cost" of customer satisfaction.

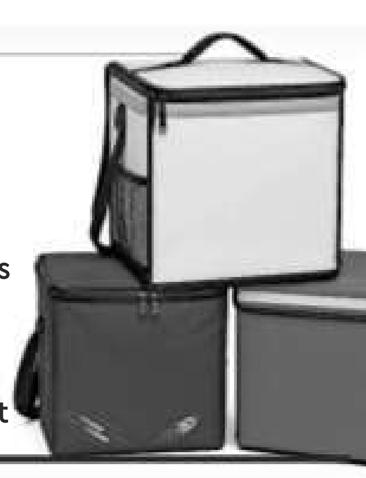
Up until now the biggest USP for quick commerce brands was speed and convenience, allowing them to quickly supersede consumer purchase behaviour that centred around the neighbourhood *kirana* store or supermarket. This shift in behaviour meant the consumer had also outsourced vigilance to the q-comm platform.

"Speed has become increasingly commoditised," says Rutu Mody Kamdar, founder, Jigsaw Brand Consultants. "Earlier, we picked a tomato and checked it. Or looked at the expiry date on a packet. Today, we trust the platform to do that for us." Players face safety challenges in their back-of-house areas, including warehouses, refrigerators, and freezers. The next layer of competition, she says, could involve showing consumers what they cannot currently see — that is, how products are stored, handled, checked and monitored.

Rising consumer expectation, emerging regulation and digital monitoring tools have raised the bar, and for good reason. One lapse in hygiene can lead to regulatory action and worse, it can damage hard-earned trust. A few incidents might not permanently change behaviour, but repeated lapses can quickly erode confidence, say experts.

QUALITY CONTROL

- Quick commerce players process **9.5** million daily orders across the country
- Over **58%** of consumers use quick commerce for monthly grocery restock rather than top-ups
- Hygiene & safety are likely to become major differentiators in this category above speed or assortment



Yasin Hamidani, director, Media Care Brand Solutions, notes that for these platforms, hygiene is not merely an operational issue, but has become a brand reputation issue. "Quick commerce has built its entire proposition around trust, and consumers order food and groceries without checking where they are stored. Hygiene violations become particularly damaging because they expose what is otherwise an invisible part of the customer journey," says Hamidani.

As networks grow into thousands of stores, maintaining consistent standards will become more challenging, and therefore can be a genuine competitive advantage.

Keeping the faith

With speed and assortment becoming table stakes, industry leaders expect that differentiation will now come from the confidence consumers have in the entire fulfilment process. Anjana Ghosh, managing director of business consultancy Scale Sherpas, points out that the answer to the current wave of safety violations doesn't lie in merely addressing concerns flagged by regulators. Hygiene needs to be built into the operating model from procurement and receiving inventory to storage, temperature control, handling and last-mile dispatch. "There also needs to be greater accountability at the dark-store level, because a brand promise is ultimately experienced at the point where the product is picked and packed," she notes.

Consumers will increasingly want to know not just how fast something will arrive, but how responsibly it has been stored and handled. Ghosh suggests that quick commerce players communicate their hygiene protocols more proactively so as to reassure consumers and maintain trust.

These platforms are also in a race to hire food safety supervisors and technical staff to ensure that there is compliance with all regulations. Earlier this week, *FE* reported that there is an available pool of 1-1.2 million active certified food safety supervisors, while the requirement stands at 1.3 to1.5 million currently, posing a shortfall challenge for these platforms.

This current situation presents learnings not just for quick commerce but also for the entire retail sector, argues Devangshu Dutta, founder & CEO, Third Eyesight. The retail sector must clearly invest not only in the right storage and monitoring equipment, but also in ensuring adequate training for staff at each location, he says.

"India has enough laws and regulations defining good practice, but industry compliance across retail and consumer products has not been uniform. Today activist consumers and proactive government officials are putting products and practices under a microscope for all to see, and reputational damage travels at the speed of viral social media posts," he remarks, noting that the "uninstall app" instruction is just a tap away for the consumer.

Explainer

What exactly happened in this Monsoon Session?

BETWEEN JULY 29 and August 11, 2026, Lok Sabha passed 12 Bills. The Business Advisory Committee (BAC) — the body that allocates debate time to each Bill based on its complexity, had set aside between two and five hours per Bill. Eleven of the twelve used a fraction of that. The Mines and Minerals Development and Regulation (Amendment) Bill, 2026, got five minutes against a two-hour allocation. The Registration of Births and Deaths (Amendment) Bill took two minutes.

Only the Public Examinations (Prevention of Unfair Means) Amendment Bill ran long, exceeding its ten-hour allotment by nearly an hour; proof that when Parliament wants to debate, the mechanism still works.

Is rushed passage a new trend?

HISTORICAL RECORDS SHOW this predates the current dispensation by a wide margin. Under UPA I (2004-09), 33 of 182 Bills — 18% of the total — passed with under five minutes of debate, including eight Bills cleared in a single 17-minute sitting on December 24, 2008. UPA II pushed through 20 Bills in five minutes or less, and in 2013 the Union Budget was passed with no discussion at all. The 2023 Monsoon Session moved so fast that the average Bill took just two days from introduction to clearing both Houses. Across 30 years and multiple governments, 30-40% of all Bills have passed with what is termed as "no significant debate."

NO TIME FOR DEBATE

Why Lok Sabha passed 11 Bills in minutes, and not hours

Twelve bills, one Monsoon Session, and 11 of them were cleared in under 15 minutes by Lok Sabha, despite being allotted up to five hours for debate. The numbers have triggered fresh debate on legislative scrutiny. ***Yash Tiwari*** and ***Tottempudi Gagan*** explain what happened, why it is not new, and what could actually fix it

2-5 HOURS WERE ALLOTED TO EACH OF THE 12 BILLS

MINUTES-LONG PASSAGE OF BILLS, REPORTED ALONGSIDE IMAGES OF AN EMPTY OR DISRUPTED HOUSE, FEEDS A PERCEPTION OF PARLIAMENT AS A RUBBER STAMP

If it is not new, what is actually driving it?

THE PATTERN IS structural rather than partisan. Floor time is scarce, sessions routinely lose days to disruption, and the BAC's time allocations are advisory, not binding. So, when a Session runs short, the backlog gets crammed into the final days rather than triggering an extension. Governments of every stripe have used this slack the same way: push Bills through in whatever window remains. The deeper shift, though, is quieter: a steady decline in how often Bills go to Standing Committees for detailed scrutiny before they ever reach the floor, which has made floor time the only scrutiny many bills get at all.

What happened to referral of Bills to Standing Committees?

THIS IS THE number that matters most, and it's had the least attention. Since Parliamentary Committees meet throughout the year, they help in making up for the lack of time available on the floor of the House.

However, referral of Bills to Standing Committees, where a Bill gets clause-by-clause examination away from the floor's theatrics, with ministry officials and outside experts weighing in, has fallen from 60% of Bills in the 14th Lok Sabha to roughly 20-25% today. That is not a dip; it is a structural withdrawal from the one mechanism designed specifically to compensate for thin floor debate. When a Bill skips both floor debate and committee referral, it has, in practical terms, skipped Parliament's scrutiny function entirely.

Does this actually produce bad legislation?

BOTH, AND THE first is documented. The IT (Amendment) Act, 2008, passed after roughly 40 minutes of debate; Section 66A, inserted through it, was struck down by the Supreme Court in 2015 as unconstitutionally vague, exactly the defect committee scrutiny exists to catch. The Companies Act, 2013, a wide-ranging corporate law rewrite, needed substantive amendments within two years of enactment.

Beyond individual laws, there is an accountability cost: without committee records, there is no contemporaneous paper trail showing objections were raised before a law fails in implementation. And there is a public-trust cost: minutes-long passage, reported alongside images of an empty or disrupted House, feeds a perception of Parliament as a rubber stamp.

What can be done to fix this?

THE PERTINENT QUESTION here is not whether one government is uniquely disrespectful of Parliament — the data would not settle that. It is why the system keeps rewarding speed over deliberation regardless of who is in office. That question has answers.

Parliament could publish an annual calendar every January guaranteeing at least 100 sitting days, with lost days automatically compensated rather than absorbed into the backlog.

BAC time allocations could be made binding, so a Session losing sitting time to disruption gets an extension or special sitting, not a rushed final hour. Standing Committee referral could become the default, bypassed only for an affirmative reason such as genuine urgency, reversing today's practice where referral is optional and increasingly rare.

Private members' time on Friday afternoons, routinely the first casualty of a disrupted Session, as this Monsoon Session showed again— could be statutorily protected from cancellation as well.

Evergrande founder gets life sentence

REUTERS
Hong Kong/Shenzhen, China, August 20

THE FOUNDER OF CHINA Evergrande Group, the world's most-indebted property developer, was sentenced to life in prison by a Chinese court on Thursday, five years after the firm's collapse shook the nation's economy and financial markets.

Hui Ka Yan, once Asia's richest man, pleaded guilty in April to eight charges, including misuse of funds, fundraising fraud, illegally taking public deposits, illegally extending loans, fraudulently issuing securities and bribery.

Evergrande, once China's premier developer, has defaulted on most of its \$300 billion in liabilities, its troublessymbolising a crisis in the property sector that has long dragged on the world's second-biggest economy.

'What about our money?'

The sentence in the southern city of Shenzhen, which included confiscating all of Hui's personal property, ends his rags-to-riches story but is unlikely to bring much solace to Evergrande's domestic and foreign creditors.

Evergrande's liquidators declined to comment on the sentence. *Reuters* could not reach legal representatives for Hui, who had not been seen in public since Chinese authorities detained him in 2023, following Evergrande's default.

In pictures released by the court, a grey-haired Hui, 67, stood flanked by two officers, wearing a long-sleeved, navy blue collared shirt, as the court read out his sentence.

"The criminal acts of Evergrande Group, Hengda Real Estate, and Hui Ka Yan ... involved particularly huge amounts and egregious circumstances, caused particularly significant economic losses and caused particularly serious social harm, and should be severely punished according to law," the court said in a statement.

Comments by Evergrande homeowners in a social media group included: "All ordinary citizens have paid the cost," "Imprisonment is meant to protect him. If he comes out, his life is in jeopardy" and "What about our money?"

In addition to Hui's sentence, the court said it had fined Evergrande 8.82 billion yuan (\$1.31 billion) and its main subsidiary Hengda 7 billion yuan, and sentenced five other senior executives to fines and prison terms ranging from six to 18 years.

Hormuz fully under our control: Iran

- Says Strait will reopen after US meets conditions

AGENCIES
August 20

IRAN ON THURSDAY rejected US President Donald Trump's claims that Washington has taken control of the Strait of Hormuz, saying the strategically vital waterway remains "completely under Iran's control" and will be reopened to international shipping only after the US fulfils its commitments and accepts Tehran's conditions.

Saeid Reza Mosayeb Motlagh, Iran's Consul General in Mumbai, said any reopening would have to ensure the safety of Iran and neighbouring countries along the Persian Gulf and Gulf of Oman. His remarks came hours after Trump warned that countries providing Iran with "any type of lifeline" would face economic consequences.

"The Strait of Hormuz is completely under Iran's control. Trump has made a false claim that the strait is under our control and that the US has destroyed Iran's naval forces and missile forces," Motlagh said. "Unfortunately, judging from his statements, he seems to believe that this is the case," he added.

Motlagh said Tehran was prepared to reopen the waterway once its conditions under a 14-point MoU were met. "Iran can reopen the Strait of Hormuz once the United States fulfils its commitments and Iran's conditions are fully accepted," he said.

The Iranian position was reinforced by Parliament Speaker Mohammad Bagher Ghalibaf, who said Tehran would not reopen the strait until Washington fulfils commitments under the 14-point MoU, including lifting the blockade, releasing frozen Iranian assets and lifting oil sanctions.

Zuckerberg prioritised growth over child safety

META INSISTS IT has a long history of protecting its youngest customers as it defends itself against a swath of lawsuits alleging its social media empire harms children. In the latest such instance, the social media giant is fighting allegations in a California federal court that it contributes to the youth mental health crisis by deliberately and stealthily designing features to get children hooked on its platforms Instagram and Facebook.

Four states are seeking billions of dollars in damages as well as fundamental changes to how Meta runs those apps. Children's mental health, and what they see on social media, are all issues "Meta takes seriously and tries to act on," Paul Schmidt, a lawyer for tech giant, said.

Critics say the company's safety record falls short and that many of its protections simply don't work. They include Marc Berkman, executive director at Organisation for Social Media Safety, who said Meta introduced safeguards promising to protect children in response to public pressure rather than out of concern.

Harry, Meghan move back to UK

A YEAR AFTER he and his wife Meghan announced they were stepping down from royal duties, Prince Harry said the shock move had been driven in part by the actions of a "toxic" British press which was destroying his mental health.

"I did what any father or husband would do and thought, how do I get my family out of here," he said in a 2021 interview on "The Late Late Show with James Corden".

Six years after that decision to move to the U.S., which sent shockwaves through the monarchy, Harry, 41, and Meghan, 45, will this month return to Britain where they will send their children to school. And that will mean returning to the media scrutiny that they had desperately sought to leave behind.

Samsung to roll out shareholder return of \$72 bn

REUTERS
Seoul, August 20

SAMSUNG ELECTRONICS IS set to announce a new shareholder return policy later this month worth more than 100 trillion won (\$71.75 billion), media reported on Thursday, as the company plans to share record profits with shareholders amid an AI-driven chip supercycle.

The South Korean memory-chip maker will hold a board meeting at the end of August to approve a shareholder return plan that includes a special dividend, MoneyToday reported, citing unidentified people in the industry.

Samsung will spend 50% of its free cash flow on the new programme, the report said.

Local rival SK Hynix on Wednesday unveiled a 40 trillion won share buyback and cancellation plan, the largest shareholder return programme announced by a publicly listed South Korean company.

SK Hynix, the world's second-largest memory-chip maker behind Samsung, also said it would allocate more than 50% of free cash flow generated between 2025 and 2027 to shareholder returns.

Samsung declined to comment on the reports.

Trump declares 'economic war' on Iran

RESPONDING TO TRUMP'S post, Chinese Foreign Ministry spokesman Lin Jian told reporters in Beijing on Thursday, "Sanctions and pressure will not help resolve the issue." "China calls on relevant parties to take responsible measures and sought to solve the issue through diplomatic and political means."

Trump's aim is to force Iran into fresh negotiations meant to end the war for good, force Tehran to abandon its nuclear programme and release its chokehold on the Strait of Hormuz. Those goals were spelled out in a memorandum of understanding the two sides signed in June, but later collapsed amid a flurry of tit-for-tat strikes.

Iran has weathered economic sanctions for decades, and its response has been to make its own demands, including the unfreezing of its assets, an end to sanctions and war damages.

Resolving the conflict is increasingly urgent for Trump as he contends with high gasoline prices, the war's growing unpopularity and Republican concerns about losing one or both houses of Congress in November's midterm elections. Earlier this week, he even threatened to bomb Oman, an American ally that has sometimes played the role of mediator, if it gets in the way of the US.

Tata AGM delay may be costing...

"FOR THE TRUSTS, the loss is not merely an accounting cost. The income from their investments is used to fund philanthropic activities. A prolonged delay could therefore affect the funds available for their charitable mission," one of the persons cited above said.

Separately, around ₹400 crore belonging to SRTT is understood to remain stuck and unavailable for disbursement. The money is intended for charitable programmes, including those related to water and sanitation, education and feeding.

The financial consequences of the delay are also raising questions about whether all available avenues are being pursued to protect the Trusts' interests. These questions have arisen in the context of SRTT having a senior counsel on its board and reports that caveats had been filed before the restriction was imposed.

However, the Tata Trusts is understood to favour a wait-and-watch approach amid concerns that moving court could draw the issue into a longer legal process. "There has been no indication of a negative outcome and so, the Trusts would rather wait than go to the High Court at this point," a person with knowledge of the matter said.

The Trusts have already sought relief from the restriction, including through a letter to the charity commissioner of Maharashtra, but the effort has not yielded a decision so far. They could make another attempt through a further letter in the coming days, one of the persons said.

The proceedings are also believed to have been delayed after the additional commissioner handling the matter was transferred and a new official took charge. The change may have set the proceedings back by around two months, another person familiar with the matter said.

While the effects of the restriction are widening, the Trusts believe approaching the High Court could delay the process further. The court would need to examine the matter afresh, potentially extending the process by as much as another six months,

Transaction fees on UPI in 2 wks

WITH A MASSIVE JUMP in UPI transactions since the Covid-19 pandemic, banks and other payment intermediaries have ramped up investment in payment infrastructure, leading to industry calls for the restoration of charges to make the system sustainable.

Reintroduction of MDR at 0.3% on UPI transactions above a threshold would still be much lower than the prevailing MDR of 1-3% on credit cards and up to 0.9% on debit card transactions.

Unified Payments Interface (UPI) is the world's largest real-time payment system by volume, with a share of nearly 50%. UPI accounted for 85% of India's digital payment transactions by volume in 2025-26. UPI processed 241.62 billion transactions worth ₹314.23 lakh crore in FY26.

The Parliamentary Standing Committee on Finance recently called for the early implementation of a tiered MDR framework for UPI transactions, warning that delays could leave payment service providers dependent on inadequate government subsidies and weaken investment in payment infrastructure.

The panel flagged the sharp mismatch between the ₹2,000 crore budgetary allocation for 2026-27 and the industry's estimated operational cost of ₹20,700 crore for running UPI. It said the allocation covered barely 10% of actual operational costs. The estimate is based on an operational cost of ₹1.38 per transaction and around 150 billion P2M (person-to-merchant) transactions recorded last year.

To reduce the burden on the exchequer, the Department of Financial Services had told the panel that it was examining two options: restoring MDR for certain high-value transactions or merchants, and introducing a tiered incentive structure to "phase out government support in the next few years."

Walmart slides on slowest growth

Walmart's quarterly sales fell short of expectations, a rare miss that's likely to stoke concern about the leading big-box retailer decelerating alongside a slow-growing US economy. Sales at US stores open at least a year, excluding fuel, rose 2.6% in Q2, shy of the lowest estimate by *Bloomberg*. That rate of growth — hindered by pricing pressure in its pharmacy business — is the slowest in more than six years.

Alibaba's profit dives 75% on AI spending

ALIBABA GROUP HOLDING'S profit plunged more than 75% after the Chinese firm ratcheted up quarterly capital spending to \$10-bn, aiming to safeguard its position in a competitive global AI arena. The online retail giant-turned-AI player posted a 9% jump in revenue and reflecting torrid growth in demand for computing capacity its cloud division provides.

Ant's profit flattens after AI costs

ANT GROUP BARELY grew quarterly profit after the company increased investment in artificial intelligence technology for its healthcare, large language model and payment services. The fintech firm contributed 1.56 billion yuan (\$232 million) of profit to Alibaba Group Holding Ltd., which owns a third of Ant.

Duty-free import, stock limit: Moves to curb sugar price

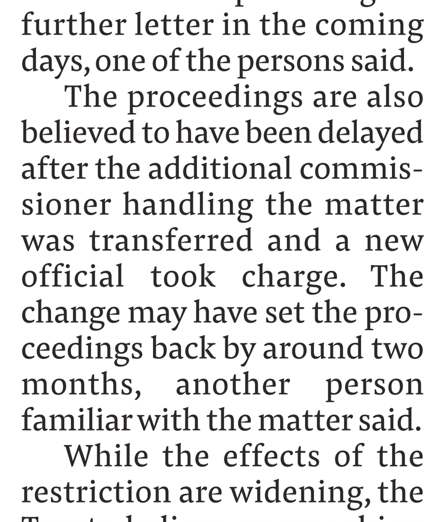
"THIS IS NOT beneficial to food companies who require sugar for their products from syrups to juices, soft drinks to biscuits and other products. You need to keep adequate stocks for at least a month because cutting it to 15 days would leave manufacturers vulnerable to supply disruptions," said Raghav Jadli, president of the All India Food Processors' Association, an apex body of food companies including Haldiram's, Marico, ITC, PepsiCo and DFM Foods.

"Not only is it not beneficial to the industry, it is not beneficial to the consumer too," Jadli said, warning the move could trigger disruptions and panic buying among consumers of food products. "Sugar is one of the key ingredients in the food industry. So, there will be an impact on production," he added.

Shares of sugar mills surged following the announcement on Thursday. Balrampur Chini Mills and Bannari Amman Sugars jumped 17.78% and 16.87%, respectively, on the BSE. Bajaj Hindusthan Sugar rose 14.96% while Shree Renuka Sugar gained 7.92% and Triveni Engineering was up 3.53%.

Later in the day, the government issued another order allowing 1 million tonne of raw sugar imports till October 31.

Interestingly, India exported 0.8 MT of sweetener in the 2025-26 season (October-September) before prohibition on exports were imposed in May 2026.



The Indian Sugar & Bio-Energy Manufacturers Association (ISMA) described the import relaxation as a step that sends a clear signal to the market that speculative and unwarranted price increases will not be allowed to persist. "The import permission is a precautionary measure that adds further comfort during the peak festival months, not a response to any supply gap," the industry body said.

The latest intervention comes as the sugar industry expects the 2026-27 season to begin with lower opening stocks. ISMA expects opening stocks at around 3.5-4 million tonne, against 5 MT on October 1, 2025.

India consumes around 28 MT of sugar annually. Industry sources have also flagged lower cane yields following the early onset of flowering in key producing regions of Maharashtra and Karnataka.

The government had last month imposed stock limits on sugar dealers from August 1 to November 30 to curb hoarding and speculative trading. The latest stockholding order extends the restrictions to large institutional and industrial consumers, including confectionery makers, soft drink manufacturers, food processors and sweetmeat sellers.

The food industry, however, says legitimate users should not be penalised.

A chief executive of a top food company, who declined to be named, questioned whether the government has the infrastructure to enforce the new limit effectively.

"The notification is not practical from an implementation perspective because sugar stocks are held across dealers and warehouses, making it difficult to monitor at the ground level," he said.

The executive also added that the government should focus on the diversion of sugarcane towards ethanol, which is tightening supplies available for food and other industrial uses.

Aditya Birla Capital enters gold loan biz

KSHIPRA PETKAR
Mumbai, August 20

RAKESH SINGH, EXECUTIVE DIRECTOR &CEO — NBFC, ADITYA BIRLA CAPITAL

The offering will cater to various customers across urban and semi-urban markets, and will also serve the existing customers

- The company has become the third NBFC to foray into the segment in the past two months
- It has plans to roll out 200-300 dedicated gold loan branches by March 2027

ADITYA BIRLA CAPITAL has entered the gold loan business, making it the third non-banking finance company to foray into the segment in the past two months. In July, Godrej Capital and Tata Capital ventured into the territory.

The company has plans to roll out 200-300 dedicated gold loan branches by March 2027. "Over the next three years, the ABCL-NBFC business aims to establish a network of around 1,000 gold loan branches, building a strong pan-India franchise and further strengthening its presence across the country," the company said in a press release on Thursday.

Rakesh Singh, executive director and CEO — NBFC at Aditya Birla Capital, said the entry into the segment is a natural extension of the company's secured lending strategy. The offering will cater to various customers across urban and semi-urban markets, and will also serve the existing customers.

The company will have to compete with Muthoot Finance and Manappuram Finance, who currently dominate the gold loan space.

In FY26, the company's AUM grew 27% on year to ₹1.60 lakh crore, with retail and the SME (small and medium enterprise) comprising around 68% of the assets. In Q1FY27, the AUM was up 28% on year.

According to data by the Reserve Bank of India, NBFC credit to loans against gold jewellery grew 69.3% on year to ₹3.41 lakh crore as of June.

"We expect the gold loan momentum to be healthy, given the further acceleration in gold price in the last 15-20 days. Glitches related to implementation of the new LTV framework are also expected to resolve. However, pricing strategy and rising number of lenders would remain a key monitorable," Shreepal Doshi, research analyst at Equirus Securities, said. So far in 2026, prices of gold have surged 18%.

Ratings agency Icra in their report in July had said that the entry of new players and large NBFCs in the gold loan space supports the strong growth outlook for this segment, particularly amid the stress in unsecured lending in the recent past.

Derivative market net exits...

IN CONTRAST, PROPRIETARY traders, including global participants operating in India and entities owned by foreign firms, recorded the highest gross trading profit at about ₹44,000 crore. Foreign portfolio investors (FPIs) and corporates posted gross trading profits of around ₹14,000 crore and ₹8,000 crore, respectively. Mutual funds and partnership firms/LLPs recorded gross trading profits of about ₹3,000 crore each.

Algorithmic traders accounted for about 99% of the profits earned by FPIs and proprietary traders.

The study also showed that the average loss among traders deploying less than ₹10,000 in the equity derivatives segment nearly halved, from ₹10,978 in FY25 to ₹5,561 in FY26.

The proportion of loss-making traders was higher among those deploying capital of less than ₹1 lakh, at 90.18%, with an average loss of ₹44,000. Among traders deploying more than ₹1 lakh, 81.13% incurred losses, though their average loss was substantially higher at ₹9.19 lakh.

Median losses declined across trading categories, including only-options buyers, predominantly options buyers, predominantly futures buyers and predominantly options sellers. Traders predominantly selling options were the only category to record a positive median return, at 1% in FY26.

An attempt to belittle India's growth story

VIDHU SHEKHAR

NOT LONG AGO came the claim that India had overstated its GDP growth by roughly 2.5 percentage points a year. Subsequent scrutiny exposed a curious pattern: indicators changed, specifications changed, and several tests used to infer a structural break had too little statistical power to distinguish a genuine change from ordinary noise. As the evidence crumbled under scrutiny, the conclusion that India's growth was less impressive than reported stood untouched, as if it had never needed the evidence at all.

Now comes another statistical exercise reaching a familiar destination. Remarkably, it cites that contested claim to call its own estimate conservative.

Kevin and Robin Grier of Texas Tech University claim that by 2023, Indian incomes were roughly 10% below where they would have been without Narendra Modi. The instrument this time is synthetic control. Construct an artificial India by mixing other countries until the cocktail closely tracks actual India before 2014, then treat whatever that cocktail does afterwards as "India without Modi."

Their synthetic India is 38% Ethiopia, 28% China, 25% Bangladesh, 7% Pakistan and 2% Philippines. Actual India, the paper concludes, finished about 10% behind this statistical creation.

Before auditing the recipe, back-test the machine. Take the paper's own five countries, fit the weights only on data through 2004, and ask the method to predict the decade that follows. By 2014, it "discovers" an Indian shortfall of 10%, under Manmohan Singh, with Modi nowhere in sight.

The pre-2004 fit is exactly as tight, in relative terms, as the fit the paper celebrates for its Modi model. A machine that finds the Modi growth catastrophe before Modi arrives deserves deep scepticism when it finds one afterwards.

Why does the machine misfire? Because there is no unique synthetic India. My replication finds many, and they disagree.

To be clear, within the paper's chosen PWT 11.0 dataset and chosen 14-country pool, its result appears robust. The problem begins one level earlier: why that data vintage, that GDP concept and that donor pool?

Change the data vintage and the verdict changes. Run the same method on the same 14 countries using World Bank data, and about six of every ten well-fitting cocktails put actual India ahead. Use the previous Penn World Table release, and roughly three-quarters of the 200 best-fitting models put India ahead by 2019; with PWT 11.0, only 6% do, and by 2023 none do. India's economic history did not change when a statistical database was revised, but the estimated "Modi effect" did.

Change the GDP concept and the verdict changes again. The paper uses PWT's expenditure-side measure, intended principally for comparing living standards. Use instead the PWT measure recommended for comparing growth rates, keeping the authors' donor pool, and the alleged 10% deficit disappears. India finishes between roughly parity and 6% ahead, with a better pre-2014 fit.

Then change the donor pool. Apply the authors' stated selection logic more broadly and 29 economies qualify, not 14, creating 118,755 possible five-country baskets. Very different mixes reproduce India's pre-2014 path closely and then head in opposite directions. Set aside the war-torn and sanctioned states, and in the remaining pool a better-fitting model has India finishing 3.7% ahead; and across the 50 best fits India leads in 54% of cases. The median gap is effectively zero.

This is the central problem. Matching the past does not identify one India-without-Modi. It identifies many synthetic Indias that agree beautifully about the past and disagree sharply about the future. The paper selects one and then writes as if history selected it.

Its defence is that 30 years of close fit lets us assume actual and synthetic India are similar even in unobserved respects. Modern econometric theory grants no such licence: a model can match history superbly and still get the aftermath wrong.

The paper rightly asks that donor economies not be distorted by idiosyncratic shocks during the treatment window. Applied even-handedly as a sensitivity test, screening out not only economies wrecked by war, default or sanctions but equally those at the opposite extreme of the growth distribution. The surviving counterfactuals fit as well as or better than the published model while placing India within roughly 3% either way.

Then come the "p = 0.00" results. With such small donor pools, the standard exact test cannot produce a p-value below about 0.07 for GDP or 0.08 for governance. The paper's own footnote concedes that its zeros mean only that India ranked most extreme in a small placebo race. Those zeros cannot establish conventional 1-in-20 significance: the race simply has too few horses.

And so goes another attempt to belittle India's growth story. An imaginary India assembled from other countries' data is elevated into the benchmark, against which the lived economic experience of 1.4 billion people is judged.

The recipe is familiar. Build an elaborate counterfactual. Produce a graph where the historical lines overlap beautifully. Assign a causal label to the later gap. Report a certainty the design cannot supply.

Then tell 1.4 billion Indians that the economy they actually lived through should have been much richer, on the authority of a country that has never existed.

CASTE RULES TURN POLITICAL IN UTTAR PRADESH, BIHAR

We are reconsidering UGC regulations: Centre to SC

ANANTHAKRISHNAN G & DEEPTIMAN TIWARY
New Delhi, August 20

THE CENTRE TOLD the Supreme Court on Thursday that it is reconsidering the University Grants Commission (UGC) regulations aimed at preventing caste discrimination in higher education institutions.

Notified on January 13 this year, the UGC (Promotion of Equity in Higher Education Institutions) Regulations, 2026 snowballed into a political issue after it drew objections from both general category groups and sections of Dalit and OBC communities.

"It is being reconsidered," Solicitor General Tushar Mehta told a three-judge bench headed by Chief Justice of India Surya Kant. The bench was hearing a clutch of petitions that primarily challenge the definition of "caste-based discrimination" in the regulations.

In the eye of the storm is regulation 3(1)(c), which defines caste-based discrimination as discrimination on the basis of caste or tribe against members of the Scheduled Castes, Scheduled Tribes and Other Backward Classes.

Petitioners have argued that this excludes general category students and faculty from specific protection against caste-based discrimination. At the same time, the regulations' broader definition of "discrimination" covers unfair or differential treatment on the ground of caste against any stakeholder.

The issue has also acquired a political dimension in Bihar and Uttar Pradesh. The rules initially triggered protests among sections of the upper castes who argued that the explicit reference to SCs, STs and OBCs amounted to exclusion of general category students.

Although the Supreme Court stayed the regulations days after the notification and revived the 2012 framework, there is concern within the BJP that the issue may lead to disquiet among Dalit communities, particularly in UP where Assembly elections are due next year.

BJP leaders say the regulations have caught the party in a bind. "If you go ahead with regulations, upper caste will be angry. And now if you withdraw it, Dalits will feel we are taking away a protection that was granted to them. Already there have been protests by the community following the court stay," a BJP leader said.

Within the BJP, one reason for the party's defeat in the recent Bankipur Assembly bypoll in Bihar was attributed to upper caste dissatisfaction over the UGC issue.

Staying the regulations on January 29, a bench led by the CJI said the issue raised important questions that, if left unexamined, could have "very sweeping consequences" and "divide society".

The bench, which issued notices to the Centre and the UGC, also directed that the "2012 Regulations will continue in force till further orders".

It said that "upon a prima facie consideration, it appears to us that some of the provisions of the Impugned Regulations suffer from certain ambiguities, and the possibility of their misuse cannot be ruled out".

Petitioners Mritunjay Tiwari, advocate Vineet Jindal and Rahul Dewan have primarily challenged section 3(1)(c) of the regulations.

The regulations stem from a 2019 petition filed in the Supreme Court by the mothers of Payal Tadvi and Rohith Vemula, who died by suicide over alleged caste-based discrimination in 2019 and 2016, respectively. They had sought the enforcement of robust anti-discrimination mechanisms across higher education institutions.

Staying the notified regulations on January 29, the court put forward a set of questions:

* Whether Clause 3 (1) (c) "bears a reasonable and rational nexus to subserve the object and purpose of the 2026 UGC Regulations, particularly in light of the fact that no distinct or special procedural mechanism has been prescribed to address caste-based discrimination, as opposed to the exhaustive and inclusive definition of "Discrimination" provided under Clause 3(e)".

*Would the introduction of the term "caste-based discrimination... have any bearing on the existing constitutional and statutory sub-classification of the Most Backward Castes within the Scheduled Castes, Scheduled Tribes, and Other Backward Classes, and whether the (new rules) provide adequate and effective protection and safeguards to such Extremely Backward Castes against discrimination and structural disadvantage".

* Whether the inclusion of the expression "segregation... in the context of allocation of hostels, classrooms, mentorship groups, or similar academic or residential arrangements, albeit on transparent and non-discriminatory criteria, would amount to a "separate yet equal" classification, thereby infringing the constitutional guarantees of equality and fraternity under Articles 14, 15 as well as the Preamble to the Constitution".

CASTE RULES IN A FLUX

- UGC notified the rules on January 13
- SC stayed them on January 29
- 2012 UGC regulations remain in force
- Petitions challenge the definition of caste discrimination
- General-category groups object to exclusion from protection
- Dalit, OBC groups fear losing safeguards
- Issue has become politically sensitive in UP, Bihar
- BJP fears backlash from both social groups

INDIA'S FAMILY WEALTH TO SURGE 1.5X

FAMILY OFFICE ASSETS in India are projected to rise 1.5 times to around ₹1.05 lakh crore over three years from ₹70,000 crore in 2024, a study by Julius Baer-EY, stated. AUM is likely to grow 14% annually as wealthy families shift from wealth preservation to active deployment. Pirates hijack cargo ship carrying six Indians

SIX INDIANS WERE aboard a Cameroon-flagged cargo ship hijacked by pirates off Somalia's Puntland coast earlier this week, a Somali official said Thursday.

The M/V LUTUF, which was carrying Turkish weapons, was seized on Monday and taken by the pirates toward the region's Nugaal coast.

The ship was seized about three and a half nautical miles off Marraya in Puntland's Eyl district, the official told The Associated Press on condition of anonymity, because he wasn't authorised to speak publicly about sensitive information.

The ship, owned by Polar Movement Shipping, was carrying weapons bound for a Turkish military training facility in Mogadishu, as well as communications and satellite equipment, the official said.

The 10-member crew included six Indians, one Turkish national, one Georgian and two Serbian security guards, he said.

There was no immediate comment from Turkish authorities about the incident.

Eight pirates, believed to be members of a group previously involved in the hijacking of the M/V Sward on April 26, took the vessel toward the coast near Garmaal in Puntland's Dangoroyo district.

Two Turkish-owned vessels later approached the hijacked ship, while Turkish helicopters and drones monitored the area, the official said.

On Tuesday, a small boat carrying two men approached the vessel and delivered khat, a stimulant commonly chewed in Somalia, he said.

After the boat returned to shore, an airstrike followed, killing four men and wounding two others, the official said.

The circumstances of the strike, including who carried it out and whether those killed were involved in the hijacking, couldn't immediately be independently verified.

The status of the LUTUF, including its crew and cargo, wasn't immediately clear. –AP

Upon receipt of such request, a physical copy of the Letter of Offer shall be provided to such Eligible Shareholder. An Eligible Shareholder may participate in the Buyback by downloading the Tender Form from the websites of the Company (www.iitlgroup.com), the Manager to the Buyback (www.systematixgroup.in) , the Registrar (www.in.mpms.mufg.com), SEBI (www.sebi.gov.in), NSE (www.nseindia.com) or BSE (www.bseindia.com) or by providing his/her/its application in writing on a plain paper, signed by all Eligible Shareholders (in case of joint holding), stating name and address of the Eligible Shareholder(s), number of Equity Shares held as on the Record Date, Client ID number, DP name, DP ID, beneficiary account number and number of Equity Shares tendered for the Buyback.
   b) **In case the Eligible Shareholders hold in physical form:** An Eligible Shareholder may participate in the Buyback by providing his/her/its application in writing on a plain paper signed by all Eligible Shareholders (in case of joint holding) stating name, address, folio number, number of Equity Shares held, Equity Share certificate number, number of Equity Shares tendered for the Buyback and the distinctive numbers thereof, enclosing the original Equity Share certificate(s), copy of Eligible Shareholder's PAN card(s) and executed share transfer form in favour of the Company. An Eligible Shareholder may participate in the Buyback by downloading the Tender Form from the websites of the Company (www.iitlgroup.com), the Manager to the Buyback (www.systematixgroup.in), the Registrar (www.in.mpms.mufg.com), SEBI (www.sebi.gov.in) , NSE (www.nseindia.com) or BSE (www.bseindia.com) and must ensure that the Tender Form, along with the TRS and requisite documents, reach the Registrar to the Buyback on or before the Buyback Closing Date i.e., Friday, August 28, 2026 by 5:00 pm (IST). If the signature(s) of the Eligible Shareholders provided in the plain paper application differs from the specimen signature(s) recorded with the registrar of the Company or are not in the same order (although attested), such Tender Forms are liable to be rejected under this Buyback.
7. The Buyback is open to all the Eligible Shareholders holding Equity Shares either in physical and/or in dematerialized form as on Record Date. The Company shall implement the Buyback using the "Mechanism for acquisition of shares through Stock Exchange pursuant to Tender-Offers under Takeovers, Buy Back and Delisting" notified by the SEBI vide circular CIR/CFD/POLICYCELL/1/2015 dated April 13, 2015 read with SEBI circular CFD/DCR2/CIR/P/2016/131 dated December 09, 2016, SEBI circular SEBI/HO/CFD/DCR-III/CIR/P/2021/615 dated August 13, 2021 and the SEBI Circular SEBI/HO/CFD/PoD-2/P/CIR/2023/35 dated March 08, 2023 including any further amendments or statutory modifications for the time being in force (**"SEBI Circulars"**), and in accordance with the procedure prescribed in the Companies Act, 2013 and the SEBI Buyback Regulations, and as may be determined by the Board of Directors, or the Buyback Committee, on such terms and conditions as may be permitted by law from time to time. The Buyback is open to all Eligible Shareholders/ beneficial owners holding Equity Shares either in physical and/or in dematerialized form as on Record Date. In this regard the Company has requested NSE to be the designated stock exchange for the purpose of this Buyback (**"Designated Stock Exchange"**) and to provide the separate acquisition window (**"Acquisition Window"**) to facilitate placing of sell orders by Eligible Shareholders who wish to tender Equity Shares in the Buyback. The details of the Acquisition Window will be specified by NSE from time to time. During the tendering period, the order for selling the Equity Shares will be placed in the Acquisition Window by Eligible Shareholders through their respective stock broker(s) (**"Seller Member(s)"**) during normal trading hours of the secondary market. The Seller Member can enter orders for Equity Shares held in dematerialized form and physical form. In the tendering process, the Company's Broker may also process the orders received from the Eligible Shareholders.

   For detailed process of tendering of Equity Shares by Eligible Shareholders, please refer to paragraph 21 (from page nos. 41 to 49) (Procedure for Tendering Shares and Settlement) of the Letter of Offer.
8. In the event the Seller Member(s) of any Eligible Shareholder is not registered with the Stock Exchanges as a trading member/ stock broker, then that Eligible Shareholder can approach any NSE/ BSE registered stock broker and can register themselves by using quick unique client code (**"UCC"**) facility through the NSE/ BSE registered stock broker (after submitting all details as may be required by such NSE/ BSE registered stock broker in compliance with applicable law). In case the Eligible Shareholders are unable to register using UCC facility through any other NSE/ BSE registered broker, Eligible Shareholders may approach Company's Broker i.e., Systematix Shares and Stocks (India) Limited to place their bids, subject to completion of KYC requirements as required by the Company's Broker.
9. The direct web link of the website of the Registrar to the Buyback for downloading the Letter of Offer, Tender Form and Share Transfer Form is https://in.mpms.mufg.com/Offer/Default.aspx
10. The Company is not required to deduct tax at source on payments made to resident Eligible Shareholders. Under the provisions of the Income Tax Act, 2025 the Company is required to deduct tax at source (**"TDS"**) on payments made to Non-Resident Shareholders (other than FIIs/ FPIs), if such payments are chargeable to tax in India, at the time of payment or credit (whichever is earlier), at the "rates in force"

NOTICE TO THE EQUITY SHAREHOLDERS OF THE COMPANY

Subject: Transfer of Equity Shares of the Company to Investor Education and Protection Fund

This notice is hereby published pursuant to Section 124 of the Companies Act, 2013 **("the Act")** read with the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016, as amended **("the IEPF Rules")**. In terms of the said provisions, the shares in respect of which dividend has remained unpaid or unclaimed for 7 (seven) consecutive years or more are liable to be transferred by the Company to the Investor Education and Protection Fund.

Accordingly, the Company is required to transfer equity shares held by its shareholders who have not claimed dividend declared by the Company consecutively for 7 (seven) years with effect from FY 2019-20 to Investor Education and Protection Fund **("IEPF")**. The Company has already sent individual communication dated August 19, 2026 to the concerned shareholders, advising them to claim their unclaimed dividend on or before November 23, 2026, to avoid transfer of the corresponding equity shares to the IEPF.

In terms of Rule 6 of the IEPF Rules, the Company has also uploaded on its website at www.ltts.com, a list of such shareholders who have not encashed their dividends consecutively for 7 (seven) years and whose underlying shares are therefore liable to transfer to IEPF account. Shareholders are requested to verify their details from the said weblink and claim respective dividend on or before November 23, 2026.

In case, the Company does not receive valid claim from the shareholders for dividend(s) in respect of such equity shares by November 23, 2026, the underlying equity shares shall be transferred to the Demat Account of the IEPF Authority. Shareholders may note that the unclaimed dividend and the equity shares transferred to IEPF including all benefits accruing on such shares, if any, can be claimed by them after following the procedure prescribed under the IEPF Rules.

Shareholders may please note that no claim shall lie against the Company in respect of the shares, or dividends so transferred to IEPF pursuant to the Rules.

ISSUE PROGRAM	BID/ISSUE OPENED ON: FRIDAY, AUGUST 14, 2026 BID/ISSUE CLOSED ON: TUESDAY, AUGUST 18, 2026

RISKS TO INVESTORS:

Summary description of key risk factors based on materiality:

1. We majorly sell our products in Karnataka and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.
2. Our Company depends upon a Single Manufacturing Unit, making us vulnerable to local disruptions and operational failures.
3. Our raw material procurement is geographically concentrated, making us vulnerable to regional disruptions.
4. There are certain discrepancies noticed in some of our corporate records relating to forms filed with the Registrar of Companies.
5. Our Company, Directors, Promoters and Group Companies are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.
6. There have been some instances of delayed filing of returns and depositing of statutory dues with regulatory authorities.
7. Our revenues are highly dependent on clients located in India. Any decline in the economic health of India could adversely affect our business, financial condition and results of operations.
8. Our company's clientele comes from various Industrial Segments, such as, Power, Furnace, Water, Pump Manufacturing, Oil and Gas, Pharma, Steel, Renewable, Software, Transportation etc. and therefore any downturn in these industries may adversely affect the revenue and operating profit of our company.
9. Our registered office and factory is located on premises taken on lease. If we are unable to renew these leases or relocate on commercially suitable terms, it may have a material adverse effect on our business, results of operation and financial condition.
10. We cannot assure that our projects will be free from defects, which may adversely affect our business, financial condition, results of operations, and prospects.

PROPOSED LISTING: FRIDAY, AUGUST 21, 2026*

The Issue is being made through the Book Building Process, in terms of Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended ("SCRR") read with Regulation 253 of the SEBI ICDR Regulations, as amended, wherein not more than 50% of the Net Issue shall be allocated on a proportionate basis to Qualified Institutional Buyers ("QIBs", the "QIB Portion"). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis only to Mutual Funds, and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIBs including Mutual Funds, subject to valid Bids being received at or above the Issue Price. However, if the aggregate demand from Mutual Funds is less than 5% of the Net QIB Portion, the balance Equity Shares available for allocation in the Mutual Fund Portion will be added to the remaining Net QIB Portion for proportionate allocation to QIBs. Further, not less than 15% of the Net Issue shall be available for allocation on a proportionate basis to Non-Institutional Bidders (1/3rd of the portion available to NIBs shall be reserved for applicants with an application size of more than 2 lots and upto such lots equivalent to not more than 10 lakhs and 2/3rd of the portion available to NIBs shall be reserved for applicants with an application size of more than ₹10 lakhs and the unsubscribed portion in either of the sub-categories, could be allocated to applicants in the other sub-category of NIBs) and not less than 35% of the Net Issue shall be available for allocation to Individual Bidders in accordance with the SEBI ICDR Regulations, subject to valid Bids being received at or above the Issue Price. All potential Bidders (except Anchor Investors) are required to mandatorily utilize the Application Supported by Blocked Amount ("ASBA") process providing details of their respective ASBA accounts, and UPI ID in case of Individual Bidders using the UPI Mechanism, if applicable, in which the corresponding Bid Amounts will be blocked by the SCSBs or by the Sponsor Bank under the UPI Mechanism, as the case may be, to the extent of respective Bid Amounts. Anchor Investors are not permitted to participate in the Issue through the ASBA process. For details, see "Issue Procedure" beginning on page 277 of the Prospectus.

RISK TO INVESTORS
For details, refer to section titled *"Risk Factors"* beginning on page 20 of the RHP.

1. **Dependence on government entities, which contributed 53.12%, 79.89% and 85.58% of our revenue from operations in Fiscals 2026, 2025 and 2024:** A significant portion of our revenue from operations is derived from government entities, including EPC works related to power transmission and distribution. The table below sets forth the revenue generated from government projects and private projects from our business segments:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
EPC Segment			
Revenue from Operations from government entities (₹ in million)	5,957.76	6,660.70	4,840.96
% of Revenue from Operations from government entities (in %)	29.19%	34.73%	34.40%
Manufacturing Segment			
Revenue from Operations from government entities (₹ in million)	4,883.67	8,662.03	7,203.09
% of Revenue from Operations from government entities (in %)	23.93%	45.16%	51.18%

2. **Customer concentration risk:** Our business largely depends on our top 10 customers, which contributed 46.52%, 80.33% and 90.78% of our Revenue from Operations in Fiscals 2026, 2025 and 2024, respectively:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Revenue from top 10 customers (₹ in million)	9,497.74	15,407.56	12,776.14
Revenue from top 10 customers as a percentage of Revenue from Operations (in %)	46.52%	80.33%	90.78%

3. **Manufacturing segment contributes ~70% of revenue from operations:** We operate through two business segments, namely (i) Manufacturing and (ii) EPC. For the Fiscals 2026, 2025, and 2024, respectively, our Revenue from Operations from the Manufacturing segment (i.e. revenue from sale of conductors and cables) has contributed to 69.74%, 64.96% and 65.60% of our Revenue from Operations.

Continued on next page...

...continued from previous page.

4. **Risk related to raw materials:** Our operations are dependent upon the prices and availability of the primary raw materials that we require for the production of our aluminium conductors, power cables and electrical wires. The following table sets forth certain information relating to the total cost of the raw materials for the periods indicated:

(₹ in million, except percentages)

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Cost of Materials Consumed	15,778.35	14,652.23	10,914.82
Total Expenses	18,845.43	17,773.71	13,086.72
Cost of materials consumed as a percentage of total expenses (%)	83.73%	82.44%	83.40%

Note: Comprises cost of materials consumed plus increase/(decrease) in inventories plus erection, sub-contracting and other project expenses

5. **High working capital requirement:** Our business is working capital intensive and hence, trade receivables and inventories form a substantial part of our current assets. Our working capital requirements for the Fiscals 2026, 2025 and 2024, together with our working capital requirements as a percentage of our Revenue from Operations for the respective periods are set in the table below:

(₹ in million, except percentages)

Fiscal 2026		Fiscal 2025		Fiscal 2024	
Net working capital	Working capital as a % of Revenue from Operations	Net working capital	Working capital as a % of Revenue from Operations	Net working capital	Working capital as a % of Revenue from Operations
7,167.22	35.11%	6,840.99	35.67%	2,264.79	16.09%

6. **Negative Cashflow:** We have experienced negative cash flows from operating activities in Fiscal 2025. Our cash flows for the last three Fiscals are set forth in the table below:

(₹ in million)

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Net cash (used in)/ generated from operating activities	1,560.82	(2,385.93)	1,009.07
Net cash (used in)/ generated from investing activities	(406.01)	(127.74)	(35.81)
Net cash (used in)/ generated from financing activities	(1,017.18)	3,114.77	(942.54)

7. **Suppliers concentration related risk:** We are reliant on a limited number of parties for the supply of our raw material, and the loss of some of these suppliers may have an adverse effect on our business, results of operations and financial conditions. The table below sets out the raw materials which we have obtained from our largest supplier, top five suppliers and top 10 suppliers together with such supply as a percentage of our total raw materials supply for the periods indicated

(₹ in million, except percentages)

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Raw materials sourced (in ₹ million)	% of total raw materials sourced	Raw materials sourced (in ₹ million)	% of total raw materials sourced	Raw materials sourced (in ₹ million)	% of total raw materials sourced
Largest supplier of raw materials	3,578.99	30.89%	2,288.25	22.02%	1,516.27	19.39%
Top five suppliers of raw materials	8,926.35	77.05%	8,068.40	77.63%	5,650.17	72.27%
Top 10 suppliers of raw materials	10,136.39	87.50%	9,132.08	87.86%	6,697.87	85.67%

Note: Suppliers may vary for each period.

8. **Risk related to low success ratio (14.05% in Fiscal 2026) in competitive bidding:** Our revenues from our EPC segment are dependent upon our ability to effectively secure contracts awarded to us through the competitive bidding route. Participation in transmission or distribution projects, typically requires the bidder to meet certain qualification conditions based on several criteria, including similar experience, technical capacity and performance, financial strength and size of previous contracts for similar projects. Our Company has made multiple bids during the Fiscals 2026, 2025 and 2024. The table below sets forth the details of EPC projects awarded and their value against these bids:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Number of bids made	121	73	38
Number of projects awarded	17	14	5
Value of projects awarded (₹ in million)	25,451.10	12,124.70	8,065.76

Our inability to meet applicable pre-qualification criteria may limit our ability to expand our operations and adversely effect on our business prospects, financial condition and results of operations. Further, the GoI may make changes to the standard bid document from time to time and such changes may further challenge our ability to compete effectively.

9. **Risk related to contingent liabilities:** We have certain contingent liabilities, constituting 3.44% of the Networth of our Company, which, if they materialize, may adversely affect our results of operations, financial condition and cash flows. The following table sets forth certain information relating to our contingent liabilities to the extent not provided for Fiscal 2026, as per Ind AS 37:

(₹ in million)

Particulars	As at March 31, 2026
Contingent liabilities	
Claims against the Company not acknowledged as debts:	
(a) Claims by customers/suppliers and other third parties	9.38
(b) Representation have been filed before the respective authorities against:	
- Custom duty under appeal / litigation	94.67
- Income tax under appeal/ litigation	-
- GST under appeal/ litigation	143.60
- High Court- Patna relating to civil writ jurisdiction	0.94
Total	**248.59**

Notes

*i) The amounts shown in above represent the best possible estimates arrived at on the basis of available information. The uncertainties and timing of the cash flows are dependent on the outcome of different legal processes which have been invoked by our Company and its Subsidiary, Lumino Green Energy Private Limited (together, the "**Group**") and its joint ventures or the claimants, as the case may be and, therefore, cannot be estimated accurately. The Group and its joint ventures do not expect any reimbursement in respect of above contingent liabilities.*

ii) One of the claim with respect to (a) above our Company has made counter claims/ has a right to recover money in the event of claims crystallizing amounting to ₹8.72 million (previous year ended March 31, 2025 and March 31, 2024 - ₹8.72 million).

iii) Our Company has received several demand orders under WBGST and CGST Act. The management firmly believes that our Company has a strong case and such demand is not tenable as per law. Our Company has filed appeal against these orders.

10. **Risks relating to related-party transactions:** Related-party transactions represented 9.20%, 14.92% and 16.22% of our revenue from operations in Fiscals 2026, 2025 and 2024, respectively, and may involve potential conflicts of interest or be undertaken on terms that are not favourable to us.

11. **The weighted average Return on Net Worth for Fiscals 2026, 2025 and 2024 is 24.07%.**

12. **Offer-related risk:** The Offer comprises a fresh issue of Equity Shares of face value of ₹5 each aggregating up to ₹5,000.00 million and an offer for sale of Equity Shares of face value of ₹5 each aggregating up to ₹2,000.00 million by the Selling Shareholders. Further, while our Company will receive proceeds from the Fresh Issue, it will not receive any proceeds from the Offer for Sale. The Selling Shareholders will not be entitled to the Net Proceeds from the Offer for Sale, which comprises proceeds from the Offer for Sale net of Offer Expenses.

13. The weighted average cost of acquisition of all equity shares transacted in the last one year, 18 months and three years preceding the date of the Red Herring Prospectus has been set forth in the table below:

Period	Weighted average cost of acquisition (in ₹)[(1)]	Cap Price is 'x' times the weighted average cost of acquisition	Range of acquisition price: lowest price – highest price (in ₹)[(1)]
Last one year	N.A.	N.A.	Nil
Last 18 months	N.A.	N.A.	Nil
Last three years	Nil	Nil	Nil

[(1)] As certified jointly by Singhi & Co., Chartered Accountants and SDP & Associates, Chartered Accountants, by way of their certificate dated August 20, 2026.

14. The average cost of acquisition of Equity Shares for Selling Shareholders ranges from NIL per Equity Share to ₹0.002 per Equity Share and the Offer Price at upper end of the Price Band is ₹82 per Equity Share

15. The three BRLMs associated with the Offer have handled 73 public issues in the past three years, out of which 23 issues closed below the issue price on listing date:

Name of the BRLMs	Total public issues handled	Number of issues closed below the issue price on listing date
Motilal Oswal Investment Advisors Limited	23	7 (30.43%)
JM Financial Limited	38	13 (34.21%)
Monarch Networth Capital Limited	1	0 (0.00%)
Common issues handled by the BRLMs	11	3 (27.27%)
Total	**73**	**23 (31.51%)**

The Price Band has been and the Offer Price will be determined by our Company, in consultation with the BRLMs, and in accordance with applicable law, on the basis of assessment of market demand for the Equity Shares offered through the Book Building Process and on the basis of the quantitative and qualitative factors as described below. The face value of the Equity Shares is ₹5 each and the Floor Price is 15.60 times the face value and the Cap Price is 16.40 times the face value. Investors should also see sections ***"Risk Factors"***, ***"Our Business"***, ***"Restated Consolidated Financial Information"***, and ***"Management's Discussion and Analysis of Financial Condition and Results of Operations"*** on pages 20, 246, 322 and 383, respectively, of the RHP to have an informed view before making an investment decision.

I. Qualitative Factors

Some of the qualitative factors and our strengths which form the basis for the Offer Price are:

- A power EPC company with in-house manufacturing capabilities;
- Cost efficient business model with integrated business segments;
- Manufacturing facilities with diverse product offerings;
- Order book across various regions in India;
- Partnerships with global companies for advanced technology; and
- Promoters and management team, with operational and workforce oversight.

For further details, see ***"Our Business – Strengths"*** on page 250 of the RHP.

II. Quantitative Factors:

Some of the information presented below relating to our Company is based on the Restated Consolidated Financial Information. For details, see ***"Restated Consolidated Financial Information"*** on page 322 of the RHP.

Pursuant to the Board resolution dated November 13, 2024, and the Shareholders' resolution dated November 14, 2024, the authorised share capital of our Company was sub-divided from 42,395,000 equity shares of face value of ₹10 each into 84,790,000 equity shares of ₹5 each. Accordingly, the issued, subscribed and paid-up equity share capital of our Company consisting of 30,447,262 equity shares of ₹10 each were sub-divided into 60,894,524 equity shares of ₹5 each.

Further, pursuant to the Board resolution dated November 23, 2024, and Shareholders' resolution dated November 25, 2024, our Company has issued and allotted Equity Shares through bonus issue in the ratio of three Equity Shares for every one Equity Share held. Sub-division of shares and bonus issue have been retrospectively considered for the computation of EPS in accordance with Ind AS 33 for all Fiscals/ periods presented.

Some of the quantitative factors which may form the basis for calculating the Offer Price are as follows:

1. Basic and diluted earnings per Equity Share ("EPS"), as adjusted for change in capital:

Financial Year ended	Basic EPS (₹)	Diluted EPS (₹)	Weight
March 31, 2026	6.57	6.57	3
March 31, 2025	5.11	5.11	2
March 31, 2024	3.56	3.56	1
Weighted Average	5.58	5.58	

Notes:
(1) Weighted average = Aggregate of year-wise weighted EPS divided by the aggregate of weights i.e. (EPS x Weight) for each year/Total of weights.
(2) The face value of each Equity Share is ₹5.
(3) Basic EPS (₹) = Basic earnings per share are calculated by dividing the net restated profit or loss for the year attributable to equity shareholders by the weighted average number of Equity Shares outstanding during the year.
(4) Diluted EPS (₹) = Diluted earnings per share are calculated by dividing the net restated profit or loss for the year attributable to equity shareholders by the weighted average number of Equity Shares outstanding during the year as adjusted for the effects of all dilutive potential Equity Shares outstanding during the year.
(5) Weighted average number of Equity Shares is the number of Equity Shares outstanding at the beginning of the year adjusted by the number of Equity Shares issued during the year multiplied by the time weighting factor. The time weighting factor is the number of days for which the specific shares are outstanding as a proportion of total number of days during the year.
Earnings per Share calculations are in accordance with the notified Indian Accounting Standard 33 'Earnings per Share'.

2. Price/Earning ("P/E") ratio in relation to the Price Band of ₹78 to ₹82 per Equity Share:

Particulars	P/E at the Floor Price (no. of times)	P/E at the Cap Price (no. of times)
Based on basic EPS for Fiscal 2026	11.87	12.48
Based on diluted EPS for Fiscal 2026	11.87	12.48

3. Industry Peer Group P/E ratio

Based on the peer group information (excluding our Company), details of the highest, lowest and industry average P/E ratio are set forth below:

Particulars	Industry P/E ratio
Highest	108.66
Lowest	19.81
Average	48.55

Notes:
(1) The industry high and low has been considered from the industry peer set provided later. The industry average has been calculated as the arithmetic average P/E of the industry peer set disclosed in this section.
(2) The industry P/E ratio mentioned above is for the financial year ended March 31, 2026. P / E Ratio has been computed based on the closing market price of equity shares on NSE on August 11, 2026 divided by the Diluted EPS for the year ended March 31, 2026.
(3) All the financial information for listed industry peers mentioned above is sourced from the audited financial statements of the relevant companies for Fiscal 2026, as available on the websites of the Stock Exchanges.

4. Return on Net Worth ("RoNW")

Financial Year/ Period ended	RoNW (%)	Weight
March 31, 2026	24.62	3
March 31, 2025	24.52	2
March 31, 2024	21.52	1
Weighted Average	**24.07**	

Notes:
(1) Weighted average = Aggregate of year-wise weighted RoNW divided by the aggregate of weights i.e. (RoNW x Weight) for each year/Total of weights.
(2) Return on Net Worth (%) = Profit for the year divided by average Tangible Net Worth.

5. Net Asset Value per Equity Share ("NAV")^, as adjusted for change in capital

Period ended	Consolidated (₹)
As at March 31, 2026*	29.95
As at March 31, 2025*	23.41
As at March 31, 2024*	18.30
After the Offer	
- At the Floor Price	39.96
- At the Cap Price	40.37
- At Offer Price#	[●]

**As adjusted for bonus and split*
^Net Asset Value per equity share of face value of ₹5 each.
#To be determined on conclusion of the book building process.
Notes: Net Asset Value per Equity Share = Tangible Net worth (Tangible Net Worth: total equity- intangible assets - intangible assets under development) as at the end of the financial year, as restated, divided by the number of Equity Shares outstanding at the end of the period/year as adjusted for bonus and split.

NOTICE TO INVESTORS
CORRIGENDUM TO THE RED HERRING PROSPECTUS DATED AUGUST 19, 2026 AND ABRIDGED PROSPECTUS (THE "CORRIGENDUM")

Change in the Designated Stock Exchange

This Corrigendum is in reference to the Red Herring Prospectus dated August 19, 2026 (**"RHP"**) and abridged prospectus dated August 19, 2026 (**"Abridged Prospectus"**) filed by our Company with the Registrar of Companies, NCT of Delhi–I, at South Delhi (**"RoC"**), and thereafter submitted to the Securities and Exchange Board of India (**"SEBI"**), BSE Limited (**"BSE"**) and the National Stock Exchange of India Limited (**"NSE"**, together with BSE, the **"Stock Exchanges"**) in relation to the Issue on August 19, 2026.

In this regard, potential Bidders should note the following modifications to the disclosures in the RHP and Abridged Prospectus:

1. The Designated Stock Exchange as mentioned across the RHP should be read as "NSE" instead of "BSE" across page numbers, i.e. cover pages, 6, and 405 in the RHP and page number, i.e. cover page in the Abridged Prospectus.

The information above modifies and updates the information in the RHP and the Abridged Prospectus. The RHP and the Abridged Prospectus accordingly stands updated to the extent stated hereinabove and the above changes are to be read in conjunction with the RHP and the Abridged Prospectus. This Corrigendum does not reflect all the changes that have occurred between the date of filing of the RHP and the Abridged Prospectus with the RoC and the date hereof, and accordingly, does not include all the changes and/or updates that will be included in the Prospectus and the Abridged Prospectus. The Prospectus and the Abridged Prospectus will be suitably updated, pursuant to the aforementioned changes, as and when filed by our Company with the RoC, and submitted to the SEBI and the Stock Exchanges.

All capitalised terms used in this Corrigendum shall, unless the context otherwise requires, have the meaning ascribed to them in the RHP.

PUBLIC NOTICE FOR CONVENING 61ST ANNUAL GENERAL MEETING

1. **Annual General Meeting through Video Conferencing/Other Audio-Visual Means**

   NOTICE is hereby given that the 61st (Sixty First) Annual General Meeting (AGM) of the Members of Engineers India Limited ("The Company") will be held on **18th September 2026 (Friday) at 11:00 a.m. (IST)** through Video Conferencing ("VC")/Other Audio-Visual Means ("OAVM") without the physical presence of the members at a common venue, in compliance with the applicable provisions of the Companies Act, 2013 ('The Act'), and the rules made thereunder, the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations") read with Ministry of Corporate Affairs (MCA) circular No.03/2025 dated 22.09.2025 along with other relevant circulars issued by MCA and SEBI to transact the business as set out in the AGM Notice.

2. **Dispatch of Notice and Integrated Annual Report by e-mail**

   In compliance to aforementioned circulars, the Notice convening the 61st Annual General Meeting along with Explanatory Statement pursuant to the provisions of Section 102 of the Act and the Integrated Annual Report for the Financial Year 2025-26 will be sent as per the prescribed timelines by e-mail to all members whose email addresses are registered with the Company/Registrar to an Issue and Share Transfer Agent/Depository Participants. The Notice of AGM and Integrated Annual Report for FY 2025-26 will also be available on the website(s) of the Company (**www.engineersindia.com**) and Central Depository Services (India) Limited (CDSL) (agency for providing the Remote e-voting facility), i.e. **www.evotingindia.com**. Members can also access the same on the website of Stock Exchanges where the equity shares of the company are listed, i.e. BSE Limited and National Stock Exchange of India Limited at **www.bseindia.com** and **www.nseindia.com** respectively. Further, as per Regulation 36(1)(b) of the SEBI Listing Regulations, the Company will send a letter providing the web-link, including the exact path, where complete details of the Annual Report are available, to those Member(s), who have not registered their e-mail address(es).

3. **Electronic Voting and Participating at the AGM**

   Members can attend and participate in the AGM through the VC/OAVM facility available at **www.evotingindia.com**. The instructions for joining the AGM will be provided in the Notice of the AGM. The Company will be providing members the facility to cast their votes using an electronic voting system from a place other than the venue of AGM ("remote e-voting") and to participate in the AGM through VC/OAVM and also to electronically cast their votes during the AGM ("e-voting"). Detailed procedure for remote e-voting/e-voting will be provided in the Notice of the AGM. Members joining the AGM through VC/OAVM shall be counted for the purpose of reckoning the quorum for the AGM under Section 103 of the Act.

4. **Manner of registering/updating e-mail addresses**

   Member(s) who have not yet registered their e-mail address with the Company/ Depository, are requested to please follow the following instructions to register their e-mail address so as to receive all communications electronically including Annual Report, Notices, Circulars, NACH Intimation, etc. sent by the Company from time to time:

   a) Members holding shares in Demat mode can get their e-mail address registered by contacting their respective Depository Participant.

   b) Members holding shares in Physical mode, please provide necessary details like Folio No., Name of Member along with scanned copy of the Share Certificate (front and back), self-attested scanned copy of PAN and Aadhar by e-mail to R&TA or Company. In case of any queries, Members may send an e-mail request to the e-mail id **rta@alankit.com.**

5. **Manner of Electronic Credit of Final Dividend, Record Date & Tax on Dividend**

   The Board of Directors of the Company has recommended a final dividend of Rs. 2.50/- per equity share. The Company has fixed **24.09.2026 (Thursday)** as the '**Record Date**' for determining entitlement of Members to receive final dividend for the Financial Year ended March 31, 2026, if approved by the Members at the AGM. The final dividend, once approved by the Members in the ensuing AGM, will be paid to the eligible Members within the stipulated period of 30 days of declaration.

   Pursuant to the amended Regulation 12 of the SEBI Listing Regulations, listed entities are mandatorily required to make dividend payments only through electronic modes. Consequently, physical modes of payment such as cheques or demand drafts are no longer permitted.

   Accordingly, Members holding shares:

   • In **Demat mode** are requested to ensure that their bank details are updated with their Depository Participant.

   • In **Physical form** are requested to update KYC details including name, postal address, e-mail address, telephone/mobile numbers, PAN, nominations, Bank Details and Specimen Signatures with the Company's Registrar to an Issue and Share Transfer Agent.

   In accordance with the provisions of the Income Tax Act, 2025, dividend declared and paid by the Company is taxable in the hands of Members. The Company shall, therefore, be required to deduct Tax at Source as per the applicable rates on dividend payable to its Members. The applicable withholding tax rate would vary depending on the residential status, category of the shareholder and is subject to submission of requisite declarations/documents to the Company on or before **24.09.2026 (Thursday)**.

6. **Attention of Shareholders**

   Pursuant to SEBI Circular dated 30.01.2026, a special window remains available from 05.02.2026 to 04.02.2027 for transfer-cum-dematerialisation of eligible physical securities where the transfer deed was executed prior to 01.04.2019. The facility covers eligible transfer requests that were earlier rejected, returned, or not processed due to documentation or procedural deficiencies, subject to fulfilment of SEBI prescribed conditions, verification requirements and dematerialisation norm.

   If any queries or issues regarding attending AGM & e-voting from the e-voting system, shareholder may refer the Frequently Asked Questions ("FAQ") and e-voting manual available at **www.evotingindia.com** under help section or write an e-mail at **helpdesk.evoting@cdslindia.com.** Investors may also contact at 18002109911.
