H-1B fee plan threatens IT playbook

POULOMI CHATTERJEE
Bengaluru, August 25

THE US DEPARTMENT of Homeland Security's (DHS) proposal to impose an additional \$103,265 fee on new cap-subject H-1B petitions could force Indian IT services companies to rethink their traditional model of moving employees trained in India to the US for two-three year assignments, while making them more selective about the talent they deploy onsite.

The proposal marks a fresh attempt by the Trump administration to impose the steep charge after a federal court struck down the earlier \$100,000 fee introduced through a Presidential proclamation. Unlike the earlier measure, the new fee is being proposed by the DHS through formal rule-making under its fee-setting authority. It would apply to cap-subject H-1B peti-

BOTH LENDERS PLAY DOWN DEAL REPORTS

Federal-Jana SFB merger buzz grows

FE BUREAU
Mumbai, August 25

SPECULATION OVER A merger between Federal Bank and Jana Small Finance Bank (Jana SFB) intensified on Tuesday after a television channel reported that the Kerala-based lender was in advanced talks to acquire a controlling stake in the small finance bank.

CNBC-TV18, citing sources, reported that Jana SFB's promoter, Jana Holdings, is likely to sell its entire 16.9% stake to Federal Bank, a transaction that would trigger an open offer. Shares of Federal Bank fell 3% on the BSE on Tuesday, while Jana SFB slipped 2%.

Since regulations bar one bank from owning another, investment bankers said any acquisition of a controlling stake would eventually have to culminate in a merger. "A bank cannot own a bank, so it will necessarily have to merge. There will be a stock swap, and Jana's shareholders will get shares of Federal Bank," an investment banker said.

SHARES TAKE A HIT

Both lenders played down the reports. In a clarification to exchanges, Federal Bank said it evaluates growth and expansion opportunities in the ordinary course of business. "Further, we

clarify that there is no material event/information that requires disclosure," it said. Jana SFB issued a similar clarification.

SRTT set for fresh appeal this week to lift meeting ban

URVI MALVANIA
Mumbai, August 25

TRUSTEES OF THE Sir Ratan Tata Trust (SRTT) are expected to approach the Charity Commissioner of Maharashtra this week with a fresh plea for interim relief from the ban on convening meetings, as the need to begin the process of choosing the next Tata Sons chairman adds urgency to resolving the impasse, people with knowledge of the matter said.

Efforts to secure relief ahead of the August 18 Tata Sons annual general meeting proved unsuccessful, forcing the holding company to adjourn its AGM for the first time in the group's history. SRTT trustees are now believed to have deliberated afresh on approaching the Charity Commissioner.

People close to the development said the trustees favour making another representation, stressing the need to resume meetings to deal with pressing trust business, including approval of accounts and grants, as well as decisions

Mumbai, August 25

THE SEARCH FOR the best of India Inc begins in Mumbai on Wednesday, when a high-powered jury led by Aditya Birla Group Chairman Kumar Mangalam Birla sits down to pick the winners of the inaugural FE Leadership Awards 2026.

Joining Birla at the jury table is a formidable line-up drawn from banking, law, private equity and professional services: Arundhati Bhattacharya, former chairman of State Bank of India and now President & CEO, Salesforce, South Asia; Cyril Shroff, managing partner, Cyril Amarchand Mangaldas; Sanjay Nayar, former CEO of Citigroup India and South Asia and former CEO of KKR India; Amit Chandra, chairman, Bain Capital; Rajiv Memani, chairman & CEO, EY India; and Manish Kejriwal, founder and managing partner, Kedaara Capital.

Their task: to identify the leaders, companies and ideas that stood out in a year when disruption was relentless, markets were being reshaped and the demands on corporate leadership became tougher.

The FE Leadership Awards will celebrate business leaders who are helping drive India's growth story, companies that have reinvented themselves, ideas that have disrupted established markets and innovations that could change the way business is done. They will also recognise financial stewards who protected corporate balance sheets

RBI'S STATE OF THE ECONOMY ARTICLE CITES RECOVERY IN KEY SECTORS

India's economy holds firm despite global headwinds

SHUBHAM RANA New Delhi, August 25

INDIA IS BETTER placed than some other Asian economies, such as China, to face the Section 301 tariffs imposed by the US in July, Reserve Bank of India (RBI) staff said in the August Bulletin.

The Indian economy also remains resilient amid ongoing global headwinds, the central bank's staff said.

The US Section 301 tariffs, which came into effect on July 24, levied an additional 10% duty on imports from India.

"However, India's major export commodities to the US, such as smartphones, petroleum products and pharmaceuticals, remain outside its purview.

"India is likely to be less affected than some of the Asian economies in the US market, such as China, Vietnam and Thailand," the RBI staff said in the "State of the Economy" article, which is part of the Bulletin.

India also faces a lower Section 301 tariff compared with China, Vietnam and

Thailand, all of which face an additional 12.5% duty. These fresh tariffs by the US, along with geopolitical frictions in West Asia, continue to shape the global economic outlook, the RBI staff said.

"Despite these risks to global trade and the growth-inflation matrix, India's robust macroeconomic fundamentals continue to provide a cushion to the domestic economy," the staff noted. The views

expressed in the article are those of the authors and do not represent the views of the central bank, the RBI said.

The momentum in economic activity seen in the April-June quarter continued in July, the staff said. Most high-frequency indicators reflected sustained manufacturing and services activity in July, along with double-digit expansion in merchandise exports and imports.

Domestic demand remained strong in July, supported by rural demand, the RBI staff said. Urban demand also remained firm, with passenger vehicle sales maintaining high growth.

The recovery in the southwest monsoon in July helped kharif sowing reach closer to normal acreage, partly mitigating some of the risks to the agriculture sector, the RBI staff said.

Traders driving onion price surge, says Khare

SANDIP DAS New Delhi, August 25

ONION PRICES ARE rising sharply despite comfortable production and adequate stocks, prompting the government to flag possible speculative activity in Nashik, the country's key onion-producing region.

Retail onion prices rose 56% year-on-year to ₹44.72/kg on Tuesday, even as the government said supplies remained sufficient.

Consumer Affairs Secretary Nidhi Khare said some traders in Nashik were trying to create negative sentiment around supplies despite the comfortable production outlook.

Speaking to FE, Consumer Affairs Secretary Nidhi Khare said: "There are some elements in the trading community who are trying to create negative sentiments about supplies while production estimates do not indicate so, while exports are going on smoothly."

Further, Khare added that onion production during the 2025-26 crop year (June-July) is estimated at 30.73 million tonne (MT), against 30.76 MT

■ First 800-tonne onion train to reach Delhi today

■ NAFED, NCCF procure 0.12 MT so far for FY27

■ Govt raises onion procurement price to ₹2,645/quintal

in the previous year, indicating that there is currently little concern over supplies.

Sources said mandi prices in Nashik, Maharashtra, the key producing region, are ruling in the range of ₹38-47/kg, while prices in Mumbai and Delhi are in the range of ₹33-34/kg and ₹25-25.5/kg, respectively, indicating possible speculative activity.

"Comfortable production levels, stock availability and proactive market interventions are expected to moderate seasonal price volatility," Khare added.

According to the Depart-

ment of Consumer Affairs, the average retail price of onions rose to ₹44.72/kg on Tuesday, up 56% from a year earlier. Retail prices have risen by more than 19% over the past month, while prices in Delhi-NCR have crossed ₹55/kg.

The first 'Kanda Express' of the season, carrying around 800 tonne of onions from Nashik, Maharashtra, will reach the national capital on Wednesday. The onions will be sold to retail consumers at a ₹35/kg through outlets and mobile vans operated by NAFED, NCCF and Kendriya Bhandars.

AI boom props up APAC growth amid risks, says Moody's

PRESS TRUST OF INDIA New Delhi, August 25

THE ARTIFICIAL INTELLIGENCE (AI) boom has helped the Asia-Pacific region dodge a sharper slowdown, but headwinds to growth are mounting as geopolitical and trade shocks keep prices high, Moody's Analytics said on Tuesday.

It projected growth across the Asia-Pacific region to slow to 4.2% in 2026 and 3.6% in 2027.

This is down from 4.3% in 2025.

Geopolitical upheaval and trade disruptions, including the conflict in West Asia, and friction between the US and its trading partners—have driven up prices and the cost of doing business, dragging down consumer and business spending across much of the region.

"For now, the AI boom is still propping up export growth, but it is looking increasingly ripe for a pause," Moody's Analytics said in its Asia-Pacific Outlook report.

The AI boom is currently papering over the strain from higher inflation and tight policy, it said, adding the West Asia conflict is a top concern posing downside risks to growth.

A fresh flare-up in the West Asia or a drawn-out blockade of the Strait of Hormuz would send oil prices surging and force countries to drain their reserves.

GROWTH OUTLOOK

■ APAC growth seen easing to 4.2% in 2026 and 3.6% in 2027, from 4.3% in 2025

Geopolitical risks mount West Asia conflict, US trade frictions raising prices

■ Hormuz key risk: Prolonged blockade could send oil prices surging

■ AI boom faces pause: Moody's warns AI-led export boost increasingly ripe for a pause

That would lift inflation, hurt growth, and worsen the trade-offs facing central banks, Moody's Analytics said.

"A prolonged conflict in West Asia, a sudden bursting of the AI boom, fresh trade friction, or a financial market correction alongside a global downturn would leave the region badly exposed," it said.

Sugar imports seen at half of duty-free allocation

REUTERS Mumbai, August 25

SUGAR MILLS AND refiners are likely to import only about half of the 1 million metric tonne (MMT) of raw sugar the government has allowed duty-free, as falling domestic prices have eroded the profitability of imports, industry officials told Reuters.

The world's biggest sugar consumer last week allowed duty-free imports until October 31 to ease record-high prices ahead of the festival season, when demand for traditional sweets typically peaks.

But domestic ex-mill prices have fallen nearly 20% from the record high hit last week.

"Imports looked attractive last week, when prices were firm and rising. But the sharp price drop since the announcement has taken the shine off imports for millers," said Rahil Shaikh, managing director of Mumbai-based trader MEIR Commodities India.

The import margin is thin, and there is no guarantee it will hold when shipments arrive in nearly two months, Shaikh said. Shaikh and four other dealers at global trading houses said imports are unlikely to exceed 500,000 tonne, with most of the volume likely to be taken up by refineries.

India has a handful of port-based sugar refineries that import raw sugar duty-free for refining and export the resulting white sugar.

● Vessel traffic up 2.5%, cargo-carrying transits down 27%

SAURAV ANAND New Delhi, August 25

VESSEL TRAFFIC THROUGH the Strait of Hormuz edged higher in the week ended August 23, but cargo-bearing movements fell sharply, with cargo-carrying transits declining 27%, signalling that the headline recovery in shipping has yet to translate into a meaningful improvement in commercial flows through the key energy chokepoint.

Confirmed Hormuz crossings increased 2.5% week-on-week to 121, even as the composition of traffic deteriorated. The number of sanctioned vessel crossings rose sharply to 16

WEAK FLOWS

■ Sanctioned vessel crossings have jumped to 16 from 9

■ Iran-routed ships made up 46.3% of Hormuz traffic

■ Commercial cargo flows weaken despite rise in overall vessel movements

■ Hormuz traffic had fallen 19.5% to 95 vessels in previous week

from nine, while vessels using Iran's unilateral routing scheme accounted for 46.3% of all crossings, according to maritime intelligence firm Kpler.

"Traffic edged higher through the Strait of Hormuz and Bab el-Mandeb last week, but headline volumes obscure contrasting risk signals,"

Kpler said.

The decline in cargo-carrying transits is particularly significant as it contrasts with the rise in overall vessel crossings. Kpler said the latest data suggest that "commercial substance is weakening at Hormuz even as overall traffic holds up", highlighting the gap between

vessel movements and actual cargo transportation.

The latest weekly numbers follow continued volatility in Hormuz traffic. In the preceding week, confirmed crossings had fallen 19.5% to 95, with traffic dropping to just three vessels on August 16. At the time, no crossings were

■ Bab el-Mandeb crossings rose 3.1% to 269, more than double Hormuz traffic

recorded through the standard Hormuz Traffic Separation Scheme or Omani routes, while movements remained concentrated on Iran's unilateral scheme and undetermined routes.

Traffic through Bab el-Mandeb, meanwhile, remained considerably stronger. Crossings increased 3.1% to 269 during August 17-23, more than double the 121 recorded at Hormuz.

Dark transits declined, while sanctioned and shadow-fleet crossings were broadly unchanged at a combined 74 vessels. The two chokepoints therefore presented sharply different signals during the week.

While Bab el-Mandeb traffic remained resilient despite an active threat environment, Hormuz saw the share of sanctioned vessels and Iran-routed traffic rise even as cargo-carrying movements contracted.

Japanese investors seek clearer rules and easier repatriation

MUKESH JAGOTA
New Delhi, August 25

JAPANESE FINANCIAL INSTITUTIONS have called for simpler profit repatriation processes, easier access to India's capital markets, and greater regulatory predictability for long-term investors in meetings with Commerce and Industry Minister Piyush Goyal in Tokyo on Tuesday.

The discussions focused on strengthening long-term capital flows, deepening investment partnerships and encouraging greater Japanese participation in India's growth story, the commerce ministry said in a statement.

The talks come as India and Japan work towards mobilising 10 trillion yen (\$68 billion) in Japanese private investment in India over the next decade.

Japanese institutions said they remain strongly positive about India's long-term prospects. At the same time, they noted that currency movements

Union Commerce and Industry Minister Piyush Goyal (fourth from left) along with Toray Industries President and CEO Mitsuo Ohya and other senior officials, in Tokyo on Tuesday

and regulatory and policy uncertainties can affect short-term investment decisions.

While routine dividend payments are generally manageable, investors said larger capital transactions — including share buybacks, capital reductions and secondary equity sales — can face lengthy regulatory processes, valuation scrutiny and strict Reserve

Bank of India (RBI) transfer-pricing requirements.

They also raised concerns about access to India's debt markets. Limits on foreign investment in corporate and government bonds can make it harder for Japanese institutional investors to allocate capital to Indian fixed-income assets. With Japan's institutional funds managing

large pools of long-term capital in a low-yield environment, India's relatively higher interest rates remain attractive. Top-tier Indian debt currently offers yields of around 6.5% to 9%.

Outside specific mechanisms such as the Fully Accessible Route (FAR), which allows foreign investors to invest in designated government securities

without macro-level investment caps, some debt investments remain subject to maturity restrictions and sectoral limits.

At the meeting, Goyal highlighted opportunities for Japanese investors in sectors, including semiconductors, artificial intelligence, data centres, renewable energy, green hydrogen, advanced manufacturing and digital infrastructure.

He said India sees Japan as a trusted partner in its ambition to become a global manufacturing, technology and investment hub.

Mitsubishi UFJ Financial Group (MUFG) pointed to its investment of around \$4 billion in Shriram Finance and its growing interests in areas such as renewable energy and hydrogen. Development Bank of Japan (DBJ) outlined its dedicated India strategy and expressed growing interest in property development, venture capital and other long-term investment opportunities.

US sanctions 4 Indian firms for Iran oil trade

MUKESH JAGOTA
New Delhi, August 25

THE UNITED STATES has sanctioned four India-based companies and three Indian nationals over their alleged involvement in the trade of Iranian petroleum and petrochemical products, escalating Washington's campaign to cut off Tehran's access to international revenues.

The sanctions, announced by the US State Department on August 24, target Portease Partners, Sadashiva Overseas, PP Softtech and Prakrutees Infra Impex India.

The action forms part of its broader "Operation Economic Outcast", under which the US is seeking to disrupt Iran's petroleum trade, procurement networks and other channels that generate revenue for the Iranian regime.

The scale of the transactions cited by Washington is significant. Sadashiva Overseas allegedly imported about \$69 million worth of Iranian-origin petroleum products between February 2024 and June 2025. PP Softtech allegedly imported another \$25 million between January 2024 and June 2025, while Prakrutees Infra Impex is

accused of importing petroleum products worth about \$25 million between May 2023 and February 2026.

Together, the three companies account for about \$119 million in transactions identified by the US.

The State Department also targeted partners of Portease Partners — Indrismiya Ashrafmiya Shekh and Harish Ramchandra Rangi. Prashant Garg, director of PP Softtech, was separately designated.

The latest action is part of a long-running US strategy of using sanctions to squeeze Iran's principal source of foreign-exchange earnings. Previous US actions have targeted shipping companies, traders, financial intermediaries and companies in third countries involved in Iranian oil flows.

India to stop importing grid systems after 2030

SAURAV ANAND
New Delhi, August 25

INDIA PLANS TO stop importing a key technology used to monitor and control the country's electricity grid after 2030, as the government looks to reduce its dependence on foreign suppliers for critical power infrastructure.

The technology, called Supervisory Control and Data Acquisition (SCADA), allows operators to monitor power plants and substations from control centres and remotely operate equipment such as circuit breakers and transformers. The CEA calls it the "central nervous system of the National Power Grid" because it helps manage electricity flows in real time.

According to the central electricity authority's report of committee on formulation of trajectory of indigenisation of SCADA system, local content in grid SCADA systems is currently below 20%, even though the government's Make in India rules prescribe minimum local content of 50%.

The government now wants Indian companies to develop the software and hardware required for these systems. The roadmap runs from 2026-27 to 2028-29, ahead of the decision that SCADA systems should not be imported beyond 2030.

Goyal promises BIS relief for high-tech firms

MUKESH JAGOTA
New Delhi, August 25

THE GOVERNMENT WILL create a framework of exemptions from compliance with standards mandated by the Bureau of Indian Standards (BIS) for high-tech companies looking to set up manufacturing bases in India, Commerce and Industry Minister Piyush Goyal said on Tuesday.

"We have already instructed BIS and the Ministry of Commerce and Industry to work on a framework to support high-tech industry, not necessarily only Japanese companies coming in to promote the Make in India programme," the minister said at a roundtable on semiconductors and artificial

COMPLIANCE EXEMPTION

- Japanese firms flagged BIS compliance challenges for manufacturing equipment
- Electronics demand in India could reach **\$150 bn** by 2032
- Semicon 1 provided **\$10 bn** in government incentives

intelligence in Tokyo.

The framework for exemptions from BIS certification will cover equipment and components that companies need to bring to India to support their manufacturing operations.

"We will be creating a framework which will either give company-level or industry-level exemptions. We will work on the framework as I get back to India and find a solution for bulk exemptions, or

product- or project-based exemptions, or company-based exemptions, so that we can have timely supply of products, goods and services, and support your work in India," the minister added.

The challenges in complying with BIS standards were flagged by Japanese companies such as semiconductor production equipment maker Tokyo Electron and others looking to establish a presence in India.

On the issue of regulatory complexity, raised particularly by Fuji Electric, the ministers said: "At the central level, you will not find us wanting, but I assure you that even at the state or local level, we will stand with you and are willing to support you fully."

India is a large and growing electronics market, with demand expected to reach up to \$150 billion by 2032.

"We are now rapidly expanding, particularly in the fabrication and packaging ecosystem. We are giving significant government incentives. Semicon 1 provided about \$10 billion and has seeded investments of roughly \$19 billion in the industry through 13 approved projects.

We have recently committed another \$15 billion for Semicon 2 and are committed to providing even more once we exhaust this \$15 billion," Goyal said, adding that Semicon 2 should be in a position to seed about \$50 billion in investments.

India pivots to US for LPG, LNG

INDIA HAS SHARPLY increased purchases of liquefied petroleum gas (LPG) and liquefied natural gas (LNG) from the United States as disruptions linked to the conflict in West Asia constrain supplies from traditional Gulf suppliers, data from maritime intelligence firm Kpler showed.

India imported about 0.62 million tonnes of LPG from the United States in August, in addition to 0.89 million tonne in July, accounting for more than

73% of the country's LPG imports, according to Kpler data.

The July US volume was almost equal to the highest-ever monthly LPG import

from the United Arab Emirates, India's traditional supplier, of 0.891 million tonnes in October 2025.

Imports from Gulf suppliers have fallen sharply after the effective closure of the Strait of Hormuz, following the outbreak of war between Iran and the United States.

The waterway is a key shipping route for crude oil and gas exported by Gulf producers to major consumers, including India. **PTI**

GREENKO-BACKED FIRM TO BUILD 30-MW AI CLUSTER IN HYDERABAD

AM Intelligence orders 9,000 Nvidia Rubin GPUs

FE BUREAU
New Delhi, August 25

GREENKO-PROMOTED AM INTELLIGENCE (AMI) is moving to build one of Asia's early frontier AI computing clusters with a binding order for 9,000 Nvidia Rubin GPUs, which it plans to deploy in a 30-MW AI factory in Hyderabad in the first quarter of 2027. The company said the facility would be among Asia's first large-scale AI compute clusters based on Nvidia's next-generation Vera Rubin architecture.

The move comes as demand for high-end AI computing infrastructure is running ahead of supply, with hyperscalers and artificial intelligence companies competing for advanced clusters to train and run increasingly large models. AMI's initial Hyderabad capacity has already been purchased by a US customer, Mahesh Kolli, founder and president of Greenko Group, told Bloomberg, although he declined to identify the customer citing a non-disclosure agreement.

AMI's Hyderabad facility will be the first tranche of a planned 1-GW compute-as-a-service platform that it is developing across India, the US, Finland and Malaysia. It plans to bring 200 MW of capacity to

market in the near term, involving more than \$8 billion in capital expenditure. The firm is targeting hyperscalers, AI labs, neo-cloud providers, sovereign AI initiatives and enterprises as customers for the computing capacity. The company is positioning access to low-cost renewable power as a key advantage in competing for AI workloads, where electricity costs form a significant component of the economics of serving AI tokens. AMI is backed by Greenko's renewable generation and energy-storage assets, allowing it to combine power infrastructure with high-density computing. AMI is developing 5 GW of

powered AI data centres across India, the US and Europe, with the facilities designed around high-density computing and liquid cooling to accommodate the substantial power and heat generated by advanced AI chips. The company plans to fund the buildout through a combination of debt and equity and is targeting 5 GW of data-centre capacity by 2030.

The Hyderabad cluster will use Nvidia Vera Rubin NVL72 rack-scale systems, high-throughput remote direct memory access over converged ethernet networking and advanced storage infrastructure. AMI said the system is being designed to run trillion-

parameter models and next-generation agentic AI applications. Nvidia's Rubin architecture includes NVFP4, a low-precision computing format, and next-generation high bandwidth memory 4 (HBM4), with Nvidia claiming significantly lower inference costs compared with its previous Grace Blackwell generation.

AMI said its broader strategy is to integrate renewable energy, data-centre infrastructure and next-generation AI hardware to offer compute capacity to global customers while also widening access to advanced AI infrastructure for Indian developers and sovereign AI initiatives.

Hyundai ties up with Jio-bp for charging infra access

HYUNDAI MOTOR INDIA on Tuesday said it has entered into a partnership with Jio-bp to integrate their EV charging networks and enhance charging accessibility for EV users across India. Through this collaboration, EV customers will be able to discover, access and use Jio-bp pulse charging stations using the myHyundai app, further enhancing charging convenience and accessibility, the company said in a statement.

With this partnership, Hyundai Motor's EV charging ecosystem now provides access to over 37,000 charging points across India, and its high-capacity chargers will be gradually integrated into the Jio-bp pulse charge pro app. "This partnership with Jio-bp pulse marks another significant step towards strengthening the EV ecosystem in India by enhancing charging accessibility and convenience for our customers," said Hyun Sup Lee, executive director and function head, corporate planning, Hyundai Motor India. —PTI

Air India seeks \$1.5 bn from Tata, Singapore Air

ABHIJITH GANAPAVARAM & ADITYA KALRA
New Delhi, August 25

AIR INDIA IS seeking about \$1.5 billion in fresh equity from its owners Tata Sons and Singapore Airlines, months after the airline posted a record annual loss, two people familiar with the matter told Reuters.

It would be one of Air India's largest publicly reported requests for shareholder funding since Tata took control of the former state-owned carrier in 2022. It highlights the challenges facing the airline as it undergoes a multi-billion-dollar revamp, including the refurbishment of its existing fleet.

The carrier and its budget unit Air India Express posted combined losses of \$2.33 billion in FY26, more than double the prior year's losses. The losses have also weighed on Singapore Airlines' profits.

"Air India wants the funds immediately, though the infusion is likely to happen in tranches. Singapore Airlines would need to contribute its share of the proposed infusion for the investment to go

through," one of the sources said. It is seeking the funding in the form of fresh equity, the two people said. Discussions are ongoing and no decision has been taken on the request, they added. Air India and Tata Sons did not respond to Reuters requests for comment.

Singapore Airlines, which owns around 25% of Air India, said it was working closely with Tata Sons to support Air India's transformation programme, but declined to comment on the airline's finances.

Its funding request comes as Tata Sons Chairman N Chandrasekaran prepares to step down in February follow-

ing months of disagreements with the group's controlling charitable trust, partly over Air India's losses. Chandrasekaran has said Air India's turnaround could take up to a decade, citing persistent supply-chain disruptions and the need to overhaul the airline's legacy systems, culture and fleet.

Air India has sought to defer deliveries of hundreds of jets on order from Airbus and Boeing as Tata presses the carrier to cut costs and reduce record losses, Reuters reported earlier this year. "Air India is expected to continue requiring capital infusions in the coming years," one of the sources said. —REUTERS

Govt mulling random dope tests for all pilots

NITIN KUMAR
New Delhi, August 25

THE CIVIL AVIATION ministry is considering mandating at least one random dope test every year for all commercial pilots, days after the pilot of an Air India flight that experienced a sudden altitude loss tested positive for marijuana.

Under the existing rules, dope testing is required for 10% of the overall pilot network. The Directorate General of Civil Aviation (DGCA) is now reviewing the framework and examining whether testing can be expanded to cover all pilots at least once a year on a random basis.

Civil Aviation Minister K Rammoohan Naidu said on Tuesday that the DGCA was examining different approaches to expand the scope of testing. "There are multiple ways of approaching this dope test. Right now, the rule says 10% across the overall pilot network. DGCA is engaging, and one of the opinions from our side is that everyone has to go through it in the year at a

random time," Naidu said. The minister said the government would have to balance safety considerations with the operational impact of introducing 100% testing of pilots.

"We have to see how all the stakeholders are going to respond to this because one is

the safety aspect of it, and the second thing is the operational impact, which also has to be taken into consideration. So we are going to balance both of them," he said. "If we were to implement 100% testing — where every pilot has to undergo a dope test at least once a year — what impact would that have? The DGCA is strategising that," he added.

The proposed expansion comes after the Air India Phuket-Delhi flight suffered a sudden 300-foot altitude drop on August 4, leaving 20 passengers and four cabin crew members injured. The flight captain allegedly failed a dope test following the incident.

The Aircraft Accident Investigation Bureau (AIB) is probing the incident. The minister said a preliminary report could be expected soon as the aircraft and its flight data recorder are intact and in the possession of the investigating agency.

The investigation is expected to shed more light on the circumstances surrounding the sudden altitude loss and the events leading up to it.

Porsche deal set to deepen TCS' auto play, Europe show

URVI MALVANIA
Mumbai, August 25

TATA CONSULTANCY SERVICES' acquisition of Porsche's management and IT consulting arm MHP will give the IT services company deeper automotive expertise and a stronger foothold in Europe, analysts said. The five-year contract also provides revenue visibility and greater stability as the businesses are integrated, they said.

Analysts framed the deal as strategically important for TCS, although its near-term operational impact is likely to be modest. MHP brings more than 4,500 employees, over 300 automotive and industrial clients and capabilities spanning automotive consulting, artificial intelligence, SAP, digital transformation, manufacturing digitalisation and software-defined mobility.

"While the deal contributes only around 2.7% of TCS' estimated FY28 revenue, the attached 1.25 billion euro (approximately ₹14,000 crore) 5-year Porsche contract provides revenue visibility and lowers execution risk. Overall, the acquisition is strategically important as it deepens TCS' presence in Germany and the European automotive ecosys-

"Considering the onsite-centric business with MHP's revenue challenges, intangible amortization impact, talent retention, and transaction and integration costs, the transaction is likely to be around 50bps dilutive at the EBITM level and slightly dilutive at EPS (earnings per share) level in the first year," analysts from Emkay said.

Swiggy starts food delivery inside cinemas

FE BUREAU
Bengaluru, August 25

SWIGGY HAS LAUNCHED "order-in-cinemas" on its Dineout platform, allowing moviegoers to order food from their seats through a QR code placed inside theatres.

The feature went live with multiplex chains Cinépolis and Asian Cinemas across multiple screens. Swiggy has also tied up with point-of-sale aggregators Impact, owned by UFO Moviez, and cinema software provider Showbizz, with integrations across other PoS players currently underway. The feature allows customers to scan a QR code, browse the cinema's menu on the Swiggy Dineout app, pay through the app, and have the order delivered to their seat.

For cinemas, the company is positioning the feature as a way to lift food and beverage income, which is among the highest-margin parts of a multiplex's revenue. Swiggy said the offering is aimed at raising average spend per head and revenue per screen by capturing orders that customers would otherwise skip rather than queue for. "By removing the need to stand in queues or leave the movie to grab that tub of popcorn, we hope to make the overall cinema experience even more seamless," said Swapnil Bajpai, CEO, Swiggy Dineout and Scenes.

As festive sales near, D2C brands put AI to work

S SHANTHI
Bengaluru, August 25

DIRECT-TO-CONSUMER (D2C) BRANDS are deploying artificial intelligence (AI) across the festive-season sales funnel, moving beyond chatbots and automated advertising to predict hyperlocal demand, manage inventory, improve product discovery and drive higher basket sizes.

With the festive demand concentrated in a six-week window, brands are using AI to identify changing consumer preferences and respond faster rather than relying on fixed seasonal plans. Feminine hygiene brand Sirona Hygiene, for instance, is tracking how women search for period-care products during Navratri and Diwali, when travel-related searches such as "period kit for travel" and "leak-proof panty" tend to rise.

Sirona is using these insights to optimise product listings in real time and in Hindi, Tamil, Telugu and Marathi. "AI helps us spot a non-obvious insight. For instance, intimate hygiene gift sets get searched significantly more during the festive season. We built curated Sirona gift sets

What can they expect in terms of results? How to maintain the product?" Vinay Singh, co-founder and partner, Fireside Ventures, said.

For D2C brands, this is also changing the way consumers discover products. Regional

sleep solutions brand SleepyCat is using AI further upstream, with a supply chain planning agent that integrates festive spike projections, seasonal trends and previous-year performance to plan demand and supply at the SKU (stock keeping unit) and category levels. It expects overall sales to grow 100-150% over last year.

Consumer-focused venture capitalists said brands are also ensuring that product pages are structured and crawlable by AI platforms such as ChatGPT and Gemini, with clear information

DRIVING THE VISION FORWARD

Excerpts of Chairman's Message at the
39th Annual General Meeting held on 25th August, 2026

Shri. Manoj Kumar Dubey
Chairman and Managing Director & CEO
DIN: 07518387

Chairman's message

Dear Shareholders,

I am privileged to present the 39th Annual Report of Indian Railway Finance Corporation Limited (IRFC), India's premier infrastructure financing institution & the backbone of Indian Railways. Achievements of FY 25-26 are not just numbers – they are stories of ambition turned into action. As we step into the future, IRFC 2.0 stands committed to fuelling India's growth, financing tomorrow, and empowering generations to come.

It gives me great satisfaction in sharing that we exceeded our guidance in FY 2025–26, creating an additional sanction pipeline of ₹72,949 crore against the target of ₹60,000 crore and achieving disbursements of ₹35,067 crore against the guidance of ₹30,000 crore. This outperformance reflects the Company's strong execution capabilities, efficient fund mobilization, and its pivotal role in meeting the financing needs of Indian Railways and allied infrastructure.

FY 2025–26 was distinguished as a breakthrough year for IRFC, delivering its highest-ever results in terms of revenue being ₹27,284.15 crore, Profit After Tax being ₹7,009.17 crore, Net Worth being ₹56,748.76 crore, AUM being ₹4.85 Lakh crore and EPS being ₹5.36/-. With a CRAR of 110.91% and zero NPAs, we reaffirmed the strength of our model and disciplined governance. Beyond stellar results, IRFC scripted capital market milestones – making a triumphant return to the ECB market after three years and pioneering its debut in Zero Coupon Bonds, expanding the frontiers of infrastructure financing with innovation and leadership.

Our focus on efficiency and cost optimization enabled consistent value creation, including a record dividend payout of ₹2,744.38 crore (₹2.10 per share) viz. 31% higher than FY 2024–25, reflecting our commitment to rewarding shareholders. Guided by the vision of 'IRFC 2.0', we advanced our transformation journey, diversifying into allied infrastructure sectors and engaging global investors through international borrowings and strategic roadshows, positioning IRFC as a future-ready institution aligned with India's development priorities.

As India marches towards Viksit Bharat 2047, IRFC stands uniquely positioned to power this transformation — with a strong balance sheet, zero-NPA record, and unwavering commitment to sustainable growth, innovation, and value creation. The conferment of 'Navratna' status by the Government of India in the previous year further enhanced our agility and strategic capabilities, empowering us to seize new opportunities. I invite you to explore this Annual Report, confident that the foundations we have laid today will support even greater structures of achievement tomorrow. Together, we are not just financing projects — we are building the enduring architecture of India's future.

KEY FINANCIALS

MoU Rating

The Company enters Memorandum of Understanding (MoU) with Ministry of Railways (MoR) every year wherein Company is evaluated on various financial and non- financial parameters. Based on its performance, the Company has been rated 'Excellent' by the Department of Public Enterprises (DPE) for the year 2024-25.

Lending & Borrowing Portfolio:

Total Disbursements during FY 2025-26 stood at ₹35,067 crore, including ₹12,386 towards railways, ₹9,516 crore towards Power and ₹13,165 towards fertilizers. No disbursement was made to the Ministry of Railways (MoR) due to a 'NIL' target allocation for the year. The diversified expansion resulted in improved spreads and a consistent rise in net interest margin (NIM), while IRFC maintained its pristine zero NPA status.

The Company mobilised ₹46,263.69 crore through diversified instruments, including taxable bonds (₹13,575.42 crore), rupee term loans (₹23,950 crore), 54EC bonds (₹2,306.21 crore), and ECBs (₹6,432.06 crore). The diversified borrowing mix supported financial flexibility, competitive cost and efficient asset-liability management.

Business Diversification

During FY 25-26, the company executed twelve (12) financing agreements beyond conventional railway financing worth ₹72,949 crore, significantly scaling its diversified lending portfolio. Notably, over 75% of business has been acquired through competitive RFPs.

Among key transactions, IRFC financed Dedicated Freight Corridor Corporation of India Limited's (DFCCIL) World Bank exposure through a ₹9,821 crore long-term rupee facility, resulting in savings of approximately ₹2,700 crore for DFCCIL. In line with its strategy to diversify into rail-linked infrastructure financing, IRFC also sanctioned a ₹12,640 crore loan to CSPGCL and committed financing of close to ₹15,000 crore to MAHAGENCO for its power generation projects, further strengthening IRFC's presence in the energy infrastructure space. The company also executed a ₹12,842 crore refinancing deal for Hindustan Urvarak & Rasayan Limited (HURL), marking its entry into large-ticket refinancing in the fertilizer sector.

The diversification strategy has begun to materially improve profitability metrics, with higher-yielding assets contributing to enhanced spreads compared to the traditional cost-plus railway financing model.

Road Ahead

IRFC enters FY 2026–27 with strengthened financial capacity, supported by a Board-approved borrowing limit of ₹70,000 Crore. With its elevation to Navratna CPSE status, IRFC gains greater autonomy to pursue new opportunities, refinance borrowings, and diversify into broader

infrastructure sectors. The Company expects growth to accelerate in the coming years, supported by a steady pipeline and emerging opportunities in sectors such as metro and ports, in line with its whole-of-government approach.

Going forward, IRFC aims to play a larger role in financing nation-building infrastructure projects by providing long-term and competitively priced financing solutions. Key focus areas would include railway infrastructure, Metro Rail projects, Regional Rapid Transit Systems (RRTS), dedicated freight corridors, high-speed rail corridors, ports, Multi-Modal Logistics Parks (MMLPs), renewable energy, railway SPVs and other infrastructure projects having strategic linkages with the railway sector. Through such financing, IRFC seeks to contribute towards improving logistics efficiency, strengthening multimodal connectivity and supporting sustainable economic growth.

Acknowledgement

It is with great pride and humility that I acknowledge the unwavering support and trust bestowed upon IRFC by our valued shareholders, debenture-holders, investors, and lending institutions, our customers and partners, especially Indian Railways, for their steadfast collaboration and longstanding association during the financial year 2025–26.

I extend my heartfelt gratitude to the Hon'ble Minister of Railways and Hon'ble Minister of Finance, along with all officials of their ministries, for their continued guidance and vision. Their insights and leadership have been instrumental in positioning IRFC as a key enabler of infrastructure transformation.

I also express gratitude to the Comptroller and Auditor General of India (C&AG), the Statutory Auditors, Secretarial Auditors, and Internal Auditors for their commitment to transparency, accountability, and good governance, and for their valuable support and guidance throughout the year.

I wish to place on record my appreciation for the Company's Board of Directors for their strategic oversight, and our employees whose professionalism, dedication, and commitment have been critical in navigating challenges and delivering consistent performance.

We remain deeply committed to driving the nation's growth journey through strategic financial solutions and prudent governance.

UNITS TO ATTRACT ZERO CBAM TAX IN EUROPE

Avaada, Haryana ink pact for ₹10,000-cr green industrial park

SAURAV ANAND
New Delhi, August 25

AVAADA GROUP ON Tuesday signed a memorandum of understanding with the Haryana government to facilitate the development of a 300-acre Zero-CBAM Green Industrial Campus in Hisar, with a proposed investment of approximately ₹10,000 crore and the potential to generate more than 5,000 employment opportunities.

The proposed campus will be powered by reliable, traceable and round-the-clock renewable energy and is designed to support industries seeking to decarbonise operations, strengthen energy security and prepare for evolving global carbon and sustainability requirements, including the European Union's Carbon Border Adjustment Mechanism (CBAM).

Under the MoU with the Haryana Enterprises Promotion Centre (HEPC), the state government will facilitate the development of the campus as a state-supported Green Industrial/Zero-CBAM Industrial Park. The support will include appropriate

industrial-park status, exploration of a customised package of incentives, common infrastructure, connectivity and utilities, and faster statutory approvals through the state's

"We are pleased to partner with the Government of Haryana in advancing a shared vision for sustainable and future-ready industrial growth in the State," Avaada Group Chairman Vineet Mittal said. "Envisaged with an investment of ₹10,000 crore, the campus will bring together reliable, traceable and round-the-clock renewable energy with industrial infrastructure designed to support low-carbon and CBAM-ready manufacturing."

The campus seeks to combine renewable energy, industrial infrastructure and green manufacturing within an integrated ecosystem.

Reliable and traceable renewable power is expected to enable participating industries to reduce the carbon intensity of operations and respond to growing demand for low-carbon products and supply chains in global markets.

"We believe this initiative can attract global investments and technology, create over 5,000 employment opportunities and catalyse a new generation of green industrial development in Haryana," Mittal said.

HC to re-hear Volkswagen tax case

THE BOMBAY HIGH Court will re-hear Volkswagen's challenge to a tax demand of ₹11,526 crore (\$1.4 billion) for allegedly undervaluing some auto imports, according to a court order seen by Reuters, prolonging one of the country's biggest tax disputes. The court decision on Tuesday comes more than a year after arguments in the case were concluded, but no

verdict was announced, creating an overhang for the car-maker at a time when it is in talks with a potential partner for its India operations.

The Supreme Court earlier this year set a limit on how far after arguments are concluded the judgment should be delivered. The bench in the Volkswagen case said on Tuesday the final verdict could not be deliv-

ered within the stipulated time, and a new bench will be constituted to hear it at a later date.

The tax authorities have alleged that the automaker mis-declared its auto component imports in the country over a 12-year period to pay lower taxes, resulting in dues of about ₹11,526 crore. The German group has defended its practice. —REUTERS

New mobile scheme may deepen Indian brands' tech capabilities

OJASVI GUPTA
New Delhi, August 25

THE RECENTLY NOTIFIED ₹62,500-crore Mobile Phone Manufacturing Scheme (MPMS) could encourage Indian brands to build greater technology and intellectual property capabilities, industry executives said.

Unlike the earlier production-linked incentive (PLI) scheme, which was largely focused on manufacturing scale and exports, MPMS makes design and R&D an explicit part of the incentive structure. "We expect the Indian-brand track to enable 2-3 companies to come up in this scheme," Pankaj Mohindroo, chairman, India Cellular and Electronics Association (ICEA), said, referring to the

SRTT set for fresh appeal this week to lift meeting ban

THE SUCCESSION ISSUE has acquired urgency after N Chandrasekaran informed the Tata Sons board that he would not seek reappointment as chairman when his current term ends on February 20, 2027.

Under Tata Sons' Articles of Association, its chairman is appointed through a five-member selection committee, three members of which are jointly nominated by the two key trusts — Sir Dorabji Tata Trust (SDTT) and SRTT. SRTT's inability to convene its board is, therefore, holding up the constitution of the panel and the time-bound process of identifying Chandrasekaran's successor.

In an earlier submission, Tata Trusts Chairman Noel Tata had stressed the need to conduct essential trust business, pointing out that grants worth nearly ₹ 400 crore were awaiting approval because the SRTT board could not meet.

The meeting ban stems from an objection filed by

advocate Katyayani Agrawal, who alleged that the composition of the SRTT board violated Section 30(A)(2) of the Maharashtra Public Trusts Act by exceeding the permissible number of lifetime trustees. Under the provision, lifetime trustees cannot account for more than 25% of a trust board's strength. Trustee Venu Srinivasan had made a similar representation.

When the representations were filed in April, SRTT had six trustees, including Noel Tata, Jimmy Tata, Jehangir HC Jehangir, Venu Srinivasan, and

Vijay Singh. Noel Tata, Jimmy Tata and Jehangir HC Jehangir hold trusteeship for life. Singh's exit from the SRTT board on August 14 has since resulted in lifetime trustees accounting for more than half its current strength.

In his May 15 communication, Maharashtra Charity Commissioner AS Kaloti said an investigation into the objections was underway and directed the SRTT board to refrain from meeting until the probe was completed.

Tata Trusts had then said the direction was passed ex parte and without notice to SRTT. It did not, however, challenge the order before the Charity Commissioner or a higher judicial authority at the time. Efforts to secure relief gathered pace only ahead of the August 18 Tata Sons AGM.

Even now, SRTT is believed to be reluctant to approach the Bombay High Court, given concerns that litigation could further delay a resolution, people familiar with the matter said.

YES BANK, RBL, FEDERAL SHELVE PLANS FOR DOLLAR DEBT

YES BANK HAS withdrawn a plan to raise US dollar debt after investors demanded higher yields, three merchant bankers said on Tuesday. Yes Bank had planned to raise around \$500 million through three-year dollar bonds, and had appointed bankers for the issue last week. "After the RBI advanced the closure of the dollar deposit window, there has been a sudden rush, prompting investors to seek yields 30-40 basis points higher than normal," one of the bankers said. Federal Bank and RBL Bank, have also shelved their planned dollar bond issuances, the bankers added. Both lenders were considering a benchmark \$500 million debt issue.

Sebi drops case against Max Financial, Max Life, Axis entities in ₹3,911-cr matter

PRESS TRUST OF INDIA
New Delhi, August 25

SEBI HAS DISPOSED of proceedings against Max Financial Services, Max Life, and Axis Group entities over an alleged ₹3,911-crore shareholder loss, with the regulator finding that disclosure lapses and a fraudulent scheme were not established.

The Securities and Exchange Board of India (Sebi), in a final order passed on Monday, dropped proceedings against seven individuals, including Max Group founder and Chairman Aniljit Singh.

The proceedings arose from a show cause notice (SCN) issued on October 24, 2024, following an investigation into transactions between Max and Axis entities during 2009-10 to 2021-22.

Sebi had examined three sets of arrangements entered into in 2010, 2015 and 2020.

The case centred on allegations that Max Financial failed to make adequate and timely disclosures about the transactions and that Max Financial, Max Life, and Axis entities devised a scheme that provided undue benefits to Axis Bank at the

Fresh issuances boom crimps inflows into secondary market

● Its share in total equity inflows falls 2.4 times in six months

KUSHAN SHAH
Mumbai, August 25

ARUSH OF initial public offerings (IPOs), qualified institutional placements (QIPs) and offers for sale (OFS) is increasingly competing with the secondary market for domestic investor money, with primary market inflows surging nearly nine-fold between March and August, even as buying in listed stocks has weakened sharply.

In contrast, domestic investor inflows into the secondary market fell from ₹1.42 lakh crore in March to ₹40,587 crore in July. Till August 24, such inflows stood at ₹36,863 crore.

The shift comes at a time when the benchmarks -- Sensex and Nifty 50 -- have risen 7.93% and 8.97%, respectively, so far in FY27. However, in July and August, the indices have risen 1.54% and 1.96%. The growing share of funds being absorbed by new equity supply has raised questions over whether the primary market boom is taking some of the buying support away from existing stocks, limiting the upside in indices and keeping valuations in check.

Market experts, however, largely view this as a near-term competition for liquidity,

rather than a structural threat.

Uttam Kumar Srimal, deputy head - fundamental research at Axis Direct, said the diversion of flows towards the primary market is a key near-term headwind for the secondary market, but does not undermine the broader bull case.

According to him, the relatively-muted market upside despite healthy earnings growth partly reflects the fragmentation of domestic flows between primary and secondary markets. Persistent selling by foreign investors has added to the pressure, leaving domestic secondary-market flows to absorb both foreign institutional investor (FII) selling and a rising supply of new shares.

Vaqrjaved Khan, senior analyst - fundamental at Angel

One, said the shift of money from listed stocks to fresh issuances has created competing claims on the same pool of equity capital.

He pointed to an important distinction within primary market fundraising. Money raised through fresh issuance flows to companies and can ultimately finance capital expenditure and growth. In an OFS, however, the proceeds go to existing shareholders selling their stakes and can effectively move out of the market, weakening the immediate bid for listed equities.

Not everyone sees the primary-market boom as the main reason for the secondary market's subdued performance.

VK Vijayakumar, chief investment strategist at Geo-

jit Investments, said booming primary issuances may be diverting some money from the secondary market, but the bigger drag has been concerns over elevated crude oil prices and the lack of clarity over a resolution to the West Asia crisis. Broader-market valuations also remain elevated, while many primary issues have been comparatively fairly priced, he said.

Rishabh Nahar, partner and fund manager at Qode Advisors, cautioned against linking weaker secondary-market activity directly to primary-market flows. He attributed the strong earnings growth in the first quarter partly to a favourable base and expects this benefit to continue through FY27. While the broader market has not rallied strongly, stock- and sector-

level rotation indicates that select pockets continue to perform, he said.

The surge in new paper, however, could have implications for valuations if equity supply continues to grow faster than the earnings available to support it.

Srimal said higher supply of shares could cap valuations unless aggregate earnings growth outpaces the influx of new stock.

Khan said the supply of paper is already capping valuations at the margin, but argued that this should not necessarily be viewed as a sign of weakness. If investor appetite thins, issuance windows could narrow, allowing the imbalance to correct itself. Subscription levels for individual issues, he added, may therefore provide a clearer picture of underlying investor appetite.

Over the longer term, experts expect the increase in primary market activity to broaden the market rather than drain it. Fresh capital can finance business expansion, deepen the investible universe and support wealth creation as corporate earnings materialise.

Srimal described the current phase as a temporary balancing act between rising equity supply and domestic liquidity. "Secondary market valuations will likely remain range-bound until FII outflows stabilise or earnings growth accelerates past fresh market supply."

Select IDF-NBFCs to face tighter exposure limits

FE BUREAU
Mumbai, August 25

THE RESERVE BANK of India on Tuesday revised its large exposure limits for infrastructure debt fund non-banking financial companies (IDF-NBFCs) that are subject to upper-layer regulations. This revision will come into effect immediately.

Through an amendment, the central bank has brought IDF-NBFCs under the same limit that are applied to infrastructure finance companies (NBFC-IFCs).

For a single counterparty, the large exposure limit for an NBFC-IFC is 25% and an additional 5% with board approval. For a group of connected counter parties, the exposure is capped at 45%, the guidelines said.

According to the upper layer guidelines, the IDF-NBFCs "will always remain in the middle layer." The RBI has explained that if an IDF-NBFC which is a group entity of a scheduled commercial bank, the regula-

Rupee rises to one-week high as crude softens

AGENCIES
Mumbai, August 25

THE RUPEE ROSE to an over one-week high on Tuesday, supported by a pullback in oil prices, after the currency spent much of the session in a narrow range as the Reserve Bank of India (RBI) intervention kept a firm lid on losses.

The rupee closed at 95.4125 per dollar, up 0.3% from its close at 95.7450 in the previous session.

While the currency hovered in a 95.70-95.75 band for most of the session, it strengthened later in the session after Brent crude prices slipped more than 3% to \$89.2 per barrel.

The dollar index, which gauges the greenback's strength against a basket of six currencies, was trading at 98.96, lower by 0.04%.

Earlier in the day, likely intervention by the Reserve Bank of India, similar to that seen in recent sessions, helped limit the pressure on the currency.

Dilip Parmar, senior research analyst, HDFC Securities, said the combination of heavy central bank intervention and tumbling crude oil prices breathed fresh life into the domestic unit. "A sharp retreat in global oil prices successfully revived broader market risk appetite, leaving the

greenback struggling to sustain its early momentum as the dollar index slipped beneath the 99 mark," Parmar said, adding that the spot USD-INR maintains immediate support near 95.25 alongside overhead resistance positioned at 95.75.

Besides keeping an eye on developments in West Asia, investors are awaiting remarks from Federal Reserve Chair Kevin Warsh on Friday for cues on the outlook for US interest rates. "We think the Fed is on an extended hold, but policymakers have been clear that progress on inflation is needed, so the risk of rate hikes remains," analysts at ANZ said in a note.

CAS avoids major hiccups on monthly expiry

BLOOMBERG
August 25

THE CLOSING AUCTION system (CAS) avoided major disruptions for derivatives traders on Tuesday, easing concerns that the mechanism was not prepared to handle one of the busiest trading days of the month.

About ₹1,400 crore worth of shares changed hands on the National Stock Exchange of India (NSE) during closing auction, above the roughly ₹1,200-crore daily average since the system was introduced on August 3. Monthly expiries involve a much broader swath of derivatives positions, raising the stakes for the auction.

"The CAS session on expiry day went off without any major hiccups, which is an encouraging sign," said Kruti Shah, a quantitative analyst at Equirus Securities.

Some of the concerns that

have dogged the system since its launch continue to linger. Some stocks saw sharp moves during the auction, while volumes remained thin relative to the derivatives exposure tied to closing prices.

The focus now shifts to what could be an even bigger test: MSCI Inc.'s month-end index rebalance on August 31. Changes from the index provider's August review will be implemented at that day's

close, when passive and exchange-traded funds that track MSCI benchmarks will need to adjust their portfolios to match the new composition and weights.

Those managers typically carry out the rebalance trades as close as possible to the price used by their benchmark, potentially funneling large buy and sell orders into the closing window. Estimates ahead of the review pointed to

billions of dollars of potential flows into Indian equities.

Unlike Tuesday's expiry, the MSCI rebalance will test whether the auction can absorb a concentrated burst of institutional orders without producing an unexpected swing in the closing price.

Intended to align India with major global markets, the auction system has had a troubled start. Many proprietary trading firms and high-frequency traders have stayed away, contributing to thinner volumes during the auction. Arbitrageurs have also lost some of their most profitable opportunities because the late-session window for trading stocks and derivatives at the same time has narrowed.

The mechanism has also drawn regulatory scrutiny. The Securities and Exchange Board of India last week barred two firms, including a unit of JPMorgan Chase & Co., from the market for allegedly

manipulating prices during the auction.

Equity benchmarks close higher on last-hour buying

Benchmark stock indices Sensex and Nifty pared intraday losses to close higher on Tuesday, driven by buying in the final hour amid a sharp drop in crude oil prices, reports PTI.

After moving in a range with a negative bias for most of the day, the 30-share BSE Sensex settled higher by 286.98 points, or 0.37 per cent, at 77,656.09.

As many as 24 of its constituents ended in gains, and six in losses. During the day, it hit a high of 77,666.39 and a low of 77,125.91. The 50-share NSE Nifty also remained volatile before ending higher by 115.50 points, or 0.48 per cent, at 24,334.55 on fag-end buying.

Giving legacy new wheels

BAJAJ PULSAR IS TRYING TO RECLAIM INDIA’S BIKING CULTURE TO ENSURE CONTINUED DOMINANCE IN THE PERFORMANCE MOTORCYCLE SEGMENT

CHRISTINA MONIZ

BAJAJ AUTO RECENTLY marked 25 years of its Pulsar motorcycle brand by refreshing two of its iconic bikes, the Pulsar 150 and Pulsar 125. Launched in 2001, the brand has often been credited with creating India’s performance biking culture, transforming the category from everyday commute to flamboyance, style and technology. While its newly launched models continue to embody the original Pulsar brand DNA of performance and attitude, they also offer a new engine, gearbox, LED lighting and Google Maps navigation.

In 2025, Bajaj Auto hit the 20 million Pulsar sales milestone across 50 countries. However, as per Bajaj Auto’s annual report, its motorcycle-only share fell to 15.6% in FY26 from 18.2% two fiscals ago. Experts ascribe this to heavy competitive pressures and lack of timely updates to some legacy models. Pulsar today faces stiff competition from the likes of TVS Motor’s Raider 125 and Hero MotoCorp’s Xtreme 125R, which flaunt sporty styling and digital features.

Pulsar, which once defined youth and style, now has to prove it belongs to today’s youth and to Gen Z in particular. Shekhar Suman, co-founder of Brandshark, believes the answer lies in moving from communicating to young riders to creating with them. It can do that through communities based on customisation, riding experiences, gaming and more. Suman believes the brand’s #MyPulsarStory is a step in that direction, allowing Pulsar owners to become storytellers.

Sumet Narang, president, marketing at Bajaj Auto, says the brand is iconic. “The Pulsar paved the way for performance bikes in India to be exported across the world and meet global standards.” What has worked well for it is the consistency in design and performance, representing the thrill and adrenaline rush that come with performance

GEARING UP FOR CHANGE

■ Pulsar is credited with creating India's performance biking culture in 2001

■ It changed its advertising tagline from 'definitely male' to 'definitely daring' in 2024

■ In 2025, Bajaj recorded 20 million Pulsar sales across 50 countries

■ The brand faces stiff competition from TVS Motor's Raider 125 & Hero MotoCorp's Xtreme 125R, which ride on digital features

biking, he adds.

Experts agree the brand has built a strong following across its models from consumers aged between 18 and 45 years.

But competing brands like TVS are now changing the category’s language in the way that Pulsar did 25 years ago, with a greater focus on technology and biking culture.

According to Naresh Gupta, co-founder and CSO, Bang In The Middle, “Pulsar’s macho imagery and messaging still sell, but they need some reinvention with a greater focus on technology, borrowing from the success of EV two-wheeler brands in the market. Today, there is a great opportunity in the form of consumers seeking weekend biking adventures or engagement with fellow biking enthusiasts. This is an area Pulsar can tap.”

A lot of Pulsar’s core consumer base, who were in their 20s at the time of the brand’s launch, are now in their 40s with evolving aspira-

tions, says Ajimon Francis, MD India, Brand Finance. “These consumers are seeking bikes that offer more than just power and styling. They are looking for bikes that support leisurely rides or family requirements, and Pulsar has not innovated on its models enough to meet these needs,” he says. Moreover, brands like Royal Enfield, Yamaha and Harley Davidson have offered these consumers a range of higher end biking models.

Widening the net

Despite its falling market share, Pulsar continues to be a major growth driver for Bajaj Auto. It generated over ₹11,000 crore in domestic revenue in FY26, nearly 19% of Bajaj Auto’s ₹58,732-crore standalone revenue. In its advertising too, Pulsar has tweaked its messaging and tagline. In 2024, Pulsar’s tagline of “definitely male” evolved into a more inclusive “definitely daring” tagline.

“As a leadership brand, we need to be aware of changing times and sensibilities,” Narang points out.

The brand’s marketing mix has also broadened to include influencer marketing and creator partnerships. “It is getting increasingly difficult to reach consumers at a time when they are receptive to brand messaging, and therefore, our media mix includes not just conventional advertising but also social media and influencer collaborations, where we are actively strengthening our engagement with biking communities,” he says.

“Pulsar’s most powerful legacy is not that it has survived 25 years, but that it repeatedly gave young Indians a motorcycle their parents’ generation did not have. If it can do that again, through new technology, new communities and eventually electric performance, its past will become a platform for reinvention rather than nostalgia,” sums up Suman.

Catching them young

MOST BRANDS DISCOVER creators the same way they discover songs. They wait for them to hit number one before adding them to the playlist. By that point, the creator is overpriced, over-campaigned, and their audience has already started skipping branded posts. The best time to work with an emerging creator was six months ago.

The good news is that early signals exist.

Follower count tells you who won yesterday, not who is going to win tomorrow. I have seen brands rejecting creators with 40,000 followers in favour of someone with 800,000. Nobody stopped to ask what those 800,000 followers actually look like.

Here is a real example of what that mistake looks like in practice. Look at two creators sitting at roughly the same follower count, just under 100,000. Harivikash Bakthavatchalam has 99,900 followers and a 0.5% engagement rate. Vandana, a beauty and style creator has 99,670 followers and a 0.2% engagement rate. Now look at someone like Harshita Sagar who has around 99,830 followers, but with a 1.3% engagement rate. Or Vicky with 99,450 followers and a 94.3% engagement rate. Four creators. Same follower count. Engagement ranging from 0.17% to 94.26%. And brands are still sorting by followers.

The brands consistently winning at influencer marketing have figured out that the right question is not who is big today. It is who is growing, and why. A creator who went from 8,000 to 40,000 followers in three months while keeping a real, active audience is a far better bet than someone sitting at 500,000 followers with no growth and declining engagement.

KALYAN KUMAR

What you want to watch is sustained follower growth over 60 to 90 days, views per post going up consistently, engagement holding steady, and whether the creator is showing up more and more in conversation within a specific category. Most brands go looking for one great creator. A smarter move is to identify entire groups of creators that are gaining traction together. Think regional and vernacular creators. Healthcare professionals. Finance educators. Parenting creators. Fitness and wellness. Sustainability. AI and technology educators.

These groups consistently outperform general lifestyle creators on the things that actually matter. Why? Because their audiences follow them for a reason. They come back not because the content is fun but because it is useful. That kind of trust converts into business results in a way that entertainment-driven audiences simply do not.

Take fitness and yoga. We found 6,599 nano and micro creators who have doubled their follower growth in just six months without losing audience quality. Not one of them is on most brands’ radar right now. All of them will be in about a year. At three times the cost.

The numbers that actually predict future performance are simple. Consistent audience growth, percentage of real and active followers, quality of audience, level of engagement with the content and reaching out to new customers.

The brands that consistently win are those who build relationships with creators when they still pick up calls. When the brief is still a conversation. When the fee is still reasonable.

Tech upgrade finds a new route

RAYLO, THE SUBSCRIPTION service platform for consumer electronic gadgets such as phones, laptops and tablets among others, has turned the worst mentality one can have when dating into the best philosophy toward technology.

The London-based brand has released a TV ad showing a couple, Sarah and Harry, going through a breakup in a café. Harry is taken aback as Sarah lists his shortcomings: how outdated he is, his terrible memory, and worst of all, that he doesn’t last as long as he used to.

With its TV ad campaign “Something better always comes along” the brand cleverly compares a break up scenario to how fast personal technology gets outdated. The

● Why is RBI changing the loan pricing norms?

THE DRAFT GUIDELINES seek to harmonise loan pricing regulations across all regulated entities into a single, unified set of directions. The guidelines will require lenders to set up a transparent structure that includes benchmark selection, interest computation, spreads and customer disclosures. Borrowers often find it difficult to evaluate a loan product because of different benchmark rates, varying spreads and inconsistent disclosures. A standardised framework, which is proposed to take effect from April 1, will bring in greater transparency in loan pricing, easier comparison across lenders and improve confidence of borrowers. To improve transmission for floating rate loans, the benchmark reset frequency is now three months. While commercial banks will have to price all floating-rate personal and MSME loans to an external benchmark such as a repo rate, it will not be mandatory for non-banking financial companies (NBFC) or housing finance companies (HFC). All existing loans and advances linked to any internal or external benchmark will migrate to the new framework by April 2029 without any hike in borrower interest rates.

● How will interest rates on loans be determined?

BOTH FIXED AND floating rate loans will have to be linked to an internal or external benchmark plus a spread. Interest will be charged on monthly rests, except for agriculture loans, and calculated on a daily reducing balance. This will standardise the methodology of interest rate computation across all lenders and eliminate the

LOAN PRICING

What the reset in interest rate norms means for borrowers

The Reserve Bank of India has proposed a common framework for determining interest rates to ensure consistency in the way lenders determine loan rates and spreads. It has also revised the norms for interest rates on bank deposits. *Saikat Neogi* explains how the changes will help borrowers as well as depositors

variation arising from different day-count computations. In case of floating-rate loans, lenders will have to reset at least once within three months, which will enable faster transmission of both rate cuts and rate hikes.

The draft guidelines have removed the ambiguity for hybrid-rate products by

clarifying that fixed-rate provisions will apply during the fixed period and the floating-rate provisions during the floating period. For small value microfinance loans and personal loans up to ₹50,000, the lender will explicitly cap the annual percentage rate inclusive of interest rate and other charges.

● Will comparing loans be easier?

YES, BORROWERS WOULD have clearer information on the benchmark, spread and reset terms that determine a floating-rate loan’s interest rate. This could provide a more consistent basis for comparing loan offers, although the actual rates offered would continue to differ across lenders. Loans cannot be priced below the benchmark rates, a floor-pricing rule that will apply uniformly. So, this will prevent NBFCs and HFCs from offering below-benchmark teaser rate or loans at a discount to the prime lending rate that undercuts the very benchmark meant to reflect the cost of funds. Adhil Shetty, chief executive officer, BankBazaar.com says the proposed framework does not prescribe identical rates or spreads across lenders, so it would not make loan pricing uniform. “It does, however, require greater consistency in how lenders determine and disclose loan rates and spreads,” he says.

● Can a lender still alter the spread?

NO, IT CANNOT alter the spread, which is the margin on the repo rate to calculate the final lending rate. The lenders will have to explicitly mention the spread components, including the credit risk premium, operating cost, term premium and business strategy premium. The credit risk premium, which cannot be zero, may only be revised if there is a change in the borrower’s credit profile. The other spread components cannot be increased for floating-rate loans before three years from the first disbursement or the last revision. This effectively curtails banks’ ability to increase spreads on existing floating-rate borrowers, a practice often seen when the benchmark falls. However, banks may front-load risk pricing at origination and borrowers will have to pay for that certainty. Lenders will have the flexibility to reduce the spread to retain the existing borrower only on a non-discriminatory basis.

● How will RBI’s deposit framework impact savers?

IN A SEPARATE circular, the central bank has revised the deposit-rate framework which will make the pricing process more consistent and transparent for retail savers. Effective from October 1, fixed deposits rates will be standardised across all branches and customers. While retail deposit rates will continue to be disclosed in advance, bulk deposits rates —single rupee term deposits of ₹3 crore and above — will have to be disclosed on the bank’s website by 10 am every business day, with a grace period up to

10.10 am. Companies can refer to the bank’s publicly disclosed bulk deposit rates instead of depending on the branch personnel. Banks will have greater flexibility to price bulk deposits based on liquidity standards. For existing depositors, the framework doesn’t mean that banks will suddenly change their contracted interest rate from October 1. Moreover, banks will continue to price deposits based on their own cost of funds, liquidity requirements, and prevailing repo rate cycles.

WALL STREET REBOUNDS ON TECH REVIVAL

WALL STREET'S MAIN indexes rose on Tuesday, as technology stocks recovered from a selloff ahead of AI heavyweight Nvidia's results and an inflation report key to shaping interest rate expectations. CANADA STRUCK BACK at the United States on Tuesday with retaliatory tariffs on about \$20 billion worth of American goods, including steel, dairy products, appliances and farm equipment, as the trade war between the once-friendly neighbours escalated sharply. The tension threatened one of the world's biggest trading ties with tariffs hitting everyday purchases such as seafood, cheese, clothing, cosmetics and toilet paper, with some facing duties as high as 50%. Canada's retaliation came after the Trump administration imposed 50% tariffs over the weekend on Canadian goods following the collapse of trade negotiations. Canadian PM Mark Carney accused Washington of trying to subordinate Canada and said US demands during the failed talks showed that Americans wanted to "destroy our major industries". US President Donald Trump intensified the confrontation, telling Canadian leaders to "fall in line" or face consequences "far worse" than existing tariffs and threatening new 50% tariffs on Canadian vehicles, auto parts and steel.

Nvidia shares set for \$280-bn price swing after earnings, options show

Nvidia's options imply a 5.4% move post-earnings
Investors looking for signals on AI demand, margins and guidance
Rising yields have been pressuring growth and technology stocks

value of about 90% of S&P 500 constituents. The expected move also remains well below Nvidia's historical average price swing of 7.4% over the last 12 quarters, according to analytics firm Option Research & Technology Services (ORATS). "That shows some compla-

cency for Nvidia, and it means it's getting more predictable," said Matt Amberson, founder of ORATS. The relatively modest moves reflect a pattern over the past two years in which actual post-earnings stock swings have frequently fallen short of what options markets had priced in, said Chris Mur-

"I think the beginning of the AI era when Nvidia was surprising everybody with the huge earnings beats and 10, 15, 20% moves, that's kind of over," said Murphy. "There's just not a huge view that they're going to catch everybody off-guard with some giant beat and the stock's going to really rally." Nvidia shares on Monday posted a decline for the seventh consecutive trading day, but they have risen 11.7% this year. Mystery deepens as US military plane lands in Moscow

Moscow, August 25

A US MILITARY transport plane landed at Moscow's Vnukovo airport on Tuesday, data from the flight tracking service Flightradar24 showed. The large Boeing Globemaster with the U.S. registered tail number 07-7181 had flown direct from Riga, in Latvia, and landed in Moscow at around 0700 GMT. Reuters was unable to verify whether it carried any cargo or passengers. The Kremlin said it had no information on the plane. The aircraft had arrived in Riga on August 23 from the US Camp Springs airbase near Washington DC, data from Flightradar24 showed. The last direct flight of a US registered jet to Russia from Europe took place in January this year, carrying special envoys Steven Witkoff and Jared Kushner for peace talks with Vladimir Putin on Ukraine. The Kremlin had said that there was no information yet on another visit to Moscow by Kushner and Witkoff, as talks between the US and Russia on Ukraine have stalled amid the war in Iran.

H-1B fee plan threatens IT playbook

FOR INDIAN IT companies, the distinction is significant as the additional cost would primarily arise when bringing new workers into the H-1B system, rather than for maintaining their existing US workforce. The proposal could also alter the economics of hiring overseas talent for US technology companies and startups. Large technology firms may have the financial capacity to absorb the additional cost for specialised or senior talent, but could still become more selective about new sponsorships. Startups, particularly those operating in AI and other specialised areas where talent is scarce, could face a sharper constraint. "Consider the practical impact: A promiss-

ing AI startup identifies a world-class machine learning expert who is currently completing a PhD abroad. Previously, the cost to sponsor this individual was around \$4,000. Now it's more than \$107,000," Rajiv Khanna, a US-based immigration attorney, said in legal commentary. For Indian IT services companies, the likely response could be to reserve H-1B applications for consultants, senior architects and other roles where physical presence in the US is essential, while delivering more work remotely from India. The shift could accelerate an existing trend towards distributed teams and India-based centres of excellence in cloud, data and AI. "This could accelerate a broader shift towards building and scaling delivery capabilities here. Companies will continue to move critical talent to the US where physical presence is essential, but the overall model could become more hybrid and balanced," Gajwani said. The proposed fee could therefore have a mixed impact on India, potentially reducing the movement of Indian technology workers to the US while increasing the amount of high-value work retained in the country. According to a Nasscom statement on Tuesday, H-1B workers in the technology sec-

tor have already reduced significantly over the past five years as companies expanded local hiring in the US. The industry body said companies have also invested more than \$1.1 billion in strengthening the STEM pipeline in the US, working with more than 130 universities and colleges and impacting 2.9 million students while upskilling more than 255,000 employees. "The H-1B visa programme has long served an important purpose in addressing short-term skill gaps in the US," Nasscom said, adding that any increase in visa fees should be viewed in the context of the programme's original purpose of providing access to temporary skills where shortages exist.

Federal-Jana SFB merger buzz grows

THE REPORTED TRANSACTION comes as Jana Holdings faces pressure to repay a ₹700-crore loan from TPG Asia, which holds an 8.11% stake in Jana SFB. According to the media report, the loan was rolled over for six months on June 30 after Jana Holdings agreed to sell its stake in the bank. A merger, if it happens, would substantially enlarge Federal Bank's balance sheet and geographical footprint. Based on FY26 numbers, the combined entity would have total assets of around ₹4.35 lakh crore, potentially overtaking IDFC FIRST Bank to become the eighth-largest private sector bank by assets. Jana SFB, valued at around ₹6,028 crore, would also give Federal Bank a foothold in markets where its presence is thin. The small finance bank operates 826 outlets across the country and serves around 4.7 million active customers, with a presence in states such as Odisha, Madhya Pradesh, Bihar, Rajasthan and Uttar Pradesh, where Federal Bank's branch network is relatively small. The deal would add to Federal Bank's portfolio of subsidiaries and associates. It currently holds 60.7% in Fedbank Financial Services, 100% in Federal Operations & Services and 30% in Ageas Federal Life Insurance Company.

For Jana SFB, the merger would also offer a route into universal banking. The Bengaluru-headquartered lender applied for a universal bank licence in June last year, but the Reserve Bank of India rejected the application as it did not meet the eligibility criteria. Jana SFB subsequently said it planned to reapply. The two banks bring different lending profiles to a potential combination. Federal Bank's net advances grew 15% year-on-year to ₹2.77 lakh crore as of June 30, while Jana SFB's advances rose 26% to ₹37,612 crore. Jana SFB's loan book is diversified across affordable housing, micro loans against property, MSME loans and gold loans, among other segments. Its unsecured portfolio stood at ₹10,240 crore as of June 30, with 80% covered under a guarantee programme. Asset quality, however, is weaker at Jana SFB. Its gross non-performing asset (GNPA) ratio stood at 2.24%, against Federal Bank's 1.52%, and the GNPA ratio on its unsecured book was significantly higher at 6.7%.

Imran Khan's son says Pakistan sliding towards dictatorship

PAKISTAN'S JAILED FORMER Prime Minister Imran Khan's son, Sulaiman Isa Khan, lambasted the military-led establishment for pushing the country deeper into dictatorship, stating the Tehreek-e-Insaf founder's prolonged incarceration as a case in point. "Yes, undoubtedly," asserted Sulaiman on Tuesday, the elder son of Imran Khan, who has alleged inhumane treatment being meted out to the former PM over the past several years. Imran Khan has been incarcerated at Rawalpindi's Adiala Jail since 2023. Imran Khan's family and international legal team have repeatedly raised concerns over his detention, treatment in custody and access to medical care. When asked about whether the current Pakistani regime was sliding towards dictatorship over the treatment towards Imran Khan, Sulaiman highlighted the visible escalation of military influence in the country's governance, adding that there was little doubt that the country's establishment was involved in "torture and the arbitrary detention" of their father's general conditions. "I would say, with some of the actions we've seen, I think yes, undoubtedly. You can see the influence of the military in a lot of the torture and the arbitrary detention of our father's general conditions. I don't think there's any doubt that the whole

establishment is involved," Sulaiman told ANI during a virtual press conference. The press conference was organised to discuss Khan's illegal detention and ongoing health challenges. Sulaiman, alongside his brother Kasim Khan, International Counsel Jared Genser, and Advisor on International Affairs and International Media Sayed Bukhari, spoke out about the high-profile detention and the broader human rights situation in Pakistan. Echoing the family's deep concerns, Genser sharply criticised the state of democracy in Pakistan, placing the responsibility on military leadership. He accused Pakistan's Army Chief Asim Munir of leading an "authoritarian regime", arguing that the case of ex-PM Khan reflected a wider erosion of democratic institutions.

BRAZIL'S GOVERNMENT FINED TikTok owner ByteDance Co Ltd. 153.7 million reais (\$29.8 million) over its handling of children's and teenagers' personal data, reflecting scrutiny of how online platforms protect minors. The government's National Data Protection Authority, known as ANPD, said TikTok processed minors' personal information without an adequate legal basis and failed to put effective safeguards in place to prevent improper data collection. The decision, which was published in Brazil's Official Gazette on Tuesday, requires ByteDance to delete data collected improperly. The company can appeal within 10 business days. TikTok's press office in Brazil didn't immediately respond to a request for comment. President Luiz Inácio Lula da Silva has pushed for stronger online protection for children and teenagers as he seeks a fourth term in October's election. In March, Brazil implemented a law requiring companies and digital platforms to restrict minors' access to illegal or potentially harmful content. Earlier this month, ANPD ordered chat app Discord Inc. to halt livestreaming in the South American country after the death of a teenager. The violations occurred when people used TikTok through registered accounts and also when they accessed a feed without creating an account, according to the Brazilian regulator. ANPD said the company's technical and organizational measures weren't enough to comply with the nation's data protection law. TikTok will face additional restrictions in Brazil for people who use the platform without registering.

WILL BE VISITING INDIA AFTER 7 YEARS AMID EFFORTS TO RESTORE TIES

BRICS summit: Xi likely to visit India next month

● Beijing's advance team in New Delhi to prepare the ground for visit

SHUBHAJIT ROY
New Delhi, August 25

CHINESE PRESIDENT Xi Jinping is likely to attend the summit of BRICS leaders in New Delhi on September 12 and 13, it has learnt. He last visited India in October 2019, months before PLA incursions along the Line of Actual Control in eastern Ladakh triggered a military standoff between the two countries.

It is learnt that the Chinese side has conveyed to New Delhi that Xi is likely to come for the leaders' summit. An advance team from China has arrived for the security and protocol arrangements to prepare for the President's possible visit.

It is expected that Xi will come with a large delegation of officials, businessmen and state-backed media representatives.

Xi's attendance at the BRICS summit, the most anticipated visit, will add to efforts by New Delhi and Beijing to restore ties that plummeted after the start of the border standoff in 2020.

He last visited India in October 2019 when he travelled to Mamallapuram near Chennai for the second informal bilateral summit of leaders.

In October 2024, Xi and Prime Minister Narendra Modi met on the sidelines of the BRICS summit in the Russian city of Kazan to start the process of restoration of ties. The disengagement of troops in eastern Ladakh was completed next month.

More than 50,000 troops are still deployed on either side of the LAC in the region and the process of de-escalation and de-induction of troops has not yet taken place.

But in the two years since, the two sides have made significant progress in stabilising rela-

Prime Minister Narendra Modi with Chinese President Xi Jinping during the BRICS summit in Russia in 2024

tions with direct flights, resumption of visas, easing of curbs on Chinese firms and the revival of the pilgrimage to Kailash Mansarovar.

Sources said the September summit will mark two years of the rapprochement between the two sides, and India is keen to host all BRICS leaders. Barring any unforeseen development, participation at the highest level has been conveyed to New Delhi.

The venue has not yet been announced, but the Bharat Mandapam in New Delhi is likely to be the preferred choice, sources said. The Prime Minister's Office has conveyed to the participating countries of BRICS that there will be no bilateral visits along with the summit, but there will be bilateral meetings with the visiting leaders.

Xi comes at a time when some challenges have emerged on the bilateral front – on the issue of visas for Indian business

persons travelling to China, and reports of tension along the LAC in Arunachal Pradesh.

Last Saturday, speaking on the situation with China, External Affairs Minister S Jaishankar said, "I think we went through a particularly bad patch between the summer of 2020 and the autumn of 2024, and that was primarily an out-

Xi last visited India in October 2019 when he travelled to Mamallapuram near Chennai for the second informal bilateral summit of leaders

come of the situation in the border areas... At the end of the day, peace and tranquility in the border areas is a prerequisite for good relations, and the state of the border, to a very large measure, naturally would determine the state of the relations."

"Having said that, I think naturally, if assuming things are stable and the needle is more cooperative, obviously, I mean we are both very big economies. In many ways, we are markets to each other. We are part of the supply chain. They industrialised much faster and much

bigger and much earlier, largely because of many of the policies we advocate," he said.

"The world is competitive. We must build up our strengths. We have to do business with the entire world. That includes China too, but it is important we deal with them confidently. We stand our ground, as we have stood on the border. We develop our strengths, which unfortunately from the 1960s, for half a century, we did not do. We have to make up for the shortcomings and the mistakes of the past, and that is really what we are hoping to do. So I think a stronger, more self-reliant India, a more industrialised India, a more manufacturing India will be able to actually compete with China as it will with other major countries of the world," Jaishankar said.

He said the government had taken up with China the problem of business visas being faced by Indian applicants. Sources said that the meeting of BRICS Foreign Ministers in New Delhi in May had discussed the agenda for the leaders' summit, and there was agreement on a range of issues for discussion.

Govt approves transfer of DRDO missile technologies to pvt sector

PRESS TRUST OF INDIA
New Delhi, August 25

DEFENCE MINISTER RAJNATH Singh has approved the transfer of DRDO-developed technologies of all conventional missile systems to the Indian private industry for production within the country as part of a larger goal to enhance domestic defence manufacturing.

Under the initiative, the Defence Research and Development Organisation (DRDO) will transfer missile technologies to eligible defence firms.

Singh's office said he has "approved the transfer of DRDO-developed technologies of all conventional missile systems to Indian industries for production within the country".

"This Transfer of Technology (ToT) marks an important milestone in promoting greater participation of the Indian industries in the defence ecosystem by enabling them to undertake indigenous production, as per

applicable qualifications, certifications and regulatory requirements," it said.

The defence ministry is yet to provide any list of missiles that could be produced by the private sector under the new initiative.

It is understood that the private sector may be allowed to produce conventional weapons such as Akash air defence missiles, Astra air-to-air missiles and the Nag anti-tank guided

missile. The conventional missiles are those which rely on explosives or kinetic impact to destroy targets. The non-conventional missiles are armed with nuclear, biological, or chemical warheads.

The defence ministry said the "provision will enable successful transition of missile system development to industrial production".

"The objective is to enhance

domestic manufacturing capabilities, strengthen the defence industrial base and create opportunities for the participation of Indian MSMEs and other technology partners in the supply chain," the ministry said.

It added that the initiative aims to enhance operational capability, reduce import dependence and increase domestic value addition, while supporting the growth of India's defence manufacturing sector.

"DRDO remains committed to working closely with Indian industry to facilitate the transfer and absorption of advanced defence technologies and to further strengthen the country's indigenous defence capabilities," the ministry said in a statement.

The volume of India's domestic defence production was recorded at ₹1.78 lakh crore in FY26 as against ₹46,000 crore in 2014, according to latest government data.

The defence exports have reached ₹38,424 crore in FY26.

Govt notifies 'Keralam' as new name for Kerala effective today

THE UNION HOME Ministry has notified 'Keralam' as the new name for the southern state effective Tuesday.

In a gazette notification issued on Tuesday, the home ministry said, "In exercise of the powers conferred by sub-section (2) of Section 1 of the Kerala (Alteration of Name) Act, 2026, the Central government hereby appoints the 25th day of August, 2026, as the date on which the provisions of the said Act shall come into force." Earlier this

month, President Droupadi Murmu gave assent to a Bill to rename Kerala as Keralam, turning the legislation into a law.

The Lok Sabha passed the Kerala (Alteration of Name) Bill on August 11, followed by the Rajya Sabha the next day.

In the Rajya Sabha, Minister of State for Home Affairs Nityanand Rai said the Kerala Assembly passed a resolution in 2024, urging the Centre to bring a law to change the name of the state to Keralam.

"The Bill provides that the state of Kerala will be known as the state of Keralam, and hence there is a proposal to rename Kerala to Keralam," he said.

The Kerala government had forwarded a resolution passed by the state Assembly regarding the name change to the Centre in June 2024. President Murmu referred the Bill to the state legislature for its views, following which the Assembly adopted a unanimous resolution agreeing with the Bill. **PTI**

STUDY FINDS ACTIVE JOB SEARCH BY EIGHT OUT OF 10 YOUNG PROFESSIONALS

Gen Z most inclined to switch jobs

MANU KAUSHIK
New Delhi, August 25

GEN Z PROFESSIONALS have the highest active job search intent and the lowest inclination to stay in their jobs, according to a study by Great Place to Work India. The study states that eight out of 10 Gen Z employees in the professional services sector have an inclination to leave even as their share in the workforce has doubled to 34% in 2026 from 17% in 2023.

The young employees also have the lowest tolerance among all cohorts for ambiguity over pay, recognition and promotion criteria. To overcome this issue, the employers are required to clear career paths and explain what employees need to do to progress, the report said.

The study covered over 130 companies and over 110,000 employees across consulting, GCCs, BPOs, accounting and auditing, travel management, legal services and architecture and design among others.

"With 34% of the workforce

MAJOR PART OF WORKFORCE

■ Gen Z professionals' share in the workforce has risen to 34% in 2026 from 17% in 2023

■ They also have the lowest tolerance for ambiguity over pay, recognition

■ The growing share of Gen Z employees also means that their exits can have a big impact on professional services firms

■ Discretionary effort, which is staff's willingness to go beyond what is required, fell to 79% in 2026 from 82% in 2025

now Gen Z, professional services leaders must redefine engagement and retention for their talent, aligning with the personalised expectations of the diverse workforce," said Akshat Shah, managing director, Great Place to Work India.

The study says the issue is not necessarily that Gen Z wants something fundamentally different from other generations but they are more likely to act quickly when their expectations are not met. Their lower toler-

ance for unresolved fairness issues and limited patience for workplace conditions to improve are contributing to their higher job search intent.

The growing share of Gen Z also means that their exits can have a big impact on professional services firms, the study said. Their departure can result in high recruitment costs, loss of institutional knowledge and continuity in client relationships.

The study's broader find-

ings showed that employee commitment is weakening even as workplace sentiment improves. Discretionary effort, which is employees' willingness to go beyond what is required, fell to 79% in 2026 from 82% in 2025.

Overall, about 50% of employees in the professional services sector are actively looking for a job, while three in four employees who leave are expected to do so within 12 months, the report said. It also

found that employees are more likely to stay when leaders demonstrate behaviours such as thanking, developing and recognising them.

Further, the report flagged pressure on managers as well. Managers and frontline supervisors showed a much higher intent to switch jobs with 86% saying they were actively looking for a new job compared with 53% of employees who do not manage teams.

AI is another concern for employees in the professional-services sector. Nearly six out of 10 companies are using AI meaningfully in their day-to-day operations, but only two out of 10 employees strongly agree that they have been sufficiently briefed on the risks and benefits of these tools, the report said.

Balbir Singh, CEO of Great Place to Work India said that as AI reshapes the way professional expertise is delivered, success will depend not only on adopting new tech, but on leading people through the transition with trust, clarity and the right capabilities.

Women participation in gig work largely missing

ANUP ROY
August 25

INDIA'S GIG ECONOMY, which includes 10-minute food delivery and ride-hailing apps, is creating millions of jobs. Yet, women are largely missing from it, according to a new study.

Indian women have achieved near parity with men in access to basic bank accounts, but that progress isn't carrying over to the digital economy, with women workers underrepresented in jobs at companies such as Uber Technologies, Swiggy and Urban Company, according to report by the International Labour Organization and the National Council of Applied Economic Research. Gaps in digital skills, mobility and safety concerns, and social norms are holding them back, the report released Monday found.

The stakes are significant for an economy that has struggled for decades to bring more women into the workforce. India's female labour-force participation rate was about 32% in 2025 on an internationally comparable measure, versus almost 78% for men, according to ILO estimates compiled by the World Bank.

DIGITAL OPPORTUNITY

■ Women are under-represented in jobs at companies such as Uber Technologies, Swiggy & Urban Company

■ India's female labour-force participation rate was about 32% in 2025 versus almost 78% for men

■ The number of gig workers in India will likely hit 23.5 mn in 2029-30, contributing ₹2.35 lakh cr to India's economic output

The World Bank estimates that raising women's participation to 50% could add about one percentage point to India's annual economic growth — potentially bringing it closer to achieving its ambition of becoming a developed economy by 2047.

The number of gig workers in India is predicted to nearly double to 23.5 million by 2029-30, contributing ₹2.35 lakh crore (\$24.5 billion) to the country's annual economic output, a government estimate shows.

"Evidence suggests that women remain under-represented and unevenly distributed" across the app-based

ecosystem, the researchers said in Monday's report. Improving that 'is a broader social and economic imperative that serves as a catalyst for women's long-term empowerment and India's inclusive growth'.

The skill gap in using technology is also reflected in a 2025 government study that found only 56.2% of Indian women age 15 and above own a mobile phone, while just 37% can perform online banking transactions. These shortfalls can make it harder for them to access gig work and other digital earning opportunities.

Over 75% HR heads see more new jobs in H2

FE BUREAU
New Delhi, August 25

INDIA'S WHITE-COLLAR JOB market is set for steady expansion in the second half of 2026, with a large majority of human resources (HR) leaders expecting companies to create new positions even as businesses navigate rapid advances in artificial intelligence (AI).

According to Naukri's H2 2026 Hiring Outlook, based on responses from more than 540 senior HR leaders and hiring decision-makers, 97% expect hiring—including both new and replacement positions—to continue during July-December, while 79% foresee the creation of entirely new jobs.

Real estate is the most optimistic sector, with 86% of its HR leaders expecting fresh job creation, followed by FMCG at 85% and IT and technology at 83%, up from 79% in the first half of the year. Manufacturing and healthcare are at 79%, while 72% of BFSI HR leaders expect new roles to emerge.

Business development is likely to see broad-based demand, while BFSI is expected to seek core finance talent. FMCG and manufacturing will focus more on operations, with IT continuing to prioritise technology-driven roles.

Hiring demand is also expected to remain strong among early- and mid-career professionals. About 62% of HR

leaders expect maximum hiring in the 0-3 years' experience bracket, while 57% see stronger demand for candidates with 4-7 years of experience.

AI, meanwhile, is emerging more as a job creator than a threat. About 86% of HR leaders do not expect significant job losses due to AI. More than a fifth of HR leaders in IT and BFSI expect AI to create new roles over the next six months, particularly in IT, marketing and analytics.

Skill alignment, however, remains the biggest hiring challenge, cited by 31% of HR leaders. Attrition is expected to remain moderate, with 83% forecasting rates below 15%, while 58% expect average salary increments to remain below 10%.

SC directs Tejpal to surrender within three weeks, rejects exemption plea

THE SUPREME COURT on Tuesday directed journalist Tarun Tejpal to surrender within three weeks to undergo his 10-year prison sentence in a 2013 rape case in which he was convicted by the Bombay High Court.

A bench of Justice Alok Aradhe dismissed Tejpal's plea seeking exemption from surrendering.

"The application seeking

exemption from surrendering is rejected. However, the appellant (Tejpal) is granted three weeks' time to surrender and file surrender certificate before this court," the bench said in its order.

The apex court listed his appeal challenging his conviction and sentence for hearing on September 22, subject to the filing of the surrender certificate.

"In case the surrender certificate is filed on or before September 21, 2026, the registry shall list the criminal appeal for hearing on September 22, 2026 before the regular court," it said.

Tejpal, former editor of Tehelka, was convicted of raping a junior colleague inside a hotel elevator in 2013 during an event organised by the magazine in Goa.

RISK TO INVESTORS

For details, refer to section titled "Risk Factors" beginning on page 16 of the RHP

1. Losses incurred in past periods and negative cash flows:

We incurred net losses and negative operating cash flows in Fiscals 2026, 2025 and 2024. There can be no assurance that we will not incur losses or negative operating cash flows in the future as we expand our operations. The following table sets forth certain financial information for the Fiscals indicated:

Particulars	Fiscal		
	2026	2025	2024
	(in ₹ million)		
Profit/(Loss) after tax	(2,853.99)	(1,883.83)	(477.10)
Net cash used in operating activities	(348.95)	(451.85)	(313.44)

2. Debt Servicing and Financing Risk:

High indebtedness, weak debt servicing metrics, and reliance on external financing may constrain our liquidity and growth. Failure to generate sufficient cash flows, secure financing, or comply with debt covenants could adversely affect our operations, financial condition, and expansion plans.

Particulars	Fiscal		
	2026	2025	2024
Debt service coverage ratio*	0.08	0.37	0.27

*Debt service coverage ratio is calculated as earnings before exceptional item, depreciation and interest divided by total borrowings.

3. Risks related to dependence on Experience Centers:

We derive a significant portion of our Total PPUS GMV from our Experience Centers in India, which contributed 74.72%, 66.41%, and 56.20% of Total PPUS GMV in Fiscal 2026, 2025,

...continued from previous page.

and 2024, respectively*. Additionally, within India, our Experience Centers in Mumbai and Delhi accounted for 28.42% and 22.94%, respectively, of Total PPUS GMV in Fiscal 2026.

**This does not include PPUS GMV derived from UK and US as PPUS GMV attributable to the UK and US are omni-channel.*

4. **Risks related to our online channel:**

Our dependence on mobile platforms, app store policies, device compatibility, and technology changes could adversely impact accessibility, growth, and engagement. Failure to maintain mobile ecosystem partnerships, platform compatibility, site performance, or evolving consumer preferences may reduce engagement and sales.

5. **Risk related to Trade policies, geopolitics and trade tariffs:**

Dependence on export markets, particularly the U.S., exposes us to tariffs, trade disputes, sanctions, and geopolitical developments that may reduce demand and profitability.

6. **Customer Growth and Retention Risk:**

Our growth depends on attracting new customers, retaining repeat buyers, maintaining brand reputation, and delivering a superior shopping experience. Failure to sustain customer acquisition, engagement, spending levels, or marketing effectiveness could adversely affect revenue, profitability, and growth prospects.

7. **Dependence on top Designer Brands:**

A significant share of our Total PPUS GMV is concentrated among top designer brands. Our top 10 Designer Brands contributed 30.24%, 26.54% and 23.44% of our Total PPUS GMV in Fiscals 2026, 2025 and 2024, respectively. Failure to retain existing brands, onboard new brands, manage supplier concentration, or address product quality and pricing challenges could adversely affect customer demand, revenue, and growth.

8. **Pricing Control and Brand Exclusivity Risk:**

The sale price or maximum retail price at which the products are sold through our channels are not within our control. Limited control over product pricing and non-exclusive brand agreements may reduce competitiveness, customer conversion, and traffic. Higher prices versus other channels or reduced brand participation could adversely affect sales, profitability, and responsiveness to changing consumer preferences.

9. **Intellectual Property Protection and unauthorised use Risk:**

Our right to use certain intellectual property acquired under the IP Agreements has been challenged. We have received a notice seeking termination of the License Agreement alleging contractual breaches, which we have disputed. While our Company has responded to the Notice, denying such allegations, any further claims, disputes, or legal proceedings relating to these intellectual property rights could adversely affect our business, operations, and reputation.

10. **Risks related to dependence on womenswear category :**

Our business is dependent on the sale of womenswear for a significant portion of our revenues, contributing 77.70%, 75.66%, and 77.88% of our Total PPUS GMV in Fiscal 2026, 2025, and 2024, respectively. Negative trends in womenswear demand, economic conditions, trade policies, or tariffs may reduce business volumes.

11. **Utilisation of Net Proceeds related Risk:**

Company proposes to utilize the Net Proceeds towards (i) investment in our wholly owned Subsidiary, PSL Retail for expenditure towards lease liabilities of Experience Centers, and back-end offices in India; (ii) funding towards sales and marketing expenses to be incurred by our Company; and (iii) general corporate purposes. The usage of our Net Proceeds

towards these Objects will not result in the creation of any identifiable assets.

Particulars	Fiscal		
	2026	2025	2024
Rent expenses (in ₹ million)	847.83	482.95	350.07

**The rent expenses relate solely to the Experience Centers of our Company, in India and abroad, and do not include any rent expenses in relation to short-term pop-up stores, warehouses or offices.*

12. Since Company has incurred loss in Fiscal 2026 based on Restated Consolidated Financial Information, the basic and diluted EPS is negative, and hence, the Price to Earnings ratio is not ascertainable.

13. **Weighted Average Return on Net Worth for Financial Year ended 2026, 2025 and 2024 is (147.14%).**

14. The weighted average cost of acquisition of the Equity Shares of our Promoter and the weighted average cost of acquisition at which the Equity Shares were acquired by our Promoter within one year preceding the date of the Red Herring Prospectus are as follows:

RISK TO INVESTORS

For details refer to section titled "Risk Factors" beginning on page 20 of the Prospectus

- Dependence of our total income on the performance of funds** - A significant portion of our total income is derived from Management Fee, Carried Interest and Income from Sponsor Commitment in relation to funds managed and advised by us. For Fiscals 2026, 2025 and 2024, Management Fee from the funds managed and advised by us constituted 38.07%, 46.65%, and 72.96% of our total income, respectively. Poor performance of the funds managed and advised by us would cause a decline in our income from such funds and could therefore have a negative effect on our performance, cash flows and financial condition.
- Historical returns of the funds may not be indicative of future performance** - We commenced our initial investment management and advisory operations with a set of four investments made on a deal-by-deal basis between 2005 and 2007 ("Prior Investments"). Our Prior Investments aggregated to ₹210.93 million which was invested by us on a deal-by-deal basis between 2005 and 2007. As of March 31, 2026, all the Prior Investments have been fully realized with an MOIC of 5.61x. Fund II was formed in 2007 and Fund III was formed in 2015 and was deployed by 2020 with ten investments and is in its exit phase with two partial realizations, as of March 31, 2026. Fund IV was formed in 2021 and as of March 31, 2026, had made six investments, deploying 62.00% of the total capital of the fund. The historical returns attributable to the funds managed and advised by us should not be considered as indicative of the future results of such funds and may be significantly lower than the historical returns.
- Uncertainty in timing and receipt of Carried Interest** - Decline in realized or unrealized gains, or an increase in realized or unrealized losses on account of fluctuation in our Carried Interest, could adversely affect our investment income, which could further increase the volatility of our quarterly results and adversely affect our financial condition and results of operations. The breakdown of our income from Carried Interest for the periods indicated have been set forth below:

Particulars	For the Financial Year ended,					
	March 31, 2026		March 31, 2025		March 31, 2024	
	Income	% of total Income	Income	% of total Income	Income	% of total Income
	(₹ million)	%	(₹ million)	%	(₹ million)	%
Carried Interest	754.11	47.79	644.26	52.25	183.95	17.69

- Valuation risk in respect of fund assets** - Valuation methodologies for certain assets of the funds managed and advised by us can be susceptible to significant subjectivity and the derived values of assets may not be realized, which could result in significant losses for such funds. TELECOM MINISTER SCINDIA EXPRESSES CONFIDENCE

'C-DoT tech capabilities will make world rely on India'

PRESS TRUST OF INDIA
New Delhi, August 25

UNION TELECOM MINISTER Jyotiraditya Scindia on Tuesday expressed confidence that technical capabilities of state-owned C-DoT will contribute in transforming India from being self-reliant to make the world rely on it.

Speaking on the 43rd foundation day of the Centre for Department of Telematics (C-DoT), Scindia said India has been able to break into the club of four countries supplying advanced telecom gear for 4G and 5G across the globe and become the fifth country to develop its own 4G stack.

The union telecom minister said Saptadharma — the prime minister's seven-point vision for Viksit Bharat, focusing on manufacturing, agriculture, technology, Gati Shakti, defence, green-blue economy and soft power — must guide India's progress and C-DoT's destiny.

"I am very confident that my family present here today will

Scindia said, Saptadharma, PM's seven-point vision for Viksit Bharat, focusing on manufacturing, agriculture, technology, Gati Shakti, defence, green-blue economy and soft power; must guide India's progress and C-DoT's destiny

lead India from an India that was 'vishwa par nirbhar' (dependent on the world) to an India today that is Atmanirbhar to a C-DoT that will contribute to India tomorrow on a 'vishwa Bharat par nirbhar' (world dependent on India)," the minister said.

Scindia said India was behind the world in 4G, walked and

marched with the world on 5G but due to organisations such as C-DoT, the government and every proud Indian can say that India will lead the world in 6G.

"The next era of telecom is not going to be defined merely by connecting people. But it will be defined by ensuring that connectivity and the networks that

we evolve are trusted, resilient, intelligent, and most importantly, secure," the minister said.

He said as India marches to the journey of Viksit Bharat 2047, C-DoT has to march from lab to market and from research to development, globally marketing those developmental products.

C-DoT at the event unveiled around 14 quantum products, some of which have been deployed in live networks.

Minister of State for Communications, Chandra Sekhar Pemmasani, said the Sanchar Saathi app developed by C-DoT, has helped trace approximately 3.6 million stolen devices and blocked nearly 5.7 million lost or stolen phones.

"It might seem simple for many people, but for many families, that phone is not just a simple device; it is probably one of the most expensive items that they own. It contains everything about their life. We take things for granted, but I know how much work it takes to build these systems," he said.

Agencies working for Indian seafarers' safety, says Sonowal

PRESS TRUST OF INDIA
New Delhi, August 25

DAYS AFTER TWO commercial vessels carrying a total of 22 Indian nationals were hijacked by armed pirates off Yemen and Somalia, Shipping Minister Sarbananda Sonowal on Tuesday said that all concerned agencies are working day and night, and they are committed to the safety, security, and welfare of Indian seafarers wherever they are working.

Sonowal said the government has asked the Directorate General of Maritime Administration (DGMA) to set up a dashboard for providing real-time information about Indian seafarers on each vessel operating in the region, irrespective of the ship's flag. "In this sector, like you know, all concerned agencies, they are working day and night

and particularly we are committed to the safety, security, and welfare of our seafarers wherever they are working," he said.

Sonowal was asked how the government is dealing with the security threat faced by Indian seafarers operating in the Red Sea, Gulf of Aden and wider Indian Ocean region, where vessels have to contend with attacks linked to geopolitical tensions in the region.

The minister said he has categorically directed that every Indian seafarer in the affected region must be individually accounted for, irrespective of the vessel's flag. The Indian crew members aboard both hijacked vessels are safe, according to the latest information available, a senior shipping ministry official said on August 21.

The Eritrea-flagged oil products tanker MT Sibul 1, carrying

Sarbananda Sonowal, Union shipping minister

20 crew members, including 16 Indians, was hijacked in the Gulf of Aden on August 20, about 30 nautical miles off the Yemeni coast. The crew also includes one Syrian, one Sudanese and one Iraqi national, while the nationality of another seafarer is yet to be confirmed. A second vessel, the Cameroon-flagged M/V LUTUF, was hijacked on August 17 off Somalia's Puntland coast.

The vessel has 10 crew members, including six Indians.

The shipping ministry official quoted above had said, "As reported by Recruitment and Placement Service Licence (RPSL) agency — SKS Krishi Marine Services (Op) Private Limited, six armed pirates are presently onboard the vessel (M.T. Sibul-1) and have taken control of the vessel."

The RPSL agency has been advised to submit an incident report and subsequent periodic updates through the e-Navik online marine casualty reporting system, the official had said.

Maritime tracking information indicates the tanker was approached by an unauthorised vessel before the control of the ship was lost. The incident occurred as piracy activity off Somalia and in the Gulf of Aden has increased this year.

What is the threat posed by AI in terms of cyber security and how real and near is it, especially when it comes to public infrastructure or banking infrastructure?

PRATYUSH KUMAR: If I were to have a riskometre, I would say dwell on 10. What is the problem? It is that the models are now significantly more capable and they can run for long durations of time. So they can chain together vulnerabilities that themselves would be innocuous but find specific things that otherwise human hackers would not. At Sarvam, we have been both playing attack and defence because we are being attacked, given that we have interesting things with us and we are also building these systems. Cyber security, like coding, was a critical use case. We will have to spend a lot more ensuring every line of code, whether written by humans or AI, leads to reliable and safe systems.

DHANANJAI BAGRODIA
INVESTMENT MANAGER,
ALCHEMY CAPITAL

What do you actually use AI in your daily life for?

RAJAN ANANDAN: There's an app, that you perhaps don't know of, called Equal AI. It's not one of our companies. It answers your phone. You know how you get so many calls. If the app doesn't recognise who is calling, it answers the phone for you, says it is the agent and takes notes. If it is urgent, it tells you that it is critical. Few weeks from now they are going to launch a bunch of other features where it will actually do things for you. For instance, every time you have e-commerce orders, you get an SMS and the delivery person keeps calling you, hassling you. The app agent will take the call for you and take care of the delivery.

SUKETU SHAH
CHAIRMAN, VAGABOND HOLDINGS

In every field, AI is going to come in. What are the risks of AI?

RAJAN ANANDAN: In the 1800s, India was 25 per cent of global GDP. By 1947, we were 2-3 per cent. Lots of things happened in between, but we basically missed the industrial revolution. That's what happened to India. The way I think about this is that we have to be in the winner's circle. There are few countries in the world that can credibly say they could, because they don't have the talent, scale or economy that can even afford to spend what we are putting into RDI for deep tech. The risk really is that we don't move fast enough as a nation... that we don't aim to be in the winner's circle. This is the industrial revolution, repeat. It'll happen faster, be more consequential and there will be winners and losers in the global race of AI.

●The one AI startup no one has heard of today, but you believe everybody will soon know of?
Supernova.

●BharatMatrimony, Byju's...one lesson from each of the above investments.

Corporate governance is critical. The startup ecosystem grew very fast — in 2019, we had fewer than 10 or 12 unicorns, and went to about 100 in three years. In that period, a couple of companies didn't have the rigour but that has now settled.

●Exits from Peak XV or Peak XV's exits — which do you spend more time thinking about?

The IPO market in India is extraordinary. Until 2019-20, we had no IPOs. This year, India has had over 100 IPOs, despite the war and the pressure on capital markets — both SME and mainboard. It's interesting, especially for venture capitalists, because we invest in companies and then, 10 or 15 years later, we exit them.

●Do you believe the future of exits is going to be IPOs?

IPOs will accelerate, but we'll also see strategic mergers & acquisitions.

●Retail investors are saying they will wait for the post-IPO because a lot of the growth has been eaten up by everybody before the company comes to IPO. Companies are seeing a fall after listing and then an entry. Is that going to be a trend?

I don't think it'll slow down. What you will see is valuations getting adjusted. The reality is: You are in Bombay, there are four or five large asset-management firms that

basically have to decide whether you can have a successful IPO or not, and they set a price. They're looking for good businesses at good prices.

●The one biggest risk in investing in any AI company. Tough to justify valuations, shrinking product life cycles, big tech doing it cheaper or faster, a volatile regulatory environment, or something else?

If you're an application-layer company, the big question is: What are the model companies doing? You have to have enough of an edge and just keep going faster. If you're a model company, you're competing with the best in the world. The premium on scale, execution and innovation is 10 times more today. The bar has gone up dramatically. That's what it is. We don't worry about other things. The price is what it is. Either you're in the company or you're not. I don't worry as much about regulation.

●The most compelling argument is that AI valuations are not a bubble. Valuation is a concern. We are certainly not in a cheap AI market.

●Your advice to Indian capital that wants to invest in the AI wave?

Try to get into Sarvam. Look for interesting companies at the application or model layer. There aren't as many companies in the tooling layer but there are a lot in the infrastructure layer.

●The one company you most regret not investing in?
Anthropic

The one foreign AI company you keep pointing towards internally.

PRATYUSH KUMAR: The bet Anthropic made on focusing on coding was amazing.

RAJAN ANANDAN: Yes, coding.

One-line advice to an aspiring AI founder in India today.

PRATYUSH KUMAR: Buckle up.
RAJAN ANANDAN: Get going.

What would you tell a researcher who has to choose between working at Sarvam in India or Anthropic in the Valley?

PRATYUSH KUMAR: There is a certain speed that you get with size. And Sarvam is just taking off. There's so much more to do here. Exciting stuff to be done. It's just the agency to do stuff. Because there's speed, you get to do a lot more.

RAJAN ANANDAN:
See, \$1.5 billion to

\$100 billion... \$1.5 billion was the last round. That's about 60x. Anthropic would have to be a \$60 trillion company. Which of those scenarios would you bet on?

The one policy framework that aligns Indian AI companies like Sarvam with global AI companies like Google and OpenAI?

PRATYUSH KUMAR: We should all aim towards a world of abundance and positive outcomes. I think this concerns everybody.

RAJAN ANANDAN: India is a wide-open playing field. That's why it's an exciting market, because we believe that if you win in India, you win.

Is there one policy fault line that disconnects Indian AI companies from foreign AI companies?

RAJAN ANANDAN: Currently, I can't think of any.

PRATYUSH KUMAR:
Not really.
