STRONG GREENBACK

Rupee at one-week low, slips past 94/dollar

Mumbai: The rupee on Thursday pierced the 94 to the US dollar level, closing at a one-week low, amid demand for dollars from importers and the greenback gaining strength. The Indian currency closed 35 paise weaker at 94.04/dollar against the previous close of 93.69. Dilip Parmar, Senior Research Analyst, HDFC Securities, said the rupee surrendered its early gains amid bargain dollar buying and broad-based dollar strength. **p7**

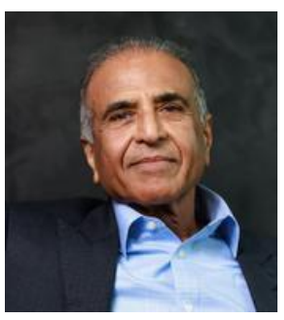

Mittal eyes global deals in telecom to drive growth

HIS CALL. Bharti chief says next phase hinges on satcom, AI infra and financial services

S Ronendra Singh
Poornima Joshi
Thomas K Thomas
New Delhi

> There is a very small cohort of Indian companies with the potential to go global. And, I think we are one of those
>
> **SUNIL BHARTI MITTAL**
> Chairman, Bharti Enterprises

Bharti Enterprises is looking to renew its global expansion drive, with Chairman Sunil Bharti Mittal saying that the group is keen on pursuing overseas telecom acquisitions, as improving cash flows and debt reduction strengthen its ability to make fresh investments.

"There is a very small cohort of Indian companies with the potential to go global. And, I think we are one of those," said Mittal in an interview to *businessline*, adding that Bharti Enterprises would look at more telecom opportunities overseas when they arise.

AFRICAN BUSINESS

The group, however, would prefer acquisitions that allow it to consolidate operations, rather than minority stakes without management control. The renewed appetite comes after a prolonged period of consolidation following Bharti's acquisition of Zain's African operations in 2010. The Africa business, which initially proved a major financial and operational challenge and accumulated losses, has now stabilised after years of restructuring.

Mittal said the last five years had been particularly rewarding, with the business emerging as a significant contributor to the group's global operations.

Mittal's global ambitions are part of a broader set of bets he envisages for Bharti over the next five years as the group marks 50 years of its existence. These include satellite communications, data centres, AI computing infrastructure, sovereign cloud and financial services.

"The approach is not going to be like an entrepreneur founder start-up, where we build something afresh. We, as a large enterprise now, will take big bets in the adjacency space," he said.

Mittal sees satellite communications as potentially transformative, particularly for connectivity in aircraft, ships, maritime routes and remote areas.

He said Bharti is working with multiple satellite operators, including Starlink and OneWeb, and is also in discussions with other international players, rather than investing in its own satellite constellation.

AI PLANS

On AI, Bharti plans to expand its data centre capacity to around 1 GW by 2030, four times its current level, with projects planned across Visakhapatnam, Mumbai, Kolkata and Hyderabad.

The group also intends to invest in GPUs and lease computing capacity to companies developing AI applications, while building sovereign cloud capabilities for sensitive workloads.

Outside its core businesses, Bharti has taken a 49 per cent stake in Haier's Indian consumer appliances business, a venture Mittal believes has the potential to become a multi-billion-dollar business.

"I like that business," he said, citing the company's product innovation, competitive pricing and the growth potential of India's household consumption market.

Interview on **p3**

In major reboot, AI's poster boy Huang ousted as Nvidia CEO

Bloomberg

Jensen Huang, the pre-eminent face of the AI infrastructure boom, was ousted as Nvidia Corp CEO after reports of two affairs, including with one woman who is suspected of spying for China.

KRESS INTERIM CEO

Chief Financial Officer Colette Kress was named the interim CEO. Huang, one of the three engineers who founded the chipmaker in 1993, had been under intense pressure since Sunday, when he admitted to a romantic relationship with Alice Huang, a former executive at the Singapore data centre firm Megaspeed International.

Huang's resignation deepens a crisis partly of Nvidia's own making, given that there has been no clear succession plan for the 63-year-old, who has been the company's only CEO.

Arguably more than any other founder in the technology world, Huang built Nvidia around himself and his view of what constituted the right way to manage a company.

Kress, who joined Nvidia 13 years ago after stints at Microsoft Corp and Cisco Systems Inc, has spent her career in financial roles. While she has represented Nvidia at Wall Street-related events, her public role has been confined to the AI giant's numbers and the majority of the communication with the financial community has been handled by her former boss.

FALL FROM GRACE. Nvidia's Jensen Huang

Under Huang's leadership, Nvidia's shares have soared more than 7,000 times since it became a public company in 1999. The firm's market valuation has at times topped $5 trillion, ranking it among the largest companies in the world.

The staggering growth eclipses anything accomplished by Apple Inc's Steve Jobs, Microsoft Corp's Bill Gates or Amazon.com Inc's Jeff Bezos.

WIDER IMPACT

Huang's departure threatens to reverberate far beyond Nvidia. He has used Nvidia's financial strength to back dozens of major AI players, including frontier labs OpenAI and Anthropic PBC. He has also both invested in and backstopped financing deals for cloud computing firms, including CoreWeave Inc, inspiring others to forge similar arrangements with one another to bolster the entire AI ecosystem.

Big names on Wall Street, including Michael Burry of *The Big Short* fame, have warned that such circular deals are artificially inflating AI demand.

"As a student of economic history, I don't know if there's ever been such a key man holding so much of this industry up," said Blue Bear Capital investor Thomas Ferguson about Huang.

He has also led high-profile efforts to promote the worldwide expansion of data centres, travelling extensively to speak at conferences, lectures and other events.

Oct retail inflation tops 6% on costly food items; another rate hike seen as CPI is unlikely to ease

Shishir Sinha
New Delhi

Driven by high food prices, retail inflation based on the Consumer Price Index (CPI) breached the RBI's upper limit of the 2-6 per cent target range in October for the first time in two years, data released by the Statistics Ministry showed on Thursday. There is also the strong possibility of another interest rate hike by the Monetary Policy Committee next month.

Data showed that the headline number reached 6.09 per cent in October, up from 5.54 per cent in September. Food inflation spiked to 8.94 per cent, from 7.74 per cent in the previous month.

Of the 12 categories, including food items and services, 11 showed hardening inflation. Retail inflation in restaurant and accommodation services was 10.06 per cent, F&B 8.51 per cent and personal care and miscellaneous goods and services 10.14 per cent.

"While food inflation has surged y-o-y, the momentum in October was the slowest since June (0.9 per cent month-on-month in October compared to September). Vegetable and pulses CPI increase slowed in October compared to September on stabilisation in onion and tomato prices towards the month-end, a trend that has continued into November so far," said Aastha Gudwani, India Chief Economist, Barclays, and Amruta Ghare, Economist, Barclays, in a note.

Pricey move

(2026/In %)

Top 5	Sept	Oct	Bottom 5	Sept	Oct

Lemon	36.4	47.3	Cabbage	5.6	(-)1.9

Source: MoSPI

NOT THE PEAK

Economists do not see the current print as the peak. "With headline inflation yet to peak, compounded by an unfavourable base effect, the central bank's quarterly projection is likely to be revised higher. The data reinforces our expectation of a second successive rate hike in December," said Radhika Rao, Senior Economist at DBS Bank.

India Inc said the elevated inflation underscored the need to closely monitor food price movements.

"While inflation trends across individual categories remain varied, the food component warrants particular attention, given its significance in the consumption basket," said Anil Gupta, President of PHDCCI.

Some economists expect an upward movement in the headline number to continue.

"With the CPI inflation set to remain above the 6 per cent upper bound of the RBI's tolerance band over the next couple of months, and GDP growth likely to ease only slightly in Q2FY27, relative to the previous quarter while remaining above the 7 per cent mark, a further 25 bps rate hike in December appear almost certain," said Aditi Nayar, Chief Economist at ICRA.

GRAIN GAINS

WEATHER IMPACT. Workers spread and dry harvested rice grains in Nadia district of West Bengal on Thursday. Rice prices are ruling higher than the minimum support price fixed by the government as production has been affected by deficient rain PTI

AP eyes ₹10-lakh-cr investments at CII summit; CM touts high conversion rate

G Naga Sridhar
Visakhapatnam

Andhra Pradesh will sign over 300 MoUs involving investment proposals of ₹9.89 lakh crore at the 31st CII partnership summit, which began here on Wednesday.

On Thursday, the State government inked MoUs worth ₹5.84 lakh crore with the potential to create 1,07,693 jobs.

"With these investments, the total investments attracted by the State since June 2024 now stand at ₹32 lakh crore, with 74 per cent conversion rate, the highest in the country," said Chief Minister N Chandrababu Naidu at the inaugural session of the partnership summit.

Conversion rate refers to government orders for allotment of land. More than 56 per cent of the investment proposals worth ₹22.6 lakh crore announced at last year's summit have been implemented across 25 sectors.

Union Commerce Minister Piyush Goyal (left) and Andhra Pradesh CM Chandrababu Naidu in Vizag on Thursday

The State government will enact a law for protecting investments and send it to the Centre for consideration, Naidu added.

At the summit, Commerce Minister Piyush Goyal invited investors to invest in India and Andhra Pradesh, which offers immense opportunities in 25 sectors, including IT, energy manufacturing and tourism.

Referring to the move to enact a law to protect investments, Goyal said the Centre plans to study the contents of the proposed State legislation and will decide on the way forward at the national level.

"Trust is the new currency in the global economy. India is the safest destination for global investments in a turbulent world as the nation offers open markets, respect for intellectual property rights, and reliability to investors," he said.

MARITIME GATEWAY

Union Shipping Minister Sarbananda Sonowal said Andhra Pradesh is transforming into India's Eastern Maritime Gateway, as it has a 1,053-km-long coastline along the Bay of Bengal, and is close to major international shipping routes connecting India with East and South-East Asia and the wider Indo-Pacific region.

On Thursday, the State announced a few major investments. These included a $2 billion commitment by South Korean automaker Kia to expand manufacturing capacity, ₹80,000 crore of fresh outlay by ReNew Energy, which is already present in the State, ₹50,000 crore investment by CleanMax and ₹7,000 crore by Shree Cement.

James Murdoch's Bodhi Tree Systems invests $180 m in Adyar Ananda Bhavan

Our Bureau
Chennai

In a major validation for Chennai's very own food brand, Bodhi Tree Systems, the strategic investment firm founded by James Murdoch and Uday Shankar, on Thursday announced a $180 million investment in sweets and savouries brand Adyar Ananda Bhavan (A2B) for a majority stake.

MAJOR MILESTONE. The transaction marks one of the largest such deals in India's food services landscape BIJOY GHOSH

SWEET DEAL

The transaction marks one of the largest such deals in India's food services landscape. The partnership will focus on strengthening A2B's leadership and talent, building digital capability, modernising its kitchens and manufacturing, expanding its range of healthy and nutritious food, and growing its restaurants and packaged foods across India and globally. Media veteran Uday Shankar will serve as Chairperson of A2B's new board of directors.

A2B is Bodhi Tree's third investment in India after Allen Career Institute and JioStar. "A2B has earned the trust of millions of families through its consistent and reliable quality. While it is a formidable brand in India, we are equally impressed by the scale and reach of its operations. We look forward to working with the team to take its authentic cuisine to a far broader global audience," said James Murdoch and Uday Shankar, Co-founders of Bodhi Tree Systems, in a statement. Sources told *businessline* that A2B's rationale is to work with a firm that could help them expand and modernise before going for a public listing in a few years.

Going deeper into the existing markets, expanding globally and growing the snacks business is among the key priorities in aligning with Bodhi Tree Systems, sources said. "What began as a sweets shop started by my brother and me 50 years ago is now part of the daily life for millions of families, and we are proud of every one of our people who made that possible. We are excited to begin this next chapter with Bodhi Tree," said KT Srinivasa Raja, Co-founder, A2B.

Veda Corporate Advisors was the financial advisor to A2B for the transaction.

Reliance Power Q2 profit falls 65% to ₹30 crore

Ahmedabad: Reliance Power Ltd reported a 65 per cent y-o-y decline in consolidated PAT to ₹30.1 crore for Q2 FY27. Revenue from operations also fell 7 per cent to ₹1,830 crore. Its wholly owned subsidiary, Rosa Power Supply Company Ltd, paid loan prepayment charges of ₹25.32 crore, which the company classified as an exceptional item. Reliance Power also announced the appointment of Rajendra Vishwanath Pawar as CFO with immediate effect. OUR BUREAU

Temasek to invest ₹2,500 cr in Godrej Capital

Godrej Industries on Thursday said Temasek Holdings will invest ₹2,500 crore in Godrej Capital through its affiliate, valuing the financial services business at up to ₹28,000 crore. Godrej Industries will retain about 80 per cent ownership following the deal. The investment comes after it announced its plans to list the arm in five years. REUTERS

Vi's loss widens to ₹5,975 cr in Q2 on exceptional item

MIXED BAG. Telco sees rise in 4G/5G subscribers to 131 million; debt now at ₹943 crore

Vallari Sanzgiri
Mumbai

Vodafone Idea (Vi) reported a consolidated net loss of ₹5,975 crore for the quarter ended September, compared with a loss of ₹5,524 crore a year ago.

The higher reported loss was primarily due to an adverse mark-to-market impact on treasury assets, which was classified as an exceptional item.

Average revenue per user (ARPU) grew 10 per cent annually to ₹198.

Excluding the exceptional item impact, the telecom operator's adjusted loss stood at ₹5,513 crore, marginally lower than ₹5,562 crore in the year-ago quarter. The company recorded an exceptional loss of ₹462 crore during the quarter arising from the remeasurement of settlement assets.

REVENUE CLIMBS
Revenue from operations rose 6.2 per cent year-on-year to ₹11,884 crore, driven by growth in service revenue and trading goods. EBITDA stood at ₹4,981 crore, up 6.3 per cent from a year ago.

"Our focus continues to remain firmly on execution. Our Q2 performance reflects steady progress against our priorities. We are encouraged by the continued improvement in our net subscriber additions, supported by our network expansion and enhanced customer experience," said Abhijit Kishore, CEO of Vodafone Idea. He added that the company has placed capex orders worth over ₹13,200 crore, of which nearly ₹6,000 crore has already been executed, and remains confident of sustaining network expansion as funding discussions progress.

EXPANSION CONTINUES
Operationally, Vi's total subscriber base increased sequentially to 194.4 million from 193.1 million in Q1, although it remained lower than 196.7 million reported a year ago, implying a decline of about 2.3 million subscribers on an annual basis.

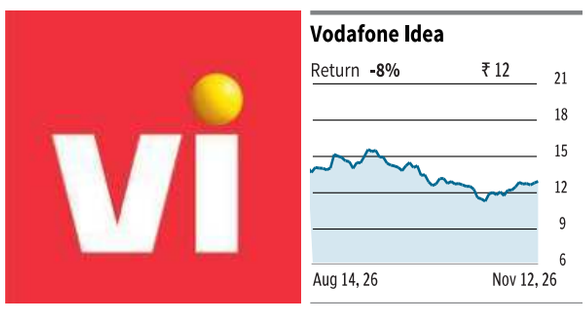

The company's 4G/5G subscriber base rose to 131 million, compared with 127.8 million a year earlier.

NETWORK FOOTPRINT
The telecom operator continued to expand its network footprint during the quarter, extending 5G services to 400 cities and towns and adding nearly 9,000 broadband towers, its highest quarterly addition in nine quarters.

Data consumption increased to 93.6 petabytes (PB) per day from 73.6 PB per day a year ago, reflecting a 27.1 per cent rise.

As of September 30, 2026, Vi's bank debt stood at ₹943 crore, while its cash and bank balance was ₹5,470 crore.

The company said it had secured funding of over ₹10,500 crore during the first half of the current financial year, including more than ₹4,000 crore of incremental bank funding raised in the second quarter.

We are aiming at ₹20,000 crore capex this year: Tata Steel CEO

bl.interview

Suresh P Iyengar
Mumbai

Tata Steel has posted better financials in Q2 despite challenging global headwinds. TV Narendran, CEO and MD, spoke on the future outlook for steel prices and input costs, expansion plans, and the challenges facing its European operations.

Edited excerpts:

> Net debt increased during Q2 to ₹90,000-91,000 crore... We expect the working capital to normalise in Q3
>
> **TV NARENDRAN**
> Managing Director and Chief Executive Officer

What led to the fall in EBITDA q-o-q?
In India, steel prices were lower in Q2 compared with Q1. Prices started recovering only in September, while July and August witnessed lower prices. Volumes were also not significantly higher, while costs increased due to the Gulf conflict.

We faced an impact of around ₹1,400 crore on costs, including higher consumables, freight and insurance expenses. Consequently, EBITDA per tonne was squeezed in India. The Netherlands performed better than Q1 in terms of EBITDA per tonne. The UK, however, was weaker because we could not sell the volumes as planned. A chunk of imports entered the country before the government changed its trade policy. These stocks need to be consumed before domestic producers can regain volumes.

Finance costs have also increased substantially.
Part of the increase is attributable to M&As, including the one in TM International Logistics, and the leases that have come onto our balance sheet. Net debt also increased during Q2 to ₹90,000-91,000 crore. In India, we paid dividends, while our Netherlands and UK operations carried higher inventories and working capital. We expect the working capital to normalise in Q3.

Do you expect the current steel price levels to be sustainable?
Prices appear to be close to their peak at the moment, but we expect them to remain strong. In India, we expect realisations to be about ₹3,500 per tonne higher in Q3. In the UK, we expect realisations to improve by about £30 per tonne. In the Netherlands, product-level realisations are expected to increase by about €30 per tonne. However, overall realisation could be around €11 per tonne lower.

What is your outlook for coking coal and other input costs?
We expect our average coking coal cost of consumption to be about $15 per tonne higher in Q3 compared with Q2. The Gulf conflict has also increased the cost of consumables in India and gas prices in Europe. Freight and insurance costs continue to remain elevated.

Tata Steel has spent around ₹6,800 crore on capex in H1. What is the outlook for the full year?
We had guided for capex of around ₹20,000 crore for the year, and we expect to be close to that figure. Of this, about ₹15,000 crore will be invested in India.

Are you confident of achieving the targeted annual cost savings of ₹7,000 crore this year?
H2 should be significantly better than H1. We could not achieve the planned savings in H1 due to volume losses and operational instability at Kalinganagar and Meramandali. We expect H2 to be better and are working towards the annual target of ₹7,000 crore, although achieving it will be challenging.

Do you expect a cost overrun in the UK electric arc furnace project?
The electric arc furnace is expected to be ready by March 2028. But the supply of electricity from the national grid is taking longer than planned. Full electricity supply is expected only around March 2029. In the interim, we expect to receive temporary power. This delay has implications for project costs and other aspects. We are discussing it with the government to find a solution. We do not want to disclose any numbers at this stage.

What is holding up the proposed restructuring of the Netherlands operations?
The non-binding joint letter of intent, signed in September, has been extended until March 1. Several issues need to be resolved before we can enter into an agreement. We have submitted a proposal with a timeline, which regulators are evaluating. There are also issues relating to capex and the overall business case. Government grants are an important part of the discussions. The quantum of grants and the conditions attached to them also need to be worked out.

Ola Electric narrows losses despite fall in deliveries

Our Bureau
Bengaluru

EV maker Ola Electric narrowed its losses even as revenues and deliveries declined in the second quarter of FY27.

Its net loss narrowed 13 per cent year-on-year to ₹362 crore in the quarter, from ₹418 crore in the corresponding period last year. However, revenue declined 39 per cent to ₹421 crore.

Deliveries fell to 34,667 vehicles in Q2, from 52,666 vehicles in the year-ago period. Operating expenses stood at ₹369 crore, down from ₹390 crore in Q1, excluding a one-time non-cash reversal of ₹57 crore seen in that quarter. The company is shifting to a dealer-led distribution model, having shut most of its company-operated stores.

Its first dealer stores went live on September 4. By November 8, the network had expanded to 255 dealer partners operating 319 stores. Ola Electric plans to increase this to around 450 stores by December and 700 by March 2027. All new production is now being routed through dealers.

PRODUCTION RISING
The company said production, which had remained broadly flat for several months, was now increasing month-on-month. It expects to produce around 25,000 vehicles in December.

"Wholesales are ramping, and dealers are reordering, which has strengthened the flywheel. Demand is not our constraint; the constraint is the ramp-up of our supply chain," the company said.

BORROWINGS UPDATE
During the quarter, Ola Electric also raised funds through a QIP. Its total borrowings declined from ₹3,132 crore in December 2024 to ₹1,819 crore in September 2026. Auto borrowings, specifically, fell from ₹2,422 crore to ₹337 crore over the same period.

The company added that it expects its battery requirements to comprise around 30 per cent nickel manganese cobalt (NMC) cells and 70 per cent lithium iron phosphate (LFP) cells.

The focus remains on meeting its own automotive requirements.

Scorecard

(in ₹ crore)

	Q2 FY26	Q2 FY27
Revenue	690	421
Loss	-418	-362
Deliveries (units)	52,666	34,667
Adjusted EBITDA margin (in %)	-37.4	-58.5

RIL, Amara Raja, Exide, others bid for 10 GWh cell-storage capacity PLI

S Ronendra Singh
New Delhi

The Ministry of Heavy Industries (MHI) on Thursday said it received 22 bids for 10 GWh of advanced chemistry cell (ACC) manufacturing capacity under the Production Linked Incentive (PLI) scheme from companies including Reliance Industries, ACME Solar Holdings, Amara Raja Advanced Cell Technologies, Exide Energy Solutions, JSW Neo Energy and Vikram Solar.

ENERGY SECURITY
The 10 GWh capacity is earmarked for Grid-Scale Stationary Storage applications and forms part of the overall targeted 50 GWh ACC manufacturing capacity under the National Programme on Advanced Chemistry Cell Battery Storage.

"The allocation of 10 GWh for GSSS applications is expected to support the country's rapidly growing energy-storage requirements arising from the expansion of renewable energy. It will contribute to enhancing energy security and deepening the domestic value chain for ACC technologies," the MHI said.

In May 2021, the Cabinet approved the scheme, with a total budgetary outlay of ₹18,100 crore. It seeks to enhance the domestic ACC manufacturing capabilities and encourage large domestic and international players to establish a globally competitive ACC manufacturing ecosystem in India, MHI said.

The request for proposal was floated on the Central Public Procurement portal on July 15, 2026, while the pre-bid conference was held on July 29. The last date for bid submission was November 10, and the technical bids were opened the following day in the presence of bidders at the MHI, it said in a statement.

"The bidding is being conducted online through a transparent two-stage Quality and Cost-Based Selection mechanism," the Ministry said, adding that the strong participation in the tender reflects growing industry interest in India's ACC manufacturing potential and reinforces the government's commitment to building a technologically self-reliant, globally competitive and sustainable ACC ecosystem.

OTHER BIDDERS
Avaada Electro, Fujiyama Power Systems, Megha Engineering and Infrastructures, Waaree Energy Storage Solutions, Godawari New Energy, Renew Photovoltaics and Sun Drops Energia also have bid for the PLI, besides GK Energy, JPM Energy Solutions, Lineage Power, Mahendra Sponge and Power, Nsure Reliable Power Solutions, Sai Bioenergy, Shirdi Sai Electricals, Utex New Energy and Zetsol Energy.

Tractor sales rise 3.1% in October on steady rural demand

T E Raja Simhan
Chennai

The tractor industry recorded a modest growth of 3.1 per cent in October, with total retail sales rising to 79,285 units against 76,898 units in the corresponding month last year, according to data from the Federation of Automobile Dealers Associations (FADA). The growth comes on the back of steady rural demand.

There is also a strong demand for tractors from non-agricultural industries like road construction and mining, said sources.

M&M LEADS
Mahindra & Mahindra retained its leadership position, selling 18,263 tractors, up 7.6 per cent y-o-y, per FADA data. The top five manufacturers, including International Tractors Ltd, TAFE Ltd and Escorts Kubota Ltd (Agri Machinery Group), together accounted for 76.2 per cent of the total tractor market in October.

The tractor industry witnessed some moderation in October, impacted by the high base, shift in festival timing and monsoon-related disruptions.

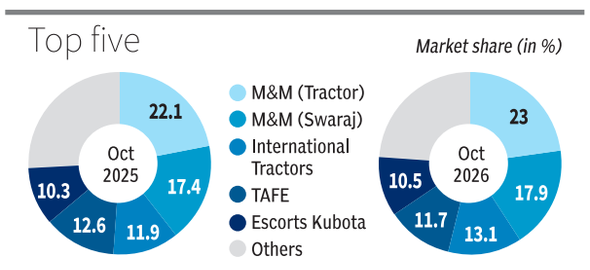

Elevated input costs arising from geopolitical developments and consequent pricing actions may moderate demand in the near term, said a business update by Escorts Kubota.

THE IMPLICATIONS
Tractor retail sales have remained positive in October, supported by festival season demand. However, the growth is not yet indicative of a broad-based improvement in underlying demand. The industry continues to face uncertainties on the agricultural front, with deficient monsoon raising concerns around soil moisture, reservoir levels and potential crop yields.

The implications for farm incomes will become clearer as kharif harvest progresses, said Poonam Upadhyay, Director, Crisil Ratings.

Festival demand should provide some support through November, but the more important indicator will be how demand evolves thereafter.

Rabi sowing, reservoir replenishment and crop realisations will be critical in determining farmer purchasing power, she said.

Dabur eyes increasing share of premium products to 23%

Meenakshi Verma Ambwani
New Delhi

Dabur India is aiming to grow the share of premium products to 23 per cent over the next 18 months. The company's premium portfolio now spans across categories from health and wellness to beverages. Besides new launches, the company's premium strategy includes contemporising its portfolio with new formats and new packaging.

During an investor meet, Herjit Bhalla, CEO - India Business, said the company's premium portfolio had been growing at 4x and is margin accretive. "The portfolio used to contribute 17 per cent and it has now gone up to 20 per cent... So, we need to continue to grow and to advance premiumisation, because it's going to be able to sustain a higher top line."

GROWING REACH
He noted that the rise of alternative channels is also enabling the company to innovate more and grow the reach of its premium portfolio. "Premiumisation is something we want to enhance further, so we want to take our [share] up to 23 per cent over the next 18 months. Maybe even sooner," he told investors.

"The second leg of driving premiumisation was really making our portfolio look a lot more contemporary. And one of the areas that we've really been focused on is how we enhance the packaging of our portfolio. And you see that classic example being the new packaging for Dabur Red, among others," Bhalla noted.

Suprajit Engg gains traction on contract wins, EV demand

Aishwarya Kumar
Bengaluru

Automotive and non-automotive components maker Suprajit Engineering is seeing stronger traction in its US and Chinese businesses, driven by new contract wins from competitors in the US and rising orders from a leading EV manufacturer in China.

Its Global Cable & Mechatronics business saw 24 per cent revenue growth during Q2, as EBITDA rose 69 per cent. EBITDA margins came at over 10 per cent from 7.4 per cent a year earlier.

GREEN SIGNAL
The company attributed the improvement partly to the completion of restructuring at GCM, with project wins secured over the past few years now flowing into operations. The US business is gaining traction through market-share gains rather than an improvement in underlying industry demand, which continues to grow at just 1-2 per cent, the management told analysts.

In China, demand is being supported by higher offtake from a large EV manufacturer, providing better growth visibility. Its European business, meanwhile, has remained steady despite economic headwinds.

To support export growth, its subsidiary Suprajit Automotive Ltd is setting up a greenfield cable manufacturing facility in Chennai.

FINANCIALS
The company posted a consolidated revenue of ₹1,135.1 crore in Q2, up 20.6 per cent y-o-y, while its PAT grew 4.7 per cent to ₹53.37 crore

Norwest raises $4 billion fund, lines up 6-8 investments in India

Suresh P Iyengar
Mumbai

Global investment firm Norwest has closed its largest-ever fund of $4 billion, with India emerging as a key investment market alongside the US and Israel. The fund, Norwest 18, takes the firm's total capital under management to $18 billion.

With nearly two decades of presence in India, Norwest is looking to step up investments through larger growth equity deals, platform acquisitions and buyouts, with a focus on industrials, healthcare, consumer and fintech.

ACROSS SECTORS
Niren Shah, MD and Head of Norwest India, told *businessline* that the firm is evaluating six to eight companies at various stages for fresh investments. These include businesses in value-added manufacturing, industrial services, healthcare delivery and fintech. "We are looking at three companies in advanced manufacturing across aerospace, flow control, instrumentation and precision engineering, and another company in electrical and AMC services."

Niren Shah, MD and Head, Norwest India

The firm is also exploring opportunities in pharmaceuticals, chemicals, renewable energy and deep technology. Its latest fund will invest across venture capital and growth equity opportunities, without any predetermined allocation for individual geographies.

Norwest has 41 active portfolio firms across nine Indian cities and nearly $2.5 billion in AUM in the country. It deploys around $250-300 million annually in India, with investment cheques of $30-150 million for growth equity, buyouts and platform investments, and $10-25 million for venture deals.

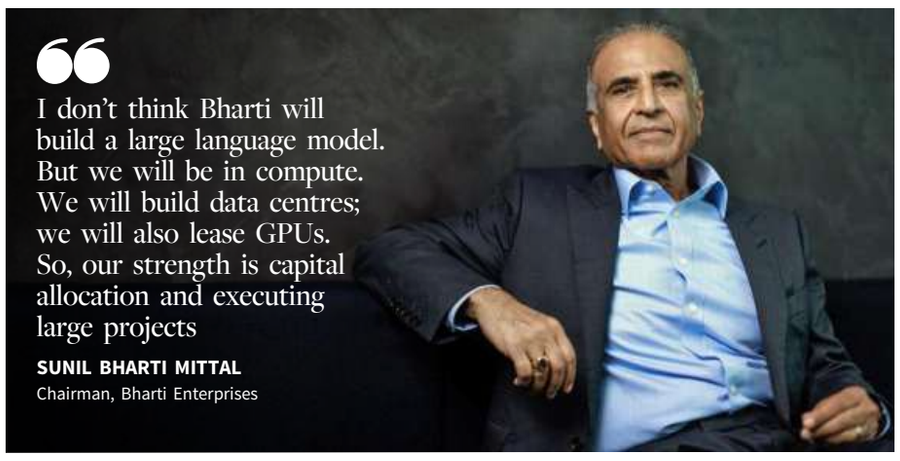

EXIT ROUTE
Norwest has recorded over 30 successful exits in India, including 10 IPOs. Public listings will remain an important exit route, with the firm expecting exit momentum to strengthen over the next few years.

I work more now than I did when I was young, says Sunil Mittal

BHARTI@50. Mittal shares insights on building an institution, succession planning and next growth bets

bl.interview

Thomas K Thomas
S Ronendra Singh
Poornima Joshi
New Delhi

Fifty years ago, Sunil Bharti Mittal began his entrepreneurial journey in Ludhiana with a modest venture manufacturing bicycle components. From those early beginnings, Bharti has grown into one of India's largest business groups, with a presence in telecom, financial services and international markets. The journey was marked by bold bets, setbacks, regulatory battles and reinvention.

As the group completes five decades, Mittal reflects on the lessons of building an institution, the importance of professional management, the role of the next generation and the opportunities he sees in a rapidly changing technological landscape. He looks back while firmly setting his sights on the future.

Edited excerpts:

When you look back at the last 50 years, you had successes but you've also had failures... you went into sectors like retail which didn't really play out well. How do you assess those bets?

If you really look at each one of these ventures that did not work out, one clear thing that emerges is that they were led by foreign partners. A Walmart tie-up, for example, was largely led by Walmart and its team, and the outcomes were pretty average. We were happy to take a copilot or navigate a seat in some of those projects for some reasons — one, we were too busy on the telecom side. If I had more time away from telecom, we would have built at least one of them to be very successful.

It has been a difficult period for telecom, and it is hard to get away from your core business to concentrate on these businesses. So, you let them run it. Each of those businesses has succeeded enormously. Look at retail today. It is a mega multi-billion-dollar business in India, so things have got organised. We were not wrong in our approach that the people will start to go into organised retail, and eventually online. But back then, the attack was relentless from different quarters in terms of blocking Walmart, then finally we said we are also done, and we were happy to be relieved of that.

How do you see the next 10-20 years? Do you see yourself consolidating while diversifying into new areas? Do you see satcom being as transformative as cellphones were to landline connections?

Let me answer your second question first. I think space technologies and space connectivity will be transformational. What we thought were probably limitations of physics are already being pushed. With 100,000 satellites up in LEO (low Earth orbit), and with each satellite having the compute capacity, I think, these will become very powerful networks... of communications.

Airlines were always in satellite mode, but they were using geo-stationary satellites. Now, it's going to be LEOs, which are faster, low-latency, high-throughput, high-capacity, and now you go to British Airways or many other airlines, you get satcom services on the flight.

It's like sitting at home in a fibre environment. Maritime — all boats, ships, container ships — everything will move on to satellite connectivity. Importantly, warfare — the future wars, future defence equipment — will all be coordinated in space. I think the time has gone when you had tanks and guns. There will be cyber wars — drones attacking your security systems, bringing down your electricity, bringing down your transport network, your health network, your banking network. When AI is at work, connectivity through space will become extremely important. I say it is going to be transformative and even I am surprised by the speed of change. This is where India has some advantage but needs to accelerate. We need to have many more launches, many more companies coming into the space sector and India seems to be encouraging that. I am closely watching this space. We are right in the midst of it. On your first question, as a large enterprise now, we will take big bets in the adjacent space to Airtel. So, we are doing data centres: billions of dollars of investment are going to data centres, AI data centres. We have an ambition by 2030 to get to a gigawatt of capacity. That's four times what we have today. Then, a sovereign cloud — I think this is where we are very committed to India's vision of having our own sovereign cloud. And the third is digital finance — financial services to lend loans to our customers. Outside of Airtel, we are looking at opportunities because a lot of people are coming to us for our governance, for our brand, for our capacity to invest. We've just taken a big stake in Haier, the consumer appliance company from China... we are looking at some other opportunities.

You are getting into the AI infrastructure part of it but there is also a requirement for sovereign LLMs...

No. I don't think Bharti will build a large language model. But we will be in compute. We will build data centres; we will also lease GPUs. So, our strength is capital allocation now and executing large projects.

Is there a risk here of what happened in the telecom space, where you created the infrastructure, but the cream was taken away by the Googles and WhatsApps? Now, in AI also, is there a risk that Indian players will be limited to infrastructure?

In the earlier phase, American companies took much away. In the next phase, we hope that the Sarvams and the other Indian players will build this muscle within the country rather than us having to rely on tokens being supplied by Claude or Gemini or Grok or ChatGPT.

What's the game plan with Haier? Is it going to be another Airtel kind of play where you create a large consumer brand?

I think so. I like their business. There's a play on India's consumption in their kitchens and homes, and it's going to grow. They have actually terrific products, and the price points are very good. What I get excited about is their price point. Affordability is very important in this country, and nobody knows it better than the telecom industry... people are so careful with spending.

You are somebody who's gone to the Bombay steel market, sat on the floor and negotiated steel sheet prices, and now you're sitting on the Boards of BT and other large companies. How did those learnings from then play into what they do now?

Those learnings gave you the perseverance and tenacity to face a lot of odds in difficult times and grounded you to the point where today, when you are in the market cap of the top four or five companies in the country, you still stay grounded because you've seen those difficult times. And I was fortunate to deal with foreign companies all my life, either through joint ventures or partnerships or investments. I was always enamoured by how they held their operations professionally. These were real-life lessons in business.

Is letting professionals run the company becoming a bad word now, especially with the Tata episode?

I have actually been inspired by the Tata model, their trusteeship — doing something good for your nation. In the end, business cannot be just a place to have a very easy, wealthy life.

It's a place to make a change, it's a place to serve while also enjoying the fruits of labour. You just can't always be looking at what's in it for you. If the society and the communities that you work in are not happy, you can't have good businesses for future. Therefore, you have to work hard towards serving the society.

On the family succession plans, what's the roadmap ahead?

The next generation, seven of them, are doing their own stuff. They are founders of their own businesses — one is running a restaurant business, one is doing his tech fund plus doing some other stuff — so they are all doing their own things. They are founders of their own businesses, which I don't interfere. But they are coming into Bharti's businesses and we are planning this transition. And I am conscious that in 11 years' time I will be 80, so this is the time now to start the transition.

They have to be good stewards, good custodians of this business and with that I hope they recognise my vision of being trustees of this enterprise for the nation. That role I think they'll play very well.

Problem starts when they have their own ambitions, and we have seen how family assets get split...

We are not a family business. When you are not a family business, there is nothing for you to divide and say this is mine, this is yours, and this is not your business. You happen to be in business. If the management and the professionals succeed, family members succeed.

When you started out in Ludhiana, you had a lot of vision, ambition, energy, enthusiasm... When you wake up today, do you still have the same drive to do something new?

Today, when I wake up, I don't have the same dreams of building something new because there is a heavy degree of burden of the large enterprise. Everything has to go right. The transition has to happen, the technology shifts that are taking place, the space, the AI, these need to be in the right direction. The company must have the right talent pool to ensure that we are capturing these new areas of growth.

When you are young, you are not burdened by all this. You're just dreaming, we just wanted to build everything. I'm sure the next generation would be doing that. But I still have the capacity.

I probably work more now than I used to work when I was young.

India pays record $6.4 billion to import Russian crude oil in October

Rishi Ranjan Kala
New Delhi

India paid a record € 5.8 billion, or roughly $6.43 billion, during October 2026 to import Russia crude oil as closure of the Strait of Hormuz pushed up freight and insurance costs, which coupled with a rising crude oil prices amidst a weak rupee shored up the geopolitically sensitive commodity's value.

According to the Finland-based Centre for Research on Energy and Clean Air (CREA), the world's third largest energy consumer imported a total of €6.4 billion, or more than $7 billion, of Russian hydrocarbons — its highest monthly total in data going back to January 2022.

Crude oil constituted 91 per cent of India's purchases, followed by coal (€333 million) and oil products (€232 million), it added.

"India's imports of Russian crude oil rose in October, up 10 per cent M-o-M. Russian crude imports rose at all three of India's largest importing refineries: Vadinar (up 12 per cent m-o-m), Jamnagar (up 22 per cent m-o-m), and Paradip (up 28 per cent m-o-m). This increase has once again made the Jamnagar refinery the biggest importer of seaborne Russian crude," CREA Authors Luke Wickenden, Daryna Dvornichenko, and Isaac Levi said.

In October, the average price of Russia's Urals-grade crude rose by 13 per cent m-o-m to $101.7 per barrel, the highest monthly average in data going back to October 2021 and more than double the EU and UK price cap of $44.1 per barrel, which took effect on February 1, 2026 and has been capped at the same level under the EU's 21st sanctions package.

US mid-term results may not expedite trade deal as tariff uncertainties persist

Amiti Sen
New Delhi

The outcome of the US mid-term elections is unlikely to accelerate the conclusion of the proposed India-US interim trade agreement (BTA) as President Donald Trump retains executive powers to impose tariffs and New Delhi wants greater clarity on the outcome of Washington's investigation into excess industrial capacity before finalising its tariff commitments, sources said.

"India still needs to assess how the findings of the ongoing US investigation under Section 301 will affect not only its own exports but also that of competing countries, particularly Bangladesh, Vietnam and Cambodia, before settling on the tariff terms of the proposed pact. New Delhi wants to ensure that Indian exporters do not end up facing higher duties than their competitors in the US market, and that remains unchanged," a source tracking the matter told *businessline*.

POLL EFFECT

The Democratic Party's victory in both chambers of the US Congress in the November 3 mid-term elections could increase scrutiny of the Trump administration's trade policies, but is unlikely to immediately constrain its ability to impose tariffs through executive action. "The administration continues to have access to alternative statutory provisions, including Sections 301 and 232, to pursue its trade agenda. India can't drop its guard," the source said.

Moreover, India wants safeguards in the proposed agreement against the possibility of the US invoking its legislation on sanctions against Russia to impose punitive duties on Indian goods in the future. "The Lindsey Graham Sanctioning Russia and Iran Act is already a law and continues to authorise the US President to impose tariffs of up to 100 per cent on imports from the five largest buyers of Russian crude oil and natural gas, subject to specified conditions. Any trade pact must deal with it," the source said.

While the Trump administration issued a 60-day waiver on the application of the Act's duties in October, the possibility of their future use remains a concern for New Delhi. India wants a provision in the trade pact that would allow it to impose counter duties if Washington invokes the legislation to levy additional tariffs on Indian exports, sources said.

The proposed India-US interim agreement had been expected to provide Indian exporters with a reciprocal tariff rate of 18 per cent under the framework announced by the two countries in February. However, the US Supreme Court's February 20 ruling invalidating the reciprocal tariffs imposed under the International Emergency Economic Powers Act (IEEPA) has altered the tariff landscape, necessitating further discussions between the two sides.

The US has since pursued alternative tariff measures, including a Section 301 investigation into alleged forced-labour-related trade practices, under which a 10 per cent tariff has been imposed on Indian imports.

A separate investigation into structural excess capacity and production in manufacturing sectors, initiated in March, covers India and 15 other economies, including China, Vietnam, Bangladesh, Cambodia, Indonesia and the European Union.

Modi, Council of Ministers likely to meet on Nov 18

Press Trust of India
New Delhi

Prime Minister Narendra Modi is likely to meet his entire Council of Ministers on November 18, during which he is expected to discuss a host of issues including governance, reforms and outreach to women and youth on welfare and development schemes.

The meeting is part of the ongoing exercise aimed at helping Ministers better understand the issues faced by the government.

Official sources told *PTI* that the Prime Minister will interact with his entire Council of Ministers soon after his return from the annual India-Asean Summit on the evening of November 18.

A number of issues such as governance, reforms and outreach to women and youth on welfare and development schemes are expected to be discussed at the meeting, the sources said.

Modi is also likely to take feedback from the Ministers and could suggest to them how to go about various aspects of the government.

KERALA INFRASTRUCTURE INVESTMENT FUND BOARD
(A Statutory Body under Finance Department, Government of Kerala)
Finance and Administration Division, website: www.kiifb.org

STATEMENT OF UNAUDITED STANDALONE FINANCIAL RESULTS FOR THE QUARTER AND HALF YEAR ENDED SEPTEMBER 30, 2026

The Unaudited Standalone Financial Results of Kerala Infrastructure Investment Fund Board (KIIFB) for the quarter and half year ended 30th September 2026 (Financial Results) reviewed and recommended by the Audit Committee on 11th November 2026 have been approved by the Board Members at their meeting held on 12th November 2026.

The Financial Results along with the Limited Review Report are available on the website of KIIFB under Compliance Tab at: https://www.kiifb.org/resources.jsp and on the website of BSE at: www.bseindia.com.

The same can also be accessed by scanning the Quick Response Code (QR Code) as provided below:

PEOPLE YOU PROSPER WITH

NOTICE OF POSTAL BALLOT

Notice is hereby given pursuant to the provisions of Section 108, 110 of the Companies Act, 2013, read with Rule 20 and 22 of the Companies (Management and Administration) Rules, 2014, and Regulation 44 and 47 of SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015, General Circular No. 14/2020 dated April 8, 2020, General Circular No. 17/2020 dated April 13, 2020 and General Circular No. 03/2025 dated September 22, 2025 read with other relevant circulars issued by the Ministry of Corporate Affairs ("MCA Circulars") in this regard, Secretarial Standard on General Meetings ("SS-2") issued by the Institute of Company Secretaries of India and any other applicable Laws and Regulations, that the approval of the members of the Company is being sought through a Postal Ballot (only through remote e-voting) for the following businesses to be passed by way of:

Special Business:

1. Change in Designation of Mr. C J George (DIN: 00003132) from Chairman & Managing Director to Chairman & Whole-time Director (Designated as Executive Chairman)
2. Appointment of Mr. Jones George (DIN: 06674021) as Managing Director of the Company
3. Re-appointment of Prof. Sebastian Luckose Morris (DIN: 00037228) as Non-Executive Independent Director of the Company for a second consecutive term of 45 months.
4. Appointment of Mr. Snehil Kumar Singh IAS (DIN: 09584658) as Nominee Director of the Company

All members are hereby informed that:

1. The Company has completed dispatch of Postal Ballot Notice dated October 23, 2026 by e-mail on Thursday, November 12, 2026 to those shareholders who have registered their email id with the Company/RTA or their respective Depository Participants.
2. In line with MCA Circulars, the Postal Ballot Notice has been sent only through electronic mode. Physical copy of the Postal Ballot Notice along with the Postal Ballot forms and pre-paid business reply envelope have not been sent to the members for this Postal Ballot. The shareholders are required to communicate their assent or dissent through the remote e-voting system only.
3. The Company has engaged the services of National Securities Depository Limited (NSDL) for the purpose of providing e-voting facility to all its members.
4. The voting through remote e-voting shall commence on Friday, November 13, 2026 at 9:00 a.m. (IST) and shall end on Saturday, December 12, 2026 at 5:00 p.m. (IST). The e-voting platform would be disabled by NSDL thereafter. Once the vote on a resolution is cast by a Member, he/she shall not be allowed to change it subsequently or cast the vote again.
5. The cut-off date for determining right of voting of members is: Friday, November 06, 2026. A person who is not a member as on the cut-off date should treat the notice for information purposes only.
6. The Company has appointed Mr. Satheesh Kumar N, Practicing Company Secretary, as Scrutinizer for conducting the Postal Ballot/E-voting in a fair and transparent manner.
7. The Postal Ballot Notice has been hosted on the website of the Company viz. www.geojit.com under 'Investor Relation' Section, on the website of the NSDL at www.evoting.nsdl.com and the website of Stock Exchanges where the shares of the Company are listed i.e. BSE Limited (BSE) at www.bseindia.com and National Stock Exchange of India Limited (NSE) at www.nseindia.com.
8. The results of the Postal Ballot along with the Scrutinizer's Report will be announced on or before Tuesday, December 15, 2026 through the website of the Company viz. www.geojit.com and will also be communicated to NSE and BSE.
9. Members whose e-mail addresses are not registered with the depositories can register the same for obtaining login credentials for e-voting for the resolutions proposed in this notice in the following manner:
   - For Physical Shareholders - Please provide necessary details like Folio No., Name of shareholder, scanned copy of the share certificate (front and back), PAN (self-attested scanned copy), AADHAR (self-attested scanned copy) by email to Company email ID: companysecretary@geojit.com or to RTA of the Company at coimbatore@in.mpms.mufg.com;
   - For Demat Shareholders - Please update your email id and mobile no. with your respective Depository Participant (DP).
10. In case of any queries/grievances, you may refer the Frequently Asked Question (FAQ) for shareholders and e-voting user manual for shareholders available at https://www.evoting.nsdl.com or contact NSDL helpdesk or Ms. Pallavi Mhatre (Senior Manager), 301, 3rd Floor, Naman Chambers, G Block, Plot No- C-32, Bandra Kurla Complex, Bandra East, Mumbai- 400051 by sending a request at evoting@nsdl.com or call at 022 – 4886 7000. For other queries, members may contact the Registrar and Transfer Agent at M/s. MUFG Intime India Private Limited, Surya: 35, Mayflower Avenue, Behind Senthil Nagar, Sowripalayam Road, Coimbatore - 641028. (Phone: 0422 4958995; Email: coimbatore@in.mpms.mufg.com).

Advantage India

Trump's poll debacle could help India in trade talks

It will be interesting to see how the Republicans' loss in both Houses will impact US-India trade talks. A dominant view is that President Trump can continue with his trade offensive. It is also believed that Democratic Senators will back a hard bargain with India. For instance, the Lindsey O Graham Sanctioning Russia and Iran Act, 2026, which seeks to punish top buyers of Russian oil such as India with 100 per cent tariffs on their exports to US, was passed with bipartisan support.

To cite another case of continuity, the Biden government retained the Section 232 duties (under the Trade Expansion Act, 1962) on steel and aluminium, imposed by the first Trump administration. The issue of whether the President can exercise untrammelled powers under Section 232 has been a subject of debate, and can come alive in a Democrat-led House. A May 2021 report by the Congressional Research Service (CRS) says that "President Trump's Section 232 tariff actions... raise questions about the proper interpretation of threats to national security on which Section 232 investigations are based." The same scrutiny can extend to the ongoing Section 301 investigations (of the Trade Act, 1974) at a time when the Democrats are bent upon reining in the President. At present, India (among 60 countries) has been identified for using 'forced labour' and slapped with a 10 per cent tariff. Meanwhile, investigations into creation of excess capacity are in progress, while India has been identified as a player in the so-called Great Transshipment Scam, which is about re-routing goods from China. India should persuade Democratic legislators to take a critical view of these steps. The Democrats got a foot into the tariff door, when the US Supreme Court on February 20 struck down Trump's 'reciprocal', country-based tariffs. Oddly, earlier that month, US and India had agreed on a joint statement to reduce these very tariffs from 25 per cent to 18 per cent.

Going forward, there are two aspects to be considered. The first relates to a neglected, but crucial issue of whether any trade pact can now be carved out by leaving out the legislature. The second, of course, pertains to how India should plan its negotiating strategy. With the House turning 'blue', the first question becomes important. The Trade Promotion Authority or 'fast track', a legislative institution whose six year tenure lapsed in 2021, is meant to provide Congressional approval to trade pacts, and has been around for decades. It can be revived, or the demand for the same raised.

According to an April 2015 CRS paper, "the US Constitution assigns express authority over the regulation of foreign trade to Congress." As for the second, India should hold its ground on agriculture, digital access and intellectual property. The February pact need not be a point of reference. However, a balanced offer can be taken forward — one that allows market access without huge sacrifices.

POINT BLANK.

Are India's crypto regulations falling short?

Trading on crypto platforms has shifted to futures and options which are not subject to punitive tax

REUTERS

Crypto assets, led by bitcoin, had been on a dream run in 2020 and 2021, when the massive stimulus provided by countries to fight Covid-19 led to the debasement of almost all currencies. The search for an alternative store for value and hedge against inflation made bitcoin price rally from $5,178 in March 2020 to $64,400 by November 2021, appreciating 11 times in just 20 months. This massive price gain did not escape Indian traders, who plunged headlong into crypto trading, much to the dismay of regulators.

The problem is that no country has framed a viable framework to regulate these assets yet. The crypto trading platforms, which call themselves exchanges, are unregulated entities. Which means investors have no recourse if they lost money there. Then there are other problems with cryptos (excluding stablecoins) such as excessive volatility, absence of inherent value and their misuse for nefarious cross-border payments.

The Centre tackled the problem in two ways. The Union Budget of 2022 introduced punitive tax at the rate of 30 per cent plus surcharge and cess, on gains made through crypto assets. Along with this, 1 per cent TDS was also applied while purchasing cryptos. Two, all service providers dealing with cryptos or virtual digital assets were brought under the anti-money laundering/counter financing of terrorism framework, in March 2023.

While these actions helped control crypto trading activity for a while, it has witnessed a resurgence, in a new avatar in recent years. There is also rising risk of misuse of the cryptos by miscreants.

HOW EFFECTIVE IS CRYPTO TAX?

In the months following the implementation of the crypto tax, turnover in India's popular crypto trading platforms declined sharply, up to 70 per cent in some cases. Many of the smaller platforms were shut down due to inability to comply with the regulatory requirements.

But activity has picked up in recent years with traders now flocking to crypto derivatives. With the crypto tax applicable only on spot transactions in various crypto assets, trading platforms such as Zebpay, WazirX and CoinDCX offer trading in futures and options on cryptos including bitcoin, Etherium, Solana and Tether. The profit or loss booked on these transactions is being treated as business income and no TDS is applied on these transactions, since the Income Tax Act does not mention tax on crypto derivative transactions.

It is reported that futures and option on cryptos now account for more than three-fourths of the trading on domestic exchanges and eyebrows are being raised at the excessive leverage being offered by these platforms to traders, amplifying the risk.

If the objective behind the crypto tax was to dissuade trading activity in these assets, then it has not been effective as the stakeholders have found a way to by-pass the rules.

MONEY LAUNDERING RISKS

Crypto assets, which operate in a regulatory vacuum and facilitate cross-border payments with great ease, have frequently been misused for money laundering, drug trafficking and terror activities.

Several Indian crypto trading platforms including WazirX and ZebPay have faced investigations by the Enforcement Directorate since 2022, for cases relating to FEMA violations.

In June 2026, the ED had found that several Bengaluru-based entities were facilitating cross-border transactions using crypto assets. They were found offering services including buying, selling and swapping of cryptos with fiat money in violation of RBI's regulations. In November 2026, the ED had conducted searches at locations associated with crypto trading platforms CoinDCX and Delta Exchange for complaints of unauthorised cross-border transactions.

STRANGE DISPERSION OF USERS

It is also quite surprising that more traders on crypto trading platforms are coming from tier 2 and 3 cities. A recent report in *businessline* shows that districts such as 24 Parganas North in West Bengal, Medchal Alkajgiri in Telangana, Kokrajhar in Assam and Kakinada in Andhra Pradesh rank among the top 10 districts in terms of transaction value, which is subject to TDS of 1 per cent, in FY25 and FY26. North 24 Paraganas had 33,000 users who had transacted in cryptos worth ₹2,000 crore in FY26. This is higher than the 19,100 users in Chennai, who had transaction value of ₹600 crore.

There is a high risk of misuse of these platforms to buy cryptos for nefarious cross-border payments

This trend is confirmed by the crypto platforms too. Zebpay's report on its performance in the first half of 2026 reveals that tier-2 and tier-3 cities together accounted for around 62 per cent of all new registrations; with tier-3 cities contributing around 21 per cent. It is a trifle strange that traders from small towns of India are buying and selling on these platforms and may need a closer look.

CRYPTO PLATFORMS UNDER PMLA

The Indian regulators are aware of the risks posed by crypto trading platforms. The RBI has been steadfast in its stance about not granting legal status to private cryptocurrencies. But an outright ban is also not a good solution since it will only make the traders go underground, and shift to overseas platforms.

The Centre had therefore tried to increase surveillance on crypto platforms by requiring them to register with Financial Intelligence Unit, India. The platforms have to comply with the PMLA Act, 2002 in following KYC procedures, reporting and record keeping.

The FIU, on its part, has been taking regular actions against non-complaint entities, conducting raids and investigations in some instances. It had also ordered 53 crypto platforms to be taken down due to non-compliance with the Act, though some of them have become compliant and re-registered with it.

TAX CHANGES

Given the way the crypto trading is evolving in India, it is only right that the Centre extends the 30 per cent tax on the gains made in spot crypto transactions to crypto futures and options too. With the risk taken by traders in crypto derivatives being far higher than equity derivatives, it is only right that they are deterred by high tax rates.

The Centre had collected just ₹512 crore, ₹363 crore and ₹221 crore from crypto transactions in FY25, FY24 and FY23, respectively. These low collections appear to be primarily due to traders exploiting the tax arbitrage.

As far as the risk of cross-border transactions go, the Centre should revive its engagement with other countries to arrive at uniform regulations for cryptos; the Trump administration has brought these efforts to a standstill, though. Unilateral action in one country is unlikely to arrest the misuse of these assets.

US mid-terms, a mandate against crony capitalism

When wealth inequality reaches extreme levels, it often triggers a structural shift in political, social, and economic policy

Jamal Mecklai

The essence of America is alive and well — pure, loving, inclusive, excited, delighted. The results of the mid-term elections confirmed that the past several years, when American spirit was almost drowned by a deformed capitalism, were, indeed, a bad dream. Tragically, many, many people both in the US and across the world have suffered.

While Trump and his cronies will certainly have to pay for (some of) their sins, the real job is to rebuild the US economy to where it delivers value across the board and not merely to the extremely wealthy. Equally, and critically, the new political dispensation needs to work actively to rebuild America's relationships in the world.

The patron saint of this New American Dream is, of course, Senator Bernie Sanders, who has been preaching this truly American gospel of fairness and human sensitivity for decades now. He is joined now by an extraordinary panoply of diverse leaders — women, Native Americans, Latinos (the first Latino governor of California), Muslims (Michigan now has one Muslim and one Jewish senator), the first openly gay senator, the first black majority leader of the US House of Representatives, and, of course, dozens of smart, committed Americans of every race and creed. In other words, the American dream is loud and clear again!

All over the world, people are looking ahead to a different, more optimistic future. To be sure, Trump is still around for a couple of years and certain to continue provoke people and markets, so it's impossible — as always — to call even the direction of markets.

The AI story, which had already become uncertain over the past month or so with even the Magnificent 7 reporting increasing difficulty of raising capital, could even crash and burn with the US electorate voting strongly against the data centre build-outs.

A SLAP TO SILICON VALLEY

The election was a stinging slap down to Silicon Valley (and finance) billionaires, who wasted huge amounts of money — Elon Musk spent (reportedly) around $600 million himself supporting candidates, all of whom lost. Americans (finally) recognise that capitalism has been ruthlessly corrupted, cornered by the well-connected, many of whom sometimes end up paying zero tax and, almost across the board, pay a lower tax rate than their secretaries.

But the wheel has been turning for some time. Historical data show that when wealth inequality reaches extreme levels, it often triggers a structural shift in political, social, and economic policy, bringing about the end of a long-term cycle. If this cycle is indeed ending, specific structural changes should be visible, and we are seeing these shifts manifest globally, as in the death of "pure" globalisation, acceptance of permanent fiscal interventions, and the rise of populist politics

MONEY LOST. Musk shown his place

REUTERS

Fiscal change is already in the air, and even though California's billionaire tax was defeated, Zohran Mamdani in New York — a shimmering forerunner to the mid-terms — has taken the lead, showing how a reasonable tax on the top end can be used to provide meaningful support to "normal" Americans to enhance growth.

And as if in concert with the US elections, Gadi Eisenkot in Israel is the frontrunner in forming the next government which will — and wonders never cease — most certainly include the Arab parties. This amounts to pushing Netanyahu off the main stage; hopefully, he will face trial for corruption and his crimes against the Palestinians.

In any case, the blank cheque that Israel had from America will now be substantially modified. Of course, despite this new dawn awakening the world, there are still several ageing autocrats/dictators who are misgoverning their countries, and it is unrealistic to expect that all of them will fall out of favour simultaneously, but the dominos are certainly wobbling.

Already, dozens of newer, younger leaders with much greater sensitivity and a shared humanistic vision are rising across the world, including the so-called South. And given that the wheel has started accelerating in America, it clear that a new political/economic cycle has begun.

Turbulence on ground

Differences over distribution of flight slots, airline networks, terminal capacity and passenger convenience between the two airports of Mumbai have surfaced rather late, creating uncertainty for airlines and travellers alike. A milestone infrastructure as Navi Mumbai International Airport risks becoming an institutional embarrassment. Surely, the operational, commercial and passenger-related implications of such a transition ought to have been anticipated and resolved among stakeholders during the more than two years of construction of the new airport. The priority is for a time-bound resolution under the aegis of the Civil Aviation Ministry.

Bridging the digital divide

Apropos, 'AI shouldn't lead to educational inequality' (November 12). AI should empower every student, not widen educational inequalities. As digital access gradually becomes a basic right, bridging the digital divide must become a governance priority. AI can strengthen students' understanding, reasoning, critical thinking and ability to apply knowledge, but only when access to technology is equitable. Digital infrastructure and affordable connectivity must reach rural and remote communities, not remain concentrated in cities and metropolitan centres. No student should be left behind because of geography or economic disadvantage. The real success of AI in education lies in making opportunities accessible to all.

PV Prakash
Mumbai

Mind the AI gap

Inequality in access to computers, internet and quality teachers has existed for decades. Generative AI, however, could create a deeper divide. A child who learns to use AI well can access explanations, feedback and learning support almost instantly, while another may remain dependent on classroom resources. Parents' ability to understand and support children's use of these tools at home could widen this gap further. This requires more than government action. Technology companies should contribute through CSR, teacher training and partnerships with government schools.

GST policy shift

Services must be included in inverted duty refund

Aditya Nadkarni

An inverted duty structure arises when tax rates on inputs exceed those on output supplies, leading to accumulated input tax credit (ITC).

Section 54(3) of the CGST Act 2017 permits refunds in specified cases, subject to exclusions, including nil-rated or wholly exempt output supplies. For sectors such as footwear, textiles, fertilizers and renewable-energy equipment, refund eligibility affects embedded tax costs and working capital locked in the electronic credit ledger.

Rule 89(5) of the CGST Rules 2017 prescribes the maximum refund formula for inverted-duty cases. Its definition of "Net ITC" included input goods but excluded input services, while the deductible output tax related to the entire inverted-rated turnover. Businesses argued that this asymmetry reduced refunds and stranded service-related credits. Revenue authorities countered that clause (ii) of the proviso to Section 54(3) uses "inputs", statutorily defined as goods other than capital goods, permitting the narrower treatment.

Conflicting High Court decisions brought the dispute before the Supreme Court. The Gujarat High Court in *VKC Footsteps India Pvt. Ltd. vs. Union of India* rejected the exclusion, while the Madras High Court *in Tvl. Transtonnelstroy Afcons Joint Venture vs. Union of India* upheld it.

In *Union of India vs. VKC Footsteps India Pvt. Ltd.*, the Supreme Court upheld Rule 89(5), setting aside the Gujarat judgment and affirming the Madras view. Section 54(3), it held, does not grant an unrestricted refund of every component of unutilized ITC; the statutory wording permits a distinction between input goods and services.

Nevertheless, the Court acknowledged the formula's anomalies. It declined to invalidate a fiscal rule merely for producing inequitable results, leaving policy choices to the executive and legislature. It strongly urged the GST Council to reconsider the formula, providing a focal point for subsequent advocacy.

GST REFUNDS. Beneficial tweaks

TRADE, INDUSTRY VIEW

Industry representations emphasised that modern manufacturing relies on services such as freight, warehousing, job-work, testing, design, rentals and maintenance. Excluding their ITC from refunds undermines tax neutrality and domestic value addition.

A partial response followed the 47th GST Council meeting. Notification No. 14/2022–Central Tax amended Rule 89(5) from 5 July 2022, adjusting output tax by the ratio of Net ITC to credit on inputs and input services. CBIC clarified that the revised formula applies to applications filed on or after that date. However, input services remained outside Net ITC, leaving the central controversy unresolved.

At its 57th meeting last month, the GST Council recommended amending clause (ii) of the proviso to Section 54(3) and Rule 89(5) to permit inverted-duty refunds of accumulated ITC on input services and capital goods.

The ensuing Rule 89(5) amendment, *vide* Notification No. 5/2026-Central Tax dated 26 October 2026, extends refund benefits to input service ITC availed on or after November 1, 2026. For capital goods, eligibility covers ITC availed on or after April 1, 2027 and spread over 60 months. Capital goods ITC refunds also extend to zero-rated supplies. Claims must include a declaration that the goods have not been sold, disposed of or permanently removed from the business, remain eligible for ITC and are used for zero-rated or inverted-rated supplies.

However, clause (ii) of the proviso to Section 54(3) remains unamended. Aligning the parent legislation with the revised rule (can be expected in next Union Budget) remains necessary to give the policy shift a consistent statutory foundation.

The 57th GST Council recommendation and ensuing amendment mark a welcome shift toward neutrality, liquidity and competitiveness. Success will depend on legislative alignment and transitional arrangements that avoid creating fresh stranded credits for businesses.

Why insurance agents matter

Digital insurance will grow, but universal coverage depends on human agency. Commission reform must recognise this fact

CASPARUS KROMHOUT

India has set itself an ambitious objective: Insurance for All by 2047. Achieving it will require more than innovative products, greater digitisation and competitive pricing. It will require insurance to reach millions of households that remain inadequately protected, including customers for whom insurance remains a product that is explained, advised, and sold rather than simply bought.

That distinction matters when considering the economics of insurance distribution.

FY2024-25 life insurance industry data shows a striking picture. Agency accounted for 1.96 crore policies, or 74.31 per cent of all policies sold, while supplying 47.48 per cent of premium. Bancassurance, by comparison, contributed 14.80 per cent of policies, corporate agents 3.23 per cent, brokers 1.75 per cent and direct marketing 2.87 per cent.

And online? Just 4.38 lakh policies, representing only 1.66 per cent of policies sold. Online accounted for 1.95 per cent of premium.

These numbers should be an important consideration in any discussion about reducing agency commissions.

HUMAN-LED BUSINESS

Digital channels will become increasingly important. Consumers today research products online, compare options digitally and anticipate seamless servicing through apps and websites. But digital enablement should not be confused with digital distribution.

The fact that online channels account for only 1.66 per cent of policies suggests that, for most Indian consumers, life insurance is still not an entirely self-directed purchase. That should hardly surprise us.

Life insurance is a long-duration financial commitment involving mortality protection, family responsibilities, savings objectives and decisions whose benefits may not become apparent for decades. Unlike many financial products, its value proposition frequently has to be explained before a customer recognises the need for it.

An agent therefore does considerably more than close a transaction.

The agent identifies a prospect, creates awareness of protection needs, explains the product, answers questions, assists with documentation and medical requirements and, importantly, often maintains the relationship after the policy has been issued.

Life insurance industry premium channel-wise (FY24-25)

Channel	Policies	% of policies	Premium (₹ cr)	% of premium	Avg premium	Avg sum assured
Agency	1,95,75,620	74.31	56,475	47.48	28,850	5,81,058
Bancassurance	38,99,708	14.80	42,914	36.08	1,10,044	18,08,973
Corporate agents	8,49,771	3.23	4,764	4.00	56,056	11,66,086
Brokers	4,60,886	1.75	3,093	2.60	67,107	50,66,682
Direct marketing	7,55,176	2.87	6,659	5.60	88,183	24,51,431
Online	4,38,003	1.66	2,322	1.95	53,021	49,66,364
Others	3,62,955	1.38	2,723	2.29	75,034	14,87,317
Total	2,63,42,119	100.00	1,18,951	100.00	45,156	9,99,216

In smaller towns and less digitally engaged customer segments, that human interface matters even more.

AGENTS VS ONLINE

Perhaps the most important comparison in the industry data is a simple one: Agency: 74.31 per cent of policies. Online: 1.66 per cent. This is not an argument against technology. Quite the opposite. Technology should make agents more productive, improve underwriting, simplify onboarding, reduce servicing costs and give customers greater control.

But it does suggest that assuming physical distribution can be rapidly replaced by online acquisition is premature. The data also reveals another important dimension.

The average premium through the agency channel was only ₹28,850, compared with ₹1.10 lakh for bancassurance, ₹88,183 for direct marketing and ₹53,021 for online business. That suggests an important structural role for agents: they are handling a very large volume of relatively small-ticket policies.

This is precisely the terrain that matters if the industry wants to broaden insurance penetration rather than merely increase premium volumes.

ECONOMICS OF LAST MILE

There is, understandably, a strong case for keeping insurance costs reasonable and ensuring customers receive value for money.

But there is another side to the equation. Distribution has a cost.

An agent reaching a customer in a Tier III town or rural market incurs time and expense in prospecting, travelling, educating customers, completing transactions and maintaining relationships. A significant proportion of that effort occurs before a policy is ever issued.

If compensation falls below a level where this activity remains economically worthwhile, the impact may not initially show up in industry profitability. It could show up elsewhere: fewer active agents, reduced prospecting, concentration on more affluent customers and declining willingness to pursue small-ticket business. That would be precisely the opposite of what Insurance for All is intended to achieve.

Indeed, the Master Circular on Expenses of Management, including Commission, of Insurers, 2024 itself acknowledges that insurance agents and intermediaries "perform a crucial role in the distribution of insurance products" and states that compensation should be commensurate with the effort required to acquire and sustain that business.

The regulatory framework also requires insurers to have board-approved commission policies focused on fairness, transparency, and alignment with customer needs and efficient, cost-effective distribution.

The debate, therefore, need not be framed as consumer interest versus intermediary interest. The real objective should be sustainable distribution economics aligned with consumer outcomes.

DISTRIBUTIONS COST

India's experience across financial services demonstrates that inclusion rarely happens simply because a product becomes available. Customers must be reached.

Insurance faces an additional challenge because protection is often a low-priority purchase. The financial consequences of being uninsured appear distant until an adverse event occurs.

The industry therefore competes not simply against other insurers but against consumer inertia. Agents close that gap.

The sum-assured numbers also offer an interesting insight. Agency business had an average sum assured of about ₹5.81 lakh, against an industry average of around ₹9.99 lakh. Online policies had an average sum assured approaching ₹49.66 lakh.

The data does not, by itself, tell us the income profile or geography of these customers, so one should avoid overstating the conclusion. But the combination of a much lower average premium, a substantially lower sum assured, and very high policy volumes is consistent with an agency serving a wider small-ticket market than online distribution.

And that is exactly the segment that India must penetrate more deeply to achieve universal insurance coverage.

The future of insurance coverage distribution is unlikely to be purely physical or purely digital. It will be phygital.

The winning model could be an agent equipped with technology: digital prospecting tools, instant illustration and quotation, paperless KYC, automated underwriting, electronic issuance, CRM-based renewal reminders and app-based customer servicing.

In such a model, technology does not eliminate the agent. It lowers the agent's cost of serving the customer and increases productivity. That distinction should inform policy.

If technology can reduce administrative friction and operating costs, those efficiencies should absolutely benefit customers. But assuming that an online channel representing 1.66 per cent of policies today can compensate quickly for a weakening of the channel responsible for 74.31 per cent would be a considerable leap of faith.

REWARDING OUTCOMES

None of this is an argument for unconstrained commissions. Compensation structures should encourage the right behaviour.

Persistency, suitability, customer servicing, grievance experience and long-term policyholder outcomes can increasingly form part of the economics of distribution. Poor-quality selling should not be rewarded merely because a policy has been issued.

The regulatory principle itself is instructive: intermediary compensation should be fair and reasonable, aligned with customer needs and commensurate with the effort required to acquire and sustain business.

That provides a more constructive direction than simply asking whether commissions should be higher or lower.

The better question is: What distribution economics will encourage millions of people to keep buying insurance from customers who are currently underinsured or uninsured?

The future of insurance coverage distribution is unlikely to be purely physical or purely digital. It will be phygital. The winning model could be an agent equipped with technology

Orascom talks with Hutch for further stake fail

Egypt-based Orascom Telecom Holding's attempt to increase its presence in the booming Indian cellular market has failed, with its negotiations for merger with Hutchison Telecom International Ltd ending without success.

Bajaj readies for comeback in scooter segment

Bajaj Auto is all set to make a comeback in the scooter segment with a new portfolio of vehicles, the first of which, the Bajaj Kristal, will be launched in January 2007. The company's comeback into the segment, which is currently showing signs of revival after a long gap, will be on a strong technology platform, Mr Rajiv Bajaj, Managing Director, told Business Line.

Banks propose fee for pass books

Banks have appealed to the Reserve Bank of India to relax its recent stipulation making issue of passbooks compulsory and free-of cost to savings bank account holders. Some banks, particularly large private and foreign banks, are of the view that this adds to their cost. While public sector banks issue passbooks, large private and foreign banks issue only statements.

What's flashing warning signs for Fed in latest US CPI report

Julia Fanzeres

The hotter-than-expected October inflation report showed price pressures for US consumers remain broad and unremitting, raising worries among some Federal Reserve officials that they may need to act more aggressively to tame inflation.

Policymakers had been hopeful that some important factors pushing prices higher, including the oil supply shock and services costs, would be easing by now. Instead, the consumer price index excluding the volatile food and energy categories rose 0.3 per cent and topped forecasts for a third straight month.

Chicago Fed President Austan Goolsbee called the October data "borderline disturbing," and Governor Christopher Waller warned prior to the CPI figures that officials may need to raise rates by a half percentage point at their December meeting.

The report showed signs the surge in fuel prices due to conflict in the Middle East is spreading to other parts of household budgets. Near-record diesel prices have made shipping more expensive, and inflation in services remains firm. Meantime, prices of some goods most exposed to tariffs continue to rise.

The surge in the cost of petroleum products following the war in Iran

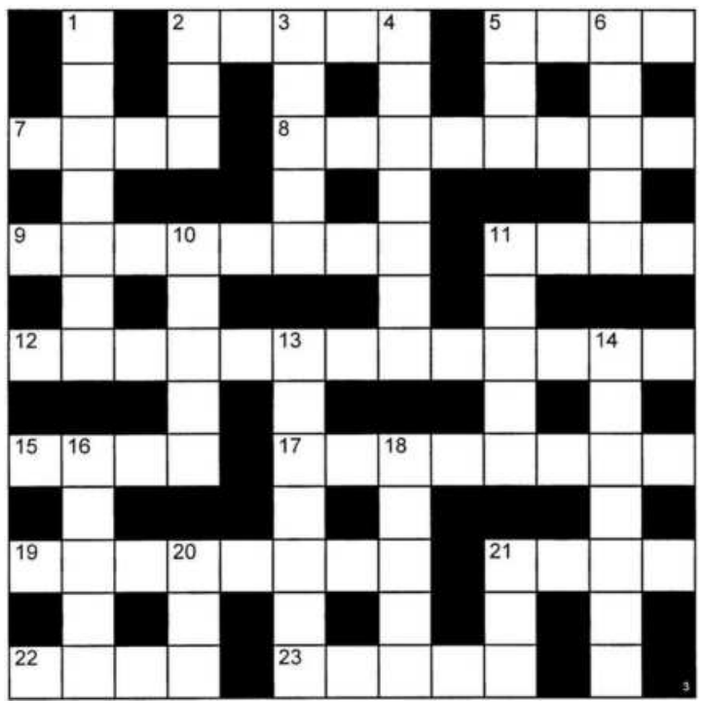

US ECONOMY. Inflation bites REUTERS

extends beyond the gas pump for American consumers. Food is one example, with grocery prices rising last month by the most since April. Farm equipment runs on diesel, and research suggests transportation alone accounts for roughly 9 per cent of retail food costs. The cost of intracity transportation — or fares for local transit, taxis and ride-hailing services — posted the biggest monthly increase since 2020, while airfares and the costs of delivery services rose as well. High shipping costs risk pushing up prices for consumer goods, too.

The CPI report "really underlined the pass-through from higher energy prices," said Michael Pearce, chief US economist at Oxford Economics. "We knew it was going to be relatively ugly just because of the lag involved."

Households may put off spending on furniture, electronics and other discretionary items, but there is little flexibility when it comes to groceries, utilities and transportation. BLOOMBERG

Bajaj Finance jumps over 3% after mega QIP launch

New Delhi: Shares of Bajaj Finance on Thursday climbed over 3 per cent after the non-bank lender announced the launch of a ₹11,700-crore qualified institutional placement (QIP) to fund business growth. The stock advanced 3.32 per cent to settle at ₹1,110.7 on the BSE. During the day, it jumped 3.98 per cent to ₹1,117.8. At the NSE, the stock closed 3.35 per cent higher at ₹1,115. The stock was the biggest gainer among the Sensex firms. A Special Committee of the board approved the floor price at ₹992.25 per equity share, based on the pricing formula as prescribed under the SEBI ICDR Regulations, the NBFC said. PTI

SBI MF launches defence ETF fund of funds

Mumbai: SBI Mutual Fund has launched the SBI BSE India Defence ETF FOF, an open-ended fund of funds scheme investing in the SBI BSE India Defence ETF. The Offer opens for subscription from November 16 to 30. It will invest a minimum of 95 per cent of its assets in units of the SBI BSE India Defence ETF, with the remainder held in government securities maturing up to one year, T-Bills, triparty repo or units of liquid MFs. During the NFO period, the minimum application amount is ₹5,000, with additional purchases of ₹1,000 and multiples of ₹1 thereafter. An exit load of 1 per cent applies for redemptions within 15 days of allotment; no exit load applies after that. OUR BUREAU

India overtakes Taiwan to reclaim 5th spot among top stock markets

GREEN SHOOTS. Foreign inflows, stronger earnings and lower crude oil prices lift Indian equities

Our Bureau
Mumbai

India has regained its position as the world's fifth-largest stock market, with the value of its listed equities rising to $5.4 trillion and overtaking Taiwan after a sharp rebound in domestic shares. The US, China, Japan and Hong Kong remain the four largest markets, according to *Bloomberg* data.

MARKET CAPITALISATION

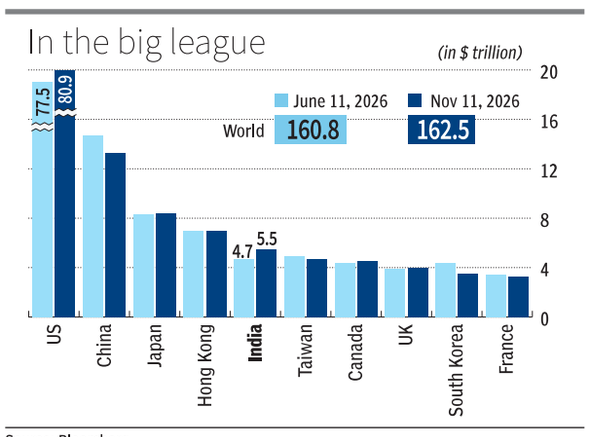

India's market capitalisation has increased by around $640 billion since late October, as benchmark indices extended their gains. The Nifty 50 closed at 25,255.05 on Wednesday, its highest level in more than eight months, and has risen 9.55 per cent so far in November. The Sensex closed at 81,879.40, up 0.95 per cent.

FPIS TURN AGGRESSIVE

A sharp reversal in foreign investment flows has been a major driver of the recovery. Foreign portfolio investors (FPIs) bought a net ₹65,735 crore worth of Indian equities in November through November 11, while domestic institutional investors (DIIs) sold shares worth ₹40,504 crore, according to provisional exchange data. This marks a reversal from October, when foreign investors sold a net ₹45,162 crore of equities.

"The tug of war between the FIIs and DIIs till November saw the FIIs on the sell side and DIIs on the buy side. Now the positions have been completely reversed with FIIs turning aggressive buyers and DIIs turning into consistent sellers," said VK Vijayakumar, Chief Investment Strategist at Geojit Investments.

The shift in flows has coincided with a correction in AI-linked markets such as Taiwan and South Korea, which had earlier benefited from strong investor demand for semiconductor companies amid the global AI rally, allowing them to move ahead of India in market capitalisation rankings.

Source: Bloomberg

However, concerns over spending on AI infrastructure and the profitability of technology companies have triggered a pullback. Foreign investors withdrew $30.68 billion from Taiwanese equities and $14.59 billion from South Korean stocks in October, according to LSEG data.

RECOVERY SUPPORT

India also faced foreign selling over the past few months, with expensive valuations, higher crude oil prices and relatively slower earnings growth weighing on sentiment. The latest recovery has been supported by better-than-expected Q2 results, with earnings of 35 Nifty 50 companies that had reported results growing 22 per cent year-on-year. Falling crude oil prices have provided another tailwind.

Bank Nifty hogs limelight, as Nifty, Sensex rally tires out

Anupama Ghosh
Mumbai

The benchmark indices marked time on Thursday, holding on to marginal gains as the nine-session rally ran into profit-booking at elevated levels, even as the broader market continued to outperform. The day's most striking move came from the realty sector, which surged 4.5 per cent.

The BSE Sensex closed at 81,911.01, up 31.61 points or 0.04 per cent, after trading between 81,576.15 and 82,325.61. The NSE Nifty 50 settled at 25,299.35, gaining 44.30 points or 0.18 per cent.

Bank Nifty was the standout, closing at 61,518.50, up 726.1 points or 1.19 per cent, marking its eighth consecutive session of gains. The broader markets outperformed the benchmarks, with the Nifty Midcap 100 rising around 0.85 per cent and the Nifty Smallcap 100 advancing approximately 1.12 per cent. "After the recent sharp rally, some consolidation and sectoral rotation appear healthy," said Ajit Mishra, SVP–Research, Religare Broking.

Besides realty, Media gained 2.46 per cent, Insurance 2.9 per cent and PSU Banks 1.51 per cent. However, Auto fell over 1 per cent, FMCG 0.74 per cent and IT 0.41 per cent.

GAINERS AND LOSERS

Among Nifty 50 stocks, HDFC Life led gainers at 3.91 per cent to ₹596, followed by Shriram Finance at 3.51 per cent to ₹1,003.15, Bajaj Finance at 3.06 per cent to ₹1,111.8, SBI Life at 2.61 per cent to ₹1,813.2, and Bajaj Finserv at 2.27 per cent to ₹1,886.9.

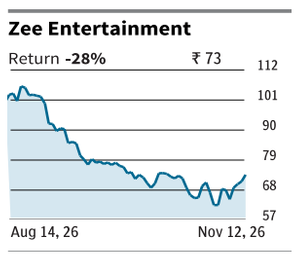

M&M was the top loser, falling 2.51 per cent to ₹3,378, followed by Nestlé India down 2.11 per cent to ₹1,260.8 and Maruti declining 1.84 per cent to ₹12,942.

Zee board okays ₹600-cr buyback

Vallari Sanzgiri
Mumbai

Zee Entertainment Enterprises' board has approved a buyback of equity shares aggregating up to ₹600 crore to enhance long-term shareholder value and strengthen investor confidence.

The board on Thursday approved a proposal to buy back up to 6.59 crore shares, at ₹91 a share through the tender offer route. The buyback represents 6.86 per cent of the company's total paid-up equity share capital. The board also noted that the promoters and members of the promoter group did not intend to participate in the proposed buyback. "Zee remains on a firm growth trajectory, and the Board's approval of the share buyback further reflects the company's immense potential and robust capabilities to capitalise on the opportunities ahead," said Punit Goenka, CEO, Zee Entertainment.

Responding to the development, Shriram Subramanian, Founder and MD of inGovern proxy firm, pointed out a dichotomy between Zee's latest buyback announcement and its earlier warrants issuance.

"While the price was at a 20-year low, there is a dichotomy here. On the one hand, the company made a case to raise capital for growth and allot convertible warrants to its promoter group. Now, it is claiming excess capital and doing a buy-back of shares," said Subramanian, adding that out of ₹736 crore raised from promoters (25 per cent of warrant issue price), ₹600 crore is proposed to be distributed under the proposed buyback.

India ETFs draw ₹35,120 crore in Q3 as large-caps, precious metals lead inflows

Our Bureau
Mumbai

India-domiciled exchange-traded funds (ETFs) attracted net inflows of ₹35,120 crore in the September quarter, up from ₹33,380 crore in the previous quarter, as investors continued to favour large-cap equities and renewed their allocations to precious metals, according to a Morningstar report.

Equity ETFs remained the biggest contributor, attracting ₹23,500 crore during the quarter, while real-asset ETFs, led by precious metals, drew ₹12,130 crore, up from ₹7,270 crore in the June quarter.

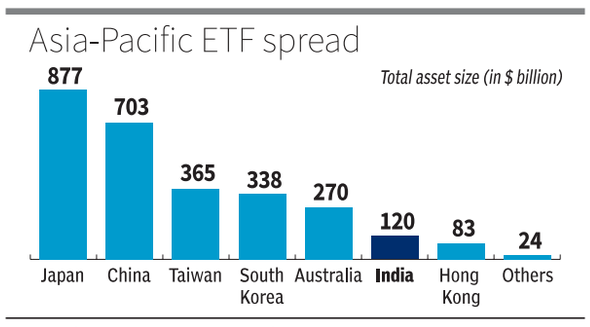

Large-cap ETFs accounted for the bulk of equity inflows, attracting ₹21,880 crore. Morningstar attributed the concentration partly to continued allocations to broad-market index products, supported by a wider range of large-cap ETF offerings and fewer choices in the mid- and small-cap segments.

Nippon India ETF Nifty 50 BeES received the highest inflows among individual funds at ₹3,680 crore. SBI Nifty 50 ETF followed with ₹3,360 crore, while ICICI Prudential Nifty 50 ETF attracted ₹2,830 crore.

Technology ETFs recorded the largest outflows among equity segments at ₹490 crore, despite a recovery in the Nifty IT index. Infrastructure ETFs also saw outflows of ₹190 crore.

TECH SHIFT

The divergence comes at a time of global selling in technology and AI-linked stocks, even as Indian technology services companies have seen relatively better investor interest. Foreign portfolio investors (FPIs), meanwhile, returned as net buyers of Indian equities in November after two consecutive months of withdrawals, with the global technology sell-off among the factors supporting the shift towards Indian markets.

Note: As of Sept 30, 2026 Source: Morningstar

India's ETF assets under management edged up to a record ₹11.5 lakh crore at the end of September from ₹11.45 lakh crore in June. Morningstar said that weaker market performance limited the increase in assets despite positive net flows.

ETFs across the Asia-Pacific region attracted $130 billion in net inflows in the September quarter, reversing two consecutive quarters of net outflows. China-domiciled ETFs accounted for nearly 60 per cent of regional inflows, while equity ETFs made up 73 per cent of the total.

Large-cap equity products remained a key driver across the region, ranking among the top two categories by net flows in India, Australia, China, Japan and Taiwan.

Debt-oriented ETFs continued to face pressure, with medium-to-long-duration funds recording outflows of ₹810 crore. Morningstar said the redemptions from longer-duration fixed-income funds to the Reserve Bank of India's neutral-to-hawkish policy stance, which reduced investor appetite for duration risk. Inflows into capital preservation funds also slowed to ₹680 crore from ₹2,440 crore.

Within financial services ETFs, there was also a shift towards private bank funds and away from broader banking indices. Private bank ETFs attracted ₹1,300 crore, following inflows of ₹1,610 crore in the previous quarter. In contrast, broad banking index ETFs saw outflows of ₹870 crore in the September quarter, taking their YTD withdrawals to ₹4,150 crore.

TODAY'S PICK.

SBI Life Insurance (₹1,820): BUY

Akhil Nallamuthu
bl. research bureau

SBI Life Insurance's stock has been rallying since the beginning of the month. On Thursday, it broke above resistance at ₹1,790. The scrip also surpassed a trendline barrier, indicating that the trend is turning positive. The stock is likely to extend the rally from the current level. But after reaching ₹1,900, it could consolidate or correct slightly to ₹1,850.

However, we expect the stock to eventually break out of ₹1,900 and rise to ₹1,980. Therefore, traders can buy now at ₹1,820 and accumulate on a dip to ₹1,790. Place a stop-loss at ₹1,725. When the price touches ₹1,900, raise the stop-loss to ₹1,840. On a rally to ₹1,950, tighten the stop-loss to ₹1,900. Book profits at ₹1,980.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading

Franklin Templeton rolls out first outbound fund from GIFT City

Our Bureau
Ahmedabad

Avinash Satwalekar, President, Franklin Templeton India

Franklin Templeton India launched its first outbound investment fund through Gujarat International Finance Tec-City (GIFT City), offering Indian investors access to the US equity through an actively managed investment strategy focused on companies in the S&P 500 index.

The Franklin US Equity IFSC Fund is structured as a feeder fund that will invest in the FTGF Putnam US Research Fund, an actively managed US equity fund with AUM of more than $10.6 billion as of September 30, according to an official release.

The minimum investment is $5,000, with additional investments permitted in multiples of $500.

INVESTMENT STRATEGY

The fund's initial offer period runs from November 11 to December 11. The master fund is managed by Putnam Investments, a Franklin Templeton company, through Putnam Advisory Company LLC.It has a track record of more than three decades and follows a research-led approach based on fundamental stock selection and risk management. "We are pleased to expand our offering from GIFT City with the launch of the Franklin US Equity IFSC Fund, our outbound investment solution," said Avinash Satwalekar, President, Franklin Templeton India.

The fund provides exposure to leading US companies through an actively managed, research-driven strategy that seeks to generate returns primarily through stock selection rather than broad sector calls, he added.

Standard Chartered unveils wealth funds from GIFT City

Our Bureau
Mumbai

Standard Chartered has launched its Signature CIO Funds from Gujarat International Finance Tec-City (GIFT City), marking its first wealth management offerings from the centre. The suite comprises four multi-asset funds based on the bank's Chief Investment Office's investment strategies.

Developed in partnership with Amundi Asset Management and SBI Funds International (IFSC) Ltd, the funds invest across global equities, bonds, commodities, liquid alternatives and cash, catering to different risk appetites and investment objectives.

The launch follows approval from the International Financial Services Centres Authority to distribute capital market products from GIFT City. It offered only corporate and institutional banking services from there.

ECB fundraising doubles in H1, aided by RBI swap facility

MOBILISING FUNDS. Public sector undertakings raised 38 per cent of total funds

K Ram Kumar
Mumbai

ECBs - External commercial borrowings

Resources mobilised by India Inc *via* the external commercial borrowing (ECB) route more than doubled to $37.4475 billion in the first half of FY27, up from $18.5267 billion in the year-ago period, as state-owned entities stepped up fundraising due to the RBI's concessional forex swap facility, in place since June 5, 2026.

For example, of the $7.0451 billion mopped up by Indian companies in September 2026, *via* ECBs, public sector undertakings (PSUs) as a single bloc accounted for about 38 per cent ($2.655 billion) of the total funds raised.

The PSUs that raised big-ticket funds in September 2026 include National Bank for Financing Infrastructure and Development ($1 billion), Hindustan Petroleum Corporation Ltd and Housing and Urban Development Corporation Ltd ($500 million), REC ($300 million), NHPC Ltd ($254.51 million) and The Shipping Corporation of India Ltd ($100.44 million).

Among private sector companies that mopped up $100 million or more *via* ECBs under general permission are Mangang Constructions Pvt Ltd ($1 billion), Danube Industries ($921.11 million), Sammaan Capital ($300 million), Vodafone Idea and IIFL Home Finance ($150 million each), Lighthouse Learning Pvt Ltd ($125 million), Healthium Medtech ($104 million) and Adani Airport Holdings ($100 million).

Interglobe Aviation raised a total of $336.93 million through three tranches *via* ECBs under the special permission route.

RBI EFFECT

Madan Sabnavis, Chief Economist, Bank of Baroda, attributed the increase in resource raising *via* ECBs to the "RBI effect", whereby the central bank is providing a concessional forex swap facility to encourage PSUs to raise funds from June 08, 2026 till December 31, 2026.

"It's just a case of front loading of ECBs, especially by PSUs... It'll be interesting to see what happens subsequently (after December-end 2026) because the RBI brought out the concessional forex swap scheme in June, saying that the exchange risk on the ECBs raised by PSUs (till December-end 2026) will be borne by it in terms of the principal amount," he said.

Manoranjan Sharma, Chief Economist, Infomerics Ratings, observed that the surge in Indian companies' overseas borrowing reflects cheaper funding, easier access and diversification beyond domestic lenders.

The 102 per cent y-o-y jump in fundraising *via* ECBs in H1 FY27 also follows a subdued FY26, when ECB registrations fell amid expensive currency hedging and narrower India-US interest-rate differentials.

"RBI's June concessional dollar-rupee swap facility for eligible public-sector borrowers reduced currency-protection costs, making overseas loans more competitive," Sharma said.

He emphasised that the cost advantage of raising funds *via* ECBs is tangible: Hudco reported H1 FY27 foreign-currency funding at 6.16 per cent, versus 7.12 per cent for medium-term domestic bank/institutional loans — a 96-basis-point difference.

Sharma noted that in some other cases, the gain is even higher. This illustrates potential savings, not a market-wide guarantee. He said companies must compare equivalent maturities and include hedging, fees, and taxes; unhedged rupee depreciation can erase apparent savings. Exporters' dollar revenues can provide a natural hedge.

Growth in outbound direct investment slows to 9.4% in H1

Sourashis Banerjee
Chennai

India's overseas direct investment (ODI) commitments grew at a slower pace in the first half of FY27, even as foreign direct investment (FDI) inflows into the country gathered momentum.

DATA FOCUS.

According to the RBI, India's total financial commitment towards overseas investments rose to $27.01 billion between April and September FY27, registering an increase of 9.4 per cent compared to the same period in FY26.

This is slower compared to the growth of 45.6 per cent registered in the first half of FY26 and 74.6 per cent growth in FY25.

This moderation comes against a 20.6 per cent increase in gross FDI inflows into India in April-August FY27. The US and IFSC Gift City witnessed significant increase in ODI commitments.

GLOBAL UNCERTAINTY

Rishi Shah, Partner at Grant Thornton Bharat, said, "The moderation in outward FDI in H1 of FY27 is more of a recalibration after two years of very strong growth. A higher base, along with a weaker currency and uncertainty in the global economy, has possibly made Indian companies circumspect about overseas deals."

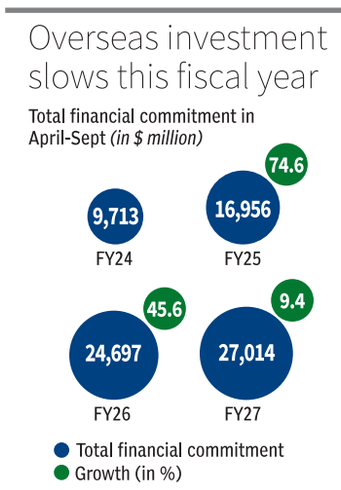

According to Madan Sabnavis, Chief Economist at Bank of Baroda, "It is possible that companies are investing more in the domestic sector. If ODI continues to fall it is good for net FDI. We need to see if this continues."

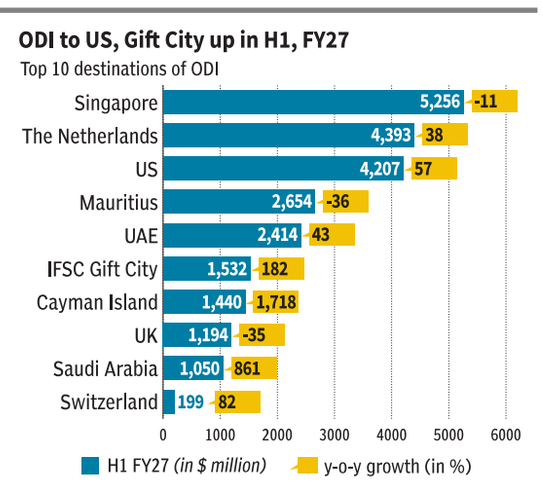

Among individual companies, Coforge Ltd led the overseas investment commitments with $2.37 billion, followed by Sun Pharma Laboratories at $2 billion and Quest Global Engineering Services at $1.35 billion.

Equity was the predominant form of commitment, although guarantees also featured prominently.

Singapore stayed at the top, attracting $5.26 billion, although commitments declined 11.3 per cent y-o-y. The Netherlands followed at $4.39 billion, registering a 38.3 per cent growth.

The US emerged as the third-largest destination, with commitments rising 56.5 per cent to $4.21 billion. Gift City recorded a particularly sharp increase, with commitments almost tripling to $1.53 billion. Notably, Cayman Islands saw a $1.36 billion increase in ODI y-o-y.

Coforge's $2.4 billion ODI the highest in H1 FY27

Rupee slides to one-week low as dollar strength persists above 94 mark

Our Bureau
Mumbai

The rupee on Thursday pierced the 94 to the dollar level, closing at a one-week low, amid demand for dollars from importers and the greenback gaining strength.

The Indian currency closed 35 paise weaker at 94.04 per dollar against the previous close of 93.69. It breached the 94 per dollar for first time in March 2026.

Dilip Parmar, Senior Research Analyst, HDFC Securities, noted that the rupee surrendered its early gains amid bargain dollar buying and broad-based dollar strength.

"Aggressive dollar demand from a state-owned bank ahead of the inflation data release pushed the $/₹ pair above 94.00 after touching an intra-day low of 93.62. Going forward, spot $/₹ support is seen at 93.50, while resistance is likely around 94.30,"

Pranjal Ghate, Economist, Brickwork Ratings, observed that while the rupee slipped against the dollar, weighed down by a stronger dollar and rising US Treasury yields, these near-term fluctuations are unlikely to overshadow the broader recovery in the currency.

"India is increasingly being viewed as a potential AI hedge by global investors, with any further unwinding of crowded US and global AI-related trades potentially supporting foreign equity inflows into Indian markets. Alongside easing crude oil prices, these could support rupee, with scope for consolidation in the 92-93 range in the coming weeks," he said.

KEY RISKS

However, the extent of appreciation may be moderated by RBI intervention aimed at rebuilding foreign exchange reserves, while renewed crude oil volatility and broader global uncertainties remain key risks to this outlook.

Referring to decline in oil prices, Dipanwita Mazumdar, Economist, Bank of Baroda, said, "We expect a $9-10 billion saving in India's oil import bill if the international oil price declines by 10 per cent in the remaining fiscal."

"This, along with resumption in capital flows, is expected to support the rupee in the near term," she added.

Star Health bets on Young Star neo to grow India's youth insurance base

Our Bureau
Chennai

With an eye on bringing in more youngsters into the insurance fold, standalone health insurer Star Health Insurance has devised a new product, Young Star neo, for the younger generation.

"When we take a stake in the profile of our new customers who came in last year, we found that less than 40 per cent are below 35 years of age. We felt that this is not the true reflection of the demography of the country," Anand Roy, MD and CEO, Star Health and Allied Insurance Company Ltd, said in a media interaction.

Available for those aged 18 to 40 years, Young Star neo offers sum insured options from ₹10 lakh to ₹1 crore, including an unlimited sum insured option, and policy terms of one, two or three years.

Young Star neo keeps the customer's renewal premium constant until a claim is made, and even after a claim, the renewal premium is calculated at entry age + 1 year, instead of that equivalent to the customer's actual age at renewal, the company said.

Amid increased scrutiny over rising medical inflation and its impact on health insurance affordability, Star Health CEO calls for greater regulatory oversight of the healthcare sector, including standardisation of treatment protocols and checks on hospital billing practices.

He also backed the proposed introduction of co-payment in health insurance policies, arguing that some degree of risk-sharing would help curb over-billing by healthcare providers.

AI IN INSURANCE

Star Health is also using AI to identify instances of insurance misuse and anticipates that in the next three years' time, the entire claims process will be automated through AI. On the demand momentum following the GST exemption on health insurance premiums, Roy said while the initial euphoria had tapered off, customers continued to opt for higher coverage.

Around 15 per cent customers are increasing their sum insured at the time of renewal, while the insurer is clocking a 36 per cent growth in new business, he said.

Kia to invest $2 billion in AP to expand operations

Visakhapatnam: Kia will be investing $2 billion to set up a plant in Andhra Pradesh, Gwanggu Lee, Managing Director and Chief Executive Officer, Kia India, said. This was announced at the 31st AP CII Partnership Summit, which began here on Thursday. The journey of the South Korean automaker began in 2017 and its operations were being steadily expanded, Lee said. OUR BUREAU

Shree Cement to invest ₹7,000 cr in AP plants

Visakhapatnam: Shree Cement will invest ₹7,000 crore to set up cement plants in Andhra Pradesh. Sumanth Gautham, Vice-President, said the company would establish plants in districts, including Kadapa, Anakapalli and Guntur. The company decided to invest after taking note of the incentives being offered to investors by the State, he told mediapersons here. OUR BUREAU

AP launches escrow a/cs for investment incentives

WOOING INVESTORS. State government lines up 303 MoUs for ₹9.89 lakh crore investments at CII Partnership Summit: CM Naidu

G Naga Sridhar
Visakhapatnam

The Andhra Pradesh government has launched escrow accounts for industrial and investment incentives.

The State will also enact an Investment Protect Act to ensure continuity and reliability for the investors, Chief Minister N Chandrababu Naidu said in his address at the two-day 31st CII Partnership Summit, which began here on Thursday.

The State government has lined up 303 MoUs involving a proposed investment of ₹9.89 lakh crore in the Summit, according to Naidu.

"Since June 2024, the total investments attracted by the State is at ₹32 lakh crore, which is highest in the country with a conversion rate of 76 per cent," he said.

Amaravati was being built as the 'Global Best liveable city' with green energy. "This will he a true blue city. Come and settle in Amaravati," he said. The State government was also focusing on logistics with four new ports and three shipbuilding clusters, Naidu said. Nine new airports were being built along with high-speed rail corridors, he added. The State government was also working on river linkages.

"Tirupati will be a global design capital of the world with 10,000 acres being allocated," Naidu said, adding that there were 25 sectorial parks for industrial investments.

(from left) Deputy Chief Minister of Andhra Pradesh Pawan Kalyan, Chief Minister N Chandrababu Naidu, Union Minister for Commerce and Industry Piyush Goyal, Union Civil Aviation Minister K Ram Mohan Naidu and Andhra Pradesh IT Minister Nara Lokesh at the inaugural session of the 31st CII Partnership Summit in Visakhapatnam on Thursday KR DEEPAK

INVEST IN INDIA
Commerce Minister Piyush Goyal said the current free trade agreements (FTAs) India had entered into will provide open market access to $85 trillion of global economy amounting to two-thirds of global economy. Indian industry and business, including start-ups should harness the potential being created through FTAs.

The nine FTAs singed by India would now provide open market access in 38 countries, he said.

"India is a safest destination for global investments in a turbulent world," Goyal said. "Come and invest in India and Andhra Pradesh."

Deputy Chief Minister K Pawan Kalyan said, "We want investors who will ground the projects sooner."

State Minister for IT & HRD Nara Lokesh said investors were being drawn to Andhra Pradesh due to the speed of doing business, policy stability and service. "You will have full support of the government. Our doors are open to you," Lokesh said.

ECONOMIC ENGINES
GMR Group Chairman GM Rao said the growth of the economy would be centred around airports. "Airports are new economic engines. In 1999, nobody thought of Hyderabad airport except the then Chief Minister Naidu. Today, it contributes to 5 per cent of Telangana's State Gross Domestic Product by various economic activity," he said.

Bhogapuram airport was an economic engine for Andhra Pradesh, he added.

R Mukundan, President, CII, said global trade uncertainties would call for stronger partnerships and collaborations.

'AP targets 50% women's share in workforce'

Our Bureau
Visakhapatnam

The Andhra Pradesh government aims to increase women's participation in the workforce from 35.8 per cent to 50 per cent in the near future, according to Chief Minister N Chandrababu Naidu.

Speaking at the inaugural session of the Women & Growth Summit 2026 in Visakhapatnam, he said Sri City alone employed more than 75,000 women, while Brandix Apparel City in Visakhapatnam provided jobs to nearly 20,000 women.

The Global Toy Park at Nakkapalli is expected to create 30,000 jobs for women, while footwear and other industries coming up in Kuppam and Anantapur are expected to employ more than 25,000 women. He added that women's participation in industrial employment and natural farming would be key drivers of economic growth and empowerment in the State.

'India, US will have the best deal'

Our Bureau
Visakhapatnam

India has negotiated a 'very good' set of outcomes in the proposed trade pact with the US and will have the best deal with preferential access over its competitors, Union Minister for Commerce, Piyush Goyal, said.

Speaking to mediapersons on the sidelines of the 31st CII Partnership Summit, Goyal said a bilateral trade pact with the European Union could be signed by the end of the year. On the progress of the deal with Canada, he said the government was looking at an equitable trade deal with Canada, but declined to give any time-frame for the agreement.

Union Minister of Commerce and Industry Piyush Goyal

Earlier, while speaking at the inaugural session, Goyal said the free trade agreements (FTAs) India had entered into would provide open market access to a global economy worth $85 trillion, amounting to two-thirds of the global economy.

He added that Indian industry and business, including start-ups, should harness the potential being created through FTAs.

The nine FTAs signed by India in the last five years would now provide open market access in 38 countries, while active discussions in the pipeline with other countries could add another $15 trillion in market access, taking the total to $85 trillion, he added.

TRUST AND RELIABILITY
"India is the safest destination for global investments in a turbulent world," Goyal said.

He added that the three major offerings for investors in India were open markets, respect for intellectual property rights, and reliability.

"Trust is the new currency (in the world), and India offers trust. The 21st century will be defined by trust and reliability," Goyal said.

Andhra Pradesh will emerge as leader in maritime sector under CM Naidu, says Sarbananda Sonowal

Our Bureau
Visakhapatnam

Andhra Pradesh is the most suitable region for trade with ASEAN, East Asia and Indo-Pacific countries, according to Sarbananda Sonowal, Union Minister for Ports, Shipping and Waterways.

Speaking at the plenary session of 'Gateway to the East: Ports, Shipbuilding and Andhra Pradesh's Maritime Future' at the CII Partnership Summit here, Sonowal said Andhra Pradesh would emerge as the country's leader in the maritime sector under Chief Minister N Chandrababu Naidu, who recognised the importance of the IT industry in the 1990s and transformed Hyderabad into Cyberabad.

With a coastline of about 1,053 km and geographical advantages as its main strengths, Andhra Pradesh is emerging as the principal maritime gateway for the country's East coast trade, he said.

In FY26, Visakhapatnam Port handled a record 91.17 million tonnes (mt) of cargo, registering 10 per cent growth. Foundation stones were laid for various development projects worth about ₹600 crore to further increase the port's capacity.

Sarbananda Sonowal, Union Minister for Ports, Shipping and Waterways

SHIPBUILDING CLUSTER
In-principle approval had been granted for a greenfield shipbuilding cluster at Dugarajapatnam with an estimated investment of about ₹30,000 crore to promote shipbuilding in the State. It targets a capacity of 1.2 million gross tonnage annually, Sonowal said.

Across the country, ₹70,000 crore has been allocated as financial assistance for shipbuilding and maritime activities, ₹10,000 crore for domestic container manufacturing, and another ₹10,000 crore under the Coastal Cargo Promotion Scheme, he added.

State Minister for Roads and Buildings, Infrastructure and Investments, BC Janardhan Reddy, said the Maritime Cluster at Dugarajapatnam will see the participation of Hindustan Shipyard and Kakinada Seaports, he added. Four fishing harbours at Juvvaladinne, Uppada, Nizampatnam and Machilipatnam are nearing completion.

According to Reddy, the non-major ports currently handle over 117 mt of cargo annually.

About ₹14,000 crore is being invested in developing the greenfield/gateway ports under construction at Ramayapatnam, Machilipatnam, Mulapeta and Kakinada SEZ, and about ₹22,000 crore in total maritime expansion programmes, he added.The Ramayapatnam, Machilipatnam and Mulapeta ports would become operational between December 2026 and March 2027.

ReNew to invest ₹80,000 crore across data centres and clean energy

Our Bureau
Visakhapatnam

ReNew Energy Global Plc, a decarbonisation solutions company, will invest about ₹80,000 crore in Andhra Pradesh, spanning digital infrastructure and clean energy manufacturing.

The company made the announcements at the CII Partnership Summit 2026 in Visakhapatnam on Thursday. Together, the investments expand ReNew's presence across digital infrastructure, renewable energy, clean energy manufacturing and skilling, deepening its long-term partnership with Andhra Pradesh.

The proposed investments include ₹67,000 crore for a 1-GW green hyperscale data centre in Anakapalli, ₹11,000 crore for polysilicon and metallurgical silicon manufacturing facilities in Anakapalli and Nellore, and ₹1,500 crore for a permanent magnet manufacturing facility in Rambilli. ReNew will also establish the ReNew Centre for Technical Excellence (R-CTE) in Visakhapatnam under the PM SETU Scheme.

The 1-GW green hyperscale data centre in Anakapalli is envisioned as a largescale, renewable-energy-powered digital infrastructure project.

The polysilicon and metallurgical silicon facilities in Anakapalli and Nellore will further strengthen the domestic solar manufacturing value chain. They will complement ReNew's existing solar manufacturing investments, including its 6.5-GW ingot and wafer manufacturing facility in Anakapalli, expected to be commissioned by March 2028.

ReNew also plans to invest ₹1,500 crore in a permanent magnet manufacturing facility in Rambilli, expected to be commissioned by March 2029.

FIVE ITIs
ReNew will work with the Andhra Pradesh government to develop the Gajuwaka cluster of five ITIs in Visakhapatnam as the R-CTE.

The cluster is part of the PM SETU framework, under which a typical hub-and-spoke ITI cluster has an indicative investment of up to ₹241 crore over five years.

The initiative will focus on industry-relevant technical skills and employability for emerging sectors including renewable energy, advanced manufacturing and allied industries.

CleanMax to invest ₹50,000 cr in clean energy complex

Our Bureau
Visakhapatnam

CleanMax has signed an MoU with the Andhra Pradesh Economic Development Board at the CII Partnership Summit to invest about ₹50,000 crore in developing an integrated clean energy complex. The proposed complex will power a dedicated 2-GW Green Compute Factory in Kurnool in collaboration with Blackstone-backed AI cloud provider Neysa. The facility will minimise water consumption using direct-to-chip cooling technologies and draw solely from allocated industrial water supplies. CleanMax will develop 3 GW of integrated renewable energy (wind and solar) alongside 1 GW of pumped hydro storage over the next five years, with at least 1.5 GW of renewable capacity slated for completion by 2029. It will integrate generation, storage, and distribution to deliver round-the-clock green power.

India to get fully indigenous civil aircraft within two years, says Aviation Minister

Our Bureau
Visakhapatnam

A fully-indigenously manufactured civil aircraft will take to the skies within the next two years, Union Civil Aviation Minister Kinjarapu Rammohan Naidu said.

Speaking on 'The Next Step for Indian Aviation: Connectivity, Capacity, Competitiveness', he pointed out that while the country had 74 airports in 2014, the number had now increased to 166, he said, adding that the UDAN scheme had brought air travel within reach of the common man.

UDAN PHASE 2
Under the second phase of UDAN, the country will build another 100 airports and 200 modern heliports by 2036.

He said that modern technology such as "Digi Yatra" for passenger convenience at airports had reduced entry time from 90 seconds to 20 seconds.

Naidu praised Andhra Pradesh for rapid progress in the civil aviation sector and said it was commendable that the Bhogapuram International Airport was completed six months early. The State government is working to establish an Aerospace and Defence City near Lepakshi in Anantapur district. Plans were being prepared to launch seaplane services between Prakasam Barrage (Vijayawada), Srisailam and Hussain Sagar in Hyderabad, Naidu said.

NCT approves ₹69,000 cr mega transmission project

GREEN LINK. Project to connect RE energy hubs in Gujarat, Rajasthan

M Ramesh
Chennai

The National Committee on Transmission (NCT) has approved a first-of-its-kind 1,150 kV transmission project worth ₹68,816 crore for connecting the renewable energy generation centres of Gujarat and Rajasthan and the emerging green hydrogen nodes in the eastern region.

When built, the 1,150-kV Raigarh Kotra-Rourkela-Kolaghat double-circuit lines will operate at the highest voltage level in the Indian transmission system.

Giving the rationale for the mega project, the minutes of the 45th meeting of NCT, which met and approved the project on November 9, stated that studies carried for 2031-32 indicate "substantial generation additions in Rajasthan, Maharashtra, Chhattisgarh and north-eastern region, while bulk demand growth is expected in Odisha and other industrial regions".

It noted that 5.2 GW of thermal generation at Raigarh (Kotra-III), 12 GW renewable generation at Bhadla-IV and Ramgarh-II, along with with associated BESS capacities, hydro and PSP developments in the North-Eastern region will also come up, alongside bulk demand centres at Paradeep and Gopalpur in the eastern region.

OTHER PROJECTS

BESS capacities of 124 GW and PSP capacities of 42 GW were also considered in the studies.

"These significantly influence future power flow patterns, and are expected to increase bulk power transfer requirements between western region and eastern region," it said.

However, not everyone is convinced that the project is necessary. The minutes of the meeting record objections raised by SR Narasimhan, an expert member in the NCT and a former Chairman and MD of the Grid Controller of India Ltd.

Narasimhan observed that the calculations in the studies assumed a compounded annual growth rate of 7.64 per cent in peak demand between 2026-27 and 2031-32, "which is quite high".

The minutes also recorded Narasimhan as saying that there is a "strong possibility" of low loading of the 1,150 kV lines during non-solar hours, also because of "uncertainty about power drawl by the green hydrogen and green ammonia projects".

A 765 kV line, or extending an existing HVDC line to the eastern region, would be a "more elegant and practical arrangement", argued Narasimhan in a LinkedIn post.

Shriram General takes 'baby steps' into health insurance segment

Mithun Dasgupta
Kolkata

Shriram General Insurance, which has been focusing on diversifying towards non-motor business, has taken a 'baby step' into the health insurance.

Currently, over 90 per cent of the general insurer's business is coming from the motor segment. The insurer has a target of generating around 15 per cent of its business from non-motor segments by 2029-30.

"Our main focus area is still motor. We were focusing on diversifying towards the non-motor business, but during H1 FY27, there was a de-growth of the industry in the fire premium of around 30 per cent," Shriram General Insurance MD and CEO Anil Aggarwal told *businessline*.

FIRE INSURANCE

"We withdrew from the market (fire insurance) because we did not want to burn the finger. Still, 91 per cent of our business is coming from the motor segment," he said.

"We have taken the baby step into the health portfolio. The health portfolio is the largest portfolio in the industry, and we are aiming that we will write around maybe ₹100 crore in individual policies over a period of two years. If we include group policy, it may go up to ₹300 crore to ₹400 crore also," Aggarwal said.

Anil Aggarwal, MD and CEO, Shriram General Insurance

"We have already taken a good number of manpower into the health segment. I think we will easily achieve our target of generating 15 per cent from the non-motor segment by FY30," he said.

The insurance company recorded a 21 per cent y-o-y growth in its gross direct premium to ₹2,470.41 crore (₹2,045.46 crore).

Data centre economy: AI infra push in Q2, a boost for companies

Rohan Das
Chennai

India's expanding data centre and AI infrastructure build-out is proving to be a money spinner for businesses serving the ecosystem.

Companies that supply components for these projects — ranging from high performance compute to cables, power systems and liquid cooling — have recorded a multi-fold increase in revenue and profit for Q2 FY27. Many are now banking on AI to be the primary growth engine.

IT distributor Redington, for instance, saw revenue from its Technology Solutions Group, handling enterprise infrastructure like servers, storage systems and networking equipment, grow 91 per cent.

4X REVENUE GROWTH

VS Hariharan, MD and Group CEO, Redington, said the segment was the standout performer in the quarter. "Servers, storage and networking contributed, but AI servers and GPUs with richer configurations and dramatically higher average selling prices, in many cases 4x, are driving the growth," he said.

Similarly, Netweb Technologies, a manufacturer of high performance compute and server infrastructure, saw its Q2 revenue and PAT zoom more than 4x y-o-y, with its AI business growing 1,068 per cent. Chairman and MD Sanjay Lodha said in an earnings call that compute demand is being driven both by the government as part of the India AI mission, as well as private companies.

Cable and power infrastructure firms such as Sterlite Technologies and Diamond Power Infrastructure more than doubled their revenue. Executives from both the companies suggested that data centre clientele's contribution to its quarterly topline grew from less than one per cent a year ago to nearly one fourth in September.

Aeroflex Industries, which builds liquid cooling skids, posted its highest ever quarterly revenue (₹208 crore), while profits surged 157 per cent to ₹37 crore.

Asad Daud, MD, said in an earnings call that hyperscalers, cloud service providers and global technology companies are making huge investments, which are creating a growing demand for reliable liquid cooling solutions. The company plans to invest nearly ₹80 crore towards expansion of its skid assembly capacity.

Pumps maker Grundfos also flagged the opportunity, with Saravanan Paneerselvam, Senior Regional Director for Commercial Building Services in IMEA region, suggesting that data centres are emerging as a big opportunity not only in India, but also regions such as Saudi Arabia, Dubai and Turkiye.

Industry estimates peg India's data centre capacity at around 1.5 GW, with plans to scale it to around 10 GW by the end of this decade.

Phone 044-42888111, E-mail : autolinersprivatelimited@gmail.com

In the Matter of
Notice to the Public and All Concerned in the matter of deletion of Fully Satisfied charge ID's From the index of charge of the company at Ministry of Corporate Affairs Portal

With reference to the above subject, our company **Auto Liners (Madras) Private Limited (CIN:U34103TN1960PTC004184)** was taken over by M/s. RR Industries Limited (Holding Company) vide shareholders agreement dated December 31, 2004 and the Board was reconstituted after the transfer of shares. On the date of taking over of the company from the old management, the balance sheet of the Company as on 31.12.2004 had no loans outstanding with the banks or financial institutions. The old management has satisfied all the loans with the banks as mentioned in the following charge IDs. However the following charges are still reflecting in the Index of charges of the company. In spite of repeated attempts and communications with the bankers to get NOC for deleting the charge IDs in the Index, as listed detailed below, there was no response from the Banks (Charge Holder)

S. No	Charge Id	Name of the Charge Holder	Date of Creation/ Modification	Amount of Charge (Rs)
1	90301456	Indian Bank, Chetpet Branch	06.04.1979, Creation	3,00,000/-
2	90299140	Indian Bank, Chetpet Branch	13.05.1988, Modified	3,00,000/-
3	90302390	Indian Bank, Chetpet Branch	23.03.1980, Creation	72,000/-
4	90299223	Tamilnadu Investment Corp. Ltd	08.09.1980, Creation	1,15,000/-
5	90299287	Indian Bank, Chetpet Branch	11.06.1981, Creation 13.05.1988, Modified	3,00,000/-
6	90300059	Indian Bank, Chetpet Branch	25.02.1991, Creation	13,00,000/-
7	90300528	Indian Overseas Bank, Anna Salai	22.07.1995, Creation 07.08.1996, Modified	65,00,000/-
8	90300553	Apple Credit Corp Ltd	10.10.1995, Creation	4,00,000/-

Accordingly, the Company has taken necessary steps with the Registrar of Companies, Ministry of Corporate Affairs, for deletion / removal of the aforesaid Charge IDs from the Index of Charges maintained on the MCA portal.

Any person having any objection or claim in respect of the proposed deletion / removal of the aforesaid charge may submit the same in writing, together with supporting documents, to the Registrar of Companies, Ministry of Corporate Affairs Block No 6, B Wing, 2nd Floor, Shastri Bhawan, Haddows Road , Chennai 600 034 and to the Registered office of the Company **within 14 days** from the date of publication of this notice, failing which the Company shall proceed with the necessary statutory formalities, subject to applicable law.

QUICKLY.

Gold hits 1-week low as $ rallies on Fed hike bets

Gold prices fell for a third straight session to hit a more than one-week low on Thursday, weighed by a robust US dollar, expectations of further monetary tightening by the Fed. Spot gold was one per cent to $3,948.82 per ounce by 1114 GMT. US gold futures for December delivery fell 1.1 per cent to $3,954.50. Silver fell one per cent to $51.16 and palladium dropped 0.6 per cent to $1,021.25. REUTERS

Copper at 3-month low; focus on demand

London: Copper prices dropped to their lowest in more than three months as the market fretted about weak demand and expectations of US interest rate hikes. Benchmark copper on the London Metal Exchange was down 1.2 per cent at $13,650 a tonne. Three-month aluminium retreated 1.2 per cent to $3,030. Zinc fell 1 per cent to $3,720. Lead slipped 0.2 per cent to $1,878. REUTERS

Crude oil falls on easing geopolitical fears

Tokyo/Singapore: Crude oil prices fell more than $1 per barrel on Thursday as easing concerns over an escalation of conflict in West Asia reduced the risk premium in crude markets, while rising OPEC+ output and growing US inventories fed worries about oversupply. Brent futures were down $1.47 to $91.29 a barrel by 0426 GMT. US West Texas Intermediate crude futures slipped $1.24 to $85.29. US crude stocks rose by 9 million barrels in the latest week, per data from the American Petroleum Institute. REUTERS

Subsidy hike may boost sales of DAP, complex fertilizers

MARKET WEAKNESS. Apart from availability issues in DAP and higher price of complex, demand was low due to a drop in the coverage of rabi crops

Prabhudatta Mishra
New Delhi

Sales of di-ammonium phosphate (DAP) and complex fertilizers may improve after the subsidy announcement for the rabi season, as the first month witnessed lower offtake compared to demand.

While companies were reluctantly selling DAP at the government-set benchmark rate of ₹1,350/bag (of 50 kg), there was no such ceiling for complex fertilizers, resulting in high prices — averaging between ₹1,800 and ₹2,300/bag.

According to official data, the first half of October witnessed sales of 15.08 lakh tonnes (lt) of urea, 9.81 lt of DAP, 1.21 lt of MOP (Muriate of Potash), 4.48 lt of complex (in combination of N, P, K and S nutrients) and 3.05 lt of SSP (single super phosphate).

The demand for the whole of October was 38.24 lt of urea, 19.01 lt of DAP, 3.33 lt of MOP, 18.51 lt of complex and 9.24 lt of SSP.

Officials said that apart from availability issues in DAP and the high price of the complex, the requirement was also comparatively lower due to a drop in the sowing of rabi crops, mainly mustard and gram (chana) this year. Wheat sowing normally starts from the first week of November and major areas are covered by mid-December.

HIGHER INVENTORY. The government on November 11 said that the current stock of fertilizers in the country is higher than a year ago

MAJOR FACTORS

"Sales should not have declined as most farmers purchase fertilizers in advance and do not wait for last-minute buying before sowing. The weather, low moisture and deficient rainfall are major factors for the lower fertilizer sales. Besides, the government has started selling these subsidised fertilizers based on land holdings and crop selection," said SK Singh, an agriculture scientist. Hopefully, complex prices will drop after subsidy hike, he said.

For the kharif sowing season (April-September) 2026, actual sales of fertilizers were down from the demand assessed by States. Urea sales were 185.22 lt against the estimated demand at 190.32 lt, those of DAP at 43.64 lt against 56.23 lt, MOP at 9.66 lt against 17.57 lt, complex at 60.08 lt against 84.99 lt and SSP at 28.29 lt against 34.81 lt, fertilizer industry officials said.

Under the Framework for Fertilisers Sales (FFS), launched in 222 districts of 30 States and Union Territories during Kharif 2026, it had shown a decline in sales by over 30 per cent, which helped the government to save ₹2,320 crore, including ₹850 crore in Madhya Pradesh, as farmers were sold the subsidised crop nutrients on the basis of their land holdings and crops selected.

Recently, a senior official from Madhya Pradesh said that though there was no cap on buying, the government was keeping a tab on farmers purchasing more than what they required.

Government staff reached the doorstep of such farmers to find out the reasons and that helped check excess buying, he said.

RISE IN STOCKS

The government, on November 11, said the current stock of fertilizers in the country is higher than a year ago and, with imports and domestic production augmenting availability, there will be adequate crop nutrients to meet the rabi season's demand.

The country's total fertilizer stocks stood at 235.21 lt as of November 10, 2026, against 173.46 lt a year ago. Urea stocks were at 103.12 lt against 72.14 lt, DAP stocks rose to 28.65 lt from 24.86 lt, complex fertilizers at 60.87 lt from 42.44 lt and those of MOP nearly doubled to 20.08 lt from 10.78 lt.

Only SSP stocks were marginally lower at 22.49 lt against 23.24 lt.

Based on the feedback received from the States, the Centre has estimated fertilizer demand in the current rabi season at about 380.96 lt – urea 199.27 lt, DAP 55.07 lt, MOP 16.4 lt, complex 79.12 lt and SSP at 31.1 lt.

The Cabinet hiked nutrient-based subsidy and fixed it at ₹94.21 per kg for nitrogen (N), ₹10.42 per kg for sulphur (S), and ₹66.11 per kg for phosphorus for the rabi season (from October 2026 to March 2027). However, potash (K) subsidy remained constant at ₹2.38 per kg as in the last few seasons.

Despite a shortage in copra supplies, coconut oil prices remain flat

V Sajeev Kumar
Kochi

Despite a short-term supply shortage in the copra market in November, coconut oil prices have remained largely flat, supported by adequate stocks.

However, traders expect supplies to tighten during the transition to the next harvest season, exerting upward pressure on prices in early 2027.

The Cochin Oil Merchants' Association (COMA) reported mixed price movements in the coconut oil and copra markets in Keralam.

Coconut oil prices declined by ₹3 to ₹250 per litre, while copra prices rose by ₹2 to ₹158/kg. In Kangeyam, coconut oil prices increased by ₹3 to ₹208.5 per kg and copra prices gained ₹3 to ₹151/kg.

Prakash Rao, President of COMA, said copra prices had strengthened, while coconut oil milling prices showed divergent trends.

SEASONAL SQUEEZE. Ample stocks are helping cushion the market, but supply conditions are expected to tighten ahead of the next harvest

STOCKS WEIGH

He pointed out that high prices had triggered a demand slowdown in the coconut oil market, prompting consumers, particularly bulk buyers, to shift to cheaper imported alternatives. Traders and stockists in Tamil Nadu have accumulated large quantities of copra in anticipation of a price rise during the off-season. However, the expected surge failed to materialise despite the onset of the off-season, Rao said.

Given the current availability of copra, pressure from existing stocks and production forecasts for the upcoming season, further price corrections are likely, he said.

With the new production season expected to begin after January 15, copra availability is likely to improve, potentially exerting further downward pressure on prices, he added.

PILGRIMAGE DEMAND

KK Devraj, a consultant in the coconut oil industry, said demand for coconuts and coconut oil during the Sabarimala pilgrimage season, which begins next week and extends over the next couple of months, is expected to push up prices.

Although the harvest season in Keralam is expected to begin early next year, cumulative rainfall deficits across the southern States have affected local water reserves. This could slow fresh nut arrivals and keep copra prices in Tamil Nadu and Keralam supported, he said.

Adani's Kutch Copper, Codelco sign MoU to explore copper project in Chile

Our Bureau
Ahmedabad

Adani Enterprises' subsidiary Kutch Copper Ltd and Chile's State-owned Codelco have signed a memorandum of understanding (MoU) to develop the Kaburkaala copper project.

The MoU lays out the key terms of cooperation for a proposed strategic exploration partnership at the project, located in the Calama copper belt in the Antofagasta region of Chile, one of the world's major copper-producing districts, the company said in a release.

The agreement was signed recently at the LME Week 2026 in London in the presence of Jeet Adani, Director of Kutch Copper, Vinay Prakash, CEO of Adani Natural Resources, and Bernardo Fontaine, Chairman of Codelco.

For Adani, the proposed partnership is expected to link upstream copper resources in Chile with its integrated copper smelting complex at Mundra in Gujarat, providing access to a key raw material used in electrification, renewable energy, infrastructure and advanced manufacturing.

"More than just a mining asset, we view this strategic partnership as a long-term investment in India's future," said Adani.

UNLOCKING VALUE

"By securing robust access to global copper resources, we are building supply chain resilience for the critical industries driving our nation's growth — spanning renewable energy, advanced manufacturing, infrastructure, and technology," he said.

Under the proposed arrangement, Adani would contribute capital, technology-led exploration capabilities and largescale project execution expertise, while Codelco would bring its geological knowledge and international experience in copper exploration.

Codelco said the proposed collaboration was part of its strategy to unlock value from its exploration portfolio through partnerships with private sector companies, while sharing risks and accelerating the development of projects with potential.

"This MoU represents an important step in the work we have carried out with Adani over the past year. This process demonstrates Codelco's ability to attract world-class partners and create value from its exploration portfolio, while safeguarding the long-term interests of the company and the state of Chile," Bernardo Fontaine of Codelco said.

The partnership comes amid efforts by India to secure supplies of critical minerals and diversify sourcing of raw materials required for its energy transition and industrial expansion.

Nutrifresh plans 150-acre expansion across S. India

Vishwanath Kulkarni
Bengaluru

Sanket Mehta, Co-founder and CEO of NutriFresh

Nutrifresh, an integrated agri and food company, is expanding its operations in South India, targeting a cultivation footprint of around 150 acres across Bengaluru, Hyderabad and Chennai by March 2028, as it looks to strengthen its presence in the region's fresh produce market.

Nutrifresh, which already has 25 acres of operations in Bengaluru, is currently expanding in Hyderabad.

By the end of the current financial year, NutriFresh expects to add another 25 acres in the region, taking its total South India footprint to 50 acres.

The expansion will gather further momentum in FY28, with the company planning to add over 100 acres between April 2027 and March 2028, said Sanket Mehta, Co-founder, CEO and Whole-time Director, Nutrifresh.

The cumulative target is to establish approximately 150 acres across Bengaluru, Hyderabad and Chennai by March 2028.

To support this expansion, NutriFresh plans to invest approximately ₹50–75 crore from the company's side in developing infrastructure across South India. The overall investment, including contributions from farmer partners, is expected to be ₹200–225 crore, he added.

INFRA INVESTMENT

NutriFresh plans to invest in both pre-production and post-harvest infrastructure, including centralised nurseries and integrated packhouses for sorting, grading and packaging.

The facilities will operate through a hub-and-spoke model, with nurseries and packaging infrastructure at strategic locations, while cultivation will take place at individual farms.

Nutrifresh currently operates about 200 acres of company-owned farmland and has around 50 acres of farmer-partner land in its network.

Another 100-plus acres of farmer-partner land is currently under development, with polyhouses being constructed.

Of this, approximately 60 acres will feature polyhouse and hydroponic cultivation systems, while the remaining 30 acres will use polyhouse-based soil cultivation, he said.

B2B CUSTOMER BASE

The company currently offers more than 100 SKUs, including fresh produce and greens, and sees further opportunities to diversify its product range.

While Nutrifresh supplies products to B2B companies and merchant exporters, it currently has no immediate plans to enter direct exports, he said.

COMMODITY CALL.

Buy zinc futures at ₹409 with stop-loss at ₹400

Akhil Nallamuthu
bl. research bureau

Zinc futures (₹409/kg) have been trading flat recently. But the broader uptrend remains positive, leaving a good chance for a resumption in the rally. The November futures have been oscillating between ₹405 and ₹420 for about two weeks. Currently trading at ₹409, the contract is near the lower boundary of the range.

The support at ₹405 coincides with both the 21- and 50-day moving averages, making it a strong base. So long as this support holds, the likelihood of a rally will remain high. We expect zinc futures to see a fresh uptick from the current level of ₹405 to ₹420. In case this hurdle is breached, the contract could extend the upswing to ₹435. On the other hand, if the contract breaches the support at ₹405, the near-term outlook will turn bearish. In this scenario, it could fall to ₹393, an important support. Subsequent support levels are at ₹385 and ₹372.

TRADE STRATEGY

Buy zinc futures at ₹409 and place a stop-loss at ₹400. Book profits at ₹420.

Brazil's WEG to invest ₹2,000 crore in TN

Chennai: Brazil's global electrical equipment manufacturer WEG plans to establish its consolidated global manufacturing investment in Dharmapuri, Tamil Nadu, with a proposed investment of ₹2,000 crore and the potential to generate around 3,000 employment opportunities, as per a Industries Department statement. On October 16, a meeting was held between Industries Minister S Keerthana and WEG's leadership in Bengaluru, following which the company confirmed its preference for Tamil Nadu. OUR BUREAU

HFCL secures ₹834.36 cr worth overseas orders

Mumbai: HFCL has secured international export orders worth ₹834.36 crore for the supply of optical fibre cables (OFC) through its overseas wholly-owned subsidiary. The contracts are scheduled to be executed by June 2027. The orders have been received in the normal course of business and do not fall under related-party transactions. The telecom infrastructure supplier bagged an export order of $244 million, about ₹2,329 crore, for supplying high-quality optical fibre cables to a global multinational corporation. OUR BUREAU

Oil tanker with 19 Indians attacked off Mina Saqr

New Delhi: A Liberia-flagged crude oil tanker, carrying 19 Indian seafarers, was targeted in a projectile attack while drifting off Mina Saqr on November 11, Shipping Minister Sarbananda Sonowal said on Thursday. Sonowal, in a social media post on X, said the entire 22-member crew of *MT Dominica Prosperity* was swiftly and safely evacuated by the UAE Coast Guard, and all 19 of our Indian nationals are completely safe with no injuries. PTI

Ensure adequate infra before starting thermal power plants: Centre to States

PRACTICAL APPROACH. 'Set realistic commissioning dates based on production capacity, supply chain gaps'

Rishi Ranjan Kala
New Delhi

The Power Ministry has advised the State governments to align commissioning of thermal power plants (TPPs) with transmission, fuel supply, storage and grid support as it aims for timely and dependable capacity addition.

The integrated planning for commissioning and scheduling is related to long-term procurement of power by discoms from power stations established on a design, build, finance, own and operate (DBFOO) basis.

The Ministry observed that delivery schedules and commissioning timelines stipulated by several procurers and discoms in their recent bids were not aligned with the respective resource adequacy plans of the States or were difficult to achieve in view of the prevailing domestic manufacturing lead times and constraints relating to boiler, turbine and generator (BTG) equipment.

"States and discoms are hereby advised that delivery schedules and commissioning timelines for all long-term power procurements under the DBFOO mode may be aligned with their respective resource adequacy plans. However, a realistic construction and commissioning period, preferably not less than 60 months from the appointed date must be prescribed, keeping in view the manufacturing capacity and supply chain constraints of major equipment such as BTGs," it added.

CLEAR TIMELINE. Equipment supply, land acquisition, EPC and balance-of-plant readiness all need to inform procurement and delivery schedules

NEEDED MEASURE

Welcoming the development, Vivek Agarwal, Director, Energy Consulting, Nangia & Co LLP, told *businessline* that the aim is timely, dependable capacity — not simply more installed megawatts (MW).

The recommended period of at least 60 months from the appointed date provides a reasonable planning benchmark (till the supply-chain issues persist), especially for a new, large 660 or 800 MW supercritical or ultra-supercritical plant. Delivery will depend on project-specific readiness, but this is not a universal construction norm, Agarwal explained.

India added roughly 9.47 GW thermal capacity in FY26 against a 12.86 GW target.

TIMING ISSUE

"Telangana illustrates why timing matters. Discoms cited a contracted thermal requirement of 15,893 MW by 2029–30 against existing capacity of around 9,791 MW. Proposed additions from Yadadri, Singareni Stage II and NTPC's Telangana station must be matched to that requirement. The Central Electricity Authority's (CEA) report anticipated Singareni Stage II's trial run in December 2028; a trial run, however, is not the same as commercial availability," Agarwal emphasised.

The TPPs will also need to support renewable energy integration through flexibility, ramping and balancing. Moving from a minimum technical load of around 55 per cent across much of the existing fleet towards the CEA's 40 per cent target by 2030 will require plant-specific upgrades, operational changes and compensation for flexibility costs, he added.

Equipment supply, land acquisition, EPC and balance-of-plant readiness all need to inform procurement schedules, including the time between award and the appointed date.

"A practical next step is a common resource adequacy-to-commissioning matrix, led by the Ministry and the CEA with CTUIL and Grid-India. Updated annually with State plans, it should match dependable capacity needs to realistic commercial operation dates and project confidence levels. Milestones should cover equipment, EPC, finance, land and clearances, fuel and water, transmission, storage and grid support," Agarwal suggested.

Consumer views to be a part of discoms audit: CAG

Shishir Sinha
New Delhi

The aim is to get a perspective of the actual outcomes of distribution-sector reforms from the consumer standpoint, say officials

For the first time, the Comptroller and Auditor General (CAG) will include customer response in conducting integrated audits of discoms, the CAG said as it started the audit of 39 State-owned discoms.

"We have planned certain innovations in the audits. One of the focus areas will be a consumer satisfaction survey covering 10,000 respondents across the States and UTs to be covered," the official said.

Consumer satisfaction assessment is being undertaken to evaluate the quality of electricity services delivered by discoms and the level of satisfaction among different categories of consumers, including domestic, industrial, commercial and agricultural consumers. This will provide a perspective of the actual outcomes of distribution-sector reforms from the consumer standpoint, the official added.

The integrated audit is envisaged to cover all major sub-segments of the power sector over the next four years — generation, transmission, distribution, and renewable energy. Recognising the significant investments made in the power sector and its critical role in supporting the economic growth and development of the country, the CAG has envisaged undertaking an integrated audit of the sector, the official said.

DISTRIBUTION FOCUS

In the first year, the distribution sector has been accorded priority, considering its direct interface with consumers and its significant implications on the functioning of other segments of the power sector and the wider economy.

Stress in discoms affects the reliability and affordability of power supply and spills over into State finances through subsidies, guarantees and equity support, so priority was accorded to the horizontal performance audit of their operational and financial performance, the official said.

Data indicated that the financial stress of discoms is primarily rooted in weaknesses in procurement, demand forecasting, metering, regulatory accounting and consumer service.

According to official data, 41 discoms earned aggregate profits of ₹32,661 crore in 2024-25 and 23 incurred aggregate losses of ₹29,959 crore.

As many as 24 had negative net worth and accumulated losses stood at ₹3.41 lakh crore. Government grants (2020-21 to 2024-25) rose from ₹1.07 lakh crore to ₹1.25 lakh (16 per cent); revenue grants increased from ₹55,544 crore to ₹94,095 crore (69.4 per cent)

The official said that to ensure comprehensive coverage and avoid duplication of audit efforts, audits of the Centre's Revamped Distribution Sector Scheme (RDSS) have also been integrated with the audit of discoms. Another important area of focus is the examination of power procurement by discoms, including procurement through power exchanges. The performance audit on 'Operational and Financial Performance' will cover 39 public sector discoms across the States and Union Territories. The audit reports are likely to be tabled in the State legislatives during the second part of the next financial year.

Common policy issues and systemic deficiencies emerging from the State-level audit reports will be consolidated and brought to the notice of the Ministry of Power at the Union level.

'Develop doctrines for emerging domains of warfare'

Our Bureau
New Delhi

FRAMING STRATEGY. Defence Minister Rajnath Singh and Chief of the Air Staff Air Chief Marshal Ashutosh Dixit at the IAF Commanders' Conference in New Delhi on Thursday PTI

Defence Minister Rajnath Singh on Thursday told the top brass of the Indian Air Force (IAF) to develop dedicated doctrines and architecture for emerging domains of warfare, including electronic, cyber and space.

The last major publicly announced policy document was the 'Indian Air Force Aerospace Doctrine' (2022), which marked the institutional shift for the Air Force — from "air power" to a comprehensive "aerospace power."

Addressing the Air Force Commanders' Conference, Singh emphasised that "victory in future conflicts would depend not merely on the number of aircraft, but also on technological sophistication, speed of response and precision of preparations."

At the same time, he urged the Commanders to make these emerging challenges a core priority, with focus on integrating them into institutional thinking, planning and operational processes.

TACTICAL ADVANTAGE

The Minister also urged the IAF to retain an "element of surprise" in both offensive and defensive combat readiness to stay ahead in modern warfare.

"Our defence forces must develop capabilities and methods that leave the adversary with no time to react or recover, while simultaneously ensuring that we are never caught off guard by an unexpected move from the enemy," said the Defence Minister.

"Surprise can manifest in various forms, both conventional and electronic. Our intelligence and surveillance mechanisms must be further strengthened and operational preparedness enhanced to ensure that our personnel remain alert, agile and equipped to respond effectively to any emerging challenge," Singh told the commanders.

He exhorted the Commanders to remain prepared for emerging challenges such as kamikaze drones, surveillance and counter-drone operations, drawing lessons from the existing conflict including between Russia and Ukraine.

Astrobase expands its rocket testing infra in AP

Our Bureau
Bengaluru

Bengaluru-based space tech company Astrobase is expanding its rocket testing infrastructure by adding 339 acres to its existing 22-acre facility in Andhra Pradesh.

The scale-up, a part of its ₹800-crore investment plan, will strengthen the company's capabilities across critical stages of launch vehicle development, testing and validation, with a strong focus on advancing next-generation reusable launch vehicle technologies. Astrobase Space Technologies Pvt Ltd had signed a memorandum of understanding with the Andhra Pradesh Economic Development Board to expand its existing rocket engine testing facility at Thimmasamudram in Sri Sathya Sai district.

Neeraj Khandelwal, Chief Executive Officer and Co-Founder, Astrobase Space Technologies, said, "This expanded infrastructure will enable us to undertake critical testing programmes, including static hot-fire tests and stage-level hop tests, while accelerating the development of reusable launch vehicle technologies."

This comes after its recent announcement to invest ₹500 crore in Karnataka, including the establishment of a dedicated manufacturing facility spread across approximately 10 acres in Bengaluru.

The facility will house advanced additive manufacturing and fabrication infrastructure, non-destructive testing and quality inspection facilities, as well as engine and stage assembly and integration capabilities to support the development of its Everest engine and AB220 medium-lift launch vehicle.

Alstom begins manufacturing 96 driverless units for Chennai Metro Rail

Our Bureau
Chennai

Alstom, a global leader in smart and sustainable mobility, has commenced the manufacturing of 96 Metropolis driverless cars for Chennai Metro Phase II at its Sri City facility in Andhra Pradesh. The €135-million contract was awarded by Chennai Metro Rail Ltd in 2025.

The Chennai Metro Phase II spans 119 km, including 76 km of elevated and 43 km of underground stretches across three corridors and their inter-corridor sections, said a release.

As part of the contract, Alstom will manufacture 32 metro trainsets in three-car configurations and provide 15 years of comprehensive maintenance after the warranty period.

Under the 'Make in India' initiative, these Metropolis trains are designed at Alstom's engineering centre in Bengaluru, Karnataka, and built at the Sri City facility, about 70 to the north of Chennai.

Olivier Loison, Managing Director, Alstom India said, "Our work together began with Chennai's first metro rail project, which also led to the setting up of our Sri City facility to build trains for Chennai Metro Phase I. From modern metro trains to advanced driverless trains, we are proud to contribute to CMRL's urban rail mobility ambitions."

Configured for grade of automation 4 (GoA4) driverless operations with an operational speed of 80 km/h, Alstom's Metropolis trains feature regenerative braking and advanced cybersecurity.

Each three-car train-set can accommodate up to 900 passengers, equipped with air conditioning, perch seats, CCTV cameras, real-time passenger information displays and dedicated spaces for women and differently abled commuters, the release said.

This manufacturing milestone follows the successful completion and delivery of all 36 Metropolis train-sets — a total of 108 cars, which power the commencement of revenue passenger operations on Phase II's 26 km Corridor 4 connecting Poonamallee Bypass to Light House across 28 stations, 18 of which are elevated and 10 are underground. The deliveries were finalised in October 2026.

Infosys Science Foundation announces six winners of Infosys Prize 2026

Our Bureau
Bengaluru

Six researchers were announced as winners of the Infosys Prize 2026 across six categories by the Infosys Science Foundation (ISF) on Thursday.

The winners are Karthik Sastry (economics) for his work on climate change, technological innovation and business cycles; Swarun Kumar (engineering and computer science) for advances in low-power wireless networks, sensing and control; Gautam Bhatia (humanities and social sciences) for his contribution to legal scholarship; Isha Jain (life sciences) for pioneering discoveries in oxygen biology and new therapeutic strategies; Riddhipratim Basu (mathematical sciences) for contribution to probability theory and statistical physics; and Manoj Kumar Joshi (physical sciences) for experimental advances in quantum simulation using trapped ions.

The prize comprises a gold medal, a citation and a purse of $1,00,000 or its equivalent in INR.

The winners were selected by an international panel of jurors, comprising renowned scholars and experts. From 2024, the prize has shifted focus to honour researchers under the age of 40, emphasising the need for early recognition of exceptional talent.

The winners were announced by ISF trustees Srinath Batni, K Dinesh, Kris Gopalakrishnan, Pratima Murthy and SD Shibulal.

NR Narayana Murthy addressed the audience in a recorded message. The other trustees of ISF — Mohandas Pai, Nandan Nilekani and Salil Parekh — also extended their congratulations to this year's winners.

Srinath Batni, President, Infosys Science Foundation, said, "I extend my warmest congratulations to the winners of the Infosys Prize 2026. Their work demonstrates how rigorous research and the pursuit of new knowledge can deepen our understanding of the world and help address some of humanity's most complex challenges."

Modi to flag off 7.5-km section of pink line metro in Bengaluru today

Our Bureau
Bengaluru

Prime Minister Narendra Modi will inaugurate the 7.5-km stretch of Bengaluru's Namma Metro pink line, connecting Kalena Agrahara to Tavarekere, on Friday, expanding connectivity in South Bengaluru.

The original estimated cost of the 21.26-km pink line corridor, from Kalena Agrahara to Nagawara, was ₹8,730 crore. This has since risen to ₹17,346 crore, of which the State government's share is approximately ₹12,000 crore, said Ramalinga Reddy, former Transport Minister. He currently holds the Forest, Ecology and Environment portfolio.

Modi is also scheduled to inaugurate and lay the foundation stone for projects worth over ₹15,600 crore.

He will flag off the Bengaluru-Mangaluru-Madgaon Vande Bharat Express. In Mysuru, he will inaugurate the Cosmos-Mysuru Planetarium, India's first LED-dome planetarium.

The project, developed by the Indian Institute of Astrophysics, received ₹5 crore through Union Finance Minister Nirmala Sitharaman's MPLADS allocation.

Govt mulls cutting fleet needs for car rental biz

New Delhi: The Ministry of Road Transport and Highways has proposed reducing the minimum fleet requirement to enter car rental business to five vehicles from the existing 50. The Ministry, in a draft 'The Rent-a Cab Scheme 2026', said the applicant must have at least two motor cabs stationed at each place of operation and maintenance not less than five motor cabs in total. PTI

'India's AI strategy guards it from global industry shifts'

STRONG PUSH. Nasscom chief says India should consider building its frontier models

Vallari Sanzgiri
Mumbai

India with its current AI strategy will not be affected by ongoing developments in the global chip industry, Nasscom Chairperson Srikanth Velamakanni told *businessline* in an exclusive interaction.

Responding to queries on India's dependence for chipsets on single players like Nvidia and the global giant's now-confirmed change in leadership, Velamakanni stated that India currently does not suffer from a dire need for chipsets.

He explained this to be so because of a lack of sovereign frontier models.

"For India's current AI strategy, we are okay in terms of chips. If our strategy needs to be revised, then we will need a much better plan for chips as well as for model creation in India. Current strategy seems to be that, except for a couple of strategic sectors, where we need Indian models, and Indian models, I don't see if there's a push for saying that Indian models have to be frontier level," said Velamakanni.

> If our strategy needs to be revised, then we will need a much better plan for chips as well as for model creation in India
>
> **SRIKANTH VELAMAKANNI**
> Chairperson, Nasscom

DEMAND RESTRICTED

While he agreed some sectors like defence or cybersecurity might report a higher demand for chips in the future, the overall demand for the components is restricted.

This could change if the country shifts focus around building foundation models as that would require thousands of chips.

"If there's a strong model-related push to build a sovereign model out of India and bring it in India, then it will make sense to also say we need to have a reservoir of chips that enables us to build those models. Directionally, at least I'm seeing a strong push by India on that," said Velamakanni, while adding that India should still consider building its frontier capabilities out.

Further, Velamakanni pointed out that even with a leadership change there were unlikely to be any short-to-medium term impact in terms of the global supply chain.

However, he stressed the need for a larger discussion in terms of the long-term consequences.

"Even with any change in leadership, that will not fundamentally change Nvidia's ability to serve the world. What it does in the medium to long term for the supply chain of chips, we'll have to seriously consider. In the short to medium term, I don't think anything changes in terms of supply of chips around the world," he said.

CO-DEPENDENT

This is also because Nvidia has bought a lot of the capacity of Taiwan Semiconductor Manufacturing Company (TSMC), which is one of the three main companies critically needed for chip production.

"Nvidia has bought capacities from each other for a significant period of time. So, TSMC strongly depends on Nvidia and ASML (Dutch semiconductor firm) and ASML has locked in demand from Nvidia and DSMC. So, this ecosystem is locked up for quite some time. At least for the immediate future, a lot of the chips that are produced globally will be produced by Nvidia, along with TSMC and ASML. They continue to lead the race for AI chips, at least in the short to medium term," Velamakanni said.

Air India to convert passenger jets into freighters to boost revenue

Aneesh Phadnis
Mumbai

Air India plans to grow its cargo business by converting passenger aircraft into dedicated freighters. This is one of the strategies proposed by its new Chief Executive Officer Tewolde Gebremariam to increase revenue, Singapore Airlines said in its investor presentation on Thursday.

Singapore Airlines owns 25.1 per cent stake in Air India and records its share of profit or loss in its consolidated financial statements.

Over the past few months, Air India's cargo business has been boosted by better capacity utilisation and higher yields. The airline has also been able to carry higher cargo loads to the US and Canada as a result of one-stop operations that had to be undertaken due to airspace closures.

CARGO REVENUE

Along with cargo revenue growth, Air India is targeting increase in sales from overseas markets to mitigate impact of rupee depreciation.

Air India will rebalance services between Mumbai and Delhi. It will establish a third hub in Bengaluru to

mitigate the impact of Pakistan airspace closure, Singapore Airlines has said.

Air India is also expanding its commercial partnerships with Singapore Airlines and other airlines for higher revenue.

In October, Air India and Singapore Airlines introduced common fares on various routes. "Average daily bookings on flights operated by both carriers have increased," it said.

UNDER PRESSURE

Singapore Airlines has been facing pressure from its investors over its decision to invest in Air India which has been bleeding money.

In FY26. Air India made a net loss of over ₹22,000 crore due to rupee depreciation and higher fuel burn caused by airspace closures. The huge loss even prompted a debate in Singapore's Parliament.

In H1 FY27, Singapore Airlines net profit declined 44 per cent year on year. Lower share of Air India's loss and lower taxes helped Singapore Airlines to offset a decline in profit.

In a post result conference call on Thursday, Singapore Airlines management said Air India's loss has not declined by 16 per cent. It said lower share of Air India's loss in its financial statement was due to reversal of certain provisions it had made in previous years.

TANGIBLE PROGRESS

In its result statement on Wednesday, Singapore Airlines said Air India has made tangible progress in its multi-year transformation, including enhancements to customer experience and operational performance.

"Singapore Airlines and Tata Sons recognise that a transformation of this scale will take time. Both partners continue to work closely to support Air India's journey towards profitable growth, including strengthening structural cost efficiencies, unlocking greater synergies between Air India and Air India Express, sharpening its commercial strategy to navigate current external challenges elevating its customer proposition," it added.

Police probe site takedowns based on fake HC orders

Reuters
Bengaluru

The government has told internet providers to block 129 illegal betting websites this year based on two State High Court orders that *Reuters* has found were fake, findings that have triggered at least one police investigation.

The forgeries are the latest sign that fake orders are slipping past the official content removal mechanism, considered one of the world's strictest, and could impact the online presence of any organisation operating in the country.

The Supreme Court, in July, set aside a tribunal's orders that relied on non-existent judgments.

The Department of Telecommunications issued two website blocking directions on July 21 and September 2 — both available on its website as part of its routine uploads.

Both directives came attached with emailed copies of purported court orders from the High Courts of Rajasthan and Uttar Pradesh.

A review found neither court order appears in the

courts' online registration records. After questions from the news agency, the Rajasthan High Court's registrar said that the order bearing its name "appears to be fraudulent" and did not exist on its server. The court did not elaborate.

NO EXISTENCE

The Allahabad High Court found its order was fake and filed a police complaint on November 6, prompted by *Reuters*' findings, according to police documents, which showed an investigation against unknown persons had been initiated for alleged forgery and cheating.

"It is fake. It is not a genuine order from High Court of Allahabad," Ghanshyam Yadav, a senior State cyber crime official said on Tuesday. He said no arrests had been made.

Between them, the two orders affected 129 websites featuring gambling, illegal under Indian law.

The Telecom Department, which issued the two takedown directives and sent the court orders to internet providers, did not respond to queries.

FAKE EMAIL ID, QR

In the case uncovered by *Reuters*, the telecom department received an email at 8.59 pm on Sunday, July 19, containing what appeared to be a Rajasthan court order, signed by "Aryan Chaudhary", described as an advocate-on-record.

A query to the email used by Chaudhary bounced back as "Recipient not found".

The court order, now deemed fake, included an instruction to execute its directions within 24 hours and ended by saying it was issued "under my hand and the seal of this Court registrar".

The other fake court order issued under the name of the Allahabad High Court, contained the court's logo and seal, and carried a QR code.

OpenAI launches API processing & inference in India

Our Bureau
Bengaluru

OpenAI has announced local processing and inference for its API in India, giving eligible businesses and developers the ability to process supported AI requests within the country.

Available initially for the GPT-6 Luna model, this offering builds on OpenAI's existing data residency options in India, and helps organisations adopt AI for work that requires in-country processing. According to the AI giant, for Indian organisations, where AI processes information can be a deciding factor in whether an application moves into production.

"Some Indian businesses have not fully deployed AI because they need the information involved to be processed within the country," said Nitin Bawankule, Head of Enterprise-India, OpenAI. "Local inference gives them more control over where supported workloads run and helps address a practical barrier to adoption. It gives more businesses a way to put OpenAI's tools to work and scope to build for enterprise needs."

Asean-India Summit: PM Modi to focus on strategic ties as trade talks drag on

Amiti Sen
New Delhi

The Asean-India Trade in Goods Agreement (AITIGA) review process is taking time as developing a consensus among the 10 Asean members is a complex exercise, but India is simultaneously pursuing bilateral trade facilitation initiatives and agreements with individual countries to expand commercial opportunities, the Ministry of External Affairs (MEA) has said.

Prime Minister Narendra Modi will visit Manila on November 16-17 to participate in the 23rd India-Asean Summit and the 21st East Asia Summit on November 17, with India seeking to strengthen its strategic engagement with the region while pushing for an early conclusion of the long-pending AITIGA review.

"We want the review of the AITIGA process to be concluded as soon as possible. That conversation is ongoing. However, we are also at the bilateral level doing discussions on trade facilitation and developing bilateral trading relations of a

Prime Minister Narendra Modi

much higher quality. So the trade interests that India has in the region are being looked after whether or not we have completed the review of the AITIGA process," MEA Secretary (East) Rudrendra Tandon said at a special media briefing in New Delhi on Thursday.

MULTILATERAL TRADE

He pointed out that negotiating a multilateral trade arrangement involving 10 countries (now 11) was inherently more time-consuming, as reaching a consensus on individual trade issues required reconciling diverse interests.

"But be assured that on the bilateral track we are also doing several trade facilitation and trade agreements that will provide opportunities for our companies and their companies to do trade," he said.

The Asean bloc includes Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Singapore, Thailand, Vietnam and the latest addition, Timor Leste.

The AITIGA review, initiated at India's insistence to address tariff asymmetries, non-tariff barriers and the widening trade deficit, has remained stuck over differences on market access, rules of origin and the extent of concessions. The latest round of negotiations in Jakarta in October failed to resolve the outstanding issues, with the next meeting of the joint committee scheduled in India in January 2027.

TRADE DEFICIT

In 2025-26, India-Asean trade stood at $128.38 billion, with India's exports at $38.41 billion and imports at $89.96 billion, leaving a deficit of $51.55 billion, compared with about $7 billion when the agreement came into force in 2010.

Modi's visit comes as India and Asean mark 2026 as the Year of Maritime Cooperation, the MEA noted. The two sides will review implementation of their comprehensive strategic partnership, including the plan of action for 2026-30, and chart future cooperation.

Modi will also participate in the East Asia Summit, which will provide an opportunity to exchange views with Asean and other participating countries on regional and global developments.

Akasa Air's loss widens to ₹550 crore in Q1 FY27

Rohit Vaid
New Delhi

Akasa Air's net loss widened to around ₹550 crore in the first quarter of FY27, compared with around ₹350 crore in the corresponding quarter a year earlier, industry sources told *businessline*.

The airline, like other Indian carriers, faced headwinds from high fuel costs and foreign exchange fluctuations during the quarter. Accordingly, its quarterly net loss increased by around ₹200 crore, or about 57 per cent, over the year-ago period. The airline did not respond to queries sent by *businessline* on its quarterly loss figures.

INVESTOR TRUST

However, Akasa Air has said it remains confident of executing its growth plans.

"Akasa Air is a well-capitalised airline with a clear long-term growth strategy. This financial strength allows us to execute our growth plans with confidence and make decisions that best support our long-term business objectives," an airline spokesperson said. "We are grateful and honoured to have the support of investors, who remain bullish on the execution capabilities and growth path of Akasa."

The quarterly loss comes after Akasa ended FY26 with a net loss of ₹2,716 crore, an increase of around 37 per cent, even as revenue grew by 35 per cent. A weak rupee weighed on its financial performance. Per an earlier *businessline* report, the airline has raised ₹450 crore from existing investors.

CONTRIBUTIONS

At an extraordinary general meeting on September 30, shareholders approved the issuance of compulsorily convertible preference shares worth ₹450 crore.

The issuance covered 29 individuals and entities, including the Jhunjhunwala family and the family offices of Azim Premji and Ranjan Pai.

Rekha Rakesh Jhunjhunwala contributed around ₹217 crore, accounting for nearly half the amount, while Azim Premji's family office invested around ₹94 crore.

In terms of fleet expansion, Akasa has inducted its 45th aircraft, marking its fourteenth aircraft induction this calendar year.
