Singapore-based FPIs' India assets fall 17%

FOREIGN PORTFOLIO INVESTORS (FPIs) from Singapore recorded a 17.2% decline in their equity assets in India over the past year, with assets falling from ₹4.94 lakh crore in July 2025 to ₹4.09 lakh crore in July 2026, marking the steepest decline among the top 10 investing nations, as per NSDL.

As a result, Singapore slipped to the fourth position from third in the ranking of the top 10 countries by FPI equity assets in India. Besides Singapore, Japan (down

10.5%) and Luxembourg (down 9.4%) also witnessed significant declines in their equity assets. Overall, FPI equity assets in India fell 2.4% year-on-year to ₹70.25 lakh crore.

New Delhi, August 8

HERO'S EV ARM Vida may be trailing legacy players TVS Motor Company and Bajaj Auto, as also startup Ather in sales, but when it comes to the overall EV space, the two-wheeler giant is no loser.

FY26 sales data sourced from the Society of Indian Automobile Manufacturers (SIAM) show that TVS was India's biggest electric two-wheeler (E2W) player with sales of 3,67,501 units, followed by Bajaj (3,02,674 units) and Ather (2,60,070 units). Vida — even though its sales jumped 154% in FY26 — was a distant fourth (1,48,473 units).

After Q-comm, now quick doctor within minutes

Doc home visits in 20-60 minutes getting popular

SREYA DEB
New Delhi, August 8

GROCERIES, PHONES, LAP-TOPS, ambulance, medicines — if all of this can be available within minutes, why not a doctor as well?

Doctor home visit services within 20-60 minutes are increasingly becoming a popular healthcare option, especially

CONSULTATIONS ON CALL

- Model works in urban settings, fills gap of quality-assured primary healthcare
- Most visits instant requests rather than scheduled appointments

Several players now in segment — DocHome, Pulse Doctor at Home, Doctor Dada, Dr Morepen, Kyno, Sanocare

in metropolitan cities where traffic congestion, long hospital queues and busy schedules make clinic visits inconvenient.

Several players have come up in this segment, such as DocHome which operates in over 14 cities, including Delhi,

Mumbai, Bengaluru, Chennai, Hyderabad, Kolkata and Pune, with verified doctors available for urgent home consultations.

Hospital chains Apollo, Medanta, Max Healthcare also have similar services

Services function on pay-per-visit basis; costs ₹500-₹1,500

Hospitals offer specialist visits, nurses and home medicine deliveries as well

US SENATE PASSES RUSSIA OIL TARIFF BILL

100% tariff sword hangs over India

Exporters worried if bill becomes law

FE BUREAU
New Delhi, August 8

ANOTHER ROUND OF tariffs on exports to the United States could become a reality with the US Senate passing a legislation empowering President Donald Trump to impose additional tariffs of up to 100% if India continues buying Russian crude oil.

The US Senate on early Saturday India time passed the bipartisan Lindsey O Graham Sanctioning Russia and Iran Act of 2026 by an 86-11 vote. Before it becomes a law, the legislation will have to clear the House of Representatives and receive the President's signature.

The bill, however, does not directly impose tariffs. Instead,

TRADE UNCERTAINTY

Countries to be hit include China, India, Slovakia, Hungary, Azerbaijan

Indian exporters, particularly in engineering sector, express concern

Bill doesn't directly impose tariffs; instead, Sec 113 would give president authority to levy

Exemptions possible for nations importing less than 15% of energy from Russia

Section 113 would give the President discretionary authority to levy tariffs of up to 100% on imports from countries purchasing Russian oil or natural gas. The president would have the power to decide whether to impose the tariffs, which countries to target and the rate applicable to them.

Indian exporters, particularly in the engineering sector, have expressed concern over the

proposed measure. The US is the largest market for India's engineering goods. "If the bill becomes law, it might have significant impact on Indian goods exports. At present, however, it would be premature to discuss any possible impact of this legislation," said Chairman of Engineering Export Promotion Council (EEPC) Pankaj Chadha.

No charges for UPI users, small merchants: Govt

FE BUREAU
New Delhi, August 8

THE GOVERNMENT ON Saturday clarified that UPI users will not be burdened with transaction charges, and that any future merchant discount rate (MDR) will apply only to a limited set of merchant transactions above a specified threshold.

Even then, the MDR will be nominal and significantly lower than the rates typically charged on debit and credit card transactions, it said.

"The recent amendment to the Payment and Settlement Systems Act (PSS Act) has generated debate, with some misinterpreting it as a move to impose charges on ordinary users," the finance ministry said in a statement. In reality, the amendment is an enabling provision designed to ensure UPI's long-term sustainability, technological advancement, and resilience against emerging risks, it said.

"Consumers making pay-

CLEARING THE AIR

Levy only for merchant transactions over certain limit

Charges to be far lower than debit/credit cards

Move to ensure UPI's long-term sustainability, resilience

ments will not face any transaction charges," it said, adding that "all person-to-person transactions will continue to be free of charge." It further said the "vast majority" of UPI transactions would continue to remain free for merchants. Any MDR, if introduced, would be "threshold-based and not blanketly levied to all".

Continued on Page 2

selected locations, including New Delhi, Chennai and Bengaluru, besides other cities.

In Delhi-NCR specifically, providers such as Pulse Doctor at Home, Doctor Dada, Dr Morepen and DocNCR promise doctor arrivals within 20 to 30 minutes. All of these services function on a pay-per-visit model, including Sanocare, which operates primarily in south Delhi localities.

Hospital chains Apollo, Medanta and Max Healthcare also have same-day doctor services on similar models.

Iran: Hormuz deal close, but hinges on conditions

BLOOMBERG
August 8

IRAN SAID IT'S 'very close' to a deal with Oman on a new maritime transit route in the Strait of Hormuz, after expectations grew this week that an announcement may soon be made.

Iran's Foreign Minister Abbas Araghchi said on Saturday that negotiators are closing in on temporary lanes for ships entering and exiting the Persian Gulf. He cautioned that any agreement won't result in an immediate reopening of the strait, signaling that any respite for energy supplies may be limited.

"The opening of the Strait is subject to other conditions," said Araghchi.

Conditions include compensation for US's violations of Islamabad Agreement, said Araghchi

How despite low sales, Hero winning in EV space

VIKRAM CHAUDHARY
New Delhi, August 8

HERO'S EV ARM Vida may be trailing legacy players TVS Motor Company and Bajaj Auto, as also startup Ather in sales, but when it comes to the overall EV space, the two-wheeler giant is no loser.

FY26 sales data sourced from the Society of Indian Automobile Manufacturers (SIAM) show that TVS was India's biggest electric two-wheeler (E2W) player with sales of 3,67,501 units, followed by Bajaj (3,02,674 units) and Ather (2,60,070 units). Vida — even though its sales jumped 154% in FY26 — was a distant fourth (1,48,473 units).

THE E2W LANDSCAPE

Meanwhile, TVS and Bajaj have leveraged their vast dealer networks to scale up E2Ws — with over 2,000 and 4,500 touchpoints, respectively, but Hero took a phased

approach with Vida with over 200 select outlets before expanding its wider dealership fold. Ather's retail and service network, meanwhile, has crossed 700 touchpoints.

It was the VX2 model with a removable battery that pushed Vida's sales, taking it to the top 4. "Vida had a slow start since 2022, but found momentum after the launch of the VX2

with a removable battery in July 2025," a partner with a Big 4 consulting firm told FE. "What helped was the launch of the Battery-as-a-Service (BaaS) scheme with the VX2, bringing the upfront cost down to less than ₹50,000 — effectively placing a high-tech electric scooter at a price point lower than entry-level petrol scooters. Hero is now expected to leverage its massive rural network to bring its affordable EV solutions to tier-3 markets."

"Although Vida and Ather compete in certain price segments, there is a differentiation," said S Subramanian, professor of strategic management at IIM Kozhikode. "Ather's value

proposition is built around a sophisticated software ecosystem (AtherStack), connected features, and an aspirational, tech-led brand identity aimed primarily at urban consumers. Vida, in contrast, emphasises the convenience of removable batteries, home charging, and accessibility for mainstream buyers seeking affordability."

According to Subramanian, this reflects strategic market segmentation with selective overlap rather than pure cannibalisation. "Hero participates directly when a Vida scooter is sold, while also sharing in Ather's long-term value creation through its equity stake," he said.

Qualification goes beyond grades: PM

PM Modi, Union Education Minister Pralhad Joshi and others at the 57th Convocation Ceremony of IIT Delhi, on Saturday

PRESS TRUST OF INDIA
New Delhi, August 8

PRIME MINISTER NARENDRA Modi on Saturday, addressing the 57th convocation ceremony of IIT Delhi, told students to question things that are accepted without a thought, and stressed that they should not stop at questioning but have the courage to also find their solutions. Modi said India is now working towards becoming self-reliant in every sector; whether it is economic self-reliance, technological self-reliance, or industrial self-reliance; this forms the strong foundation of 'Viksit Bharat'.

"Amidst all this rapid change, remember my words: the one who continuously learns is the one who will win," he said.

Modi emphasised "Your degree tells the entire world that you know exactly how to solve highly difficult problems," he said. Crediting the current generation for powering India's Startup Revolution, he hailed the massive economic momentum generated by unicorns, digital

payments, and the FinTech boom, which have provided unprecedented entrepreneurial platforms for millions.

PM Modi also said that he wished girls were also there among the medallists and awardees at IIT Delhi's convocation, emphasising the need for greater female participation in academic excellence. The PM presented the institute's most prestigious honours, including the President's Gold Medal, Director's Gold Medal, Shankar Dayal Sharma Gold Medal, and Perfect Ten Gold Medals to meritorious students.

The university conferred degrees on over 3,000 graduating students, including 587 PhD scholars, during the ceremony. "You will profoundly remember and be thankful for all these individuals in every future success of yours," Modi said. The Prime Minister also inaugurated Param Pragya, an AI-powered high-performance supercomputing facility established at the IIT Delhi's Sonipat Campus.

No charges for UPI users and small merchants

ONCE PARLIAMENT PASSES the Taxation and Other Laws (Amendment) Bill, 2026, the UPI and Services Steering Committee, headed by NPCI, will decide on the MDR, if any. The government said the amendment should not be interpreted as an immediate move to impose charges on ordinary UPI users.

"With exponential transaction volumes, the system requires significant and continuous upgrades in cybersecurity, fraud prevention, and infrastructure," the government said.

It also said expanding competition in the digital payments sector would require more companies to participate in the ecosystem.

The government further argued that dependence on subsidies alone would not be sufficient to support the next phase of UPI's growth. "Reliance on subsidies alone is not viable for the next wave of growth," it said, adding that a balanced framework was needed to ensure UPI remains "robust, inclusive, and future-ready". The finance ministry also rejected reports suggesting that external influences were driving the proposed policy changes.

It pointed to UPI's launch in 2016 and the decision to make the platform free for citizens and merchants from January 2020 as evidence of its long-term commitment to the digital payments system. Since its launch in 2016-17, UPI has transformed India's digital payments landscape, processing 2,366 crore transactions worth ₹29.9 lakh crore in July 2026 alone.

Hormuz deal hinges on conditions: Iran

"THIS INCLUDES THE compensation for the US's violations of the Islamabad Agreement," Araghchi added, referring to the now-lapsed memorandum of understanding signed in June. The ceasefire between the US and Iran lasted less than a month before collapsing over disagreements about control of Hormuz. It's unclear how Washington, which Iran insists is not part of the deal for Hormuz, will respond to a final agreement.

US Vice President JD Vance on Saturday said Washington is working to establish a route allowing commercial ships to safely pass through the Strait of Hormuz, while continuing to pressure Iran amid ongoing tensions in the region. Speaking to Fox News, Vance said the plan includes an Iranian commitment not to fire on commercial vessels and Tehran's assurance that it would allow the maximum flow of oil through the strategic waterway. However, he said the US remains sceptical of the assurances. "We're talking to the Iranians, of course. We're trying to maximise the amount of oil and gas that is coming out of the Strait of Hormuz," Vance said.

US President Donald Trump has insisted for months that navigation through Hormuz must be resumed unimpeded, threatening fresh attacks on Iran if it fails to reopen the waterway. The US has also maintained a blockade on Iranian ports. Reuters reported that the US will lift the naval blockade once a deal between Oman and Iran to restore commercial shipping is announced, citing a US official. A deal, the official said, is expected soon. Traffic through the chokepoint has been largely blocked since the start of the war, but some ships

have continued to ferry cargoes through as part of a shuttle programme involving help from the US military. Many have done so turning off their transponders, making trips harder to track. Abu Dhabi National Oil said one of its vessels was targeted by missiles while transiting Strait of Hormuz early on Saturday, the United Arab Emirates's state-run WAM news agency reported. The attack caused no injuries and the situation has been brought under control, it added. Three other ships from the UAE's biggest oil producer were attacked this week. The incident highlights the ongoing risks for shippers attempting to make the crossing during the conflict, as Iran insists on asserting control over Hormuz. "Deals to reopen the Strait of Hormuz remain elusive, with investors teetering in the balance," said Rob Haworth, senior investment strategy director at US Bank Wealth Management. "For now, traffic remains low and the path to a durable deal remains unclear." Any deal for the Strait of Hormuz will need to be approved by Iran's Supreme Leader Mojtahab Khamenei and Iranian officials have said that it takes time to reach him, potentially delaying any announcement. There's no indication as yet over whether Khamenei has given his assent to current plans.

Clashes between the Iran-backed Houthi militants and the Saudi-aligned, internationally recognised government in Yemen also threaten to further escalate tensions in the Middle East. Yemen said on Saturday its armed forces carried out a military operation overnight against the Houthis, who control much of the country, marking the first known retaliation to attacks this week.

100% tariff sword hangs over India

THE ENGINEERING GOODS exports to the US stayed positive in financial year 2025-26 despite punishing Trump tariffs, but any additional levy would dent the competitiveness of Indian shipments, he added.

"The White House supports the measure and has indicated that Trump would sign it. However, passage in the House isn't certain. Some lawmakers are concerned about giving the president wider tariff powers and raising costs for American businesses and consumers," said Founder of Global Trade Research Initiative Under Sri

vastava. The bill's sponsors have identified China, India, Slovakia, Hungary and Azerbaijan as the five largest buyers of Russian crude, he pointed out.

The legislation would require the US Trade Representative (USTR) to identify and review the five largest buyers of Russian energy every 180 days.

The proposed law also provides for exemptions in certain circumstances. Countries importing less than 15% of their total energy from Russia and demonstrably reducing their dependence on Russian energy

could qualify for an exemption. The tariff authority would remain in force for five years unless renewed by Congress.

"The stakes are high. Russia supplied 30.3% of India's crude imports in 2025-26 — \$40.8 billion of a total \$134.7 billion. Discounted Russian oil has lowered India's import bill, strengthened energy security and helped contain inflation. Giving it up under pressure would impose real costs on the Indian economy," Srivastava said, adding: "India shouldn't allow tariff threats to determine its energy policy."

After q-comm, doctor within minutes

HOWEVER, THEY DO not guarantee a doctor under an hour. Max@Home, Medanta and Apollo HomeCare offer services across major cities, including Delhi-NCR, Dehradun, Mohali, Mumbai, Lucknow, Nagpur, among others, and offer specialist visits, nurses and home medicine deliveries as well.

Founder of Dr Morepen Home Abhishek Bhayana said they work with more than 150 doctors across Delhi-NCR, "Once an enquiry is logged, a doctor is assigned in 4-5 minutes on average. Most of our visits are instant requests rather than scheduled appointments, and the doctor typically reaches the patient's home in under 60 minutes." In less than a year and a half, Dr Morepen's doctor at home service has serviced 10,000 new patients, gaining approximately 500 new patients every month, with nearly 50% of the patients coming back for repeat consultations with the doctors at home, said Bhayana. Aditya Gupta, founder of Kyno Health, which operates in Delhi-NCR and Bengaluru and offers only home vis-

its, said, "Kyno launched with at-home medical services in January 2023, and we have since completed over 50,000 consultations." He added that usual complaints are for emergencies like fever, digestive issues, blood pressure, breathing difficulty, allergies or animal bites. "We work exclusively with our own panel of doctors and each one is mapped to a defined, restricted zone. That geographic discipline allows us the 60-minute arrival window consistently." Similarly, Doctor@Home, has been operational since 2021, and has provided care for approximately 12,000 families, providing a network of 500 doctors across the cities under its purview. Pricing depends on several factors. A standard same-day gen-

eral physician home visit typically costs between ₹500 and ₹1,500. Sanocare offers a doctor-supervised home visit starting at ₹499, while Doctor@Home lists a pricing of approximately ₹999 for a home consultation. Pulse Doctor at Home and Doctor Dada charge around ₹1,499 for a GP visit in Delhi-NCR. Premium services or specialist consultations generally range from ₹1,800 to ₹5,000. According to Gupta, this model currently works in urban settings only. "Kyno fills the gap of quality-assured immediate primary healthcare in urban India," he added.

Quick-commerce app Blinkit offers a free ambulance service within nine minutes across select locations in Delhi-NCR. Launched in January 2025 with five ambulances, the fleet has now grown to 49.

On-board services include essential medicines, equipment to check vital signs, automated external defibrillator, oxygen cylinder and stretcher, as well as trained paramedics and duty assistants with a doctor on call for guidance.

NOTICE OF THE 29TH ANNUAL GENERAL MEETING AND INFORMATION ABOUT REMOTE E-VOTING

NOTICE is hereby given that the 29th Annual General Meeting (AGM) of the Members of the Goel Construction Company Limited (Company) will be held on Monday, 31st August, 2026 through Video Conferencing (VC)/Other Audio Visual Means (OAVM) at 04:00 P.M. (IST) to transact the Businesses as set out in the Notice of AGM in compliance with the applicable provisions of the Companies Act, 2013 and the Rules framed thereunder and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 read with MCA General Circular Nos. 14/2020 dated April 8, 2020 and 17/2020 dated April 13, 2020, in relation to "Clarification on passing of ordinary and special resolutions by companies under the Companies Act, 2013", General Circular Nos. 20/2020 dated May 5, 2020 including subsequent circulars issued in this regard, the latest being 03/2025 dated September 22, 2025 and other circulars are issued by the Securities and Exchange Board of India from time to time.

The Notice of AGM and Annual Report for the Financial Year 2025-26 have been sent through electronic mode to the Members whose e-mail addresses are registered with the Company's RTA/Depository Participant(s), unless any Member has requested for a physical copy of the same. Further, in accordance with the Regulation 36 (1) (b) of the SEBI (Listing Obligations and Disclosure Requirement) Regulations, 2015 ("LODR Regulations"), a letter containing the web-link including the exact path, where complete details for accessing the notice of AGM and Annual Report for financial year 2025-26 of the Company has been sent to all those Members who have not registered their email IDs. The Notice of AGM and Annual Report for the Financial Year 2025-26 is available and can be downloaded from Company's website www.goelconstruction.co.in, MUFG Intime India Private Limited ("MUFG") website i.e. <https://investvote.linkintime.co.in/> and website of the Stock Exchange (BSE Limited) i.e., www.bseindia.com. In compliance with Section 108 of the Companies Act, 2013 read with Rule 20 of the Companies (Management and Administration) Rules, 2014 and Regulation 44 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, the Members are provided facility to cast their votes electronically through remote e-voting and e-voting during the AGM on all business to be transacted at the said AGM for which the Company has engaged the services of MUFG Intime India Private Limited. The voting rights of the Members (for voting through remote e-voting or e-voting during the meeting) shall be in proportion to their share held in the paid-up equity share capital of the Company as on Monday, 24th August, 2026 ("Cut-off date"). The remote e-voting period will commence from Friday, 28th August, 2026 from 9:00 A.M. (IST) and will end on Sunday, 30th August, 2026 at 5:00 P.M. (IST), the remote e-voting shall not be allowed beyond the said date and time. During this period, Members may cast their votes electronically. Further once the vote on resolution is cast by the member, the member shall not be allowed to change it subsequently or cast the vote again.

The detailed instructions/manner for the remote e-voting process, joining the AGM and e-voting during the AGM are given in the Notice of the AGM. All the Members attending the AGM through VC/OAVM will be counted for the purpose of reckoning the quorum under Section 103 of the Companies Act, 2013. The facility of e-voting shall be made available during the AGM. The Members attending the meeting, who have not cast their vote through remote e-voting, shall be entitled to exercise their voting rights during the meeting through e-voting. The Members who have already cast their vote through remote e-voting, may attend the AGM but shall not be entitled to cast their vote again during the AGM. A person whose name is recorded in the register of members or in the register of beneficial owners maintained by the depositories as on the cut-off date i.e. 24th August 2026, only shall be entitled to avail the facility of remote e-voting as well as e-voting during the AGM. Any member who is not a member as on the cut-off date should treat this Notice for information purposes only. The detailed procedure for obtaining User ID and password is also provided in the Notice of the meeting which is available on Company's website and MUFG's website. Members, who have not registered their e-mail address with the Company/RTA/DPs, please follow instructions as mentioned in AGM Notice for registration of email id for obtaining Annual Report for the 2025-26 and the login details for e-voting.

For queries and details relating to remote e-voting and e-voting during the AGM, please refer to the Notice of AGM or may write email to the Company Secretary of the Company at contact@goelconstruction.co.in. In case of grievances connected with facility for remote e-voting, please contact to Mr. Rajiv Ranjan, Sr. Assistant Vice President-E-voting, Add: C 101, 247 Park, L.B.S. Marg, Vikhroli (West), Mumbai- 400083 or send an email- enotices@in.mpmis.mufg.com, or call 022-49186000.

Despite low sales, Hero winning on EVs

HE ADDED THAT Hero's C-suite representation on Ather's board provides vital strategic visibility into one of India's leading EV players.

Hero's stake in Ather serves as more than a financial hedge — it is a portfolio of complementary bets

across the E2W landscape. If Hero is able to successfully convert market insights from Ather into competitive strength for Vida, it would have executed a masterclass in portfolio strategy, and even if not, it would keep winning on the back of Ather.

Meta's intermediary status under question

ACCORDING TO THE sources, if a platform determines what content gets shown to users, it amounts to publishing, and platforms would then have to take responsibility for their actions. The issue assumes significance as intermediaries enjoy certain legal protections under the Act, subject to compliance with prescribed conditions. Sources said the government has also asked Meta to take measures to address deepfakes following multiple rounds of discussions held over the past few days.

As such, intermediaries, including social media platforms, are statutorily obligated under Section 79 of the IT Act, read along with IT Rules, 2021, to observe due diligence as a condition for availing exemption from liability in respect of third-party information uploaded, published, hosted, shared or transmitted on or through their platform. Failure to observe such due diligence obligations may result in the

loss of the exemption from liability under Section 79 of the IT Act, and such intermediaries may also be liable for consequential action as provided under any law including the IT Act and the Bharatiya Nyaya Sanhita. They added that the government would review the outcome of those engagements before deciding whether to seek legal opinion. Sources said the government will also engage with other platforms as it examines whether they satisfy the definition of an intermediary under Indian law. This week, the government questioned global team of Meta on issues including deepfakes, child sexual abuse

material, unlabelled synthetic content and the functioning of recommendation systems.

After two days of intensive questioning of Meta top officials, the government on Friday shifted to technical discussions with the social media giant, during which the company detailed how it plans to address the Centre's concerns over deepfakes, child sexual abuse material and unlabelled synthetically-generated content on its platforms, sources had said. Officials will regularly follow up with the company on its progress, sources asserted. One of the key issues discussed was the reappearance, continued circulation and virality of AI-generated harmful content, even after it has been flagged. The government had also questioned Meta on why AI-generated videos without labels continue to remain visible on its platforms despite the IT rules requiring synthetic content

to be identified and labelled, sources said.

The government asked Meta to have greater human oversight in content moderation, with enhanced awareness and understanding of Indian languages, as well as local nuances. Another meeting is expected to be held in the coming week. Government sources said the objective is not censorship, but to ensure that the company complies with Indian laws.

The government will continue to press the company to undertake sustained measures, actions and improvements to address its various concerns, they added. Meta's team led by Meta's global affairs head Joel Kaplan had met IT Minister Ashwini Vaishnav and IT Secretary S. Krishnan on Wednesday and Thursday, following the government's summons over the temporary restriction of Prime Minister Narendra Modi's Facebook post recently.

Cooperatives should look at RBI differently, says Shah

PRESS TRUST OF INDIA
Mumbai, August 8

UNION MINISTER OF Cooper-
ation Amit Shah on Saturday
urged urban cooperative banks
(UCBs) to look at the RBI from a
“different viewpoint,” under-
lining that the central bank has
“proactively helped” the sector
in recent times.

Speaking at the inaugura-
tion of a new office building of
the National Urban Coopera-
tive Finance and Development
Corporation (NUCFDC) at the
BSE in Mumbai, Shah also said
that when it comes to the
safety of money, no other seg-
ment is as safe for lenders as
small borrowers.

“I know of your experience
till now. RBI looks at you from a
particular viewpoint, and UCBs
also look at RBI from a differ-
ent viewpoint. But we have to
come out of it,” Shah told the
audience comprising execu-
tives from over 1,400 UCBs
and other stakeholders.

“My five years’ experience
as the Union Cooperatives
Minister suggests that when-

AMIT SHAH,
COOPERATION MINISTER

When it comes
to money,
no other
segment is
as safe for
lenders
as small
borrowers

“Whenever
we have put
a step for-
ward with
confidence,
RBI has
proactively
helped us”

ever we have put a step forward
with confidence, RBI has
proactively helped us,” he
added, listing out the relax-
ations delivered by RBI.

Among other aspects, RBI
has liberalised branch open-
ing, allowed UCBs to offer
doorstep banking, made it pos-
sible for them to issue demand
drafts and life certificates, and
also appointed a dedicated
nodal officer just to look into
the affairs of the UCBs, which
have over ₹6 lakh crore of
deposits, he said.

Shah, who also handles the
Home portfolio, said a lot of
aspects have been resolved
with the help of the RBI, and
also welcomed the raising of
limits on gold loans and per-
mitting one-time settlements
for UCBs.

In a statement on develop-
mental and regulatory policy
accompanying the bi-monthly
policy review announced on
Wednesday, RBI Governor San-
jay Malhotra announced a
move forward on the ‘on-tap’
licensing of UCBs, which will

end a two-decades long pause
in the matter.

In the past, instances of lax
governance practices at UCBs,
which are perceived to be con-
trolled by political heavy-
weights, have led to instances
of some lenders going
down, leading to higher
systemic caution.

Recalling his experience of
chairing a UCB in Gujarat, Shah
said the small borrower seg-
ment is the safest for lenders
and pointed out a scheme of
offering ₹2.5 lakh of loans
without any collateral by his
bank. He said the management
had doubts, but the repayment
rate including interest is over
99% under the scheme, and
the overall lending offered has
been doubled as well.

Shah also announced that
NUCFDC, which works as an
umbrella body for the sector,
will soon be moving its head
office to Maharashtra from
New Delhi, and added that 449
of such lenders are in the state
and 70% of the entities are
from Maharashtra, Gujarat,
Goa and Karnataka.

DPIIT inks pacts with five firms to support startups

THE DEPARTMENT FOR pro-
motion of industry and internal
trade (DPIIT) has inked pacts
with Cashfree Payments, Dar-
win Dynamics, Vultr India,
Cars24, and the Council for
Startup India to support start-
ups, a statement said on Satur-

day. Under the MoU with Cash-
free Payments India, eligible
startups will receive access to
secure and scalable payment and
payout solutions, identity verifi-
cation and risk management
services, along with preferential
onboarding support. —PTI

ally united a diverse spectrum of literary voices across the subcontinent. Interestingly, its inaugural landmark speech titled *Sahitya ka Udeshya* (The Purpose of Literature), in Lucknow, was delivered by none other than Munshi Premchand. These writers reflected the spirit of emancipation, using their

works as a tool of social change, economic justice, and anti-imperialism.

In this context, what may have felled off Chandhoke's attention was the role played by pre-independence nationalist Urdu newspapers like *Pratap*, *Bande Mataram*, *Stiyasat*, *Milap* and *Inqilab*, whose ownership was shared both by Hindus and Muslims. When Gandhi asked the press to express

their opinion freely, Urdu editors delivered with courage, the language itself emerging as a composite cultural bridge of a people diverse and oppressed. This would have sat pretty well with the scheme of this book as the popular notion, more designed than spontaneous, of Urdu being a language of the Muslims alone, has been a grandstanding fallacy of our times.

The essay, *Films as Critiques of Unfreedom*, looks at the influence of cultural platforms like the Indian People's Theatre Association (IPTA) and Hindi cinema. In fact, what was started by the PWA in the 1930s, was carried forward by IPTA and the films in the following decades. Directors such as V Shantaram, Guru Dutt, and Bimal Roy exposed the severe limits on political freedom in everyday life for a populace tied down by poverty, caste and economic inequality.

As the book comes to an end, it poses a difficult question: Can India think politically in its own voice after colonialism? What would it mean to write an Indian political theory grounded in our histories, yet alive to the present? The author provides a backdrop to this existential question in the second essay itself where she dissects the cultural context, which, in the case of India, is a troubled concept, inheriting over the ages plural traditions.

In her Afterword, the author says she does not wish to tell her fellow political thinkers how to write a political theory that is inherently ours. So, what does the book achieve? The answer: The author expands on the repertoire of rights for citizens, asserting that freedom is fluid, never settled. It needs to be argued over in languages that span politics, philosophy, literature, and other legacies that represent a composite culture — the sanjhi virasat.

The book is worth a read for the simple reason that it provokes us — the people — to rethink the ideas that bind us together.

The writer is a former journalist who teaches at Patna Women's College

PROFIT FIRST
Mike Michalowicz
Hachette
Pp 224, ₹599

Conventional accounting uses the logical formula: Sales — Expenses = Profit. The problem is, businesses are run by humans, and humans aren't always logical. Serial entrepreneur Mike Michalowicz has developed a behavioural approach to accounting to flip the formula: Sales - Profit = Expenses. Michalowicz shows that by taking profit first and apportioning only what remains for expenses, entrepreneurs will transform their businesses from cash-eating monsters to profitable cash cows.

INCORRUPTIBLE
Eric Ries
Penguin
Random House
Pp 432, ₹670

As AI transforms industries, startups race to unicorn status and businesses face growing scrutiny over ethics, governance and long-term value, *Incorruptible* by Eric Ries arrives as one of the year's most timely business books. The bestselling author of *The Lean Startup* argues that the greatest threat to a successful company isn't competition, it's the systems that slowly pull it away from its founding purpose.

SUPERTEAMS
Ron Friedman
Hachette
Pp 352, ₹699

What do the best teams do differently? Social psychologist Ron Friedman surveyed thousands of teams and pinpointed the precise habits that separate the best from the rest. It turns out that the most successful teams aren't the ones that collaborate most, get along best, or put in the longest hours. What really sets them apart is the way they manage their energy and attention, bring out the best in one another, and keep improving over time.

GENIUS AT SCALE
Linda A Hill, Emily Tedards, Jason Wild
Penguin
Random House
Pp 320, ₹1,299

Constant tech disruption. Unrelenting economic volatility. Radically shifting demographics and work norms. More than ever, we need to innovate amid these daunting global challenges. But do we have the leadership it takes to make this innovation happen successfully? Linda Hill, Emily Tedards and Jason Wild present their stories in fascinating detail, not only igniting your imagination but providing instructive and inspiring models to follow.

THE GREATEST INDIAN ANIMAL STORIES EVER TOLD
Sumana Roy
Aleph Book Company
Pp 304, ₹899

In *The Greatest Indian Animal Stories Ever Told*, Sumana Roy collects the best fiction written about animals from the past hundred years or so. Beginning with Premchand's classic, *A Tale of Two Bullocks*, and taking in its sweep some of the greatest pieces of literary fiction to have originated in India, including *Rikki-Tikki-Tavi* by Rudyard Kipling and *Maheś* by Sarat Chandra Chattopadhyay, the stories are guaranteed to dazzle the reader.

Unshackle THE MIND

A provocation to rethink what binds us, and that freedom is fluid and never settled

AMITABH RANJAN

THE MONTH THAT just went by was heady. The spectacle from the heart of Delhi was like a waft of fresh air that all of us, as it were, were gasping for. Someday, when the zeitgeist of our times is written down, Jantar Mantar will be mentioned in glowing terms. On a midsummer sweaty afternoon on July 25, basking in media glare after the resignation of the Union education minister, the immediate demand of the protesting students, their leader Abhijeet Dipke said something that betrayed a rare wisdom if one were to go by his youthful years. He said, "Don't make me a hero because of Dharmendra Pradhan's resignation. The country has been ruined because one person has been made a hero."

Dipke's words have an uncanny resonance with what political scientist

Neera Chandhoke says in the introduction to her latest book, *Languages of Freedom*. She sees in Indians a troublesome propensity to apotheosise leaders at whose feet they lay their liberties. And this has proved costly. For, when they do so, their freedom to think, act, and express themselves is suspended; these liberties are placed at the mercy of those in power, who seek to order society in one way or another. The exercise of power demands compliance, and compliance costs freedom.

Chandhoke's book could not have come at a more opportune time. In five insightfully written essays of rare scholarship, she tackles the strands that go with the idea of freedom, what it should mean, and what abounds under the current dominant religious-political ecosystem. Subtitled *The Idea of India in Political Theory, Bombay Cinema, and Progressive Urdu Poetry*, the author presents and analyses how freedom was conceptualised in the languages of political, literary, and cultural stalwarts of India, how it was claimed by a disparate group, and how in recent times, rabid Hindutva nationalism is desperate to stifle it.

Starting with the concept of '*swaraj*' that for the first time found expression in Dadabhai Naoroji's speech in Calcutta

Languages of Freedom: The Idea of India in Political Theory, Bombay Cinema, and Progressive Urdu Poetry
Neera Chandhoke
Speaking Tiger Books
Pp 336, ₹699

in 1906 before it entered India's political lexicon, the author traces its ethical-moral transformation as a tool of non-violent mass mobilisation in the hands of Gandhi. It is here that the author deals at length with what she calls the

Gandhian paradox, proffering an engrossing read. She is not disenchanted with him. He was the man of the moment. He was a liberal to the core in the line of home-grown moderns like Vivekananda and Aurobindo. However, the idiom he deployed to distinguish India from the materialist West was that of upper-caste Hinduism. The use of such words from Indian classics like *ahimsa*, *karma*, Ram Rajya, *sarvodaya*, and *swaraj* itself, tried to strike homogeneity in a multi-religious society. This legacy bedevils our society till today.

At another level, Gandhi's ideal society, a utopia, was so perfect that it foreclosed any political struggles. Therein lay a fundamental flaw. For, it is through politics that people with all their differences negotiate how they are to live together without extinguishing one another's freedom. It was quite ironical too when one realises that Gandhi devised some of the most successful mass movements when it came to getting rid of the British yoke.

One of the essays deals with the formation of the Progressive Writers' Association (PWA) in 1936. Predominantly shaped by Urdu literary figures such as Faiz Ahmad Faiz, Sajjad Zaheer, Ismat Chughtai, Sahir Ludhianvi, and Saadat Hasan Manto, among others, it gradu-

The unconventional life of a scholar of Indology and traditions

Douglas Sell, were former students. The former went on to become a Tibetan Buddhist monk, and the latter became a Lutheran Christian minister. Fond of self-deprecation, Doniger writes, "...both of my young lovers took holy orders after we parted."

Women in academia who de-sexualise themselves to avoid unwanted sexual advances at the workplace might be startled with the question that Doniger poses: "What did it mean for a woman scholar to have a reputation as a femme fatale? I certainly didn't feel that I was striking a blow for sexual equality, but I think it sometimes had that inadvertent effect," she recalls.

This book exposes the double standards of university departments that look down upon women having younger male companions but do not mind men having

younger female companions. It also draws attention to relational dynamics that were called out during the MeToo movement. "...several of my male colleagues...had slept with their students", notes Doniger. She clarifies that Smith became her lover only when she had no "power to give him an academic grade".

Her thematic centering of eroticism in life and textual studies must not be mistaken for her championing of embodied scholarship. The latter treats lived experience of race and gender identity as a site of critical enquiry. Doniger,

on the other hand, characterises 'the Woke world' as one where "you couldn't study x if you were not x", and where "most departments would hire an Indian woman instead of me". This claim comes perilously close to portraying whiteness as victimhood, but her belief stems from a bitter personal experience: one of her "most brilliant Sanskrit students was turned down for a job", arguing that "Sanskrit is just a Brahmin language... a language of oppression and the University should not hire any Sanskritist."

Doniger's tirade against diversity, equity and inclusion (DEI) seems odd for someone whose book mentions repeatedly that she was unqualified for most of the jobs she got. She had a joint appointment in the university's Department of South Asian Languages and Civilisations, and mentored several South Asian students, but does not seem to recognise how her paranoia reflects the anti-immigrant political climate in the United States. It is ironic that she does not extrapolate from "you couldn't study x if you were not x" to reflect on how rare it is to come across South Asian scholars studying American habits, customs and traditions. Compare that with the number of white Americans travelling to study other cultures.

What is most admirable in this book is her honesty, whether she talks about fighting "not for women's rights but for my own rights" or thanks Dinanath Batra, the founder of the Shiksha Bachao Andolan Samiti, for "the rocketing international sales" of her controversial 2009 volume *The Hindus: An Alternative History* that led to a lawsuit against her and Penguin India.

At the age of 85, looking back at a life filled with people and adventures, she has no need to network feverishly like younger scholars who must temper what they say and to whom. It is the lack of pretense and posturing that makes her book worth reading, even if one disagrees with her.

Crafting new HEIRLOOMS

Gen Z’s fashion legacy might not be the weaves they inherit but the way they reinterpret them to give their outfits a fresh lease of life

ANVITII RAI

FOR A GENERATION enamoured with microtrends driven by social media, fast fashion is a symptom of a larger pattern. The ultra-fast production loop sustains itself — a trend comes along, is available widely in online stores and street markets almost immediately, and is replaced by a new one within a fortnight. Apparel manufacturing is adopting the Zara model — putting an item from the design desk to the shop floor in 15 days. However, some fashion commentators argue that for a cohort so aware of trends, personal style has been superseded by algorithmic dressing. Apart from microtrends and the revival of certain aesthetics (like the 90s), the 2020s have not seen a stylistic innovation that would contribute to the decade’s fashion legacy. The new look is unmistakably associated with the 1950s — georgette sarees are short-hand for the Mumtaz drape of the 80s, and low-rise jeans are notorious representatives of Y2K fashion. Veteran fashion journalist Sujata Assomull sums up this current conundrum: “[Personal style] is not driven by an algorithm, nor is it about hopping from the clean-girl aesthetic to the mob-wife trend depending on what is currently dominating your feed.”

Reinterpreting trends

However, some experts opine that Gen Z’s fashion legacy would not be something tangible. Instead, their effect on the fashion cycle itself and the ability to reinterpret trends could come to be associated with the group. Meha Jayaswal, associate dean for fashion styling and fashion communication, Pearl Academy, says that Gen Z’s effect on fashion has upended how trends are interpreted — trends become viral, are then amplified by influencers, which in turn are picked up by mainstream media

(Above, middle) Actress Ananya Panday opened Lakme Fashion Week 2025 in an Anamika Khanna ensemble showcasing Indian craftsmanship with a Western silhouette; (left) influencer Manisha Malik offers a fresh take on workwear by including *chikankari*

and designers.

Dynamic trend cycles and rapidly changing wardrobes could also signal that the cohort is not concerned with possession, and their legacy becomes not the garment or handbag itself, but the story behind it. “This generation is not going to leave behind a Banarasi saree or a patan patola. They will leave a story of when it

was bought, or the story behind a denim jacket that they patchworked with the leftovers of something else,” she explains.

Beyond the algorithm

Other experts concur, while adding that consumption now is shaped by factors beyond the algorithm. Smrita Som, assistant professor at National Institute of Fashion Technology, Delhi, says that the search for the next fashionable thing is not new. Moreover, being born into and growing up in an era of constant crises

has imbued the cohort with “caution and a lot of hopelessness because of the way things are today”. In volatile times, the value of a garment or possession lies not in its permanence, but in the opportunity to reinterpret and personalise it.

Sudha Dhingra, a senior textiles professor at NIFT-Delhi, echoes the sentiment, specifying that the pandemic shifted things for the group. Value is instead attributed to craftsmanship transparency, upcycled family materials, customised modifications, and pieces

backed by authentic historical or human-centric storytelling. Citing the example of her own students, she explains that they expressed interest in reviving weaving techniques like Baluchari. Fast fashion remains more immediately accessible because of its affordability. Carefully crafted garments, however, become aspirational purchases.

This growing interest in craftsmanship is also reflected among fashion creators documenting contemporary style. Fashion content creator Manisha Malik, known for her videos of breaking down Bollywood style and Indian craft, says that her most popular series is on restyling vintage fashion. She reveals that her Gen Z audience gets inspired by her content on Indian textiles, and she has interacted with subscribers who restyled vintage sarees from their mothers or grandmothers. Indian fashion has long influenced global trends — chintz and seersucker are anglicised versions of cheent and shir-o-shakkar. As it visibly makes its way on global runways, interest in such crafts also increases. “It is very personal, relatable, and evokes pride,” she says.

Personalised twists

Members of the cohort are aware of the critiques they receive. Jhanvi Bhatia, a Gen Z fashion content creator, explains the phenomenon — while Gen Z is trend-aware, they also like to put their personalised twist on trends. While keeping up with trends, she attempts to add her personalised twist to them — for the polka dot trend, she styled a polka dot saree, a garment she has a special attachment to. “If I’m following the trend, I also have my own language to it,” she says. She also highlights her affinity for traditional crafts — the recent popularity of angi blouses makes her feel connected to her Rajasthani lineage, as well as a “sense of community”. She adds that Gen Z’s fashion legacy might be the way they upcycle vintage pieces with fresh interpretations — “modern silhouettes mixed with traditional crafts.”

Everyday Gen Z women are similarly aware of the paradox they face. Pia (name changed on request), a young professional based in Mumbai, tells *FE* that while 50% of her style inspiration comes from her For You Page, she also tries clothing from different trends to develop her personal style. Rhea (name changed), a young professional from Delhi, states that her distinct personal style is supplemented from bold outfit ideas on social media. Both shop through online platforms like Myntra; however, quality remains an important factor.

Rhea speaks of a recurring urge to shop as she frequently feels bored of the pieces in her wardrobe, but Pia states that she would rather spend on experiences than clothing. The latter adds that as fabric quality has degraded with the advent of fast fashion, a possible heirloom could be Gen Z’s social media archive itself — “similar to old photo albums, just far more accessible”.

Moving images

From AI-generated masterpieces to immersive installations, digital art is transforming galleries, museums and the global art market — and India is joining the revolution

VAISHALI DAR

WHAT IF, INSTEAD of simply viewing MF Husain’s iconic paintings in a gallery, you could step inside them? If you were at Mumbai’s iconic waterfront venue, Ballard Pier Downtown Experience Centre, on August 1 and 2, you could do just that — immerse yourself in the first-of-its-kind multi-sensory show that translated the legendary artist’s iconic horse paintings into animated canvases. The two-day experience, which reimagined interactive storytelling with architecture, light and scale, was created by The Collectors’ Cove — an invitation-only cultural platform — in collaboration with creative enterprise Floating Canvas, online auction platform Giftex and auction house AstaGuru.

Husain’s immersive showcase is part of a larger shift in the art world, where technology is becoming a powerful storytelling tool rather than a substitute for artistic skill. The growing importance of digital art is evident at the contemporary art fair, Art Basel 2026. A dedicated digital platform, Zero 10, made its European debut this year after Miami Beach and Hong Kong.

The shows featured artist Bleep’s robotic installations interrogating machine agency, Maya Man’s explorations of online desire, and James Turrell’s immersive light environments. Turrell’s participation in Zero 10 was a major highlight with his immersive installation featuring works from his ongoing *Glass Work* series that utilise time-programmed LEDs.

Back home, veteran Indian artist Nalini Malani represents technology with

Of Woman Born, an immersive installation inspired by the Greek myth of Orestes. Rather than retelling the story of Orestes, the son who avenged his father’s murder by killing his mother and her lover, Malani reframes the ancient narrative through the lens of contemporary conflicts, war, gender-based violence and women’s lived experiences. The work comprises 67 interconnected animations, created from more than 30,000 iPad drawings revealed in nine videos, superimposed with a soundtrack of women’s voices. The work, commissioned by the Kiran Nadar Museum of Art, is on view until November 22 at the 61st International Art Exhibition of La Biennale di Venezia.

Around the world, digital art is becoming a major cultural movement. TeamLab Borderless, an immersive digital art museum in Tokyo, makes visitors explore rooms filled with moving lights and projec-

Laurie Simmon’s artworks portray life-like doll scenes blending AI with traditional tactile media; (bottom) Bleep’s installations feature autonomous robotic quadrupeds fitted with hyper-realistic silicone masks of well-known faces

tions. The most visited entertainment district, Outernet London in the UK, has transformed giant public screens into artistic displays, while Ars Electronica, an Austrian cultural, educational and scientific institute active in the field of new media art, continues to bring together art, science and technology. In the US, media artist Refik Anadol is creating AI-powered museum experiences that show how technology can reshape the future of art.

Evolving market

According to the Art Basel and UBS Global Art Market Report 2026, the global art market is valued at \$59.6 billion, with digital art accounting for an estimated \$5.5-6.2 billion and continuing to grow. Industry experts point to a new generation of collectors in their 30s who are entering the market with greater confidence, driven by rising incomes, global exposure and a willingness to embrace contemporary and digital art.

“As young buyers become more informed, they are conducting thorough research before purchasing art, which marks a significant shift from the past,” says Dinesh Vazirani, CEO and co-

founder of Saffronart.”

India’s growing appetite for immersive art is reflected in AI-generated works and interactive installations at events such as the Kochi-Muziris Biennale, Serendipity Arts Festival and India Art Fair, while independent art spaces in Bengaluru, Delhi and Mumbai are also encouraging such collaborations.

The recent arrival of teamLab at the Nita Mukesh Ambani Cultural Centre (NMACC), where the show titled *Second Nature* runs until January 2027, explores the relationship between humans, technology and nature through large-scale digital installations. It features works by Random International, AA Murakami, Simon Heijdens and Universal Everything.

Among the highlights is *Flowers and People, Cannot be Controlled but Live Together*, where thousands of digital flowers bloom and disappear as visitors move through the space. *Resonating Microcosms — Solidified Light* features glowing sculptures that respond to touch with changing colours and sounds, while *Nirvana: Fleeting Flowers, Radiance Within* surrounds visitors with flowers that appear and dissolve, reflecting the cycle of life.

ALAN RITCHSON RETURNS as formidable drifter Jack Reacher in the fourth season of the action thriller. During a late-night subway ride, Reacher notices a distraught passenger whose suspicious behaviour signals imminent danger. When the encounter ends tragically, his questions draw him into a deadly conspiracy reaching the highest levels of power. Based on Lee Child’s novel *Gone Tomorrow*, the chapter combines political intrigue, mystery and hard-hitting action.

NEARLY TWO DECADES after *Awarapan*, Emraan Hashmi returns as Shivam Pandit in *Awarapan 2*. Drawn back into the criminal underworld, Shivam confronts old wounds while seeking redemption, love and a purpose beyond violence. His path crosses with a mysterious woman, played by Disha Patani, setting off an emotionally charged journey shaped by danger, longing and sacrifice. Shabana Azmi also features in a pivotal role in this tale of pain and second chances.

SET AMID THE upheaval of India’s Partition, *Batwara 1947* follows Sikander Mirza, who migrates with his Muslim family from Lucknow to Lahore. Allotted a *haveli* abandoned by its Hindu owners, the family discovers Mai, its elderly matriarch, still living there and refusing to leave. What begins as a bitter dispute over home and belonging gradually becomes a moving test of compassion as communal hatred closes in.

Spotlight

SUNDAY, AUGUST 9, 2026

VAISHALI DAR

ENTERTAINMENT CONGLOMERATE RED Chillies Entertainment's last mega-blockbuster was Shah Rukh Khan-starrer *Jawan* (2023), which grossed nearly ₹1,150 crore worldwide. Since then, the studio has not delivered another film on a comparable commercial scale. Similarly, the last game-changing blockbuster of Yash Raj Films, one of the biggest film production and distribution companies in India, was *Pathaan* (2023), which crossed the ₹1,050-crore mark globally. While *War 2* emerged as a major hit in 2025, *Pathaan* remains the studio's benchmark for a modern Hindi blockbuster. The last major big-budget success of Dharma Productions, another film production and distribution behemoth, was *Brahmastra: Part One – Shiva* (2022), which emerged as one of the highest-grossing Hindi films of the year with worldwide collections of around ₹430 crore.

The numbers reveal a paradox in Hindi cinema. As movie-goers continue to embrace large-scale theatrical spectacles, Bollywood's biggest production houses have struggled to consistently recreate the kind of success that defines an era.

The unprecedented success of the Ranveer Singh-starrer *Dhurandhar* franchise has further intensified the debate over the future of big-budget Hindi cinema. The two installments together may have crossed ₹3,100 crore globally, with the first film earning over ₹1,350 crore and the second ₹1,850 crore, but trade analysts believe it is an extraordinary exception rather than evidence of a return to an era of frequent mega-budget blockbusters.

In today's theatrical market, scale alone cannot guarantee success. Films need a rare combination of compelling storytelling, audience anticipation, star power, franchise value and strategic positioning to justify investments running into hundreds of crores.

Film critic and business analyst Taran Adarsh believes comparisons with *Dhurandhar* must be made cautiously because such box-office milestones are extremely rare. "Not every film can be *Dhurandhar*. Films like *Pathaan* and *Jawan* have delivered phenomenal box office numbers, but *Dhurandhar* is a once-in-a-lifetime phenomenon that comes very rarely," he says.

Adarsh points out that even filmmakers behind historic blockbusters have found it difficult to recreate the same magic repeatedly. Citing the example of the 1970s, he recalls that after the record-breaking success of *Sholay*, director Ramesh Sippy followed it with *Shaan*. Despite having a strong cast and achieving commercial success, *Shaan* could not match the cultural impact and box-office dominance of *Sholay*. Similarly, *Maine Pyar Kiya* was followed by *Hum Aapke Hain Koun..!*, which surpassed its predecessor and created a new benchmark, but remains an exception rather than a trend.

A new Bollywood cycle

The post-pandemic audience is redefining what works in theatres. Viewers are now drawn to films that feel distinctive, emotionally engaging and purpose-driven rather than formulaic. The success of *Dhurandhar* reflects this shift, leaving the year's second-highest Hindi grosser, *Border 2* (₹450 crore), far behind.

Actor Saif Ali Khan recently said that the industry needs to recognise that audiences are demanding more from theatrical cinema. Viewers, he said, are responding to films that are passionately made, unconventional and offer a fresh experience.

"I see a time before *Dhurandhar* and a time after *Dhurandhar*," he said, adding that filmmakers must adapt and make bolder choices in the new environment.

He also praised the franchise's approach to music and cautioned filmmakers against underestimating audiences, pointing to the growing gap between exceptional blockbusters and ordinary theatrical releases.

Khan's own recent box-office journey highlights the challenges faced even by established stars. His last major theatrical success came with *Tanhaji* (2020). Since then, films such as *Jawaani Jaaneman*, *Bunty Aur Babli 2* and *Vikram Vedha* struggled to do well commercially. *Adipurush* and *Devara Part 1* earned ₹393 crore and ₹428 crore globally, respectively, but both were considered underwhelming given their scale, budgets and expectations.

Top industry honchos say blockbuster success now depends on a combination of factors that are difficult to reproduce every year. "Every two to three years, Bollywood witnesses a big year followed by a relatively slower one because our biggest stars do not release films annually. Large-scale action and VFX-driven films can take up to two years to complete, unlike smaller films that may be finished within six to nine months. This is a natural production cycle rather than a sign of decline," says Murlidhar Chhatwani, CEO, distribution and syndication, regional production, of Panorama Studios, a film production and distribution company founded by Kumar Mangat Pathak.

The changing economics of filmmaking has forced production houses like Panorama Studios to prioritise quality over quantity. The studio has produced only four films over four years, including *Drishyam 2*, *Shaitaan*, *Raid 2* and the recent *Drishyam 3*, focusing on content quality and brand value.

BOLLYWOOD gets big-budget shy

The box office is all about spectacle now, with the biggest hits having a larger-than-life canvas. But the Hindi film industry, including big production houses, is thinking small instead

HOLLYWOOD HEAVYWEIGHTS

The \$932-mn opening weekend of the just-released *Spider-Man: Brand New Day* was the second-best of all time, just behind *Avengers: Endgame* (\$1.2 billion). It has also become the second-fastest film to gross \$1 billion, doing so in six days

power, scale and storytelling remains crucial to creating theatrical impact.

Over the past few years, production houses such as Maddock Films, Dharma Productions, Yash Raj Films, T-Series, Bhansali Productions, Excel Entertainment and, more recently, Jio Studios and B62 Studios with the *Dhurandhar* franchise, have played an important role in strengthening the Hindi theatrical market. Their success reflects a growing understanding of what audiences seek: films that combine scale with emotional connect and engaging storytelling.

According to Sanjeev Kumar Bijli, executive director, PVR INOX, the debate is no longer about choosing between content and star power. The strongest performers, he says, are those where both elements work together. "Stars generate excitement, visibility and strong opening momentum, while compelling narratives, emotional resonance and audience appreciation sustain a film's theatrical journey," he says.

Dhurandhar represents this evolving formula. Ranveer Singh's star power created initial anticipation, while the film's scale, storytelling and emotional connect helped convert curiosity into sustained theatrical footfalls.

However, the industry's dependence on established stars has also raised concerns about the future pipeline of Hindi cinema. According to Ormax Media's analysis, Bollywood's star system is showing limited renewal, with the absence of a new generation of bankable male stars emerging as a long-term challenge. Stardom remains important not only for box-office performance but also for building audience loyalty, cultural relevance and producer confidence to invest in ambitious projects.

The male star rankings have remained largely unchanged, with Shah Rukh Khan, Salman Khan, Akshay Kumar, Hrithik Roshan and Ranbir Kapoor continuing to dominate. This limited churn comes despite younger audiences contributing 57% of Hindi box-office collections. The lack of younger bankable male stars could particularly impact genres such as romance, youth dramas and coming-of-age films, where youthful appeal plays a critical role.

The female star ecosystem, however, shows comparatively better renewal. Kriti Sanon has joined established names such as Alia Bhatt, Deepika Padukone, Shraddha Kapoor and Katrina Kaif, while emerging performers including Kiara Advani, Rashmika Mandanna and Annet Padda indicate a stronger pipeline of talent.

Ormax Media's analysis suggests that Bollywood needs to move beyond publicity-driven talent management and focus on building long-term stars through stronger scripts, strategic career choices and sustained audience engagement.

Without developing the next generation of performers with mass appeal, the industry risks weakening its long-term theatrical prospects despite occasional blockbuster successes.

More films, fewer choices

The theatrical market has undergone a transformation rather than a slowdown, says Bijli, adding, "India's overall box office grew 11% year-on-year to ₹13,519 crore in FY26, while original Hindi films increased their share from 29% in FY25 to 42% in FY26, driven by a 55% rise in Hindi gross box-office collections."

However, the audience is now more careful in theatrical outings. "With a wider range of entertainment choices available, cinema visits have become more intentional, and audiences are rewarding films that offer strong storytelling, cultural relevance, scale and a compelling big-screen experience," says Ashish Saxena, COO, cinemas, BookMyShow, who points to films such as *Chhaava*, *Saiyaara*, *12th Fail* and *Laapataa Ladies* as examples of how Hindi cinema continues to find audiences when the proposition is strong.

Wider pan-India releases, stronger digital marketing, increasing cinema penetration and greater accessibility have expanded the reach of theatrical films. At the same time, the growing acceptance of regional cinema, anime and diverse genres has increased competition and raised audience expectations.

Ultimately, box-office performance today depends less on star power alone and more on a film's ability to create a compelling reason for audiences to leave their homes and experience it on the big screen. Exhibitors also believe the industry needs a balanced pipeline — large-scale event films that generate excitement and bring audiences back to cinemas, along with mid-budget films that ensure a steady flow of theatrical releases.

"The industry does not just need occasional ₹1,000-crore blockbusters; it needs a consistent supply of quality films that encourage audiences to return throughout the year," says Munshi.

Positive word-of-mouth, repeat viewership and sustained occupancy have emerged as key indicators of long-term success. According to Bijli, "This evolution has strengthened the importance of quality storytelling, encouraged creative diversity and reinforced cinema as a destination for immersive entertainment."

The industry does not just need occasional ₹1,000-cr blockbusters; it needs a consistent supply of quality films that encourage audiences to return throughout the year

— SAMEER MUNSHI, COO, MIRAJ ENTERTAINMENT

The debate is no longer about choosing between content and star power. The strongest performers are those where both elements work together

— SANJEEV KUMAR BIJLI, EXECUTIVE DIRECTOR, PVR INOX

Structural shift

The broader franchise landscape highlights how difficult it is to consistently create mega-scale successes. Only a handful of properties have delivered sustained box-office momentum over multiple installments. The YRF Spy Universe remains India's highest-grossing film franchise, collecting over ₹3,200 crore across six films — *Ek Tha Tiger* (2012), *Tiger Zinda Hai* (2017), *War* (2019), *Pathaan* (2023), *Tiger 3* (2023) and *War 2* (2025). It is followed by the *Baahubali* franchise, which has earned over ₹2,400 crore from two films; *Pushpa* with more than ₹2,000 crore across two films; *KGF* with over ₹1,450 crore; and Rohit Shetty's Cop Universe, which has crossed ₹1,400 crore across five films.

Beyond franchises, even established studios have found that scale does not automatically translate into blockbuster returns. Dharma Productions' recent theatrical releases, including *Good Neewuz*, *Sooryavanshi* and *Rocky Aur Rani Ki Prem Kahani*, remained below the ₹400-crore mark globally, while *Simmba* (2018) narrowly crossed the benchmark with collec-

tions of around ₹400 crore.

Industry experts say the theatrical market has not weakened but has undergone a structural shift. Audiences are willing to spend on cinema, but only when a film offers a strong reason to return to theatres. While the pandemic changed viewing habits and altered Bollywood's production strategy, Chhatwani says, one of the biggest shifts was the growing acceptance of south Indian cinema among Hindi-speaking audiences. "The Hindi audience split into two segments — one continued watching Bollywood, while another embraced dubbed south Indian films. That pushed Bollywood towards making more mass entertainers," he says.

Films such as *Gadar 2*, *Stree 2* and *Animal* show that profitability is not determined by scale alone but a strong audience connection, emotional resonance, authentic storytelling rather than bloated budgets. *Gadar 2* (2023) earned over ₹690 crore worldwide against an estimated budget of around ₹60-75 crore, while *Stree 2* (2024) crossed ₹850 crore against a reported budget of nearly ₹60-70 crore. *Animal* (2023), made at an estimated bud-

get of around ₹100 crore, collected over ₹900 crore globally.

The rise of streaming platforms has also raised audience expectations. Viewers have access to content from across the world, forcing filmmakers to compete not only on scale but also on storytelling quality. "Audiences are exposed to Korean, Japanese, Indonesian, Mexican and Malayalam cinema, forcing filmmakers to compete not only on scale but also on storytelling quality," says Chhatwani.

The theatrical market has recovered in value terms, but audience frequency remains a concern. The post-pandemic recovery was uneven, with 2022 proving particularly challenging. However, films such as *Pathaan*, *Jawan* and *Gadar 2* helped bring audiences back, while 2025 emerged as Hindi cinema's biggest-ever year with over ₹5,500 crore in domestic box-office collections.

Sameer Munshi, COO, Miraj Entertainment, says the market has become more polarised rather than slowed down. Average ticket prices, he says, are around 22% higher than 2019 levels, while admissions remain about 8% below pre-pandemic

numbers. "The industry is earning more per head, but visit frequency hasn't fully recovered. The money looks healthy, but the habit isn't fully back yet," he says.

According to Munshi, films capable of creating excitement continue to deliver exceptional numbers, while average films struggle to sustain theatrical runs. This explains why studios are cautious of approving multiple high-cost projects simultaneously. "A single failure at the ₹250-300 crore budget level can significantly impact a production house's balance sheet," adds Munshi.

For exhibitors, every Friday has become a higher-stakes gamble. Films that fail to connect quickly lose screens, while successful titles enjoy longer theatrical runs. "Pan-India blockbusters like *KGF* and *Pushpa*, followed by Hindi films like *Dhurandhar*, *Stree 2* and *Border 2*, reminded audiences why cinemas remain irreplaceable," says Munshi.

Stars, stories & scale

The success of recent blockbusters has reinforced another reality of the Hindi film industry: the right combination of star

PLAY

@work

Relaxing at work is no longer taboo; it is an imperative for offices of the future

SREYA DEB

AHECTIC GAME OF table tennis is in progress in an office basement, with the crowd cheering on. Game over, and everyone returns energised, high on adrenaline, bonding with each other.

Playing at work is no longer frowned upon, rather it is seen as a contributor to better employee well being and mental health. In turn, workplaces across the world are becoming more than just desks and chairs, incorporating relaxation zones, green areas, wellness lounges, fitness areas, meditation rooms, cafés, and breakout zones. At American Express' Gurugram campus, employees can reserve recreational rooms to use for group activities. A manager with the company, Janhavi Mukherjee, says her team usually blocks a recreation room for 30 mins each week to go and have some downtime in the middle of a busy day. "We have game rooms with activities like tennis, etc, so people can get breathers during the day, which makes a big difference."

Research backs the trend. A 2026 research published in the *New Era Journal* says as the boundaries between work and personal life blur, incorporating recreational and relaxation spaces into office design has become an essential component of employee well-being. Referring to the corporates investing in such measures, the study states "Reorganising office environments to support the psychological and physical needs of employees in the face of rapid technological and systemic change has become crucial for both employers and workers."

The Green Business Certification (GBCI) India and Saint-Gobain Research India study, *Healthy Workplaces for Healthier People*, found that healthier indoor environments, ergonomic design, and wellness-focused amenities contribute to better employee comfort, satisfaction, and productivity. "Recreational and wellness spaces are not afterthoughts, they are intentional design

(From top) Barista bar at DLF Atrium Place Gurugram; pool at Amazon; recreation centre at Curriculum Associates, Bengaluru

choices rooted in our belief that when people feel their best, they do their best," says Deepti Varma, vice-president, people experience and technology (PXT), Amazon Stores – India, Japan & emerging markets.

"Across our offices in India, we have built recreational ecosystems tailored to the needs of our teams.

These include indoor sports such as table tennis, foosball, snooker, air hockey, and video games; outdoor facilities like basketball and pickleball courts, acupuncture paths and amphitheatres, and wellness rooms for rest and recharge. Our offices also feature breakout areas, quiet rooms, and community spaces."

"One of the biggest shifts we are seeing in the workplace is the recognition that people don't do their best thinking by being 'on' all the time. Creativity, problem solving and innovation all require moments of pause, reflection and human connection," says Rajeev Kapoor, senior vice-president and country head, Curriculum Associates, India, a company providing curriculum and study assessments to schools and communities worldwide, with offices located in Bengaluru. The company has a reset room

for staff to relax, connect with each other.

The 7-Eleven Global Solution Centre in Bengaluru (corporate office for the global retailer 7'Eleven) has wellness amenities and recreational spaces integrating modern technology with employee-centric design. Global tech companies including Google, Microsoft, IBM, as well as online food and quick commerce app Swiggy, among others, all have recreation spaces for employees. Rajat Kapur, regional managing director, The Executive Centre, a company based in Gurugram that creates and provides spaces for offices, and has one of their own, says, "Organisations that embrace flexible solutions are not only optimising costs but also creating environments where employees feel empowered and supported."

"Contemporary flex spaces, which include biophilic features, natural lighting, flexible seating arrangements and breakout spaces, are more than just an aesthetic consideration; they affect mood, creativity and stress levels of employees," he says.

A former Swiggy marketing executive Shweta Singh says having recreational spaces in the office makes a real difference. "Even a 10-minute break helps you reset, reduce stress, and return to work with new perspectives or ideas. It also creates a good bond with colleagues beyond work." She recalls they also had flexible work hours. "Even our team lead used to join us at the TT table sometimes." Sounds fun, as long as the game doesn't stretch too long, leaving the manager fuming over lapsed deadlines.

PALATE TEASER

The funky ferment

From JD Vance to Gurugram bars, fermented foods are all the rage, with lesser known ones as gundruk also on menus

KUNAL DOLEY

IF THE HALLYU (K-WAVE) made kimchi a household name, US President Donald Trump's cabinet is now making sauerkraut viral. Senior officials including Vice-President JD Vance and Health Secretary Robert F Kennedy Jr have adopted an eating plan built on fermented foods, chiefly sauerkraut, a type of lacto-fermented cabbage, alongside grass-fed meat. Kennedy claimed he lost 20 pounds in 30 days. While most people think of kimchi, kombucha and sauerkraut when they hear 'fermented foods', they are missing out on a whole universe of lesser-known treasures happening just in their backyards. One such is gundruk, which stands out for its tangy and savoury taste. With a slightly pungent smell, akin to kimchi or sauerkraut, the fermented leafy green vegetable dish transports one to the Himalayan region — Nepal, Bhutan, Sikkim and Darjeeling.

Traditional treat

It's something almost everyone has grown up with,

whether in the mountains or the plains, says Yangdup Lama, co-founder of Bar Stormy, Hyderabad. "You may not eat it every day, but it's one of those flavours that instantly brings back memories of home," says the Darjeeling-born bartender-entrepreneur. Agrees Karma Paljor, editor-in-chief of *EastMojo*, a digital news media platform based in Guwahati. "Depending on the fermentation, the taste can be tangy, earthy or sour. I like a balance of not too sour and not too bland," says Paljor, who hails from Sikkim. Traditionally, gundruk is made by fermenting and sun-drying leafy vegetables, most commonly radish leaves, and is usually enjoyed as a simple broth called gundruk *ko jhol*. It is used as a pickle or served as a side dish. "Every household has its own recipe, which is part of what makes it so special," adds Lama.

Hearth & health

Gundruk is celebrated as a gut-friendly food, rich in lactic acid bacteria that acts as a natural probiotic to support digestion. During the off-season in the Himalayas, when local diets consist of starchy tubers and maize low in minerals, gundruk provides plant nutrients. The list of fermented foods is long — *kinema* (fermented soybean), *sinki* (preserved fermented vegetable), and *sidra shukuti* (dried fish), among others — proving how mountain-dwellers preserve seasonal produce through fermentation and drying.

Modern magic

It's exciting to see how the humble dish is evolving. You'll find it in salads, crispy snacks, even caviars and cocktails. At The Brook in Gurugram, the star of the show is Mitho Amilo, a cocktail that features gundruk as one of the ingredients. "We steep the gundruk to extract its earthy character and use that as the base of the drink. It's definitely not our easiest cocktail to sell, but the people who know gundruk are always curious, and once they try it, they're pleasantly surprised," says Lama, its co-founder.

Book a hornbill safari

The striking birds can now be viewed in Chhattisgarh

VAISHALI DAR

THE CHHATTISGARH FOREST

Department has launched a dedicated hornbill safari in the Udanti-Sitanadi Tiger Reserve, about 130 kilometres from Raipur. The first initiative of its kind in India, the safari aims to conserve the rare Malabar Pied Hornbill.

What to expect: Visitors can observe one of India's most charismatic forest birds in its natural habitat. Known for their striking appearance, oversized curved beaks and powerful flight, hornbills are among the most iconic birds of tropical forests. Northeast India is a globally celebrated hotspot for hornbill safaris, particularly Arunachal Pradesh and Assam, which host multiple species like the Great Indian, Wreathed, and Oriental Pied Hornbills.

Where to spot: The safari operates through the

Particularly Vulnerable Tribal Group in villages of Odh, Amlor and Amamora, where sustained conservation efforts over the past few years have resulted in a notable increase in the population of the Malabar Pied Hornbill. Forest officials attribute the increase to strengthened anti-poaching measures, removal of encroachments, protection and plantation of fruit-bearing trees, and innovative habitat management programmes such as the 'Hornbill Restaurant' initiative, which ensures a steady food supply for the species. Dedicated monitoring teams comprising forest personnel and trained local trackers have been documenting hornbill movements, nesting sites and habitat conditions.

The defining point: Young people and residents from nearby villages are being trained as birdwatchers, nature guides and specialised hornbill guides, ensuring that local communities become active partners in conservation while benefiting from eco-tourism.

"The Hornbill Safari is designed as a community-centric conservation initiative. Along with strengthening protection of the Malabar Pied Hornbill and its habitat, the programme enables local youth to participate in eco-tourism activities," said Varun Jain, deputy director, Udanti-Sitanadi Tiger Reserve. Bird enthusiasts can also spot species such as the Shaheen falcon, Indian pitta, brown fish owl, grey-headed fish eagle, along with numerous species of woodpeckers, barbets and minivets, besides leopard, sloth bear and several other forest-dependent species.

TRAVEL PLANNER

BEST TIME TO VISIT: August–February

SAFARI ESSENTIALS:

High-SPF sunscreen, insect repellent, a camera, binoculars, a power bank, neutral, earth-toned lightweight clothing to blend into the forest, wide-brimmed hat, sunglasses

CULTURAL CALENDAR

Musical theatre

August 9, Prestige Centre for Performing Arts, Bengaluru, 5 pm–9 pm

Shaam-e-Rekhta is coming to Bengaluru for the first time. The evening celebrates Urdu poetry, theatre with a romantic play on Sahir Ludhianvi and Amrita Pritam, and a musical show on the cinematic contributions of Urdu poets.

Classical dance

August 10–11, India Habitat Centre, New Delhi, 7 pm

Be a part of the two-day celebration of India's rich cultural heritage through classical dance and music. The 21st edition of Saare Jahan Se Accha — Vande Mataram brings a dance production 'Chitrangada — The Warrior Princess', directed by Ranjana Gauhar, featuring performances in Odissi by Ratikant Mohapatra and disciples, Bharatanatyam by Ananda Shankar and disciples, and Kathak by Rajendra Gangani and disciples.

A ceramic world

August 11–18, Triveni Kala Sangam, New Delhi, 11–8 pm

Fire & Form is a display of ceramic stoneware by artist Keshari Nandan, curated by Uma Nair. Nandan's three decades of mastery in clay and craftsmanship bring tradition and contemporary expression together.

Performance storytelling

August 15, Godrej Dance Theatre, NCPA, Nariman Point, Mumbai, 11.15 am

Bharatanatyam artist Apeksha Niranjana presents a storytelling performance in classical dance and narrative-led stage performances, inspired by the life of Marie Curie, the scientist remembered for her groundbreaking work in the field of radioactivity, and becoming the first woman to win a Nobel Prize. The act is part of the Mumbai International Storytelling Festival.

The art of meditation

August 12, Nihshreyasa, Kochi, 7 pm

Pause, breathe and reconnect at New Moon Meditation & Sound journey. A guided meditation session for inner clarity and renewed intention. Join the session for an experience that nurtures mindfulness, balance, and emotional well-being.

—COMPILED BY MADHUSHREE GOSWAMI

Well Being

SUNDAY, AUGUST 9, 2026

SREYA DEB

IF YOU'RE a lover of candles, especially the scented ones, then you would probably know how these fragrant products have become a lifestyle staple in our homes, whether it's for mood-setting, stress relief or aromatherapy. However, very few of you would realise that something so soothing can have hidden health risks and also come with their fair share of toxins.

Scented candles, often sold as 'aromatherapy' products, do not have any proven health benefits, says Dr L Koushik, consultant, pulmonology, Meridian Hospital, Chennai. "But if you are around them for a long time, they can make the air inside your home more polluted, and cause breathing problems - especially in rooms that are not properly ventilated," he adds.

"Many commercial candles use synthetic fragrances that do not truly soothe the nerves and may even cause irritation, so any health benefit is limited, indirect, and more related to mood and environment rather than real medical or nerve-healing effects," offers Dr Pooja Pillai, consultant, internal medicine, Aster CMI Hospital, Bengaluru.

How they work

Scented candles feel calming because their pleasant smells can directly affect the brain, especially the part linked to emotions and memory, helping reduce stress and create a sense of comfort. At the same time, soft candlelight creates a warm and peaceful environment that signals the body to relax, slow down, and feel safe. "Certain fragrances like lavender or vanilla are known to promote relaxation, improve mood, and even support better sleep, so together the gentle light and soothing scent make people feel mentally calm, emotionally balanced, and more at ease after a busy or stressful day," explains Dr Pillai. "Scents produced by scented candles are calming, which works to soothe the nerves and induce relaxation. Aromatherapy is effective for reducing stress and creating an environment of peace and tranquility, which is why they are favoured by many consumers," says Dr Pujan Parikh, consultant, pulmonary and sleep medicine, Sir HN Reliance Foundation Hospital, Mumbai.

No wonder the demand for such products is increasing. According to a report by the IMARC group, the Indian scented candle market reached \$18.56 million in 2025 and is projected to reach \$27.95 million by 2034, exhibiting a growth rate (CAGR) of 4.66% during the period under consideration.

The report also says that there is a growing preference for environmentally conscious purchases among consumers. "The market is driven by rising consumer purchasing power enabling increased spending on premium home fragrance products, rapid expansion of e-commerce platforms providing convenient access to diverse artisanal and luxury candles across urban and rural markets and growing environmental consciousness spurring demand for sustainable candles manufactured from natural waxes such as soy, beeswax, and coconut," adds the report.

Naturally, luxury brands as well as others are betting big on this trend. Bath and Body Works, designers Abu Jani and Sandeep Khosla's candle lines, Dyptique all boast soy or other natural wax blend candles, so do Inditale, Misa and others, clearly labeled in their product descriptions. Newer options like wax melts from Goodmelts and Khushboo Living's sand wax innovations also claim 100% soy and phthalate free, and natural and eco-friendly wax respectively. Most brands are waking up to the concerns consumers might have with the ingredients of a home decor product that is now gain-

A whiff of
DANGER

Even though scented candles have become a lifestyle staple in our homes, doctors say they can come with their fair share of toxins and health risks. Here's what you should know

ing popularity.

However, doctors sound a note of caution. According to Dr Koushik, scented candles may offer mild relaxation benefits, mainly because certain natural fragrances like lavender, chamomile, or sandalwood can have a calming effect on the mind by influencing the brain's mood and stress response, but this depends on the quality of the candle, as candles made with natural essential oils may help reduce stress or improve sleep slightly.

As far as health benefits go, there isn't much scientific data available to support the claim, says Dr Koushik. "However, natural essential oils can indeed be used for relieving anxiety and boosting mood states. Some candles made with essential oils can make the room feel calm, but this shouldn't be confused with a direct medical or therapeutic benefit. There is no clinical evidence to support the enhancement of overall health," he clarifies.

Harmful ingredients

Scented candles can create a relaxing mood, but they may not always be good for health, especially when used often in closed spaces. "Some candles release smoke, tiny particles, and chemicals like volatile organic compounds (VOCs) that can irritate the lungs, trigger headaches, worsen aller-

gies, or cause breathing problems in people with asthma. Cheap candles made from paraffin wax may also release small amounts of harmful substances when burned, and strong artificial fragrances can lead to dizziness or nausea," says Dr Pillai. "It largely depends on the quality of the candle."

According to Dr Koushik, the main risks are irritation of the airways and making underlying lung conditions like asthma or COPD (chronic obstructive pulmonary disorder) worse.

"Fine noxious particles and VOCs can trigger inflammation in the airways and provoke bronchospasm in sensitive individuals." Dr Parikh shares the immediate health risks posed by the burning of fragrant or decorative candles, "The immediate health effects would more likely involve issues related to the lungs, like bronchial inflammation, irritation,

WARNING SIGNS

- Irritation in eyes, nose, throat
- Frequent sneezing or coughing
- Runny nose
- Chest tightness
- Wheezing
- Shortness of breath
- Other allergic reactions

PREMIUM DEMANDS

The Indian scented candles market size reached \$18.56 million in 2025. The market is projected to reach \$27.95 million by 2034, exhibiting a growth rate (CAGR) of 4.66% during 2026-2034

HEALTH CAPSULES

Liberal transfusion reduces cardiac risk

A liberal transfusion strategy (that maintains higher haemoglobin triggers) was associated with a lower likelihood of death or recurrent myocardial infarction than a restrictive approach in patients. The liberal transfusion strategy was associated with a 1.4%-2.4% lower risk of death or myocardial infarction.

Less protein could slow down ageing

Several recent clinical trials in humans have shown that reducing protein intake in sedentary individuals could reduce weight and fat mass and improve fasting blood sugar in humans, factors impacting ageing. For most sedentary adults protein fortified foods may not provide health benefits.

Sauna steam raises physiological strain

A new study showed that, in addition to temperature, air humidity is a significant determinant of physiological strain during sauna bathing. Both heart rate and core temperature rise, indicating a greater cardiovascular and thermoregulatory load. Heart rate rose by more than 40 beats per minute on average

Sleep patterns reveal health risks

A new study in *Nature Communications* proved that an AI model analysing sleep data could draw links with cognitive decline, heart disease, and death. Developed by AI researchers, sleep physicians, data scientists, and neuroscientists, it identified 'clinically meaningful' subtypes to classifying patients' health risks.

Dr Lekh Ram Sharma

FE FEATURES

THERE MUST BE hardly any individual in today's age who does not consume some nutrient supplement. But it is essential to know how and when to use these supplements. For instance, many slow-release versions are also available. But, are they better, and how? Dr Lekh Ram Sharma, senior consultant, internal medicine, Indraprastha Apollo Hospitals, New Delhi, says: "Slow-release supplements are designed to release nutrients gradually over time instead of all at once. They may help reduce stomach discomfort with certain supplements, such as iron, and maintain steadier levels in the body. However, they are not necessarily better for everyone or for every nutrient. In many cases,

How to optimise supplements

What to do for best absorption of nutrients and when to take them

regular formulations work just as well. The choice should depend on the nutrient being taken, the reason for supplementation and individual health needs. It is best to use the formulation recommended by your doctor."

How can people ensure optimum absorption of supplements?

Taking supplements correctly can improve how well they are absorbed. Vitamin D is better absorbed when taken with a meal that contains some healthy fat. Iron is absorbed best on an empty stomach or with a source of vitamin C, although it can be taken with food if it causes stomach upset. Calcium is better absorbed in smaller doses rather than a large amount at one time. Healthy individuals who eat a balanced diet generally

do not require routine supplementation, as taking supplements does not improve health in the absence of a deficiency.

What are the basic don'ts while taking supplements such as iron, calcium, multivitamins and vitamin D?

Avoid taking iron with tea, coffee, milk or calcium supplements, as these can reduce its absorption. Calcium and iron should ideally not be taken together. Do not take more than the recommended dose of vitamin D or other supplements unless advised by your doctor, as excessive intake can be harmful. Taking multiple supplements without checking for overlapping ingredients may also result in unnecessary excess. Most importantly, supplements should not be used as a substitute

for a balanced diet or started without medical advice.

Can supplements be taken forever, especially for those who have absorption issues?

Not everyone needs to take supplements for life. Many people require them only until a deficiency has been corrected. However, those with conditions that affect nutrient absorption, such as celiac disease, inflammatory bowel disease or after certain gastrointestinal surgeries, may need long-term supplementation. Even then, supplements should be taken under medical supervision, with regular follow-up and blood tests to ensure the dose remains appropriate and to avoid taking more than necessary.

STORIES AND TRENDS FROM INDIA AND AROUND THE WORLD THAT CAUGHT OUR FANCY

BTS refused to submit music at the 2027 Grammy Awards, while singer Drake (below) withdrew his two 2022 Grammy nominations

AP

Bowing out of THE GRAMMYS

BTS’ decision to skip submissions for the 2027 edition has reignited debate about recognition & representation, and whether the world’s biggest music awards still define artistic success

VAISHALI DAR

WHEN SOUTH KOREAN K-pop band BTS announced that they would not submit their latest album *Arirang* for consideration at the 2027 Grammy Awards, the decision sent shockwaves through the global music industry. After years of pursuing Grammy recognition and becoming the first K-pop group to receive multiple Grammy nominations, the seven-member group’s refusal to participate marked a sudden shift in their relationship with the Recording Academy. The timing is significant. Just weeks earlier, the Recording Academy had unveiled a new Grammy category, ‘Best Asian Pop Music Performance’, as part of a broader expansion of award categories. While the Academy described the move as an effort to recognise the diversity of Asian pop music, BTS saw it differently. In a joint statement posted by all seven members, the group said they hoped “music will be heard and loved for what it is, rather than being categorised by region or language.” For the music band, the issue was not about refusing an award. It was about rejecting what they perceived as the ‘othering’ of Asian artists. Their stance has sparked global discus-

sions about inclusivity and the risks of creating categories that may unintentionally segregate rather than celebrate diversity. The group has spent nearly a decade proving that Korean-language music can top charts, sell out stadiums and resonate with audiences worldwide. Being placed in a separate regional category, they suggested, risked reinforcing the very barriers they had worked to dismantle. Meanwhile, the Recording Academy defended its decision, with CEO Harvey Mason Jr saying the new category was designed to expand recognition, not limit it. He also emphasised that artistes in the Asian pop category would still be eligible for the prestigious general-field awards such as ‘Album of the Year’ and ‘Record of the Year’. BTS’ move, however, is not unprecedented. The Grammy Awards are widely regarded as one of the highest honours in the music industry. Despite this, several globally acclaimed musicians have chosen to reject nominations, withdraw their submissions, or boycott the ceremony altogether. Their decisions reveal an important debate about fairness, artistic integrity, and representation in the music industry. The most famous example is solo Canadian singer, The Weeknd, also known as Abel Tesfaye. In 2021, despite having one of the year’s biggest albums, *After Hours*, and the global smash hit, *Blinding Lights*, he did not receive any Grammy nominations. Calling the awards “corrupt,” he

announced that he would no longer submit his music for Grammy consideration, accusing the Academy of lacking transparency in its voting process. His criticism eventually contributed to reforms, including the elimination of secret nomination committees. Another artiste who has questioned the Grammys is Drake. Over the years, Drake has criticised the Academy for failing to understand contemporary popular music. In 2021, he withdrew his Grammy nominations for *Certified Lover Boy* and the song *Way 2 Sexy*, although no official reason was provided. Industry observers widely interpreted the move as another sign of his frustration with the awards system. Even artistes who continue to participate have openly criticised the Grammys. American singer-songwriter and rapper Frank Ocean famously chose not to submit his acclaimed album *Blonde* for Grammy consideration in 2017, arguing that the institution no longer represented the music culture it claimed to celebrate. The Grammy boycotts stretch back decades. In 1991, Irish singer Sinéad O’Connor refused to accept her Grammy, criticising the music industry’s focus on commercial success over artistic merit. Even earlier, in 1989, leading hip-hop artistes such as Public Enemy, LL Cool J, and Salt-N-Pepa boycotted the ceremony because the newly introduced rap categories were not televised. Their protest highlighted the industry’s reluctance at the time to recognise hip-hop as a mainstream genre. These acts of protest reveal a broader tension between artistes and legacy awards. While winning a Grammy remains one of music’s highest honours, streaming platforms, global fan communities and social media have reshaped how success is measured. For artistes with massive worldwide audiences, institutional validation may no longer carry the same weight it once did. By walking away from the Grammys at a moment when they were among the strongest contenders, BTS showed that cultural influence sometimes comes not from accepting recognition, but from refusing it.

TECH-NOW-LOGY

Rise of rogue AI

Recent hacking incidents involving the AI models of OpenAI and Anthropic are heralding a new era of cyber chaos

SREYA DEB

ON JULY 30, AI safety and research company Anthropic said that some of its Claude AI models had hacked into the systems of three companies during cybersecurity tests. This came just a few days after American AI research organisation OpenAI disclosed that one of its AI agents went on a rogue attack to access the production infrastructure of Hugging Face, a platform for open-source machine learning models and AI datasets. The promise of AI bots capable of independently carrying out complex tasks may have become one of the most defining themes of artificial intelligence, but the recent incidents of agents going rogue or ‘escaping the system’ have triggered a larger and more pertinent conversation — what happens when highly autonomous AI systems exceed the boundaries set by their creators? What we earlier saw in dystopian films depicting end-of-world scenarios at the hands of the tech revolution — think *Black Mirror*, *Eagle Eye*, and the like — and the fictional renditions that often make it to Reddit threads and chatrooms as conspiracy theories are now feeling closer to reality than before. According to OpenAI, their agent independently identified publicly exposed credentials, escaped its digitally created boundaries and compromised accounts on external services before ultimately targeting AI development platform Hugging Face. According to reports, the same agent also exploited another random customer of global AI development platform Modal Labs. OpenAI confirmed that the agent had accessed four separate online services before it was contained and deactivated. In the case of Anthropic’s breaches, according to the company, the AI models managed to compromise systems belonging to three external organisations during what was supposed to remain a sealed evaluation, reinforcing concerns that increasingly capable AI agents can discover and exploit vulnerabilities without explicit human direction. The incidents have prompted scrutiny

not only from policymakers, but also the AI development and model creation platforms, which are now concerned about infrastructure breaches from capable agents generated by OpenAI and Anthropic — agents that even the origin companies do not seem to have a handle on. The issue remains unresolved as both tech giants launch further AI and other investigation tools to isolate the loopholes in the system that allow for such ‘escapes’. Meanwhile, the US House cybersecurity panel has sought a formal briefing from OpenAI on the breach, while the White House has convened executives from OpenAI, Anthropic, Google, Meta and other leading AI firms to discuss a new framework for evaluating high-risk frontier AI models before deployment. OpenAI has announced it is conducting an extensive technical review, working with external experts and assisting affected organisations. It has committed to publishing a detailed technical report explaining how the incident unfolded and what safeguards will be introduced to prevent similar events. The incidents have also accelerated industry-wide efforts to improve AI security. Microsoft, Nvidia, IBM, and Hugging Face, among others, have joined forces in a new Open Secure AI Alliance aimed at developing open-source tools and standards for securing advanced AI systems. All this comes at a time when AI agents are already eating the Web and rewiring the Internet’s business model. Two separate internet security reports released in June and July by internet service provider Cloudflare and software company Thales highlight this new reality. As per Cloudflare, 57.5% of webpage requests in June were carried out by AI agents and bots, officially surpassing human web traffic (42.5%) for the first time in internet history. Thales’ Bad Bot Report for 2026 puts the automated bot traffic figure at 53% of all global internet requests, officially surpassing human web activity at 47%. If that’s not enough, according to HUMAN Security’s 2026 State of AI Traffic and Cyberthreat Benchmark Report, traffic generated by AI agents grew around 7,851% year on year.

MICROSOFT, NVIDIA LAUNCHED THE OPEN SECURE AI ALLIANCE TO BUILD OPEN-SOURCE AI SECURITY TOOLS AND STANDARDS

THE AI TRACKER

From Hollywood and music to farming and automobiles, AI is reshaping industries in unexpected ways

By Sugandha Mukherjee

Creative horror Horror filmmaker Eli Roth has revealed that generative AI was used in parts of his upcoming film *Ice Cream Man*, joining a growing list of directors experimenting with artificial intelligence in filmmaking. Roth clarified that AI supported certain creative processes rather than replacing actors or the filmmaking team. The disclosure comes amid continuing debates in Hollywood over AI’s role in cinema, particularly around artistic ownership, copyright and employment. As filmmakers explore AI-assisted production, the industry continues to grapple with balancing innovation and preserving human creativity.

Evolved film fest The Bengaluru Short Film Festival has

Automotive shift

AI is becoming the centrepiece of the global auto story. During recent earnings calls, CEO Elon Musk devoted nearly half his remarks to AI, humanoid robots and autonomous driving, signalling a shift from traditional automotive manufacturing to an AI-led technology company. Tesla is betting heavily on its Optimus humanoid robot and Full Self-Driving software as future growth engines, even as vehicle sales face pressure. Another automaker that is increasingly positioning itself as an AI company is

Hyundai Motor Group, which is placing the technology at the heart of its future strategy. Rather than viewing itself solely as an automobile manufacturer, the company aims to integrate AI across vehicle development, manufacturing, mobility services and robotics. AI-powered software, autonomous driving systems, smart factories and humanoid robots are expected to become key business pillars. Hyundai’s shift mirrors the wider transformation sweeping the automotive industry, where data, software and AI capabilities are emerging as competitive differentiators alongside vehicle engineering and production.

introduced two new competition categories such as Artificial Intelligence and Dance, for its 2026 edition, reflecting evolving trends in filmmaking. The AI section will recognise films

created using generative AI tools or exploring AI-related themes, while the Dance category celebrates movement-based storytelling. Festival organisers say the additions acknowledge how

emerging technologies are reshaping creative expression without replacing traditional filmmaking. The move also provides independent creators with a platform to experiment with new storytelling formats as AI becomes increasingly embedded in the global film industry.

Bigger music horizon Spotify has expanded its AI-powered music initiatives through a partnership with Merlin, which represents thousands of independent record labels worldwide. The collaboration enables artistes and rights holders to participate in AI-driven remixing and cover song projects while retaining greater control over how their music is used. The initiative reflects growing efforts by streaming platforms to harness generative AI responsibly, creating new opportunities for music discovery and fan

engagement. At the same time, it underscores the industry’s push to establish licensing frameworks that protect artistes in the AI era.

Diagnosing crops A student at Hajee Mohammad Danesh Science and Technology University (HSTU) has developed an AI-powered application called Crops Doctor to help farmers diagnose crop diseases. By analysing images of affected plants, the tool identifies likely diseases and recommends treatment measures, enabling quicker intervention and potentially reducing crop losses. The project demonstrates how accessible AI solutions can support precision agriculture, particularly in regions where expert agricultural advice is limited. Such innovations highlight AI’s growing role in improving farm productivity, food security and rural livelihoods.

GIVEN THE STATES' OPPOSITION TO THE FUNDING PATTERN OF VB-G RAM-G, WHY WOULD THEY MAKE BUDGET ALLOCATIONS? ONE, THEY HAVE LITTLE CHOICE. BUT MORE IMPORTANTLY, IT IS TRUE THE SCHEME HAS TRANSFORMED THE WAY THE RURAL ECONOMY WORKS

On rural jobs, the 60:40 dilemma

OFF THE RECORD

P VAIDYANATHAN IYER

NO STATE LIKES it when the Centre asks it to share a burden it never did in the past. More so in these times, when political parties have, in a race to the bottom, made fiscally unsustainable promises to win Assembly elections.

Naturally then, states, particularly those ruled by the Opposition, threw a fit after the Centre suddenly changed the rules of the game and asked them this year to partly provide for the big-ticket National Rural Employment Guarantee Scheme. For 20 long years, all states were happy when it was fully funded by the Centre — in the first 10 years by the UPA government after it launched the scheme in 2006, and later by the NDA government.

Under the scheme, now rechristened as Viksit Bharat – Guarantee for Rozgar and Ajeevika Mission (Gramin) or VB-G RAM-G, if a state requires ₹100 crore in a year, the Centre will give ₹60 crore from the Union Budget, and the state

will give ₹40 crore from the state Budget. For Himalayan and Northeastern states, the Centre-state split is 90:10; for Union Territories without legislatures, the Centre will fully fund the scheme.

Earlier, the Centre provided the entire amount of wages for all states. It is not just the Opposition, but also those where the BJP is in power, which feel the fiscal stress of the change in rules. They, too, complain, but in private, because the resource kitty is limited, significant expenditure remains sticky and inflexible, and they, too, have to make tough choices on how and where to spend the scarce revenues they earn.

The opposition to the Centre's move is not just political, but social, economic and fiscal too. Political, understandably, because this was a flagship scheme introduced by the Congress but never seen as transformative by the BJP. Social, since it offered livelihood and a minimum income security to poor farmers and labourers who could not get any other job. Economic, because the NREGA wage acted like a floor, and NREGA job card holders leveraged it to deny work offers with wages lower than this. Fiscal, because states are perpetually strapped for cash.

While the Finance Ministers of BJP states have little choice but to toe the national party line, those of Opposition states — Karnataka, Kerala, Telangana,

The VB-G RAM-G Act 2025 replaces MGNREGA to reshape rural India

Punjab, Tamil Nadu and Jharkhand — spoke out. In Budget speech after speech, they condemned the Centre for requiring them to take care of 40% expenditure. Some wanted the Centre to

uphold the principles of decentralised governance and rights of rural workers, others demanded restoration of 100% funding, and yet others threatened legal recourse.

In his March 20 Budget speech, Telangana Finance Minister Bhatti Vikramarka Mallu said: “This is not just a scheme; it is an ‘employment right’ provided to the common person. Over the past two decades, this scheme has brought about a silent revolution in villages.” Then Karnataka CM Siddaramaiah, who also held the Finance portfolio, was more frontal in his attack. “Our Government remains committed to pursuing all appropriate recourse, including legal measures, to safeguard the rights of rural workers and uphold the principles of decentralised governance,” he said in his March 6 Budget speech. Every other Opposition state i.e., Tamil Nadu, Himachal Pradesh, Jharkhand, Punjab and Kerala, said the rule change is not right, and hurts rural worker's interests.

All this makes for good optics in the political theatre. But despite the restrictions and new funding pattern, Opposition states have embraced realpolitik, and for good reasons. This shows in their budget allocation for VB-G RAM-G scheme in this financial year. In his Budget speech on August 5, Tamil Nadu Finance Minister N Marie Wilson said the state has made an “unprecedented” contribution of ₹5,057 crore. This translates to exactly 40% of the total VB-G RAM-G budget of ₹12,642 crore for the state in 2026-27. Three other states provided 40% of their share: Kar-

nataka ₹3,806.61 crore (40% of ₹9,516 crore), Telangana ₹2,550.21 crore (40% of ₹6,375 crore) and Jharkhand ₹1,853 crore (40% of ₹4,558 crore). Tamil Nadu, in fact, went a step ahead and said it will provide 150 days employment (25 days more than the VB-G RAM-G scheme) by bearing an extra expenditure of ₹100 crore.

Kerala Chief Minister VD Satheesan said he has allocated ₹1,422 crore; this is just 27% of the ₹5,226 crore VB-G RAM-G total estimated budget for the state) in the first phase, Punjab ₹608 crore (27% of ₹2,218 crore total estimated budget), and Himachal ₹50.94 crore (4% of ₹1,337 crore as against the required 10%). It is pretty certain states will provide fully for it during the course of the year.

Given such strident opposition, why would all states do it? One, they have little choice. But more importantly, it is true the scheme has transformed the way the rural economy works, providing not just employment security, but wage security too. Nobody quite bothers about the Minimum Wages Act. But for this scheme, rural wages in states will collapse. States are, at the end of the day, putting their money where their mouth is.

The writer is Managing Editor, The Indian Express. Off the Record is a fortnightly column

Brazil friendly a song-and-dance show to distract audience

RINGSIDE VIEW

TUSHAR BHADURI

AFTER A DISAPPOINTING FIFA World Cup campaign, Brazil would attempt to lay the first bricks of a foundation for the future when they play two friendlies against Australia in the last week of September, before the formidable challenge of facing India in Kolkata on October 3.

One can imagine the task confronting the five-time world champions when they face a team that was nowhere close to qualifying for an expanded AFC Asian Cup, with no certainty about when the domestic league will take place.

It speaks of the farcical situation in Indian football that the team with the most glorious history in international football is paying a visit to the country whose acquaintance with the Beautiful Game is renewed once every four years.

A country where one of the teams in the top division pulls out a couple of months before a new season — though the dates, number of teams, broadcasters and a whole lot of other issues are nowhere close to being finalised.

A country whose football federation, instead of getting its house in order and taking care of basic issues, thinks it's worth its time to consider changing its own name. Of course, changing the name of a city is much easier than ensuring that storm drains don't overflow during monsoons and the roads don't have potholes. Brazil, even though they are not the force at the world level they once were, and stuttered through their recent campaign in the United States, have a considerable following in India. It's more to do with a romantic and nostalgic image of the Samba boys than with anything they have done recently. In fact, since winning their most recent World Cup in 2002, they have made the semifinals just once — on home turf in 2014, when they were humiliated 1–7 by eventual champions Germany, before losing 0–3 to the Netherlands in the third-place playoff.

Bringing the Brazil team to India at this juncture is akin to organising a song-and-dance show to distract the people of a constituency without basic facilities like health, sanitation, education and proper roads. It can be seen as a cynical attempt at headline management to ensure there's something positive to report. The match will take place in a vacuum of sorts, with what happens before or after it hardly anyone's concern.

Trivial matters

Some India players, while being excited at the prospect of sharing the same turf with the famous canary yellow jerseys, have expressed concern that they would go into the friendly without any matches under their belt.

How ungrateful of them! Here's a federation — and those who are footing the bill for this marketing coup — bringing the highest-ranked team ever to set foot on Indian soil, and the players are worried about such inconsequential matters as a domestic league and match practice.

India to face Brazil in an international football friendly in Kolkata on October 3

The result of the game between a team ranked five in the world and one in 138th position is hardly anyone's concern and it's likely that the full house at the Salt Lake Stadium would be cheering vociferously whenever a goal is scored against the nominal 'home' team. If some players, because of the lack of match play in the lead-up to the game and taking the field before they are in prime physical shape, get injured subsequently, it's of no concern because — let's face it — who is bothered about the domestic league, if it takes place at all, and other routine international games.

Jamshedpur FC, the Tata Group-owned franchise that has pulled out of the Indian Super League, has cited 'strategic' reasons for the decision and not financial constraints. It doesn't explain why a call that had been in the making for a while should have taken the players by such surprise. Surely, it could have been indicated to them well before than when they were participating in the Durand Cup. Having a sword dangling on their future, and financial, prospects isn't the best backdrop while playing a tournament. Also, why JFC was part of the deal when the commercial rights of the ISL were handed over to a consortium of the clubs last month hasn't been answered.

What JFC didn't say was laid down explicitly by some of the other ISL teams, who said there's hardly any returns in running a domestic football club. If one of the biggest conglomerates — with a history of involvement in the sport — can't do so, there's hardly any hope for others.

In a different world

It presents a contrasting picture when Indian billionaire businessman and steel magnate Lak-

shmi Mittal is backing a consortium of investors led by his son-in-law Amit Bhatia that's in talks to buy a significant minority stake in Liverpool Football Club, at a time when the Indian domestic league is in such a crisis.

However, all the ills in Indian football can't be put at the doorstep of the federation, even though they delegated a large part of their responsibility to a private entity for a sum of few crores each year. It's the AIFF's obligation that the game in the country stays in reasonable health and the domestic calendar is adhered to. Pursuing financial gain can't be the primary motive of an entity coming under the Societies Registration Act.

Franchises have finally recognised the folly of hiring players at inflated prices, resulting in a soaring wage bill and an unworkable financial model. Some of the clubs asked players to take a salary cut for the truncated last season, but the money would still be much more than anything they are likely to get if they venture overseas, where they would be paid in accordance to their ability and the value they bring to the table. That's the reason players are reluctant to seek pastures abroad even when there's so much uncertainty in Indian football.

Playing in a league of higher standard and professionalism would only make them better, and in turn, help the national team. It would also provide inspiration and aspirational value for others. But as usual, hardly anyone looks past their nose.

The Brazilian team will come, there will be a lot of hype for a few days, there will be a familiar short-lived lament about why Indian football is in such a sorry state, while the Kolkata crowd will cheer every time Vinicius Junior touches the ball.

After a while, it will be back to business as usual.

Brazil, even though they are not the force at the world level they once were, and stuttered through their recent campaign in the US, have a considerable following in India

INSIDE TRACK

COOMI KAPOOR

Lampposts leave lacunas

The education ministry will be under intense scrutiny in the wake of student protests, but Dharmendra Pradhan's successor, Pralhad Joshi, already has his plate full. He holds the portfolios for consumer affairs, public distribution, and new and renewable energy. There have now been 5 education ministers and 7 ministers of information and broadcasting under Prime Minister Modi, compared to relative continuity in other ministries, such as finance, defence and home. One reason for Joshi's hasty selection is his proximity to the RSS, which constantly interferes in the ministry, whether on curricula, appointments or educational institutes.

Many apprehend that the BJP high command's cavalier, unilateral selection of senior positions has harmed the party's public perception. The surprisingly unsuitable CM picks in states such as Rajasthan, Madhya Pradesh, Delhi and Bihar without democratic discussion, sometimes largely on caste calculations and electoral strategies, have begun to backfire. Prashant Kishor's spectacular win in BJP's Bankipur assembly bastion was a referendum against both Bihar Chief Minister Samrat Choudhary and BJP President Nitin Nabin, both considered unsuitable choices. When an untested Nabin was named the president, many wondered whether senior experienced party organisers would be willing to work under him. Nabin failed in his first test as president — selecting the BJP candidate for his former constituency. Some compare the party's recent appointments to Indira Gandhi's hubris in the 1970s when she assumed that even a lamppost could win if propelled by her own popularity.

Divided house

Also disturbing are the visible cracks in a party, which takes pride in its cadres' discipline. Transport Minister Nitin Gadkari's followers suspect he was deliberately targeted on the government's ethanol policy, even though it was not his decision, by enemies within, backed by the petroleum lobby. Influencers active in the anti-Gadkari campaign have earlier worked on some BJP election campaigns. Maharashtra Deputy Chief Minister Eknath Shinde has complained repeatedly to the PM that Chief Minister Devendra Fadnis does not keep him in the loop. The universally respected Environment Minister Bhupender Yadav was taken aback to find that most of his personal staff had been replaced overnight. After his resignation, Dharmendra Pradhan was pointedly felicitated by

senior colleagues, and he also met RSS General Secretary Dattatreya Hosabale. Some disgruntled BJP members felt UP Chief Minister Yogi Adityanath acted with unseemly haste in ordering an SIT to investigate the 'chanda chori' allegations at Ayodhya, without an FIR. In fact, the CM was conscious that his political opponents would try to gain mileage from the scandal in next year's assembly elections.

Sudden vulnerability

The BJP government's sudden vulnerability after its brush with Generation Z is compared to the moment of truth during the 2024 poll results, when it found itself 32 MPs short of a majority. The ruling party made up lost ground and defied the odds to win a string of uncertain assembly elections, with Bengal its crowning triumph. But now the wheel of fortune appears to have turned against it, and there are signs of a more accommodating government outreach.

It is not the traditional opposition parties that pose the real challenge, but a restless, aspirational young India. The BJP has lost ground in two spheres once considered its core strengths — youth leadership and communication. Potential BJP youth leaders have either been sidelined or have lost their fire after being co-opted into the system. After 12 years in power, the party's narrative builders appear arrogant and intimidating; their messages do not click with Gen Z. Pertinently, 52% of our population is under 30. Caste and religious divides or direct dolos may not be the magic mantra for future elections. Government accountability may matter most.

Art of speaking softly

Sunil Kanugolu, the McKinsey-trained poll analyst, usually accompanies Congress general secretary KC Venugopal for discussions on election strategy. A recent meeting with Punjab Congress leaders Charanjit Channi and Sukhjinder Singh Randhawa in Delhi did not go well. Venugopal, armed with the statistics supplied by Kanugo, rudely ticked off the two Punjab strongmen, claiming they overestimated their electoral clout. Such blunt speaking may work in South India, but the two proud Punjabis, one a former CM and the other a deputy CM, took offence and walked out of the room.

Clubbed down?

Delhi's hallowed Gymkhana Club has virtually stopped taking bookings for its premises for September. Shaken members fear their worst nightmare — the club's actual closure.

Mind & Games

Concrete built the modern world.

CAN WE REINVENT IT?

Concrete is the backbone of modern civilisation and one of the world's biggest sources of emissions. Experts are now trying to reinvent it without compromising the infrastructure growing economies still need

ANUSHA KRISHNAN

IF YOU LIVE in an Indian city today, chances are there's construction happening nearby. A new metro line, a flyover, a housing tower, a mall, or endless road repairs. Enormous quantities of concrete are being poured every day. Now consider this: if concrete were a country, it would be one of the world's largest emitters of greenhouse gases.

That sounds strange. Concrete doesn't burn fuel or have an exhaust pipe. It is mostly made from materials that seem fairly benign: stone, sand, gravel and water. Yet concrete production is responsible for an estimated 5-8% of global greenhouse gas emissions.

The paradox is hard to ignore: The world needs more infrastructure, and India alone is expected to build vast amounts of housing, transport systems, renewable energy infrastructure and industrial capacity over the coming decades.

So how do you keep building a country without significantly increasing emissions? The answer may lie in an unlikely place: rethinking the recipe of concrete itself. Rather than abandoning concrete altogether, scientists, engineers and manufacturers are trying to redesign the world's favourite construction material so that it delivers the same strength and durability with a much smaller climate footprint. Welcome to the world of low-carbon concrete. But before we explore how that works, we need to understand what concrete actually is, and where its emissions come from.

Why is concrete so carbon-intensive?

Concrete is the world's most widely used construction material. We produce around 30 billion tonne of it every year, far more than steel, plastic or aluminium.

As cities expand and countries build new roads, railways, airports, housing and renewable energy infrastructure, demand for concrete continues to grow. Global concrete production roughly quadrupled between 1990 and 2020.

Most concrete-related emissions come from one of its key elements: cement.

Concrete is essentially a mixture of cement, water and "aggregates" such as sand and gravel. Cement acts as the glue that binds everything together. Although it makes up only a small proportion of the final mix, it is responsible for most of the carbon footprint of concrete.

The culprit is a key ingredient called clinker. Clinker is produced by heating limestone and other materials in giant kilns at temperatures of up to 1,450°C.

This process generates emissions in two ways. First, enormous amounts of fuel are burned to reach such high temperatures. Second, the limestone itself releases carbon dioxide as it is transformed into lime, a key ingredient in cement.

Together, these two processes make cement one of the world's most carbon-intensive industrial products. Producing a tonne of cement releases roughly 580-900 kg of carbon dioxide – or what the burning of 300 or so litres of petrol would produce. That might not sound extraordinary until you consider the scale. Cement is found in almost every road, bridge, apartment block, office tower and drainage system around us. While some materials such as aluminium have higher emissions per tonne, few are used in such vast quantities. It is present in nearly every road, bridge, drain, office tower and housing complex. To put this in perspective, the aluminium industry emitted about 1,116 million tonne of CO2 globally in 2020, while cement production crossed 3,000 million tonne.

Which raises an obvious question: if cement is the problem, can we make con-

CONCRETE USE VERSUS STEEL, ALUMINIUM AND PLASTIC			
Concrete	Steel	Plastic	Aluminium
Approximate annual global use/production			
~30 bn metric tonne	~2 bn metric tonne	~400-450 mn metric tonne	~70-75 mn metric tonne
Notable features			
Most-used human-made material on Earth	Roughly 55% used in construction	Includes packaging, consumer goods, industry	Used in transport, electricity, construction

crete with less of it?

So how do you make concrete low-carbon?

Once you understand where concrete's emissions come from – mostly cement; roughly 60% from the chemical reactions, the other 40% come from the heating processes involved – the solution becomes straightforward.

- Use less cement.
- Make cement differently.

Most low-carbon concrete technologies follow one of these approaches.

Some replace a portion of cement with lower-carbon materials. Others use industrial by-products that would otherwise go to waste. Still others focus on making cement production more efficient, using cleaner fuels, capturing carbon emissions, or recycling construction materials.

Together, these approaches can reduce emissions by 15-40%, while sometimes improving durability and lowering life-cycle costs.

The most immediate opportunity, however, is also the simplest: reducing the amount of 'ordinary Portland cement' (OPC) used in concrete. OPC is the most common type of cement used around the world. Because OPC relies heavily on clinker, it is also responsible for most of concrete's emissions.

What can replace OPC?

One answer is already being tested at scale in India. The upcoming Noida International Airport at Jewar, Uttar Pradesh, has made extensive use of a material called Limestone Calcined Clay Cement, or LC3. By replacing a significant portion of OPC, LC3 can reduce carbon emissions by up to 40% while delivering comparable strength and durability.

LC3 belongs to a broader family of materials known as supplementary cementitious materials, or SCMs. These materials partially replace clinker, the most carbon-intensive ingredient in cement. Many come from industrial by-products or

naturally occurring minerals – including fly ash from coal-fired power plants, rice husk ash from agriculture, silica fumes from industrial processes, and ground granulated blast furnace slag from steel production. They allow manufacturers to reduce emissions without fundamentally changing how concrete is produced; that is, they can be used to manufacture cement using much of the existing infrastructure. Some of these materials improve the long-term strength and durability of concrete, while others improve workability and reduce the amount of cement required. This makes SCMs easier to scale than many newer alternatives.

But replacing part of the cement is only one approach. What if you could eliminate conventional cement altogether?

Enter: Alternative binders

While SCMs reduce the amount of cement used in concrete, alternative binders aim to replace conventional cement entirely.

Several promising candidates are being developed, including geopolymers, calcium sulfoaluminate cements, and belite-rich cements. Geopolymers are among the most closely watched. Instead of relying on clinker, they use materials such as fly ash and slag, activated with alkaline solutions to create a strong binding network. Because they avoid limestone calcination, they have the potential to reduce emissions substantially. Other alternatives take a different approach. Calcium sulfoaluminate cements require lower kiln temperatures and less limestone than conventional cement, while belite-rich cements reduce

energy use by altering the chemistry of the cement itself.

The challenge is scale. Unlike SCMs, which can be integrated relatively easily into existing systems, many alternative binders still face hurdles related to cost, standards, supply chains and industry acceptance.

Can low-carbon concrete build India's future?

For now, materials such as LC3, fly ash and slag-based blends are gaining traction because they can be produced using existing manufacturing systems and construction practices. Fully cement-free alternatives such as geopolymers remain promising, but have yet to achieve widespread adoption.

India is also well-positioned to benefit from this transition. Abundant limestone and clay resources, large infrastructure projects, evolving standards, and a growing ecosystem of researchers and manufacturers are helping push low-carbon concrete from the laboratory into the real world. The next major shift may come from policy. If governments begin setting limits on the embodied carbon of buildings and infrastructure, demand for lower-carbon materials could accelerate rapidly.

Low-carbon concrete will not solve the climate crisis on its own. But if the world is going to keep building at the scale it does today, it may become one of the most important climate solutions hiding in plain sight.

The piece is published in arrangement with Climate Action Live <https://www.climateaction.live/>

*forcing

Contract: 3C by south; doubled by west.

Bidding comment: East's 1NT was forcing, generally showing 6-11 points. He was planning to jump to 3S on the next round to indicate about 10-11 points and only three trumps. With four trumps, he would have bid 3S directly.

How the play went: West led his singleton diamond which declarer won. Needing to ruff his losers in dummy, declarer exited in a spade. East won with the nine and gave a diamond ruff to his partner. West exited in CK now. Dummy won, cashed HA, and ruffed a heart into hand. He ruffed a spade next, but still had to lose two trump tricks and two spade tricks, for down two and +300 to E-W.

Discussion: You will agree it was suicidal to charge in with 2C with the south hand. If he had held C K Q-J-x-x and the DA, it would be perfectly alright to interject with 2C. After a diamond lead, he has an easy nine tricks.

Should you blame north for bidding 3C against their 2S? No. You shouldn't. He was only trying to compete, not knowing his partner had entered the bidding with the ratty suit of his.

With four cards in hearts and his RHO showing five cards in the suit, east showed excellent restraint in bidding only 2S! Incidentally, 3S goes down on heart ruffs!

LEXICON

MARKETECTURE

n. A new computer architecture that is being marketed aggressively despite the fact that it doesn't yet exist as a finished product; the design and structure of a market or a marketing campaign.

The Advanced Micro Devices and Intel debate, always a heated one (er, sorry), has come to the fore after the launch of AMD's Athlon XP last week. With it comes the marketecture hype that outright processor speed isn't everything, and good luck to them if it proves to be the case. —Robert X. Cringely, "Notes From the Field," InfoWorld, October 15, 2001

	[b] Diluted	3.81	2.10	5.03	28.76	3.95	2.32	5.17	29.37
Note:									
1. The above financial results (standalone and consolidated) were reviewed by the Audit Committee and approved by the Board of Directors at their respective meetings held on August 08, 2026. Above meetings were held in physical presence and also through two-way audio-video conference.									
2. EPS is calculated based on total comprehensive income which is attributable to equity shareholders.									
3. The consolidated financial statements of HBL includes the financials of TTL Electric Fuel Private Limited which is a subsidiary with 60% shareholding in addition to the wholly owned subsidiaries viz. HBL America, HBL Germany, The Investments in Companies namely Naval Systems and Technologies Private Limited, Tonbo Imaging India Limited and Xalten Systems Private Limited (Xalten") have been considered as Investments in "Associates" and financial results have been accounted under equity method of accounting.									
*During the reporting period HBL made an investment of Rs. 6.37 Crs in Xalten towards Equity Shares and Compulsorily Convertible Preference Shares (CCPS), resulting in 9.84% shareholding on a fully diluted basis. Xalten is classified as an Associate Company due to significant influence arising out of reserved matters and Board representation.									
4. The subsidiaries viz. SCIL, Infracon Private Limited (SCIL), HBL Tonbo Private Limited (HTPL) and Torquevire Technologies Private Limited (TTL) have not been considered for consolidation as SCIL has been declared as dormant Company since 2019; HTPL made an application under Section 248 (2) of the Companies Act, 2013 was made during FY 22-23 for striking off the name of the Company and is under process with Ministry of Corporate Affairs; and TTL applied for striking off the name under Companies Compliance Facilitation Scheme 2026 (CCFS-2026) and the application is under process. There are no operations in those Companies.									
5. HBL and Cochlin Shipyard Limited incorporated a Joint Venture Company namely "Green Maritime Propulsion Private Limited" on June 11, 2026 with HBL being the 60% shareholder. However, as the subscription has not been made during reporting period, the same is not considered for consolidation.									
6. Figures of the previous quarters / periods have been regrouped, wherever necessary.									
7. The results shall also be available on website of the Company : http://hbl.in/investors; BSE: www.bseindia.com and NSE: www.nseindia.com

- Notes:
- The unaudited financial results of the Company for the quarter and year ended June 30, 2026 have been prepared in accordance with the Indian Accounting Standards ("Indian Accounting Standards" (Ind AS)) as Prescribed under section 133 of the Companies Act, 2013 as amended.
 - The company is primarily engaged in one business segment in accordance with the requirement of Indian Accounting Standards (Ind AS) 108: Operating Segment. Accordingly, no separate segment information has been provided.
 - The unaudited financial results of the Company for the quarter ended June 30, 2026 have been reviewed by the audit committee on August 07, 2026 and thereafter Board of directors at their meeting held on August 07, 2026.
 - Exceptional Items**
 - Further, the Company had certain outstanding income tax demands, against which it had deposited amounts while filing appeals. Pursuant to the Resolution Plan approved by the Hon'ble NCLT, these demands have been extinguished and are no longer payable. Consequently, the related deposits made against such demands have also become non-recoverable. Accordingly, the Company has written off these deposits amounting to ₹581.59 lakhs during the year, and the same has been disclosed under "Exceptional Items" in the audited financial results of previous quarter ended March 31, 2026.
 - Further, as per the Resolution Plan approved by the Hon'ble NCLT vide order dated December 8, 2023, the Company has sold certain immovable properties located in Andheri during the current year. The profit on sale of such assets, along with other costs pertaining to such sale, amounting to ₹1,543.59 lakhs, has been shown as an exceptional item in previous year. Accordingly, the net impact, i.e., gain of ₹962.00 lakhs, has been presented as an exceptional item in the audited financial results of previous year.
 - The figures for the quarter ended March 31, 2026 are the balancing figures between the audited figures in respect of the full financial year and the unaudited published figures up to nine months of the relevant financial year.

NOTICE OF 46TH ANNUAL GENERAL MEETING, REMOTE E-VOTING INFORMATION AND RECORD DATE

- Notice is hereby given that:
- The 46th Annual General Meeting ("AGM") of Jindal Stainless Limited ("the Company") will be held on Wednesday, 02nd September, 2026 at 12 Noon (IST) through Video Conferencing ("VC") / Other Audio Visual Means ("OAVM") to transact the Ordinary Business and Special Business, as set out in the Notice of the AGM in compliance with the applicable provisions of the Companies Act, 2013 and Rules framed there under, circular dated 8th April, 2020 read with circular dated 13th April, 2020, and subsequent circulars issued from time to time by the Ministry of Corporate Affairs ("MCA"), the latest being General Circular No. 03/2025 dated 22nd September, 2025 and the circulars issued from time to time by Securities Exchange Board of India ("SEBI") (collectively referred to as "Circulars"), without the physical presence of the Members at a common venue.
 - In terms of the MCA Circulars and SEBI Circulars, the Notice of the 46th AGM and the Integrated Annual Report for the financial year 2025-26 including therein the Audited Financial Statements for financial year ended 31st March, 2026, have been sent on 08th August, 2026 only by email to the Members whose email addresses are registered with the Company / Depository participants ("DPs"). The requirement of sending the physical copy of the Notice of the AGM and Integrated Annual Report to the members has been dispensed with vide MCA Circulars and SEBI Circulars. Additionally, a letter providing the web-link to access the Notice of the 46th AGM and the Integrated Annual Report is also being sent to those Members whose e-mail addresses are not registered with the Company / RTA or the DPs.
 - Members holding equity shares either in physical form or in dematerialized form, as on the cut-off date i.e. 26th August, 2026, may cast their vote electronically on the Ordinary and Special Business as set out in the Notice of AGM through remote e-voting / e-voting facility of MUFG Intime India Private Limited, Registrar & Share Transfer Agent of the Company (MUFG Intime / RTA). All members are informed that:
 - The Ordinary and the Special Business as set out in the Notice of AGM may be transacted through voting by electronic means;
 - The remote e-voting shall commence on Saturday, 29th August, 2026 at 9:00 A.M. (IST);
 - The remote e-voting shall end on Tuesday, 01st September, 2026 at 5:00 P.M. (IST);
 - The remote e-voting facility will be disabled by MUFG Intime after the aforesaid date and time. Remote e-voting shall not be allowed beyond the said date and time and once the vote on a resolution is cast by the member, the member shall not be allowed to change it subsequently;
 - The cut-off date for determining the eligibility to vote through remote e-voting / e-voting during the AGM is 26th August, 2026;
 - A person whose name is recorded in the register of members or in the register of beneficial owners maintained by the depositories, as on the cut-off date i.e. 26th August, 2026 only, shall be entitled to avail the facility of remote e-voting / e-voting during the AGM.
 - Members who vote through remote e-voting would not be entitled for e-voting during the AGM.
 - A member may participate in the AGM even after exercising his right to vote through remote e-voting but shall not be allowed to vote again in the meeting.
 - Any person who becomes member of the Company after dispatch of the Notice of the meeting and holding shares as on the cut-off date i.e. 26th August, 2026, may obtain the User ID and password by sending a request at email: swapan@in.mprms.mufg.com.
 - However, a person who is already registered with MUFG Intime for e-voting then existing User ID and password can be used to cast the vote. In case of any queries or grievance pertaining to E-voting, the members may refer to the help section at https://instavote.linkintime.co.in or contact Mr. Swapan Kumar Naskar, Associate Vice President & Head (North India), MUFG Intime India Private Limited, Noble Heights, 1st Floor, Plot No. NH2 C1 Block LSC, Near Savitri Market, Janakpuri, New Delhi - 110058 at Contact no. (011) 41410592/93/94 (Email: swapan@in.mprms.mufg.com) or contact the Company.
 - The Members holding shares in physical form who have not registered their email addresses with the Company and who wish to receive the Notice of the 46th AGM and the Integrated Annual Report for the year 2025-26 and/or login details for joining the 46th AGM through VC/OAVM facility including e-voting can now register their e-mail addresses with the Company. For this purpose, they can send scanned copy of signed request letter mentioning folio number, complete address and the email address to be registered along with self-attested copy of the PAN Card and any document supporting the registered address of the Member, by email to the Company at investorcare@jindalstainless.com. Members holding shares in demat form are requested to register their email addresses with their DPs only.
 - Notice of AGM and the Integrated Annual Report is also available on the Company's website www.jindalstainless.com and also on the MUFG Intime's website https://instavote.linkintime.co.in
 - Mr. Kamal Gupta, Advocate, has been appointed as the Scrutinizer to scrutinize the e-voting process in a fair and transparent manner.
 - The Record date fixed for determining entitlement of Members to pay the final dividend, (if declared by the shareholders) for the financial year 2025-26, is Friday, August 21, 2026.
- This notice is also available on the website of the Company at www.jindalstainless.com and on the website of the Stock Exchanges where the shares of the Company are listed at www.nseindia.com and www.bseindia.com.

NOTICE OF 45TH ANNUAL GENERAL MEETING (AGM) TO BE HELD THROUGH VIDEO CONFERENCE (VC)/OTHER AUDIO VISUAL MEANS (OAVM) AND INFORMATION ON E-VOTING

- The AGM of the Members of the Company will be held on Monday, the 31st August 2026 at 10:30 a.m. through VC/OAVM in compliance with all the applicable provisions of the Companies Act, 2013 ("Act") and the Rules made thereunder and the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations") read with all applicable circulars issued by the Ministry of Corporate Affairs ("MCA") and the Securities and Exchange Board of India ("SEBI") to transact the businesses set forth in the Notice of the AGM. Members will be able to attend the AGM through VC/OAVM at <https://emeetings.kfintech.com>.
- The Notice of the AGM and Annual Report have been sent to all the Members whose email address is registered with the Company/Depository Participant(s). The aforesaid documents are also available on the Company's website i.e. www.marutisuzuki.com and on the website of the Stock Exchanges i.e. www.bseindia.com and www.nseindia.com and on the website of the Registrar and Transfer Agent ("RTA") i.e. <https://evoting.kfintech.com>.
- In accordance with Regulation 36(1)(b) of the SEBI Listing Regulations, the Company is sending a letter to Members whose e-mail address is not registered with the RTA / Depository Participant(s), providing the web-link and exact path of the Company's website from where the Annual Report for the financial year 2025-26 can be accessed.
- The Company is providing a facility to its Members to exercise their right to vote on resolutions proposed to be passed at AGM by electronic means ("remote e-Voting"). The Company has engaged the services of KFin Technologies Limited ("KFin") as the authorized agency to provide remote e-Voting facility. Members are requested to follow the instructions comprising manner of e-Voting and remote e-Voting (for casting the vote) which have been detailed in the Notice of AGM.
- The facility for voting through electronic means will also be made available at the AGM and only those Members who are present at the AGM and have not cast their vote on the resolutions through remote e-Voting and are otherwise not barred from doing so, will be eligible to vote during the AGM.
- Information and instructions including the details of User Id and Password relating to e-Voting have been sent to the Members through email. The same login credentials should be used for attending the AGM through VC/OAVM. Members who do not receive email or whose mail address is not registered with the Company/RTA/Depository Participant(s) may generate login credentials by following the instructions given in the Notes to Notice of the AGM.
- The details of the remote e-Voting are as under:
 - Date and time of commencement of remote e-Voting: 26th August 2026 (9:00 a.m.).
 - Date and time of end of remote e-Voting: 30th August 2026 (5:00 p.m.).
 The remote e-Voting shall not be allowed beyond 30th August 2026 (5:00 p.m.).
- A person whose name appears in the register of members/beneficial owners as on the cut-off date i.e. Monday, the 24th August 2026 shall only be entitled to avail the facility of remote e-Voting or e-Voting during AGM and participation at AGM.
- A person who becomes Member of the Company after dispatch of the Notice of the AGM and holding shares as on the cut-off date, may obtain the User Id and Password by following the detailed procedure as provided in the Notice of AGM which is available on Company's website and KFin's website.
- The Members who have cast their vote by remote e-Voting prior to the AGM may attend the AGM but shall not be entitled to cast their vote again.
- In case of any query regarding e-Voting or technical assistance for VC/OAVM participation, the Members may contact Mr. G Vasantha Rao, official of KFin at the toll free no. 1800 3094 001 or write at evoting@kfintech.com or may refer to the Help & Frequently Asked Questions (FAQs) and e-Voting user manual available at the download section at <https://evoting.kfintech.com> (KFin Website).

NOTICE TO THE SHAREHOLDERS REGARDING 65TH ANNUAL GENERAL MEETING OF THE COMPANY

MEETING OF THE COMPANY

- NOTICE is hereby given that the Sixty Fifth (65th) Annual General Meeting (AGM) of Whirlpool of India Limited ("the Company") will be held on Wednesday, 09th September, 2026 at 11:00 AM (IST) through Video Conference/Other Audio Visual Means ("VC/OAVM") in compliance with all the applicable provisions of Companies Act, 2013 ("Act") and the Rules made thereunder and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations") read with General Circular No. 14/2020 dated 08th April, 2020 and subsequent circulars issued in this regard, the latest one being General Circular No. 03/2025 dated 22nd September, 2025 issued by the Ministry of Corporate Affairs (MCA) and other applicable circulars issued in this regard to transact the business that will be set forth in the Notice of 65th AGM.
- The electronic copy of the Notice of the AGM along with the Annual Report for the Financial Year (FY) 2025-26 will be sent only by email to those Members whose e-mail addresses are registered with the Company/ Registrars and Share Transfer Agent ("RTA")/ Depository Participant(s) ("DPs") in compliance with the aforesaid Circulars. The same will also be available on the Company's website at www.india.whirlpool.in, website of Stock Exchanges i.e., BSE Limited and National Stock Exchange of India Limited at www.bseindia.com and www.nseindia.com respectively and on the website of NSDL at www.evoting.nsdl.com. The physical copies of the Notice of the AGM along with Annual Report for the FY 2025-26 shall be sent to those Members who request the same by sending email from registered email address at investor_contact@whirlpool.in. Additionally, in accordance with Regulation 36(1)(b) of the SEBI Listing Regulations, the Company will also be sending a letter to shareholders whose e-mail address are not registered with Company/RTA/DP providing the weblink of Company's website from where the Annual Report for FY 2025-26 can be accessed.
- Manner of registering/updating KYC including email address and bank details:**
Members who have not registered/updated their KYC including email address and bank details may also register/update the same in below manner:
 - Shareholders holding shares in dematerialised mode are requested to register their email addresses, mobile numbers, bank account details for receipt of dividend and/or other details, with their relevant depositories through their DPs.
 - Shareholders holding shares in physical mode are requested to furnish their email addresses, mobile numbers, bank account details for receipt of dividend and/or other details in Form ISR-1 and other relevant forms prescribed by SEBI, with the Company's Registrars and Share Transfer Agent, at the below address:
MUFG Intime India Private Limited, Noble Heights, 1st Floor, Plot No. NH 2, LSC, C-1 Block, Near Savitri Market, Janakpuri, New Delhi-110058; Telephone: 011-49411000; Fax: 011-44140591; Email: investor.helpdesk@in.mpmis.mufg.com; Website: www.in.mpmis.mufg.com
- Manner of casting vote through e-voting:**
Members will have an opportunity to cast their votes remotely on the businesses as may be set forth in the Notice of the AGM through remote e-voting facility. The Members can refer to the detailed e-voting process in the Notice of AGM and the login credentials for casting the votes through e-voting shall be made available through the various modes provided in the Notice as well as through email after successful registration of the email addresses. The details will also be made available on the website of the Company.
- Record Date and Final Dividend:**
The Company has fixed Friday, 28th August, 2026, as the 'Record Date' for determination of Members entitled to receive final dividend for the financial year 2025-26, subject to approval of the shareholders at the 65th AGM. Members are encouraged to register/update their bank details to receive the dividends, if declared at the AGM, directly in their bank account. The detailed instructions regarding these can be referred to in the Notice of AGM.
- Tax on Dividend**
Members may note that the Income Tax Act, 2025 (IT Act), as amended by the Finance Act, 2020, mandates that dividends paid or distributed by a Company shall be taxable in the hands of the Members. The Company shall therefore be required to deduct Tax at Source (TDS) at the time of making payment of the final dividend. In order to enable us to determine the appropriate TDS rate, as applicable, Members are requested to complete and/or update their Residential status, Category and PAN as per the IT Act with the RTA/DP and submit the documents in accordance with the provisions of the IT Act and as per the process given in the Notice of AGM. The detailed process and documents will be set out in the Notice of AGM. The TDS rates would vary depending on the Category, Residential status of the Members and the documents submitted by them within the timeline given by the Company and subject to their acceptance by the Company.

This Notice is being issued for the information and benefit of all the Members of the Company in compliance with the applicable circulars of the MCA and SEBI.

STATEMENT OF UNAUDITED FINANCIAL RESULTS FOR THE QUARTER ENDED JUNE 30, 2026
(₹ In lakhs)

Sr. No.	Particulars	3 Months ended June 30, 2026	3 months previous quarter ended March 31, 2026	Corresponding 3 months ended June 30, 2025	Year ended March 31, 2026
		Unaudited	Audited	Unaudited	Audited
1.	Total Income from operations	4.35	0.79	1.25	3.81
2.	Net Profit/(Loss) for the period (before tax, exceptional and/or extraordinary items)	(575.87)	(569.03)	(517.19)	(2,203.02)
3.	Net Profit/(Loss) for the period before tax (after exceptional and /or extraordinary items)	(575.87)	(569.03)	(517.19)	(2,419.89)
4.	Net Profit/(Loss) for the period after tax (after exceptional and /or extraordinary items)	(575.87)	(569.03)	(517.19)	(2,419.89)
5.	Total comprehensive income for the period [comprising profit/(loss) for the period (after tax) and other comprehensive income(after tax)]	(575.87)	(569.03)	(517.19)	(2,419.89)
6.	Paid up equity share capital (Face Value per share Rs.10/- each)	2,594.40	2,594.40	2,594.40	2,594.40
7.	Reserves(excluding Revaluation Reserve as shown in the Balance Sheet of the previous year)	(17,280.44)	16,722.88	(14,882.28)	(16,722.88)
8.	Earnings Per Share (of Rs.10/- each) (for continuing and discontinued operations) (Not annualized in respect of quarterly results)				
	1) Basic	(2.22)	(2.19)	(1.99)	(9.33)
	2) Diluted	(2.22)	(2.19)	(1.99)	(9.33)

The above unaudited financial results have been reviewed by the Audit Committee and have been approved by the Board of Directors at the meeting held on August 07, 2026. The unaudited financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS) prescribed under Section 133 of the Companies Act, 2013 and other recognised accounting practices and policies to the extent applicable.
"During the quarter ended on June 30, 2026, the Company incurred a loss of Rs. 575.87 Lakhs. The accumulated losses of the Company as at June 30, 2026 are Rs. 19,653.52 Lakhs resulting into erosion of Net Worth. There is no production activity from Financial Year 2015-16 onwards in the absence of any orders.
The erstwhile Management had reassessed the Company's financial position and performance in accordance with the applicable accounting standards. Considering uncertainty regarding the time required to successfully identify and establish alternate revenue streams, said management concluded that for the purpose of accounting and financial statements, it would be prudent to consider the Company as not going concern. Therefore, the financial statements have been prepared on the basis of 'not going concern' from the quarter and half year ended September 30, 2025 onwards. Accordingly, the Company has measured all the assets at lower of their estimated net realizable value and carrying amount, and liabilities at their settlement amounts, in accordance with the applicable Accounting Standards. Therefore, with respect to reinstatement of borrowings from erstwhile related parties, there was an additional charge amounting to Rs.216.87 Lakhs to the profit and loss account for the year ended March 31, 2026 disclosed under the exceptional items with corresponding increase in the losses for the year and accumulated losses.
Upon consummation of share purchase agreement executed by Sharp Corporation, Japan (the earlier Holding Company) with Smart Services Private Limited, w.e.f. June 2, 2026 the entire shareholding representing 75% of the paid-up equity share capital of the Sharp India Limited (the Company) was transferred in favour of Smart Services Private Limited. Simultaneously, the Board of Directors of the Company was reconstituted, and Smart Services Private Limited was classified as the Promoter and Promoter Group in accordance with the applicable provisions of the SEBI Regulations
Pursuant to the change in the ownership and management of the Company, the Board of Directors, in its meeting held on July 2, 2026, considered, inter alia, the proposal for change in the name of the Company, alteration of the Object Clause of the Memorandum of Association and Articles of Association, and other related matters. The Company is presently in the process of obtaining the requisite approvals from its shareholders through postal ballot by way of remote e-voting. The Company has also intimated the Stock Exchange regarding the Board's decision to change the basis of accounting.
Pending such requisite approvals from the shareholders, the company continued to prepare its financial results for the quarter ended June 30, 2026 on not going concern basis. In view of the above the figures for the previous period pertaining to the quarter ended June 30, 2025 included in the accompanying statement of financial results are not comparable with those of the current quarter and quarter and year ended March 31, 2026.
Note: The above is an extract of the detailed format of quarterly financial results filed with the Stock Exchange under Regulation 33 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015 (the "Listing Regulations"). The full format of the quarterly financial results are available on the Stock Exchange website-www.bseindia.com and website of the company -www.sharpindialimited.com

CORRIGENDUM TO THE NOTICE OF THE 18TH ANNUAL GENERAL MEETING

Notice is hereby given to the Members of Mangal Electrical Industries Limited ("Company") that a Corrigendum dated 08/August 2026 has been issued in continuation of and forms an integral part of the Notice convening the 18th Annual General Meeting ("AGM") of the Company scheduled to be held on Wednesday, 26 August 2026 at 2:00 P.M. (IST) through Video Conferencing ("VC") / Other Audio Visual Means ("OAVM").

The Corrigendum has been issued to rectify the following inadvertent errors:

1. Appointment of Secretarial Auditor Item No. 5

The term of appointment of M/s SKMG & Co., Company Secretaries, as Secretarial Auditor shall be read as five (5) consecutive financial years commencing from Financial Year 2026-27 and ending with Financial Year 2030-31, instead of Financial Year 2026-27 only.

2. Correction in the Brief Profile of Ms. Neha Rathi Annual Report, Page No. 18 The statement: "Ms. Neha Rathi is the Company Secretary & Compliance Officer of the Company."

"Ms. Neha Rathi is the Company Secretary & Compliance Officer of Raghav Productivity Enhancers Limited."

All other contents of the AGM Notice, Explanatory Statement and Annual Report for FY 2025-26 remain unchanged. Members are requested to read the Corrigendum together with the AGM Notice before casting their votes. The Corrigendum is available on the Company's website, the websites of BSE Limited and National Stock Exchange of India Limited and the e-voting agency's website. By Order of the Board of Directors

DEMAND NOTICE

UNDER THE PROVISIONS OF THE SECURITIZATION AND RECONSTRUCTION OF FINANCIAL ASSETS AND ENFORCEMENT OF SECURITY INTEREST ACT, 2002 ("the Act") AND THE SECURITY INTEREST (ENFORCEMENT) RULES, 2002 ("the Rules")

The undersigned being the Authorized Officer of Cholamandalam Investment and Finance Company Ltd. (the Secured Creditor) under the Act and in exercise of the powers conferred under Sec. 13(12) of the Act read with Rule 3 issued Demand Notice(s) under Sec. 13(2) of the Act, calling upon the following borrower(s) to repay the amount mentioned in the respective notice(s) within 60 days from the date of receipt of the said notice. The undersigned reasonably believes that borrower(s) is / are avoiding the service of the Demand Notice(s), therefore the service of notice is being affected by affixation and publication as per Rules. The contents of Demand Notice(s) are extracted herein below :-

Sr. No.	Name & Address of the Borrower/s & Co-Borrower/s	Loan Amt.	Dt. of Demand Notice & O/s. Amt.	Description of the Property / Secured Asset
1	Loan A/C. No(S) : HL29VRC000168806 1. Mr. Mrs. Sezhian P 2. Mr. Mrs. Dhanalakshmi Pazhani Add For Sr. No. 1 & 2 : 355, South Street, Thoopakkallai, Marungru Post, Panruti Taluk, Temple Cuddalore, Tamil Nadu - 607103 Add For Sr. No. 1 & 2 : Door No 355, Mariyamman Kovil Street, Thoopakkallai, Marungru, Panruti, Cuddalore, Tamilnadu, 607103	Rs. 18,00,000/-	28.07.2026 Rs. 20,26,968/- (Rupees Twenty Six Thousand Nine Hundred Sixty Eight Only) as on 28.07.2026	Cuddalore Registration District, Katampuliyur Sub-Registrar Office, Marungru Village, Ayan Punjal SurveyNo.355/942, with an extent of 0.03.45 Hectare, Old Survey No.510/1, with an extent of 1.48 Acre in which 0 Acre 08 % Cent of within the following fourboundaries. North Land belongs to Narayanan, South :Commonpathway and Land belongs to Pandurangan, West Land belongs to (Late) Krishnan and others, East Land belongs to Akrishnan, Common Pathway For the total extent of 0 Acre 08 %Cent of land that is3706Square Feet which is 345 Square Meter of land. This land has been approved as per PS447/2018 (VI/ma) of Vilupuram MandalUrban Planning Assistant Director, sub-division Approval Latter No.455/2018 (VI/ma) dated 11.12.2018 as A to G. Panruti Panchayat. Union BlockDevelopment officers Resolution No.24 dated 21.08.2019, 01578.27 Square Meter. New Survey No.355/94, 0.15.95 Ares. This Property is in Marungru Panchayat Limit.

The borrower(s) are hereby advised to comply with the Demand Notice(s) and to pay the demand amount mentioned therein and hereinabove within 60 days from the date of this publication together with applicable interest, bounce charges, cost and expenses till the date of realization of payment. The borrower(s) may note that Cholamandalam Investment and Finance Company Ltd. is a secured creditor and the loan facility availed by the Borrower(s) is a secured debt against the immovable property / properties being the secured asset(s) mortgaged by the borrower(s). In the event borrower(s) are failed to discharge their liabilities in full within the stipulated time, The Secured Creditor shall be entitled to exercise all the rights U/s. 13(4) of the Act to take possession of the secured assets(s) including but not limited to transfer the same by way of sale or by invoking any other remedy available under the Act and the Rules thereunder and realize payment. The Secured Creditor is also empowered to **ATTACH AND / OR SEAL** the secured asset(s) before enforcing the right to sale or transfer. Subsequent to the Sale of the secured asset(s), the Secured Creditor also has a right to initiate separate legal proceedings to recover the balance dues, in case the value of the mortgaged properties is insufficient to cover the dues payable to the Secured Creditor. This remedy is in addition and independent of all the other remedies available to the Secured Creditor under any other law.

The attention of the borrower(s) is invited to Section 13(8) of the Act, in respect of time available, to redeem the secured assets and further to Section 13(13) of the Act, whereby the borrower(s) are restrained / prohibited from disposing of or dealing with the secured asset(s) or transferring by way of sale, lease or otherwise (other than in the ordinary course of business) any of the secured asset(s), without prior written consent of the Secured Creditor and non-compliance with the above is an offence punishable under Section 29 of the said Act. The copy of the Demand Notice is available with the undersigned and the borrower(s) may, if they so desire, can collect the same from the undersigned on any working day during normal office hours.

NOTICE UNDER SECTION 13(2) OF CHAPTER II OF SECURITISATION & RECONSTRUCTION OF FINANCIAL ASSETS AND ENFORCEMENT OF SECURITY INTEREST ACT 2002, READ WITH RULE 3(1) OF THE SECURITY INTEREST (ENFORCEMENT) RULES, 2002 AMENDED AS ON DATE

We, the PNB Housing Finance Limited (hereinafter referred to as "PNBHFL") has issued Demand Notice U/s 13(2) of Chapter II of the Securitization & Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002. The said Demand Notice was issued through our Authorized Officer to all below mentioned Borrowers/Co-Borrower/Guarantors since your account has been classified as Non-Performing (NPA) Assets as per the Reserve Bank of India National Housing Bank guidelines due to non-payment of instalments/interest. The contents of the same are the details committed by you in the payment of instalments of principals, interest, etc. Further, with reasons, we believe that you are evading the service of Demand Notice hence we are doing this Publication of Demand Notice which is also required U/s 13(2) of the said Act. You are hereby called upon to pay PNBHFL within a period of 60 days of the date of publication of this demand notice the aforesaid amount along with up-to-date interest and charges, failing which PNBHFL will take necessary action/measures under all or any of the provisions of Section 13(4) of the said Act, against all or any one or more of the secured assets including taking possession of the secured assets of the borrowers and guarantors. Your kind attention is invited to provisions of sub-Section (8) of Section 13 of the of the Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002, where under you can tender/pay the entire amount of outstanding dues together with all costs, charges and expenses incurred by the PNBHFL only till the date of publication of the notice for sale of the secured assets by public auction, by affixing quotations, tender from public or by private treaty. FURTHER, you are prohibited U/s 13(13) of the said Act from transferring either by way of sale, lease or in any other way the aforesaid secured assets.

GRACE PERIOD FOR EMPLOYMENT

US weighs ending 60-day job window for foreign lay-offs

Indians, with max H-1B visas, to be impacted most

PRESS TRUST OF INDIA
Washington, August 8

THE UNITED STATES is reviewing a proposal to eliminate the 60-day window for foreign workers holding non-immigrant visas to find employment after a job loss, a move that may force them to leave the country immediately.

A proposal from the Department of Homeland Security is currently under review at the federal Office of Management and Budget (OMB), according to its website. If finalised, the proposed regulation would eliminate the 60-day grace period accorded to certain principal non-immigrants and their dependents if the principal's employment ceases before their period of stay expires.

Further details of the proposal are not immediately

Trump's attack on 'birth tourism' faces uphill battle

Trump tried again, signing two executive orders largely aimed at birth tourism. That part of Trump's action, which is certain to face legal challenges, is likely doomed, experts said.

Reuters

WHEN THE US Supreme Court in June ruled in favour of broad citizenship rights for babies born in the US, one of the most conservative justices complained that the decision was so sweeping it would even cover so-called birth tourists. Women "who come here solely for the purpose of giving birth" would be able to get automatic citizenship for their children, Samuel Alito wrote, dissenting from the 6-3 ruling that invalidated President Donald Trump's first attempt to curtail US birthright citizenship.

Undeterred by the ruling,

known. The 60-day grace period was introduced in 2017 to allow foreign workers and their dependents to stay in the US while searching for new employment after a

job loss. Immigration consultants said the Department of Homeland Security has the discretion to shorten or refuse the grace period, but has rarely done so.

The rule applies to E-1, E-2, E-3, H-1B, H-1B1, L-1, O-1 and TN categories of non-immigrant visa holders and their dependents.

The grace period also allows US employers to more easily facilitate employment changes for existing or newly recruited non-immigrant workers. If the 60-day grace period is eliminated, foreign nationals whose employment ceases prematurely and their dependents would generally be required to depart the US immediately.

They would be unable to change status or employers within the United States unless US Citizenship and Immigration Services exercises its discretion to forgive the lapse in status.

The Indian-American population in the US is estimated at 5.2 million. Indian nationals are among the largest beneficiaries of H-1B employment visas, comprising 71% of all successful applicants in the 2024 fiscal year.

OpenAI flags security risk in upcoming model

REUTERS
August 8

OPENAI SAID IT cannot rule out that its upcoming AI model, Astra, has "critical" cybersecurity capabilities, prompting the startup to pause some internal development and trigger safety protocols. Under OpenAI's safety guidelines, a model reaches the "critical" threshold if it can autonomously identify and exploit severe, real-world software vulnerabilities, known as zero-day exploits, or execute complex cyberattacks against highly secure targets without human intervention.

This follows an exclusive report by Reuters that OpenAI has discovered more instances in which autonomous agents have escaped containment as the company expands its investigation of the hacking incident at tech firm Hugging Face that drew global attention in July.

In the last few weeks, OpenAI, Anthropic and Meta Platforms have disclosed that their AI models broke into other companies' systems during cybersecurity testing, highlighting how advancing AI capabilities are straining developers' ability to

TESTING ASTRA

■ Preliminary tests suggest Astra can perform increasingly sophisticated cyber tasks autonomously

■ Astra will now be tested in isolated environments with restricted network access and sandboxed execution

■ Astra was not involved in the Hugging Face hack and will work with govt agencies & select AI safety organisations

keep their systems contained. Preliminary evaluations over the past several days, along with outside expert assessments, indicated Astra may be capable of performing increasingly sophisticated cyber tasks autonomously, OpenAI said.

"While we continue to benchmark and assess this model, our preliminary evaluations indicate strong enough performance that we cannot rule out 'critical' capability level at this time," the ChatGPT maker said. In response to the preliminary findings, OpenAI said it has scaled up security controls and paused internal activities

involving Astra that do not meet its newly strengthened security requirements. Astra's development will be moved into isolated testing environments with restricted network access and sandboxed execution. CEO Sam Altman said on OpenAI is working to make Astra generally available, as the company does "not think it is a good strategy to keep powerful models to a chosen few." OpenAI also clarified that Astra was not involved in the hack targeting the AI platform Hugging Face. It will partner with government agencies and AI safety organisations to test the model's capabilities.

Canada's PSP is said to mull \$1.5-bn sale of roads in India

BLOOMBERG
August 8

THE PUBLIC SECTOR Pension Investment Board is exploring options for its roads in India, including a sale, according to people familiar with the matter.

The Canadian pension fund known as PSP Investments is working with an adviser on the potential divestment, the people said, asking not to be identified because the considerations are private.

It may seek a valuation of \$1.5 billion for the roads, including debt, the people said. The assets under review are part of the fund's global road investment platform Roadis, which was created in 2016.

ROAD SHEDDING

■ Assets are part of Roadis, PSP's global roads platform, which also has projects in Brazil, Mexico, Spain & the United States

■ The Indian assets have been a significant contributor to the company's growth

Beyond India, it also has roads in Brazil, Mexico, Spain and the US. The Indian assets have been a significant contributor to the company's growth, as per its 2025 report.

Other investment firms and industry players have shown

preliminary interest, but considerations are at an early stage and no final decisions have been made.

PSP Investments had net assets under management of C\$320.6 billion (\$230 billion) as of the end of March.

Trump touts \$3-billion minerals push

BLOOMBERG
August 8

PRESIDENT DONALD TRUMP touted \$3 billion in US investments in critical minerals mining on Friday with top industry executives aimed at weaning the US off supply chains dominated by China.

Trump said the projects would "create thousands of jobs and promote our economic stability and security," at an event at the State Department. "We're putting our miners back to work, and we're reclaiming America's rightful place as the minerals superpower of the world," he added. Trump said the investments included a \$1.4-billion loan agreement with Sila

Nanotechnologies from the Defense Department's Office of Strategic Capital to expand production of silicon battery anodes and lithium-ion battery cells. Other investments include \$400 million to Sunrise Energy Metals by the Pentagon to expand production in Australia of scandium, which is critical to aerospace and defense industries, and \$150 million with Niron Magnetics, a Minnesota magnet-making firm. The Export-Import Bank is also working to provide more than \$1 billion in financing for Ivanhoe Electric's Santa Cruz copper project as part of a previously announced agreement, along with a \$25 million investment to launch a graphite mine in

CHINA COUNTER

■ Over \$1 billion is being lined up for the Santa Cruz copper project in Arizona

■ The administration is also backing a \$25 million graphite mine in Alabama

■ US efforts extend overseas, with funding for a rare-earth mine in Madagascar, Africa

Alabama. Trump said his efforts would ensure the US "is never again reliant on hostile foreign nations for the resources our country needs to dominate in

the future."

The event showcased administration efforts to spur US critical minerals development and processing before a planned visit by Chinese President Xi Jinping to Washington in September. Trump said that under his administration domestic mines were reopening at a fast pace, including what he said was the first American rare-earth mine in more than 70 years and the construction of the first new aluminum smelter since 1980.

Despite a trade truce that eased export controls over critical minerals and magnets, rare earths remain a source of tension between the two largest economies.

Berkshire's operating profit in Q2 rises 16%

REUTERS
New York, August 8

BERKSHIRE HATHAWAY ON Saturday reported a higher quarterly operating profit, benefiting from higher earnings in manufacturing, service and retail operations, while net income was bolstered by double-digit gains in common stock investments such as Apple and Alphabet.

Second-quarter operating profit rose 16% to \$12.98 billion from \$11.16 billion a year earlier. Net income more than doubled to \$25.67 billion from \$12.37 billion.

Berkshire also repurchased \$4.5 billion of its own stock in the second quarter, accelerating repurchases it had begun in March following a nearly two-year hiatus.

SpaceX nears IPO price again after \$327-bn rally

BLOOMBERG
August 8

SPACE X SHARES JUMPED for a second straight day bringing them close to breaking back above the company's \$135 initial public offering price for the first time since falling below the key level last month.

Friday's 16% surge brought the stock's two-day rally to about 23%, adding more than \$327 billion in market value over that span.

Investors snapped up shares of the Elon Musk-led rocket, space and artificial intelligence company even as restrictions blocking some early insiders from selling were lifted on Thursday. Analysts had warned that the end of the first lockup could lead to selling pressure on the stock.
