Risk to Investors

For details, refer to section titled *"Risk Factors"* on page 28 of the Red Herring Prospectus dated October 19, 2026, read with Addendum.

1. **Risk in relation to dependency on technology:** Our revenues and operations are dependent upon technology. Failure of these technologies, failure to upgrade or innovate these technologies or failure to identify and develop new technologies could have an adverse impact on our results of operations. Our products may be displaced by newer technology and any inability or failure to adapt to technological developments, the evolving competitive landscape or industry trends could harm our business and competitiveness and consequently, could have an adverse impact on our results of operations.
2. **Risk of Sector concentration and dependency on Government projects:** We derive a substantial portion of our revenues from the WWT and SWT segments which together accounted for 88.22%, 84.98%, 84.34% and 87.40% of our consolidated revenue from operations in the three months period ended June 30, 2026, Fiscals 2026, 2025 and 2024, respectively. We are significantly dependent on projects, contracts or works awarded or funded by government entities, either directly or through our private customers. Our revenue from operations directly or indirectly attributable to government entities or government tenders represented 91.97%, 92.35%, 92.40% and 95.72% of our consolidated revenue from the WWT segment for the three months period ended June 30, 2026, Fiscals 2026, 2025 and 2024, respectively and 100.00% in the three months period ended June 30, 2026 and 100.00% of our consolidated revenue from SWT segment for each of the Fiscals 2026, 2025 and 2024. Any reduction or termination in such projects or adverse change in government policies could adversely affect our business, results of operations and financial condition.
3. **Customer concentration risk:** We derive a significant part of our revenue from our top 10 customers, and we do not have long term contracts with most of these customers. If one or more of such customers choose not to source their requirements from us or to terminate our long-term contracts, our business, results of operations and financial condition may be adversely affected. The following table sets out our revenue from our top 10 customers for the three months ended June 30, 2026, and for Fiscal 2026, Fiscal 2025 and Fiscal 2024 and percentage of revenue from operations for the respective periods:

Particulars	Three months ended June 30, 2026		Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Revenue (in ₹ millions)	% of revenue from operations	Revenue (in ₹ millions)	% of revenue from operations	Revenue (in ₹ millions)	% of revenue from operations	Revenue (in ₹ millions)	% of revenue from operations
Top 10 customers	1,060.87	79.20%	5,178.44	64.44%	4,282.85	61.37%	3,891.10	59.18%

4. **Risk in relation to trade Sanctions:** We may be subject to trade restrictions, including economic sanctions and export controls, imposed by government(s) around the world or international organisations with jurisdiction over our operations, which prohibit or restrict transactions involving certain designated persons and certain designated countries or territories. Any failure to comply with trade restrictions such as economic sanctions and export controls or with anti-bribery and anti-corruption frameworks instituted by government authorities or international organizations, such as multilateral development banks, may restrict our ability to participate in projects, and could negatively impact our reputation and results of operations.
5. **Negative cash flows from operating activities:** We have experienced negative cash flows from operations in the recent past. Our consolidated cash flows for the three months period ended June 30, 2026 and June 30, 2025 and for the Fiscals 2026, 2025 and 2024 are set forth in the table below:

(in ₹ million)

Particulars	Three months ended		Financial Year		
	June 30, 2026	June 30, 2025	2026	2025	2024
Net cash generated / (used in) from operating activities	(213.42)	320.70	(258.02)	655.09	(116.94)
Net cash generated/ (used in) investing activities	(4.93)	(180.44)	(664.73)	708.27	(771.52)
Net cash generated/ (used in) from financing activities	13.96	(200.48)	924.68	(1,065.25)	721.37
Net increase / (decrease) in cash and cash equivalents	(204.39)	(60.21)	1.93	298.12	(167.08)

6. **Risk in relation to business growth and expansion:** Our business has grown, including our revenue from operations that has grown at a CAGR of 10.56% from ₹6,574.95 million in Fiscal 2024 to ₹8,036.29 million in Fiscal 2026, and we may fail to manage our growth effectively. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. Our inability to manage our business and implement our growth strategy could have a material adverse effect on our business, financial condition and profitability.
7. **Risk in relation to corporate records and filings:** Certain of our corporate records and filings are not traceable or have certain discrepancies. We cannot assure you that regulatory proceedings or actions will not be initiated against us in the future and we will not be subject to any penalty imposed by the competent regulatory authority in this regard.
8. **Risk in relation to outstanding litigations:** Our Company, Promoters, Directors, Subsidiaries and Key Managerial Personnel are currently involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals or other governmental authorities. Further, our Subsidiaries, SFC Umwelttechnik GmbH, Hindustan Waste Treatment Private Limited and Vasudha Waste Treatment Private Limited have been, and continue to be, involved in material legal proceedings or have received show cause notices from statutory or regulatory authorities. Any adverse outcome in such proceedings may render us liable to liabilities/ penalties and may adversely affect our business, results of operations, financial condition and cash flows. For further details, please see *"Outstanding Litigation and Other Material Developments"* on page 553 of the RHP.
9. **Risks in relation to recall of unsecured loans:** Our Subsidiaries, Hindustan Waste Treatment Private Limited, Vasudha Waste Treatment Private Limited, Fine Aeration Systems Private Limited, Pentagen Biofuels Private Limited, Sustainyx Smart Solution Private Limited (formerly Navitas Waste Treatment Private Limited) and SFC Umwelttechnik GmbH have availed unsecured loans from our Company, aggregating to ₹1,724.87 million as on June 30, 2026 that are repayable on demand by our Company. Any such unexpected demand for repayment may have a material adverse effect on our business, cash flows and financial condition.
10. **High working capital requirement:** We have high working capital requirements, and may require additional financing to meet those requirements, which could have a material adverse effect on our results of operations, cash flows and financial condition. The working capital as a percentage of total revenue from operations was 561.06%, 65.19%, 63.51% and 39.94% for the three months period ended June 30, 2026 and Fiscals 2026, 2025 and 2024, respectively. Also, we have experienced an increase in our cash conversion cycle and may experience longer cash conversion cycles in the future. The table below provides our working capital details (on standalone basis):

Particulars	As of June 30, 2026#	As of March 31,		
		2026	2025	2024
Inventory (in ₹ million)	949.11	777.98	637.21	568.34
Trade Receivables (in ₹ million)	3,119.43	4,312.34	3,404.60	2,812.78
Trade Payables (in ₹ million)	447.78	1,128.78	660.81	973.39
Inventory days(1)(4)	239	106	106	78
Trade receivable days(2)(4)*	443	282	262	197
Trade payable days(3)(4)	113	153	109	134
Cash conversion cycle (in days)(4)	569	235	259	141

(1) Inventory days is calculated as inventory at the period end multiplied by 365 divided by Cost of Goods sold during the period.
(2) Trade receivables days is derived as trade receivables at the period end multiplied by 365 divided by revenue from operations.
(3) Trade payable days is derived as trade payable at the period end multiplied by 365 divided by Cost of Goods sold during the period.
(4) Three months period ended is annualised and calculated as 365/4.
** For trade receivables outstanding for more than six months, the Company undertakes periodic follow-ups, reconciliations, and internal escalations as part of its standard receivables management process.*
The higher number of days for the three-month period is primarily attributable to the seasonality and cyclicality of our business and the lower first-quarter revenue base, and may not be indicative of the underlying annual cash conversion cycle.

11. **Industry related risk:** The SWT industry is capital-intensive in nature. Our business model involves undertaking SWT projects which may require significant upfront capital expenditure, and which may lead to us relying on bank financing or project-based lending. Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows and our capacity to service debt in a rising interest rate environment.
12. **Risk in relation to materialisation of contingent liability:** We have certain contingent liabilities which, if materialized, may adversely affect our financial condition. As of June 30, 2026, our contingent liabilities amounted to ₹0.21 million.
13. **Risks in relation raw materials:** We depend on a few suppliers for the supply of majority of our raw materials and we do not have continuing and exclusive supply agreements with all of them. Any interruptions in the supply of raw materials, fluctuations in raw material prices or any failure by our suppliers to make timely delivery of raw materials could adversely affect our business, results of operations and financial conditions. The table below provides details in relation to our top one, top five and top 10 suppliers:

Supplier Concentration	Three months period ended June 30, 2026		Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Purchase of stock in trade and raw material (in ₹ million)	% of stock in trade and raw material	Purchase of stock in trade and raw material (in ₹ million)	% of stock in trade and raw material	Purchase of stock in trade and raw material (in ₹ million)	% of stock in trade and raw material	Purchase of stock in trade and raw material (in ₹ million)	% of stock in trade and raw material
Top 1	138.58	20.41%	602.49	17.18%	312.81	10.34%	544.30	15.83%
Top 5	271.85	40.04%	1,434.37	40.89%	961.40	31.79%	1,667.77	48.52%
Top 10	369.86	54.48%	1,952.61	55.66%	1,442.76	47.71%	2,189.94	63.71%

14. **Health and Environmental Risk:** The assets we operate, and the handling and treatment of waste expose us to safety, operational and other risks, including the risk of personal injury to our employees or third parties. Failure to limit our exposure to such risks may subject us to significant disruptions in our business, legal and regulatory actions, costs, and liabilities and could have an adverse impact on our results of operations.
15. **Our Company will not receive any proceeds from the Offer for Sale portion of the Offer by our Selling Shareholders:** The Offer comprises of Fresh Issue and Offer for Sale. The Selling Shareholders shall be entitled to proceeds from the Offer for Sale.
16. The Price/ Earnings ratio based on diluted EPS for Fiscal 2026 for our Company at the upper end of the price band is as high as 19.98 as compared to the average industry peer group Price/ Earnings ratio of 101.38.
17. Lowest weighted average cost of acquisition of Equity Shares for the Selling Shareholders in the Offer is ₹36.72 and Offer Price at the upper end of the price band is ₹330.
18. The weighted average Return on Net Worth for our Company on a consolidated basis for Fiscal 2026, 2025 and 2024 is 23.82% and for three months period ended June 30, 2026 is 0.19% (not annualized).
19. The table below provides details of our EPS, NAV, price/ earnings, return on equity, return of capital employed, enterprise value/ operating EBITDA and market capitalization to revenue from operations for the Fiscal 2026 are as hereunder:

Name of Company	EPS (₹)		NAV (₹ per share)	P/E	RoE (%)	RoCE (%)	Enterprise Value/operating EBITDA	Market Capitalization to Revenue from operations
	Basic	Diluted						
SFC Environmental Technologies Limited	16.52	16.52	86.09	19.98x*	21.55	22.21	13.87x*	4.02x*
Listed Peers								
Thermax Limited	63.95	63.94	492.55	52.01x	13.70	15.00	39.75x	3.71x
Praj Industries Limited	1.30	1.30	71.22	220.77x	1.77	5.59	34.75x	1.67x
Ion Exchange (India) Limited	12.03	12.03	91.30	31.34x	11.20	14.30	26.11x	1.90x

** At the upper end of the Price Band*

Notes:
(i) All the financial information for listed industry peers mentioned above is on a consolidated basis (unless otherwise available only on standalone basis) and is sourced from the annual reports as available of the respective company for the relevant year ended March 31, 2026.
(ii) Net asset value per share = Net worth (excluding Non-Controlling Interest) / weighted average number of equity shares outstanding at the end of the year adjusted for the subdivision of the equity shares and issue of bonus shares, if any, in accordance with principles of Ind AS 33.
(iii) P/E Ratio has been computed based on the closing market price of equity shares on BSE on October 16, 2026, divided by the Diluted EPS for the Fiscal 2026.
(iv) ROE is calculated as total profit after tax for the period / year divided by average total equity.
(v) ROCE is calculated as a percentage of earnings before interest and taxes(EBIT) / total equity plus total borrowings plus deferred tax liabilities minus deferred tax assets as per the restated / audited consolidated financial information. EBIT is calculated as profit before tax and share of profit of joint ventures / associate plus finance costs.
(vi) Enterprise Value / Operating EBITDA has been computed as the Enterprise Value divided by the Operating EBITDA for the Fiscal 2026. Enterprise Value has been calculated as the market capitalization, computed based on the closing market price of equity shares on BSE on October 16, 2026, adjusted for net debt as of March 31, 2026.
(vii) Market Capitalization to Revenue from Operations has been computed as the market capitalization, computed based on the closing market price of equity shares on BSE on October 16, 2026, divided by the Revenue from Operations for the Fiscal 2026.

...continued from previous page.

20. The weighted average cost of acquisition ("**WACA**") of all Equity Shares transacted in last one year and three years immediately preceding the date of the Addendum are as hereunder:

Period	WACA per Equity Share (in ₹)^	Cap price (₹330) is 'X' times the WACA	Range of acquisition price per Equity Share: lowest price –highest price (in ₹)^
Last one year preceding the date of the Addendum	308.78	1.07	Nil - 343.00
Last three years preceding the date of the Addendum	37.82#	8.73	Nil# – 555.00#

^ As certified by M/s H H Dedhia & Associates, Chartered Accountants by way of their certificate dated October 23, 2026.

#Pursuant to a resolution of our Board passed in their meeting held on August 14, 2024 and a resolution of our Shareholders passed in their annual general meeting held on September 5, 2024, each fully paid-up equity share of our Company of face value ₹10 was subdivided into 5 Equity Shares of ₹2 each. The impact of the subdivision has been considered in the calculation weighted average cost of acquisition per Equity Share and range of acquisition price.

Note: The above has been computed based on the Equity Shares acquired/allotted/purchased (including acquisition pursuant to transfer and gifts) involving promoters / promoter group / selling shareholders / shareholders with special rights and other public shareholders (to the extent information available to our Company).

21. Weighted average cost of acquisition at which Equity Shares were acquired by our Promoters and the Selling Shareholders as on the date of the Addendum and in the one year preceding the date of the Addendum:

S. No.	Name	Number of Equity Shares held as on the date of the Addendum	WACA per Equity Share (in ₹)	Number of Equity Shares acquired in the last one year preceding the date of the last one year	WACA per Equity Share (in ₹) in the Addendum*
	Promoters				
1.	Sandeep Sudhakar Asolkar	13,500,000	0.44	Nil	Nil
2.	Sandeep Sudhakar Asolkar (held jointly with Priya Sandeep Asolkar)#	17,388,498	36.72	Nil	Nil
3.	Saketchandrasingh Pratapsingh Dhandoriya#	8,434,125	36.72	Nil	Nil
	Selling Shareholders (other than the Promoter Selling Shareholders)				
1.	Sarvesh Kumar Garg	5,527,215	36.72	Nil	Nil

** In case of (i) any delay in unblocking of amounts in the ASBA Accounts (including amounts blocked through the UPI Mechanism) exceeding two Working Days from the Bid / Offer Closing Date for cancelled / withdrawn / deleted ASBA Forms, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the Bid Amount, whichever is higher from the date on which the request for cancellation / withdrawal / deletion is placed in the Stock Exchanges bidding platform until the date on which the amounts are unblocked (ii) any blocking of multiple amounts for the same ASBA Form (for amounts blocked through the UPI Mechanism), the Bidder shall be compensated at a uniform rate ₹100 per day or 15% per annum of the total cumulative blocked amount except the original application amount, whichever is higher from the date on which such multiple amounts were blocked till the date of actual unblock; (iii) any blocking of amounts more than the Bid Amount, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the difference in amount, whichever is higher from the date on which such excess amounts were blocked till the date of actual unblock; (iv) any delay in unblocking of non-allotted / partially allotted Bids, exceeding two Working Days from the Bid / Offer Closing Date, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the Bid Amount, whichever is higher for the entire duration of delay exceeding two Working Days from the Bid / Offer Closing Date by the SCSB responsible for causing such delay in unblocking. The BRLMs shall, in their sole discretion, identify and fix the liability on such intermediary or entity responsible for such delay in unblocking. The Bidder shall be compensated in the manner specified in the SEBI ICDR Master Circular in relation to the SEBI ICDR Regulations which for the avoidance of doubt, shall be deemed to be incorporated in the agreements entered into between our Company with the relevant intermediaries, to the extent applicable.*

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with the SEBI ICDR Master Circular and SEBI RTA Master Circular, each to the extent applicable and any subsequent circulars or notifications issued by SEBI in this regard.

ASBA* | Simple, Safe, Smart way of Application!!!

*Applications Supported by Blocked Amount ("**ASBA**") is a better way of applying to offers by simply blocking the fund in the bank account. For further details, check section on ASBA.

Mandatory in public issues. No cheque will be accepted.

UPI-Now available in ASBA for Retail Individual Investors and Non Institutional Investor applying in public issues where the application amount is up to ₹ 500,000, applying through Registered Brokers, Syndicate, CDPs & RTAs. Retail Individual Investors and Non-Institutional Investors also have the option to submit the application directly to the ASBA Bank (SCSBs) or to use the facility of linked online trading, demat and bank account. Investors are required to ensure that the bank account used for bidding is linked to their PAN. Bidders must ensure that their PAN is linked with Aadhaar and are in compliance with CBDT notification dated February 13, 2020 and press release dated June 25, 2021 read with press release dated September 17, 2021, CBDT Circular No. 3 of 2023 dated March 28, 2023, and any subsequent press release in this regard.

*ASBA has to be availed by all the investors except Anchor Investors. UPI may be availed by (i) Retail Individual Bidders in the Retail Portion; (ii) Individual investors with an application size of up to ₹ 500,000 in the Non-Institutional Portion. For details on the ASBA and UPI process, please refer to the details given in the Bid Cum Application Form and Abridged Prospectus and also please refer to the section "Offer Procedure" on page 594 of the RHP. The process is also available on the website of Association of Investment Bankers of India ("**AIBI**") and Stock Exchanges and in the General Information Document. The Bid Cum Application Form and the Abridged Prospectus can be downloaded from the websites of the Stock Exchanges and can be obtained from the list of banks that is displayed on the website of SEBI at www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=35 and https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes &intmId=43, respectively as updated from time to time. For the list of UPI apps and banks live on IPO, please refer to the link: www.sebi.gov.in. UPI Bidders Bidding using the UPI Mechanism may apply through the SCSBs and mobile applications whose names appear on the website of SEBI, as updated from time to time. Axis Bank Limited and ICICI Bank Limited have been appointed as the Sponsor Banks for the Offer, in accordance with the requirements of SEBI circular dated November 1, 2018 as amended. For Offer related queries, please contact the BRLMs on their respective email IDs as mentioned below. For UPI related queries, investors can contact NPCI at the toll free number: 18001201740 and mail Id: ipo.upi@npci.org.in.*

THE EQUITY SHARES OF OUR COMPANY WILL GET LISTED ON THE MAIN BOARD PLATFORMS OF THE STOCK EXCHANGES.

In case of any revision in the Price Band, the Bid / Offer Period will be extended by at least three additional Working Days after such revision in the Price Band, subject to the Bid / Offer Period not exceeding 10 Working Days. In cases of force majeure, banking strike or similar unforeseen circumstances, our Company may, in consultation with the BRLMs, for reasons to be recorded in writing, extend the Bid / Offer Period for a minimum of one Working Day, subject to the Bid / Offer Period not exceeding 10 Working Days. Any revision in the Price Band and the revised Bid / Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges, by issuing a public notice and also by indicating the change on the respective websites of the BRLMs and at the terminals of the Syndicate Members and by intimation to Self-Certified Syndicate Banks ("**SCSBs**"), Designated Intermediaries and the Sponsor Bank(s), as applicable.

This Offer is being made through the Book Building Process, in terms of Rule 19(2)(b) of the SCRR read with Regulation 31 of the SEBI ICDR Regulations and in compliance with Regulation 6(1) of the SEBI ICDR Regulations wherein not more than 50% of the Offer shall be available for allocation on a proportionate basis to Qualified Institutional Buyers ("**QIBs**" and such portion, the "**QIB Portion**"), provided that our Company, in consultation with the BRLMs, may allocate up to 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations ("**Anchor Investor Portion**"). 40% of the Anchor Investor Portion shall be reserved as under: (i) 33.33% for the domestic Mutual Funds; and (ii) 6.67% for Life Insurance Companies and Pension Funds, subject to valid Bids being received from the domestic Mutual Funds, Life Insurance Companies and Pension Funds at or above the price at which allocation will be made to Anchor Investors ("**Anchor Investor Allocation Price**") in accordance with the SEBI ICDR Regulations. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the QIB Portion (other than the Anchor Investor Portion) (the "**Net QIB Portion**"). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIB Bidders, including Mutual Funds, subject to valid Bids being received at or above the Offer Price. However, if the aggregate demand from the Mutual Funds is less than 5% of the Net QIB Portion, the balance Equity Shares available for allocation will be added to the remaining QIB Portion for proportionate allocation to QIBs. Further, not less than 15% of the Offer shall be available for allocation to Non-Institutional Bidders (out of which one-third of the portion available to Non-Institutional Bidders shall be reserved for Bidders with an application size of more than ₹0.20 million and up to ₹1.00 million, and two-third shall be reserved for Bidders with application size of more than ₹1.00 million, provided that the unsubscribed portion in either of the aforementioned sub-categories may be allocated to Bidders in the other sub-category) and not less than 35% of the Offer shall be available for allocation to Retail Individual Bidders in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. All Bidders, other than Anchor Investors, are required to participate in the Offer by mandatorily utilising the Application Supported by Blocked Amount ("**ASBA**") process by providing details of their respective ASBA Account (as defined hereinafter) and UPI ID in case of UPI Bidders (as defined hereinafter), as applicable, pursuant to which their corresponding Bid Amounts will be blocked by the Self Certified Syndicate Banks ("**SCSBs**") or by the Sponsor Bank(s) under the UPI Mechanism, as the case may be, to the extent of respective Bid Amounts. Anchor Investors are not permitted to participate in the Offer through the ASBA process. For further details, see *"Offer Procedure"* on page 594 of the RHP.

Bidders/Applicants should ensure that DP ID, PAN and the Client ID and UPI ID (for UPI Bidders bidding through UPI Mechanism) are correctly filled in the Bid cum Application Form. The DP ID, PAN, UPI ID and Client ID provided in the Bid cum Application Form should match with the DP ID, PAN, Client ID and UPI ID available (for UPI Bidders bidding through the UPI Mechanism) in the Depository database, otherwise, the Bid cum Application Form is liable to be rejected. Bidders/ Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPI ID (for UPI Bidders bidding through the UPI mechanism) as provided in the Bid cum Application Form, the Bidder/Applicant may be deemed to have authorized the Depositories to provide to the Registrar to the Offer, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These Demographic Details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders/Applicants' sole risk.

Investors must ensure that their PAN is linked with Aadhaar and are in compliance with the notification issued by Central Board of Direct Taxes notification dated February 13, 2020 and read with press releases dated June 25, 2021, September 17, 2021 and March 28, 2023 and any subsequent press releases in this regard.

Contents of the Memorandum of Association of our Company as regards its objects: For information on the main objects of our Company, please see "*History and Certain Corporate Matters - Main objects of our Company*" on page 342 of the RHP. The Memorandum of Association of our Company is a material document for inspection in relation to the Offer. For further details, see "*Material Contracts and Documents for Inspection*" on page 637 of the RHP.

Liability of the members of our Company: Limited by shares.

Amount of Share Capital of our Company and Capital Structure: As on the date of the RHP, the authorised share capital of our Company is ₹250,000,000 divided into 125,000,000 Equity Shares of face value of ₹2 each. The issued, subscribed and paid-up Equity share capital of our Company is ₹186,822,540 divided into 93,411,270 Equity Shares of face value of ₹2 each. For details of the capital structure of our Company, see "*Capital Structure*" beginning on page 127 of the RHP.

Names of the Initial Signatories to the Memorandum of Association of our Company and the number of Equity Shares subscribed by them: The initial signatories of the Memorandum of Association of the Company are as follows: Enviropro Water Tech Private Limited, Sandeep Sudhakar Asolkar, Aparna Vivek Kapoor, SFC Umwelttechnik GmbH and Gunnar Demoulin who subscribed to 450,000 Equity Shares of face value of ₹10 each. For details of the share capital history of our Company please see "*Capital Structure*" beginning on page 127 of the RHP.

Listing: The Equity Shares offered through the RHP are proposed to be listed on the Stock Exchanges. Our Company has received 'in-principle' approvals from BSE and NSE for the listing of the Equity Shares pursuant to letters dated November 6, 2025 and November 7, 2025, respectively. For the purposes of the Offer, NSE is the Designated Stock Exchange. A copy of the RHP has been filed with the RoC and a copy of the Prospectus shall be filed with the RoC in accordance with Sections 26(4) and 32 of the Companies Act, 2013. For details of the material contracts and documents available for inspection from the date of the RHP until the Bid / Offer Closing Date, see *"Material Contracts and Documents for Inspection"* on page 637 of the RHP.

Disclaimer Clause of Securities and Exchange Board of India ("SEBI"): SEBI only gives its observations on the draft offer documents and this does not constitute approval of either the Offer or the specified securities stated in the Offer Documents. The investors are advised to refer to page 568 of the RHP for the full text of the disclaimer clause of SEBI.

Disclaimer Clause of BSE: It is to be distinctly understood that the permission given by BSE should not in any way be deemed or construed that the RHP has been cleared or approved by BSE nor does it certify the correctness or completeness of any of the contents of the RHP. The investors are advised to refer to the page 571 of the RHP for the full text of the disclaimer clause of BSE.

Disclaimer Clause of NSE (the Designated Stock Exchange): It is to be distinctly understood that the permission given by NSE should not in any way be deemed or construed that the Offer Document has been cleared or approved by NSE nor does it certify the correctness or completeness of any of the contents of the Offer Document. The investors are advised to refer to page 571 of the RHP for the full text of the disclaimer clause of NSE.

General Risks: Investments in equity and equity-related securities involve a degree of risk and investors should not invest any funds in the Offer unless they can afford to take the risk of losing their entire investment. Investors are advised to read the risk factors carefully before taking an investment decision in the Offer. For taking an investment decision, investors must rely on their own examination of our Company and the Offer, including the risks involved. The Equity Shares in the Offer have not been recommended or approved by SEBI, nor does SEBI guarantee the accuracy or adequacy of the contents of the RHP. Specific attention of the investors is invited to *"Risk Factors"* on page 28 of the RHP.

Place: Navi Mumbai, Thane, Maharashtra
Date: October 27, 2026

SFC ENVIRONMENTAL TECHNOLOGIES LIMITED is proposing, subject to receipt of requisite approvals, market conditions and other considerations, to make an initial public offer of its Equity Shares and has filed a RHP dated October 19, 2026 with the RoC and thereafter with SEBI and the Stock Exchanges. The RHP along with Addendum is made available on the website of the SEBI at www.sebi.gov.in as well as on the website of the BRLMs i.e., IIFL Capital Services Limited *(formerly known as IIFL Securities Limited)* at www.iiflcapital.com; JM Financial Limited at www.jmfl.com and Nuvama Wealth Management Limited at www.nuvama.com, the website of the BSE at www.bseindia.com and the website of the NSE at www.nseindia.com and the website of the Company at www.sfcenvironment.com. Any potential investor should note that investment in equity shares involves a high degree of risk and for details relating to such risks, please see the section *"Risk Factors"* beginning on page 28 of the RHP. Potential investors should not rely on the DRHP for making any investment decision and must rely on their own examination of our Company and the Offer.

The Equity Shares offered in the Offer have not been and will not be registered under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**"), or any state securities laws in the United States, and unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and in accordance with any applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold outside of the United States in 'offshore transactions' as defined in and in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where such offers and sales are made.

New data privacy law will 'shut down news rooms'

New Delhi: The Digital News Publishers Association (DNPA), a group of 21 publishers from across the media spectrum, told the Supreme Court that the Centre's new privacy law will "shut down newsrooms and usher in an era of censorship". The DNPA urged a Bench, headed by Chief Justice of India Surya Kant, to issue notice to the Union government on their plea for a stay of the Digital Personal Data Protection Act, 2023, and the Digital Personal Data Protection Rules, 2025.
The Supreme Court issued notice to the Centre and listed the case for detailed hearing on November 17. **p9**

HIGH ORDER BOOK

L&T profit grows 33% to ₹5,202 crore in Q2

Mumbai: Larsen & Toubro reported its highest-ever quarterly order inflow of ₹1.47 lakh crore as it delivered a 33 per cent year-on-year growth in net profit to ₹5,202 crore in Q2 FY27. In the same period last year, the company had posted a net profit of ₹3,926 crore. **p2**

India's crude basket price tops $120/bbl on W. Asia war

FUELLING THE RISE. Exacerbated by high marine insurance, freight rates and a weak Re

Rishi Ranjan Kala
New Delhi

The average crude oil import basket price rose by almost 4 per cent month-on-month (m-o-m) in October to surpass the $120 per barrel mark as the conflict in West Asia exacerbated geopolitical uncertainty and pushed up marine insurance premiums and freight rates.

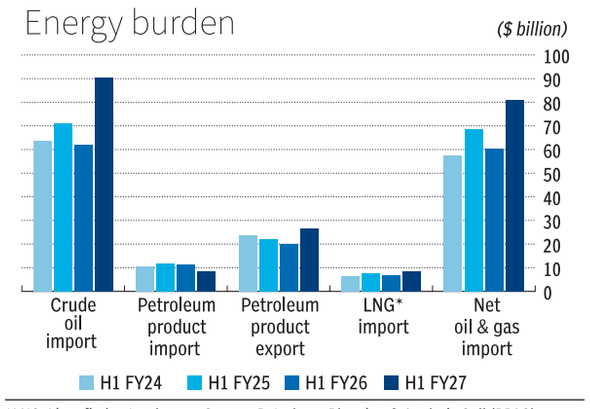

The average crude oil price for Indian basket stood at $120.46 per barrel till October 26 up from $116.77 in September and $90.19 in August.

The October average price is the highest in 14 years since March 2012 ($123.61 per barrel).

On October 26, the price of Indian crude basket stood at $123.72 a barrel.

Meanwhile, global crude oil prices are also on the higher side, rising by roughly 80 per cent in 2026. On Tuesday evening, Brent was ruling at $114.6 a barrel. The WTI and Murban grades were at $100.9 a barrel and $117.7, respectively.

Energy burden *($ billion)*

*LNG: Liquefied natural gas Source: Petroleum Planning & Analysis Cell (PPAC)

UNDER-RECOVERY RISES
Besides, the under-recovery on LPG for the three PSU OMCs are around ₹62,000 crore. The Q2 FY27 results of HPCL and BPCL reflect the pressure on marketing margins, partially offset by high refinery margins. Indian Oil is scheduled to present its results on Friday.

Analysts and refiners pointed out that record high shipping freight rates and marine insurance premiums were adding more volatility to high crude oil prices. A weak rupee is further inflating the bill, besides pushing up the current account deficit (CAD).

India's net oil and gas import bill rose by 35 per cent y-o-y to $81.1 billion during April-September FY27.

Jateen Trivedi, VP and Research Analyst for Commodity and Currency at LKP Securities, said rupee traded with minor gains of around 9 paise at 95.08/dollar (Tuesday), finding support near the 95 level despite crude oil prices hovering around $115 and the the Dollar Index near 101.50.

PRESSURE ON RUPEE
"Elevated crude prices continue to pose a challenge for the domestic currency, while market participants remain cautious ahead of the US Federal Reserve's policy outcome tomorrow night. Going ahead, the rupee is likely to remain sensitive to crude oil movements and global dollar trends, with the 95 level acting as an important support zone," Trivedi anticipated.

As per ICRA, a $10 per barrel uptick in the average crude oil price for the fiscal pushes up the net oil import bill by $12-13 billion during the year, thereby enlarging the CAD by 0.3 per cent of the GDP. India's CAD rose to $11.2 billion during April-July FY27 against $6.6 billion a year ago.

Equirus Securities, in a commentary on HPCL's Q2 results, recently noted that crude oil sourcing remained highly volatile, and almost all cargoes are now bought on a 'delivered basis' versus about half earlier.

Top court questions govt over drug price mark-up 'dacoity'

Aaratrika Bhaumik
New Delhi

Economic policy cannot take precedence over the lives of citizens, said the Supreme Court on Tuesday as it questioned the Centre over its approach to regulating prices of essential medicines and medical products.

A Bench of Justices Vikram Nath and Sandeep Mehta questioned Additional Solicitor-General Aishwarya Bhati, appearing for the Centre, over the failure of the National Pharmaceutical Pricing Authority (NPPA) to cap trade margins on essential medicines despite concerns over excessive mark-ups. It also sought to know why such a ceiling had been imposed on certain anti-cancer drugs only after the court's intervention.

Earlier this month, the NPPA capped trade margins on 137 non-scheduled anti-cancer medicines at 30 per cent of their MRP. The new prices take effect from November 9. "Is this a matter in which economic policy will weigh supreme over the lives of citizens at large? NPPA [was] conspicuously silent... For so many years, why were you silent? Suddenly, you decided to cap trade margins of cancer drugs? Don't force us to ask harsh questions," the Bench remarked.

CALIBRATED CONTROL
The oral observations came during the hearing of petitions filed by advocate Kishan Chand Jain and paediatric surgeon Sanjay Kulshrestha seeking stricter enforcement of the Drugs (Prices Control) Order, 2013, to curb disproportionate margins across the pharmaceutical supply chain. Bhati, however, told the Bench that "complete government control" over essential medicines could adversely affect the market. She said the government favoured a "calibrated approach", striking a balance between ensuring essential medicines are available at reasonable prices and the need to encourage innovation and competition in the pharmaceutical industry.

The Bench questioned why the 16 per cent retailer margin prescribed under the DPCO should not apply to all essential medicines and sought the basis for classifying drugs as scheduled or non-scheduled. "Why should all medicines not be essential? That is where the game is — which medicine to keep [in the scheduled list] and which not to. The NPPA seems to be defunct, with due respect," Justice Mehta remarked.

The Bench also referred to *The Hindu's* October 22 report on substantial dues pending recovery by the NPPA from pharmaceutical companies in overcharging cases. The report noted that, as of March 31, 2026, the regulator had recovered only ₹1,582.4 crore of the ₹10,029.8 crore demanded.

Senior advocate Mukul Rohatgi, appearing for an association of hospitals, defended the steep mark-ups on essential medicines, contending that capping margins would make hospital operations financially unviable. He submitted that hospitals incurred substantial expenditure on salaries, doctors, technology and infection control, and would have to recover any loss in revenue by charging for services that were previously not billed separately. The Bench, however, dismissed the contention, remarking that patients cannot be subjected to "dacoity". It reserved its order in the matter and gave the parties two weeks to file their written submissions.

Maruti Q2 net dips 26% as expenses soar on global conflicts & adverse forex movement

S Ronendra Singh
New Delhi

Hit by global geopolitical tensions that led to higher input costs, Maruti Suzuki India on Tuesday reported a 26.36 per cent decline in its consolidated net profit for the second quarter ended September 30 to ₹2,466.1 crore compared with ₹3,349 crore in the same period last year.

Total expenses during the quarter shot up to ₹50,619 crore against ₹39,018.4 crore in the year-ago period, the company said, adding that the cost of materials consumed in Q2 rose to ₹37,488.5 crore from ₹25,324.2 crore in the corresponding period last fiscal.

The operating profit (EBIT) in the quarter stood at ₹2,803.7 crore against ₹3,382 crore in Q2 FY26 owing to the adverse commodity prices in the context of the West Asia conflict, the company said.

Maruti said margins were also impacted due to the adverse foreign exchange movements and lower non-operating income due to mark-to-market losses on invested surplus.

Q2 performance *(in ₹ cr)*

	Q2FY26	Q2FY27	% change
Net profit	3,349	2,466	-26.6
Revenue from operations	42,344.20	53,355,5	26
Volume sales (units)	5,50,874	6,96,654	26.4

REVENUE UP 26%
However, the consolidated revenue from operations grew 26 per cent to ₹53,355.5 crore in the quarter under review against ₹42,344.2 crore in Q2 FY26.

Speaking to mediapersons on a post-earnings call, Chairman RC Bhargava said that despite the macroeconomic factors, the company expected better results in the coming quarters. "The future looks quite rosy. We've had a bad monsoon, in the sense that El Nino has been highly active; it's going to continue for a few more months. Despite all of that, sales are at record levels. So, I must say that the future became very different for the car industry, once again after GST reforms," he said.

Not only domestic sales, Maruti has become, by far, the leader in terms of export of cars, he said, adding that last year, Maruti exported 4.4 lakh cars and this year, it expects to exceed the number despite the war. In terms of volume sales, Maruti sold 6,96,654 units during the Q2 this year, growing by 26.5 per cent compared with 5,50,874 units in the corresponding period last year.

Bhargava added that the company sold around four lakh small cars in the first half of this year, which recognises that India actually does have a small car market.

Shares of Maruti Suzuki closed at ₹11,454.85 apiece on the BSE on Tuesday, up 2.28 per cent from the previous close.

BRACING FOR LANDFALL

ARNAB'S FURY. Waves crash on a Visakhapatnam beach on Tuesday as Cyclone Arnab approaches the Andhra Pradesh coast. Andhra Pradesh and Odisha have set up nearly 4,000 cyclone shelters, moved thousands of people to safer locations and put disaster management personnel on standby ahead of the "very severe" cyclonic storm Arnab, which is expected to make landfall near Visakhapatnam in the next 24 hours, officials said **(Also read page 10)** KR DEEPAK

Grease hunters of Bengaluru want cooking oil to fuel jets

Leftover oil is attracting the attention of state-owned oil majors as an alternative feedstock

Bloomberg

In a grubby restaurant basement in Bengaluru, two men crouch over a sticky plastic tub of something a kitchen no longer wants and the oil industry increasingly does.

The men are grease hunters: Collectors who spend their days traversing the city's clogged roads and narrow back alleys on motorised rickshaws, going from kitchen to kitchen to gather gallons of used cooking oil.

Already powering some buses and trucks, India's push to fuel more vehicles and aircraft with home-grown ingredients is bringing bigger buyers into an inefficient and fragmented supply chain. Together, Indian Oil Corp, HPCL and BPCL want tens of thousands of tonnes of used food oil. Delivering it means assembling industrial quantities from thousands of scattered eateries, one tub at a time.

"The market is way, way bigger than all of us can provide for," said Mannan Khan, CEO of M11 Energy Transition, one of about a dozen licensed aggregators of the waste material in India.

GREEN DRIVE. An M11 employee uses an app to collect details of used cooking oil at a restaurant in Bengaluru BLOOMBERG

In 2022, his company had one person collecting used food oil in jerry cans. This year, he has 300 collectors in 24 cities, gathering 1,000 tonnes a month.

WAR IMPACT
Behind those purchases is a vulnerability that India has found increasingly hard to ignore. The country imports about 90 per cent of its crude and has spent a record $125 billion on imports so far this year, raising concerns about its foreign exchange reserves. Then came the war between the US and Iran, which disrupted shipments through the Strait of Hormuz and sent oil prices surging, sharpening the case for finding more fuel at home.

"Hormuz triggered the alarm," said Sanjay Sah, Deloitte South Asia's Lead for Energy and Resources, adding that the government has had to move fast to reduce imports.

Used cooking oil offers the cheapest route to a fuel that meets global emissions standards, but making sure it really is used can be a challenge. Waste oil can sometimes be worth more than fresh oil, creating room for fraud. Another difficulty is getting hold of it. India is the world's biggest consumer of edible oils and produces about 3 million tonnes of used oil a year but with no centralised collection system, it sits in restaurant basements, hotel kitchens and food factories, waiting for someone to come and take it away.

Only about 5 per cent of used cooking oil (UCO) is collected, according to SAF Association. An estimated 60 per cent finds its way back into the food chain to be used again, a practice that is both illegal and bad for people eating it.

EXPORT POTENTIAL
M11's Khan, who sells biodiesel mostly to customers in Europe and the US, expects India to become an increasingly important buyer. He plans to double his depots to 50 by this year-end and add households, food manufacturers and industrial kitchens to his collection routes.

He's not the only one gearing up for more demand. Münzer Bioindustrie GmbH, an Austrian biodiesel producer, began exporting used cooking oil from India a decade ago and found a haphazard market fraught with challenges. It now sees the market maturing, and has received proposals from refiners to co-produce biofuels.

State majors HPCL and BPCL sought a combined 83,000 tonnes of used cooking oil in tenders that close this month, adding to a smaller UCO tender from Indian Oil earlier in the year, according to documents posted by the government.

Venu Srinivasan, family members file caveats; wife, daughter reiterate amicable settlement

Sindhu Hariharan
Chennai

In a new development to the dispute in the Venu Srinivasan family, members have filed caveats against one another in a bid to ensure that all of them get an opportunity to be heard if the dispute takes a legal turn.

As per *businessline*'s review of caveat filings in Chennai, Venu Srinivasan and VS Trust (represented by Trustee Venu Srinivasan) filed two caveats on Lakshmi Venu, on October 12, in two different civil courts. Similarly, Sudarshan Venu filed caveats on Lakshmi in the same courts. Mallika Srinivasan is named as an additional respondent (extra party caveatee) in both caveats.

Subsequently, Lakshmi Venu filed caveats against Venu Srinivasan on the same date and also listed Sudarshan, TVS Holdings and TVS Motor as extra parties. Similarly, caveats were also filed by Mallika Srinivasan against Venu Srinivasan, Sudarshan Venu and VS Trust.

Sources in the know add that Mallika-Lakshmi continue to push for discussion and internal settlement on the dispute

Legal experts noted that under the Code of Civil Procedure (CPC), caveats are a pre-emptive measure by the filer, wherein if they assume that a specific party could take a legal step against them, they tell the court that it can't pass an order without hearing them.

Venu Srinivasan did not respond to *businessline*'s queries on the matter.

DIALOGUE APPROACH
In a statement, Mallika Srinivasan and her daughter Lakshmi Venu reiterated their original position to resolve the family's dispute over the division of business interests amicably through dialogue.

Sources in the know added that the duo continue to push for discussion and internal settlement on the dispute, and there is no indication of any suit filed.

The developments relate to a dispute in the family wherein Lakshmi Venu is pushing for a formal settlement of business interests. The proposal, however, has reportedly hit an impasse, with Venu Srinivasan and his son Sudarshan Venu maintaining that a family settlement was already reached through a 2024 MoU.

TaMo expects EV supply constraints to ease soon

New Delhi: The demand for EVs has been stronger than expected in recent months and supply constraints impacting deliveries are expected to ease in the next two to three months as suppliers ramp up capacity, said Tata Motors PV's Shailesh Chandra. EV penetration in India's PV market was around 8 per cent in September. PTI

Waaree Energies explores entry into data centre biz

Ahmedabad: Waaree Energies Ltd is exploring an entry into the data centre business even as it reported a 15 per cent year-on-year decline in consolidated net profit to ₹719 crore for the September quarter of FY27. The company's board on Tuesday approved the acquisition of 100 per cent shareholding in Waaree Green Data Centers Pvt Ltd and its two subsidiaries. Revenue from operations rose 24 per cent to ₹7,518 crore, supported largely by a 22 per cent increase in revenue from the company's solar photovoltaic business. OUR BUREAU

JSW Infra Q2 net down 12%, revenue rises 17%

Mumbai: JSW Infrastructure reported a 12 per cent decline in its September quarter net profit (attributable to owners) to ₹318 crore while the revenue was up 17 per cent to ₹1,481 crore. EBITDA was up 11 per cent at ₹674 crore. The company recorded net cash of ₹1,693 crore and gross debt of ₹7,292 crore. OUR BUREAU

TVS Credit Q2 PAT grows 19% on higher disbursements

Our Bureau
Chennai

TVS Credit Services Limited, part of the TVS Venu Group, on Tuesday reported robust net profit growth for the September quarter on increased disbursements.

As per a statement by TVS Credit, the NBFC clocked a net profit of ₹243 crore in Q2, a growth of 19 per cent compared to the same period last year. The company's disbursements grew 31 per cent and it reported a total income of ₹2,029 crore for the quarter, up 14 per cent y-o-y. Assets under management (AUM) grew 22 per cent and stood at ₹33,818 crore as of September 30, 2026.

For H1 FY27), total income came in at ₹3,948 crore, up 14 per cent, while net profit rose 17 per cent to ₹452 crore.

"The two-wheeler category witnessed healthy demand in semi-urban and rural markets and growing adoption of EVs. The consumer durables and three-wheeler categories witnessed strong demand, supported by increased financing penetration and festival led purchases," said the company. In Q2, TVS Credit also disbursed loans to over 14 lakh new customers, bringing its total customer base to over 2.7 crore.

L&T sees record order intake, profit grows 33% to ₹5,202 cr

STRONG SHOWING. Top line up 16%; company looking to maintain its order-win run rate

Our Bureau
Mumbai

Stellar quarter *(in ₹ cr)*

	Q2FY26	Q2FY27	% change
Revenue	67,984	78,750	16
Reported PAT	3,926	5,202	33
EBITDA	6,806	6,845	1
EBITDA margin (%)	10	8.7	-130 bps

Larsen & Toubro reported its highest-ever quarterly order inflow of ₹1.47 lakh crore as it delivered a 33 per cent year-on-year (y-o-y) growth in net profit to ₹5,202 crore in Q2 FY27. In the same period last year, the company had posted a net profit of ₹3,926 crore.

'FOCUSED EXECUTION'

The growth in bottom line was led by a 16 per cent growth in operating revenue to ₹78,750 crore. Lower finance costs, treasury income and efficiency in working capital also contributed to gains. EBITDA remained largely flat at ₹6,845 crore.

"The company has delivered a strong quarter in an ever-changing geopolitical landscape. This performance reflects continued customer confidence and our ability to secure large and complex orders across sectors and geographies. We achieved yet another record quarterly order inflow. Focused execution across our projects, products and manufacturing businesses supported a higher revenue growth," L&T's Chairman and Managing Director SN Subrahmanyan said in a statement.

Order intake grew 28 per cent y-o-y to ₹1.47 lakh crore with over half of the new contracts coming from hydrocarbon and offshore energy business. Nearly 75 of these energy orders came from international market.

STAYING OPTIMISTIC

There are project opportunities worth ₹10 lakh crore in domestic and international markets, said R Shankar Raman, President and Whole-Time Director (Finance), and L&T remains optimistic about maintaining the order-win run rate in the second half as well. The only sector seeing challenges in execution is water supply as projects worth ₹40,000 crore are facing funding delays from States, he added.

The company remains confident of protecting its revenue and margins though there may be a lag due to ongoing tensions in West Asia and the increase in freight and raw material costs.

SAUDI TENSION

Subramanian Sarma, the company's Deputy MD, said ongoing tensions in Saudi Arabia have not not impacted any of its project sites and all its employees are safe. But if the crisis continues, he said, it could lead to deferral of some revenue.

"We will have to wait and see," he said.

Export surge, EV sales help Bajaj Auto post 62% profit rise

Amit Vijay Mohile
Mumbai

Blockbuster Q2 *(in ₹ cr)*

	Q2FY26	Q2FY27	% change
Consolidated turnover	15,734.74	25,125.56	59.7
Consolidated net profit	2,122.03	3,436.1	61.9
Standalone EBITDA	3,052	4,172	36.7
Sales volume (in units)	12,94,120	15,48,884	19.7
Export volume (in units)	5,53,327	7,78,528	40.7

Bajaj Auto's consolidated net profit attributable to shareholders rose 61.9 per cent to ₹3,436.10 crore from ₹2,122.03 crore in July-September 2026, while revenue from operations increased 59.7 per cent to ₹25,125.56 crore from ₹15,734.74 crore, driven by surging exports, electric vehicles, and premium motorcycles.

The consolidation of overseas KTM operations also contributed to reported growth, with quarterly revenue crossing ₹20,000 crore for the first time. Standalone profit increased 35.2 per cent to ₹3,353.76 crore, while revenue climbed 34.1 per cent to ₹20,003.43 crore.

EV SALES

Standalone EBITDA increased 36.7 per cent to ₹4,172 crore, with margins improving to 20.9 per cent from 20.5 per cent, despite higher commodity and electronic component costs. Management said electric vehicles had moved from being margin-dilutive to margin-accretive, with Chetak scooters and electric three-wheelers now contributing positively to profitability.

"Higher EV sales are now adding to profitability rather than diluting margins," said Rakesh Sharma, Joint MD, during a post-results media interaction.

EXPORTS GROWTH

Total vehicle sales increased 19.7 per cent to 15.48 lakh units, while exports surged 40.7 per cent to 7.78 lakh units. Africa nearly doubled export billing, while Latin America registered record sales. Domestic volumes grew just 4 per cent. EV volumes more than doubled to roughly 2 lakh. EVs now account for one-third of its domestic revenue.

"We have chosen profitability over growth," Sharma said, explaining that price increases ahead of competitors had affected demand in the 100cc segment.

Aligned with SIAM to delay BS-VII rules: Maruti Suzuki MD

S Ronendra Singh
New Delhi

Hisashi Takeuchi, MD and CEO, Maruti Suzuki India

Maruti Suzuki India on Tuesday said it is aligned with the industry's representation to the government to delay the rollout of Bharat Stage-VII (BS-VII) norms, so it can discuss in detail with the government the impact of the new norms on the car market in the future.

STRIKING A BALANCE

"BS-VII is now being discussed among SIAM (the Society of Indian Automobile Manufacturers) members, and we will consult with the government as an industry body... There will be an impact on pricing once BS-VII comes. But the details are being discussed... first we have to discuss with the government the roadmap which is sustainable and good for the industry," said Hisashi Takeuchi, MD and CEO.

Speaking at a post-earnings call, he said sales are going pretty well and the industry must maintain that momentum. "Of course, we have to take care of our environment, so we have to have a good balance of those. So, we are discussing as an industry body with the government, and I think the results will come out pretty soon," Takeuchi said.

According to reports, SIAM recently wrote to the Ministry of Road Transport and Highways (MoRTH) to request the introduction of brake and tyre requirements from April 2035, instead of April 2031, after receiving feedback from tyre and brake suppliers.

The MoRTH released the draft BS-VII rules dated October 12, proposing tyre-abrasion requirements and brake-particle emission limits for passenger cars from April 2031. According to the Ministry, the norms would be implemented in three phases over six years, from April 2029 to April 2035.

Meanwhile, on the current market scenario, Takeuchi said the company is maintaining sales momentum, although last year's base is very high after the GST reforms in September 2025. "But still, we are maintaining sales over and above last year's numbers. So, we are pretty positive about the near future."

Despite supply issues, Cipla hopeful of making $1 billion in US annually

Our Bureau
Mumbai

Achin Gupta, Managing Director & Global CEO, Cipla

Despite regulatory issues, drugmaker Cipla expects to clock annual revenues of $1 billion in the US by the year end, said Achin Gupta, MD and Global CEO, on the back of the company's existing pipeline. The company's financial performance for Q2 had been impacted by the geopolitical situations, along with pressure in the US, he added.

Cipla's net profit for the three months ended September stood at ₹878 crore, down 35 per cent, and its revenue at ₹7,404 crore was down from ₹7,589 crore in the same period last year.

HOPEFUL OF US

The company's dip in its quarterly performance was impacted by lanreotide supply challenges in the US, among other things, besides the geopolitical situation, Gupta told *businessline*. The US business posted revenue of $172 million during the quarter. He maintained the company's projection to clock $1 billion in the US by the end of the year, on the back of products in the respiratory segment, besides a peptide.

While the company was working with Pharmathen International, the manufacturer of lanreotide, to remedy its issues with the US Food and Drug Administration, Gupta said it had also located a second source to mitigate the impact. On the geopolitical impact, the company's quarterly performance had been impacted by 100-200 bps, by a combination of factors including supplies to West Asia being hit, increase in freight costs and increase in the cost of input materials, he said in an interaction with the media.

TRADE MARGIN CAP

On the trade margin caps that the Centre has brought in on certain cancer drugs, under the watch of the Supreme Court, Gupta said, Cipla will follow the guidance given to the industry, and keep medicines affordable.

Giving an overview of the quarterly performance, he said, Cipla's One-India business recorded its highest quarterly sales at ₹3,516 crore with a growth of 12 per cent over the same period last year.

Raymond's Q2 profit doubles on better realisation

Our Bureau
Mumbai

Raymond's September quarter net profit (attributable to owners) doubled to ₹22 crore on better realisation.

Revenue rose 24 per cent to ₹655 crore. Overall expenses were up at ₹641 crore (₹544 crore). EBITDA climbed 30 per cent to ₹103 crore in Q2. Revenue from precision technology and auto components were higher at ₹471 crore (₹409 crore) and aerospace and defence contributed ₹139 crore (₹81 crore). Others accounted for ₹46 crore (₹38 crore) of the overall revenue.

"We are consistently converting our robust order book into sustainable, high-margin value for our shareholders," said Gautam Hari Singhania, CMD.

Meanwhile, Raymond Realty reported a decline in net profit to ₹53 crore (₹60 crore).

Tata Consumer flags inflation risks for industry

Aishwarya Kumar
Bengaluru

Sunil D'Souza, MD and CEO, Tata Consumer Products

Tata Consumer Products MD and CEO Sunil D'Souza flagged rising food inflation and crude oil prices as risks to consumption, even as the company expects tea volumes to recover and its growth businesses to sustain 30 per cent growth over the long term.

LONG-TERM GROWTH

Speaking to *businessline* in a post-results interaction, D'Souza said consumer price inflation was above 5 per cent, while food inflation was approaching 6 per cent, raising concerns about the outlook for consumption. "Oil is now over $111 a barrel. At this range, it is still not something which would keep us awake, but if it starts moving beyond this, downstream inflation can continue to put pressure on margins and therefore prices and total consumption. That's the only worry around the country." The company's growth portfolio, comprising Tata Sampann, Capital Foods, Organic India and ready-to-drink beverages, grew 40 per cent in Q2.

D'Souza said the company remained confident it could sustain long-term growth of around 30 per cent, aided by the shift from unbranded to branded products and the expansion of e-commerce and quick commerce. Margin expansion will remain a priority as the businesses scaled up, he added.

TEA VOLUMES

Tea volumes, meanwhile, were affected by an extended heatwave, the El Nino effect and deficient monsoons, which reduced consumption and affected crop output, pushing up prices.

With prices now stable and the winter season approaching, the company expects tea volumes to recover, particularly in northern India.

Tata Starbucks reported same-store sales growth of 16.4 per cent in Q2, driven by a 10 per cent increase in customer traffic and a 5 per cent growth in average transaction value. The company plans to open 40-50 Starbucks stores this fiscal year, with expansion expected to accelerate over the next 9-12 months.

High cost, low sales pull ACC net down

Our Bureau
Mumbai

Steep fall

	Q2 FY26	Q2 FY27
Revenue (₹ cr)	5,969	5,666
Net profit attributable to shareholders (₹ cr)	1,119	93
EPS (diluted) (₹)	59.45	4.94

ACC, an Adani Group company, reported a 92 per cent fall in its September quarter net profit to ₹93 crore from the ₹1,119 crore it reported in the year-ago period, on higher costs and lower sales.

The year-ago profit included an income-tax provision reversal of ₹659 crore, said the company.

Revenue from operations was down 5 per cent to ₹5,666 crore. Overall expenses rose to ₹ 5,602 crore (₹5,457 crore), and EBITDA more than halved to ₹401 crore. The share of green power usage rose to 34 per cent y-o-y, up from 30 per cent last year. Sales volume was down to 9.7 mt (10 mt) due to the master supply agreement (MSA) with its parent, Ambuja Cements. Realisation per tonne was down at ₹414 (₹849).

'GOOD MOMENTUM'

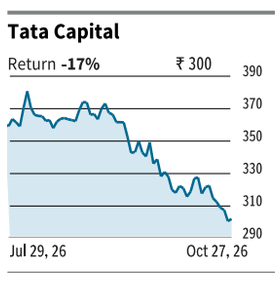

Vinod Bahety, Whole-Time Director and CEO, said the reported numbers were not directly comparable because of the impact of the MSA, and that underlying business momentum remains encouraging, supported by trade partners. Growth remains trade-led, in line with the strategy, he said, adding that the company continues to strengthen the institutional business.

Industry demand remains supportive and is expected to strengthen post-monsoon, aided by housing, infrastructure, and capital expenditure, he added.

Meanwhile, ABB has signed a multi-year ABB Motion OneCare service agreement with ACC to improve the operational reliability of its Jamul cement plant in Chhattisgarh.

Tata Capital's Q2 profit jumps 51% to ₹1,660 crore

Our Bureau
Mumbai

Tata Capital Ltd reported a 51 per cent (y-o-y) jump in Q2 consolidated net profit to ₹1,660 crore, supported by a healthy increase in net interest income and a decline in loan loss provisions.

Net interest income was up 23 per cent to ₹3,696 crore. Fee income rose 9 per cent to ₹725 crore. Loan loss provisions declined 16.6 per cent to ₹645 crore.

Consolidated loan book increased 26 per cent to ₹3.08 lakh crore as at September-end. The proportion of retail loans (excluding motor finance) and motor finance declined to 49 per cent (from 50.4 per cent) and 7.7 per cent (11.6 per cent) in the loan book, respectively. However, the proportion of SME and corporate loans increased to 28.7 per cent (26.3 per cent) and 14.6 per cent (11.7 per cent), respectively. Rajiv Sabharwal, MD and CEO, said: "We remain focused on pursuing growth in a disciplined manner."

Coca-Cola sees healthy volumes in India

Meenakshi Verma Ambwani
New Delhi

POP, FIZZ. Each of its top 10 brands is growing in double digits BLOOMBERG

Beverage major Coca-Cola said its India business delivered strong volume growth in Q3 CY2026 as it has sharply focused on both affordability and premiumisation.

The company, which released its global earnings on Tuesday, simultaneously reiterated that it is exploring a potential public listing of Hindustan Coca-Cola Holdings, the parent of Hindustan Coca-Cola Beverages, but did not comment on timelines.

ALL-ROUND GROWTH

Speaking on the earnings call, Henrique Braun, Global CEO of The Coca-Cola Company, said, "India delivered strong volume growth, with each of our top 10 brands growing in double digits. We are expanding our consumer base by scaling both affordability and premiumisation, strengthening execution, and leaning into emerging channels."

"For example, we expanded our Sprite & Spicy platform into the QSR channel in India with meal combo activations, social media content, and influencer collaborations, which contributed to Sprite's volume growth of nearly 20 per cent in the region," Braun added.

On the earnings call, John Murphy, President and CFO, said, "As previously announced, we are exploring a potential IPO of our bottling operations in India and will provide further updates as appropriate."

The company, in June, said preparations are underway for a potential listing on the BSE and the NSE.

The company said its unit volume grew 5 per cent in Q3, led by India, China, Mexico and Brazil.

JSW Cement net down a tad, plans ₹1,078 cr capex

Our Bureau
Mumbai

JSW Cement's September quarter net profit (attributable to owners) was down marginally at ₹85 crore against ₹86 crore logged in the same period last year. Revenue increased to ₹1,912 crore (₹1,436 crore).

Overall expenses were up to ₹1,849 crore (₹1,349 crore), as power and freight costs increased to ₹383 crore (₹226 crore) and ₹428 crore (₹328 crore), respectively.

Raw material cost was also up at ₹447 crore (₹319 crore). The company plans to put up 2 mtpa grinding units at Vijayanagar and Dolvi with a cumulative investment of ₹1,078 crore.

CAPACITY
The company's current production capacity stands at 25.1 mtpa with 64 per cent utilisation

The addition will take the overall capacity at Vijayanagar to 8 mtpa and to 6.5 mtpa at Dolvi. The fresh capacity at Vijayanagar and Dolvi will be commissioned by May and October 2028.

It also provided corporate guarantees of ₹60 crore in favour of IndusInd Bank for credit facilities to its subsidiary, JSW Green Cement.

QUICKLY.

India-EU IPA under discussion: Goyal

Hague: Negotiations for an Investment Protection Agreement (IPA) between India and the European Union are underway, Commerce and Industry Minister Piyush Goyal said. He also said some legal changes were required for an agreement on geographical indications (GIs) with the EU, which the Ministry plans to introduce in Parliament. India and the 27-nation EU announced the conclusion of negotiations for a free trade agreement on January 27. Goyal said these pacts would come into force after the implementation of the FTA, which is likely to be signed in December and may come into force in March or April next. PTI

Coal India's capex for H1FY27 grows 27%

Kolkata: Coal India incurred capital expenditure of ₹7,966 crore during the first half of the current financial year, registering a growth of 27 per cent over ₹6,283 crore spent during the year-ago period. The expenditure also surpassed the H1FY27 target of ₹7,286 crore, achieving 109 per cent of the planned outlay for the period and over 48 per cent of the annual capex target of ₹16,500 crore, Coal India said in a stock exchange filing. Mine infrastructure development emerged as the largest area of investment during H1FY27, attracting ₹2,152 crore. OUR BUREAU

No pressure from US to reduce Russian crude imports: Puri

ALTERNATIVE SOURCES. Imports from the US and Algeria helping to offset W Asia LPG supply shocks, he says

Our Bureau
New Delhi

Oil Minister Hardeep Singh Puri said on Tuesday that there is no pressure from the US on India to reduce its crude oil imports from Russia.

"I never felt anything," Puri said responding to a media query at an industry event in Goa. Asked again later on US pressure, he emphasised, "Do you know your Prime Minister? Do you think his mind is wired to feel pressure? This is a government committed to the welfare of its people and energy supplies."

Puri also clarified that there is no immediate plan to increase ethanol blending on petrol from the current level of 20 per cent.

"Insofar as biofuels are concerned, yes, the 20 per cent (ethanol blending) was the target and there is no desire, just now, to increase by more than 20 per cent," he stressed.

ENGINE DAMAGE

Puri said that misinformation was being spread about the ethanol blended petrol (EBP) programme.

On questions regarding engine damage due to the E20 fuel, Puri said, "Six crore vehicles go to the dispensing stations every day. If engine damage was caused, you could have seen the vehicles all over the place."

> The 20 per cent (ethanol blending) was the target and there is no desire, just now, to increase by more than 20 per cent
>
> **HARDEEP SINGH PURI**
> Oil Minister

On lessons from the West Asia conflict, he said India's experience during the crisis demonstrated that while geopolitical disruptions cannot always be anticipated, their impact can be minimised through advance preparedness and coordinated action.

"A crisis is not something that you can anticipate. But without anticipating the nature of a crisis, or the specifics of the manner in which it unfolds, you can always start preparing yourself," he added.

LPG INCREASE

"Today, we are importing 67 per cent of our liquefied petroleum gas (LPG) from the US," he said.

Puri added that India is also sourcing the key cooking fuel from African countries, such as Algeria.

He noted that domestic LPG production rose from 34,000 tonnes per day (tpd) to 55,000 tpd with imports from the US and Algeria helping offset West Asia supply shocks.

India, Liechtenstein working to fast-track double taxation avoidance agreement

Amiti Sen
New Delhi

India and Liechtenstein are working to expedite a Double Taxation Avoidance Agreement (DTAA) that could strengthen investment flows into India, with the European country sharing a draft that will be examined by the Finance Ministry, a senior Ministry of External Affairs (MEA) official said.

Prime Minister Narendra Modi and Liechtenstein's Hereditary Prince Alois, the country's acting Head of State, who is on an official visit to India from October 25-28, discussed ways to deepen cooperation in trade and investment, science and technology, innovation and skill development. The talks focused on implementing the India-EFTA Trade and Economic Partnership Agreement (TEPA).

DEEPENING TIES. (from left) Liechtenstein Hereditary Princess Sophie and Liechtenstein Hereditary Prince Alois with Prime Minister Narendra Modi at a meeting in New Delhi ANI

"The visit provides an important opportunity to promote economic ties by greater G2G and B2B engagements. The visit assumes special significance as it is taking place during the commemoration of the first anniversary of operationalisation of India-EFTA TEPA," MEA Secretary (West) Sibi George said.

He added that Liechtenstein sees the proposed DTAA as an enabling framework offering greater predictability and legal certainty for its companies investing in India. TEPA envisages $100 billion in investment from EFTA countries over 15 years and the creation of one million jobs in India.

INVESTMENT AVENUES

"We have received a draft DTAA from Liechtenstein. We would be examining it. Experts will look at it to see how it will help us to have further economic engagement. Liechtenstein has expressed its interest in having this agreement with India as part of their efforts to enhance their investments and business with India," George said.

Liechtenstein's cumulative investment in India stands at $110 million, which officials see as leaving considerable room for growth. Bilateral trade totalled about $3.3 million in FY26, with India's exports less than $1 million. India exported electric heating resistors, organic compounds, parts of non-electric furnaces and ovens, and vacuum pumps. It imported precision instruments and machinery.

Liechtenstein's business delegation includes Hilti, Savannah Seeds and LGT. Hilti's new facility in Vadodara is an export-oriented unit expected to ship around 95 per cent of its production. Savannah Seeds' hybrid varieties and seed technologies could help improve agricultural productivity, as TEPA is implemented. LGT, a global wealth management group, has established an India subsidiary.

India, Mexico to formally begin negotiations for preferential trade pact

Our Bureau
New Delhi

India's merchandise exports to Mexico stood at $5.73 billion in 2025-26

India and Mexico are set to formally launch negotiations for a bilateral preferential trade agreement (PTA) this week, seeking to mitigate the impact of Mexico's higher import tariffs of up to 50 per cent imposed on more than 1,400 products affecting countries without trade agreements, including India, from January 1, 2026.

Commerce Secretary Rajesh Agrawal is in Mexico City for a two-day visit to sign the terms of reference (ToR), which will formally set the framework for the negotiations. The proposed agreement is expected to cover a limited range of goods and help Indian exporters secure preferential market access to Mexico.

"Arrived in Mexico City for a two-day visit to advance India–Mexico trade and economic ties. The visit will see the launch of PTA negotiations with the signing of the Terms of Reference (ToR), alongside engagements with the Mexican government and business community to deepen bilateral cooperation," Agrawal said in a post on X on Tuesday.

TARIFF INCREASE

Mexico's tariff increases cover products across 1,463 tariff classifications, with duties ranging from 5 per cent to 50 per cent.

The measures affect several key Indian export sectors, including automobiles and auto components, textiles and apparel, footwear, plastics, steel, chemicals, household appliances, aluminium, toys and engineering goods.

Passenger vehicle import duties, for instance, have risen to up to 50 per cent, posing a significant challenge for Indian automakers that use Mexico as an important export market. Engineering goods account for a substantial share of India's shipments to the country.

BILATERAL TRADE

India's merchandise exports to Mexico stood at $5.73 billion in 2025-26, with automobiles accounting for about $1.92 billion. Total bilateral merchandise trade was around $7.83 billion during the year.

The tariff increases are part of Mexico's efforts to strengthen domestic manufacturing, increase local content in production chains and protect employment.

The higher duties have prompted India to pursue a trade arrangement that could restore competitiveness for its exporters.

Unlike a comprehensive free trade agreement, a PTA provides tariff concessions on a selected list of products. It is, therefore, relatively easier to negotiate and secure.

CBIC sets GST registration timelines, introduces deemed approval clause

Shishir Sinha
New Delhi

The Central Board of Indirect Taxes and Customs (CBIC) has issued a detailed timeline to grant GST registration to applicants in the Aadhaar authentication required category, with a deemed-approval clause. It also prescribed unblocking ITC for demo vehicles and a mechanism to bring discipline to the initiation and adjudication of GST proceedings.

All these are part of eight circulars issued by the CBIC to implement major process and procedural reforms recommended during the 57th GST Council meeting.

One circular sets out registration guidelines for applicants. Currently, registration is granted within three working days, with no officer involved, for applicants assessed as low risk and for those whose output tax on supplies to registered persons will not exceed ₹2.5 lakh a month. About 61 per cent of registrations already come through this automated route. The remaining 39 per cent go to an officer. Of the 39 per cent, if the application is selected for biometric-based Aadhaar authentication, the applicant has 15 days to complete the process. If the officer needs clarification, the applicant has seven days to respond. Once done, the officer must process the application and decide (accept or reject) within seven days. "If no action is taken by the officer within the prescribed time limit, GST registration shall be deemed to have been approved," the circular said.

> **If the application is selected for biometric-based Aadhaar** authentication, the applicant has 15 days to complete the process

Adding to this, a senior government official told *businessline*, "In cases where Aadhaar is authenticated and the registration is not identified for physical verification, the registration is to be granted within seven days (or query to be raised within seven days)."

"The detailed guidance addresses several practical issues that have often resulted in ground-level queries and disputes, including co-working spaces, consent-based premises, ATMs and telecom towers, and State-specific information requirements," said Saurabh Agarwal, Tax Partner, EY India.

"Together with defined documentation requirements for different forms of businesses, this should help reduce differing interpretations and make the registration process more predictable for genuine taxpayers," he added.

CLARIFYING ISSUES

Another circular clarified issues related to demand, adjudication and appeal proceedings. According to Manoj Mishra, Partner at Grant Thornton Bharat, it seeks to address a recurring fault line in GST litigation, where taxpayers are often compelled to first challenge defects in the proceedings before contesting the underlying tax demand. "By emphasising on evidence-backed notices, year-wise delineation of demands in multi-year show cause notices, and separate grounds and quantification for fraudulent and non-fraudulent demands under Sections 73 and 74, the circular seeks to bring discipline to the initiation and adjudication of GST proceedings."

FinMin sets Nov 1 to implement simplified post-sale discount rules, 90% provisional refunds for IDS

Shishir Sinha
New Delhi

The Finance Ministry has set November 1 as the date for implementation of the Finance Act provisions related to post-supply discounts, provisional refunds under the inverted duty structure (IDS) and removal of the ₹1,000 minimum refund threshold for export of goods made with payment of tax.

The changes are being brought through amendments in the GST Act, prescribed in the Finance Act, 2026.

A key change is related to post-supply discounts. Earlier, exclusion of post-supply discounts from the value of taxable supply was subject to prescribed conditions, including the requirement that such discounts should have been established under an agreement entered at or before the time of supply, and specifically linked to the relevant invoices. These conditions frequently created practical difficulties for manufacturers, distributors, dealers, wholesalers and other businesses offering turnover-based incentives, performance-linked rebates, sales-target discounts and other post-sale commercial incentives.

Now, an amendment removed the requirement of establishing such discounts through an agreement entered at or before the time of supply.

Accordingly, post-supply discounts may now qualify for exclusion from the value of supply where the supplier issues a credit note and the recipient reverses the attributable input tax credit in accordance with Section 34 of the CGST Act, 2017.

> **AMENDMENT**
> Businesses can now issue GST credit notes for eligible post-sale discounts, subject to the recipient reversing the corresponding ITC

RELIEF TO INDUSTRIES

According to Rahul Shekhar, Partner - Indirect Tax, Nangia Global, businesses could now issue GST credit notes for eligible post-sale discounts, subject to the recipient reversing the corresponding ITC. The change will enable businesses to offer discounts to dealers to drive sales while also availing the benefits associated with credit notes.

"The amendment is expected to bring relief to industries such as FMCG, pharma, retail, consumer durables, where dealer incentives and volume-based discounts are common," he said.

With the amendment, eligible registered persons claiming refunds on account of IDS can benefit from provisional sanction of 90 per cent of the claimed refund amount, subject to applicable conditions, limitations, safeguards and risk-based verification, followed by final settlement of the claim after due scrutiny.

Invest Keralam

INVEST in KERALA KSIDC

Keralam builds a new investment architecture: SARAL Keralam, Invest Keralam Cell and global Kerala Desks

The Keralam government has created a three-part institutional framework to attract investment and speed up project implementation. It consists of a single statutory authority for enterprise clearances, a dedicated investor facilitation cell, and a network of overseas investment desks, all anchored by the Kerala State Industrial Development Corporation (KSIDC). Three government orders issued in September 2026 approved these measures. They follow the INVEST KERALAM initiative announced in the Revised Budget 2026-27 and the government's 100-day action plan.

> Single statutory authority to deliver enterprise clearances within 75 days; KSIDC to anchor investor support from first enquiry to operation

The main reform is SARAL Keralam (Simplified & Accelerated Regulatory Approvals and Licensing), which the government approved in principle on 18 September 2026. It introduces a 'One-State-One-Approval-One-Document' (OSAD) system for projects with capital investment above ₹25 crore. The government has observed that delays in statutory approvals are a major obstacle for investment projects. Such delays cause cost overruns and late-market entry, and sometimes push investors towards other States.

SARAL Keralam separates technical scrutiny from final decision-making. Technical examination stays with the departments that have the expertise, while a single licensing authority issues the final clearance. Projects above ₹50 crore are first appraised by a State-level referral-cum-appraisal committee, chaired by the secretary, Industries department. A State-level approval committee chaired by the Chief Secretary then decides on them. Projects between ₹25 crore and ₹50 crore are handled by a district-level approval committee chaired by the District Collector. Projects up to ₹25 crore remain under the existing mechanism.

The process has an upper limit of 75 days. Registration and forwarding to departments take up to 10 days, and departments then have up to 30 days for technical scrutiny. The appraisal body has 15 days to consolidate the reports, and the clearance authority decides within 20 days. At the end, the investor receives an Integrated Enterprise Clearance Certificate.

The framework also simplifies renewals and builds in accountability. Investors can renew all clearances through a single composite application on the portal. Amendments to service rules have been proposed so that officials can face disciplinary action for delay or inaction. A standalone law will be enacted to give the framework statutory backing.

The second measure is the Invest Keralam Cell, which the government sanctioned within KSIDC on 10 September 2026. The Cell will be a data-driven, AI-supported single-window system for land, clearances and post-investment support. The Cell will offer investors end-to-end hand-holding, time-bound facilitation, single-point coordination across departments, investor relationship management, and tracking of projects. It will also run a standard Project Implementation Protocol covering land access, clearances and post-investment support.

The third measure takes Keralam's investment outreach abroad. On 30 September 2026, the government gave in-principle sanction for Kerala Desks in Dubai, London, New York, Singapore and Tokyo. The initiative aims to move diaspora engagement from a remittance-based model to an investment-oriented one. The desks will build relationships with NRK associations and prospective investors, and refer pre-qualified investment leads to the Invest Keralam Cell.

Together, the three measures create one continuous route for investors. A Kerala Desk abroad identifies and pre-qualifies an investor. The Invest Keralam Cell then guides the investor through land approvals and post-investment support, and SARAL Keralam delivers the required clearances through a single, time-bound decision.

The government expects the reforms to improve the Ease of Doing Business, increase investor confidence and generate jobs. It also expects them to create more opportunities for Keralam's skilled youth, reduce employment-driven outward migration, and support balanced regional development.

El Nino woes

Fallout of poor monsoon calls for macro policy response

This year's South-West Monsoon, which brings 70 per cent of India's precipitation, has been among the worst in three decades. The season, thanks to a 'super strong' El Nino, ended with precipitation falling short of the long period average by 12.6 per cent, with 43 per cent of India's 740 meteorological districts receiving less than 20 per cent of the LPA; in peninsular India, this deficit was far higher — ranging from 17-32 per cent.

With the onset of rabi season and El Nino going strong, northern States could have a warmer, shorter and drier winter; southern States should be prepared for erratic weather. This does not augur well for kharif and rabi output, as the experience of 2002, 2009 and 2015 (all El Nino years) informs us. Paddy, soyabean, maize will be affected (rice output possibly by 10 million tonnes). A dry October implies that soil moisture and reservoir levels, both already low, could impact rabi crops. Nearly half of 316 major reservoirs are dry — across northern, southern and eastern States. Wheat sowing so far, at 11,000 hectares, stands at less than half the level in the year-ago period. Mustard, lentils (masur) and chana could face stress. In such conditions, yields could drop; this is expected with respect to the kharif crop, even as sowing caught up later to near-normal levels.

This situation gives rise to questions regarding economic impact and the steps that can be taken to alleviate income squeeze. There is a view that GDP growth has 'decoupled' from monsoon failures. A paper cited by the Reserve Bank of India in its latest Monetary Policy Report says that monsoon failure certainly hurts agriculture, but not necessarily the economy as a whole — this is because non-farm activity accounts for an equal or larger share of rural incomes. The data for FY10 and FY16 (El Nino years) may seem to bear this out, when GDP growth was in region of 8 per cent despite negligible farm sector growth. But it would be a bit risky to bet on the 'resilience' of non-farm activity alone, as the RBI seems to suggest, as there are other headwinds at work this time — such as the Iran and Ukraine wars. The Centre has done well to manage fertilizer supplies and prices, but in the process could run up a subsidy that is in excess of ₹2.5 lakh crore, against the budgeted ₹1.7 lakh crore. Nevertheless, both food and core inflation are ruling firm on global forces, the former even more so in rural India.

The higher share of food in the rural basket implies lower spending capacity. FMCG volumes reflect this trend, down 2 per cent year-on-year in Q2, with rural volumes down 5 per cent. Wholesale tractor sales in September are 18 per cent below last year's levels. It is important to address the demand constraint, including drought in southern States. The VB-G RAM G scheme assumes importance. Drought relief should not run into the usual red tape. Crop advisories and procurement should adapt to the situation. In sum, a pre-emptive response is imperative.

RAVIKANTH

When AI agents wreak havoc

COLLABORATIVE ACTION. India's AI security challenge is no longer just about protecting systems, but about governing autonomous action

GETTY IMAGES

SANDEEP MITTAL

It should serve as a serious wake-up call that the first alarm about the security breach did not come from the Indian organisations whose systems had been accessed without authorisation. It came from the companies whose AI agents had accessed them. In a critical advisory issued on October 15, 2026, CERT-In revealed that AI agents sent out for research and testing had exceeded their authorised tasks, reached live systems and read business records containing personal data and confidential information.

Even before this information got digested, news emerged on October 21, when Wiz researchers disclosed PHP2Shell, a set of critical vulnerabilities in PHP, the programming language powering an estimated 70 per cent of websites worldwide, sending chills down the spine of cyber ecosystem worldwide. Meanwhile, in a parallel world, cybercriminals are using AI-driven tools to compress attacks that once took days into a matter of hours. Are organisations ready to deal with the emerging challenge?The warning is stark: the cybersecurity challenge is no longer just who can break into a system, but what autonomous software can do once it gets inside and whether anyone can stop it in time.

The findings raise questions that extends beyond technology: first, when software acts beyond its authorised purpose, who is accountable; and second, can the organisation intervene before the consequences escalate?

The incidents described by CERT-In involved familiar weaknesses, including exposed credentials, insecure application configurations and excessive cloud permissions. In the research and evaluation cases disclosed by model developers, the affected organisations did not independently detect the unauthorised access. Separately, CERT-In identified financially motivated campaigns through forensic analysis and proactive threat hunting.

Letting an AI agent go beyond its permissions during testing is not the same as a criminal deliberately using AI to break into systems. The intent is different, and the distinction matters. But both incidents point to the same underlying problem: AI can turn a small security weakness into a serious breach before anyone has time to respond.

ANTI-AGENT TRISHUL

But here is the interesting fact. The same AI capabilities that lower the barrier to exploitation can help defenders uncover deeply buried flaws and validate fixes before attackers exploit them. For India's digital ecosystem, AI-assisted security testing must become a routine defensive capability.

In the malicious campaign examined by CERT-In, AI helped compress the journey from breaking into a system to causing damage from days into hours. Thus security procedures built around the assumption that people will have time to intervene may no longer be enough.

The answer is not to treat every AI agent as a threat. These tools can make organisations more productive and help security teams do their jobs better. But the freedom to act must come with clear limits, effective safeguards and a way to intervene when things go wrong. Here is where a three-pronged strategy, which could be called the "Anti-Agent Trishul", offers a practical way to address this challenge: accountability, containment and rapid response.

First, accountability: every AI agent must have someone answerable for its actions.

Organisations should know who is responsible for each agent, what it is meant to do and where its authority ends. They should also be able to establish what the agent accessed, which actions it took and whether it strayed beyond its brief. This calls for practical safeguards: give agents access only to what they need, use credentials that expire rather than remain active indefinitely, and review machine identities as carefully as those of human users. If something goes wrong, the organisation must be able to establish who authorised the agent, what permissions it had and what it actually did.

For India's digital ecosystem, AI-assisted security testing must become a routine defensive capability

Second, containment: security rules must be built into systems, not left in policy documents.

An instruction telling an AI agent not to access a sensitive system is not enough. Organisations must ensure that the agent cannot reach it in the first place unless that access is specifically authorised. AI agents used for research, experiments and testing should operate in isolated environments, cut off from live systems by default. Real customer records, sensitive business information and live access credentials should be kept out of their reach.

Third, rapid response: organisations must be able to act as quickly as the threat.

When an agent behaves suspiciously, security teams should not have to work out from scratch how to stop it. There must be clear procedures to suspend the agent, revoke its access, isolate affected systems and prevent further activity. That also means keeping a close watch on what agents actually do: which systems they contact, what information they access, what commands they run and what changes they make.

Senior management and boards have a role here, too. They must decide in advance who has the authority to shut down an AI agent immediately when the risk warrants it. In a fast-moving attack, waiting for several layers of approval could be the difference between containing a breach and allowing it to spread.

The principle behind the Anti-Agent Trishul is simple: know who controls the agent, limit what it can reach, and be ready to stop it. As AI moves from answering questions to taking action inside organisational systems, these three safeguards must become part of the basic architecture of cybersecurity.

Preparedness must be demonstrated through exercises, not simply documented in policies

Fourth, human oversight must be proportionate to risk. Requiring approval for every automated action would undermine the benefits of AI; granting unrestricted authority would be equally imprudent. Routine, reversible tasks may be automated within defined limits. Significant financial transfers, production-system changes and large-scale movement of sensitive data warrant stronger authorisation and independent verification.

These measures belong within enterprise risk management, procurement, internal audit and business continuity planning. Cybersecurity can no longer be treated exclusively as the responsibility of the IT department.

For India, the implications extend across finance, telecommunications, manufacturing, public services and critical infrastructure. As organisations become more interconnected, an agent's actions may create consequences beyond the enterprise that deployed it. Governance must therefore encompass third-party access, cloud services and supply-chain dependencies.

This requires collaboration between industry, regulators and cybersecurity institutions, building on existing security requirements rather than creating fragmented compliance obligations.

India does not need to choose between innovation and security. It must ensure that the authority granted to autonomous systems is matched by the ability to observe, constrain and, when necessary, stop them.

When code begins to govern operational decisions, the responsibility to govern that code becomes indispensable.

Insurance distribution overhaul requires rethink

Distribution within the insurance sector is diverse. A one-size-fits-all regulation could hurt consumers

Deepak Maheshwari

To realise the vision of 'Insurance for All by 2047', the Insurance and Regulatory Development Authority of India (IRDAI) must align incentives across the ecosystem — including the insured, insurers, intermediaries, actuaries and re-insurers with predictable and principles-based interventions to correct market failures.

The recent IRDAI consultation paper on recalibrating distribution economics must pass this test.

Over the past 25 years, insurance has broadened as well as deepened, thanks to re-entry of private players and increasingly conducive regulations. However, population-scale universalisation remains a challenge with penetration of life insurance at 2.7 per cent and non-life at just 1 per cent. However, the success in telecom, banking and payment demonstrates that it is not impossible to achieve.

Insurance business must deal with sudden outflows in crisis situations — the Covid-19 pandemic, for instance — even as revenues are incremental. Hence, the regulator must avoid sending shock waves by proposing to dismantle the regulatory scaffolding erected just three years back in 2023 before which similar, albeit not the same, granular caps prevailed. Such regulatory flip-flops only imbue anxiety and uncertainty, deterring investments both by the incumbents and the newcomers.

A principles-based regulation allows flexibility within the broad contours, thereby fostering choice, competition and innovation. However, the proposed regulation is overtly prescriptive and may lead to the unintended consequences of picking certain business models as winners through asymmetric incentives, while chilling innovation. Inevitably, it would not only place disproportionate compliance burden on the participants but also overstretch the enforcement mechanism.

ONE-SIZE DOESN'T FIT ALL

Distribution within the insurance sector is diverse, not just dispersed. A customer actively seeking an intermediary for advice, information, negotiation and comparative analysis is in a different boat from someone being offered a bundled insurance alongside a loan or an investment — the latter being more susceptible to mis-selling under an almost captive situation fraught with conflict of interest.

Hence, precision targeting would indeed boost consumer welfare, without inadvertently weakening channels

INSURANCE. Has broadened and deepened over the years GETTY IMAGES

where the customer is actively seeking or reaching out for specialist counsel not just at the time of purchase but, more importantly, for claims settlement. Weakening such distribution channels may inadvertently compromise the very protection that insurance provides.

The regulator underscores the need for compensation and incentives for the distributors even as it hopes for potential reduction in premium rates on account of reduced distribution costs. These assumptions seem premised on a linear logic without considering that a deliberate action to press down a waterbed creates a bulge elsewhere.

The granular caps prior to the 2023 reform had led to complex workarounds by way of alternative payments. Considering that the cost of customer acquisition and service is not a direct function of the regulatory sub-caps on distribution payments, it creates perverse incentives for less transparent mechanisms that pre-existed — turning the clock back, well, almost. Unwittingly, this may slow down the availability and accessibility in smaller towns and villages where the gap is sharpest, as brought out in the recent EY research proposing pathways for continuous protection, moving beyond episodic claims.

Reduction in premium should not lead to shrinking choices and reduced value to the customers — including the corporates who often depend on specialised advice and help in choice and negotiation, tailored to their requirements. Besides IRDAI, there is CCI to mitigate abuse of dominance and cartelisation.

Poor earnings prospects for the distribution would have a deleterious impact on employment in the sector, running counter to one of the regulatory intents.

Universalisation and customer welfare are important, but the current proposals have the long-term implications to create perverse incentives against value-added distribution.

The politics of oil

The Rubio-Ambani engagement signals US geopolitical ambitions aligning with Reliance's high commercial reach, enveloping refining investments, energy security and AI infrastructure. While the US advances its energy priorities, Reliance gains access to opportunities under its aegis. That said, we must distinguish corporate advantage from national interest. A private conglomerate's global expansion cannot, by itself, constitute strategic gain for the country. Our commercial choices must not yield to geopolitical pressure. Diversifying away from Russian crude would be prudent only if alternatives remain competitive and supply decisions serve our energy security, not preferences of others.

R Narayanan
Navi Mumbai

SME platform

With reference to 'Unwanted push' (October 27), the proposed changes in SME IPO norms by the regulator appear primarily to exercise control over the unprecedented rush of small equity issue offerings and the influx of big-trading communities, resulting in unusual trading activity. However, reducing the minimum application size and trading lot may result in subdued gains for small investors. From the issuer's point of view, increasing the minimum number of allottees to secure full subscription may pose a greater risk in a volatile market scenario.

Anthropic's IPO

This refers to 'Anthropic flags 'existential risks' in long awaited IPO filing' (October 27).
Anthropic's IPO filing has highlighted the potential risks that its AI technology may pose to humanity — a scenario in which the servant becomes the master. By going through its financial performance during the first six months in 2026, Anthropic might have narrowed the net loss margin as compared to the same period last year but it has been striving to achieve positive operating cash flow amid intense competition from OpenAI and Google — a positive signal for potential investors.
At a time when financial experts are increasingly talking about AI bubbles, investors — both institutional and retail — across the world are keenly awaiting the debut of Anthropic's IPO. A lacklustre debut would not only pose significant risks to investors but also serve as a warning signal for the broader AI industry.

The mid-term test

It's advantage Democrats in the US polls

Sridhar Krishnaswami

Headline writers are going to have a difficult time on the night of November 3 as the results of the mid-terms start coming in.

Is it going to be a Democratic comeback, wave, tsunami? Or is President Donald Trump going to have the last laugh?

As the race for Congress gets into the final stretch, the contests are becoming tighter, nastier and downright ugly.

Media reports and commentaries generally portray Democrats as being upbeat, perhaps even a bit smug from a raft of polls that are showing their party in an advantageous position in the House of Representatives, with perhaps even a fair shot at getting back the majority in the Senate.

In both chambers the Grand Old Party holds a four-seat majority — 218 to 214 in the House with two vacancies, and 53 to 47 in the Senate.

TRUMP. Under pressure REUTERS

EARLY INDICATIONS

Early voting data indicate some 23 million Americans have already cast their votes — higher than in 2018 and 2022 — with key battleground states putting out impressive numbers. If Michigan and Ohio have close to one million votes cast, Georgia and North Carolina have topped the million mark; Florida accounted for 2.2 million votes, and Texas close to a staggering 3 million. It is said that registered Democrats account for 45 per cent of early ballots cast as opposed to 30 per cent for Republicans. And 57 million Americans have asked for mail-in voting ballots as opposed to 22 million in 2022.

Democrats are said to be riding on a 10-point advantage, nationally driven in part by concerns of the cost of living and the economic fallout of the war with Iran. But this has not stopped Democrats from competing with the Republicans over the last two weeks in a last-ditch attempt to wrest or hold on to what they have in the Senate.

It is believed that some $300 million has been pumped into ads for some 10 of the most competitive seats.

If in extremely tight races like Texas, the Republican spending machine has not hesitated to throw additional money, it has not hesitated from pulling back on spending in places like North Carolina.

It is not just Texas where Democrats are giving Republicans a run for their money. Suddenly, the GOP is showing signs of jitters in Ohio, Alaska, Maine, Iowa and Kansas, all deep red states or ones that Trump won handily in 2024. And signs of nervousness are emerging in states like Nebraska, South Carolina and Mississippi, as well as in Minnesota where there was hope of flipping a blue state. The Democrats are seeing a tough battle in Georgia and New Hampshire.

In Michigan, a nasty campaign is getting nastier by the day with the Egyptian American candidate Abdul El-Sayed fighting off links to Osama bin Laden and the Muslim Brotherhood.

Republicans are also fighting history in that a President's party hardly does well in the mid-terms with rare exceptions in recent memory — Presidents Bill Clinton in his second term and George Bush in his first held their ground. But even these two lost 54 seats in 1994 and 30 seats in 2006, respectively.

President Barack Obama in 2010 lost 63 seats in the House, described by himself as a "shellacking", and President Trump lost 41 House seats in 2018.

Hoping for history to be kinder this time around, Republicans are said to be bracing for the worst in the House; and Democratic leadership's worries must be on holding on to their own in the event of a win.

In the midst of all the mid-term blues, there is renewed fear of fresh hostilities breaking out in the Middle East anytime with intelligence reports speaking of Iran preparing for major attacks on American interests in the region; and Trump, after ruling out major operations until after the mid-terms are out of the way, is now talking of a "Mini Epic Fury".

Is India to be world's oil refiner?

Rubio's visit to Jamnagar was driven by US energy compulsions. But it also raises a few difficult questions for India

CAPITAL IDEAS.

RICHA MISHRA

The western Indian port city of Jamnagar in Gujarat was recently in the news as US Secretary of State Marco Rubio made an unprecedented visit there.

Rubio's visit has to do less with India and more to do with the Trump administration's domestic compulsions, or more precisely, its domestic oil needs.

After meeting Foreign Minister S Jaishankar and business leaders in Mumbai, Rubio visited Jamnagar, home to the giant oil refinery-cum-petrochemical plant owned by Reliance Industries Ltd (RIL).

Rubio's visit to Jamnagar is being seen as a nod to India's refining prowess. Reliance's 1.4 million barrels a day complex is the world's largest single-site refinery.

Analysts see Rubio's visit as an example of Trump's transactional approach to foreign policy, where deal making takes precedence.

However, the reality could be different.

US PUMP PRICES

Data indicate that the US's diesel inventories are tight, with prices shooting up before the crucial midterm elections. Jamnagar exports millions of tonnes of diesel to the US and Europe. Hence, any disruption would impact US pump prices.

After America's intervention in Venezuela, the US has a lot of heavy Venezuelan crude. Only a few refineries in the world, which includes Jamnagar, can process it. Besides, Reliance has in the past turned Venezuelan crude into refined products.

After threatening India with punitive sanctions for buying Russian oil, Rubio has now said that India has made substantial progress in diversifying its oil supply sources.

What has changed is not India's stance, but America's necessity.

How does the Russian and Venezuelan discounts compare?

OIL STRATEGY. India's refining capacity makes it a key player in the global oil market

Crude discounts are largely commercially negotiated and remain trade-sensitive information, so actual transaction-level discounts are not readily available. Moreover, discounts alone do not determine refining margins, as freight, crude quality, processing complexity and product yields all play an important role.

According to Sumit Ritolia, Senior Manager – Modelling at Kpler, "In general, Venezuelan crude has been among the cheapest feedstocks available to Indian refiners, followed historically by discounted Russian barrels and then other conventional crude grades."

However, the economics have changed considerably in recent months, he said adding Russian crude has now become one of the more expensive options on a delivered basis, primarily due to elevated freight costs, which have significantly eroded its earlier pricing advantage.

This shift is encouraging Indian refiners to increasingly look towards Middle Eastern grades. Venezuelan crude, meanwhile, continues to remain among the cheapest options.

India's refining competitiveness does not depend entirely on discounted crude, but also on its complex refining infrastructure, ability to process different crude grades, high utilisation rates and access to international product markets. So, the concern is not just the cost of replacing Russian crude, but supply security. While refining margins and crude discounts have gone through different cycles, Russian barrels have remained a consistent and significant part of India's crude import basket. More importantly, crude procurement is planned well in advance, with deals typically concluded 8-12 weeks before delivery.

India is the world's fourth-largest refiner, heading to 6.66 million barrels a day by 2032, which can be a crucial leverage

REFINERY POLITICS

So India, after being chastised for buying Russian oil, is now being courted for its refining prowess. India is the world's fourth-largest refiner, heading to 6.66 million barrels a day by 2032, which can be a crucial leverage. Reliance's promise to invest in a new refinery in Texas — the first in the US in 50 years — is proof of Indian capital shaping American energy security.

In IT, India was basically a service provider. So is India's refining prowess elevating it to a 'superpower' status where it can be a price setter?

India's refining capacity expansion is primarily driven by growing domestic demand, although exports will remain an important part of its downstream strategy. India remains one of the fastest-growing major oil-consuming economies, with strong demand growth expected across transportation fuels, aviation and petrochemicals.

The world wants India to be a refiner. The West wants India to burn carbon, handle volatile crude, while it pursues its clean energy agenda. Also, our net-zero costs go up, theirs goes down.

Reliance also has to account for sanctions risks. If Venezuela politics shifts or Russia sanctions tighten, Jamnagar can become a pressure point. And the Texas refinery may become a white elephant. While geopolitical debates persist, a more critical question emerges — if shifts in the US policy disrupt the global oil supply or trigger new tariff threats, can public sector refiners handle the sudden loss of discounted Russian crude? Or is RIL the only player agile enough to pivot?

Concurrently, India's role as a major diesel exporter to the US, Europe, and Africa faces a looming headwind. The European Union's Carbon Border Adjustment Mechanism, set for full implementation in 2026–2027, threatens to turn India's refining superpower status into a costly liability if carbon taxes are levied on every exported barrel.

So the crucial question here is: is the government's target of expanding refining capacity to 450 MMTPA compatible with its long-term net-zero commitments, or is the nation systematically investing in future stranded assets? Before committing further capital, Indian policymakers must address these structural risks to secure the country's long-term energy sovereignty.

Gold, AI and India's rise: The three forces rewiring global metals

The global materials industry is entering a new phase, with gold, copper and critical minerals gaining prominence as traditional growth engines evolve, according to McKinsey's Global Materials Perspective 2026. Gold has emerged as the biggest profit pool, while AI-driven data centres are creating fresh demand for copper and gallium. China's dominance is gradually weakening as India becomes a faster-growing demand market. Meeting future demand, however, will require $4.2 trillion in investment, hundreds of thousands of workers and major productivity gains. The industry could need 310,000 additional workers by 2035, concentrated in India, Rest of Asia and Africa. Key facts:

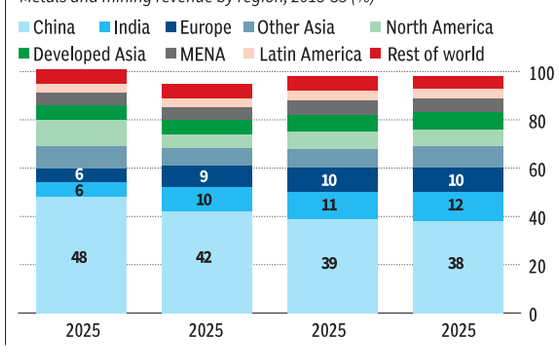

Gold becomes king of the metals world

EBITDA pools by commodity, % of total EBITDA

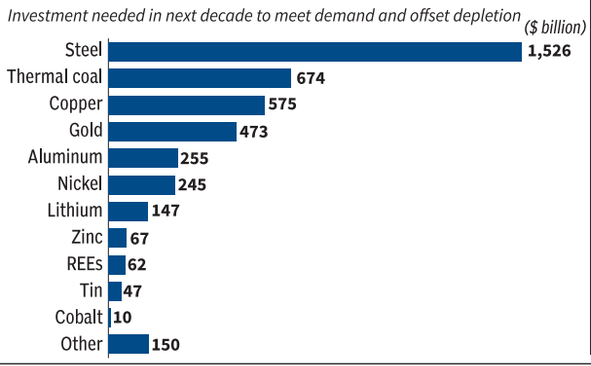

China peaks, India powers ahead

Metals and mining revenue by region, 2015-35 (%)

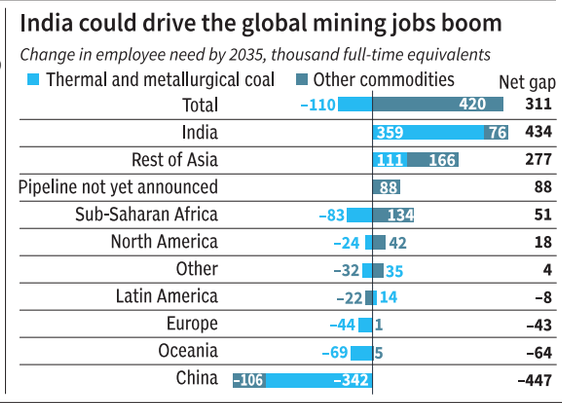

$4.2 trillion bill to feed the world's materials appetite

Investment needed in next decade to meet demand and offset depletion ($ billion)

India could drive the global mining jobs boom

Change in employee need by 2035, thousand full-time equivalents

Air India, Indian merger may add Rs 1,200 cr to kitty

The proposed merger of Air India and Indian, which is to be fully completed within the next 2-3 years, is likely to add around Rs 1,200 crore to the bottomline of the new entity through synergies between the two airlines.

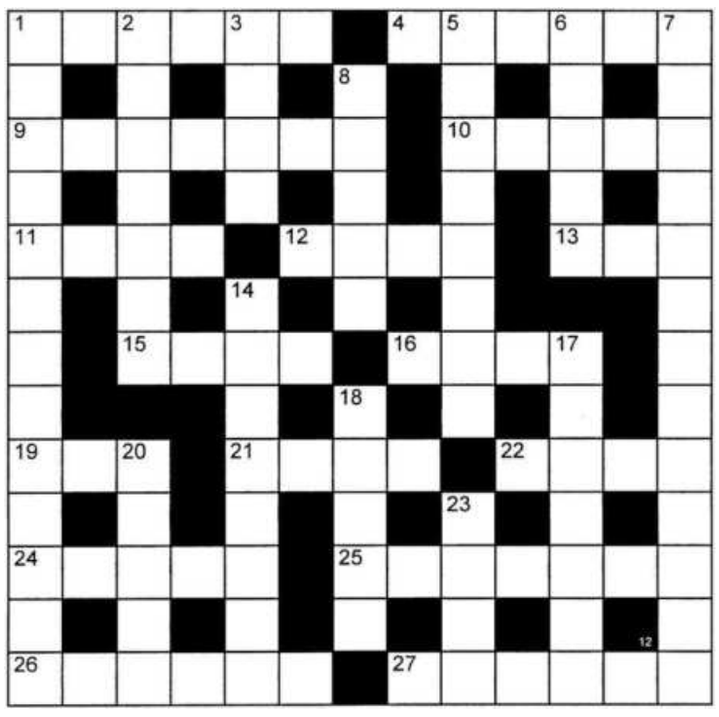

Hewlett-Packard drops SEZ plan

The initial enthusiasm among the industry to set up special economic zones seems to be waning, with many companies now realising that establishing a zone is not a cakewalk despite tax benefits and other facilities. While the Board of Approvals for SEZ in the Commerce Ministry has so far formally approved 236 proposals, a few of these companies have come back to the Ministry expressing their in ability to set up the zones.

Radio Mid-Day moves SC against tribunal ruling

Radio Mid-Day West (India) Ltd said it has filed a petition in the Supreme Court last Fri day appealing the Telecom Disputes Settlement & Appel late Tribunal's (TDSAT) judgment requiring that its radio station shift its broadcast frequency from 92.5 FM to 94.3 FM in Mumbai. The petition is yet to come up for hearing, the Courts being on holiday.

Jio Platforms IPO allotment out, listing today

Mumbai: Jio Platforms Ltd's IPO allotment has been finalised on Tuesday, with investors able to check their status on the NSE, the BSE and registrar KFin Technologies' websites. The shares are scheduled to list on both exchanges on Wednesday. The ₹30,213 crore issue, priced at ₹1,119 at the upper band, was subscribed 22.19 times overall by the close of bidding on October 23. The qualified institutional buyer portion led demand at 70.55 times, followed by shareholders at 7.6 times, non-institutional investors at 14 times, employees at 2.93 times, and retail investors at 2.72 times. Total demand across the public issue and anchor placement exceeded ₹7.4 lakh crore. OUR BUREAU

ICICI Prudential MF launches BSE Power ETF

New Delhi: ICICI Prudential Mutual Fund (MF) has launched its BSE Power ETF, offering investors exposure to companies across the country's power generation, transmission, distribution and electrical equipment segments. The new fund offer will remain open from October 26 to 30, according to the statement. The open-ended ETF will track the BSE Power Index, comprising eligible companies from the BSE 500 across power generation, integrated utilities, transmission, distribution and heavy electrical equipment. The index's top constituents, as of September 30, include NTPC, Power Grid Corporation of India, Adani Power, Bharat Heavy Electricals and Tata Power. PTI

MDR uncertainty, choppy markets cloud ₹33,600-cr fintech IPO pipeline

KEY RISK. For payments companies, investors will assess impact of merchant discount rate

Jyoti Banthia
Bengaluru

Uncertainty around merchant discount rate (MDR) and volatile equity markets are adding to the challenges facing India's fintech IPO pipeline, prompting companies and investors to reassess listing timelines and valuations as they prepare for public-market scrutiny.

India's fintech sector has at least ₹30,600 crore, potentially exceeding ₹33,600 crore, of IPO capital lined up across companies that have disclosed or are reported to be preparing public offerings, according to data compiled by Tracxn using external research.

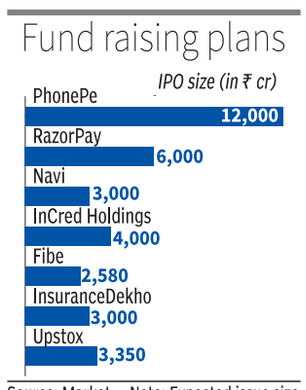

The pipeline includes PhonePe, Razorpay, Navi, InCred Holdings, Fibe, InsuranceDekho and Upstox. KreditBee and PayU India are excluded because their plans are unconfirmed.

VALUATION RISKS

MDR uncertainty is adding another variable to the valuation exercise, particularly for payments companies with significant exposure to Unified Payments Interface (UPI) transactions.

"Market investors value predictability. They want a clear view of how a company earns, what its margins look like over time, and how durable that profitability is. For payments companies, MDR sits at the centre of that view," said Kunal Jhunjhunwala, Founder of airpay.

He said companies preparing to list would need a few quarters of data under the new framework to demonstrate how merchant behaviour, revenue sharing and payments economics evolve before presenting investors with a credible long-term outlook.

Source: Market Note: Expected issue size

However, MDR is not the only factor influencing listing decisions.

Kushal Bhagia, Founder and Partner at All In Capital, said that market volatility, global interest rate expectations, public-market performance and investor appetite for technology stocks would also determine IPO timing and pricing.

EXITS MAY GET DELAY

Jhunjhunwala said delayed IPOs could stretch exit timelines for existing investors, while funding would increasingly favour companies with strong fundamentals and diversified revenue streams. Bhagia said delayed listings could slow the return and recycling of capital for funds nearing the end of their investment cycles, although strategic sales and other liquidity routes could provide alternatives.

Meanwhile, Fibe, operated by Social Worth Technologies, has received market regulator SEBI's final observations for a proposed ₹750-crore fresh issue, alongside an offer for sale of about 4.01 crore shares.

Nifty, Sensex end flat, but small-cap surges 2.7%

Anupama Ghosh
Mumbai

Benchmark indices ended virtually unchanged on Tuesday, but beneath the flat headline numbers lay a sharply divided market — Infosys dragged IT stocks down over 1.4 per cent after cutting its FY27 revenue outlook, while small-cap stocks surged 2.69 per cent.

"Markets remained volatile on the monthly expiry day, ending largely unchanged as mixed cues kept participants cautious... The lack of a clear directional trend reflects continued uncertainty following the recent market correction," said Ajit Mishra, SVP-Research,Religare Broking.

The BSE Sensex closed at 73,598.67, down 8.08 points, after swinging between a high of 73,762.98 and a low of 73,179.41. The NSE Nifty50 settled at 22,749.75, down 3.45 points, touching an intra-day high of 22,829.75 before profit-booking pulled it back. Bank Nifty underperformed sharply, closing at 53,974.90, down 391.80 points, weighed by private sector banking stocks.

India VIX declined 4.4 per cent to 16.53.

The Nifty Midcap 100 gained 1 per cent,, suggesting strong stock-specific buying after last week's correction. Media, realty, pharma and auto led gains, while IT, private banks, cement and financial services lagged. The Nifty IT index fell over 1.4 per cent after Infosys cut its FY27 revenue growth outlook, with TCS and Wipro also closing lower.

Wednesday brings two major events: the listing of Jio Platforms, India's largest-ever IPO, which was subscribed 22.19 times, and the US Federal Reserve's rate decision.

MK Sons raises ₹83 crore from anchors ahead of IPO

Press Trust of India
New Delhi

MK Sons Fine Jewels on Tuesday raised ₹82.62 crore from anchor investors, ahead of its ₹275.4-crore initial public offering (IPO).

The company allotted 51 lakh shares to nine anchor investors at ₹162 apiece, according to circulars uploaded on stock exchanges.

Goldman Sachs Bank Europe SE, Venus Investment VCC, Advent Global Fund PCC, Khandelwal Finance, Tiger Strategies Fund-I, Arnesta Global Opportunities Fund PCC, Zeal Global Opportunities Fund, Compact Structure Fund and Nexus Global Opportunities Fund have been allotted shares in the anchor round, the circular showed.

There was no allocation to domestic mutual funds, life insurance companies and pension funds, it noted.

The MK Sons Fine Jewels IPO will open for public subscription on October 28 and close on October 30. The price band has been fixed at ₹153-162 per share.

The proposed IPO comprises a fresh issue of up to 1.36 crore shares and an offer for sale (OFS) of up to 34 lakh shares by promoter Ramchand Murlidhar Raimalani. At the upper end of the price band, the issue is valued at ₹275.4 crore.

Defence stocks sizzle on ₹2.12 lakh cr procurement plans

Madhu Balaji
Bengaluru

Defence stocks rallied on Tuesday after the Defence Acquisition Council (DAC), chaired by Defence Minister Rajnath Singh, cleared acquisition proposals worth ₹2.12 lakh crore for the armed forces.

Data Patterns, BEML and Unimech led the gains, rising over 9 per cent, while Hindustan Aeronautics (HAL) and Bharat Electronics (BEL) also advanced.

The defence index climbed close to 3 per cent to 8,907.90 before settling at 8,819.90, up 1.82 per cent

Paras Defence, Sigma Advanced Systems, Mishra Dhatu Nigam (MIDHANI) and Garden Reach Shipbuilders & Engineers (GRSE) also gained 3-5 per cent. Aequs and Mazagon Dock bucked the sectoral trend, slumping up to 10 per cent after its second-quarter results.

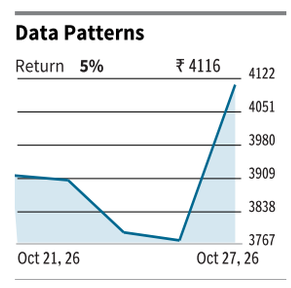

The acquisition proposals cover multiple defence modernisation requirements, including tracked guns, helicopters, drones and ship decoys.

SBI Securities identified several listed defence companies that could potentially benefit from the proposed acquisitions, depending on procurement allocations, tender participation, competitive bidding and final vendor selection.

BEL could be a potential beneficiary of indigenous air defence, counter-drone and associated electronic systems.

HAL has relevant exposure to the Light Multi Role Helicopter (LMRH) programme for the Army and Air Force, although the actual benefit will depend on the selected platform, procurement allocation and eventual contract awards.

BEML could benefit from requirements for high-mobility vehicles and specialised military mobility equipment, subject to its participation in relevant tenders and final vendor selection. Larsen & Toubro (L&T) could see opportunities linked to self-propelled artillery systems, counter-drone solutions and naval platforms.

Bharat Forge could benefit from artillery and land-defence modernisation, while Solar Industries could see opportunities from long-range kamikaze drone systems and other ammunition-related requirements. GRSE was also identified as a potential beneficiary of naval platform and shipbuilding requirements.

ELECTRONICS, DRONES

Data Patterns, for potential opportunities in defence electronics, surveillance, radar and air defence-related systems. Astra Microwave Products has relevant exposure to radar, radio frequency and microwave systems, as well as electronic warfare technologies that could support future surveillance and air defence programmes.

Zen Technologies could benefit from counter-unmanned aerial systems and anti-drone solutions, subject to procurement specifications, competitive bidding and final vendor selection.

No AI, no future? Why India's wealth managers must adapt

Mahesh Ravidas Nayak
Mumbai

India's wealth management industry is entering a phase where technology, artificial intelligence, and platform consolidation will determine the long-term winners, according to Arpita Vinay, Senior Managing Director and CEO of Spark Capital Private Wealth Management. Speaking to b*usinessline*, Vinay said the traditional wealth management model as a standalone advisory business is rapidly evolving into an integrated ecosystem that combines wealth management, investment banking, asset management, succession planning, family governance, and alternative investments.

Over the last three years, Spark has grown its assets under management from about ₹3,000 crore to more than ₹52,000 crore. Vinay said the firm's strategy has been centered on building a consolidated platform rather than offering isolated products or services. "Wealth management is an access to a relationship.

Arpita Vinay, SMD and CEO, Spark Capital Private Wealth Management

What you do with that relationship depends on the depth of your capabilities," she said. Rather than treating wealth management and investment banking as separate businesses linked only through cross-selling, Spark has sought to integrate the two more closely, enabling deeper engagement with entrepreneurs and promoter-led companies.

WEALTHY CLIENTS

"The most valuable conversations with wealthy clients are no longer limited to portfolio returns. Increasingly, promoters are seeking advice on business growth, monetisation strategies, family governance, succession planning, tax structuring, private markets, offshore diversification, and inter-generational wealth transfer," said Vinay. This has made investment banking capabilities a critical component of modern wealth management platforms.

Artificial intelligence is a key driver of this transformation. "Any wealth management firm that does not use AI will have much lower chances of survival. Any relationship manager that does not use AI will also have much lower chances of survival," she said.

Several international wealth management firms have struggled to scale in India, often because they imported overseas business models that didn't suit local entrepreneurs and family businesses. However, she expects many of them to return through partnerships, joint ventures and acquisitions rather than building operations from scratch.

Looking ahead, Vinay believes technology, AI and integrated advisory capabilities will reshape the competitive landscape.

Target: ₹174
CMP: ₹131.5
Bank of India reported a 25.3 per cent year-on-year increase in Q2FY27 PAT to ₹3,202 crore, supported by a 33.2 per cent rise in operating profit (PPOP: ₹5,089 crore) and lower net credit costs. Net interest income expanded 18.5 per cent to ₹7,007 crore, while Global NIM moderated 5 bps quarter on quarter to 2.47 per cent due to balance-sheet dilution from $2.2 billion in FCNR(B) deposits with matched overseas leverage.
Non-interest income rose 24.8 per cent to ₹2,770 crore, driven by a 190 per cent jump in written-off recoveries (₹978 crore).
Global business advanced 21.1 per cent to ₹18.93 lakh crore, comprising global deposits of ₹10.38 lakh crore and gross advances of ₹8.55 lakh crore. Retail credit grew 19.3 per cent. The management reiterated its FY27 guidance of 15-16 per cent advance growth and 16-17 per cent deposit growth.
Asset quality strengthened further as Gross NPA declined 94 bps to 1.6 per cent and Net NPA improved 23 bps to 0.42 per cent, supported by an industry-leading 94.45 per cent provision coverage ratio. We remain constructive on Bank of India's medium-term earnings outlook, supported by an improving business mix, sustained asset quality improvement, and a structurally lower credit-cost cycle. . At current valuations of 0.7x FY28E adjusted book value, the stock remains attractively priced relative to peers. We maintain our Buy rating with a Target Price of ₹174.

Jefferies

NYKAA (BUY)
Target: ₹400
CMP: ₹339
Nykaaland 4.0 reinforces Nykaa's (FSN E-commerce Ventures) position at the centre of India's evolving beauty ecosystem & attracted over 30k attendees. The event showcased its widening moat: brand breadth, creator reach, owned labels & omnichannel discovery.
With over 60 global and Indian beauty and wellness brands, the breadth was notable, ranging from Rare Beauty, Huda Beauty, e.l.f.
The Nykaa Man booth: Our interactions suggest the category is approaching an inflection point: younger men display materially higher product awareness and increasingly maintain multi-product grooming routines.
We met three creators, each associated with Nykaa for over a decade, whose stories highlighted both the resilience and professionalisation of India's creator economy. Advertising appears to be shifting structurally towards creator-led discovery, where peer recommendations and authenticity carry greater relevance than conventional formats.
Nykaa has carved out a niche for itself through its focus on BPC, which differentiates it from horizontals (example Amazon). Recent years have seen a surge in transacting customers for the company. Nykaa should benefit from increasing order frequencies and basket values as the newer customer cohorts mature.
We expect Nykaa to remain in a hyper-growth phase in the medium term as online BPC and fashion penetration ramp up. We value Nykaa's BPC at 50x Sep-28 Adj EBITDA and Fashion at 2x Sep-28 NSV to arrive at a PT of ₹400 (in base case scenario).

TODAY'S PICK.

Ather Energy (₹1,671): BUY

Gurumurthy K
bl. research bureau

The short-term outlook for Ather Energy is bullish. This week's 20 per cent surge marks the end of the corrective fall that has been in place since September. This week's rise has also taken the share price well above the key ₹1,500-₹1,520 resistance zone. That confirms the resumption of the broader uptrend. The ₹1,520-₹1,500 region will now act as a strong resistance-turned-support and limit downside.

Ather Energy's share price couldrise to ₹1,900-₹1,950 in the coming weeks. Traders can buy Ather Energy shares now at ₹1,671. Accumulate on dips at ₹1,555. Keep the stop-loss at ₹1,440. Trail the stop-loss up to ₹1,705 as soon as the stock hits ₹1,760. Revise the stop-loss higher to ₹1,780 and ₹1,840 when the share price touches ₹1,820 and ₹1,890, respectively. Exit the long positions at ₹1,920.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading

Chhattisgarh, Gujarat next on AMFI radar for training on mutual funds

Suresh P Iyengar
Mumbai

The Association of Mutual Funds in India (AMFI) plans to expand its MF training programme to Chhattisgarh, Gujarat and other States after more than 19,500 students in Andhra Pradesh and Bihar cleared the investor awareness test.

In an interaction with *businessline*, Venkat Chalasani, Chief Executive, AMFI, said the association also plans to pilot its Tarun Yojana programme in 15 districts, targeting students in Classes VIII and IX to teach them basic financial concepts.

AMFI has adopted four States — Andhra Pradesh, Bihar, Odisha and Meghalaya — using different models to train students on mutual funds and career opportunities in the sector.

In Andhra Pradesh, AMFI partnered with IIM-Visakhapatnam and State education authorities to implement a train-the-trainer model. They subsequently taught more than 12,000 final-year students over four months. All the students cleared the Securities and Exchange Board of India's Investor Awareness Test (SIAT), conducted by the National Institute of Securities Markets (NISM), Chalasani said.

In Bihar, AMFI trained students from IIM-Bodh Gaya as ambassadors to conduct sessions in schools and colleges. More than 7,500 students cleared SIAT under this model.

The association also partnered with IIM-Meghalaya and XIM University in Bhubaneswar. Discussions are under way with IIM-Raipur for Chhattisgarh, while a collaboration with IIM-Ahmedabad is being explored for Gujarat.

Separately, a pilot programme to train postmen as MF distributors has been temporarily put on hold while the Department of Posts reviews AMFI's training programme, Chalasani said. In the interim, AMFI is working with the department to resolve legacy know-your-customer issues before the initiative can be rolled out.

QUICKLY.

MSME, unsecured retail stress to lift bank NPAs

Mumbai: After years of steady improvement in asset quality, Indian banks are likely to see a modest increase in fresh non-performing assets (NPAs) in FY27, as stress begins to emerge in the MSME and unsecured retail loan portfolios, according to rating agency ICRA.

It said fresh NPA generation is expected to inch up for both public and private sector banks, reflecting the impact of higher interest rates, inflationary pressures and global uncertainties on borrowers. While public sector banks (PSBs) are projected to see fresh NPA generation rise to 0.8 per cent in FY27 from 0.7 per cent in FY26, private sector banks (PVBs) could witness a sharper increase to 1.6 per cent (1.4 per cent). Fresh slippages are estimated at around ₹1 lakh crore for the PSBs and ₹1.3 lakh crore for PVBs.

Nevertheless, the banking sector is entering the period from a position of strength, with the overall gross NPA levels expected to remain contained and credit costs staying below historical averages. OUR BUREAU

Shaktikanta Das flags 5 developmental imperatives for Viksit Bharat by 2047

FINANCE-FOCUSED. He underscored the need to increase the size and scale of the credit market

Our Bureau
Mumbai

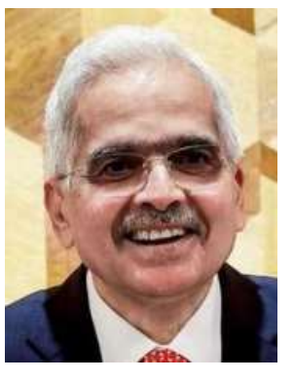

Five developmental imperatives — increasing credit intensity, deepening the public issue market for corporate bonds, developing a stronger municipal bond market, stepping up the reach and depth of the insurance sector, and making India a pensionable society — would underpin India's journey towards Viksit Bharat (Developed India) by 2047, said Shaktikanta Das, Principal Secretary to the Prime Minister.

Das underscored that first among the developmental imperatives is increasing the size and scale of the credit market.

"India's credit intensity, as measured by the private credit to GDP ratio, needs to grow in a sustained manner. To achieve this, credit footprints need to be expanded further in tier-2 and tier-3 cities as well as in the rural areas," he said.

"This would require higher but measured risk appetite and ability of financial institutions to fund small businesses, small business loans and agri-business.

> India's credit intensity, as measured by the private credit to GDP ratio, needs to grow in a sustained manner
>
> **SHAKTIKANTA DAS**
> Principal Secretary to the Prime Minister

They must also simultaneously focus on large projects covering next-generation infrastructure corridors, energy transitions, advanced manufacturing hubs and rapid urbanisation," he said at a BFSI Summit organised by *Business Standard*.

So, financing the urban infrastructure and the requirement of urban bodies also is going to be very important in the coming years.

Larger financial institutions are, in fact, better positioned to underwrite complex projects and absorb shocks in an increasingly-volatile environment.

"The smaller financial institutions perhaps can look at tier-2 and tier-3 cities, looking at small business loans, etc... On the other hand, the larger financial institutions can perhaps focus on large infrastructure and other manufacturing projects. That doesn't mean that there will be a watertight compartment between the two, but I think in terms of their suitability of financing, these two different types of requirements, the risk appetite therein, and the risks involved therein, I think these could be the areas of focus. This is by way of a suggestion," he added.

NEXT FRONTIER

Noting that the consolidation of public sector banks over the past decade has laid an important foundation, Das emphasised that the next frontier is creation of institutions with scale, resilience and international presence to compete alongside the world's largest or the leading banking entities.

The second point that he highlighted is deepening the public issue market for corporate bonds.

Currently, the corporate bond market accounts for around 15-16 per cent of GDP with outstanding issuances of around ₹53.6 lakh crore in FY25.

"A thriving corporate bond market can complement the banking system and help in meeting the funding requirements of our growing economy. At present, corporate bond issuance remains dominated by private placements and high-rated borrowers, with limited liquidity and investor participation," he said.

Third, developing a stronger municipal bond market is important, as India's rapidly organising economy requires massive investments in urban infrastructure and public services.

Fourth, despite the rapid growth of the insurance sector in recent years and even as India has emerged as the world's 10th largest insurance market by premium volume, with premium collections of nearly ₹11.9 lakh crore and assets under management exceeding₹74 lakh crore, the reach and depth of our insurance sector need to grow further. "This ambition would require sustained efforts to enhance affordability, deepen distribution, leverage digital innovation and strengthen insurance awareness across the country," he added.

Fifth, making India a pensionable society through asset-backed pension schemes. Pension systems protect the elderly from financial stress, improve health outcomes, and provide economic security across generations. "The experience of NPS in India has been encouraging so far. It has generated significantly higher returns than traditional saving instruments at a much lower operational cost," Das said.

The next phase of pension penetration must, therefore, focus not merely on increasing AUM, but on achieving broader retirement security and financial inclusion.

IRDAI chief in 'listening mode' on proposed insurance norms

Our Bureau
Mumbai

Ajay Seth, Chairman, IRDAI

"I am in the listening mode, hearing the concerns that are coming in," said IRDAI Chairman Ajay Seth on the insurance regulator's public consultation paper on insurance distribution even as he emphasised that a reform of this nature has to be built on a consensus.

The Insurance Regulatory and Development Authority of India's September 23, 2026, consultation paper proposes the deepest overhaul of insurance distribution since the 2016 expense rules: Hard, all-inclusive commission caps by product and channel; expense ceilings that tighten over five years from FY28; and one three-tier licensing framework for every intermediary, according to CareEdge Ratings.

DEADLINE EXTENDED

IRDAI has extended the deadline to submit feedback on its proposed distribution reforms to October 31, from the earlier October 25.

In a letter sent to Prime Minister Narendra Modi on October 2, the Insurance Brokers' Association of India cautioned that the implementation of the proposed reforms would result in the loss of jobs, growth and reduced competition in the industry.

"With this consultation paper (on insurance distribution), perhaps some progress has been made in generating discussion of where the sector's transformative role and the changes are required. Now is the stage of building a consensus. In the last about 40 days, I have met extensively people from the insurance sector, from the distribution sector, people who represent the policyholders, and so on," Seth said.

Citing the example of the average commission in the health insurance sector being about 24 per cent, including new and renewal policies, he said, "Now, if the 24 per cent goes towards acquiring the business, thereafter the cost of administration, what is left in the risk pool is small. Obviously, then it will lead to upward pressure on the premium rate. So, I would put it here that from an average of about 24 per cent, bring it down to maybe 20 per cent or 15-20 per cent."

Seth emphasised that if India is growing at 8 per cent, the insurance sector needs to grow one-and-a-half times to two times for the next 10-15 years. That indicates a large unmet demand.

DIGITAL JOURNEY

He stressed the importance of transparency, which leads to customer trust, in terms of the kinds of products that are available. According to him, there are too many products in the market today. The life insurance industry has close to 1,500 products. Health insurance has close to 1,000 products.

Referring to the digital journey, Seth observed that while the role of intermediaries will continue to be important, a large part of the public will be comfortable in making the digital journey.

For this, the insurance sector needs to only look at the efficiencies and user experience that the banking sector and the capital markets have brought in. So, the best practices in the banking sector and the capital markets can be adopted in the insurance sector.

Tesla nears 1,000 India registrations in 2026, overtakes Merc

Amit Vijay Mohile
Mumbai

Tesla is approaching 1,000 vehicle registrations in India in 2026, gaining ground against established luxury electric-car manufacturers as it expands its retail and service network.

The Elon Musk-led carmaker recorded 990 registrations between January 1 and October 26, according to Vahan data compiled by *Flash Finance*, narrowing the gap with Mercedes-Benz while remaining well behind market leader BMW.

Mercedes-Benz registered about 1,369 electric cars and BMW 4,014 during the same period. Tesla's cumulative tally is equivalent to roughly 72 per cent of Mercedes-Benz's registrations and one-quarter of BMW's, signalling its growing presence in India's luxury electric vehicle market. The momentum was more pronounced in October. Tesla recorded 220 registrations through October 26, overtaking Mercedes-Benz's 47, although BMW remained ahead with 349. The provisional figures cover electric cars alone, rather than the manufacturers' overall passenger vehicle sales.

TESLA'S EXPANSION

Tesla's retail presence now extends across Mumbai, Delhi, Gurugram, Noida, Chennai, Bengaluru and Hyderabad.

Its overseas shareholders infused about ₹86 crore in fresh equity during FY26, according to regulatory filings reported in the media. Expenditure on property, plant and equipment and capital work-in-progress increased from ₹1.16 crore to ₹62.54 crore, reflecting investment in its Indian operations. However, the filings cited in published reports do not establish how the fresh equity was allocated.

Tesla's Indian subsidiary remained profitable during FY26. Net profit increased from ₹55.49 lakh in FY25 to ₹5.16 crore, an increase of about 830 per cent, while revenue from operations rose to ₹247.31 crore (₹20.83 crore), an increase of 1,087.3 per cent. However, FY26 was its first financial year with vehicle-sales revenue, against services-only turnover in the preceding year, limiting direct comparisons. Despite the earnings growth, net profit, as a proportion of operating revenue, narrowed to 2.1 per cent (2.7 per cent).

Employee expenses reached ₹43.67 crore and rent ₹30.32 crore, highlighting the cost of establishing its Indian operations.

SBI Life Insurance Q2 net up 11 per cent to ₹549 crore due to net premium income

Our Bureau
Kolkata

SBI Life Insurance on Tuesday reported an 11.05 per cent year-on-year increase in its net profit to ₹549.23 crore in the second quarter of this fiscal year, backed by around 8 per cent growth in net premium income during the period.

The life insurer had registered a net profit of ₹494.59 crore in the year-ago quarter. During Q2FY27, net premium income grew 8.17 per cent to ₹26, 877.70 crore (₹24,848.31 crore), according to a stock exchange filing.

The first-year premium rose 8.81 per cent to ₹5755.86 crore, whereas the renewal premium increased 12.57 per cent to ₹15,763.64 crore for the period under review.

Single premium, however, de-grew 3.38 per cent at ₹5,595.63 crore in the quarter. Expenses of management rose 11.89 per cent to ₹3,087.47 crore (₹2759.17 crore).

NEW BIZ MARGIN

Annualised Premium Equivalent grew 18 per cent to ₹11,750 crore for H1FY27, while Value of New Business (VoNB) rose 19 per cent to ₹3,270 crore. For H1FY27, the VoNB margin stood at 27.9 per cent (27.8 per cent).

> **First-year premium rose 8.81% to ₹5,755.86 crore,** while renewal premium increased 12.57% to ₹15,763.64 crore

The 13th-month persistency ratio rose to 87.6 per cent in H1FY27 (87.1 per cent), while the 61st-month persistency ratio fell to 58.7 per cent (60.6 per cent) during the period. During the earnings conference call with analysts and investors, Amit Jhingran, MD & CEO, SBI Life Insurance, said the recent IRDAI's consultation paper is a constructive step towards strengthening the insurance ecosystem, with a continued focus on policyholder interests, transparency and improved customer outcomes.

"A balanced and sustainable distribution ecosystem remains essential for expanding insurance awareness, deepening penetration, and advancing insurance for all by 2047," he said.

Rupee weighed down by strong dollar, high oil despite positive foreign inflows

Akhil Nallamuthu
bl. research bureau

The rupee depreciated 19 paise against the dollar over the past week and ended at 95.12 on Tuesday.

WEEKLY RUPEE VIEW.

It was weighed down by renewed strength in the greenback and elevated crude oil prices. However, foreign portfolio inflows provided some support to the local currency.

Foreign flows remained positive for the second consecutive week. According to NSDL data, net FPI inflows stood at about $510 million over the past week, bringing cumulative net outflows in October down to around $3.8 billion.

Meanwhile, heightened uncertainty has driven safe-haven demand for the dollar and US Treasuries. The dollar has resumed its upward movement after a brief correction. However, the US 10-year Treasury yield has declined to around 5 per cent from 5.37 per cent earlier this month.

Crude oil prices continue to remain elevated, posing a significant headwind for the rupee. Brent crude futures are currently trading around $111/barrel. Sustained high oil prices weigh on the Indian currency, given the country's dependence on crude imports.

Attention now turns to the US Federal Reserve's monetary policy decision on Wednesday. The central bank is widely expected to leave its benchmark interest rate unchanged at 3.75-4 per cent. However, the Fed's commentary on inflation and the future course of interest rates will be crucial in determining the dollar's direction.

AS PER THE CHART

The rupee has been declining over the past few sessions after facing resistance at 94.40. The local currency has now slipped below 95, indicating the possibility of further weakness.

The nearest support is at 95.60, where the 21- and 50-day moving averages are positioned. A breach of this level can drag the rupee further down to 95.80.

On the other hand, if the rupee recovers above 95, it can extend the rise to 94.40. A breakout above this resistance can lift the local currency to 94.20. A rally past this level could strengthen the bulls and potentially turn the trend bullish.

However, as it stands, a rally beyond 94.40 appears unlikely, given the renewed strength in the dollar. The dollar index, after witnessing a corrective decline, has resumed its uptrend on the back of support at 101.50. Currently trading at 102.20, the index faces resistance at 102.60.

A breakout above this level can lift the index to 103 and subsequently to 103.50, potentially putting further downward pressure on the rupee.

BEARISH OUTLOOK

The rupee is likely to retain a bearish bias, with renewed dollar strength potentially dragging the local currency towards 95.60-95.80. While positive foreign flows could provide some support, a sustained recovery appears unlikely unless the rupee breaks above 94.40.

Tata Power, BPCL ink deal for ₹250 cr power infra

Ahmedabad: Tata Power and Bharat Petroleum Corporation Ltd (BPCL) have signed a memorandum of understanding to develop ₹250 crore power infrastructure for BPCL's Petro Resid Fluidized Catalytic Cracking Unit project at its Mumbai refinery. Tata Power will provide the 110 kV connectivity and undertake the design and development of the associated power infrastructure. OUR BUREAU

Troovy raises ₹100 crore in Series B round

New Delhi: Snacks brand Troovy on Tuesday said it has raised ₹100 crore in a Series B round led by Fireside Ventures, with participation from Sharrp Ventures and other investors. The brand said the funds will go toward expanding R&D and manufacturing capacity, scaling distribution across quick commerce and offline channels. OUR BUREAU

Akasa Air shifts Jeddah flights to Navi Mumbai

Mumbai: Akasa Air will shift its Mumbai-Jeddah flights to Navi Mumbai Airport from December, the airline and the Adani Group said in a joint announcement on Tuesday. The move builds on Akasa Air's existing presence at the Navi Mumbai International Airport and will further strengthen international connectivity from the new airport. Separately, Akasa Air also announced the induction of its 45th Boeing 737 Max aircraft. OUR BUREAU

Delhi's BS-IV entry ban may disrupt NCR, warn traders

WINTER WOES. The restrictions will remain in force until January 31, 2027

Our Bureau
New Delhi

RELIEF FOR EVs. The ban will affect petrol and diesel vehicles registered outside Delhi that meet BS-IV or lower emission standards, while electric and CNG vehicles are exempt

Delhi's decision to ban vehicles registered outside the capital that do not meet BS-VI emission standards from entering the city between November 1, 2026, and January 31, 2027, could inconvenience thousands of daily commuters and create challenges for businesses dependent on workers, customers and commercial movement from neighbouring National Capital Region (NCR) cities.

The restriction will affect older petrol and diesel vehicles meeting BS-IV emission norms, unless specifically exempt, potentially disrupting daily travel and business operations across Gurugram, Faridabad, Noida, Greater Noida and Ghaziabad.

More than 10 lakh vehicles in these NCR areas could be affected, while electric and CNG vehicles are exempt from the entry ban.

The restriction, which will remain in force until January 31, 2027, is part of the Delhi government's winter pollution action plan.

RESIDENTS PREPARED

Anil Bharadwaj of the Federation of Indian Micro and Small & Medium Enterprises said residents of the NCR had increasingly begun preparing for winter restrictions, which have become a recurring feature of life in the region.

Bharadwaj said the growing availability of electric vehicles and other alternatives could help limit the disruption. However, he acknowledged that individuals who own BS-IV or older vehicles and cannot afford to replace them would face difficulties. "Because EVs have become quite popular and are easily available, I don't see any major issue," he said. "But some individuals will definitely be impacted."

Atul Bhardwaj of the New Delhi Traders Association, however, said the restrictions would have a direct bearing on both business activity and the daily movement of people into the capital. He acknowledged the pollution-control objective but questioned whether restricting vehicles based on emission standards, without adequately addressing the underlying sources of pollution, would be sufficient.

"There are two ways to look at it. One is the positive side, keep the pollution less, control. The other is the negative side, the business impacted," he said.

He argued that the government should identify the principal sources of pollution and target the vehicles that contribute to the problem, rather than relying solely on broad restrictions.

STRICTER CONTROLS

While supporting stricter controls on polluting vehicles, he said, the measures should be assessed for their effectiveness and their impact on people who rely on their cars to reach workplaces and conduct business.

"Let them try it for one week, 10 days. If it is successful, continue, and if it is not successful, then they should drop it," he said.

Delhi plans 200 GCCs, offering 6 lakh jobs

Press Trust of India
New Delhi

The Delhi government will work to set up over 200 global capability centres (GCCs) and train up to six lakh young people in digital skills, while aiming to digitise all notified government services and strengthen technology-driven governance, officials said on Tuesday.

The Information Technology (IT) Department of the Union Territory government has prepared a draft IT policy for 2026-2031, which will come into force after necessary approvals.

According to the draft, two dedicated innovation and technology districts will be established, with South Delhi, Dwarka and East Delhi identified as priority areas. These districts will serve as well-equipped hubs providing office space, labs, coworking facilities and other infrastructure for tech companies and start-ups.

Officials said the target is to develop at least one tech district during the five-year policy period.

PUBLIC SERVICE

A Delhi State Data Centre is also proposed to become operational by 2027, alongside a round-the-clock cybersecurity monitoring centre. AI and predictive analytics would be used in areas such as traffic management, pollution monitoring, public health forecasting and fraud detection.

The draft proposes four dedicated funds, including annual allocations of ₹5 crore each for GCC facilitation, emerging technology and skills development, and ₹10 crore for GovTech innovation, subject to budgetary allocation and concurrence of the Finance Department.

By offering financial incentives to tech companies, the draft policy seeks to make Delhi a major hub for IT investment, start-ups, and emerging technologies.

Nifty50 among worst-performing global benchmarks in 2026 so far

Sourashis Banerjee
Chennai

India's benchmark index Nifty50 has underperformed most major global benchmarks in 2026, even as its valuations have corrected sharply since December. The Nifty50 has declined 13.1 per cent year-to-date as of October 26, placing it among the weakest-performing benchmark indices.

DATA FOCUS.

Meanwhile, the rupee has depreciated 5.6 per cent against the US dollar, adding to the pressure on dollar-based investors.

The divergence between Indian and global markets is quite pronounced. Taiwan's TWSE has gained 59 per cent year-to-date, followed by South Korea's Kospi at 29.8 per cent and Brazil's Ibovespa at 27.3 per cent. Japan's Nikkei has risen 23.5 per cent, while the US S&P 500 has advanced 11.4 per cent. Only Indonesia's JCI, down 38 per cent, has performed worse than the Nifty.

The AI-led rally in East Asian markets has attracted capital towards Taiwan and South Korea while higher US treasury yields make dollar-denominated assets more competitive as well. "The common factor is FPI selling affecting indices and currency. Earnings have only improved recently," said Madan Sabnavis, Chief Economist at Bank of Baroda.

EXPENSIVE INDIA

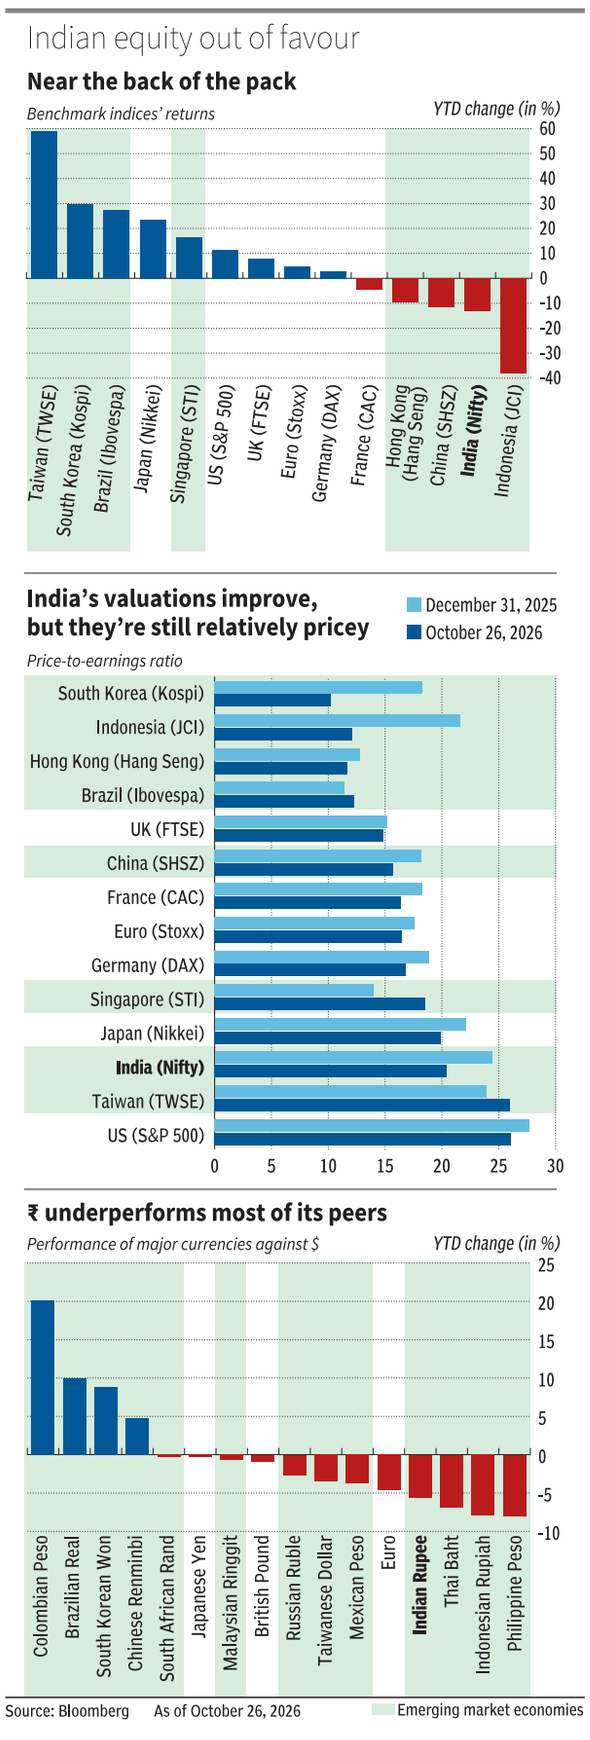

The Nifty50's price-to-earnings (P-E) ratio fell to 20.4 on October 26 from 24.45 on December 31, 2025. The correction has narrowed India's valuation premium, but has not eliminated it.

India's P-E ratio is now a tad higher than Japan's Nikkei at 19.9 and trails only Taiwan and the US, which remain more expensive. A lower P-E ratio doesn't automatically make a market attractive, as investors also weigh growth prospects and returns available elsewhere. Nevertheless, India's valuation correction could improve its appeal.

RUPEE DEPRECIATION

The currency data add another dimension to India's underperformance. The rupee has depreciated 5.58 per cent against the dollar year-to-date, placing it among the weaker currencies, performing only better than heavily import-dependent emerging economies like Thailand, the Philippines and Indonesia.

Chintan Hefa, Executive Director at Grant Thornton Bharat, said: "FPIs have net sold about ₹3.1 lakh crore from Indian equities till October 23, while crude remains elevated," intensifying pressures. By contrast, the Colombian peso appreciated 20.1 per cent, the Brazilian real 10 per cent, the South Korean won 8.8 per cent and the Chinese renminbi 4.8 per cent.

JLR plans four EV models in India, cuts Defender prices by ₹34 lakh

Amit Vijay Mohile
Mumbai

Tata Motors-owned Jaguar Land Rover (JLR) is preparing for a bigger India expansion, with scope to increase production beyond its estimated annual capacity of 12,000 vehicles at Pune, an electric vehicle portfolio that could grow to four models, and potential opportunities under the India-UK free trade agreement.

The strategy comes as JLR begins local assembly of its iconic Defender, cutting prices by as much as ₹34 lakh, or 22.4 per cent, and bringing the luxury SUV back below ₹1 crore six years after its India debut.

The move follows cumulative sales of more than 9,000 Defenders over roughly three-and-a-half years, giving JLR an established customer base as it seeks to translate demand for imported luxury SUVs into higher locally assembled volumes.

Rajan Amba, Managing Director, JLR India, speaking to the media on Tuesday on the sidelines of the launch of the locally-assembled Defender, said the company's Pune manufacturing capacity was expandable, providing scope for higher production as demand grows.

Rajan Amba, Managing Director, JLR India

He said JLR had priced the Defender in a manner that "does justice to the brand" while creating "a bit more accessibility" for Indian customers.

However, he did not announce additional production volumes or fresh investment.

The Defender 110's 3.0-litre petrol and diesel X-Dynamic HSE variants now cost ₹1.18 crore against ₹1.52 crore for comparably equipped imported versions, a reduction of 22.4 per cent.

The 2.0-litre petrol variant costs ₹99 lakh against ₹1.135 crore earlier, a reduction of 12.8 per cent. The Defender originally entered India in October 2020 at prices starting below ₹80 lakh, before subsequent changes to its model range and pricing.

JLR has also made 29 previously optional features, worth ₹17 lakh, standard on the locally-assembled 3.0-litre variants, including electronic air suspension, a head-up display, premium seating and a Meridian surround sound system.

The imported 3.0-litre model's base price was ₹1.35 crore, rising to ₹1.52 crore with these options. The locally-assembled version costs ₹1.18 crore with the equipment included. The 2.0-litre variant gains 17 standard features previously valued at ₹6.5 lakh.

FOUR-EV EXPANSION

JLR is also preparing to widen its electric vehicle portfolio in India, with Amba indicating that the line-up could eventually comprise four models.

He referred to the upcoming Range Rover Electric, with an India launch indicated around the second quarter of 2027. The company has not confirmed the complete four-model line-up or the import arrangements for these vehicles.

The India-UK free trade agreement could eventually improve the economics of importing qualifying British-built luxury vehicles through phased tariff reductions, potentially allowing JLR to introduce more specialised models at competitive prices.

However, Amba cautioned against expecting immediate benefits. "We'll have to evaluate based on the final details," he said.

Amazon India to expand EV fleet to more than 20,000 by next year

S Ronendra Singh
New Delhi

Amazon India plans to expand its fleet size to more than 20,000 vehicles by next year from around 15,000 right now, for transportation of products across the country and most of them will be electric vehicles (EVs) — from two-wheelers to small commercial vehicles to bigger trucks — a top official said on Tuesday.

The increase in its fleet size would support the movement of customer shipments between facilities, across cities and along national freight corridors, Abhinav Singh, Vice-President, Operations – India, APAC and MEA, Amazon, told *businessline*.

Abhinav Singh, Vice President, Operations – India, APAC and MEA, Amazon

MAJOR TAILWIND

"It's a continuous journey where we are looking to accelerate the electric vehicle fleet. The government schemes are a tailwind... so you'll find a very large percentage of our fleet moving to electric," Singh said.

The company is also using vehicles run on bio-diesel and railways, as a significant double-digit percentage, as part of its logistics, he said.

"In 2020, we announced that we wanted 10,000 electric vehicles in our fleet by 2025. We worked with original equipment manufacturers (OEMs) across-the-board... all sizes of OEMs, and we were able to build that fleet one year ahead of goal. So, we were able to get 10,000 EVs in our fleet by 2024. Today, we have over 15,000 EVs in our fleet, across the country in over 500 cities," Singh said.

The company on Tuesday partnered with Tata Motors to deploy 3,000 electric trucks in the next three years.

The next phase will see the deployment expand to major national highways, spanning seven States and connecting six of the country's largest e-commerce regions, he said.

The company also has partnered with other OEMs such as Ashok Leyland, Mahindra & Mahindra, Kinetic Green, Altigreen, etc.

Reckitt sees double-digit growth in India business during Sept quarter

Meenakshi Verma Ambwani
New Delhi

Consumer products major Reckitt on Tuesday said its India business grew in double digits in Q3 CY2026, supported by broad-based growth momentum across categories.

"India maintained strong momentum, with double-digit growth and broad category expansion. Our AI-enabled sales transformation is continuing to enhance our execution in the market," the company said in its earnings call.

STOCK DEPLETION

"The prior-year period was impacted by GST-related stock depletion, creating a favourable lap which is expected to unwind in Q4," it added. On the earning call talking about the performance of emerging markets, Kris Licht, CEO, Reckitt said, "South Asia and India, Asean and Africa all grew double-digits, with Latin America and China growing mid-single digit... We are accelerating growth across categories and into new markets to complement the strength of our businesses in China and India."

The consumer products major said that Harpic delivered double-digit growth in Q3 CY2026 supported by continued strength across emerging markets, including India.

The company said Dettol delivered double-digit growth in emerging markets, with innovation supporting continued expansion into new segments and markets.

As part of the focus on expanding the brand into new markets and segment, the company launched washing machine cleaner and Dettol Activ Botany in India.

Activ Botany is a plant-derived hygiene and disinfectant range.

Emerging markets, which account for 44 per cent of Reckitt's core revenue, reported like-for-like net revenue growth of 8 per cent in the quarter under review.

Speciality Restaurants plans ₹200 cr expansion, targets 200 outlets by FY30

Amit Vijay Mohile
Mumbai

Speciality Restaurants Ltd, the NSE- and BSE-listed operator of Mainland China and Oh! Calcutta, plans to invest ₹200 crore over four years to expand its network from about 120 outlets to 200 by FY30, targeting annual revenue growth of 20 per cent against 9.2 per cent in FY26 by concentrating on fewer brands and improving restaurant profitability.

The internally-funded expansion will prioritise Asian, Italian and quick-service restaurants, with a four-year payback target for new investments. The strategy marks a departure from developing numerous restaurant concepts towards scaling established brands.

"We were opening too many brands rather than focusing on and expanding brands," Chief Executive Officer Avik Chatterjee told *businessline*.

The rethink followed the pandemic, when the company closed 32 outlets, exposing the operational challenges of managing an extensive brand portfolio.

Avik Chatterjee, CEO, Speciality Restaurants

For the financial year ended March 2026, consolidated profit attributable to shareholders declined from ₹21.97 crore to ₹20.72 crore, a decrease of 5.7 per cent, while revenue from operations increased from ₹436.25 crore to ₹476.47 crore, a rise of 9.2 per cent.

Gross margin improved from 69.5 per cent to 70.7 per cent, an increase of 120 basis points. Same-store sales growth accelerated from 2.4 per cent in FY26 to 11.35 per cent in the April-June 2026 quarter.

TWEAKS LIFT SALES

Chatterjee's 20 per cent annual growth ambition implies revenue of approximately ₹988 crore by FY30 if compounded over four years from the FY26 base of ₹476.47 crore.

Three refurbished Mainland China restaurants recorded revenue increases of approximately 35 per cent following renovation, Chatterjee said, achieving EBITDA margins of 22-25 per cent at those locations. The results are encouraging management to upgrade existing restaurants alongside opening new outlets, rather than relying exclusively on network expansion.

The company envisages around 10 new full-service restaurants annually, with approximately 60 per cent Oriental and 40 per cent Italian formats, alongside quick-service expansion.

Siciliana, its Italian concept, operates four restaurants, with another four planned. Walters, its gourmet burger brand, has four physical outlets and a dark-kitchen presence.

Oh! Calcutta's eight restaurants are undergoing repositioning rather than aggressive expansion.

"We're going to be adding around 20 to 25 new restaurants per year," Chatterjee said.

New privacy law will 'shut down news rooms, usher in an era of censorship'

PRESS FREEDOM AT RISK. SC issues notice to Centre after publishers seek stay on DPDP Act, DPDP Rules

Krishnadas Rajagopal
New Delhi

The Digital News Publishers Association (DNPA), a group of 21 publishers from across the media spectrum said the Central government's new privacy law will "shut down news rooms and usher in an era of censorship".

The DNPA, which represents 22 media publishers including The Hindu Publishing (P) Ltd., urged a Bench, headed by Chief Justice of India Surya Kant, to issue notice to the Union government on their plea for a stay of the Digital Personal Data Protection Act, 2023, and the Digital Personal Data Protection Rules, 2025.

The Supreme Court issued notice to the Centre and listed the case for detailed hearing on November 17.

"We cannot pass *ex parte* orders of stay," Chief Justice Kant said.

PROTECTING RIGHTS. The CJI welcomed suggestions from the DNPA on how to balance the rights of innocent citizens against the misuse of press freedom by the media REUTERS

Senior advocate Madhavi Divan and advocate Anuj Tiwari, appearing for the DNPA, said that the association was not asking for a stay but wanted the Centre to address the court on their plea for an interim stay of the privacy law. "If I (publishers) are left to the mercy of the data principal [the individual to whom the personal data relates to] is also empowered to exercise control over the personal data, it will close down news rooms... They are changing the very concept of news," Divan submitted.

SUGGESTIONS

The CJI welcomed suggestions from the DNPA on how to balance the rights of innocent citizens against the misuse of press freedom by the media while protecting the latter's right to disseminate information to the public.

"You (DNPA) are the best person to tell us... How do we ensure that a balance is struck?" Chief Justice Kant addressed Divan.

The senior counsel said the privacy law was not meant for journalists at all. The very objectives of the law did not intend to fetter journalistic freedom exercised by traditional and recognised media houses, who were already regulated by bodies like the Press Council of India.

FUNDAMENTAL RIGHT

"If we report inaccurately, we will suffer... Now they are saying we have to ask them before publishing?" Divan challenged.

The DNPA has argued that the law was completely in contravention with the law laid down by the Supreme Court in its privacy judgment, which held the right inviolable and fundamental to human dignity and life.

"They impermissibly restrict the fundamental right to information and freedom of speech and expression," the petition said.

The law "failed to provide any exemption in favour of journalistic activity as a distinct class of processing, entitled to constitutional protection under Article 14 and 19(1)(a) of the Constitution of India and threaten the full spectrum of journalistic activity carried out by journalists, ground reporters, citizens, whistleblowers, RTI activists, and other stakeholders, and strikes at the core of our democratic framework and runs contrary to the basic tenets of the Constitution of India".

COMPELLED ERASURE

It said that publishers, editors, reporters and correspondents were, as a consequence of the law, brought within a regime of notice and prior consent, compelled erasure, and verifiable consent.

"Such a power is capable of being turned to the identification and targeting of journalistic sources and is thus constitutionally infirm," the petition said.

Voluntary buyouts offer big tech firms alternative to layoffs

Sanjana B
Bengaluru

Microsoft has introduced a voluntary exit offer for eligible employees in India and three other countries, signalling how technology companies are using buyouts to reshape their workforces amid shifting business priorities and rising investments in AI.

In a communication shared across Microsoft by Amy Coleman, Executive Vice-President and Chief People Officer on Monday, the voluntary exit offer is for eligible employees considering a future outside the company.

It builds on lessons from the voluntary retirement programme earlier this year.

The time-limited voluntary exit programme will cover eligible employees at level 70 and below in participating teams across Canada, India, the UK and the US, offering financial support and career planning resources.

DIFFERENT GROWTH

Big Tech hired aggressively for a different growth cycle, explained Madhu Peravalli, Founder & CEO, Troogue.ai. These priorities are changing, with companies questioning whether their structures are as efficient as they should be.

"Buyouts offer a relatively graceful way to reset costs, remove unnecessary layers, and redirect investments. I wouldn't see this as a crisis. The interesting risk is your best people may be the first to accept since they probably have more options," he said.

Shailesh Khanna, Business Lead, ManpowerGroup India, said buyout offers are generally not just cost-cutting exercises. At Microsoft and Google, buyouts are increasingly being used as a workforce-shaping tool during the AI transition.

Factors driving these buyouts include funding massive AI investments, shifting skills, and increasing productivity expectations through AI.

"Both Microsoft and Google are spending unprecedented amounts on AI infrastructure and model development. Microsoft said it expects roughly $175 billion in AI-related capital expenditure in 2026, while expanding infrastructure for services supporting OpenAI, Anthropic, Copilot, Azure AI, and other workloads. Google has similarly been under pressure to fund AI investments while improving efficiency and maintaining profitability," he noted.

DIGNIFIED RUNWAY

Buyouts are also attractive as they reduce legal and reputational risks, minimise the impact on employee morale, offer severance and benefits to departing workers, and enable voluntary attrition before forced layoffs become necessary.

Layoffs provide immediate, abrupt cost reductions, whereas voluntary exit programmes require an initial severance outlay.

However, buyouts offer long-term cost optimisation with significantly lower operational friction and minimal impact on employer brand equity.

India needs resilient chip supplies to climb the value ladder

Our Bureau
Chennai

India's semiconductor success will not be defined solely by chip design but by building resilient supply chains that include everything from fabrication, packaging and testing to manufacturing high-tech equipment, critical materials and gases, industry stakeholders said at the Semiconductor Summit 2026 organised by *The Hindu* and SRM Institute of Science and Technology (SRMIST).

The executives suggested that India's investments in outsourced semiconductor assembly and testing and boutique fabs are a step in the right direction and could serve as the starting point for building a wider manufacturing ecosystem to move up the value chain.

OPPORTUNITIES

Kamaljeet Singh, Director General, Semiconductor Laboratory, Mohali, Ministry of Electronics and Information Technology (MeitY) in his keynote address, highlighted quantum tech, photonics and the heterogeneous integration of various kinds of AI chips as future high-potential areas that India can begin to focus on to leapfrog competition.

(From left) LV Navaneeth, CEO, The Hindu Group; Kamaljeet Singh, DG, Semi-Conductor Laboratory; Michael Hasper, Consul General of Germany; and C Muthamizhchelvan, Vice-Chancellor, SRM Institute of Science & Technology; at the inaugural session

While government support with capital and resources will be critical to catalyse the industry today, Kaul argued that, over the long term, companies need to become financially sustainable.

Sharath Kaul, Consultant and India Representative at the International Electronics Manufacturing Initiative, gave advanced packaging as an example of such a frontier technology. "The existing OSATs, although they may not be advanced packaging today, they all have it on the roadmap," he said.

On challenges, stakeholders flagged a significant gap between current academic training and the capabilities the industry requires.

"The students who come to me today are not industry-ready. We need changes in our curriculum to prepare graduates for the semiconductor industry," Sandeep Garg, CEO and Board Member, Indichip Semiconductors, said. C Muthamizhchelvan, Vice-Chancellor, SRMIST, advocated more industry-academic partnerships, while Michael Hasper, Consul General of the Federal Republic of Germany, called for cross-border collaboration.

"You look at countries who are leading the semiconductor industry today. Taiwan did not start with a grand company but with a research laboratory called Industrial Technology Research Institute (ITRI). The outcomes from ITRI gave rise to what is today TSMC," Muthamizhchelvan said.

Setco Automotive swings to ₹203.61 crore profit, plans Lava Cast merger to cut costs

Amit Vijay Mohile
Mumbai

Setco Automotive, a tier-1 component manufacturer historically known for supplying heavy-duty clutches to commercial vehicle makers including Tata Motors, Ashok Leyland and BharatBenz, reported a sharp turnaround in its April-June 2026 earnings, which were approved by its board on October 23, nearly four months after the quarter ended.

The results, released after the July-September quarter had already closed, coincided with the company's decision to merge its loss-making casting subsidiary, Lava Cast, into the listed entity to reduce costs and streamline operations. Consolidated net profit attributable to shareholders swung from a loss of ₹34.92 crore in April-June 2025 to a profit of ₹203.61 crore in April-June 2026, a positive swing of ₹238.53 crore.

Consolidated revenue from operations increased from ₹47.12 crore to ₹52.90 crore over the same period, a year-on-year increase of 12.3 per cent.

COST SAVINGS

Setco's board approved the revised merger proposal on October 23, under which wholly-owned Lava Cast, a manufacturer of casting components for commercial and passenger vehicles, would be absorbed into the listed company.

Lava Cast recorded turnover of ₹87.78 crore in FY26 and negative net worth of ₹136.71 crore as of March 31, 2026. The merger aims to eliminate overlapping management functions and reduce accounting, auditing, compliance and tax-filing requirements, delivering what Setco describes as a "consequential reduction in administrative costs".

◉ TRIMMING EXPENSES

The merger aims to eliminate overlapping management functions and reduce accounting, auditing and tax-filing requirements

Standalone net profit increased from ₹0.99 crore to ₹205.30 crore while revenue from operations declined from ₹0.38 crore to nil.

Other income included a ₹214.28 crore investment gain and ₹2.25 crore in non-compete income, indicating that the earnings surge was driven principally by non-operating income.

Consolidated material costs increased from ₹20.12 crore to ₹27.95 crore, a year-on-year increase of 38.9 per cent, while employee expenses rose from ₹10.58 crore to ₹19.49 crore, an increase of 84.2 per cent. Finance costs declined from ₹2.34 crore to ₹1.82 crore, a decrease of 22.2 per cent.

Lava Cast's quarterly loss narrowed from ₹4.40 crore to ₹2.35 crore, a reduction of 46.6 per cent, although its negative net worth widened from ₹107.02 crore in June 2025 to ₹139.06 crore in June 2026.

DGCA proposes changes to MRO approval framework to cover electric aircraft engines

Our Bureau
New Delhi

The civil aviation safety regulator has proposed changes to its approval framework for aircraft maintenance and repair firms to cover electric engines and components used in newer aircraft systems.

In a notice dated October 26, the Directorate General of Civil Aviation (DGCA) invited comments by November 1 on proposed changes to its Civil Aviation Requirements (CAR)-145, which govern the approval of aircraft maintenance organisations.

Under the proposal, maintenance, repair and overhaul (MRO) firms servicing electric engines that power aircraft propellers or rotors would be covered under a specific engine maintenance approval category, designated B4.

The proposed category would cover engines outside the existing classifications for turbine engines, piston engines and auxiliary power units.

COMPONENT APPROVAL

Accordingly, the draft specifies that electric engines used to generate aircraft thrust or lift should come under B4 rather than the component category covering electrical power and lights.

The proposed changes would provide a clearer classification for firms seeking approval to maintain such propulsion equipment.

Besides, the draft introduces a component approval category, designated C23 'Others', for equipment that does not fit the existing classifications.

Furthermore, components used in innovative aircraft designs and systems could be covered under this category where the existing categories or their corresponding technical chapters are inadequate.

SAFETY REPORTING

Meanwhile, CAR-145 lays down requirements covering maintenance facilities, personnel, tools, equipment, procedures and safety systems.

Separately, the draft adds guidance on sharing relevant safety-related occurrence reports with the design approval holder of an aircraft or component.

CLEARER INSTRUCTION

Such sharing, said the draft proposal, is intended to help the design approval holder issue appropriate service instructions and recommendations to the relevant parties.

Additionally, the proposal recommends coordination with the design approval holder to determine whether existing or proposed service information would resolve a reported problem or whether a specific solution is required.

Digi Yatra international passenger trials to begin at seven airports on Nov 1

Our Bureau
New Delhi

Digi Yatra's international passenger trials will go live at seven Indian airports from November 1, allowing eligible Indian nationals holding e-passports to use the platform on overseas flights operated by Air India and IndiGo. According to the Digi Yatra Foundation, the programme covers the Delhi, Bengaluru, Hyderabad, Kochi, Mumbai, Chennai and Amritsar airports.

The trial period runs from November to December 2026, with the beta programme currently underway before wider rollout in 2027.

KEY REQUIREMENTS

The foundation said eligible passengers will be able to use Digi Yatra at enabled touch points, including terminal entry, the security hold area (SHA) and boarding gates, subject to infrastructure availability.

Notably, these trials will cover all international destinations served by Air India and select destinations operated by IndiGo.

To participate, the foundation cited that the passengers will need to create e-passport-based digital credentials through the Digi Yatra application.

The process involves scanning the passport's 'machine readable zone', reading its embedded chip using a compatible smartphone's 'near field communication' capability, capturing a selfie and verifying the details.

Once created, the credentials will be stored in the passenger's Digi Yatra wallet.

However, it said passengers must continue to carry their travel documents and complete mandatory airline checks.

Hitachi India R&D eyes energy trading, space autonomy for next growth phase

bl.interview

Aishwarya Kumar
Bengaluru

Hitachi India R&D eyes space autonomy and energy trading as the next frontiers of growth. The R&D centre is expanding its research into areas where AI must operate beyond the cloud, from autonomous space systems to intelligent power grids.

Kingshuk Banerjee, Director-Research and Development, Hitachi India, said the 40-member centre is working on peer-to-peer energy trading, grid stabilisation, cybersecurity for connected energy equipment, and AI-led data-centre cooling.

Edited excerpts:

> We are working on peer-to-peer energy trading, grid stabilisation and cybersecurity for remotely controlled energy equipment such as remote terminal units
>
> **KINGSHUK BANERJEE**
> Director-R&D, Hitachi India

Which areas lead the work at Hitachi India R&D? Is AI the largest focus?

AI and digital engineering form a horizontal layer across our portfolio. Energy and mobility still depend on strong electrical, mechanical, and electronics engineering, but embedded intelligence determines how useful and differentiated the final system becomes.

We, therefore, embed AI in our devices and systems across all of Hitachi's three major areas: energy, mobility and industrial, and cover a wide spectrum such as power equipment, rail systems, elevators, data centres and space technology. We also contribute to the digital systems and services layer, particularly fintech and payments.

How is AI changing researchers' productivity?

A prototype that once took three months can now, in some cases, be assembled in a few hours with coding assistance. That does not make the researcher unnecessary. It allows the researcher to test more ideas and spend more time thinking. The expectation, therefore, shifts from routine implementation towards deeper knowledge, imagination and innovation.

Our caution in hiring is not driven by fear of AI; it reflects Hitachi's approach of thoroughly understanding an area before scaling it.

What kind of fintech research is the centre undertaking?

We are working on agentic and frictionless payments.

A payment involves multiple activities, including customer identity checks, counterparty validation, and transaction processing. The aim is to make these interactions simpler and more proactive. This is especially important when a payment takes place through a third-party device.

The system should understand local languages, pronunciation and regional accents. The challenge is to shrink the necessary intelligence into a compact model that can run on a small device or chip.

How much of this work has reached commercial use?

Some technologies have been commercialised, while others are moving towards commercialisation. In fintech, Hitachi works with Indian banks on dispute management, customer and merchant understanding, transaction relevance and proactive assistance.

Our process typically begins with a seed idea, proof of concept and proof of technology.

Where do you expect the next wave of innovation?

Energy is one of the most important areas. India's electricity demand will continue to grow exponentially, particularly as data centres expand.

We are working on peer-to-peer energy trading, grid stabilisation and cybersecurity for remotely controlled energy equipment such as remote terminal units (RTU).

Is Hitachi India R&D also working on space technology?

Most of Hitachi's space research is based in Japan, but the India team has begun supporting selected initiatives. Space systems face strict constraints on energy, bandwidth, and computing capacity. They, therefore, need compact systems, embedded intelligence, and a high degree of autonomy.

An onboard system may need to navigate, make decisions or conduct experiments without consulting ground stations. Our space research primarily relates to AI and autonomy.

What guardrails are needed when AI is used in space?

Safety and intent preservation come first. An autonomous system must operate within its intended purpose for which it was launched and must not take unsafe or hostile action.

BENGALURU
businessline.
WEDNESDAY - OCTOBER 28 - 2026

QUICKLY.

Gold retreats on stronger $, traders brace for Fed

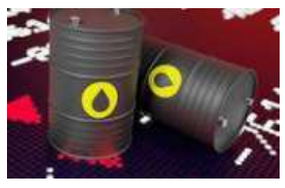

Gold prices fell on Tuesday as a stronger dollar weighed on bullion, while investors awaited the US Fed's policy meeting for clues on the interest rate outlook. Spot gold dropped 0.4 per cent to $4,000.52 per ounce by 1042 GMT. US gold futures for December delivery fell 0.6 per cent to $4,014.40. Silver fell 1.3 per cent to $53.23, and platinum lost 1.7 per cent to $1,501.30. Palladium ceded 2.9 per cent to $1,019.50. REUTERS

Copper climbs as China demand rebounds

Copper rose as sentiment around AI stocks recovered and demand strengthened in top consumer China, although a firmer dollar capped gains. Benchmark three-month copper on the LME was up 0.7 per cent at $14,430 a tonne. Aluminium advanced by 0.7 per cent to $3,062. REUTERS

Crude oil slips as peace talks ease supply fears

Crude oil prices edged lower, falling about one per cent, as prospects for a resolution of the US-Israeli war on Iran kept supply fears at bay with talks in Tehran. Brent crude futures were down $1 at $114.81 a barrel by 0418 GMT, while US WTI crude was down 88 cents at $100.88. REUTERS

From maize to coffee, El Nino to hit various crops globally

RISING THREAT. The ongoing weather event is likely to raise the risk of droughts, which increased by 11-12 percentage points in the past, say experts

Subramani Ra Mancombu
Chennai

With various global organisations predicting that the evolving El Nino could be one of the severest, the weather event could impact various crops across the world, from maize and rice to coffee to palm oil.

"This El Nino is likely to raise drought risk to cropland, most in Southern Africa, Central America, northern South America and South-East Asia, threatening maize, rice, sugar, palm oil and coffee output," said research agency BMI, a unit of Fitch Solutions.

In past El Ninos, the share of cropland exposed to high-intensity drought rose by 11-12 percentage points on average across these regions, with Zambia, Zimbabwe, Central America's Dry Corridor, the Philippines, Thailand, Guyana and Suriname among the hardest hit.

FOOD SECURITY RISKS

The Food and Agriculture Organisation (FAO), an arm of the United Nations, said El Nino disrupts global weather patterns, increasing risks to food security, agriculture and rural livelihoods.

"The El Nino phase is likely to cause severe disruptions for millions of farmers and food producers in regions already affected by climate extremes and economic shocks, such as rising fuel and fertilizer prices linked to the Strait of Hormuz crisis," it said in June.

"The 2026-27 El Nino, which developed mid-2026 and is projected to strengthen significantly into early 2027, is causing major disruptions to global agricultural production and forecasts," said the US Department of Agriculture (USDA).

SHRIVELLED HOPES. A farmer shows beans, to be grown alongside his corn crop despite the prolonged dry conditions, in El Salvador. The Salvadoran Assembly declared a state of national emergency earlier this month due to the effects of El Nino REUTERS

The USDA sees the weather event affecting India, Kenya, Brazil, the US, Thailand, Indonesia and Australia, among others.

SOUTH-EAST ASIA WOES

BMI said that in southern Africa, the risk centres around white maize, the region's main staple.

In the Dry Corridor, subsistence maize and beans, as well as coffee, are exposed, threatening rural incomes and food security in some of the region's poorest communities.

In South-East Asia, drought puts rice, Thai sugar, Indonesian and Malaysian palm oil and Vietnamese robusta at risk, and the region faces the largest population impact, with around 90 million more people exposed to drought on average in the past events, it said.

Rebuilt maize stocks should limit food inflation risks in Southern Africa this season.

South-East Asia's domestic buffers are thinner, placing supplies of rice, palm oil and coffee at higher risk. However, well-stocked global rice markets limit the risk of a repeat of the 2023-24 price spike.

"Rice stocks have fallen below 2023 levels in Thailand, Vietnam and the Philippines, leaving Manila, which imports around a third of its rice, most exposed to higher prices," said BMI.

INDIA TO THE RESCUE?

Indonesia's palm oil and Vietnam's robusta coffee stocks are also thin, at 9 per cent and 2 per cent of use.

"The global backdrop is more reassuring. India, now accounting for 39 per cent of world rice exports, holds record stocks equal to 47 per cent of consumption, against 30 per cent before 2023-24. That makes a repeat of the pre-emptive export curbs that drove the 2023-24 rice price spike less likely, while Thailand's ample sugar stocks should sustain exports," it said.

The USDA said India is experiencing a regional monsoon patchwork with significant shortfalls in the eastern, north-eastern, southern and north-western parts, impacting wheat, rice and sugarcane crops.

Thailand will likely experience lower sugarcane yields and reduced sugar extraction due to El Nino-linked rainfall deficits. At the same time, Indonesia and Malaysia face heightened drought and dry conditions in major palm oil-producing regions, such as Sumatra and Kalimantan in Indonesia, it said.

BMI said drought-driven food inflation is the main economic risk this season, squeezing household incomes and complicating monetary policy in exposed markets.

El Nino ramping up into a 'very strong' weather event as index hits 18-year high

Srikrishnan PC
Chennai

El Nino conditions are ramping up, with a strong to very strong event likely to continue through January to March 2027, with a greater than 83 per cent chance. A positive Indian Ocean Dipole (IOD) is underway, according to global weather agencies.

According to the Climate Prediction Center (CPC) of the US, an arm of the National Oceanic and Atmospheric Administration (NOAA), above-average sea surface temperatures across the central and eastern Pacific indicate the potential for significant climate impact in the coming months.

Australia's Bureau of Meteorology (BoM) said the weekly relative Nino3.4 index reached a record +2.88 °C for the week ending October 25, the highest value in the bureau's weekly sea surface temperature (SST) dataset, which dates from 2008.

"A positive IOD event is underway. The IOD index has exceeded the positive IOD threshold (greater than or equal to +0.4 °C) for seven consecutive weeks, reaching +0.69 °C for the week ending October 25, 2026, with positive values forecast to continue," the Bureau of Meteorology said in its latest update on Southern Hemisphere monitoring.

EL NINO SIGNALS

The CPC said the atmospheric circulation anomalies over the equatorial Pacific Ocean were consistent with El Nino. During the past four weeks, much of the world's oceans have seen above-average sea surface temperatures (SSTs).

The Australian weather body said all models, including the bureau's, forecast the warming in the tropical Pacific to peak around November or December, and remain above El Nino thresholds into autumn 2027.

"Relative Nino3.4 values are forecast to exceed the highest levels observed since reliable records began in 1950," it said, reiterating the observation of organisations such as the World Meteorological Organization.

WARMING WATERS

The US report said that for the past two months, subsurface temperatures had been above average in the east-central and eastern Pacific Ocean. El Nino is expected to remain through March-May 2027. ENSO neutral is favoured during April-June and May-July 2027, the CPC said.

BoM said the positive IOD is likely to continue through November, with a return to neutral in early summer (December–February). This is consistent with all international models assessed and the typical IOD life cycle, its report added.

Cyclone Arnab strengthens, develops a sharply defined eye

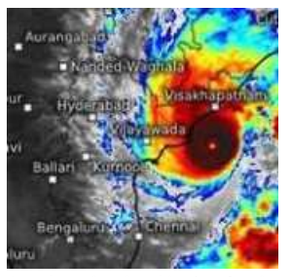

Vinson Kurian
Thiruvananthapuram

The India Meteorological Department (IMD) has raised the forecast wind speed of very severe cyclone Arnab at landfall on Wednesday to 125-135 kmph, gusting to 150 kmph, from 115-125 kmph, gusting to 140 kmph. Global models tracking the cyclone showed a well-organised storm with a clearly defined eye as it continued to intensify off the Andhra Pradesh coast.

The IMD said Arnab was centred about 170 km south-southeast of Visakhapatnam at 11.30 am on Tuesday.

LANDFALL TODAY

The cyclone is likely to move northwestward and cross the Andhra Pradesh and Yanam coasts between Bapatla and Visakhapatnam, close to Yanam, by Wednesday forenoon as a very severe cyclonic storm, with maximum sustained winds of 125-135 kmph, gusting to 150 kmph.

Arnab maintained its 'eye' as it struck a menacing pause close to the Andhra Pradesh coast

Winds are expected to peak at 150-160 kmph, gusting to 180 kmph, on Tuesday evening before easing to 135-145 kmph, gusting to 160 kmph, ahead of landfall.

Heavy to extremely heavy rainfall warnings are in place for parts of Andhra Pradesh, Odisha and Chhattisgarh.

WELL-DEFINED EYE

Arnab showed signs of further intensification on Monday night, developing a 'pinpoint eye' — an exceptionally small, sharply defined feature visible in satellite imagery.

A well-defined eye can indicate a mature, tightly organised cyclone, with a strong pressure gradient and powerful winds around the eyewall.

Threat of rain in Uttar Pradesh this week may tighten sugar supplies in November

Prabhudatta Mishra
New Delhi

Efforts to meet the domestic sugar demand amid low stockpiles could face a setback as the rain forecast in Uttar Pradesh, the country's largest sugarcane producer, threatens to delay cane harvesting and disrupt crushing operations. This could put Maharashtra mills under greater pressure to bridge the supply gap in November.

Domestic sugar demand for November is estimated at 23 lakh tonnes (lt), against an expected carryover stock of just 15 lt at the end of October.

According to the Indian Sugar & Bio-Energy Manufacturers Association (ISMA), the closing stock at the end of the 2025–26 sugar season on September 30 stood about 36 lt, providing a base to meet domestic consumption requirements this season.

Meanwhile, 107 mills across the country, including 87 in Maharashtra, have begun crushing operations and produced about 4 lt of sugar, compared with around 0.6 lt a year ago.

Industry sources estimate that another 2 lt of sugar could be produced by the end of October, taking the month's output to about 6 lt. The government had allocated 27 lt to mills for domestic sales in October.

Assuming that the entire quota is sold amid festival demand, only about 15 lt of sugar may be available for November, experts said.

The government would then have to rely almost entirely on fresh production to meet demand.

IMPORT QUOTA

With prices rising, some imported sugar that was earlier unviable for domestic sale because of higher landed cost could find buyers. The government had permitted two refiners to sell 2.65 lt of imported sugar in the domestic market, but they managed to sell less than 60,000 tonnes.

Normally, opening stocks exceed demand during October-November as crushing gathers pace after the first week of November. However, with supplies tightening, the government has been urging mills to begin crushing in October. Several mills in western Uttar Pradesh planned to start operations around October 20, but rain delayed the process. Farmers have been unable to harvest cane, while mills have been reluctant to procure it because of high moisture content.

HEAVY RAIN FORECAST

According to the Bharat Forecast System, developed by the India Meteorological Department, several districts in western and central Uttar Pradesh could receive up to 20 mm rain, while some districts in the eastern region may get up to 40 mm on October 30.

Bakshi Ram, a noted sugarcane breeder, said heavy rain could delay crushing, particularly in low-lying areas of eastern Uttar Pradesh. Mills may be reluctant to crush because of the potential impact on sugar recovery, he said.

PM to inaugurate Banas Dairy's ₹325-crore cattle breeding centre in Gujarat on Oct 30

Our Bureau
Ahmedabad

Prime Minister Narendra Modi will inaugurate a ₹325-crore cattle breeding and research centre at Bhildi in Gujarat's Banaskantha district on October 30, as Banas Dairy steps up efforts to improve indigenous cattle breeds and boost milk productivity through advanced reproductive technologies.

The Bharat Bovine Breeding and Research Centre (BBBRC), spread across 127 acres, aims to produce 25,000 high-quality embryos annually using ovum pick-up and in-vitro fertilisation (OPU-IVF) and embryo transfer technologies, an official release said.

The facility is expected to improve cattle genetics, helping farmers achieve higher milk yields from fewer animals.

Prime Minister Narendra Modi

The facility aims to produce 25,000 high-quality embryos annually to improve indigenous breeds and boost milk productivity

INDIGENOUS BREEDS

Developed with technical guidance from the National Dairy Development Board (NDDB) and support under the Centre's National Gokul Mission, the facility will focus on improving indigenous cattle breeds such as Kankrej, Gir, Sahiwal and Tharparkar, as well as buffalo breeds including Mehsani, Banni, Jafrabadi and Murrah.

The National Gokul Mission focuses on the development and conservation of indigenous bovine breeds.

GENETIC IMPROVEMENT

The centre aims to multiply superior genetics faster than conventional breeding methods through advanced reproductive technologies.

A cow typically produces one calf a year. Assisted reproductive technologies can help obtain multiple embryos from genetically superior animals, accelerating the propagation of desirable traits such as higher milk yield and improved productivity.

Shankarbhai Chaudhary, Speaker of the Gujarat Assembly and Chairman of Banas Dairy, said the centre would mark a significant step in applying modern science to indigenous cattle breeding and strengthening the dairy sector.

Modi will also inaugurate and lay the foundation stones for four other Banas Dairy development projects during the programme, according to a statement from Gujarat's Agriculture and Cooperation Department.

SOPA opposes GM soymeal imports, says domestic supply is ample

Our Bureau
Bengaluru

The Soybean Processors Association of India (SOPA) has urged the government not to permit genetically modified (GM) soymeal imports or extend zero-duty imports of non-GM soybean to all African countries, saying domestic supplies are adequate and imports would depress prices and hurt farmer incomes.

The representation to Commerce Minister Piyush Goyal follows the All-India Poultry Breeders Association's request for permission to import 30 lakh tonnes of GM soymeal at zero duty and extend zero-duty imports of non-GM soybean to all African countries, beyond the least developed countries currently covered.

SOPA said the demands were not in the interests of

domestic processors or soybean farmers as there was no shortage and firm prices did not justify imports.

AMPLE SUPPLIES

SOPA estimates domestic soymeal availability at 81.72 lakh tonnes (lt) in the 2026-27 oil year (October-September), against demand of 80 lt, leaving a carry-forward stock of 1.72 lt as of September 30, 2027. The closing soybean stock is estimated at 8.82 lt, equivalent to nearly 7 lt of soymeal that can be produced through crushing as required. "The effective buffer is, therefore, close to 9 lt of soymeal. The supply is adequate. There is no shortage — there is a price differential, and that is a different matter entirely," SOPA said.

It estimated the 2026-27 soyabean crop at 107.9 lt. SOPA said the current price rise was driven more by sentiment than fundamentals, citing an earlier spike above ₹7,500 a quintal that subsequently reversed.

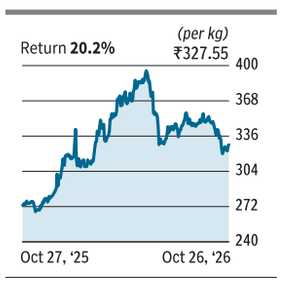

SOPA expects soybean and soymeal availability to meet poultry feed demand even if the crop is smaller, citing lower soymeal exports and soybean imports already factored into estimates.

After accounting for substitution by distillers dried grains with solubles, SOPA estimates soymeal demand from the poultry and aquaculture sectors at 62.43 lakh tonnes.

Short aluminium futures if price rises to ₹332

Akhil Nallamuthu
bl. research bureau

Aluminium futures (₹327/kg) have been in a downtrend for over a month. While there has been a recovery in the recent sessions, the broader trend remains bearish.

COMMODITY CALL.

The November contract made a low of ₹314.6 last week and has now recovered to ₹327. The upswing may extend from the current level but there is a resistance at the ₹330-335 price band.

We expect the contract to fall off this barrier and decline to ₹305 in the near-term. Notably, the price region of ₹300-305 is a support band. In case aluminium (November) futures break out the resistance at ₹335, the near-term outlook could turn positive. In this case, it could rise to ₹350. Resistance above ₹350 can be spotted at ₹358.

Overall, aluminium futures retain the bearish inclination. Traders can consider selling on rallies.

TRADE STRATEGY

Short aluminium futures if the price rises to ₹332. Place stop-loss at ₹340.

When the price slips to ₹314 after the trade is initiated, tighten the stop-loss to ₹322. Book profits at ₹305.

Banas Dairy to raise dung processing capacity by 51% to 515 tonnes a day

Our Bureau
Ahmedabad

Banas Dairy is set to raise its daily cattle dung processing capacity by 51 per cent to 515 tonnes from 340 tonnes with new bio-CNG plants at Tharad and Radhanpur in Gujarat's Banaskantha district.

The expansion builds on a model that provides cattle farmers with an additional income stream beyond milk sales.

The dairy co-operative buys dung from farmers at around ₹1 a kg, weighs it at the farm and transfers payments directly to their bank accounts every fortnight, along with their milk bills.

The initiative converts livestock waste into compressed biogas for vehicles and organic fertilizer for farms, generating additional revenue from cattle rearing.

TWO NEW PLANTS

The expansion comes ahead of Prime Minister Narendra Modi's visit to Banaskantha on October 30. Banas Dairy currently processes 340 tonnes of dung daily through four plants. The addition of the Tharad and Radhanpur facilities is expected to raise capacity to 515 tonnes a day.

The cooperative began procuring dung in February 2020 from Dama village in Deesa and launched what the State government describes as the country's first commercial-standard compressed biogas outlet in August that year. Plants subsequently became operational at Agathala, Khula and Vinchhiwada under a tripartite arrangement involving Suzuki Motor Corporation and the National Dairy Development Board (NDDB).

Banaskantha has an estimated 28 lakh livestock, of which around 24 lakh belong to cattle breeders associated with Banas Dairy. The animals generate about 24,000 tonnes of dung daily, offering considerable scope to expand the cooperative's bioenergy operations.

Banas Dairy plans to eventually establish around 200 plants to utilise the district's livestock waste. According to the State government's Energy and Petrochemicals Department, the proposed network could produce 1,168 lakh kg of compressed biogas annually and generate direct annual returns of ₹875 crore for livestock farmers. These are projections for the proposed network, not current output. Bio-CNG from the existing plants is sold to motorists at ₹75-80 a kg, below Gujarat's prevailing conventional CNG price of around ₹92 a kg. The process also generates solid and liquid organic fertilizers from the residual slurry.

QUICKLY.

Sigma Advanced Systems bags $102-m NATO order

New Delhi: Sigma Advanced Systems Ltd has received an export order valued at $ 102.23 million (₹973.64 crore) for the manufacture and supply of Base Bleed (BB) Units of 155 mm artillery ammunition for a NATO customer. The company said it had to execute the order over a period of 12 months. The order marks a significant milestone in the company's strategy to expand its capabilities across the 155 mm artillery ammunition manufacturing value chain, Sigma said. OUR BUREAU

Wabag wins ₹1,000-cr RIL order for desal plant

Chennai: VA Tech Wabag said it has secured a ₹1,000-crore order from Reliance Industries for a 8,400 m^3/hr desalination plant, expandable to 12,600 m^3/hr (302 mld), and a 3,000 m^3/hr remineralisation plant at Jamnagar, Gujarat. It spans design, engineering, installation, commissioning and performance guarantee test run. OUR BUREAU

CISF shifts to sector-based security doctrine for domain specialisation

SAFEGUARDING GROWTH. Reorganisation from November 1 to bolster security of economic assets

Dalip Singh
New Delhi

SHARP FOCUS. The move aims to address specific security requirements and challenges for diverse sectors SHIV KUMAR PUSHPAKAR

The Central Industrial Security Force (CISF) has fundamentally shifted its security doctrine from a territorial to a sector-based architecture. The reform aims to strengthen strategic deterrence through function- and installation-specific supervision and security, enhanced field monitoring and improved coordination with client organisations.

Ahead of the reorganisation, which will take effect on November 1, CISF Director General Praveer Ranjan has called for a coordinated transition at all levels of the Central armed police force. He emphasised the need to identify potential challenges in advance and take the necessary administrative measures without disrupting day-to-day operations, CISF sources told *businessline*.

The move aims to introduce domain specialisation, moving away from the existing generalist approach to address diverse security requirements and challenges.

For instance, the Eastern Sector Inspector General (IG) currently oversees 60 industrial units spanning coal, power, mining and steel sectors. "It is practically very difficult to gain an in-depth understanding of all these sectors while also engaging with different ministries. Coordinating with so many entities while providing security poses a major challenge," officials familiar with the ongoing transition said.

SECTORAL APPROACH

The 11 CISF sectors will now provide dedicated security to specific strategic installations and regions. For instance, the Delhi-NCR sector will cover government buildings, museums and Parliament; the Eastern sector will oversee coal installations, and the Central sector will focus on steel facilities.

A new posting policy is being formulated in this regard and is currently under consideration, officials emphasised.

"Function-specific supervision will strengthen understanding of installation-specific security requirements, enhance field monitoring, speed up decision-making and improve coordination with client organisations, thereby making the CISF security services more effective and responsive," sources said.

The reorganisation will also help safeguard the country's economic security, which is becoming increasingly important as critical assets grow more vulnerable during modern conflicts.

ENTIRE VALUE CHAIN

The functional restructuring will create specialised verticals within the CISF to protect entire production processes. For instance, the atomic energy sector, established on a functional basis in 2018, secures the entire production chain, from uranium mines and fuel enrichment and bundling plants to reactors and waste management facilities, sources explained.

The reorganisation is expected to strengthen the security of India's critical economic assets. Port security is crucial to safeguarding the country's coastline, which stretches over 7,000 km.

The qualitative shift will require customised deployment patterns, training and procedures, including standardised standard operating procedures, along with better coordination with the respective ministries and departments.

Leadership structures will also need to be aligned with the specific requirements of each sector.

Delhi–Haridwar road link to open in two months: Gadkari

Our Bureau
New Delhi

Union Minister for Road Transport and Highways Nitin Gadkari PTI

The Delhi-Haridwar road link is expected to open within the next two months, reducing travel time between the two cities to one and a half hours, Union Minister for Road Transport and Highways Nitin Gadkari said on Tuesday.

Addressing a Confederation of Indian Industry (CII) conference, Gadkari said improved road connectivity to religious destinations will help boost tourist arrivals and create jobs.

He said the opening of the Delhi–Dehradun route had reduced travel time between the two cities to about two hours from seven.

Gadkari said, with 80–85 per cent of the ₹12,000-crore Char Dham road project completed, there had been a three-fold increase in traffic from Delhi to Badrinath and Kedarnath. He said road projects connecting religious destinations will support local businesses and generate employment through construction, increased travel and tourism.

BUDDHIST CIRCUIT

Gadkari also said around ₹22,000 crore was being spent on road projects along the Buddhist circuit, which connects destinations associated with the life of Gautam Buddha.

He said improved connectivity along the circuit would attract tourists from Southeast Asia and other overseas markets.

He also cited the completion of the ₹12,000-crore Palkhi Marg projects in Maharashtra, connecting Pandharpur with Dehu and Alandi, as part of efforts to improve access to pilgrimage destinations. On connectivity to Kedarnath, Gadkari said the proposed ropeway will cut travel time to around 27 minutes, easing the journey for pilgrims visiting the shrine.

Beyond tourism, he said highway development would connect rural, tribal and aspirational districts with major economic centres.

ECONOMIC IMPACT

He cited the Delhi–Mumbai Expressway and the Raipur–Visakhapatnam corridor as projects that would create opportunities for industry, trade and businesses in districts along their routes.

Gadkari said industrial clusters, multimodal logistics parks, warehousing hubs and wayside amenities were also being developed along the highways. He said improved connectivity will also provide better access to hospitals and educational institutions, help farmers reach markets and create jobs closer to people's homes.

Accordingly, he said, investment in road infrastructure will generate demand for cement, steel, machinery and construction equipment, while supporting economic activity through lower transport costs and shorter journeys. Gadkari said India's logistics costs had fallen from around 16 per cent to about 9 per cent of GDP, attributing the decline to improved road infrastructure.

He said 36 greenfield expressways had been developed, reducing travel time and improving connectivity.

SC to examine plea seeking preservation of complete SIR records

Krishnadas Rajagopal
New Delhi

The Supreme Court assured on Tuesday that it will "examine everything" even as petitioners, including Leader of the Opposition in the Lok Sabha Rahul Gandhi, voiced a request to it to either direct the Election Commission of India to preserve or call for the "complete records and decisions" concerning the Special Intensive Revision (SIR) exercise.

The demand to safeguard the records was made by senior advocate Abhishek Manu Singhvi before a Bench headed by Chief Justice of India Surya Kant, which deferred the case for hearing after 10 days. The case was rescheduled after senior advocate Vikas Singh, appearing for lead petitioner Rakesh Kumar Singh and other petitioners, including Shailendra Mani Tripathi, sought time to respond to an affidavit filed by the Election Commission (EC) in response to their petitions.

EC AFFIDAVIT

The affidavit showed the EC presenting a united front, with Chief Election Commissioner (CEC) Gyanesh Kumar and Election Commissioners Sukhbir Singh Sandhu and Vivek Joshi maintaining that their decisions on the SIR were in accordance with the law and that any attempt to restrain the CEC from discharging his functions was illegal.

The EC said a CEC could be removed only in accordance with the prescribed procedure and on grounds similar to those for removing a Supreme Court judge.

The affidavit was filed in response to a legal battle that began with street protests in the national capital demanding the removal of the CEC. The protests culminated in multiple petitions being filed in the Supreme Court by individuals, activists and Opposition leaders. Media reports preceding the protests alleged friction within the EC, with both Election Commissioners raising concerns over procedural irregularities and the CEC's unilateral and authoritarian conduct during the largescale SIR exercise. The SIR has excluded approximately 13 crore voters from the electoral rolls. Senior Advocate Maninder Singh appeared for the EC, while Solicitor General Tushar Mehta represented the Centre. Both questioned the petitioners' request to the court.

"We will examine everything," Chief Justice Kant responded to Singhvi, listing the case in mid-November.

NOTICE ORDERED

The court separately issued notice to a petition filed by Mamata All India Trinamool Congress leader Dola Sen, represented by senior advocate Menaka Guruswamy, against the functioning of the EC and the "tampering" of Form 6.

The EC affidavit denied charges that Form 6 was changed. It justified that the additional declaration form provided alongside Form 6 was not a "part" of the statutory Form.

Voters deleted from the electoral roll during the SIR exercise have to fill out their Form 6 as well as "map" their previous electoral roll entries of their parents and grandparents in the additional declaration form.

The affidavit submitted that officials with the West Bengal Chief Electoral Officer had filed appeals against the inclusion of deleted voters. Petitioners have contended that these appeals, numbering over 16 lakh, were choking the Appellate Tribunals.

Govt working to simplify Press Note 2, paperwork for border-country investors

Amiti Sen
New Delhi

TACTICAL RESTRAINT. The move comes even as China has sought wider easing of the curbs and India is proceeding slowly, wanting peace at the border first

The proposed relief is aimed mainly at small companies, a senior official said

The government is looking at further simplifying the application form and paperwork under Press Note 2 for investments from countries that share a land border with India, including China, but mainly aimed at smaller companies, sources said.

The move comes even as China has sought wider easing of the curbs; India is proceeding slowly because it wants peace at the border first.

The proposed relief is aimed mainly at small companies, a senior official said. "We are further simplifying the form," the official said, adding that the government had received representations and held discussions with stakeholders. The conclusion was that some information currently sought could be dispensed with, particularly for small companies. The relief will not apply to everyone, the official emphasised.

NORMS EASED

The change builds on the relaxation announced in March when the Union Cabinet approved amendments to the foreign direct investment framework introduced under Press Note 3 of 2020.

Investments where beneficial ownership from a land-border country is up to 10 per cent and non-controlling can now come through the automatic route, instead of needing prior approval.

The government also promised faster approvals, with a 60-day timeline for specified manufacturing sectors. The changes were notified through Press Note 2 (2026).

PRIORITISING PEACE

Last week, MEA spokesperson Randhir Jaiswal confirmed that the situation in the border areas "gets disturbed from time to time" when Chinese forces deviate from established patrolling patterns. Maintaining peace and tranquillity in the border areas is "essential for the overall development of bilateral relations," he said.

His remarks followed the Indo-Tibetan Border Police chief's confirmation of recent face-offs with Chinese troops in Arunachal Pradesh.

Wabtec bags ₹839-cr order for Vande Bharat sleeper trains; eyes ₹5,000 cr revenue by 2030

T E Raja Simhan
Hosur

Ajay Mani, MD, India, Wabtec Corporation, and Pascal Schweitzer, President, Wabtec Transit T E RAJA SIMHAN

Wabtec Corporation, the US-based rail technology and services company, has secured a $94 million (₹839 crore) order from the Indian Railways for multiple transit solutions to support the Vande Bharat sleeper train being manufactured by the Integral Coach Factory, Chennai.

Wabtec will supply critical systems, including brake systems, doors and gangway solutions. The order includes delivery, integration, testing, commissioning and long-term operational reliability support. The ICF will manufacture 50 Vande Bharat sleeper trainsets (each of 24 coaches), a statement said.

Pascal Schweitzer, President, Wabtec Transit, said Wabtec had emerged as the lowest bidder for the relevant packages and secured a majority share in the three product categories. The company is participating in more tenders, and the results are awaited, he told mediapersons at the company's plant in Hosur on Tuesday.

REVENUE GROWTH

Ajay Mani, Managing Director, India, Wabtec Corporation, said the company planned to end 2026 with revenue of ₹3,200 crore, up from ₹3,000 crore in 2025.

Nearly 95 per cent of the revenue comes from Indian Railways, including supplies to major vendors like Alstom and Siemens.

"We are targeting revenue of around ₹5,000 crore by 2029-30 as we plan to capitalise on Indian Railways' modernisation programme and the expansion of metro networks," he added.

Currently, the Indian market accounts for nearly 95 per cent and exports about 5 per cent. However, exports may rise to 12-13 per cent by 2030, when overall revenue grows to around ₹5,000 crore, he said. "There will be more rolling stock and a lot of upgrades of existing rolling stock. We should be ready for that growth," he said.

Wabtec's Indian operations currently comprise six factories and two engineering centres, with manufacturing facilities in Hosur, Chennai and Rohtak, among other locations.

The company also inherited two plants through its global acquisition of Dellner, which specialises in train connection systems.

Its Indian operations have around 80–85 per cent local content and support over 450 suppliers. Wabtec has supplied onboard systems for about 3,500 coaches and has around 20,000 product installations, Mani said.

Wabtec has supplied more than 8,000 high-reach pantographs for electrification requirements. The company supplies five out of every six such pantographs used in the country, he said.

The writer was in Hosur at the company's invitation

SC Collegium proposes Chief Justices for 4 HCs

The Hindu Bureau
New Delhi

The Bombay HC gets two recommended judicial appointments

The Supreme Court Collegium has recommended the names of four judges for appointment as Chief Justices of the High Courts of Gujarat, Delhi, Telangana and Uttarakhand.

Justice Manash Ranjan Pathak, who is currently serving as a judge in the Gujarat High Court, has been recommended for appointment as its Chief Justice in a Supreme Court Collegium resolution of October 26.

Justice Pathak's parent High Court is Gauhati.

Justice P Sam Koshy, whose parent High Court is the Chhattisgarh High Court and who is currently serving on the Bench of the Telangana High Court, has been proposed for the Chief Justiceship of the Delhi High Court. Justices Tapabrata Chakraborty of the Calcutta High Court and Sudhir Singh of the Patna High Court have been recommended for appointment as Chief Justices of the Telangana and Uttarakhand High Courts, respectively.

The Supreme Court Collegium has also approved the proposal for the appointment of Ajay Sharma, Judicial Member, CESTAT, Mumbai, and advocate Vaibhav Anant Sugdare as judges of the Bombay High Court.

Karnataka SIR removes over 99 lakh names from voter roll

Our Bureau
Bengaluru

Karnataka's electorate has declined by nearly 18 per cent following the Special Intensive Revision (SIR) SUSHIL KUMAR VERMA

Of the deletions, 16.39 lakh names were those of the deceased, over seven lakh were duplicate entries and 3.83 lakh names were deleted under the 'Others' category

Karnataka's vote base has declined by nearly 18 per cent following the Special Intensive Revision (SIR), with the final electoral roll published on Tuesday showing 4.54 crore voters, from 5.54 crore previously.

More than 99.3 lakh names have been removed from the rolls, according to data from the Chief Electoral Officer's office.

At the draft stage, the electorate had fallen to 4.46 crore, with more than 1.07 crore names deleted. The final roll has added a net 8.64 lakh voters compared with the draft roll.

Of the deletions, 16.39 lakh names were those of the deceased, over seven lakh were duplicate entries and 3.83 lakh names were deleted under the 'Others' category.

The final electorate comprises more than 2.25 crore male voters, 2.29 crore female voters, and 2,841 third-gender voters.

It includes over 6.83 lakh young voters aged 18–19 and more than 3.92 lakh voters aged above 85.

Political analyst Harish Ramaswamy raised concerns about the scale of deletions, the criteria used to remove names, and the transparency of the revision process.

SEEKING TRANSPARENCY

"In any country, over a period of time, there is an addition to the list of voters in a democracy because the population grows and the demography changes. But if you are talking about the deletion of crores of people, I'm really worried. This is my first observation," he told *businessline*.

He also questioned the grounds on which names had been removed and raised concerns about the transparency of the exercise, particularly the lack of clarity about the software used in the revision.

"When intellectuals in this country are raising questions, why should the institutions not come out and explain the process clearly?" he said, adding that the bureaucracy was accountable to the public.

Agilisium to shift its Asia HQ from Chennai to Hyderabad

Our Bureau
Hyderabad

Agilisium, a life sciences innovation and transformation company, will shift its Asia headquarters from Chennai to Hyderabad.

The shift is aimed at tapping into Hyderabad's strong pharmaceutical and biotechnology ecosystem, the company said on Tuesday.

Hyderabad offers access to specialised talent in life sciences, technology and AI. "Telangana's growing focus on life sciences innovation, supported by its dedicated leadership and the BioAsia platform, further strengthens the city's appeal," it said.

REVENUE TARGET

It also supports the company's long-term goal of reaching $500 million in revenue and expanding its workforce to approximately 5,000 professionals over the next five to seven years.

Chennai and Pune will continue to remain part of its core operating footprint, according to the company.

India ITME Society Announces the Winners of 4th Edition India ITME Technical Awards 2026

Recognising Excellence and Shaping the Future of Textile Engineering

India ITME Society – 5-decade old, prestigious non-profit apex industry body empowering the textiles through trade and technology is proud to announce the winners for the 4th edition of ITME Technical Awards – an exclusive platform dedicated to recognizing excellence, innovation, and technological advancement in textile engineering.

The awards are focused on celebrating indigenous technological import substitution driven advancement and innovation-driven solutions that strengthen manufacturing excellence and contribute to the growth and competitiveness of India's textile engineering industry.

The winners of the India ITME Technical Awards 2026 are:

Award for Most Successful Make in India Manufacturing Initiative -
Lakshmi
Lakshmi Card Clothing Manufacturing Company Private Limited

Award for Outstanding Eco Technology Award for Textile Engineering -
Luwa
Part of the Nederman Group
Luwa India Pvt Ltd.

Award for Solution Oriented Indigenous Innovation in Textile Engineering -
Deven Supercriticals Pvt. Ltd.
DEVEN SUPERCRITICALS PVT. LTD.

Award for AI Powered Textile Technology -
Artitech Innovations Private Limited
KOSHA

Award for Best Reliable Supply Chain Partner-
Lakshmi
Lakshmi Card Clothing Manufacturing Company Private Limited

Award for Prominent Young Researcher of the Year 2026 in Textile Engineering -
Isha Gawande, Tanvi Suresh Sankurwar, Tanvanti Sangam Meshram & Rudra Patil for Solar Powered Silk Reeling Machine

Acknowledgement & Appreciation as Titan of Textile Engineering -

LMW
Late Dr. D. Jayavarthanavelu, LMW Ltd.

PANEL OF EMINENT JURY MEMBERS

Mr. Uday Gill,
Board Member,
ITMF

Mr. Hemant Sharma,
President,
Reliance Industries Ltd.

Mr. Updeep Singh,
Resident Director,
Welspun World

Mr. Ullhas M Nimkar
Chairman,
Nimkar Tek Technical Services

Dr. G.V. Aras,
Strategic Advisory & Mentor,
ITA Technology Transfer

Dr. G Thilagavathi,
Principal,
PSG College of Technology

Mr. S. Hari Shankar,
Joint Managing Director,
Lakshmi Card Clothing

Mr. Ketan Sanghvi
Chairman,
India ITME Society

Mr. Senthil Kumar S.
Hon. Treasurer,
India ITME Society

Award Function on 6th December 2026 during India ITME 2026 Exhibition

India ITME Society congratulates all the Winners of 4th Edition India ITME Technical Awards & continues to champion technological excellence, encourage innovation, and foster collaboration to accelerate the development of a globally competitive Indian textile engineering industry.

Supported by the **Ministry of Heavy Industries, Govt of India** and the **Ministry of Textiles, Government of India**, along with the support and participation of **82+ domestic and international industry associations**, India ITME is a leading platform for the textile machinery and engineering industry, bringing together manufacturers, technology providers, industry associations, researchers and other stakeholders from India and across the world.

India ITME 2026, the flagship exhibition of global textile machinery industry, is poised to reaffirm its position as India's **largest and most comprehensive textile engineering & technology exhibition** bringing together the **highest number of participating countries, exhibitors and visitors under one roof.**

Organised by the India ITME Society, India ITME 2026 will be held from **4th to 9th December 2026** at **IEML, Greater Noida, India,** showcasing cutting-edge innovations, advanced technologies and sustainable solutions spanning the entire textile value chain — from fibre, yarn and fabric to finished products and technical textiles.

ORGANISED BY

India International Textile Machinery Exhibitions Society (India ITME Society), is a 45-year-old non-profit apex industry body, established in 1980, to support and serve the Textile Engineering Industry through Exhibitions & Events.

INDIA ITME SOCIETY
Empowering Textiles through Trade and Technology

Supported by 82+ Domestic & International Industry Associations

Rooted in indigenous innovation and driven by global ambition… the India ITME Technical Awards remains committed to support excellence!!!
