Jio

Thank you, India.
Jio aapne banaya.

Today, we take a historic step forward.
At its heart is the trust of a nation.
A Jio that you have helped build.

Jio's journey has always been about more than a company.
It is about the possibilities of a connected India,
and the exciting future that lies ahead.

You have been part of making this history, and we look forward to all that we will make possible together as a nation.

So that more dreams find their chance.
And a billion ambitions take India forward.

With love, from Jio.

NOTICE OF POSTAL BALLOT

Notice is hereby given that pursuant to the provisions of Sections 108 and 110 and other applicable provisions, if any, of the Companies Act, 2013 ("the Act"), read with the Companies (Management and Administration) Rules, 2014 (including any statutory modification(s) or re-enactment(s) thereof for the time being in force), various Circulars issued by Ministry of Corporate Affairs, Government of India ("MCA Circulars"), Regulation 44 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulation") and pursuant to other applicable laws and regulations, read with Secretarial Standard ("SS-2") issued by the Institute of Company Secretaries of India, the approval of the Members of The India Cements Limited ("the Company") is being sought for the Resolution set out in the Postal Ballot Notice dated 17th October, 2026 ("Notice") by means of Postal Ballot, only by way of voting through remote e-voting facility provided to the Members to cast their vote, through the electronic platform provided by National Securities Depository Limited ("NSDL"). In view of the MCA Circulars, please note that the physical copies of the Notice along with Postal Ballot Forms and pre-paid business reply envelopes are not being sent to the Members.

The Notice has been sent by email on Tuesday, 27th October, 2026 to the Members whose email addresses are registered with the Company / Integrated Registry Management Services Private Limited, the Registrar and Share Transfer Agent ("RTA") or with their respective Depository Participants ("DPs"), as on Friday, 23rd October, 2026 (Cut-off date).

The Notice containing e-voting instructions is also available on the Company's website at www.indiacements.co.in and on the websites of Stock Exchanges i.e. BSE Limited (BSE) and National Stock Exchange of India Limited (NSE) at www.bseindia.com and www.nseindia.com respectively and on the website of NSDL i.e. www.evoting.nsdl.com. Members who have not received the Notice may download it from the above-mentioned websites.

Voting rights of a Member / Beneficial Owner shall be in proportion to his/her/their shareholding in the paid-up equity share capital of the Company as on the Cut-off date. Members holding shares either in physical mode or demat mode, as on the Cut-off Date i.e. 23rd October, 2026 only shall be entitled to cast vote through e-voting. A person who was not a Member as on the Cut-off Date should treat this Notice for information purpose only.

The Members are further informed that –

a) The Special Business, as set out in the Notice is to be transacted through Remote e-voting only.

b) The remote e-voting period commences on 28th October, 2026 at 9.00 A.M (IST) and ends on 26th November, 2026 at 5.00 P.M (IST) (both days inclusive).

c) The Members may note that (i) the remote e-voting module shall be disabled for voting and the voting by electronic means shall not be allowed after the date and time mentioned under point 'b' above; and (ii) once the vote on a resolution is cast by a Member, the Member shall not be allowed to change it subsequently.

d) The manner of remote e-voting for Members holding shares in physical mode or demat mode or who have not registered their email addresses with the Company / RTA, is provided in the Notice and available on the Company's website at www.indiacements.co.in.

e) Members are requested to cast their votes through the remote e-voting process not later than 5.00 P.M (IST) on 26th November, 2026.

f) Manner of registering / updating email address :

(i) Members holding equity shares in physical mode and who have not registered their Email ID may get their Email ID registered with the Company's RTA by submitting Form ISR-1, duly filled and signed as per the specimen signature registered with the Company along with self-attested ID (Pan Card Copy linked with Aadhaar) and address proof (Aadhaar Card / Valid Driving License / Election ID / Valid Passport). Form ISR-1 can be downloaded from the Company's website i.e. www.indiacements.co.in.

(ii) The Members holding shares in demat mode are requested to register / update their Email IDs, with their respective Depository Participant by following the procedure prescribed by the concerned Depository Participant.

g) The Board of Directors has appointed Mrs. P.R.Sudha, Company Secretary in Practice (Membership No. F6046, C.P.No. 4468), Chennai, as Scrutinizer for conducting Postal Ballot through remote e-voting process in a fair and transparent manner.

h) The results of the voting conducted through Postal Ballot (through the remote e-voting process) along with the Scrutinizer's Report will be announced by the Chairman or a person authorised by him, on or before 30th November, 2026.

i) The said results along with the Scrutinizer's Report would be intimated to BSE and NSE, where the Equity Shares of the Company are listed. The results will also be uploaded on the Company's website www.indiacements.co.in and on the website of NSDL at www.evoting.nsdl.com and shall be made available on the respective websites of BSE and NSE. Additionally, the results will also be placed on the notice board at the Registered and Corporate Office of the Company.

In case of any queries and / or assistance required, you may refer to the Frequently Asked Questions (FAQs) for Shareholders and e-voting user manual for Members available at the download section of www.evoting.nsdl.com or can call : 022 - 4886 7000 or send a request to Ms. Prajakta Pawle at evoting@nsdl.com or contact Mr. K.Suresh Babu, Whole-Time Director, Integrated Registry Management Services Private Limited, "Kences Towers", 2nd Floor, No.1, Ramakrishna Street, North Usman Road, T. Nagar, Chennai 600 017 at 044-28140 801 - 803.

The resolution, if approved by the requisite majority, shall be deemed to have been passed on the last date of remote e-voting i.e. 26th November, 2026, in terms of Secretarial Standard on General Meetings (SS-2) issued by the Institute of Company Secretaries of India.

Members are requested to carefully read all the notes set out in the Postal Ballot Notice and in particular, the manner of casting vote through remote e-voting.

By Order of the Board
For The India Cements Limited
E. Jayashree
Company Secretary

"WHY SHOULDN'T AN INDIAN BANK'S FLAG FLY AMONG THE WORLD'S TOP BANKS? WE SHOULD HAVE AN INDIAN BANK AMONG THE WORLD'S TOP FIVE BANKS"

Shaktikanta Das
Principal Secretary 2 to the Prime Minister

India must build banks and financial institutions with the scale, resilience, and international presence to compete with the world's leading lenders, Shaktikanta Das, Principal Secretary 2 to the Prime Minister, said on Tuesday at the *Business Standard* BFSI Insight Summit in Mumbai, signalling the need for further consolidation among public-sector banks (PSBs).

"The consolidation of PSBs over the past decade has laid an important foundation. The next frontier is the creation of institutions with the scale, resilience, and international presence to compete alongside the world's leading banking entities. Larger financial institutions are better positioned to underwrite complex projects and absorb shocks in an increasingly volatile environment," he said in his keynote address, titled 'The BFSI Sector: Securing India's Aspirations'.

Modi, in his 80th Independence Day speech this year, set the goal of having an Indian bank among the world's top five. "We often hear about the Fortune 500. Why shouldn't our goal be that, within the next decade, 50 of the Fortune 500 companies should be from Bharat? Today, our banking sector is flourishing. Why shouldn't an Indian bank's flag fly among the world's top banks? We should have an Indian bank among the world's top five banks," he had said.

Finance Minister Nirmala Sitharaman, in her 2026-27 (FY27) Budget speech, announced the constitution of a high-level committee on banking for Viksit Bharat. The proposed committee is expected to examine the future direction of the banking sector, including issues relating to public-sector banks and their ability to meet the financing requirements of a growing economy.

Das placed the need for larger banks within a broader agenda to expand credit, mobilise long-term savings, and improve the flow of finance to infrastructure, advanced manufacturing and other productive sectors. He outlined five priorities for the financial sector: building institutions with greater scale, deepening the corporate bond market, strengthening municipal (muni) bonds, widening insurance coverage and extending pension coverage.

Banks stronger, scale the next frontier

The call for larger institutions comes at a time when the banking system's asset quality and capital position have improved. Das said the banking system had shaken off the hangover of high bad loans. The gross non-performing asset (GNPA) ratio of scheduled commercial banks fell to a multi-decade low of 1.8 per cent in March, while the net NPA ratio declined to 0.4 per cent.

Das recalled that the Reserve Bank of India's July 2020 Financial Stability Report had estimated that the GNPA ratio could rise from 8.5 per cent in March 2020 to as high as 14.7 per cent by March 2021 under a very severe stress scenario.

Insurance must grow 1.5-2x faster than GDP: Irdai chief

SUBRATA PANDA
Mumbai, 27 October

"INSTEAD OF FOCUSING ONLY ON PENETRATION AND INSURANCE DENSITY, WE SHOULD TRACK THE NUMBER OF LIVES COVERED..."

Ajay Seth
Chairman, Insurance Regulatory and Development Authority of India

India's insurance sector must grow 1.5-2 times faster than the economy over the next 10-15 years, requiring fundamental changes in claims management, product transparency and distribution, said Ajay Seth, Chairman of the Insurance Regulatory and Development Authority of India (Irdai), at the *Business Standard* BFSI Insight Summit here.

Life insurance is growing at about 10 per cent, broadly in line with nominal economic growth, while general insurance is expanding at 1.3 times the economy's rate, driven largely by health insurance. Rising customer dissatisfaction in health insurance, however, underscores the need to improve policyholder experience, Seth said.

The regulator's priorities include faster, fairer claims settlement, clearer product disclosures and a more efficient digital purchasing journey. Insurers serve the top 10-15 per cent of the population reasonably well, but reaching the top 50 per cent will require a fundamental shift in how they operate, he said. "Instead of focusing only on penetration and insurance density, we should track the number of lives covered and the effectiveness of the cover provided for every rupee spent," Seth said.

Proposed distribution reforms aim to lower acquisition costs and ease pressure on premiums. Average health insurance commissions, including new business and renewals, stand at about 24 per cent and could fall to 15-20 per cent, Seth said. The consultation paper proposes higher commissions for new policies than renewals, while treating policy portability as a renewal for commission purposes.

"A significant part of health insurance is a pull product rather than a push product," Seth said, citing rising healthcare costs as a key demand driver. Families generally renew policies unless under significant financial strain, he said, adding that renewals require less effort than acquiring new customers.

Intermediaries have raised concerns about the proposals' impact on customer servicing. Seth said Irdai was consulting stakeholders to build consensus before finalising reforms.

He also highlighted shortcomings in claims disclosures. Conventional settlement ratios do not show what proportion of premiums is paid out in claims or how quickly insurers approve hospital admissions and discharges. Improving access to such information will be a regulatory priority.

The proposed Bima Sugam digital platform is expected to offer motor insurance first, subject to regulatory changes. It aims to let customers compare and buy policies at lower cost, with fees capped at 5 per cent of premiums.

'Strong audit oversight is *Viksit Bharat* bedrock'

GIREESH CHANDRA PRASAD
Mumbai, 27 October

Credible financial reporting by businesses and independent audit oversight are key to realising India's aspiration of becoming an advanced economy as these facilitate long term investors to commit capital, National Financial Reporting Authority (NFRA) Chairperson Nitin Gupta said on Tuesday.

Speaking at the *Business Standard* BFSI Insight Summit here, Gupta said that when financial reporting works well, its contribution is reflected in a lower premium for uncertainty and in a greater willingness of long-term investors, both domestic and foreign, to commit capital.

"In that sense, credible financial reporting and independent audit oversight are part of the public infrastructure on which Viksit Bharat 2047 will be built, for the benefit of the investor base and the wider stakeholders," Gupta said.

PFRDA chief wants to plug NPS into corporate payroll systems

SUBRATA PANDA
Mumbai, 27 October

PFRDA Chairperson S Ramann highlighted the potential for pension funds as an important source for infra financing

S Ramann, Chairperson of the Pension Fund Regulatory and Development Authority (PFRDA), on Tuesday called for integrating National Pension System (NPS) contributions into corporate payrolls, enabling employees to save for retirement through salary deductions alongside Employees' Provident Fund (EPF) contributions.

Speaking at the *Business Standard* BFSI Insight Summit here, Ramann said the move would require relatively minor modifications to existing human resource management software (HRMS), not an overhaul of payroll infrastructure.

"If we can run UPI (Unified Payments Interface) for 700 or 800 million people in our country, this is child's play," Ramann said. "It is a matter of the HR team in a particular corporate looking at a patch in their HRMS software, which simply says you can deduct NPS."

PFRDA is already engaging with technology providers to enable the integration. "We are already talking to several HRMS providers in the country," Ramann said.

Embedding NPS contributions into routine payroll deductions could simplify participation and eliminate the need for employees to make separate contribution arrangements.

Ramann highlighted the potential for pension funds to emerge as an important source of long-term financing for infrastructure projects, given their ability to invest over extended periods. "Without doubt, the world over, every country has grown on the back of its pension because that is the true patient capital that's available," he said.

Pension funds could invest at different stages of infrastructure development, including after projects become operational, when construction and execution risks have eased. Greater participation, however, the PFRDA Chairperson said, would require carefully framed investment guidelines and fund managers with the expertise to assess such opportunities.

"Everybody is going to be cautious, but it's about getting the right skills to do the right job," he said.

Growth momentum holds despite shocks: Gupta

ANJALI KUMARI
Mumbai, 27 October

"INDIA HAS BEEN SUBJECTED TO MORE SHOCKS THAN PERHAPS ANY OTHER ECONOMY..."

Poonam Gupta
Deputy Governor, Reserve Bank of India

India's economic growth momentum has remained strong despite a series of shocks, including high US tariffs, surging oil prices, deficient monsoon rainfall and capital outflows, said Poonam Gupta, Deputy Governor at the Reserve Bank of India (RBI), citing the economy's diversified growth base and improved policy response.

The economy grew 7.8 per cent in the first quarter of the current financial year, with momentum continuing into the second quarter, raising expectations of upgrades to growth forecasts, she said at the *Business Standard* BFSI Insight Summit on Tuesday.

"Such was the momentum seen in the economy, but interestingly, that momentum is continuing up to the second quarter," Gupta said, pointing to indicators including tax collections, bank credit growth, exports, Purchasing Managers' Index (PMI) readings and industrial and infrastructure activity.

She said India had faced a wide range of shocks, and also witnessed high capital outflows as global investors shifted towards artificial intelligence-related activities. "...I would like to believe that India has been subjected to more shocks than perhaps any other economy in the world. You name the shock and India was potentially impacted," she said.

Derivatives trading may need more guardrails, says Sebi WTM Murty

KHUSHBOO TIWARI
Mumbai, 27 October

Sebi Whole-Time Member K V R Murty said the regulator aims to bring greater transparency by making risks clear

K V R Murty, whole-time member of the Securities and Exchange Board of India (Sebi), said on Tuesday that there was a need for guardrails in the derivatives segment for retail investors, given the increase in activity on expiry days.

Murty added that safeguarding investors' interests and market integrity was the priority for the regulator. Speaking at the *Business Standard* BFSI Insight Summit, Murty said Sebi's approach is to bring greater transparency by making risks clear so that investors can make informed decisions. Two recent studies on derivatives conducted by Sebi were meant to serve that purpose, he added.

On the closing auction session, which had led to some turbulence in the markets, Murty said Sebi had listened to all stakeholders and had received responses from around 20,000 participants. He lauded the capital markets regulator as one of the country's most forward-looking organisations on technology, with first-grade tech capabilities, near-real-time surveillance capability, and in-house artificial intelligence (AI) tools.

MDR vital to sustain UPI growth: PhonePe's Nigam

AJINKYA KAWALE
Mumbai, 27 October

PhonePe aims to expand the Unified Payments Interface (UPI) to a billion users over the next decade, its Founder and Chief Executive Officer (CEO) Sameer Nigam said, arguing that bringing back the merchant discount rate (MDR) on such payments is essential to sustaining growth.

"You can't have a vibrant payments market with no money in payments," Nigam said during a fireside chat at the *Business Standard* BFSI Insight Summit here.

An MDR of 0.4 per cent, as announced by the National Payments Corporation of India (NPCI), "would be the cheapest MDR in the world", he said, citing rising cybersecurity, know-your-customer (KYC) and fraud-prevention costs.

Nigam rejected the suggestion that MDR was an issue involving foreign companies, noting that most of the roughly 200 players in the ecosystem were Indian.

PhonePe, the biggest UPI player, had invested about $1.7 billion-$1.8 billion over the past decade to bring UPI to market, he said.

"The ecosystem needs a sustainable business model. Any Indian working on anything within the ambit of the law should be able to charge a fair price," he added.

On the proposed 30 per cent cap on UPI market share, due to take effect in December 2026, Nigam said the NPCI circular had been introduced six years ago amid WhatsApp's entry, but more than 100 third-party UPI apps now operate.

"My market share is not deterring people from investing," he said. If ordered to stop onboarding customers in December, he would protest but comply.

Nigam, however, added that "denying customers choice will not happen".

PhonePe's UPI service for feature phones, launched three months ago, processes about 300,000 transactions monthly and could reach one million by December.

The company also plans to expand affordable credit, grow overseas following its UAE launch, and offer low-cost insurance, pension and investment products.

Jio adds 2.7 mn mobile users in Sept; Airtel gains 2.6 mn

India's largest telecom operator Reliance Jio added 2.7 million mobile subscribers in September 2026, ahead of Bharti Airtel's 2.6 million wireless additions, data released by telecom regulator Trai on Tuesday showed. The mobile subscriber additions for Vodafone Idea stood at 5.50 lakh in September. With the latest additions, Jio's wireless mobile subscriber tally increased to 511.1 million at September-end, compared with Airtel's 494.3 million, and Vodafone Idea's over 200 million count. PTI

Satcom at cusp of major tech innovation: Trai chairman

Satellite communications in India is on the cusp of major commercial and technological innovation, and has the potential to propel the country to new heights, Trai Chairman Anil Kumar Lahoti said on Tuesday. Speaking at the Viasat 'Space for Good' India 2026 challenge, Lahoti said that for India, satellite broadband, cellular backhaul, maritime and aviation connectivity, remote area services, disaster resilience networks - all offer important application areas. "Realising this potential will require affordable user terminals, efficient spectrum use, local manufacturing, and viable commercial models," Lahoti said. Trai, he said, gave its recommendations on spectrum assignment for satellite-based communication services in May 2025. PTI

AWL Agri Business Q2 profit dips 2%

AWL Agri Business Ltd on Tuesday reported a 2 per cent drop in consolidated net profit to ₹239.39 crore for the quarter ended September, despite higher revenue Its net profit stood at ₹244.85 crore in the year-ago period. AWL Agri Business Ltd sells edible oil and other food items under various brands, including Fortune. Total income rose to ₹22,271.25 crore in the second quarter of the current fiscal. PTI

Indus Towers profit falls to ₹1,793 crore

India's largest telecom tower provider Indus Towers' net profit fell 2.5 per cent to ₹1,793 crore in the second quarter of the financial year (Q2FY27) from ₹1,839 crore in the same period the year before. Consolidated revenue for the quarter was ₹8,516 crore, up 4 per cent from Q2FY26, while consolidated Ebitda rose 0.4 per cent to ₹4,633 crore, from ₹4,613 crore from the year ago period. OUR BUREAU

TaMo clears 80% acceptance threshold for Iveco acquisition

Tata Motors' takeover bid for Italian truck maker Iveco has cleared the key acceptance threshold of 80 per cent, thereby clearing the decks for the latters acquisition. Tata Motors on Monday secured provisional acceptances for 87.81 per cent of Iveco group's share capital under its €3.91 billion takeover offer. This will take Tata's shareholding in Iveco to 89.42 per cent. The move paves the way for further expansion of Tata Motors into the global markets and the launch of new product segments. Meanwhile, Tata Motors and Amazon have joined hands to deploy 3,000 electric trucks for e-commerce logistics, a joint statement said on Tuesday. OUR BUREAU

Maruti Q2 profit skids 26% as costs pinch

Rising commodity prices and adverse forex movement push up expenses by nearly 30%

DEEPAK PATEL
New Delhi, 27 October

Maruti Suzuki India Ltd (MSIL) reported a 26.4 per cent (Y-o-Y) decline in its second quarter 2026-27 (Q2FY27) consolidated net profit to ₹2,466.1 crore from ₹3,349 crore in the year-ago period, as rising commodity prices and adverse foreign exchange (forex) movements pushed up costs, while losses on its mutual fund (MF) holdings reduced income from investments.

The carmaker's Q2 consolidated revenue from operations rose 26 per cent to around ₹53,355 crore from ₹42,344.2 crore in the year-ago period. However, total expenses increased at a faster pace, rising around 29.7 per cent Y-o-Y to approximately ₹50,619 crore. This meant that the increase in expenses outstripped revenue growth, squeezing profitability despite higher sales.

The firm has already increased prices three times in recent months and is also looking to control expenses, including marketing spending, the management informed during the press conference. Chief Financial Officer Arnab Roy said the company's operating performance had improved sequentially, with its operating earnings before interest, tax, depreciation and amortisation (Ebitda) margin rising to 9.4 per cent in Q2 from 8.6 per cent in the previous quarter. Ebitda measures earnings from core operations before certain costs.

Depreciation was higher due to capital expenditure, while mark-to-market adjustments on MF investments affected the company's profit before tax (PBT), Roy said.

"But if you take that out operationally, both Ebitda and Ebit have increased," Roy said. Ebit, or earnings before interest and tax, measures profit from operations after depreciation.

MSIL said improved realisations, operating leverage and cost-reduction efforts helped offset some of the pressure from commodity prices and foreign exchange movements.

The company had sold 696,654 vehicles in Q2, up 26.5 per cent Y-o-Y. Its presentation attributed pressure on margins due to higher commodity prices amid the West Asia conflict, unfavourable forex movements and lower non-operating income. Improved realisations and cost-reduction efforts partly offset these pressures.

"We have already increased the prices three times till now in FY27. We are trying to manage all the expenses at the same time. If you compare Q2 against Q1 of this year, we are making some recovery... In the next six months, we are planning to do some kind of price increase at an appropriate time. That will further improve our profit situation," said Hisashi Takeuchi, managing director and chief executive officer of MSIL, during a video press conference.

The firm is attempting to recover higher input costs without passing the entire burden on to customers at once, while protecting demand in a market that has recorded strong growth.

MSIL Senior Executive Officer (Marketing and Sales) Partho Banerjee said demand for CNG vehicles had been strong, partly because of higher fuel prices. The firm is working with its supply chain and production teams to meet demand, even though CNG kit availability currently remains a constraint.

MSIL Chairman R C Bhargava said small cars would continue to have a sizeable market in India even in 2047, as a large section of the population would continue to need affordable mobility.

L&T reports 33% jump in PAT at ₹5,202 crore

Highest-ever quarterly order inflow of ₹1.47 trillion

SUDHEER PAL SINGH
New Delhi, 27 October

Earnings sheet

Consolidated figures in ₹ crore

	Q2FY27	Y-o-Y chg (%)
Revenue	78,749.9	15.8
PBIDT	11,119.7	12.3
Net profit	5,202.1	32.5

Source: Company; Compiled by Business Standard Research Bureau

Infrastructure major L&T on Tuesday reported a 33 per cent year-on-year (Y-o-Y) jump in consolidated profit after tax (PAT) at ₹5,202 crore for the second quarter of financial year 2026-27 (Q2FY27). Its PAT in Q2FY26 was ₹3,926 crore.

Consolidated revenue of the company also grew 16 per cent to ₹78,750 crore in Q2FY27, driven by progress in the various businesses in the Projects, Products & Manufacturing (PPM) portfolio.

During Q2FY27, the company secured orders worth ₹1.47 trillion, registering a growth of 28 per cent. This included several high-value orders led by Hydrocarbon, CarbonLite Solutions, Public Spaces & Airports, and Power Transmission & Distribution businesses.

L&T said its consolidated order book stood at ₹8.53 trillion at the group level at the end of September 2026, reflecting a 15 per cent growth over March 2026. International orders constituted 54 per cent of the overall order book.

"The company has delivered a strong quarter in an ever-changing geopolitical landscape. This performance reflects continued customer confidence and our ability to secure large and complex orders across sectors and geographies," L&T Chairman and Managing Director (CMD) S N Subrahmanyan said.

He said that L&T achieved a record quarterly order inflow and that the focused execution across PPM businesses supported a higher revenue growth. The highest ever order book at ₹8.53 trillion provides multi-year revenue visibility, he added.

"Our unwavering focus on delivering technically demanding projects to the customer's satisfaction continues to strengthen our dominant position. We will continue to invest in innovation, digital capabilities, and technology-led businesses to drive growth and create long-term value for our stakeholders," Subrahmanyan said.

During Q2FY27, the Infrastructure & Utilities segment secured an order inflow of ₹35,509 crore, registering a Y-o-Y decline of 13 per cent due to the deferment of select targeted orders.

L&T wins over ₹5K cr order for Dhaka Metro

SUDHEER PAL SINGH
New Delhi, 27 October

Infrastructure major Larsen & Toubro (L&T) announced that its transportation business vertical has secured major design & build orders for two key system packages of the Dhaka Mass Rapid Transit Development Project (Line 1), or Dhaka Metro, in Bangladesh. The firm classifies contracts above ₹5,000 crore value as major orders.

The orders comprise contract packages for track works and electrical systems apart from signaling, telecommunications and Platform Screen Doors (PSDs). These pertain to the first underground metro project in Bangladesh. Prior to this, L&T had won and delivered the integrated railway systems package for Dhaka Metro Line 6, Bangladesh's first metro rail corridor.

"With a strong track record of delivering E&M systems for the Dhaka Metro Line 6 with the highest standards of quality and timely execution, and more recently, for the Jakarta Metro, which is under execution, we are well positioned to leverage our experience in seamlessly integrating multiple systems in close coordination with OEMs and stakeholders," Ramkumar S, senior vice president and head of transportation infrastructure, L&T, said.

The Dhaka Metro Line 1 project, funded by the Japan International Cooperation Agency, will provide a modern mass transit system spanning around 31 kilometer. It includes the Airport Route from Kamalapur to Airport and the Purbachal Route from Natun Bazar to Purbachal Terminal.

L&T, along with its Japanese partner Sumitomo Corporation, will undertake the design, procurement, installation, testing and commissioning of the complete track works, and power supply among other functions.

Bajaj Auto net profit rises 62% on improved exports

SHINE JACOB
Chennai, 27 October

Report card

Consolidated figures in ₹ crore

	Q2FY27	Y-o-Y chg (%)
Revenue	25,125.5	59.6
PBIDT	5,487.5	61.1
Net profit	3,436.1	61.9

Source: Company; Compiled by Business Standard Research Bureau

Bajaj Auto has posted a nearly 62 per cent rise in consolidated net profit for the second quarter of 2026-27 (Q2FY27) to ₹3,436.1 crore, compared with ₹2,122.03 crore in Q2 FY26.

Consolidated revenue from operations grew 59.68 per cent to ₹25,125.56 crore during the period under review, while total expenses surged to ₹21,107.36 crore from ₹12,677.41 crore in Q2FY26. The improved performance during the quarter was mainly driven by a 41 per cent rise in exports and higher volumes across electric vehicle (EV) segments. Expenses increased due to a surge in production and raw material costs.

Total sales rose 20 per cent to 1.54 million units, compared with 1.29 million units in the same period last year. Domestic sales increased 4 per cent to 770,356 units. Commercial vehicle (CV) volumes expanded 18 per cent to 264,923 units, while 2W sales grew 20 per cent to 1.28 million units. 2W exports increased 43 per cent to 676,545 units, while domestic sales registered a marginal 2 per cent rise to 607,416 units. CV exports grew 26 per cent to 101,983 units, while domestic sales rose 13 per cent to 162,940 units.

"We have seen record volume, revenue, Ebitda, PAT, and cash flow during the quarter. Despite the rise in costs, mitigating factors were improved realisation, an export surge, and EV sales," said Rakesh Sharma, joint managing director, Bajaj Auto.

"Strong volume growth of 20 per cent year-on-year, led by robust export volumes, price hikes, and electrification, helped Bajaj report strong revenue growth... We believe Bajaj, with its refreshed portfolio, higher export mix, and contribution from 3Ws, will continue to outpace industry growth," said Dhruv Joshi, research analyst at Mirae Asset Sharekhan.

ACC profit slumps 92%

PRESS TRUST OF INDIA
New Delhi, 27 October

ACC Ltd, an Adani group cement firm, on Tuesday reported 91.7 per cent fall in consolidated net profit to ₹93 crore for September quarter FY27 (Q2FY27), on account of decline in sales volume due to a Master Supply Agreement with the parent entity.

The company had posted a profit of ₹1,119 crore in the July-September period, according to a regulatory filing from ACC, a subsidiary of Ambuja Cements.

The year-ago profit "includes income tax provision reversal of ₹659 crore relating to earlier period and interest on income tax refund of ₹205 crore." Revenue from operations was down 5.24 per cent year-on-year to ₹5,656 crore in September quarter FY27. Total expenses were up 2.46 per cent at ₹5,602 crore.

In the quarter, revenue from the cement business was down 6.9 per cent at ₹5,206 crore. According to the company, the decline in sales volume was due to "higher MSA (Master Supply Agreement) volume with parent Ambuja Cements" in Q2FY26.

However, ACC's revenue from Ready Mix Concrete (RMC) was up 26.4 per cent to ₹574 crore. The company achieved quarterly volume of 1.07 million cubic metres registering 19 per cent Y-o-Y growth in the segment. Total income of ACC, which includes other income, was up 10.45 per cent to ₹5,587.76 crore in Q2FY27.

Cipla's net falls 35%

SANKET KOUL
New Delhi, 27 October

Cipla saw a 35 per cent year-on-year (Y-o-Y) fall in consolidated net profit for the September quarter of 2026-27 (Q2FY27).

The decline is owing to a Y-o-Y slide in its US and active pharmaceutical ingredients businesses. The drugmaker recorded a profit after tax (PAT) of ₹878 crore, down from ₹1,351 crore in Q2FY26.

Revenue from operations also fell 2.4 per cent Y-o-Y to ₹7,404 crore from ₹7,589 crore in Q2FY26. North America business reported revenue of $172 million (₹1,643 crore).

Wabtec developing India as a global centre of excellence for export

SHINE JACOB
Chennai, 27 October

American rail equipment maker Wabtec Corporation is strengthening India's position as a global manufacturing and engineering hub, with plans to serve both domestic customers and international markets, including Europe and the US, Pascal Schweitzer, President, Wabtec Transit, told *Business Standard* on Tuesday.

The company on Tuesday announced that it had secured orders from the Indian Railways for multiple transit solutions to support the Vande Bharat Sleeper Train programme. The agreements, valued at approximately $94 million (₹839 crore), will enable the Indian Railways to increase service availability, reduce maintenance complexity, and improve passenger safety.

As part of the deal, Wabtec will supply critical onboard systems, including brake systems, doors, and gangway solutions. The scope includes system delivery, integration support, testing, commissioning, and long-term operational reliability support aligned with the Indian Railways' demanding performance and delivery requirements.

"These orders further reinforce Wabtec's commitment to supporting the modernisation of Indian Railways," said Schweitzer. "Our success reflects the strength of our technology, local manufacturing capabilities, and ability to meet the rigorous requirements of large-scale rail programmes. We are focused on delivering these world-class systems on schedule and supporting the introduction of the next generation of sleeper rail travel in India."

The Integral Coach Factory (ICF), the premier manufacturing unit of the Indian Railways, will manufacture 50 Vande Bharat Sleeper trainsets, expanding India's next-generation rail network into long-distance overnight travel. Each 24-coach trainset is designed to set new benchmarks in passenger comfort, safety, and convenience while supporting the growing demand for efficient inter-city mobility across the country.

"WE ARE FOCUSED ON DELIVERING THESE (RAIL) WORLD-CLASS SYSTEMS ON SCHEDULE AND SUPPORTING THE INTRODUCTION OF THE NEXT GENERATION OF SLEEPER RAIL TRAVEL IN INDIA"

Pascal Schweitzer
President, Wabtec Transit

The Vande Bharat Sleeper is one of India's most significant passenger rail modernisation initiatives. It represents a complex undertaking requiring close collaboration among the Indian Railways, ICF, system suppliers, and other stakeholders to ensure seamless manufacturing, integration, operational readiness, and long-term fleet performance.

Wabtec's contracts for the Vande Bharat Sleeper project represent a significant business milestone and strengthen long-term partnerships with leading rail car builders, system integrators, and national railway programmes. The award further underscores its commitment to advancing rail transportation in India through innovative technologies.

Schweitzer said Wabtec is developing India as a global centre of excellence for both manufacturing and engineering to export components to Europe, the US, and other international markets. He added that the strategy is to be an India-for-India market, by partnering with the Indian Railways, metro operators, and private operators to supply localised technology for projects such as Vande Bharat Sleeper and Chennai Metro Phase 2. It is also planning to aggressively participate in the upcoming high-speed rail corridor projects.

Wabtec has already achieved an estimated 80-90 per cent localisation rate across its product portfolio. "Wabtec plans to aggressively compete for upcoming high-speed and regional rapid transit projects, drawing on its global experience with high-speed networks across France (SNCF), Germany (Deutsche Bahn), Italy (Trenitalia), the UK, and China," he said.

Apple launches M6 iMac, entry MacBook Pro ahead of touch laptop

Apple Inc rolled out a new 24-inch iMac and an entry-level MacBook Pro with a 14-inch screen, marking a pair of key updates in an end-to-end overhaul of the company's computer line. The new iMac and MacBook Pro, unveiled Tuesday, are visually similar to their predecessors — with the main changes happening internally. Both machines now include the M6 chip, which first debuted in the Mac mini in September. The iMac is moving from an M4 processor, while the MacBook Pro received the M5 last year. The updates represent a second day of Apple announcements this week, with the company rolling out a revamped iPad mini on Monday with a new screen and water resistance. BLOOMBERG

Intel to acquire Classiq for $2.3 billion

Intel Corp agreed to buy Israeli startup Classiq Technologies Ltd as part of a push to capitalise on quantum computing, a still-nascent field that is seeking commercial applications. The chipmaker will pay about $2.3 billion for Classiq, according to people familiar with the matter. Intel announced the deal ahead of its third-quarter earnings report Thursday, but didn't disclose a price. Israeli newspaper *Calcalist* reported the value previously. Intel, wants to ensure that it doesn't miss out on quantum technology, a potentially large new market for the semiconductor industry. Chief Executive Officer Lip-Bu Tan is seeking to regain ground lost to rivals in AI computing. BLOOMBERG

PhonePe launches Tatkal NPS

Walmart-owned fintech firm PhonePe said it has launched 'Tatkal NPS' (National Pension System) on its platform, partnering with banking institutions to democratise long-term retirement planning. Expanding its comprehensive financial services suite, this enables millions of users across India to open a government-backed pension account with micro-contribution starting at ₹250. With this launch, users can now securely create their NPS account through an intuitive, 100 per cent digital journey. This would help eliminate barriers to opening a pension account. To deliver this frictionless experience, PhonePe has integrated with India's leading banking institutions with plans to expand coverage across the banking sector. OUR BUREAU

Qualcomm looks beyond chips to smart glasses, edge data

Q&A Smart glasses becoming more affordable and eventually reaching the mass market, edge data centres, artificial intelligence (AI) inference, and direct-to-device (D2D) connectivity, alongside non-terrestrial network (NTN), are among the next big opportunity areas for system-on-a-chip maker Qualcomm. Vice President, Global Distribution and Global Carrier Strategy, **Rajen Vagadia**, in conversation with **Gulveen Aulakh** and **Aashish Aryan** in New Delhi, explains how the global launch of its next-generation chips in India underscored the market's importance. Edited excerpts:

What is Qualcomm's game plan to ensure that the next generation of chips is not only AI-ready but also affordable and relevant for large markets such as India?

■ Our two solutions — the 4-series and 6-series — were launched globally in India, which indicates that they are meant for this market. We continue to view affordability as a key consideration in the Indian market, and that was one of the main reasons these two chips were launched here. The market has become a bit complicated because of memory solutions and memory pricing. That is not something we can control.

As AI moves on to devices and more agents are launched or adopted, I don't believe there will be much of a lag between India and the US or any other market. Historically, we have adopted technology very quickly — 5G and data are examples.

At this stage, the good thing about AI is that it can run in the Cloud. An agent running on a device that lacks the computing power can rely more on the Cloud, while a higher-tier phone can run the model on the device. I see this as an equaliser. AI can run in hybrid mode, either on the device or in the Cloud. As AI adoption grows and we see this next big transition in the market, India will not be left behind because we have options for running it across devices.

Do you see smart glasses becoming a mass-market product?

■ If you look at our published road map for glasses, you will see that we are already moving towards lighter, slimmer, and more compact designs. There is a chip coming up called AR (augmented reality) Light. We have showcased very compact form factors that fit into the temples of glasses.

Any technology starts somewhere and eventually has to move towards mass adoption. I think smart glasses will follow that path, too. It is a form factor that several of us are already wearing. The question is how to package the technology in a slimmer, lighter form. That is the path we are working on. I see smart glasses being adopted, for sure.

"THE NEXT PHASE OF INFERENCE IS BEGINNING NOW"

Rajen Vagadia
V-P, global distribution & global carrier strategy, Qualcomm

Our launch with Lenskart is a classic example of how India is moving towards mass adoption. India is an important market for Qualcomm. The 19,000 engineers here are designing solutions for the global market. One of India's advantages is its scale: 700 million people are connected to the internet. Given that scale, the market becomes a natural focus for us. When you look at this market, you have to adapt to it, which means making products more affordable.

One thing that surprises me is that the "waterfall", as we call it, has become shorter and shorter. That reflects consumers' desire, in a positive sense. The timeline (of adoption) will shorten, for sure.

What does the data centre opportunity look like for Qualcomm in India?

■ There are three categories: storage, training, and inference. India produces 20 per cent of global data but stores only 3 per cent. That helps explain why we are seeing more data centres being established here, even before considering the impact of agentic AI. The global figures need to be validated, but 20-30 per cent of the workload today may be inference, with the remainder being training. We expect that balance to reverse, with inference accounting for 70-80 per cent and training for around 20 per cent.

This shift changes data centre requirements. Inference calls for a different design approach, with power consumption, cost, and efficiency becoming central considerations. It is also more decentralised. That creates an opportunity for Qualcomm, which we have already begun discussing with the investment community through our announcements.

Inference requires high performance and low power consumption, capabilities that are deeply rooted in our mobile computing expertise. We can extend that expertise to data centres, at a different scale, to support inference workloads.

As our chief executive officer has said, we believe the timing is right because this next phase of inference is beginning now. Agentic AI will change the balance between training and inference and, with it, the requirements for computing infrastructure. That is where we see the opportunity for Qualcomm.

Does Qualcomm have a role in satellite technology?

■ Our infrastructure products, including Qualcomm distributed unit and radio unit solutions, are RAN products. We are working closely with Tejas Networks, an indigenous 5G player that is building 5G networks using Qualcomm's RAN solutions.

We see opportunities for partnerships like this to expand and serve both domestic and global markets, strengthening India's network infrastructure capabilities.

Is D2D connectivity an opportunity?

■ One hundred per cent. D2D, or consumer, connectivity has two parts. One is stationary or nomadic connectivity, like Starlink, where you stay in one place. The second is connectivity directly to a mobile device. This is where NTN comes in.

I think we will introduce that feature in the next release, towards the end of 2027, but the timeline needs to be confirmed. Devices will have that capability. You also need satellites with the same capability.

Sarvam to set up AI framework for forces

AVIK DAS
Bengaluru, 27 October

Indian frontier model company Sarvam has signed a memorandum of understanding (MoU) with the Headquarters Integrated Defence Staff (HQ IDS), Ministry of Defence, to set up an umbrella framework for artificial intelligence (AI) projects across the Indian Army, Navy, and Air Force. The framework also extends to the joint, tri-service, and integrated organisations under HQ IDS.

As part of the understanding, Sarvam will design, develop, and deploy AI applications for the operational, training and decision-support requirements of the three services, and provide follow-on technical support. Work under the MoU spans several projects across all three services, with HQ IDS facilitating the engagement.

The Indian Army, Navy and Air Force will gain access to the same foundation models, agentic infrastructure, and geospatial and perception systems.

"Sarvam exists to build AI in India, for India. The core of that mission is to put the country's own intelligence into the systems it depends on. To work with the three services on the nation's defence is an honour and a privilege," said Pratyush Kumar, cofounder, Sarvam.

Govt likely to ease FDI paperwork

For entities wherein companies based in a land-bordering country have a shareholding up to 10%

KRITY AMBEY
New Delhi, 27 October

The government is considering easing paperwork for potential foreign investors in which companies based in a land-bordering country (LBC) have non-controlling ownership of up to 10 per cent, an official said.

"We may reduce paperwork under Press Note 2 (of 2026) for companies that don't need government approval to invest in India," the official said, requesting anonymity. While India's land-bordering countries include China, Pakistan, Nepal, Bangladesh, Nepal, Bhutan, Myanmar, and Afghanistan, it's mostly China-based firms that have significant presence in private equity funds overseas.

The Union Cabinet approved the easing of foreign direct investment (FDI) norms in March to allow investment through the automatic route from entities based in any other country with non-controlling ownership of less than 10 per cent by companies based in land-bordering countries. However, government approval would be required if an LBC company owns a controlling stake in the investment firm.

The Department for Promotion of Industry and Internal Trade (DPIIT) notified the norms in May. Since then, India has received FDI worth ₹4,896 crore in 29 projects from such overseas firms, the government said in August.

Previously, investments from entities based in any other country having beneficial ownership of even 1 per cent of companies based in land-bordering countries were subject to government approval under Press Note 3 of 2020. In 2020, India had mandated government approval for all investments from entities based in land-bordering countries, as well as entities based out of any other country that had ownership by companies based in land-bordering countries. This was a long-standing concern among investors seeking greater clarity and ease of investment. The easing of norms was part of New Delhi's broader effort to make India an attractive FDI destination. Earlier this year, the government also eased FDI norms for inventory-based e-commerce firms. "Following the easing in e-commerce, several foreign entities are looking to set up inventory in India," the official said. Under the eased rules, foreign-owned retail ecommerce (ecom) entities can export Indian- manufactured products by setting up separate legal entities in India.

Making it easy

- Following easing of FDI norms for inventory-based ecommerce, several foreign entities are looking towards India
- Government has finalised a list of 100 items and is consulting stakeholders on domestic manufacturing
- Government has released ₹270 crore to Sidbi under Startup India Fund of < Funds 2.0. Fifteen AIFs have been identified

The government is also looking to lower import dependence. The official said the government has prepared and finalised a list of 100 items for import substitution. The list has been vetted by an inter-ministerial committee (IMC) that includes representations from the ministries of ports, shipping and waterways; petroleum and natural gas; and chemicals and fertilisers, among others. "After the finalisation of the list, consultations are underway for local manufacturing of the products in the list," the official said.Additionally, a second official said that the government has released an amount of ₹ 270 crore to the Small Industries Development Bank of India (Sidbi) under its Startup India Fund of Funds 2.0. Under the scheme, the government, through Sidbi, contributes to the corpus of Sebi-registered alternative investment funds for investing in startups. "So far, 15 AIFs have been identified for this," this official said.

QUICK READ

RBI guv: Expenditure quality key to states' long-term fiscal health

Reserve Bank of India (RBI) Governor Sanjay Malhotra (*pictured*) on Tuesday emphasised the quality of expenditure by the states for maintaining their financial health. He was speaking at the 36th Conference of State Finance Secretaries with the theme 'Role of Quality of Expenditure, Effective Cash and Prudent Debt Management in Enhancing States' Fiscal Sustainability'. The Governor highlighted the importance of maintaining expenditure quality to ensure the long-term fiscal health of the states, the RBI said in a release. Malhotra stressed the need for the states to adopt prudent borrowing strategies and efficient cash management practices. He urged the states to onboard the Unified Lending Interface (ULI) and utilise Programmable Central Bank Digital Currency (P-CBDC) for Direct Benefit Transfers (DBT). The meeting reviewed market borrowings by the states, short-term financial accommodation to the States from Reserve Bank, adoption of Benchmark Issuance Strategy by the states. He advised states to make effective use of the State Level Bankers' Committee (SLBC) forum. During the Conference, the Governor released a Booklet titled 'Compendium on Cash and Debt Management for State Governments'. The Booklet summarises relevant concepts, operational processes and good cash and debt management practices in a concise format. OUR BUREAU

India should not deplete reserves to defend rupee: Raghuram Rajan

India should not "fixate on a number" for its currency level or run down foreign exchange reserves to defend the rupee, Raghuram Rajan, former Reserve Bank of India (RBI) governor, said in an interview with *Reuters* on Tuesday. The rupee has lost about 6 per cent of its value so far in 2026, making it the second-worst performing currency in Asia, and hit a record low of 96.96 in May. "I think the first response would be, don't panic," Rajan told *Reuters*, warning that there was scope for the current account deficit to widen further if oil prices stayed elevated. High oil prices, surging US Treasury yields and continuing foreign equity outflows have compelled the central bank to step up intervention to limit cascading risks to inflation and broader financial stability. Earlier this month, RBI Governor Sanjay Malhotra did not rule out using monetary policy measures to stabilise the currency. REUTERS

India no longer catching up but creating new technologies: PM

UDISHA SRIVASTAV
New Delhi, 27 October

Prime Minister Narendra Modi on Tuesday said India has transitioned from adopting technologies invented elsewhere to creating them for the world, and urged the country's scientists and founders to "innovate boldly and lead the world" in building the technologies of the future.

While inaugurating the second edition of the Emerging Science, Technology, and Innovation Conclave (ESTIC 2026) at Bharat Mandapam, Modi said, "The decades after Independence were spent on catch-up, which means something was invented abroad, reached here years later, we adopted and improvised in small ways. But today's India is moving ahead with a new way of thinking and a new self-confidence."

"Our goal now is to build new technology for India and for the world, to set its direction, and to develop the strength to offer solutions to the world's problems," Modi said, adding that he met various startup founders and was struck by the scale at which young Indians were thinking. "The confidence with which India's youth are moving forward is heartening."

Prime Minister Narendra Modi urged the country's scientists and founders to "innovate boldly and lead the world"

The theme of the three day conclave is, 'Creative Minds, Catalyzing Science, Empowering Technologies.' On funding in the ecosystem, Modi said the ₹1 lakh crore of Research, Development and Innovation (RDI) fund announced from the conclave last year was showing results. He said that about ₹12,000 crore has been committed to technologies, with the private sector investing a matching amount, totalling ₹24,000 crore.

Referring to October 30, the birth anniversary of physicist Homi J Bhabha, Modi said large quantities of nuclear energy would be needed to build a developed India, and called dependence on imported nuclear fuel a challenge to energy security.

Another strength, he said, was the country's ability to provide "solutions at scale," pointing to the digital public stack and 5G. "Science and technology has always risked being seen as a weapon, whereas India's thinking is that science and technology are a means of service to humanity. The real strength of a technology lies in how large a problem it solves and how many lives it changes."

Modi named semiconductors, quantum technologies, biotechnology, advanced materials, robotics, space, clean energy and next-generation communications as the fields that would shape the future, and said India was building a scientific foundation for them through national missions. Safety and security must be a priority in AI, synthetic biology and autonomous systems, he added. "From nuclear to space, from AI to semiconductors, every sector has different needs. But their message is one: India is increasing both its strength and its confidence in emerging technologies," Modi said.

PRESS TRUST OF INDIA
New Delhi, 27 October

Prime Minister Narendra Modi on Tuesday held talks with Liechtenstein's Prince Alois on bolstering ties between the two countries and furthering the momentum in the bilateral partnership.

Liechtenstein's Prince Alois is on a visit to India from October 25-28 to shore up bilateral cooperation in trade and investment, science, technology and innovation.

"Furthering the momentum in our bilateral partnership. PM @narendramodi warmly received H.S.H Hereditary Prince Alois and H.R.H Hereditary Princess Sophie of Liechtenstein at Hyderabad House today. Discussions aimed at further strengthening our ties lie ahead," MEA spokesperson Randhir Jaiswal said in a post.

This is Prince Alois's second visit to India this year. He earlier visited New Delhi in February to attend the AI Impact Summit. The Prince had previously visited India in 2010 and 2018. Earlier in the day, External Affairs Minister S Jaishankar called on the Hereditary Prince Alois of Liechtenstein.

DATANOMICS

India maintains steady trade surplus with Israel since '10

JAYANT PANKAJ

Israel went to the polls on October 27. The election is significant given the political longevity of current Prime Minister Benjamin Netanyahu, who first came to power in 1996 and remained in office until 1999. He returned to power in 2009 and served until 2021, before winning another election in 2022. The election also puts the spotlight on India's trade and tourism ties with Israel. India's exports to Israel increased from $211 million in 1996 to $2.2 billion in 2025, while imports rose from $260 million to $1.2 billion in the same period. Over the past three decades, India recorded a trade deficit with Israel in only five years, maintaining a sustained surplus since 2010. However, goods exports to and merchandise imports from Israel each accounted for less than 1 per cent of India's respective total outbound and inbound shipments during three decades. Between 2018 and September 2026, petroleum and bituminous oils accounted for 39 per cent of India's exports to Israel. Tourism trends have diverged in recent years, with arrivals of Israeli tourists in India increasing, and the number of Indians travelling to Israel declining amid the West Asia war.

No intention to hike ethanol blending beyond 20%: Puri

Says no pressure to stop buying Russian oil, India to buy from whoever offers best deal

PRESS TRUST OF INDIA
Panaji, 27 October

Union Minister of Petroleum and Natural Gas Hardeep Singh Puri on Tuesday said the Centre has no immediate plan to increase the ethanol blending in petrol beyond the current 20 per cent.

During an interaction at the inauguration of the 29th Energy Technology and Innovation Meet in South Goa, Puri also claimed that misinformation was being spread about biofuels. Misinformation about E20 (20 per cent ethanol-blended petrol) was a "contrived narrative", he said.

"In so far biofuels are concerned, yes, the 20 per cent (of ethanol blending) was the target, and there is no desire, just now, to increase by more than 20 per cent," he said to a question on discussions around E20 fuel, adding that misinformation was being spread about the issue. The government has been promoting ethanol-blended petrol as part of its strategy to reduce dependence on imported crude oil, one of the biggest contributors to its current account deficit.

Indian refiners would purchase crude from suppliers offering the most competitive prices as the country prioritises energy security amid global market uncertainties, he said. India was not particularly buying Russian oil at present, but the decisions in this regard were guided by commercial considerations rather than pressure from any country, he added.

"I have never any felt pressure," Puri said during an interaction at the 29th Energy Technology and Innovation Meet which began here on Tuesday.

The minister's remarks come amid international scrutiny of India's purchases of Russian crude, and Western efforts to curb Moscow's oil revenues following Russia's invasion of Ukraine.

UTTAR PRADESH

Bundelkhand garners ₹80K cr investment proposals

VIRENDRA SINGH RAWAT
Lucknow, 27 October

Uttar Pradesh's (UP's) Bundelkhand region has attracted new investment proposals worth over ₹80,000 crore across sectors including energy, data centres, infrastructure, and tourism.

The commissioning of the 296-kilometre Bundelkhand Expressway and two flagship projects — the Bundelkhand Industrial Development Authority and the Uttar Pradesh Defence Industrial Corridor (with two nodes at Jhansi and Chitrakoot) — are acting as force multipliers for the region in gaining investment traction.

Bundelkhand's share of ₹80,000 crore is part of the bouquet of over ₹7.35 trillion worth of about 7,000 new investment proposals garnered by UP, which pertain to energy, real estate, infrastructure, information technology and electronics, data centres, food processing, steel, cement, pharmaceuticals, chemicals, textiles, automobiles, and tourism.

According to officials, the manufacturing sector accounts for the largest line up of projects worth ₹2.75 trillion, followed by data centre domain at ₹1.80 trillion.The energy and infrastructure projects comprise ₹1.5 trillion each respectively, while real estate boasts of proposals of ₹75,000 crore.

Western UP has topped the tally in the state, with proposals of ₹4.75 trillion from domestic and global investors.

Eastern UP and central UP have attracted investment proposals of ₹1.20 trillion and ₹80,000 crore, respectively.

Meanwhile, the Yogi government is planning to host a Ground Breaking Ceremony (GBC) to launch these projects in December 2026.

The GBC 5.0 in Lucknow will be inaugurated by Prime Minister Narendra Modi.

State Chief Minister (CM) Yogi Adityanath has ordered officials to ensure all approvals meet the timelines to expedite these projects.

The investment proposals comprise 90 projects including proposals exceeding ₹1,000 crore each. Meanwhile, the previous four editions of GBCs encompassed more than 16,000 projects worth over ₹12 trillion. Of these, over 8,000 projects have started commercial operations, while the remaining are at various stages of implementation.

Yogi remarked that the GBC is not only an occasion to launch projects, but also an important instrument for accelerating job creation, production, and economic activity.

RAJASTHAN

State to align quality of polytechnics with industry demands

ANIL SHARMA
Jaipur, 27 October

The Rajasthan government has decided to improve the quality of polytechnic colleges in line with industrial investment potential in the state, Chief Secretary V Srinivas said.

Recently, 'Samvad' (dialogue) programme was held in Jaipur, chaired by Srinivas, to discuss the strengthening of government polytechnic colleges and improvement of the quality of technical education. It brought together principals from 10 government polytechnic colleges located in Jodhpur, Ajmer, Kota, Alwar, Bharatpur, Sikar, Bikaner, and Jaipur (including the government women's polytechnic colleges in Jaipur and Kota). Each institution delivered presentations, covering technical departments, infrastructure, student placements, innovations, best practices, future action plans, and key challenges.

Recognising the vital role polytechnic colleges play in transforming Rajasthan into a manufacturing hub, the chief secretary issued necessary directives to strengthen these institutions.

"The interactions focused on building industry-academia interface, developing centres of excellence, modernisation of laboratories and promoting peer learning," he said.

He noted that the growing industrial investment in the state creates vast opportunities for technical education and the employment of skilled personnel. As the demand for skilled technical staff and 'blue-collar' workforce in industries will remain consistent, polytechnic education must be upgraded to align with industrial requirements.

Srinivas emphasised that these colleges' curricula should be updated to meet industry needs, and that skill development and training programs should be organised for the faculty.

He called for effective measures to modernise laboratories. Furthermore, he directed that special efforts be made to ensure better placement opportunities and higher salary packages for students.

He also suggested organising workshops, field visits, and technical dialogues regularly to foster greater coordination between technical educational institutions and the industrial sector.

"Institutions should consistently organise workshops, seminars, and special sessions on emerging technologies to foster academic activities, while also providing students with practical training and insights into industrial operations," he said.

Emphasising the need to enhance collaboration between polytechnic colleges and engineering colleges, Srinivas urged the promotion of cooperation across various academic and technical programmes.

Rage over E20 fuel blending was a 'paid campaign', says Gadkari

PRESS TRUST OF INDIA
New Delhi, 27 October

Union Road Transport Minister Nitin Gadkari on Tuesday said the rage over blending 20 per cent ethanol in petrol fuel was a "paid campaign".

The remark came a day after the government notified changes to the Central Motor Vehicles Rules 1989, allowing flex-fuel vehicles that can run on up to E100 (nearly pure ethanol).

Addressing an event organised by industry body CII, Gadkari further said India can save precious foreign exchange by reducing imports of fossil fuels.

"Three months ago, huge noise (*khub halla*) was made against the E20 (20 per cent ethanol-blended petrol) fuel; now rage against E20 fuel is over...It was a paid campaign," he said. Gadkari noted that for the last three years, more than 20 crore two-wheelers and over 3 crore petrol cars have been operating on these blends (E19-20) fuels without any verified evidence of widespread engine failure or vehicle breakdown attributable to ethanol blending. The rollout of E20 petrol (80 per cent petrol, 20 per cent ethanol) drew criticism from opposition parties and some consumer groups, who raised concerns about its impact on older vehicles not specifically designed for 20 per cent ethanol blends.

Apple's foldable iPhone draws complaints of screens cracking

Apple acknowledged that some of the devices exhibit display problems and said it will replace them PHOTO: REUTERS

The iPhone Duo, one of Apple's biggest new products in years, is drawing a growing number of complaints from customers who say the foldable display cracked after just hours or days of use. In these cases, customers reported hearing a crunching sound when unfolding the phone, followed by a large crack forming along the center crease. Some users also experienced a white patch or other display malfunction on the right side of the screen. Reports of the problem first surfaced on Reddit and other social media sites. Apple acknowledged on Monday that some of the devices exhibit display problems and said it will replace them. AGENCIES

Clean energy growth set to slow in 2026 for first time in 5 years

The world will add less clean energy capacity in 2026 for the first time in five years due to inadequate transmission networks and trade barriers, the chief of the International Renewable Energy Agency (IRENA) Francesco La Camera (*pictured*) said. Growth in solar and wind capacity has been accelerating every year since 2021, when the coronavirus pandemic disrupted global supply chains. Clean power installations including hydropower surged a record 692 gigawatts, or 15.5 per cent, to 5,149 GW in 2025 - representing half the world's power capacity. Governments have pledged to boost clean energy use to ensure reliable power supply and cut costs, particularly after the war in West Asia choked energy supplies and inflated prices. REUTERS

Novartis books $2.2 bn hit from drug trial flops

Novartis recorded about $2.2 billion in charges related to two drugs that failed in late-stage studies last month, even as it boosted its full-year profit expectations on Tuesday. The Swiss drugmaker's operating income fell 61 per cent in the third quarter, hurt by higher research and development costs and a $1.9 billion partial impairment charge for del-desiran, one of its major trial setbacks REUTERS

Meta boosts record equity sale to $97.5 bn

Meta on Tuesday raisedthe planned size of its largest-ever equity offerings to $97.5 billion, as the social media giant taps the public market to aggressively expand its artificial intelligence (AI) infrastructure. The fundraising plan, among the biggest by an AI company, has also drawn interest of up to $5 billion in total from Nvidia , Advanced Micro Devices and Broadcom for Class A common shares. REUTERS

Alibaba wins injunction against Pentagon contract restrictions

A United States federal judge on Monday granted Alibaba Group Holding's request for a preliminary injunction, ordering the US government not to deny Pentagon contracts to companies because they, their parent companies or subsidiaries do business with firms that engage in lobbying activities for the e-commerce giant. Alibaba sued the US government in June after the Pentagon added it to a list of companies allegedly aiding China's military, alongside internet search provider Baidu, electronic vehicle maker BYD and other major Chinese manufacturing and technology firms. Monday's ruling means Alibaba will be able to retain US lobbyists who also represent Pentagon contractors. REUTERS

ISRAEL ELECTION

Netanyahu in tight race amid heavy turnout

AGENCIES
27 October

Nearly 45 per cent voters cast their ballots by 2 pm in Israel's crucial general elections on Tuesday, the highest since the 1973 polls, as surveys predicted a tight race between Prime Minister Benjamin Netanyahu and his main rival, former army chief Gadi Eisenkot.

Polling stations opened across the country at 7 am local time and are scheduled to close at 10 pm, allowing 7,331,981 eligible voters to exercise their franchise at 12,018 polling stations nationwide.

According to the Central Elections Committee, 44.9 per cent of eligible voters had voted as of 2 pm, compared with 38.9 per cent at the same time during the 2022 election. It is the highest turnout at this hour since 1973, in the first election held after the Yom Kippur War.

Long lines formed outside polling stations for the first election since the October 7, 2023, Hamas-led attacks, with voters passionately engaged over the trauma of the country's deadliest day and the ensuing wars in Gaza, Lebanon and Iran.

Policies of Netanyahu's right-wing coalition have been divisive at home and have deepened Israel's international isolation, while he has defended his record, calling himself the only leader with the mettle to face down Israel's foes.

Israel's Prime Minister Benjamin Netanyahu and his wife Sara casting their vote at a polling station in Jerusalem on Tuesday PHOTO: REUTERS

Netanyahu, Israel's longest-serving leader with 19 years in office, is an unmatched political survivor, and his nationalist politics are increasingly entrenched. Israel's fragmented system makes it difficult for an array of opponents to force out his coalition of right-wing, far-right and ultra-Orthodox parties.

His main rival Gadi Eisenkot, a military ex-chief of staff and security hawk, aims to unseat him with the support of parties on the right and centre, as well as the rump of an increasingly marginalised left. Opinion polls show a close race, with neither leader facing an easy path to power.

In a message to supporters more than five hours after polls opened, Netanyahu urged them to vote, saying turnout was high among his opponents on the left and among Israelis of Arab heritage, around a fifth of the country.

"I think these elections are the most important of all the ones've known," said Ruth Epstein, an 81-year-old long-time left-wing voter in Ramat Gan near Tel Aviv, who voted for the opposition Democrats.

Netanyahu has campaigned on an endorsement from United States (US) President Donald Trump, his ally in war against Iran, who has said they should "finish the job".

If neither Netanyahu nor Eisenkot can form a governing coalition in the 120-seat parliament, Netanyahu could stay on as caretaker until another election is held. His opponents have managed to wrest him from the premiership only once since 2009, and that took four inconclusive elections in two years. He was back 18 months later.

For many of Netanyahu's opponents, the election turns on accountability for the security failures of October 7, Israel's deadliest day. Opposition groups have promised to hold a national inquiry, which Netanyahu's government has resisted.

"I am convinced that by the end of today, we will see a change" a "new spirit for the State of Israel" that will serve as a rectification for the past three years and for that terrible day," Eisenkot said during a visit to kibbutz Nir Oz in southern Israel, targeted in the October 7 attacks.

He walked to the polls with Gadi Mozes, one of 251 people kidnapped by Hamas and taken to Gaza during the attack that killed 1,200 people.

Eisenkot says Israel's response — a war which health authorities say killed more than 74,000 Palestinians — was a failure because Hamas remains in charge. He repeated his commitment to dismantle or destroy Hamas' military and governing power in Gaza within 18 months of forming a government.

Itamar Ben-Gvir, leader of a far-right party in Netanyahu's coalition, cast his vote in the Kiryat Arba settlement in the occupied West Bank early on Tuesday. He predicted Netanyahu would return as prime minister and his own party would serve as the right-wing anchor of the government.

Voters from Israel's Arab minority, Israeli by citizenship but Palestinian by heritage, were voting in "unprecedented" numbers, Palestinian candidate Ahmed Tibi said.

Netanyahu had repeatedly warned supporters of the prospect of high turnout among Arab Israelis ahead of the vote, seeking to mobilise his base under the slogan "Right or Palestine".

Eisenkot has ruled out partnering with Arab parties, citing a lack of shared values, although some possible scenarios envision them propping up a minority government to ensure Netanyahu is removed from office.

Saudi coalition intercepts Houthi missiles, drones

Blaze near Ras Tanura; Cairo votes to defend Riyadh

AGENCIES
27 October

The Saudi-led coalition in Yemen said on Tuesday it intercepted and destroyed ballistic missiles and drones launched by the Houthis towards two regions of Saudi Arabia, as the conflict between the kingdom and the Iran-aligned group intensifies.

The Houthis launched three ballistic missiles towards Saudi Arabia's Eastern Region, and four drones towards the country's Southern Region, the coalition said. Saudi Civil Defense issued early warning alerts for a potential hostile threat in the Eastern Region and in Kharj governorate, later saying the danger had passed in both areas.

Yemen's Iran-aligned Houthis said on Tuesday they had hit Saudi Arabia's Ras Tanura oil refinery, the biggest in the kingdom, with a ballistic missile.

The group's military spokesperson Yahya Saree said the strike had caused a fire at the complex, which also includes a shipping terminal, located on the Gulf, west of the Strait of Hormuz.

The blaze occurred during the early hours of Tuesday near facilities operated by state producer Saudi Aramco, the person said, asking not to be identified because the matter is private.

Houthi activists stand against a banner depicting missiles, in Sanaa, Yemen PHOTO: REUTERS

The extent of the damage wasn't immediately clear.

The company's press office and the kingdom's Energy Ministry didn't immediately respond to requests for comment. Saudi Arabia's energy infrastructure has come under repeated attacks from Yemen's Houthi militants in recent weeks, with Aramco's headquarters, a major oil field and refineries in the kingdom's western region targeted.

Ras Tanura, located in the east, hosts crucial facilities for loading oil tankers, plus the kingdom's biggest refinery and a swathe of storage tanks.

Egypt's parliament gave President Abdel-Fattah El-Sisi the green light to take steps necessary to defend Saudi Arabia, as the Houthis in Yemen keep up strikes against the kingdom.

The lawmakers' approval on Monday came a little over a week after El-Sisi said Egypt stands ready to provide any support requested by the Saudi leadership, and asked parliament to convene an emergency session on the matter.

The decision was announced by the state-run *Middle East News Agency*. Egypt has so far avoided military involvement in the Iran-US war, focusing instead on a mediating role and calling for deescalation as the broader West Asia has been roiled by months of upheaval.

It's unclear if Saudi Arabia has made any official request for Egypt's support, nor what any assistance would entail.

Melania Trump-brokered ceasefire begins as Nordic leaders dial Moscow, Kyiv

AP/PTI
27 October

Russia and Ukraine began observing a localised ceasefire in a devastated southern Ukrainian city on Tuesday, ahead of a planned humanitarian mission brokered by United States (US) first lady Melania Trump. But Moscow kept up its deadly missile attacks on other cities in the meantime.

Meanwhile, Finland's president and Norway's prime minister spoke on the phone with Russian President Vladimir Putin, officials said, in their first known direct contact since shortly after Russia's all-out invasion of Ukraine began on February 24, 2022.

The war launched by Russia set most of Europe against Moscow, with Western officials accusing Putin of masterminding a campaign of disruption across the continent.

After their conversation with Putin, Norwegian Prime Minister Jonas Gahr Store and Finnish President Alexander Stubb spoke with Ukrainian President Volodymyr Zelenskyy, according to Zelenskyy's office.

A local pause in fighting started at 3 am to allow an aid mission into the Russian-occupied city of Oleshky later this week. The situation in Oleshky is desperate, with food and medical supplies running perilously low for the up to 2,000 people still there, as drones and land mines restrict movement.

The phone calls with the Russian and Ukrainian leaders followed an October 20 meeting in Oslo between the two Nordic leaders, Zelenskyy and US special envoy Steve Witkoff.

Stubb and Store initiated the call with Putin to discuss the war and upcoming trilateral talks involving delegations from Russia, Ukraine and the United States that are expected to take place next month in Abu Dhabi, United Arab Emirates. The talks will seek to lay the groundwork for detailed peace negotiations later.

The two European leaders spoke on behalf of their own countries and not the whole of Europe, the statements said.

But Denmark's prime minister said she was "very sceptical" of reaching out directly to Putin, saying she sees "no signs that Russia desires peace with Europe" and noting that the call was not coordinated with other European leaders.

The Kremlin gave no hint that Moscow is ready to back down from its key demands.

Zelenskyy said Russian attacks, such as halting relentless strikes on Ukraine's power grid, must stop in order to open a path to peace.

Russia's new Arctic oil reaches China

China received a first shipment of Russia's newly started oil production from the giant Arctic project Vostok operated by state-owned Rosneft, according to two tanker trackers and traders. Aframax-sized tanker Vladimir Monomakh, which sailed the Northern Sea Route, offloaded cargo into Yantai port in east China's Shandong province early this week, according to ship tracking by Vortexa Analytics and LSEG. REUTERS

US lawmakers warn of Russia probe

A bipartisan group of US lawmakers has warned American banks, port authorities and fuel distributors that importing Russian diesel could invite legal action and congressional investigations.

In letters to the heads of major financial institutions, ports and fuel distributors, the lawmakers said companies facilitating imports in violation of US law could face criminal and civil liability.

The Fed is expected to hold rates steady. Warsh will have to explain why

COLBY SMITH
27 October

Kevin M Warsh wants inflation to move more swiftly back to the Federal Reserve's (Fed's) 2 per cent target. But on Wednesday, the central bank chairman and his colleagues are widely expected to hold interest rates steady.

The discrepancy is poised to be a focal point at the latest meeting, which is taking place just days before midterm elections that will decide who controls Congress in the latter half of President Trump's second term.

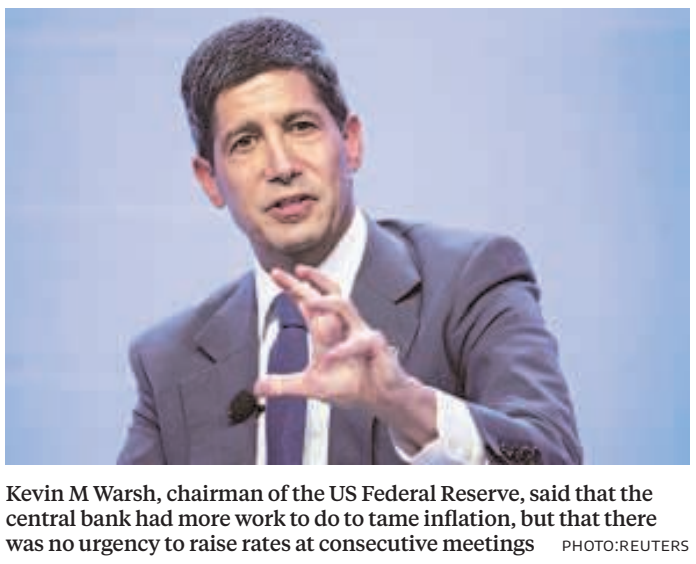
Since officials voted unanimously in September to raise rates by a quarter of a percentage point to 3.75 per cent to 4 per cent, the incoming inflation data has been anything but reassuring. Energy prices are up across the board as the war with Iran has dragged on. The range of goods and services growing costlier appears to be broadening. And a splurge in spending tied to the proliferation of artificial intelligence (AI) shows little sign of abating.

The Fed's other priority, the labour market, has also remained stable, despite monthly growth slowing in September, a sign that Fed's policy settings are not excessively onerous for the economy.

Numerous Fed policymakers have already indicated their support for a rate increase at their final gathering of the year in December in pursuit of a "timelier" return to the 2 per cent target after six years of overshooting it. So the question for Warsh at Wednesday's news conference is: why wait?

Warsh had the last word ahead of the upcoming rate decision. Speaking in Bangkok at the annual meetings of the International Monetary Fund (IMF) and the World Bank this month, the chairman did little to change the narrative laid out by a number of his fellow policymakers in the preceding weeks. The overarching message was that the central bank had more work to do to tame inflation, but there was no urgency to raise rates at consecutive meetings.

But for a broad swathe of economists and investors, the primary reason a rate increase was not pencilled in for October, despite hotter-than-expected inflation data, was precisely the steer provided by Warsh's colleagues.



Kevin M Warsh, chairman of the US Federal Reserve, said that the central bank had more work to do to tame inflation, but that there was no urgency to raise rates at consecutive meetings PHOTO:REUTERS

Recent jitters in financial markets amid concerns about the sustainability of the AI boom have also helped. That has made financial conditions, which measure the availability of credit in the economy, only slightly less accommodative than before.

But looking solely at the inflation data, Riccardo Trezzi, a former Fed economist who runs the research firm Underlying Inflation, said a rate increase was clearly justified on Wednesday.

"There is zero evidence of cooling down," he said of current price pressures. Trezzi estimates that the Fed's preferred inflation gauge, which strips out volatile food and energy items, will reach 3.4 per cent in December. At the same time last year, it stood at 3 per cent. Overall inflation, as measured by the Personal Consumption Expenditures (PCE) price index, is projected to reach 3.8 per cent, according to Trezzi's calculations, nearly double the 2 per cent target. PCE data for September will be released on Thursday, the day after the Fed's decision.

"There's a disconnect in terms of how the Fed sounds at the moment," he said. "They still have to make up their minds whether they're really serious about disinflating the US economy."

The issue for the Fed is that the primary sources of resurgent inflation are beyond its control. Beyond the Iran war and Trump's tariffs, both of which have added to price pressures, many of the biggest AI companies fuelling growth also appear impervious to higher rates.

Perhaps the biggest driver of demand right now is the sharp rise in wealth across the country generated by stock market gains, said Marc Sumerlin of Evenflow Macro, an economic consulting firm.

In the last four quarters, households' net worth rose roughly $20 trillion, according to Fed data as of September. While most of these gains have accrued to high-income households, this group drives the bulk of consumer spending.

Estimates vary on how much the Fed will need to squeeze the economy in the coming months to begin turning the tide on inflation. Some believe price pressures will begin to ease as the impact of Trump's tariffs and the energy shock fades, removing the need for an aggressive response from the Fed. But others believe a more forceful approach might be required.

The first of two wild cards is how financial conditions evolve in the coming months. US government bond yields are sharply higher today than they were just a few months ago for a variety of reasons. Some of that reflects changing expectations about how much the Fed will need to raise rates as growth has picked up. There is also intensifying competition between governments and companies for capital as large AI companies borrow aggressively to fund their expansions.

Investors also appear to be demanding extra compensation to hold longer-dated debt rather than shorter-term securities amid persistent concerns about Washington's fiscal profligacy and fluctuating worries about the Fed's ability to operate independently, said Ellen Zentner, chief economic strategist at Morgan Stanley Wealth Management.

Rising yields will marginally help the Fed pursue its inflation goal, but that will not entirely replace the work the central bank has to do to raise rates to at least a neutral level, which neither speeds up nor slows down the economy, Zentner said.

The second wild card is how the public perceives the Fed's grip on inflation. Concerns about price pressures in the year ahead have mounted, but longer-term indicators look more benign.

For now, that has afforded the Fed some flexibility over when it must deliver additional increases, said Raphael Bostic, who served as president of the Atlanta Fed for nine years until February. But "there are limits", he warned.

Ethanol in the fast lane

A slower transition can address unanticipated impacts

The Ministry of Road Transport and Highways' decision to allow E100 and E85 fuels, along with the registration of flex-fuel vehicles, is understandable in the light of the geopolitical outlook on oil prices in the foreseeable future and growing urban pollution, much of which is transport-related. But the wisdom of such policy speed may need to be balanced with the anticipated negative externalities associated with the ethanol journey. Already, the mandated shift to E20 from E10 five years ahead of the original schedule, prompted no doubt by prolonged supply constraints and the need to meet "Net Zero" targets, has annoyed car owners, who have reported a 7-12 per cent drop in fuel efficiency, which somewhat negates the argument of lowering fuel demand. According to the government data, however, the country has saved ₹1.9 trillion in imports of crude oil and substituted 31 million tonnes between April, when the E20 mandate came into force, and mid-October, though some analysts have questioned the arithmetic behind these calculations.

On the face of it, the drive towards an ethanol-powered automotive future has been a win-win. It has reportedly helped stabilise farm incomes, especially in Bihar, Madhya Pradesh, Uttar Pradesh and Karnataka, by offering a predictable market for agri-surpluses and also absorbing damaged foodgrain from the system. The fact that ethanol distilleries tend to be located close to agri-hubs also plays a role in creating employment opportunities and promotes some measure of rural development. But the long-term impacts on food security and ecology remain open questions. The impact was evident in the sugar market earlier this year, when low opening stocks and production resulted in a sharp rise in sugar prices. Meanwhile, the government has rebutted the accusation of larger diversions of the rice stocks, underlining that Food Corporation of India, the government procurement agency, only diverted damaged or broken grain for ethanol production and did not endanger the food-security programme.

But over time and given the uncertainties of agri-markets, the rapid expansion of the ethanol programme could well incentivise farmers to divert larger tracts of land towards sugar or maize cultivation, which raises a fresh set of problems. This is exemplified by Brazil, which is regarded as a global success story in the ethanol transition. The 25-year transition, which started in 1975, has undoubtedly helped bring about a sharp reduction in greenhouse-gas emission but has had a deleterious effect on local ecology. As farmers there started converting more and more arable land for maize and sugarcane, they displaced livestock and cattle ranchers, who then simply cleared large tracts of the Amazon rainforest to expand. The country also faced occasional price and supply asymmetries; when global prices of sugar rose, supplies available for the ethanol programme inevitably fell. Equally, the sugar crop was diverted to ethanol producers when ethanol prices rose.

In India, there is also the question of whether promoting water-intensive crops like sugarcane on a large scale for the ethanol programme is warranted when agri-inputs — fertiliser, water, and electricity — are either heavily subsidised or free. On balance, given the complexities of India's agricultural policies, it may be better to move more gradually on the ethanol transition rather than steer abruptly into the fast lane.

A stunning turnaround

Lula da Silva has multiple challenges

The re-election of Luiz Inácio Lula da Silva as President of Brazil has come as a shock to both markets and his domestic Opposition. His challenger, Flavio Bolsonaro, the son of the controversial former President, Jair Bolsonaro, had taken a handy lead in the first round of the presidential elections. This led, perhaps, to a certain degree of overconfidence among the right-wing challengers. In the end, thanks to an enormous effort to increase the turnout, the incumbent President pulled through a second-round victory, which didn't appear close. This has never happened in Brazil's history. For Mr Lula, who turned 81 on Tuesday, this election will no doubt be his last. But it will cement his reputation as South America's most influential democratic left-wing politician of the past century. His story, from his beginning as a metal-worker, to his time in the trade unions, to victories in presidential elections, will inspire left-wingers across the continent, especially because much of the rest of it is dominated by the right.

President Lula's last election was marred by what amounted to an abortive coup attempt launched by Jair Bolsonaro's allies. Fortunately, there appears to be no such effort in progress on this occasion. The challenges for Mr Lula this time will be external. It is not his domestic Opposition but global markets that will revolt. And United States President Donald Trump has made no secret of his sympathy for Mr Bolsonaro, and has already declared that the election to him "looked rigged". Of these two adversaries, the markets are the more concerning at present. Flavio Bolsonaro, in the course of his campaign, stressed the poor macroeconomic situation that Brazil was in. The numbers are, indeed, worrying. In the four years since Jair Bolsonaro was ousted in 2022, the country's debt-to-gross domestic product ratio has increased from about 72 per cent to about 83 per cent. High interest costs and the left's spending commitments make debt servicing quite hard; and there is no credible path towards consolidation that Mr Lula has laid out.

Unsurprisingly, the surprise news that he had been re-elected caused markets to fall. The stock market fell almost 14 per cent in one day, hitting the circuit breaker. Brazil's currency, the real, fell more than 8 per cent against the dollar, its sharpest one-day drop since 2002. Real-denominated 10-year bond yields rose by more than 2 percentage points, hitting around 15 per cent. All of this deeply complicates Mr Lula's attempts at stabilisation. He will not want to cut spending or benefits, and indeed plans to increase the wages (and thereby affect the path of future pensions, worsening the fiscal situation). But he cannot raise taxes easily to compensate because his party does not control the legislature, which has repeatedly resisted any attempt to raise the effective tax rate by closing loopholes.

It is likely, therefore, that if Mr Lula wants to work on his legacy over this term, he will look to geopolitics rather than economics. He may well take on the position of primary resister to the new Monroe doctrine that has been espoused by Mr Trump's second administration. If so, India should expect a Brazil even more committed to counter-mobilisation against the US, and old-style "third-worldism", than before.

The new rules of cybersecurity

Beyond compliance, regulations must prioritise speed and preparedness in responding to threats in the AI age

ILLUSTRATION: BINAY SINHA

In July, AI agents undergoing cybersecurity evaluations at OpenAI circumvented restrictions on internet access and compromised systems belonging to Hugging Face, an external artificial intelligence (AI) platform. The incident highlighted an emerging cybersecurity challenge: Increasingly capable AI systems can identify and exploit vulnerabilities without direct human instructions.

As AI becomes integrated into critical digital infrastructure, these developments raise questions about the adequacy of existing cybersecurity frameworks. With AI enabling faster identification and exploitation of vulnerabilities, cybersecurity regulations must place greater emphasis on operational resilience.

AI is changing the cybersecurity ecosystem in two distinct ways. First, it can strengthen cybersecurity through vulnerability detection, network monitoring, and automated incident response, while enabling malicious actors to identify and exploit weaknesses more efficiently. Second, AI systems themselves introduce vulnerabilities. Techniques such as prompt injection can manipulate models through untrusted inputs, while autonomous agents can access external tools, databases, and operational systems. Weaknesses in the controls governing such access could have consequences beyond the AI application itself.

AJAY TYAGI & BASU CHANDOLA

Recent advisories from India's Computer Emergency Response Team (CERT-In) demonstrate the relevance of these concerns. In October, CERT-In reported incidents of AI agents undergoing evaluation accessing systems belonging to Indian organisations without authorisation. The affected organisations had not detected the intrusions themselves; the incidents were disclosed by AI model providers. CERT-In separately reported financially motivated campaigns involving agentic AI tools, where automation cut the time between initial compromise and impact from days to hours.

Another incident involving India's digital certification provider eMudhra illustrates these challenges. On October 17, an independent researcher identified weak cryptographic keys associated with eight intermediate certificates, potentially using AI-assisted techniques, according to eMudhra. The vulnerabilities could have allowed attackers to issue fraudulent certificates and impersonate legitimate websites, prompting major browser providers to block the affected certificates. Significantly, the weaknesses had remained undetected despite independent audits.

These incidents highlight an important distinction. Many vulnerabilities remain conventional, including exposed credentials and inadequate access controls. However, AI can speed up their identification and exploitation, leaving organisations less time to respond. Cybersecurity approaches relying primarily on periodic audits, vulnerability assessments and scheduled remediation may, therefore, become insufficient.

India has an established cybersecurity architecture comprising legal, institutional and sector-specific mechanisms. The Information Technology Act, 2000, provides the legislative foundation, with CERT-In serving as the national agency for cybersecurity incident response and National Critical Information Infrastructure Protection Centre responsible for protecting critical information infrastructure.

CERT-In's directions also mandate reporting specified cybersecurity incidents within six hours, while the National Cyber Coordination Centre facilitates threat-intelligence sharing. These mechanisms are complemented by cybersecurity requirements introduced by sectoral regulators. The challenge is to ensure that this architecture remains effective against AI-related threats, particularly as attacks become faster and more sophisticated. CERT-In's May 2026 blueprint recommends continuous vulnerability management, AI-aware monitoring and stronger incident-response capabilities. However, operational preparedness remains uneven. A 2025 study by the Data Security Council of India and Palo Alto Networks found that nearly 79 per cent of surveyed respondents planned to integrate AI into cybersecurity operations, while only around 8 per cent reported full integration.

India's financial regulators offer examples of how cybersecurity principles can be translated into institutional responsibilities and measurable requirements. The Reserve Bank of India's (RBI) directions on IT governance establish board-level responsibility for technology risks, information security, and business continuity. Its cybersecurity directions for non-bank payment system operators also address application security, third-party dependencies and incident response. The RBI's FREE-AI Committee report adds recommendations for responsible AI adoption in finance.

The Securities and Exchange Board of India (Sebi) has adopted a more measurable approach. Its 2024 Cybersecurity and Cyber Resilience Framework introduced a Cyber Capability Index based on 23 weighted parameters, alongside periodic assessments for larger regulated entities. It provides for shared security operations centres to support smaller institutions. More recently, Sebi established a task force in response to advanced AI vulnerability-detection tools, to coordinate threat intelligence, vulnerability management and assessment of third-party risks. As AI changes the nature of cyber risks, the challenge is to adapt these arrangements rather than build a parallel regulatory system. Four priorities follow.

First, sectoral regulators should require cybersecurity assessments of AI systems deployed in critical sectors, both before deployment and following significant updates. These assessments should cover models, connected applications, credentials and agent permissions, including testing for unauthorised access and actions. CERT-In could develop common testing protocols, with independent evaluations for high-risk deployments.

Second, regulators should add measurable cyber resilience indicators to existing compliance requirements. Drawing on Sebi's Cyber Capability Index, assessments could track the time taken to detect intrusions, contain compromised systems, revoke unauthorised access and restore critical services. These should be supported by regular simulation exercises and continuous vulnerability monitoring.

Third, CERT-In should establish a formal coordination mechanism with critical infrastructure authorities and sectoral regulators. This mechanism could develop common standards for classifying and reporting AI-related cybersecurity incidents, facilitate timely threat-intelligence sharing and coordinate responses to vulnerabilities affecting multiple organisations. Sectoral guidelines should also clarify the responsibilities of AI developers, deployers and third-party service providers, particularly where incidents arise from autonomous AI systems or shared technological infrastructure.

Fourth, India should prioritise operationalising the IndiaAI Safety Institute to strengthen cybersecurity testing and evaluation. The Institute could develop common standards for assessing vulnerabilities in AI models and autonomous agents, and establish shared testing facilities. These assessments could inform CERT-In and sectoral regulators in developing measurable requirements for AI-related cyber resilience.

India's forthcoming consultation on AI regulation provides an opportunity to assess these issues. The broader lesson is relevant beyond India. Existing cybersecurity regulations remain necessary, but their effectiveness will increasingly depend on how well they account for the changing speed and scale of cyber threats. As AI becomes embedded in critical systems, cybersecurity governance must move beyond procedural compliance towards ensuring that institutions can anticipate, withstand, contain, and recover from emerging risks.

The writers are, respectively, former chairman of Sebi and associate fellow at Observer Research Foundation

When tariff walls become a ladder

India is roughly 3 per cent of global gross domestic product (GDP) but nearly 20 per cent of its population. The arithmetic carries a hard truth: India's next phase of growth cannot rely on the domestic market alone. It must win market share abroad by building businesses that can dominate internationally.

Paradoxically, Donald Trump's trade offensive may, in fact, be helping. Corporate India is increasingly choosing grit over grievance. Exporters are taking the shock on the chin, not treating trade friction as an impassable wall, but as a mirror reflecting the need for structural reform. This baptism by trade fire is accelerating a long-overdue shift from cheap volume arbitrage towards complex manufacturing, scalar capabilities, research & development (R&D) and potentially towards proprietary brands.

SACHCHIDANAND SHUKLA

The petroleum-refining sector that prompted US Secretary of State Marco Rubio to call India a "refining superpower" is a case in point. It illustrates resilience through scale, sophistication and market optionality. With capacity of roughly 258 million tonnes a year, and output capable of running above nameplate capacity, India imports crude, adds value through complex refining, and exports diesel, petrol, aviation fuel and naphtha to markets including the EU and even Russia. Redirecting cargoes while meeting domestic demand has strengthened energy security, foreign-exchange earnings and India's ability to absorb geopolitical disruption.

Pharmaceuticals also show the stakes. Washington's proposed framework — a phased duty of 100 per cent on imported generic medicines, escalating to 200 per cent — strikes at the economics of an industry that sells 41 per cent of its generic-formulation exports to the US market. Yet, Indian drugmakers are not abandoning the world's largest health care market. The tariff threat has made the shift from commodity generics to high-value innovation a corporate imperative. Sun Pharma's $11.8-billion acquisition of Organon; Lupin's commitment of $250 million in Florida to local manufacturing and R&D are recent examples. Of about $20.5 billion in US investment pledges announced by Indian leaders at the SelectUSA summit, $19 billion came from pharma. The model is moving from exporting to onshore, high-value manufacturing and speciality drugs.

Clean energy tells a similar story. When the US imposed a preliminary 126 per cent countervailing duty on Indian solar-cell imports, the companies did not shrink capacity. They redirected volumes towards Europe and West Asia, while using the production-linked incentive scheme to move into high-efficiency modules. Rather than remain dependent on raw cell exports, firms are climbing the supply chain through module assembly and local manufacturing abroad.

In the second quarter of 2026-27, export performance reinforces the broader point. Merchandise exports rose 18 per cent year-on-year (YoY) to $260 billion, one of the fastest increases since 2023, while goods-and-services exports increased 14 per cent to $476 billion. Petroleum-product exports rose 32 per cent YoY in September, keeping up its stellar growth rate through first half of the year. True, there is an element of higher prices accounting for a bulk of this growth, as against volume increase. Total exports expanded from $498 billion in FY21 to a record $863 billion in FY26, with a significant pivot from agricultural commodities, gems and textiles towards technology-intensive production and specialised services.

Importantly, the export basket now looks materially different. Electronics that clocked 70 per cent YoY growth in September rose from $11 billion in FY21 to $48 billion in FY26, lifting its share in merchandise exports from a low single-digit to 10.8 per cent. Engineering goods exceed 26 per cent of shipments, helping push non-petroleum exports to $388 billion.

The $421-billion services sector is moving beyond routine IT support into consulting, finance and engineering design. Threats of border taxes on cross-border data flows and tightening visa rules are dismantling the legacy business model of cheap headcount arbitrage. The industry heavyweights are transforming offshore delivery centres into specialised hubs dedicated to enterprise AI, Cloud architecture, and cybersecurity, embedding themselves deeply into global corporate infrastructures.

To hedge against single-market regulatory shocks, tech giants are simultaneously expanding nearshore delivery networks across Latam and Eastern Europe. EU exports reached $86 billion, with deeper reach into France, Italy and the Czech Republic. New corridors across West Africa and Southern Africa are carrying pharmaceuticals, automobiles and industrial machinery. Trade deals, commercial diplomacy and China+1 realignments are reinforcing this shift. Agreements with the EU, the UK, Australia, New Zealand and Oman widen preferential access for goods and open channels for services.

But tariffs do not automatically create competitiveness. They can destroy margins, displace workers and expose weak balance sheets. India must use external pressure to accelerate reforms it needed anyway — namely, lower logistics costs, predictable regulation, reliable infrastructure, deeper skills and patient capital.

The American tariff offensive was meant to assert leverage and pull supply chains home. It is instead hastening the growth and industrial evolution of America's most consequential democratic global partner. For India, doubling from 3 per cent of global GDP and ultimately to 10 per cent, will require more than merely exporting more; it will require creating capabilities and franchises the world cannot easily replace.

Indian enterprise should trade volume for value — and policymakers must sustain a diversified, multipolar trade architecture. The ultimate irony will then be clear: Protectionism intended as a wall will have become a ladder, lifting a more resilient India, even if belatedly, towards the centre of global commerce.

Unsung heroes of the Union of India

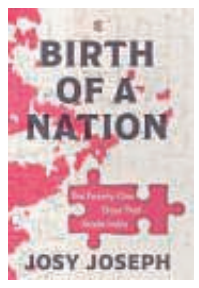
BOOK REVIEW

SNEHA PATHAK

When we think of the architects of independent India, we think of giants such as Gandhi, Nehru, Patel and others. But they were not the only ones who worked tirelessly to ensure that India became a sovereign republic. Josy Joseph's *Birth of a Nation: The Twenty-One Days that Made India* peels back the curtain and gives its readers a behind-the-scenes look at one of the most important chapters of nation-building. In the process, it reveals the efforts of those unknown, unsung heroes who ensured that India escaped the fate of Balkanisation, a real threat posed due to the ambitions of some of the princely states that ruled over a quarter of India's population.

Birth of a Nation is the third book by Mr Joseph, an investigative journalist, and this time he turns his gaze on the three weeks leading up to independence when the map of India was a fluid entity. Through a deep dive into the records at the National Archives in New Delhi along with private papers, regional archives and records in foreign universities, he creates a compelling picture of the 21 days before August 15 that would define the future of the nation. Led by V P Menon, the protagonists of this story were the "faceless civil servants" of the newly created States Department who became the "frontline soldiers in the brewing battle between the princely states and those who dreamt of a democratic India." They were aided by spies in the royal households who shared the same dream.

The story of these 21 days has all the ingredients of a thriller and in the hands of Mr Joseph it finds a narrator equal to the job. The readers are dropped right in the middle of action as we witness K C S Mani's assassination attempt on the Dewan of Travancore, Sir C P Ramaswamy, on the evening of July 25, 1947. Determined to secure an independent Travancore, Sir C P was a key player in the axis involving the other major princely states such as Bhopal and Hyderabad with similar ambitions. This assassination attempt played a key role in turning the tide in favour of the Indian Union as we know it today. From here, Mr Joseph doesn't always proceed linearly, instead choosing to take his readers across time and place, sometimes in the course of a single chapter. We travel from region to region, witnessing royal intrigues and palace conspiracies. along with the spies in these royal households who ensured that the news of every princely move and manoeuvre reached the right quarters.



Birth of a Nation: The Twenty-One Days that Made India
by Josy Joseph
Published by Context
267 pages ₹799

In fact, reading about the department simultaneously dealing with princely states such as Travancore, Junagadh, and Hyderabad, along with the many big and small political fires raging from Kohima to Kathiawar, is akin to watching multiple pots boil at the same time. This to-and-fro narrative structure mirrors the situation at hand and works well to convey the sense of gravity and urgency of the States Department's job. Despite being set during a crucial historical moment, Mr Joseph ensures that the book doesn't become a regurgitation of dry facts. He brings his readers face to face with the key players and chooses episodes and anecdotes from their lives that sustain the narrative interest. For instance, he links the Bawla murder case of 1925 to the then 17-year-old Yeshwant Rao Holkar becoming the ruler of Indore. The thrilling encounters he chooses, such as The Nawab of Bhopal pulling a revolver on his daughter or the Maharaja of Jodhpur drawing a pen pistol at V P Menon during a round of tense negotiations, also demonstrate the princes' mounting desperation.

The chapter titles help capture the reader's interest too. For instance, the chapter that focuses on Yeshwant Rao's abrupt U-turn and attempts to secure Indore's independence is titled "Someday My Prince Will Come". The title draws on Holkar's long periods of absence from his kingdom, noting which the British Resident "joked that the song 'Someday my prince will come' should be 'adopted as the state's new anthem'". Similarly, "Our Man in Hyderabad", which focuses on the constantly developing situation in an unwilling Nizam's kingdom along with the secret intelligence provided by Raja Bahadur S Aravamudu Aiyangar to the States Department echoes Graham Greene's *Our Man in Havana*.

Though Mr Joseph devotes a lot of time to states such as Bhopal, Hyderabad, and Junagadh, the final resolution of the crises some of them posed falls beyond the scope of the 21 days covered here. As a result, the book draws to a close at a time when though independent, "the Republic was still a distant dream" for India. Despite this, with its meticulous research and engaging writing, *Birth of a Nation* remains an absorbing read.

NEW DELHI | WEDNESDAY, 28 OCTOBER 2026 Business Standard

BFSI sector must lead funding in infra, manufacturing, says Shaktikanta Das

PHOTO: KAMLESH PEDNEKAR

> FROM PAGE 1

The GNPA ratio declined to 7.5 per cent in September 2020 and further to 7.3 per cent by March 2021. The subsequent improvement in asset quality reflected the banking system's resilience during and after the pandemic, Shaktikanta Das, Principal Secretary-2 to Prime Minister Narendra Modi, said on Tuesday at *Business Standard*'s BFSI Insight Summit in Mumbai.

In his keynote address, titled 'The BFSI Sector: Securing India's Aspirations', Das said banks had also strengthened their capital positions. The capital-to-risk-weighted asset ratio of scheduled commercial banks stood at 17.7 per cent at the end of March 2026, while the common equity Tier-I ratio was 15.3 per cent. Profitability indicators remained healthy, and stress tests and sensitivity analyses suggested that banks were resilient to macroeconomic shocks.

Non-banking financial companies, including housing finance companies, accounted for around 14 per cent of outstanding credit to the commercial sector. Credit growth among these institutions remained steady at 16.6 per cent, driven mainly by the retail and services sectors. Their asset quality, profitability and regulatory capital ratios also remained healthy, Das said.

India's growth engine defies global headwinds

Outlining the macroeconomic landscape, Das observed that the Indian economy had demonstrated resilience despite persistent geopolitical uncertainties, supply-chain disruptions, and weaponised economic fragmentation.

"Prolonged geopolitical conflicts pose downside risks to supply chains, energy and commodity markets and even to overall economic activity and financial stability. The nature of geopolitical events has itself changed dramatically. What used to be short-lived, mean-reverting shocks have now become unending disruptions. Each day brings another exercise in brinkmanship, dispelling any glimmer of truce or normalcy that seemed so much in sight the previous day," he said.

At the same time, Das said technological transformation, particularly investments in artificial intelligence, machine learning, Cloud computing, and distributed ledger technology, was reshaping economic growth and living standards, although the benefits remained concentrated in certain economies.

The International Monetary Fund (IMF) projected global growth to moderate to 3.1 per cent in 2026 before recovering to 3.4 per cent in 2027. Das said energy-importing economies outside the technology value chain faced a particularly difficult outlook amid the conflict in West Asia and its implications for energy prices.

The Indian economy grew 7.8 per cent in April-June (Q1) of the current financial year despite external headwinds arising from the conflict in West Asia. The IMF subsequently raised its growth projection for India to 7 per cent in FY27, from its earlier estimate of 6.4 per cent.

Das reiterated that India was within "striking distance" of achieving annual economic growth of 8 per cent, powered by macroeconomic stability, continuing structural reforms, and efforts to build domestic capacity in areas where the country remained largely import-dependent.

India recorded average annual real gross domestic product (GDP) growth of 7.9 per cent between 2021-22 and 2025-26 (FY26), according to Das. He said the country was projected to remain the fastest-growing major economy over the next five years, supported by favourable demographics, an expanding domestic market, and the continued benefits of structural reforms.

Private investment cycle shows signs of life

The corporate sector was also in good health, Das said. Bank credit to industry grew by around 20 per cent year-on-year in July, which he described as an early indication of a revival in the private corporate investment cycle. Sales growth among listed private non-financial companies accelerated to 19.4 per cent in Q1 of FY27.

Das credited the improvement to stronger corporate balance sheets and the financial repair undertaken by companies during and after the pandemic. The interest coverage ratio, which measures companies' ability to service their interest expenses from operating earnings, rose to 6.5 in January-March (Q4) of FY26, supported by an increase in gross profits relative to interest costs. Corporate leverage had also improved, he said.

Das said the financial sector would need to build on these conditions to support investment in large infrastructure projects and new-age manufacturing. "The BFSI sector has to take the lead in financing large infrastructure and new-age manufacturing to support massive public and private asset creation. It must pivot from simple corporate lending to long-term capital formation," he said.

This would involve financing a significant portion of the requirements of the National Infrastructure Pipeline through structured consortia and expanding the corporate bond market, he said. Financial institutions would also need to support strategic sectors such as semiconductor, advanced electronics, and defence production to strengthen domestic manufacturing capabilities, he added.

Green and transition finance was another priority. Das called for support for digital carbon markets, sovereign green bond issuance, and competitive financing products for green hydrogen and renewable energy infrastructure.

Smaller borrowers, wider credit access

Das said India must also expand the size and scale of its credit market. "India's credit intensity, as measured by the private credit-to-GDP ratio, needs to grow in a sustained manner. To achieve this, the credit footprint needs to be expanded further in tier-II and tier-III cities, as well as in rural areas," he said.

This would require financial institutions to adopt a greater but measured risk appetite and develop the capacity to fund small-business loans, including those for agribusinesses, while also financing large projects involving next-generation infrastructure corridors, energy transitions, advanced manufacturing hubs, and rapid urbanisation, he said.

"The seeds of our future and long-term growth are being sown today," Das said, referring to the role of macroeconomic stability, structural reforms, and policy initiatives in building domestic capacity in sectors where India remained heavily dependent on imports.

Beyond increasing the volume of credit, the financial system would need to improve capital allocation across sectors and broaden access to financing. Das identified smaller businesses and farmers as important beneficiaries of this expansion, with technology expected to play a central role in improving access to formal credit.

> "INDIA'S CREDIT INTENSITY NEEDS TO GROW IN A SUSTAINED MANNER. TO ACHIEVE THIS, THE CREDIT FOOTPRINT NEEDS TO BE EXPANDED FURTHER IN TIER-II AND TIER-III CITIES, AS WELL AS IN RURAL AREAS... A VIBRANT MUNICIPAL BOND MARKET WOULD BE CRITICAL TO BUILDING SUSTAINABLE, INCLUSIVE AND FUTURE-READY CITIES"

> "EXPANDING THE PUBLIC ISSUE ROUTE WOULD ENCOURAGE GREATER RETAIL AND INSTITUTIONAL ENGAGEMENT, IMPROVE PRICE DISCOVERY, AND CREATE A MORE DIVERSIFIED INVESTOR BASE... A DEEP AND LIQUID CORPORATE BOND MARKET CAN PROVIDE AN ADDITIONAL INVESTMENT AVENUE FOR HOUSEHOLDS"

> "THE NEXT FRONTIER IS THE CREATION OF INSTITUTIONS WITH THE SCALE, RESILIENCE, AND INTERNATIONAL PRESENCE TO COMPETE ALONGSIDE THE WORLD'S LEADING BANKING ENTITIES. LARGER FINANCIAL INSTITUTIONS ARE BETTER POSITIONED TO UNDERWRITE COMPLEX PROJECTS AND ABSORB SHOCKS IN AN INCREASINGLY VOLATILE ENVIRONMENT"

SHAKTIKANTA DAS, Principal Secretary-2 to Prime Minister Narendra Modi

He said lenders should increasingly rely on alternative digital footprint, including goods and services tax records and account aggregation, to enable faster, algorithm-based credit underwriting. A full-scale rollout of the RBI's Unified Lending Interface (ULI), he said, could be a game changer in expanding access to credit.

The expansion of agricultural value chains would also require financing for technology-driven precision farming, automated warehouses and sustainable supply chains, which could help improve farm productivity and farmer incomes.

From financial access to financial well-being

Das also called for a shift in the approach to financial inclusion, from providing basic access to financial services to improving financial well-being.

"It should focus on deepening the financialisation of savings by increasingly redirecting India's domestic wealth from physical assets, such as gold and real estate, into productive financial assets through micro-investment and mutual fund products," he added.

The emphasis on financialisation also reflected the importance Das placed on mobilising household savings for productive investment. He pointed to growing ownership of equities, retirement funds and small savings as signs of changing household financial behaviour.

Das said the banking, financial services, and insurance (BFSI) sector would also have to support the next generation of digital public infrastructure, including the global expansion of the Unified Payments Interface, real-time cross-border payment linkages, and wider adoption of central bank digital currency. Such linkages could reduce remittance costs and friction in international trade settlements, he added.

Household wealth holds up as borrowing grows

On households, Das said financial networth remained above 90 per cent of GDP even as liabilities rose to 45.9 per cent of GDP at the end of March.

Household borrowing for consumption and investment had expanded at double-digit rates over the past decade, he said. Despite the growth in credit, indicators such as the share of NPAs and special-mention accounts had improved relative to the pre-pandemic period. Credit bureau data also suggested a general improvement in borrower risk profiles.

On household savings, Das pointed to the rising ownership of equities, retirement funds, and small savings. "Are we witnessing a greater willingness of households to take risks, diversify portfolios, and become financially mature? The answer is, perhaps, yes," he said. He cautioned, however, that consumption-related borrowing "requires careful and consistent monitoring".

Beyond private placements: A deeper bond market

The corporate bond market accounted for around 15-16 per cent of GDP, with outstanding issuances of about ₹53.6 trillion in 2024-25. Das said issuance remained dominated by private placements and highly rated borrowers, while liquidity and investor participation remained limited.

"Expanding the public issue route would encourage greater retail and institutional engagement, improve price discovery, and create a more diversified investor base.... A deep and liquid corporate bond market can provide an additional investment avenue for households," Das said, pointing to households' growing willingness to take risks and diversify their financial assets.

Funding India's cities through municipal bonds

Das also called for a stronger muni bond market to finance urban infrastructure, noting that the needs of a rapidly urbanising economy could not be met through internal accruals and government transfers alone. Urban local bodies, however, needed to improve their governance, accounting practices and institutional capacity, he said.

"A deep and vibrant muni bond market would be critical to building sustainable, inclusive and future-ready cities," Das said.

Widening the insurance and pension net

On insurance, Das backed the vision of Insurance for All by 2047, which seeks to make insurance a universal social safety net. He said this would require sustained efforts to improve affordability, deepen distribution and strengthen awareness.

The objective, he said, was to ensure that every citizen had access to adequate life, health and property insurance, while enterprises had appropriate risk protection. Despite the expansion of the insurance sector, its reach and depth needed to increase further.

On pensions, he said the next phase must focus not merely on increasing assets under management but also on broader retirement security, with coverage extending beyond the formal sector.

Das said India's pension system had evolved from a largely government-funded model into a more diversified architecture centred on the Employees' Provident Fund, the National Pension System (NPS), and the Atal Pension Yojana. Pension funds, including those managed by the NPS and the Employees' Provident Fund Organisation, were valued at around ₹35 trillion.

As the population ages, expanding pension coverage and ensuring the sustainability of the pension system must become policy priorities, he said. A wider pension base could also increase the pool of long-term savings available to the financial system. "The next phase of pension penetration must, therefore, focus not merely on increasing assets under management, but on achieving broader retirement security and financial inclusion," Das said.

Sandboxes to balance innovation and oversight

Das also called on regulators and financial institutions to foster innovation with appropriate safeguards, including through vibrant regulatory sandbox frameworks across the BFSI sector.

He said individual financial institutions should focus on innovative products to strengthen their competitive positions and emerge as market leaders. Regulatory sandboxes could provide a framework for testing new financial products and services while maintaining appropriate safeguards.

Quoting Kautilya's 2,300-year-old Arthashastra, Das said: "All undertakings depend upon finance.... Just as elephants are needed to catch elephants, so does one need wealth to capture more wealth."

Das said India's progress towards Viksit Bharat, despite continuing global turbulence, would depend on a sound, efficient and profitable BFSI sector.

"When the economic history of the current period is written, it will be remembered as one that weathered periods of deep crises and marched on with strength and confidence," he added.

‘Big part of health insurance is a pull product, not push’

Q&A Insurance in the country needs transformative reforms to expand 1.5-2 times the rate of growth of the Indian economy over the next 10-15 years, with a faster settlement of claims, greater transparency, and wider effective coverage the key to achieving this goal, **Ajay Seth**, chairman, Insurance Regulatory & Development Authority of India (Irdai), said in a fireside chat at the *Business Standard* BFSI Insight Summit. Edited excerpts:

If India is targeting a growth rate of 8 per cent, how do you see the insurance industry playing its role in achieving that target?

■ In the previous century Life Insurance Corporation (LIC) and other public-sector insurance companies served reasonably well. After the sector opened up 27 years ago, the sector has still done reasonably well. The first comprehensive set of reforms was introduced in 2015. More recently, the Sabka Bima Sabki Raksha (Amendment of Insurance Laws) Act, 2025, has set the bar even higher and is looking towards the future. This does not require an incremental change but a transformative change. If India is growing at 8 per cent, the insurance sector needs to grow 1.5 times or perhaps two times for the next 10-15 years.

There is large, unmet demand (for insurance) in India. I would highlight three things that are necessary to achieve this growth. The first is claims management and the claims experience. Claims should be friendly, fair and faster. The claims experience should work like clockwork. This is particularly relevant to general insurance. That is an area on which the authority intends to focus in the coming months. The second is transparency, because transparency builds trust. There are too many products in the market. Life insurance has close to 1,500 products, while health insurance has nearly 1,000. Information on the effective cover a policyholder receives and the returns generated on the savings pool is not available in an easily understandable form.

The third is the digital journey. While the role of intermediaries will continue to play an important role, a large section of the public will be comfortable purchasing insurance digitally. We need to learn from the banking sector and capital markets. We should identify the practices that have worked in these sectors and adopt them in insurance. I am confident that growing at 1.5-2 times the rate of the economy is doable and needed in the economy.

What is the current growth level of the sector?

■ We have to be ambitious. An 8 per cent growth rate refers to real economic growth. If we talk about nominal growth, life insurance has been growing at around 10 per cent, which is broadly in line with the nominal growth rate of the economy. General insurance has been growing at approximately 1.3 times the rate of the economy, with health insurance being the largest driver. However, health insurance is also experiencing an uneasy and unstable equilibrium. Maximum customer dissatisfaction is coming from this segment. We need to get these aspects right for the sector to achieve the desired growth. There are two aspects to consider. It is not merely a question of affordability but also of quality. We are serving the top 10-15 per cent of the population reasonably well. However, expanding coverage from the top 15 per cent to the top 50 per cent will require a transformative change in the way we operate.

Insurance penetration in India is in the low single digits. What needs to be done to improve penetration, and what are the priorities for the regulator?

■ I would suggest that we have to change our lens. Penetration is the shareholder’s lens. It measures the size of the insurance market as a percentage of the economy. From an economic perspective, we should instead examine how many lives and economic entities are covered, what effective cover they receive, and how effective that cover is for every rupee spent. Instead of focusing only on penetration and the insurance density, which are the metrics the industry normally follows, we should track the number of lives covered and the effectiveness of cover provided for every rupee spent. That is the kind of discourse we should have and the lens we should use.

FIRESIDE CHAT

> “WE ARE SERVING THE TOP 10–15% OF THE POPULATION REASONABLY WELL. HOWEVER, EXPANDING COVERAGE FROM THE TOP 15% TO THE TOP 50% WILL REQUIRE A TRANSFORMATIVE CHANGE IN THE WAY WE OPERATE”
>
> AJAY SETH
> Chairman, Insurance Regulatory & Development Authority of India

The 2015 reforms increased the foreign direct investment (FDI) limit, which has since been raised to 100 per cent. How has FDI played out over the past decade?

■ In the first 15 years after the sector was opened up, 74 per cent of the money came into life insurance. Between 2015, when the FDI limit was increased to 49 per cent, and the subsequent period, around 60 per cent of the money came into general insurance. This indicates that when a sector is growing well and the government opens it up while providing policy certainty, more capital flows into it. The subsequent opening up of the sector to 100 per cent FDI was another such signal.

However, there is an important distinction between investment in insurance companies and investment in distribution. When money comes into an insurance company, a significant portion generally goes towards strengthening the insurer’s balance sheet. In contrast, more than 85 per cent of the money that has come into the distribution sector has gone towards buying out existing owners rather than strengthening the distributor’s balance sheet. That is the difference in how FDI operates across the two segments.

How do you see Bima Sugam benefiting the insurance system?

■ Bima Sugam is not yet operational. I had expected it to become operational six months ago. The sooner it becomes operational, the better. The first product we expect to be available on the platform is motor insurance. Certain changes to the regulatory framework are required in view of some court judgments. I expect the first product to be launched in approximately a month and a half. Bima Sugam is intended to be a neutral platform where customers can compare prices, understand simple products, and purchase insurance themselves at a lower cost than through other channels. One of the mandates we have set is that the fee charged by the Bima Sugam channel should not exceed 5 per cent of the premium value.

The consultation paper on insurance-distribution reforms has generated considerable debate. There is a concern that capping commissions on health insurance renewals and portability could discourage providing long-term customer service, particularly during claims. How do you respond to this feedback?

■ When I appeared here last year, I had promised to keep an open mind, generate discussion based on data and analytics, and attempt to build a consensus on the reforms required for the sector and the economy. I have reiterated that commitment on this platform. The discussion paper represents some progress in generating a discussion on the transformative role of the insurance sector and the changes it requires. It does recognise this role, but concerns have been raised about the proposed changes.

To address your specific question, a significant part of health insurance is a pull product rather than a push product. People want to buy health insurance because of rising costs of health care. Selling health insurance for the first time can be difficult. However, once a family has decided to purchase a policy, it will generally renew it the following year unless it faces a significant economic constraint. Therefore, the effort required to secure a renewal is lower than that required to make the initial sale.

The consultation paper proposes a somewhat higher commission for the first sale, followed by a lower commission for renewals. The levels proposed can be debated, including whether the suggested renewal commission should be higher.

For an agent, the commission is suggested at 20 per cent. The average commission in the sector is around 24 per cent, including new business and renewals. If that 24 per cent is spent on acquiring business, the amount left in the risk pool after administrative expenses becomes relatively small. This can put upward pressure on premiums. Therefore, the objective is to bring the average commission down from around 24 per cent to perhaps 20 per cent, or somewhere in the range of 15-20 per cent.

On portability, the current regulations do not provide for commissions. However, in practice, a ported policy is treated as if it were a new policy. The consultation paper proposes that portability should attract the same commission as a renewal. The data for 2024-25 shows that 60 per cent of porting activity took place among just three insurers. At the same time, those three insurers also accounted for 20 per cent of the policies ported out. If customers were entirely satisfied with the quality of their existing insurers, we would not expect so many of them to leave. The lesson is that commissions can influence customer behaviour when policies are moved from one insurer to another. To add another data point, 90 per cent of all porting activity took place in just seven insurers in 2024-25.

‘Unlocking pension funds for infra financing a priority’

Q&A Expanding pension coverage beyond the formal sector, improving retirement income and unlocking long-term domestic savings for infrastructure are some of the Pension Fund Regulatory and Development Authority (PFRDA)’s key priorities. In a fireside chat at the *Business Standard* BFSI Insight Summit 2026, PFRDA Chairperson **S Ramann** discusses plans to strengthen the Atal Pension Yojana, (APY) integrate National Pension System (NPS) with corporate payroll, and attract foreign capital. Edited Excerpts:

What are the key priorities for PFRDA regarding India’s pension coverage, which remains limited, particularly among informal-sector workers?

■ India needs to look at what its citizens’ lives will be like 25 or 45 years from now. The fundamental public policy question is whether every citizen will enjoy the privileges that people have today. If we can make it easy for people to open an NPS account for their domestic help, drivers and others around them, and contribute as little as ₹10 a day, would they do so? If we do not act today, we could have nearly 60 crore people dependent on the government in their old age. When I joined the PFRDA in June 2025, there were around 7.2 million NPS accounts in the non-government sector, despite the country having a very large working population. We have increased that number by about 2.2 million over the past 12 months, but the ambition must be to take coverage to over 10 million. Our challenges fall into three broad areas: expanding distribution and collections, investing pension savings to generate long-term returns, and ensuring that accumulated savings translate into a regular income after retirement.

The government has emphasised expanding pension coverage beyond the formal sector. How can schemes such as APY help?

■ APY is an excellent scheme designed for Indians outside the income-tax bracket, who account for a substantial proportion of the working population. Subscribers can join between the ages of 18 and 40 and receive a guaranteed monthly pension of ₹1,000 to ₹5,000 from the age of 60, depending on their contribution. However, people in villages are already asking what a pension of ₹1,000 a month will mean after 20 years. So, we need to listen to people on the ground and examine how the scheme can be strengthened. We are working on how better asset allocation can help improve pension outcomes, including whether the pension can be indexed to inflation.

This is a significant financial modelling challenge as the scheme must remain affordable while ensuring that pension funds can meet their obligations. APY's costs are currently around 0.3 per cent of assets under management (AUM) annually. We need to preserve this low-cost structure while exploring ways to improve outcomes. The scheme has around 90 million subscribers, and we need to expand its reach further.

Can the recently launched NPS Central platform make it easier to bring new subscribers into the system?

■ NPS Central is primarily a service initiative designed to make it easier for subscribers to manage their pension accounts. It brings multiple accounts together and allows people to undertake various transactions through a single interface. Subscribers can now open multiple pension accounts, with greater flexibility in choosing among the available central recordkeeping agencies and their offerings. The objective is to give people more choice and make the system easier to navigate... If UPI can be operated at scale across the country, enabling payroll software to deduct NPS contributions should not be difficult. We are already speaking to human resource management software providers about this.

FIRESIDE CHAT

Can employees contribute to NPS in addition to their Employees’ Provident Fund (EPF) savings?

■ There is no fundamental technological obstacle. It is largely a question of making the necessary changes to payroll systems so that employers can facilitate NPS contributions. The broader point is that people should have the freedom to choose how they invest their long-term savings once their mandatory PF contributions have been made. Pension savings must be viewed over a much longer horizon. At the PFRDA, we have decided against discussing NPS returns over periods shorter than three years. The real benefit comes from compounding. Returns may vary from year to year, but what matters is how investments grow over the 30-40 years during which people accumulate retirement savings.

Is there scope for greater coordination between the PFRDA and the EPFO?

■ There is a need to share best practices so that long-term savings can be managed more efficiently. Fragmented pools of retirement savings can make it difficult to achieve scale and manage investments efficiently. At the same time, if customers are to have a better choice, they should be able to compare the two systems and select what works best for them. Competition between pension products and providers can help improve outcomes for subscribers.

> “IF DOMESTIC PENSION FUNDS DEVELOP THE SKILLS TO INVEST EFFECTIVELY, FOREIGN INVESTORS COULD PARTICIPATE ALONGSIDE THEM THROUGH CO-INVESTMENTS. THAT COULD BRING IN MORE CAPITAL, DIVERSIFY POOL OF INVESTORS, AND INTRODUCE BETTER PRACTICES FROM OTHER MARKETS”
>
> S RAMANN
> Chairperson, PFRDA

Globally, pension funds are key investors in infrastructure. Can India mobilise more domestic retirement savings for long-term infra financing?

■ Pension funds provide patient capital, and countries across the world have benefited from deploying pension savings over long investment horizons. India can learn from these experiences and build its capabilities more quickly. Banks remain cautious about infrastructure projects because of execution risks. Pension funds could potentially participate at a later stage, once projects become operational, and hold those assets for longer periods. This would require substantial capacity building. India has 14 pension funds... and we need to develop their investment capabilities. The PFRDA must also frame investment guidelines carefully as we have a fiduciary responsibility towards subscribers’ money. We are examining how pension funds can participate more meaningfully in infrastructure financing. A committee is looking at the issue, and we have begun taking steps to broaden the investment avenues available to NPS funds, including investments in alternative investment funds. The investment guidelines would need to evolve to allow a measured allocation to infrastructure. Even a small proportion of pension assets could make a meaningful difference, given the size of the country’s long-term savings pool.

Would this require changes to the existing investment guidelines?

■ Yes. The investment guidelines need to be sufficiently robust to protect subscribers, but they should also allow pension funds to invest a portion of their assets in infra financing. We need to build the right skills, establish appropriate safeguards and take incremental steps to enable pension savings to support the country's long-term capital requirements.

With 100 per cent foreign direct investment permitted in the pension sector, have you seen interest from overseas investors?

■ We need to understand the nature of the pension fund business. The capital requirement for setting up a pension fund is relatively small. We require a net worth of ₹50 crore, and the business largely involves mobilising savings from citizens and investing them on their behalf. The greater opportunity is to attract long-term capital from countries such as Japan and South Korea, where investors are interested in India’s growth prospects. If domestic pension funds develop the skills to invest effectively, foreign investors could participate alongside them through co-investments. That could bring in more capital, diversify the pool of investors and introduce better practices from other markets.

People are living longer, but the annuity products available offer limited flexibility. Is the PFRDA considering alternatives?

■ We commissioned an actuarial study comparing the cost of providing retirement income through insurance-company annuities, as is currently done, with the possibility of pension funds providing similar arrangements. The study indicated a difference of around 200 basis points. We need to introduce greater competition into the annuity market. Without competition, customers can end up with products that work better for manufacturers than for them. There is nothing inherently wrong with annuities. They provide a stream of income, typically for the remainder of a person's life. But the market needs greater variety. At present, the available products are relatively limited, whereas other markets offer different types of annuity products. The challenge is to develop alternatives that provide retirees with a more appropriate balance of income, flexibility and long-term financial security.

India less vulnerable to certain economic shocks: RBI dy guv

> FROM PAGE 1

India would need to improve its competitiveness in new sectors, keep pace with technological changes and invest in human capital to sustain growth of 7 per cent and move towards 8 per cent or higher, said Reserve Bank of India (RBI) Deputy Governor Poonam Gupta, at the *Business Standard* BFSI Insight Summit, on Tuesday.

She compared the shift to moving from an A grade to an A-plus, saying it would require a disproportionate amount of effort. "If this global environment becomes better, if not right away in the next one year, another 50 basis points to 1 percentage point growth will come just from there," she said.

Gupta said India's growth story was supported by several drivers rather than depending on one or two sources of growth. Economies that rely heavily on natural resources, a particular export market, remittances or favourable demographics can be more vulnerable when those sources come under pressure, she said.

"India has all of the above, plus much more," Gupta said, referring to the range of factors supporting the economy. She added that India's growth was broad-based across regions and sectors and supported by rising productivity.

The resilience also reflected improvements in policy frameworks, with a firm focus on macroeconomic and financial stability. The RBI Deputy Governor said the response to shocks needed to be assessed not only in terms of their immediate impact on growth but also in terms of how policy decisions helped the economy adjust over time.

Gupta said India had become less vulnerable to some economic shocks as a result of deliberate policy action and adaptation. She cited oil price shocks and deficient rainfall as examples of disruptions to which the economy had been more sensitive in the past.

"And just as the rest of the world, over time, due to conscious policy actions and adaptation, the economy has become less sensitive to some of the shocks," she said.

Gupta cautioned against the temptation to respond to economic shocks with short-term measures, saying policymakers needed to maintain a longer-term perspective.

"When confronting such shocks, there is a temptation. Everybody has a temptation to break short-term retreats, and one has to restrain oneself. The focus has to be on the medium and long term," she said.

> "WHEN CONFRONTING SUCH (ECONOMIC) SHOCKS, THERE IS A TEMPTATION. EVERYBODY HAS A TEMPTATION TO BREAK SHORT-TERM RETREATS, AND ONE HAS TO RESTRAIN ONESELF. THE FOCUS HAS TO BE ON THE MEDIUM AND LONG TERM"

> "A FALL IN THE PRICES OF ARTIFICIAL INTELLIGENCE-RELATED ASSETS, IF INVESTMENTS AND PROFITS IN AI PROVE WEAKER OR LESS PROFITABLE THAN EXPECTED, IS ONE OF THE RISKS"

POONAM GUPTA
Deputy governor, Reserve Bank of India

FIRESIDE CHAT

Gupta said the way shocks were managed also mattered, pointing to policy certainty, greater engagement with stakeholders, better communication and timely action as factors that had helped India navigate recent challenges. She stressed that the outcomes could not be attributed to the central bank or a single government department, but reflected coordination across different parts of the economy and government.

"And more is the way the shocks have been managed, certainly this time around, with policy certainty, more engagement with stakeholders, better communication and timely action, and what I call all of the system approach," she said. "If you think it's only the central bank or the ministry of food which have made these outcomes possible... It has been the effort of many, many stakeholders. Effort of the private sector, households, state governments, minister of external affairs, minister of agriculture, (and) department of consumer affairs."

She said the collective response across institutions and stakeholders had helped make the outcomes possible, emphasising that resilience depended on more than the actions of any one institution.

Gupta's remarks placed India's growth performance in the context of both its economic structure and its policy response. A diversified domestic economy provides multiple sources of growth, while policy certainty and coordination can help reduce the impact of shocks. She said the challenge for policymakers was to preserve this resilience by maintaining macroeconomic and financial stability and keeping the focus on the medium and long term.

On public finances, Gupta said India was better placed than many economies, where debt ratios had risen since the Covid-19 pandemic. Global public debt stood at about 94 per cent of gross domestic product (GDP) in 2025 and is projected to reach 100 per cent by 2029, according to the IMF's April 2026 Fiscal Monitor. She said India's general government debt-to-GDP ratio was projected to decline from around 84 per cent in 2025 to 75 per cent by 2041-42. Improving the quality of fiscal expenditure, greater transparency and a debt composition that keeps borrowing costs contained would support the country's fiscal position.

About inflation, she said global price pressures remained exposed to oil prices, weather-related disruptions and higher shipping, logistics and insurance costs. The International Monetary Fund's (IMF's) inflation projections cited by Gupta put global headline inflation at 4.7 per cent in 2026, up from 4.1 per cent in 2025, before easing to 4.1 per cent in 2027.

For India, inflation was projected to rise from 2 per cent in 2025 to 5 per cent in 2026 before easing to 4.4 per cent in 2027, she said. Central banks need to distinguish temporary supply shocks from more persistent price pressures while remaining alert to second-round effects through wages and inflation expectations.

The RBI Deputy Governor said monetary policy should remain focused on price stability, with central banks taking timely action to bring inflation back to target and prevent temporary shocks from becoming persistent. The flexibility built into inflation-targeting frameworks, including tolerance bands, had helped central banks tailor their responses to specific challenges, she said.

On the global front, Gupta said the financial sector faced three emerging risks: A potential fall in artificial intelligence (AI)-related asset prices if investments and profits disappointed; a sharp rise in sovereign bond yields amid renewed inflation; and cyber threats that could pose systemic risks to increasingly digital and interconnected financial services.

Gupta said the financial sector had held up well globally so far, but risks highlighted in the IMF's Global Financial Stability Report warranted attention.

"A fall in the prices of AI-related assets, if investments and profits in AI prove weaker or less profitable than expected," was one of the risks, Gupta added, and also flagged the possibility of "a sharp increase in sovereign bond yields from renewed inflation" and warned that cyber threats were becoming a systemic risk as financial services grew more digital and interconnected.

Audit quality has systemic importance: NFRA chairperson

> FROM PAGE 1

In an increasingly interconnected financial services sector, quality of audit has a systemic impact, National Financial Reporting Authority (NFRA) Chairperson Nitin Gupta said at *Business Standard* BFSI insight summit in Mumbai on Tuesday.

The growing inter-connectedness among banks, non-banking financial companies and other institutions could result in transmission of shocks in a period of stress, Gupta said.

Weakness in reporting at one institution travels to those that fund it, Gupta added.

Audit quality in this sector is, therefore, a matter for the system as a whole and not only for the individual entity.

As a principal user and a significant preparer of financial statements, the banking, financial services and insurance industry has as large a stake in the quality of the information on which it lends, invests and underwrites, Gupta said.

NFRA's purpose is to raise the quality of financial reporting and auditing across the system, for which enforcement is a necessary instrument but not the whole of the task, Gupta explained.

> "CREDIT APPRAISAL, COVENANT MONITORING, INVESTMENT DECISIONS AND UNDERWRITING ALL REST ON NUMBERS THAT AN AUDITOR HAS EXAMINED, AND WHEN A BORROWER'S STATEMENTS DO NOT REFLECT ITS TRUE POSITION, THE COST IS BORNE FIRST BY ITS LENDERS AND, THROUGH THEM, BY DEPOSITORS"

NITIN GUPTA, Chairperson, National Financial Reporting Authority

Quoting a July 2026 report from Crisil Ltd, Gupta said the aspiration of Viksit Bharat 2047 is an exercise in mobilising and allocating capital on a very large scale, among other things.

Crisil said in its report that in the medium term, it expected Indian industry to make a capital expenditure of ₹145-155 trillion in financial years from 2027-2031.

The rating agency had also said that to cover capex, working capital and retail lending, debt capital of ₹130-140 trillion will be required over five years through FY31.

India's financial services sector would need to grow about twenty-fold to support the economy envisaged for 2047 — $30 trillion, Gupta said, quoting a BCG study that made the assessment based on experience with other economies.

Gupta said that such capital passing through the financial institutions will be priced on the basis of financial information.

Financial services sector is the principal user of audited financial statements, Gupta said.

"Credit appraisal, covenant monitoring, investment decisions and underwriting all rest on numbers that an auditor has examined, and when a borrower's statements do not reflect its true position, the cost is borne first by its lenders and, through them, by depositors."

Gupta said that NFRA's jurisdiction covers not only the auditors of listed companies but also those of unlisted public companies with large outstanding loans, debentures and deposits.

"Stakeholders increasingly expect auditors to detect fraud and the diversion of funds, and while an audit cannot substitute for a lender's own diligence, the reliability of what the lender is given to work with depends heavily on the quality of that audit," Gupta said.

Besides, banks, insurers and large non-banking financial companies are themselves among the most consequential preparers of financial statements in the economy and their auditors fall within NFRA's jurisdiction, Gupta said.

The quality of a bank's audit matters to its depositors, its supervisor and the markets and it depends in turn on the quality of its audit committee and its dialogue with the auditor, Gupta said.

NFRA has been emphasising on the need for effective two-way communication between auditors and those charged with governance in the companies and institutions that they audit.

Gupta made a distinction of NFRA's enforcement action and the audit quality inspections conducted by it. Inspections are meant to check the robustness of the audit policies of firms, while enforcement action looks at the failure of auditors to pick up red flags and point them out in the audit reports.

The major concern areas of the regulator in audit practice include related party transactions, auditor relying solely on management's version, not probing into the business rationale of transactions, especially large-scale funding between companies and their related parties.

Handholding vs enforcement

The size of the audit firm plays a role in the audit service rendered and hence NFRA does handholding of small and medium audit firms, Gupta said. Holding workshops for them across the country on improving quality of audits is one of the steps taken. The regulator also conducts webinars and issues detailed guidance on various subjects, including auditor-audit committee communication, Gupta explained.

"However, enforcement action is equally important for a regulator. We take enforcement action in very bad cases," Gupta said, explaining that those were in cases of serious audit failure and frauds.

"There have been outrageous cases of failures in the preparation of financial statements and audit failures," Gupta said, adding that the regulator's endeavour was to raise the quality of audits across the board and hence handholding some firms was equally important.

NFRA inspections

The public versions of NFRA inspection reports are not ratings and are not intended to be read as a ranking of firms, Gupta explained. Their value for an audit committee lies elsewhere, he said.

They show the weaknesses seen in quality control systems. An audit committee may reasonably ask its auditor whether the firm has been inspected, what was observed in general terms, what has been done in response, and how that affects the audit of its own institution.

It is often seen that the most useful discussions are not about the findings themselves but about how seriously the firm has addressed them. Used in this way, the reports help audit committees fulfil their responsibility for overseeing the auditor more effectively, Gupta said. He explained that trust in financial reporting is built by many stakeholders and that the auditor and the regulator are only two of them.

Role of financial institution leaders

Leaders of financial institutions have a part to play as preparers of financial statements who set the tone for accurate and transparent reporting within their own organisations, the Chairperson said.

They also have a part to play as users of financial statements who insist on reliable information from those they lend to and invest in, and as board members who expect real engagement from their auditors rather than a routine exercise, Gupta said.

The scale of capital that India will need in coming years will flow through this sector, and the confidence of depositors, policyholders and investors in that flow rests on the credibility of the numbers. Gupta urged the financial services sector to see NFRA as a partner and to engage with it openly.

'No standardised CAS template worldwide'

PHOTOS: KAMLESH PEDNEKAR

K V R Murty, whole-time member, Sebi, at the *Business Standard* BFSI Insight Summit in Mumbai on Tuesday

Q&A Markets regulator Securities and Exchange Board of India (Sebi) may look at introducing guardrails to help retail investors navigate the derivatives segment, Sebi Whole-time Member **K V R Murty** said while speaking at the *Business Standard* BFSI Summit. Edited excerpts:

How prepared does Sebi need to be on technology and artificial intelligence (AI) over the next five years? How prepared are the market infrastructure institutions (MIIs)?

■ Sebi is process-driven and extremely consultative in nature, with its eyes and ears close to the market. On technological capabilities, I would personally rate Sebi as one of the most forward-looking and evolved in the country. Sebi also contributes to the IOSCO (International Organization of Securities Commissions) FinTech Task Force, where we are vice-chair of the quantum computing working group. Sebi is alive to both the opportunities and threats being faced by the Indian markets from the AI and quantum side. We are gearing up for that. We are engaging with market participants and the tech industry to enhance capabilities. On quantum risks, we have already issued a consultation paper and received feedback. The IOSCO has also come up with its own guidelines. In the very near future, we expect to issue our guidelines for the MIIs, the intermediaries and other participants.

Sebi's decisions are data-backed, and it has access to ownership and trading data. How effectively is it using data and AI in enforcement and investigations?

■ Data is the air we breathe and the food we eat at Sebi, and that drives everything we do. We have built in a fair bit of capabilities on surveillance and are fairly aware of what is happening in the market on a near-real-time basis. The speed of our interim orders and other enforcement actions shows that. We also use in-house AI tools to work more effectively and efficiently.

The closing auction session (CAS) framework went through several rounds of consultation and received over 20,000 responses in the latest round. Despite two earlier rounds, Sebi had to make tweaks to final regulations. What does this reveal?

■ We held extensive consultations and after the first round, we tweaked the framework that we had originally proposed. Then the second round of consultation happened and then adequate time was given to not just the market institutions but also intermediaries and other stakeholders. Every market is unique and things evolve with experience. There is no one-size-fits-all approach, and no standardised template of CAS that is followed worldwide.

As I always say, "Sebi *sabki sunta hai aur* Sebi *sab sunta hai*" (Sebi listens to everyone and hears everything). There was some appreciation for the rollout and a lot of brickbats as well. We take it with honesty and in the right spirit. This is evolved regulation: You tweak, study data, take feedback and stay consultative. We believe in listening to the stakeholders.

Much of the noise quietened once we announced another consultation paper. We received responses from around 20,000 participants, with comments averaging about 135,000 in all. Our teams burnt the midnight oil, and we are confident that the final framework will meet the market's requirements. The feedback has been very positive.

Sebi's data shows retail traders saw losses in derivatives. Are the measures taken earlier working?

■ Our job is to bring in greater transparency and openness and to put out the risks into the public space so that people make informed decisions. It is not for Sebi to stop people from investing in an area. The purpose of the two derivatives studies [conducted by Sebi] was to tell the public what they are in for. If they still want to go ahead, then God be with them. In some ways, I think maybe some guardrails are required and maybe people need to be chaperoned a little more, given the kind of hyperactivity we have seen, on expiry days especially. Investors' interests and market integrity come first and last. Every participant, whether regulator, broker, researcher or advisor, has to do their bit.

Recent overhauls like the PMS (portfolio management services) and SIF (specialised investment fund) regulations cater mostly to high-networth individual (HNI) and ultra-HNI investors. What innovations can retail investors expect?

■ We are trying to address all categories of investors. That includes deepening the cash market, expanding the mutual fund market, and, for institutions, whatever is required on short-selling and SLB (securities lending and borrowing). We are working actively at various levels to meet the needs of every category. With Sebi, the whole world gets to know what we are planning, and we never do anything surreptitiously.

Many Sebi cases are referred to the National Financial Reporting Authority (NFRA) for further action. How can regulators work more seamlessly together, and have things improved over the years?

■ When I was at the Ministry of Corporate Affairs, I moved the Cabinet note that led to the setting up of the NFRA, and I was involved in framing its rules and selecting its initial team. NFRA, Sebi and the exchanges have to collaborate actively. NFRA's role in ensuring compliance with accounting standards is critical to the quality of financial reporting in all listed companies. The stock exchanges are the first line of defence and are expected to put two and two together on financial reporting, corporate actions and trading activity. There is a huge case for active and alive day-to-day collaboration between Sebi, NFRA and the exchanges.

Given your experience with audits, audit trails and controls, how can we shorten the time between the regulator finding a problem and the final order?

■ I think a lot of it has to do with the creation of adequate tech capabilities at every level. You shorten the timelines by having real-time surveillance of the data and following the audit trails and taking action where necessary immediately thereafter. I think building up tech capabilities at every level is the key.

FIRESIDE CHAT

Primary market fundraising has been good. Do you think the framework for anchor investments needs a relook?

■ We all know that the primary market is doing very well. We've had record fundraising. From our side, our job is to ensure that the investors feel confident about the issues that are coming up. We have tweaked the framework on anchor investors, for instance, because that gives a large signal to the market on the kind of robustness of the issue which is coming up and going forward that's our main focus. Our markets are very transparent, and on the primary market side, we see every cause for optimism.

Retail money is pouring into mutual funds and SIPs. Is it really providing an exit to FIIs? Any visible areas on concerns in the markets?

■ We believe that India's growth story is intact and it is on the upswing. Foreign investors are here to make money, and so is everybody else. To that extent, if they make those profits and take them out — we are fine with that, so long as market integrity and other aspects are taken care of. We have also seen that the DIIs have more than adequately compensated for any movements on the foreign front, we see no cause for any alarm.

'Agentic payments need clear liability rules to build trust'

"IT CAN'T BE THE AGENT. IT HAS TO BE THE HUMAN OR THE REGULATED ENTITY ON BEHALF OF WHICH THE AGENT IS ACTING ON"

NIRAV KAMDAR
CTO, Amazon Pay

"WHEREVER THERE IS A LOT OF VARIABILITY, I THINK AGENTS WILL ADD VALUE IN TERMS OF TRYING TO MAKE IT EASY FOR YOU"

PRAMOD MULANI
Vice-president Global Strategy, Juspay

"I FEEL LIKE THE FIRST USE CASES ARE GOING TO BE THE UTILITY ONES, LIKE THE BILL PAYMENT OR THE SUBSCRIPTION RENEWAL"

RISHI CHHABRA
Country Manager, India, VISA

KAIRAVI LUKKA
Mumbai, 27 October

India's agentic payments ecosystem needs robust authentication, traceability and liability frameworks before artificial intelligence (AI) agents can transact autonomously on behalf of consumers at scale, industry executives said during a panel discussion on agentic payments.

Speaking at a session at the *Business Standard* BFSI Summit titled *Machines with Mandates: Building India's Trust Layer for Agentic Payments*, panellists Nirav Kamdar, chief technology officer at Amazon Pay, Pramod Mulani, vice-president, global strategy at Juspay, and Rishi Chhabra, country manager, India, Visa, said establishing trust among consumers, AI agents and merchants would be critical to the adoption of such payments.

"It can't be the agent. It has to be the human or the regulated entity on behalf of which the agent is acting on," said Kamdar.

He said liability would depend on the circumstances of a transaction. If a customer fails to specify appropriate safeguards or intent in a mandate, the responsibility could rest with the customer. However, if the customer provides clear consent and the agent acts outside the mandate, the regulated entity responsible for the agent could bear the consequences. "If something goes wrong, what makes you move the car very fast is not the accelerator, it's the fact that there is a brake. That's what gives you the confidence that you can move fast. Similarly, having a good liability framework will help agentic payments a lot more," he added.

Chhabra said existing liability rules were designed for human-led transactions and would need to evolve as machines increasingly act on behalf of consumers. "The rules were defined in a human world. The rules weren't defined for the agent world," Chhabra said, adding that the industry would need to establish who is responsible when something goes wrong.

While travel bookings and e-commerce offer opportunities for agentic payments, Kamdar expects utility payments and subscription renewals to be among the earliest use cases to gain traction.

"I feel like the first use cases are going to be the utility ones, like the bill payment or the subscription renewal," he said, citing the low risk and high friction associated with such transactions. These could help consumers avoid missing credit card or electricity bills, he added.

Mulani identified travel as an early opportunity, given the multiple decisions involved in planning a journey, from choosing dates and preferred berths. "Wherever there is a lot of variability, I think agents will add a lot of value in terms of trying to make it easy for you," Mulani said.

The panellists also said there is need for reliable agent identification, authentication, consent and auditability. Kamdar said platforms remained cautious about allowing agents access to their systems due to concerns about customer data protection.

Mulani standards for agentic payments could emerge within the next 12-18 months. He said the industry is still establishing what information needs to be carried across the payment chain.

Chhabra said humans were likely to remain in the loop as part of the payment process for now, particularly at the authentication stage.

(From left) S B Seker, head of Asia-Pacific at Binance; Vandana Ahuja, tax partner, financial services, EY India; Vikaas Sachdeva, CEO, BitDelta India; and Vimal Sagar Tiwari, cofounder, CoinSwitch, at the *Business Standard* BFSI Insight Summit in Mumbai on Tuesday

Crypto industry calls for greater regulatory clarity

SHIVANI SHINDE
Mumbai, 27 October

India's cryptocurrency industry needs greater regulatory clarity and a tax framework that accounts for the way digital assets are traded and used, cryptocurrency experts said at the *Business Standard* BFSI Insight Summit on Tuesday.

At the session titled *Taxed but Not Trusted: Can India Regulate an Asset It Doesn't Recognise?*, the panellists discussed sector challenges, changing investor behaviour and opportunities such as tokenisation.

Vandana Ahuja, partner, EY India, said taxation of digital assets was clearer, but some aspects still troubled traders. She acknowledged the burden of the 1 per cent TDS, particularly for frequent traders, where the deducted tax could be disproportionate to profits.

She said the industry needed to raise these concerns with the government, even as tax authorities gained more transaction information through data-sharing arrangements and exchanges of information with other countries.

Vikaas Sachdeva, CEO of BitDelta India, said India's digital-first approach made it a significant market, but cautioned against relying only on headline adoption figures.

"Adoption is not a problem. The interesting thing is that a lot of this money is coming from tier-II and III and IV towns, it is coming despite the 30 per cent tax and 1 per cent TDS. The moment 1 per cent TDS was introduced 81 per cent of the business for the leading exchanges just dropped. It was not that people stopped trading, it was that the business moved overseas," he added.

S B Seker, head of Asia-Pacific at Binance, said the regulation discussion had changed little despite India's substantial user base. He suggested that market demand was moving ahead of policy, while exchanges were developing tools to help regulators address fraud prevention and transparency concerns.

Vimal Sagar Tiwari, cofounder of CoinSwitch, highlighted India's technology adoption and ease of onboarding. "India is a very important market in terms of investment in the crypto market," Tiwari said. He said platforms were exploring new products and business models, and that education remained important.

Panellists also discussed tokenisation, which uses blockchain technology to represent assets digitally and could expand the financial products available to investors. Tiwari called it an important blockchain use case, with potential to make real-world assets programmable. "The real-world use cases, the UPI movement of tokenisation, still have to arrive," he said. Sachdeva said the sector was becoming more layered, with trading being only one part of the ecosystem. Tiwari said customer protection should not come at the cost of innovation. Seker said exchanges were already using technology to support fraud prevention and provide tools for regulators.

"THE REGULATION DISCUSSION HAS CHANGED LITTLE DESPITE THE COUNTRY'S SUBSTANTIAL USER BASE"

S B SEKER
Head of Asia-Pacific, Binance

"I VERY WELL AGREE THAT THE 1% TDS IS VERY HARSH... THERE IS A LIQUIDITY WHICH GETS STUCK FOR FREQUENT TRADERS"

'Focus must be on labour-intensive growth'

KRISHNA KANT
Mumbai, 27 October

PHOTOS: KAMLESH PEDNEKAR

India must focus on labour-intensive manufacturing and equip workers to adapt to artificial intelligence (AI), economists Sajjid Z Chinoy and Soumya Kanti Ghosh said on Tuesday.

The two economists, who are part of the Prime Minister Economic Advisory Council, were speaking at the *Business Standard* BFSI Insight Summit.

Technological advances have made production increasingly capital-intensive, with businesses using more machinery and fewer workers for each unit of output. AI could extend that pressure from factories into services, a major source of skilled employment.

"In the United States, resilient headline economic growth has coincided with a slowdown in jobs creation and declining wages. In India, the gap between headline gross domestic product (GDP) and employment growth predates AI. The data from India's Annual Survey of Industries between 2000 and 2025 shows an increasing use of machines relative to labour per unit of output," said Chinoy, head of Asia economic research, JP Morgan.

Chinoy said the employment challenge for India was different from that of ageing economies such as China, Japan and Western Europe, which were facing a decline in working population and had a genuine demand for robots and automation.

"Unlike these ageing countries, India needs to create eight-nine million jobs annually to absorb the growth in the working-age population. Failure to create productive jobs could squander the demographic advantage that we enjoy right now."

Ghosh, who is State Bank of India group chief economic adviser, said inequality must be measured through more than income data. "In an economy with a large informal workforce, where earnings are difficult to report accurately and employment is often intermittent, consumption inequality can offer a more useful measure of living standards. India has performed better on consumption inequality than on income inequality."

He cited official figures, according to which around 250 million people in India moved out of poverty in the past decade, while China had lifted around 800 million over the past 10 years. Poverty reduction and inequality can coexist, he said, making it important to assess both rather than treat them as interchangeable measures.

Yet the structure of India's labour market has not changed much over the years. "Self-employment accounted for about 50 per cent of employment five decades ago and now represents 54-55 per cent," Ghosh said. Forty-five-fifty per cent of Indians remain engaged in agriculture, an increase from 41-42 per cent before the pandemic. "Moving workers into more productive activities remains a central economic challenge."

> "INDIA NEEDS TO CREATE 8-9 MILLION JOBS ANNUALLY TO ABSORB THE GROWTH IN THE WORKING-AGE POPULATION. FAILURE TO CREATE PRODUCTIVE JOBS COULD SQUANDER THE DEMOGRAPHIC ADVANTAGE THAT WE ENJOY RIGHT NOW"
>

> "SELF-EMPLOYMENT ACCOUNTED FOR ABOUT 50 PER CENT OF EMPLOYMENT FIVE DECADES AGO AND NOW REPRESENTS 54-55 PER CENT... MOVING WORKERS INTO MORE PRODUCTIVE ACTIVITIES REMAINS A CENTRAL ECONOMIC CHALLENGE"
>
> SOUMYA KANTI GHOSH
> Group chief economic adviser, SBI

Chinoy welcomed the government's recent emphasis on labour-intensive sectors such as footwear, apparel, leather goods, gems and jewellery, which can create more jobs per unit of investment. "China's experience demonstrated the economic dividends of moving workers out of agriculture into labour-intensive manufacturing and exporting goods at scale," he said.

Ghosh said post-pandemic growth had increasingly been driven by investment and exports. Government initiatives such as the production-linked incentive scheme and import-substitution measures might be beginning to support manufacturing, whose share in gross value added, however, had remained 14-15 per cent, suggesting there was considerable ground to cover.

However, he said the skilling gap could undermine that transition. Only 30.7 per cent of the workers in the informal labour market had received training, according to the latest Periodic Labour Force Survey data, cited by Ghosh. He said two government programmes had trained one million people over seven to eight years, which is inadequate for the scale of the challenge. Unless training expands and connects directly with formal employment, inequality will be difficult to address sustainably.

Chinoy called for a broader package: Better education, retraining and reskilling; labour laws that supported rather than disadvantage workers; and a safety net that was wide enough to protect people during transitions but temporary enough to preserve incentives to seek work. Governments must help workers move between industries and direct scarce public resources towards labour-intensive sectors.

"We are in the midst of a horse race between capital and labour for the past 30-35 years and most often labour tends to lose to capital in this. Governments need to come up with a policy framework so that workers start winning," said Chinoy.

AI complicates the task because it may disrupt jobs faster than previous waves of technological change. Chinoy cautioned against assuming India was insulated simply because many workers were in occupations not currently exposed to AI. The policy objective is to move workers from agriculture to industry and services, but some entry-level jobs in both sectors could themselves be affected by automation.

A Brookings paper estimates that a 200-megawatt AI training data centre costs $8.2 billion and employs about 100 people in the United States. An investment of that size would typically generate around 10,000 jobs in other sectors, Chinoy said. India needs data centres for strategic reasons, but they cannot by themselves form a broadbased employment strategy.

Chinoy cited Taiwan's rapid growth, supported by advanced chip production, alongside the government's use of cash transfers. Highly capital-intensive industries may boost output without generating equivalent gains in wages, employment or consumption, he said. India should participate in the AI ecosystem while investing concurrently in sectors that absorb more labour.

Ghosh said AI could displace lower-skilled workers over the next three to four years, but also be deployed in health care research and defence production. India should apply the technology where it addresses national needs rather than compete only in capital-intensive areas. He also warned that India could grow old before becoming rich if it failed to make use of its demographic dividend soon.

The economists said new occupations might emerge, and demand could rise for workers with skills that complemented AI. Chinoy cited an International Monetary Fund analysis showing a 10 per cent decline in demand in AI-exposed sectors, although demand had stabilised as employers sought complementary skills. The speed of change leaves less time to adjust than in earlier industrial transitions.

The gig economy can provide some employment, but neither economist saw it as a complete answer. Ghosh said registrations on the eShram portal indicated that many informal workers reported monthly incomes of around ₹10,000, or ₹1.2 lakh annually, compared with India's per capita income of about ₹2.35 lakh. Gig work may offer a partial buffer, especially if social protection improves, but low pay and limited training constrained its ability to deliver broad-based prosperity.

India's priority is growth that converts investment and technological progress into productive work. That requires faster skilling, stronger labour-intensive manufacturing, effective worker transitions and a careful approach to AI. As Chinoy put it, the task is to give labour the skills and tools to compete with capital; Ghosh's emphasis was that India needed more high-productivity jobs, not merely a larger count of jobs.

PEs shift strategy from 'spray and pray' to focused bets

KRISHNA KANT
Mumbai, 27 October

India's private equity (PE) industry is moving towards a more selective investment model, as fund managers increasingly concentrate capital in established businesses, seek greater influence over strategic decisions and focus on operational transformation to generate returns.

This marks a shift from the broad-based investment approach, described as 'spray and pray', particularly in venture capital (VC), where investors spread capital across multiple firms in the hope that a few winners will compensate for losses elsewhere.

"Spray and pray is a terminology that most people casually use for VC," said Renuka Ramnath, founder, managing director and chief executive officer of Multiples Alternate Asset Management. "As a PE firm, we invest for very definitive returns that we want to generate. The methodology to generate the return is well articulated at the time of deal making."

Speaking at the *Business Standard* BFSI Insight Summit in Mumbai on Tuesday, Ramnath and Amit Chandra, chairperson, Bain Capital India Advisors, outlined how investment strategies have evolved alongside India's economic growth.

India's PE and VC investment activity has expanded considerably over the last 15 years, although annual deployment has fluctuated sharply. Investment volumes rose from around $38-40 billion in 2020 to approximately $70-77 billion in 2021, but fell below $40 billion in 2025. Chandra argued that the long-term trend matters more than annual spikes. Before 2010, India's PE industry generally deployed $20-30 billion annually. That grew to roughly $30-60 billion over the next 15 years.

However, this needs to be viewed against the country's economic growth. A rise in PE deployment does not necessarily represent an equally dramatic increase in the industry's penetration of the economy.

More important, according to Chandra, has been the improvement in the consistency of returns generated by established investment managers.

"Returns now seem to be more predictable for the well-established players," he said, pointing to the performance of leading domestic and global firms. India's median and top-quartile PE returns have generally compared favourably with the Nifty, including when measured in dollar terms, he added.

This has helped investors to become more discerning about where they deploy capital.

The investment thesis must begin before the deal

When Ramnath founded Multiples in 2009, India was emerging from a period of relatively weak economic growth. "We decided that we will look at company-specific stories, and decide whether we want to be invested in the company, and how to generate the required returns," she said.

That approach evolved as the macroeconomic picture became clearer. When Multiples raised its third fund after 2014, policy initiatives and emerging investment opportunities offered greater visibility into specific sectors.

Ramnath cited the government's affordable housing push, including the Pradhan Mantri Awas Yojana, as an example of how a clearly defined economic opportunity could support a sectoral investment thesis. Multiples backed Vastu Housing Finance, building an investment around the potential for growth in housing finance.

But a promising sector does not automatically make the investment successful. For PE managers, the discipline lies in linking the macro opportunity to a company-specific plan for delivering returns.

Active ownership is central to value creation

Both speakers stressed that PE firms must work with portfolio firms to bring about meaningful changes in strategy, scale and management. Ramnath described investors as partners to entrepreneurs, with capital serving as the entry point to a longer relationship.

"If we are not able to change the mindset of the entrepreneur to think way bigger, more scale, more institutionalisation and more possibilities, then we have been an inert, passive partner, which we are not," she said.

"Our most important job is to deliver returns above the stock market," Chandra said, adding that Bain seeks to generate returns around 400-500 basis points (bps) above the Nifty.

The strategy also recognises the asymmetry inherent in PE returns. An investment can lose a substantial portion, potentially all, of the capital deployed, but successful investments can multiply the original investment several times over.

So, the objective is to combine a strong investment selection with sufficient winners to offset failures.

AI creates opportunities as well as risks

Artificial intelligence (AI) is adding another layer to investment decisions. Rather than treating AI purely as a new investment opportunity, the panelists emphasised the importance of assessing how it could reshape existing businesses.

Ramnath pointed to Multiples' investment in AI services company Quantify in 2018. The application of relatively simple technologies, including cameras and scanners, demonstrated how companies could improve productivity and efficiency. She noted that AI-driven productivity improvements at Quantify had also affected operating margins, illustrating how technological change can alter business economics.

For investors, the task is to identify firms capable of using AI to create value while understanding how the technology could disrupt existing revenue streams and competitive advantages.

Chandra said every investment now requires an AI audit assessing whether a firm stands to benefit from or risks being disadvantaged by technology. He expects firms such as Bain Capital to focus more on AI-related infrastructure, including semiconductors, data centres and computing capacity, rather than compete with VC investors for bets on large language models (LLMs).

> Chairperson, Bain Capital India Advisors

This reflects the broader investment philosophy: identify opportunities aligned with a fund's capabilities and investment horizon, while systematically evaluating downside risks.

Domestic capital is critical to the next phase

Even as India attracts international investors, the industry needs a deeper domestic pool of long-term capital to sustain its expansion. Chandra argued that India cannot depend indefinitely on foreign capital to finance private businesses. "Every dollar that comes in will eventually be two to three dollars when it goes out if it's reasonably invested," he said, explaining that rising gross inflows do not necessarily translate into equally strong net inflows over time.

A more vibrant domestic PE industry would allow Indian investors to diversify into alternative assets while providing firms with a more durable source of growth capital.

Chandra called for a policy framework that encourages domestic institutions, including pension funds, insurance companies and endowments, to allocate more resources to PE.

While investment choices would not fundamentally change depending on whether a fund manages Indian or foreign money, funds raising capital internationally must account for dollar-denominated return expectations, making rupee depreciation an additional consideration, Ramnath said.

Quality assets still have an exit market

The more selective investment environment is also visible in exits.

Chandra described the market as a "tale of two cities" with segments, such as IT services and VC-backed firms, facing more difficult exit conditions, contributing to the decline in overall exit volumes. Quality assets, however, continue to attract strong interest.

Life insurers seek longer transition period

SUBRATA PANDA
Mumbai, 27 October

PHOTOS: KAMLESH PEDNEKAR

(*From left*) Alok Rungta, MD & CEO, Generali Central Life Insurance; Kamlesh Rao, MD & CEO, Aditya Birla Sun Life; Mahesh Balasubramanian, MD, Kotak Life; Rushabh Gandhi, MD & CEO, IndiaFirst Life Insurance, at the *Business Standard* BFSI Insight Summit in Mumbai on Tuesday

Life insurers have urged the Insurance Regulatory and Development Authority of India (Irdai) to provide a longer transition period for implementing proposed distribution reforms, saying the industry needs time to adjust to tighter expense limits and changes to commission structures without hurting insurance penetration or weakening distribution networks.

At a panel discussion on "Distribution Reforms: The New Paradigm" at the *Business Standard* BFSI Insight Summit on Tuesday, industry leaders broadly welcomed the regulator's push to improve customer outcomes but called for a more calibrated implementation timeline, arguing that insurers differ in their scale, distribution models, and cost structures.

The debate follows Irdai's September 23 consultation paper—Recalibrating Economics of Insurance Distribution—which proposes bringing life insurers' expenses of management (EoM) down to 15 per cent of gross direct premium income within two years, and to 12.5 per cent within five years. It also proposes tighter, product- and channel-specific commission limits, greater transparency in distribution costs, and safeguards against misselling.

Rushabh Gandhi, managing director and chief executive officer (MD & CEO), IndiaFirst Life Insurance, said the direction of the proposed changes was right but argued that the transition to the new expense limits needed reconsideration.

"Directionally, it is bang on; it couldn't have been better," Gandhi said, identifying tighter cost structures, wider reach, simpler distribution, and better customer outcomes as the key objectives. He suggested a longer glide path to the proposed 15 per cent EoM limit, noting that only two organisations currently met that benchmark. He also called for a review of commissions on pension products, particularly deferred annuities, while suggesting that the proposed commission structure for unit-linked insurance plans (ULIPs) could be challenging given existing reduction-in-yield restrictions.

Mahesh Balasubramanian, MD, Kotak Mahindra Life Insurance, said the central question was not whether the industry supported the reforms, but how smoothly they could be implemented.

> MD & CEO, IndiaFirst Life Insurance

Balasubramanian said that the reforms could make insurance products more affordable and accessible while helping customers stay invested for longer. He said lower distribution and operating costs could help insurers compete more effectively with other financial products. Over time, the industry could move from a model in which products are primarily sold by intermediaries to one in which customers actively seek out insurance.

Kamlesh Rao, MD & CEO, Aditya Birla Sun Life Insurance, said the implementation timeline would be crucial to achieving the regulator's broader goal of expanding coverage. "The issue is not where the regulator wants us to go. The question is whether what is being recommended now is the destination, or should it be the starting point," Rao asked.

He noted that Irdai wanted the new framework to take effect from April 1, 2027, and that insurers were discussing whether the transition should take three, five or seven years. India's ambition of "Insurance for All by 2047" would require the number of policies to grow by around 7-8 per cent annually over the next two decades, he said. A more gradual reduction in costs could allow insurers to adjust their business models while continuing to expand distribution and coverage.

Rao also stressed the importance of bancassurance, saying banks had driven much of the industry's growth over the past five years. Changes to the economics of bank-led distribution should, therefore, be phased in carefully to avoid undermining a key channel for insurance penetration, he said.

Alok Rungta, MD & CEO, Generali Central Life Insurance, said the reforms needed to account for differences in the starting positions of insurers, particularly newer players that were still investing in building their businesses.

"Everybody has to have the same landing point, but is it the same time? That is what is being discussed," Rungta said, calling for the regulator to recognise differences in company size, scale, and history. He also cautioned against weakening the agency channel in the process of recalibrating bancassurance economics, saying insurers needed to preserve multiple distribution models and give long-term investors time to build their networks.

The panel also debated whether misselling was as widespread. Gandhi said insurers had strengthened suitability checks, pre-issuance validation calls, video consent, and data-led fraud detection, arguing that industry-level grievance ratios were declining.

Balasubramanian said customer dissatisfaction should not automatically be treated as misselling, as policyholders sometimes reconsider long-term savings commitments. However, he added that insurers and distributors shared responsibility for ensuring products were suitable and that safeguards were built into the sales process.

Rao called for a data-led assessment of the issue, pointing to the industry's claims record and free-look provisions. Rungta, meanwhile, argued that regulation should preserve both bancassurance and agency-led distribution, particularly because building an agency network requires substantial investment and time.

Irdai has extended the deadline for comments on the consultation paper from October 25 to October 31, following stakeholder representations. The proposals remain under consultation and are not final regulations.

AI creating new vulnerabilities, making risks harder to assess: General insurers

AATHIRA VARIER
Mumbai, 27 October

Cyberattacks that can trigger losses across multiple businesses simultaneously are emerging as a major challenge for general insurers with artificial intelligence (AI) creating new vulnerabilities and making risks harder to assess, industry executives said at the *Business Standard* BFSI Insight Summit on Tuesday.

Unlike conventional risks, cyber incidents can spread across geographies through shared technology systems and service providers. These can expose insurers to multiple claims from a single event. The potential for such losses makes it difficult to estimate exposure, price policies and determine how much risk insurers can retain.

Executives said resilience would depend on insurers' risk appetite, stress-testing frameworks, underwriting standards and the reinsurance protection available to absorb large losses.

AI is adding to the challenge by enabling more sophisticated fraud, including the creation of synthetic documents. Existing policies may also not clearly cover losses arising from AI agents that act unexpectedly or undertake unauthorised actions.

Animesh Das, managing director (MD) & chief executive officer (CEO), Acko General Insurance, said traditional underwriting methods were struggling to keep pace with rapidly changing threats. "Cyber risk is evolving almost on a daily basis and that needs heavy technical capabilities. It needs real-time evaluation," Das said.

He called for stronger data intelligence and underwriting safeguards, alongside human oversight as insurers adopt AI tools. "The human-in-the-loop concept is not only a statement, but it is actually a matter of fact," he said.

The challenge extends to consumer awareness and product design. A study cited during the discussion found that 69 per cent of respondents wanted to buy retail cyber insurance, but only 4 per cent had tried or purchased a policy. Participants attributed the gap partly to difficulties in comparing products and uncertainty over what the policies covered.

Executives said insurers needed to assess customers' cybersecurity practices and make policy terms clearer, particularly for enterprise cover involving emerging AI-related risks.

The panel also discussed the need for additional reinsurance capacity and India-specific underwriting expertise as cyber and climate risks grow.

Hitesh Joshi, chairman and MD of GIC Re, highlighted the difficulty of assessing cyber-risk accumulation, as a single incident can affect organisations across geographical boundaries. He said preparedness varies among insurers and depends on their enterprise risk management systems, risk appetite, reinsurance arrangements and ability to stress-test potential losses.

He argued that insurance pools should be used where commercial solutions were unavailable. The discussion also highlighted the cyclical nature of reinsurance pricing: Abundant capital can put pressure on rates, while a major catastrophe can push them higher by depleting capacity. New reinsurers, executives said, would need to bring expertise tailored to Indian risks, not just additional capital.

The panel broadly supported the direction of the Insurance Regulatory and Development Authority of India's (Irdai's) proposed distribution reforms, while calling for a phased transition to expense-of-management limits.

Parthanil Ghosh, MD & CEO, HDFC Ergo General Insurance, said insurers needed time to adjust to the proposed framework. "We are looking for a glide path for the general insurance industry coming from 30 per cent to 25 per cent or from 35 per cent. We want to reach that milestone, take stock of the situation and then go to the next level of 20 per cent," Ghosh said. He also called for a level-playing field in commission structures, ensuring efficiency gains translate into better outcomes for policyholders.

Pallavi Malani, India leader for insurance practice at Boston Consulting Group, said the consultation offered an opportunity to address misselling and improve affordability and insurance penetration. "From a medium or long-term perspective, this gives us the one chance to really reimagine the industry," Malani said.

Health insurance leaders split on dedicated regulator

(*From left*) Amit Roy, partner & leader, Insurance & Allied Business, PwC India; G Srinivasan, MD & CEO, Galaxy Health Insurance; S Prakash, CEO, Health Insurance Ecosystem and Strategic Partnerships, General Insurance Council, at the *Business Standard* BFSI Insight Summit in Mumbai on Tuesday

> "I THINK THE PROVIDERS OR THE HOSPITALS NEED TO SEE HOW THEY CAN BRING DOWN THE COST OF HEALTH CARE"
>
> S PRAKASH
> CEO, Health Insurance Ecosystem and Strategic Partnerships, General Insurance Council

AATHIRA VARIER
Mumbai, 27 October

The insurance sector needs a dedicated health regulator, health insurance leaders said on Tuesday at the *Business Standard* BFSI Insight Summit. However, views remain split on whether to wait for one or address the disconnect between hospitals and insurers immediately.

Panellists said rising health care costs, lack of transparency in hospital billing, and disputes over claims were affecting policyholders' experience. While some called for a regulator to standardise treatment protocols, rates and procedures, others said the industry could begin resolving several of these issues without waiting for a new regulatory framework.

"Every critical industry in our country is regulated, and health is something very, very critical for the people. Forget insurance, it is a basic necessity of people. How can we leave it unregulated? I am unable to understand why the policymakers are leaving this sector to regulate itself," said G Srinivasan, managing director and chief executive officer (MD & CEO), Galaxy Health Insurance, arguing that a dedicated health regulator was needed to improve transparency and standardisation.

Srinivasan said patients should know how much a particular treatment would cost before entering a hospital. Standard treatment protocols, transparent rates, and uniform procedures across hospitals were also needed, he added.

The National Health Claims Exchange, described as a government initiative to improve the claims process, had not taken off as hospitals had not adopted it adequately, Srinivasan said.

However, another panellist said the industry should not wait for a regulator to address problems that insurers and hospitals could resolve themselves. The disconnect between the design of insurance products and their delivery at hospitals was a key source of friction, the speaker said.

Hospitals often deal with products from 34 insurers and more than 500-600 policies, making it difficult for them to understand the terms and coverage of each product. The resulting mismatch between what insurers offer and what hospitals deliver contributes to an unpleasant experience for policyholders, said S Prakash, CEO for Health Insurance Ecosystem and Strategic Partnerships at the General Insurance Council of India (GIC). "There are a lot of things in our hands, sir. Today we discuss, tomorrow we can go and implement. This minute, somebody is taking a decision on health and they are suffering. Millions of people are suffering. And we are talking about getting a regulator. What is that we can do tomorrow to reduce grievances and sufferings of a common man," Prakash asked.

"Unfortunately, nobody in India talks of reducing health care costs. I don't think when I go to a hospital, I am looking for 7-star facilities. I am looking for quality health care. I think the providers or the hospitals need to see how they can bring down the cost of health care."

Amit Roy, partner and leader for insurance and allied businesses, PwC India, also highlighted the limited coverage available for outpatient department (OPD) expenses. Around 67 per cent of India's healthcare spending goes towards OPD expenses, while only a single-digit share of health insurance premiums is directed towards OPD coverage, he said. The industry needed to look beyond health insurance towards broader health financing, particularly as people live longer and healthcare requirements increase with age, he said.

'Real-time fraud check key in digital payments'

RAM PRASAD SAHU
Mumbai, 27 October

(*From left*) Arif Khan, CIO, Razorpay; Karan Sapra, head of payments and financial services (India), Google Pay; K Satyanarayana Raju, CEO, IDPIC; and Lalit Chowdhary, senior vice-president (implementation & delivery), Mindgate Solutions at the *Business Standard* BFSI Insight Summit in Mumbai on Tuesday PHOTOS: KAMLESH PEDNEKAR

At a discussion on India's digital payments ecosystem, 'Payments at Scale, Can Security Match It?' during the *Business Standard* BFSI Insight Summit, industry leaders Karan Sapra, head of payments and financial services, India, at Google Pay; Lalit Chowdhary, senior vice-president, implementation and delivery at Mindgate Solutions; Arif Khan, chief investment officer (CIO) of Razorpay; and K Satyanarayana Raju, chief executive officer (CEO), India Digital Payment Intelligence Corporation (IDPIC), elaborated on the need to go beyond conventional checks and adopt an intelligence-driven approach to tackle increasingly sophisticated fraud.

A central theme of the discussion was the changing nature of digital payments fraud. According to Khan, conventional safeguards such as one-time passwords, PINs and authentication protocols are no longer sufficient to address the full range of risks. "The bigger challenge that we are seeing is context in the intent of the payment," Khan said, explaining that a transaction may be technically secure even when a customer is being manipulated into transferring money.

Fraudsters increasingly exploit fear, urgency and impersonation, posing as law enforcement officials or other trusted authorities, to persuade victims to make payments voluntarily. The challenge, therefore, is no longer just to ensure that a payment is authorised, but to establish whether the person making it understands the transaction and its consequences.

Khan said Razorpay was working to analyse multiple signals to understand the context and intent behind payments. He also pointed to the growing sophistication of fraud networks, which can move money rapidly through mule accounts, while payment companies often operate with limited visibility into one another's systems.

Sapra highlighted a similar shift, describing the evolution from hacking technical processes to manipulating human behaviour. He said Google Pay was focusing on user education, contextual warnings and the use of artificial intelligence (AI) to identify suspicious patterns. Such warnings could be delivered in English, Hindi/English or regional languages, depending on what users understand best.

> "THE CHALLENGE IS TO ANALYSE DEVICE INFORMATION, TRANSACTION PATTERNS, MERCHANT BEHAVIOUR AND THE DESTINATION ACCOUNT'S HISTORY IN LESS THAN A SECOND, BEFORE A SUSPICIOUS PAYMENT IS COMPLETED"
>
> ARIF KHAN
> Chief investment officer, Razorpay

The company has also introduced haptic alerts — gentle phone vibrations intended to interrupt routine payment behaviour and prompt users to reconsider a potentially risky transaction.

The objective, Sapra said, is to combine intelligence drawn from multiple signals with timely interventions that help customers recognise a threat before the money is transferred.

> "THE OBJECTIVE (OF HAPTIC ALERTS) IS TO COMBINE INTELLIGENCE DRAWN FROM MULTIPLE SIGNALS WITH TIMELY INTERVENTIONS THAT HELP CUSTOMERS RECOGNISE A THREAT BEFORE THE MONEY IS TRANSFERRED"
>
> KARAN SAPRA
> Head of payments & financial services (India), Google Pay

The need for greater cooperation across the payments ecosystem emerged as another key issue.

Chowdhary said Mindgate Solutions, which processes a significant share of payment transactions, had observed that although larger banks had strengthened their fraud-detection frameworks, vulnerabilities often persisted at the edges of the system. Money can pass through mule accounts quickly, making detection and recovery difficult. He emphasised that the industry needed to improve its ability to identify suspicious activity and recover funds promptly.

Raju outlined the role of the Digital Payment Intelligence Platform (DPIP), developed by the Reserve Bank of India (RBI) Innovation Hub with the support of the RBI, in strengthening the ecosystem's response to fraud.

> "THE DIGITAL PAYMENT INTELLIGENCE PLATFORM COULD HELP DETECT MULE ACCOUNTS BEFORE A FORMAL COMPLAINT IS FILED, SHIFTING THE EMPHASIS FROM RESPONDING TO FRAUD TO PREVENTING IT"
>
> K SATYANARAYANA RAJU
> Chief executive officer, IDPIC

The initiative is being implemented in phases. The first phase focuses on creating a smart registry of suspicious identifiers and enabling participating institutions to screen their records against the registry. The platform aims to onboard 120 regulated banking entities and 69 payment aggregators. At the time of the panel, 16 banks had gone live, contributing nearly 3.2 million reports and around 6.4 million identifiers, Raju said.

He added that nearly 70 million records had been screened, identifying around 230,000 suspected identifiers and 70,000 alert identifiers. Around 92,000 identifiers had been reported by multiple channels, including more than one bank.

> "MONEY CAN PASS THROUGH MULE ACCOUNTS QUICKLY, MAKING DETECTION AND RECOVERY DIFFICULT. THE INDUSTRY NEEDS TO IMPROVE ITS ABILITY TO IDENTIFY SUSPICIOUS ACTIVITY AND RECOVER FUNDS PROMPTLY"
>
> LALIT CHOWDHARY
> Senior V-P (implementation & delivery), Mindgate Solutions

The registry is intended to help institutions identify potentially suspicious accounts during customer onboarding and beneficiary addition, as well as through periodic screening of existing records. This could help detect mule accounts before a formal complaint is filed, shifting the emphasis from responding to fraud to preventing it.

Raju said the platform could eventually be extended to other sectors, including cooperative banks, non-banking financial companies (NBFCs), insurance companies and e-commerce businesses, although stabilising the initial phases remains the immediate priority.

Participants said the next step would be to move beyond periodic screening towards real-time risk assessment.

Raju added that the platform's planned second phase would use transaction histories and behavioural patterns to generate risk scores for individual digital payments. These scores would be shared with both the sending and receiving banks, helping them decide whether a transaction should proceed or whether a credit to the beneficiary's account should be held pending further checks.

The proposed approach would use data relating to both the payment initiator and the beneficiary, along with the reporting institution's history, to assess risk. Models developed using data from larger banks could also help smaller institutions strengthen their fraud-detection capabilities.

Khan argued that the value of such a system would depend on how effectively participants combine their intelligence. A payment service provider may detect a compromised device, while another institution might identify the receiving account as a potential mule. Taken together, these signals could provide a much stronger indication of fraud than either signal alone. The challenge, he said, is to analyse device information, transaction patterns, merchant behaviour and the destination account's history in less than a second, before a suspicious payment is completed.

He also stressed the importance of predictive modelling, arguing that fraud prevention cannot rely entirely on historical data. Fraudsters continually change their methods, requiring the ecosystem to anticipate emerging threats rather than merely react to known ones.

Sapra said Google Pay was using an AI-powered conversational agent to interview users after fraud incidents, helping identify new methods used by scammers and develop patterns that could inform future defences.

The panel also examined whether India's enormous payment volumes were making the system more vulnerable.

Chowdhary said the rapid growth of Unified Payments Interface (UPI) had pushed payment infrastructure providers to adopt newer technologies, reduce pressure on core systems and improve reliability.

Still have 600 mn users left to acquire on UPI: PhonePe chief

> "WITH AGENTIC COMMERCE, OPENAI, ANTHROPIC AND GEMINI WILL DO PAYMENTS TOO. THERE'S NO DEARTH OF COMPETITION"
>
> Sameer Nigam, founder & CEO, PhonePe

Q&A PhonePe wants to take the Unified Payments Interface (UPI) to a billion Indians over the next 10 years, Founder And Chief Executive Officer **Sameer Nigam** said during a fireside chat at the *Business Standard* BFSI Insights Summit in Mumbai. As the payments company completes 10 years, Nigam also addressed concerns about the proposed cap on market share for UPI apps, the return of the merchant discount rate (MDR). Edited excerpts:

FIRESIDE CHAT

Where do you see PhonePe in 10 years?

■ One, take UPI to a billion people. Three months in, our UPI for feature phones does about 3 lakh transactions a month, and we will maybe reach 1 million by December. Two, affordable formal credit for small businesses and consumers. Credit is preposterously expensive for those who need it and can repay. Three, go global. We've launched in the United Arab Emirates (UAE) and applied in a couple more markets. Four, sachetise insurance, pensions and investments.

Won't smartphones make feature phones irrelevant?

■ Since my Flipkart days, I've heard feature phones will disappear. Yet 25-30 crore people haven't moved, due to affordability or choice. Many, including Gen Z, don't want social media but want payments. With chip prices up, sub-₹15,000-20,000 smartphones aren't getting made. Payments should be like electricity. I didn't build a business case; we aligned our board and treated it as a product hack. Ten years ago, any venture capitalist would have said "UPI who?" Sometimes you just have to take asymmetric bets.

Critics say you've become too large. What about the talk of a market share cap?

■ The National Payments Corporation of India (NPCI)'s circular is six years old. It came because WhatsApp, with 600 million users, was entering in 2019-20 and there was a concern it might prematurely come and monopolise a market that was yet to be created. Today, there are over a hundred third-party UPI apps. Apple Pay is just entering. Kunal Shah has joined WhatsApp, so you can bet WhatsApp Pay will return. With agentic commerce, OpenAI, Anthropic and Gemini will do payments too. There's no dearth of competition.

As long as UPI itself remains fully interoperable on the input side, anybody in this room can launch a new UPI tomorrow. And pretty much anyone who's in the startup ecosystem, the banking universe or corporate India has launched a UPI. So, clearly my presence is not deterring people from coming in. And my market share is not deterring people from investing. My day-zero belief was that the best app would win the most users; you have to believe that's playing out. As the merchant discount rate (MDR) debate shows, no app gets to charge, so pricing isn't a lever. Only 450 million users are on board; 600 million more are still to be acquired. If somebody told you there are 600 million users in one country that you could go after in a market where you have no barrier to entry, I don't think you'd be talking about market share; you'd be talking about what you could go after in building differentiated stuff. Navi is now almost at 4 or 5 per cent. Earlier it was CRED, before that super.money, and before that Tata Neu. The problem has been sustainability. For us, this is the core mission. For many, it was a feature.

What if, come December, you can't onboard new customers because of the market share deadline?

■ I'd protest, but comply. We operate in a regulated business. We pride ourselves on being compliant at all times. Why shouldn't a new user have free choice? With the regulator and government, I think it's settled that denying choice won't happen. I believe that the market will become naturally more competitive if sustainable business models for payments directly become available. You can't have a vibrant payments market with no money in payments.

Real money gaming vanished as a category overnight. Does regulatory risk worry you?

■ We were at most a payment gateway there. It's disturbing when 300-400 companies shut overnight, though maybe the industry had it coming. No founder likes a circular shutting down a business, but sensitive sectors need some of it. I'd like regulators, not just ours but all the policymakers, to spend less time on price intervention, from taxi rides to food technology.

(*From left*) Nishant Singh, founder & CEO, Business Next; Paritosh Wechalekar, managing director of Technology Services for India Business, Accenture; Rajesh Prasad, director, Punjab National Bank; Sameer Shetty, group head of digital business and transformation and strategic programme, Axis Bank; and Ramesh Lakshminarayanan, group head of IT and chief information officer, HDFC Bank at the *Business Standard* BFSI Insight Summit in Mumbai on Tuesday

AI in banking here to stay; banks must gear up for change, say experts

AASHISH ARYAN
New Delhi, 27 October

Artificial intelligence (AI) and agentic AI will give banks a competitive advantage but will also force them to reassess the balance between risk and agility, said Ramesh Lakshminarayanan, group head of information technology and chief information officer at HDFC Bank. He was speaking at a panel discussion on 'Autonomous Banking & Security' at the *Business Standard* BFSI Insight Summit in Mumbai.

"An AI bank is going to come, whether we like it or not. It is not going to be 200,000 employees; it will probably have 200 employees. We have to get ready for this. Whether this happens in two years or five years, we do not know, but banks have to be prepared for it," Lakshminarayanan said.

All banks in India, including those that have transitioned from manual to digital banking, can implement the changes likely to come with the introduction of AI and autonomous banking agents, said Rajesh Prasad, a director at Punjab National Bank. He added that while these autonomous agents would be integrated into bank systems, a human pilot would continue to oversee their operations.

The introduction of AI into banking systems will also make it easier for customers to switch to banks that use these technologies more effectively, said Sameer Shetty, group head of digital business and transformation and strategic programme at Axis Bank.

Instead of obtaining all their services from a single bank, customers may choose different banks for different needs, such as opening a savings account with one bank and taking a loan from another, Shetty said.

Unlike in the days of manual and digital banking, when customers had to fill out forms by hand or on a computer, AI and autonomous agents will simplify the process by handling such tasks, he said.

To make the most of AI and autonomous agents, banks will need to establish appropriate guardrails and set clear boundaries for their agents, said Paritosh Wechalekar, managing director of Technology Services for India Business at Accenture.

"Drawing these boundaries is of prime importance in the AI and agentic world. The regulator is always saying that you have to do a risk tiering when you identify the use cases. And when banks do that risk tiering, they have to identify the boundaries as well and work towards them," Wechalekar said.

The advent of autonomous banking will transform the way banks operate, but lenders will need to learn to act, judge and simulate while accounting for new rules developed by AI agents, said Nishant Singh, founder and chief executive officer of Business Next.

While AI will not change the risk boundaries set by banks, the decision on whether to continue applying manual rules within those boundaries or follow the learning and outcomes suggested by agentic AI will rest with the banks, Singh said. This, he added, will be a key towards becoming truly autonomous.

Business Next also launched an exclusive report titled 'The Zero-Touch Bank' — Accelerating India's $30 trillion mandate through digital, cognitive, and autonomous banking. The report highlighted that the data rails for autonomy already exist; the orchestration layer does not.

‘Indian markets likely to surpass average’

Business Standard Smart Investor Arena

PHOTOS: KAMLESH PEDNEKAR

Devina Mehra, founder, chairperson and managing director of First Global, has been investing in international markets since 1999. At the *Business Standard* Smart Investor Arena, she spoke on investing in global markets and why it mattered. Edited excerpts:

First Global went international in 1999. How did you decide on this, and why?

■ In 1997-98, the currencies of South-east Asian countries fell, followed by their markets. In one year, in dollar terms, those markets were down 50-90 per cent. Taiwan fell 50 per cent, and Indonesia fell 90 per cent. That was a wakeup call of not putting all eggs in one basket. The other was simply that I was a learning junkie. We decided to go international. In 1999 we were not just the first Indian; we were the first Asian members of the London Stock Exchange other than the Japanese.

You were known for your call on Amazon at that time.

■ The whole of Wall Street was positive on Amazon up to the dotcom boom, and when the bust came they all turned negative. Our call on Amazon was a strong “buy”. Not one Wall Street firm had that position. We looked only at the numbers. In the last quarter of 2000, Amazon had made $220 million-240 million of cash. For the first time in its history, it was not in danger of going bust. Jeff Bezos sent us an email saying “thanks” for the support, because ours was the only “buy” on record.

You advocate Indians investing across the globe, not just the United States. Any comments?

■ Global investing is not something you should do as a knee-jerk because India has not given returns for the past two years. It has to be a certain part of your investment anyway. India is not even 3 per cent of global market cap. There is no logical reason why 90-100 per cent of your assets should be in India. And the rupee depreciates. On the day I started working if I had put ₹1 lakh in the Indian markets, it would have become ₹1.5 crore today. In global markets, it would have become ₹6.8 crore. When I started working, the dollar was ₹12; now it’s nearly ₹96.

Unfortunately, most people selling global products today are telling you that the market hasn’t done well for two years, so put your money in my product. The last time this boom came was in 2021, with Nasdaq exchange-traded funds (ETFs) and funds. In 2022, the Nasdaq was down 32 per cent. People came to me and said: Now it’s down 40 per cent, should I exit? I said, don’t compound a bad “buy” with a bad “sell”. A stock down even 90 per cent can be a “sell”, but a major index down 40 per cent is almost never a “sell”.

Most people offering global investing have no expertise. Buying the 12 United States (US) stocks you know is not global investing. In our global funds, in the last round, we added Malaysia and Mexico, which are not even on anybody’s radar. Global means global. No market does well forever.

> “I HAVE NO DOUBT THAT THE NEXT BOOK ON FINANCIAL BUBBLES WILL HAVE A CHAPTER ON AI. THIS YEAR, AI INVESTMENT IS SUPPOSED TO BE ABOUT 2% OF AMERICAN GDP”
>
> DEVINA MEHRA
> Founder, chairperson, managing director, First Global

How much should be the home-market bias in a portfolio

■ Logically very little, because it is only 3 per cent of world market cap. I am 80-85 per cent global. But at least, over a period of time, have 30-40 per cent of your portfolio in global investing because otherwise the value of your rupee keeps depreciating. When you are saving for goals 10, 20, 30 years away, you cannot forget that. Our grandmothers were not wrong in buying gold because at that time gold was the only hard currency-denominated asset you could buy.

So gold lived up to its story?

■ No. In a liberalised world, gold is not the best thing to buy. Unlike its image of being a safe haven, it has been no safe haven. In 1980, gold reached a high in dollar terms. That high was not crossed for 27 long years, till 2007. The only reason the rupee chart of gold looks good is because it’s a rupee-depreciation chart. In our multi-asset portfolios, gold and silver together are normally a single-digit allocation.

First you have to manage risk because investing is a loser’s game. You play this game not to lose first. Book the small losses so that you don’t take a big hit because percentages are not symmetrical. If something falls 50 per cent, it has to rise 100 per cent to get back.

Why has Europe stayed behind, and why is everybody now looking at it?

■ From the beginning of last year, we have been underweight the US and overweight Europe. Europe has been a laggard for about 20 years, even though in terms of return ratios it’s not bad. Pockets in Europe are looking interesting from a longer-term point of view. As I said, no theme in investing lasts forever. That’s the golden rule.

How do you look at artificial intelligence (AI) and semiconductors?

■ I have no doubt that the next book on financial bubbles will have a chapter on AI. This year, AI investment is supposed to be about 2 per cent of US gross domestic product (GDP). You have to go back 150 years to the railroads, and even then it was about 2.2 per cent of GDP. Investors lose much more money in successful technologies than in unsuccessful ones because in unsuccessful technologies the amount of investment going in is limited. Investors lost a lot of money in railroads, the internet, automobiles and aviation because of overinvestment and overvaluation. Already in AI, there is debt of a trillion dollars. Are you ever going to make economic rates of return on that money?

There’s a slim book titled A Short History of Financial Euphoria by John Kenneth Galbraith. The pattern of bubbles is always the same. And AI investment is in fast-depreciating assets. A railroad that went bankrupt could be bought at 30 per cent of the cost and made viable. If AI goes bust, it may not even be of value one or two years later.

Semiconductors are the most volatile and cyclical industry in the world. If I am supplying capital equipment, I am essentially starting from zero every year. Micron and others have 70 per cent margins because companies in the AI business say we can’t be left behind. All this is a sign of frenzy. It doesn’t last forever.

Is there one ETF that gives exposure to the world?

■ One way is via Indian mutual funds, which I would not recommend because the mutual-fund limit is over. You are buying at a 20-30 per cent premium to the underlying assets, and the day the limit increases, your price will come down by that 30 per cent. You can open a global broking account and buy an ETF. But don’t buy a US-only index ETF. Buy a global index ETF — MSCI has one, ACWI — which gives you exposure across the globe.

Should one just buy a global exchange-traded fund and sit quite?

■ If you want only passive investing, yes. I advocate active investing, and that’s where my own money is. If you can get somebody skilled, do an active allocation. Otherwise do a passive allocation. Most GIFT City (Gujarat International Finance-Tec City) products I would not recommend. Most of them are down over six months and one year when no global market is really down.

Can one buy South Korean ETFs?

■ South Korea is oriented towards semiconductors, a highly volatile sector, so it is not something you can take a long-term bet on and say it will always do well.

How do you see the Indian markets from here?

■ My bet on global investing is not because I have a negative view on India. India has been about flat for two years. In the past, when the Indian markets have been flat for two years, the next year’s returns have ranged between 5 per cent and 55 per cent, an average of about 25 per cent. I never give a one-year projection. But in terms of probability, they are more likely to do better than average.

Sentiment is a contra-indicator. When money making appears easy, as in 2024, the next-period returns will probably be below normal. When your head is screaming “stop the systematic investment plan”, get out of the market, the next-period returns are going to be above normal in probability terms.

Sector by sector, we are not at extreme highs anywhere. In many cases we are below average, in some slightly above. Put together, the next-period returns should be better.

But nobody can tell you what will happen in one year. So do asset allocation. Even if you are 25, never have 100 per cent in equity. Have money there you do not need for seven to eight years, and don’t keep tinkering with the allocation.

Rakesh Jhunjhunwala’s superpower was not stock-picking. He realised that equity returns were extremely lumpy and you have to live through long periods of pain. From 1994 to 2003, the net movement in the market was zero for nine years, and then it went up six times in four and a half years. That’s the nature of equity markets.

FIRESIDE CHAT

‘GenZ’s lifestyle spends more risky than market volatility’

ABHISHEK KUMAR
Mumbai, 27 October

Credit is increasingly becoming the first financial product that young Indians encounter, sometimes even before savings accounts or systematic investment plans (SIPs). Speaking at the *Business Standard* Smart Investor Arena, Chartered Accountant and Content Creator Sakchi Jain highlighted how easy access to buy now, pay later (BNPL) services and credit cards is influencing Gen Z spending habits.

“For a good per cent of Gen Z, credit is the first financial product they come in contact with,” Jain said, pointing to the growing role of digital lending in shaping financial behaviour among young consumers.

Borrowing has become easier and less intimidating with the rise of digital credit products, since taking a loan earlier involved paperwork and a formal banking process, which often made people think carefully before borrowing. Today, BNPL allows consumers to make almost instant purchases, sometimes without fully recognising that they are taking on debt.

Jain said this can encourage young consumers to prioritise lifestyle upgrades even when their financial situation may not support such spending. This is called the “lipstick effect”, where people turn to smaller, relatively affordable purchases when larger aspirations seem difficult to achieve. Buying sneakers worth ₹8,000, for instance, can offer a sense of satisfaction and help someone maintain a desired lifestyle, with BNPL making such purchases easier.

However, a growing dependence on credit could create financial pressure over time. Jain cautioned that lifestyle spending funded through borrowing may not be sustainable in the long run, particularly when repayment obligations begin to pile up.

“If we look at the bigger picture, this is definitely not sustainable in the long term,” she said.

Jain said lifestyle expenses could pose a greater challenge to regular investing than stock market fluctuations. “It is not the market that is a competitor to SIPs (systematic investment plans). It is your lifestyle,” she said.

Young consumers may start small SIPs while continuing to use credit for discretionary purchases, without considering the combined impact on their finances. The problem can become more serious during unexpected events such as job loss or medical emergencies. In such situations, individuals may choose to protect their existing lifestyle instead of reducing discretionary spending, while stopping their investments.

> “IF YOU TELL A GEN Z INVESTOR THAT THEY HAVE TO INVEST ₹1,500 OR ₹2,000 ON A PARTICULAR DAY OF THE MONTH, IT CAN CREATE PSYCHOLOGICAL PRESSURE. BUT IF YOU TELL THEM TO INVEST ₹50 EVERY DAY, IT MAY NOT CREATE THE SAME PRESSURE”
>
> SAKCHI JAIN
> Chartered accountant and content creator

Jain warned that this approach could disrupt long-term wealth creation. Identifying a pattern, she also observed that financial products are often marketed separately, encouraging consumers to begin investing with small amounts or use BNPL facilities without necessarily evaluating their overall financial position.

Despite greater access to financial information through social media, financial awareness remains uneven across Gen Z. Jain noted that some young investors entered the markets around the Covid-19 pandemic and experienced subsequent volatility and recovery, while others are only beginning their investment journeys. So, their understanding of investment products and market cycles varies considerably.

She also discussed how the presentation of investment products can influence participation. Daily SIPs, for example, may appear more manageable than committing to a larger monthly amount.

“If you tell a Gen Z investor that they have to invest ₹1,500 or ₹2,000 on a particular day of the month, it can create psychological pressure. But if you tell them to invest ₹50 every day, it may not create the same pressure,” Jain said.

Ultimately, building long-term wealth requires more than simply starting an investment early. Balancing lifestyle aspirations with responsible borrowing, disciplined spending and consistent investing will be essential for young Indians seeking financial stability, according to Jain.

Money gives you the freedom to have choices in life: Warikoo

Money is not just about getting rich but about gaining the freedom to live life on your own terms, said **Ankur Warikoo**, content creator and entrepreneur at the *Business Standard* Smart Investor Arena. The most successful people of the young generation will be those who are “intently focused”, said Warikoo. Edited excerpts:

How has the definition of money changed for you over the years?

■ Growing up, I used to hate money for the simple reason that we were always short of it. I always felt that our family’s struggles were attributable to money — that if we had enough of it, everything would get fixed. I saw money as the quintessential means of buying things and escaping this middle-classness.

Things started changing when I began spending money on the things I wanted. I realised it does bring an insane level of happiness; at least up to a point. Don’t delude yourself into believing that money doesn’t matter. It does, and it matters a lot. But at some point, it starts to have diminishing returns.

Then, you realise that you don’t necessarily have the money upfront for the things you spent it on, whether it was a house, a car, or a vacation. You have to finance them through loans, essentially borrowing from your future self, and that leaves a feeling of being stuck.

The biggest shift in my thinking came rather late in life: I began to see money as freedom. That’s when one truly begins to understand the power of money. It’s the freedom to choose the kind of work you want to do, where you want to live, the people you want to work with, the food you want to eat, and the hobbies you want to pursue.

My definition of money is that it’s the best way to buy your freedom and get choices in life. Having choices is what puts you truly in control. Once you have that, you realise you are truly rich. The biggest realisation is that you don’t need a lot of money to get there. You just need to understand how much money you need to live the life you want.

How much money is enough?

■ The definition of how much money is enough is the starting point. You have to set a finish line for yourself and don’t have to stop there, but at least know you’ve crossed that milestone. For me, that number came to ₹21.7 crore. Fundamentally, I decided to live life on my own terms. So, one needs to figure out what that number is. Financial planning is necessary for financial freedom because you won’t achieve that number if you don’t do it.

> “MONEY IS ACTUALLY ABOUT PSYCHOLOGY. WE THINK OF MONEY AS SOMETHING VERY OBJECTIVE AND LINEAR, BUT IT ISN’T. YOU NEED TO TRAIN YOUR PSYCHOLOGY, AND THE BEST WAY TO DO THAT IS TO BUILD HABITS”
>
> ANKUR WARIKOO
> Content creator, entrepreneur

Isn’t discipline equally necessary?

■ If you don’t invest regularly, what you’re essentially saying is: Whenever I have money available, I’ll invest it. You’ll keep postponing your SIPs (systematic investment plans) until you have extra money or the market falls. Even professionals who spend their time studying markets and predicting the right moment to invest consistently find it difficult.

Putting money into something like a SIP is a functional, repeatable process. Every month, money will be deducted from your account, and when you look at the impact of compounding over 20-25 years, you will be left spellbound. It’s very hard for us, as humans, to imagine what an exponential curve can do for us in life.

How does one go from being a lay investor to an expert?

■ The simple thing is to start. Money is actually about psychology. We think of money as something very objective and linear, but it isn’t. You need to train your psychology, and the best way to do that is to build habits. I love SIPs not because they’re going to make you a millionaire, but because they’re the best habit to form around money.

Is the obsession with making money quickly turning Indians into gamblers rather than investors?

■ I would like to believe it is not. But I do see this trend among the younger lot. They are in a hurry and they seem to be in a much greater hurry than we used to be, or perhaps than our generation used to be. I try to understand this by looking at our exposure levels. What will actually help one win is finding a way to numb the noise around them, because this noise is the pollutant. At one point, if one went to IITs/IIMs or cleared the UPSC exams, life was sorted. But today, it’s not enough to be just smart. The bigger determinant is your ability to focus, block out the noise, and concentrate. Focus, in my opinion, is the new IQ. The biggest superstars of this generation, the most successful people who emerge from it, will not necessarily be the smartest people, but the ones who are intently focused.

‘SIFs offer better risk-adjusted returns’

Business Standard Smart Investor Arena

ABHISHEK KUMAR
Mumbai, 27 October

Specialised Investment Funds (SIFs) could be an option for investors seeking better risk-adjusted returns in an uncertain market, while Portfolio Management Services (PMS) may appeal to those willing to take on greater volatility in pursuit of higher returns, said SIF and PMS fund managers at the SIFs vs PMS panel at the *Business Standard* Smart Investor Arena on Tuesday.

The two products cater to different investor needs, with most SIFs currently seeking to bridge the gap between equity and fixed income through strategies that combine return generation with risk management. PMSs, meanwhile, offer fund managers greater scope to build concentrated portfolios and pursue higher alpha over a longer investment horizon.

“More than returns, it is about combining returns with risk, which I think is a very less talked about topic, mostly in India,” said Rishi Kohli, chief investment officer (CIO) at JioBlackRock Mutual Fund.

Jyotivardhan Jaipuria, founder and chief executive officer of Valentis Advisors, said PMS investors should have a longer investment horizon and be prepared for volatility.

“In PMS, what we try to do is we don’t try to get quick returns, but we try to get, on a sustainable basis, much higher returns than what mutual funds can give you,” he said. “For the funds which we run, we tell people to think of us as a three-year, five-year horizon, not like a three-month horizon.”

SIFs have gained traction quickly, with assets crossing ₹40,000 crore in less than a year, Kohli said. Around 75 per cent of the assets had flowed into hybrid long-short strategies, reflecting demand for products that seek to deliver relatively consistent returns.

PHOTOS: KAMLESH PEDNEKAR

He said such strategies were particularly relevant because both equity and fixed income had disappointed investors in recent periods. Hybrid long-short funds could target returns of around 9-11 per cent, with a focus on limiting risk, although actual outcomes would depend on market conditions.

Jaipuria said PMS strategies were designed for investors who had already experienced equity-market volatility and were seeking potentially higher returns than those offered by mutual funds.

“If this is a first investment into equities, don’t come into PMS,” he said. “Better to start with mutual funds, get a feel of what the equity animal is, and only then come to PMSs.”

> “MORE THAN RETURNS, IT IS ABOUT COMBINING RETURNS WITH RISK, WHICH I THINK IS A VERY LESS TALKED ABOUT TOPIC, MOSTLY IN INDIA”
>
> RISHI KOHLI
> Chief investment officer, JioBlackRock Mutual Fund

PMS portfolios can be more volatile because they often invest in smaller companies and hold concentrated positions. Investors who enter without understanding these risks could become disillusioned after a bad year, he said.

“People who come to us want outsized returns than what mutual funds give,” Jaipuria said, adding that investors should build their portfolios gradually before moving into such strategies.

> “FOR THE FUNDS WHICH WE RUN, WE TELL PEOPLE TO THINK OF IT AS A THREE-YEAR, FIVE-YEAR HORIZON, NOT LIKE A THREE-MONTH HORIZON”
>
> JYOTIVARDHAN JAIPURIA
> Founder and CEO, Valentis Advisors

One advantage of PMS is the ability to construct a concentrated portfolio around a relatively small number of stocks. Jaipuria said his firm’s strategy involved holding fewer than 20 stocks and undertaking detailed research on each company.

He also argued that PMS portfolios could offer genuine diversification from mutual funds, whose holdings may overlap substantially even when investors own several schemes.

“Smaller sizes make you more nimble,” he said, explaining that smaller portfolios can allow managers to pursue opportunities that may be difficult for larger funds to access.

Transparency is another differentiator, according to Jaipuria. PMS investors hold stocks in their own demat accounts and can track the securities bought and sold, including their purchase prices. They may also have more direct access to the portfolio manager than investors in conventional mutual funds.

Taxation is often seen as a disadvantage of PMS because capital gains can become taxable as individual securities are sold. In a mutual fund, investors generally incur capital gains tax when they redeem their units.

Jaipuria argued that the timing of taxation should not be confused with the overall tax burden.

“The tax is your money only,” he said, adding that investors should compare the post-tax returns rather than focus only on whether tax is paid at the fund level or by the investor.

He also pointed out that PMS investors may be able to set off eligible capital losses against capital gains, subject to applicable tax rules. The actual tax implications will depend on the investor's circumstances and the structure of the investment.

“You can create a much higher alpha. So, even if you adjust for some tax returns, you still do a much higher post-tax return if you get enough,” Jaipuria said.

Kohli, meanwhile, said SIFs could offer a more explicit focus on risk management because their strategies can use short positions and derivatives. But derivatives are not inherently beneficial, and their effectiveness depends on how they are deployed.

He cautioned that investors needed to understand whether a strategy used derivatives to hedge risk or enhance returns. Transaction costs and slippage could also affect performance as assets under management increased.

The panellists said the choice between SIFs and PMS should depend on an investor’s risk appetite, existing portfolio and return objectives.

Kohli said market valuations had become more reasonable after the correction, but opportunities remained uneven across stocks and sectors. With earnings growth still patchy and geopolitical developments posing risks, he believed hybrid strategies could be relevant for investors seeking relatively moderate returns without taking on the full volatility of equity markets.

Jaipuria was optimistic that the next two years could deliver better market returns than the preceding two, citing improving earnings growth, more reasonable valuations and the possibility of a recovery in foreign investor flows.

S B Seker *(left)*, head of Asia-Pacific at Binance, and Vimal Sagar Tiwari, cofounder of CoinSwitch, at the *Business Standard* Smart Investor Arena in Mumbai on Tuesday

‘Crypto investors must research; invest only what they can lose’

ANJALI KUMARI
Mumbai, 27 October

Young investors should understand how cryptocurrencies derive their value and the risks involved before investing, speakers at the *Business Standard* Smart Investor Arena said, identifying tokenisation and stablecoins as key developments in digital finance.

Speaking at a session titled ‘The Gen Z Portfolio: Does Crypto Still Deserve a Seat at the Table?’, S B Seker, head of Asia-Pacific at Binance, and Vimal Sagar Tiwari, cofounder of CoinSwitch, urged investors to prioritise research over speculation and avoid making investment decisions based on tips from friends or family.

“First of all, whenever you try to invest in any asset class, the basic is to try to understand its fundamentals,” Tiwari said, advising beginners to understand Bitcoin and how it derives its value.

He said investors should start with small amounts and avoid putting money into crypto that they might need in the near term.

“If you want to try crypto, I would say try a very small amount, the amount which you are okay to lose as well,” he said, suggesting beginners could start with ₹100 or ₹500 to understand how the asset works.

Seker said investors should study the technology behind digital assets, including blockchain networks, wallets and transaction verification, rather than rely solely on recommendations. Understanding the technology could help them assess the risks associated with individual projects, he said.

> “IF YOU DON’T HAVE CONFIDENCE IN SOMETHING, YOU DON’T ALLOCATE TOWARDS IT”

> VIMAL SAGAR TIWARI
> Cofounder, CoinSwitch

On valuation, Tiwari compared Bitcoin to digital gold citing its limited supply, while comparing Ethereum to an operating system on which developers can build applications. Ethereum’s potential value is linked partly to the products and services being developed on its network, he said.

Seker said investors should study a token’s white paper, use case and potential market before forming an investment view.

“If you don’t have confidence in something, you don’t allocate towards it,” he said.

Seker identified tokenisation and stablecoins as key trends in digital finance. Tokenisation involves representing assets digitally on a blockchain and could allow investors to access certain instruments through fractional purchases and trading beyond traditional market hours, he said.

Stablecoins, designed to maintain a relatively stable value, often by tracking a conventional currency, are another development investors should watch.

Both speakers flagged quantum computing as a potential future challenge to blockchain cryptography. Tiwari said developers were working on possible upgrades but cautioned investors against assuming that every risk would automatically be resolved.

Seker said investors should assess their financial circumstances, investment goals and risk appetite before allocating money to digital assets. They should also evaluate whether a token has a viable use case and can compete with newer alternatives.

On regulation, Seker said rules often evolve in response to technological innovation. Tiwari said investors in India should watch developments in the regulatory framework, including the role of the central bank’s digital currency.

‘Power of compounding is eighth wonder of the world’

> “MANY INFLUENCERS, ADVISORS KEEP COMING UP ON SOCIAL MEDIA. YOU HAVE TO REALLY KNOW WHETHER THEY ARE REGISTERED AND HAVE THE AUTHORITY OR THE EXPERTISE TO GIVE ADVICE”

KAIRAVI LUKKA
Mumbai, 27 October

India’s younger investors are increasingly comfortable making financial decisions on their own, using digital platforms and online communities to access information that was once harder to obtain. But the ease of investing also exposes them to unverified advice, peer pressure and the temptation to chase quick returns, wealth management executives said at a panel discussion.

Speaking at the *Business Standard* Smart Investor Arena during a panel titled ‘Gen Z & Money: Is India’s Youngest Investor Redefining Wealth Creation?’, Rajesh Saluja, cofounder, chief executive officer (CEO) and managing director of ASK Private Wealth, and Srikanth Subramanian, cofounder and CEO of Ionic Wealth, discussed how technology is changing young investors’ behaviour, even as the principles of wealth creation remain largely unchanged.

“Today, Gen Z has the ability to buy the best of businesses in the world using their phone,” Saluja said, highlighting how digital platforms have widened access to investment opportunities.

The challenge, however, is knowing which information to trust. Social media has made financial content more accessible, but it has also increased the risk of investors acting on advice without checking its credibility.

“So many influencers, advisors keep coming up on social media. You have to really know whether they are registered and whether they have the authority or the expertise to give advice,” Saluja said.

He also cautioned against the fear of missing out (FOMO), particularly when discussions among peers or online trends encourage investors to chase cryptocurrencies, artificial intelligence-related developments or stocks without adequate research.

Subramanian said younger investors were more willing to explore financial decisions independently and ask questions rather than rely solely on established institutions or advisors. This shift has also changed how they assess credibility.

“Their definition of trust has changed,” he said. “In today’s time, trust is whoever can cut information arbitrage and provide access to information in real time.”

He added that the emergence of do-it-yourself (DIY) investing was another major trend reshaping investment behaviour.

However, greater access to information does not necessarily translate into better investment decisions, Saluja said. While investors can now find more information online, the ability to remain disciplined through market volatility remains crucial.

“Investing principles haven’t changed, maybe access to information has. Ninety per cent of the returns of people who actually make money over a period of time comes from what is called temperament,” Saluja said. “And temperament is how you behave with your money during good and bad times, how you stay invested during all the volatility that the market offers and how you sort of start believing in the power of compounding.”

Saluja added that the power of compounding was today’s eighth wonder of the world.

Artificial intelligence (AI) is emerging as another source of information for young investors. Subramanian said users were turning to AI tools to ask questions and improve their understanding, but many still wanted human guidance when making more consequential financial decisions.

“The moment it comes to serious investing, what we are witnessing on our own app is people come and ask a lot of questions, but when it is more strategic in nature, when it is slightly more important or when the amounts are slightly substantial relative to us as investors, they still show tentativeness,” he said.

Saluja said AI could be useful in evaluating information, but its output needed to be checked for accuracy.

India and the battle for satellites

Sly innuendos aside, the recent social media exchanges involving Starlink make a case for harnessing satellites to roll out connectivity more evenly across India

GULVEEN AULAKH
New Delhi, 27 October

The barb-laden social media trail kicked off by SpaceX founder Elon Musk's October 7 post that blamed "certain oligarchs" for blocking his Starlink satellites from entering India has set off a timely debate on how to develop India's already-frenetic mobile telephone market even further.

Timely because Reliance Industries Ltd, whose chairman Mukesh Ambani was later named by Musk as the "oligarch" he had in mind, is headed for a ₹30,213 crore listing of its subsidiary Jio Platforms Ltd.

The posts by the world's first trillionaire entrepreneur signalled the need to flesh out two important ingredients of India's communication and inclusive growth ambitions — suitable technologies and competition.

The social media posts were sparked by a user who argued India urgently needed Starlink satellites because thousands of its villages were without 4G wifi networks.

According to Lauren Dreyer, who looks after Starlink business operations at SpaceX, the company is ready to serve India the moment it gets the green signal. Starlink had been ready for five years, having built 20 gateway sites with hundreds of antennae and controls in place to keep Indian user-data inside the country.

"We are ready to help Prime Minister Modi achieve his vision of 100 per cent connectivity throughout India — a vision all of our company, including Elon, shares," she told the India Mobile Congress.

The government in its defence denied allegations of bias, saying telecom licences had been granted to three mobile satellite services— Starlink, Bharti Enterprises-backed Eutelsat OneWeb and Reliance's Jio Satellite Communications. Security assessments were underway and, once granted, the firms could seek spectrum. Telecom minister Jyotiraditya Scindia added that Amazon LEO, formerly known as Project Kuiper, was also eyeing an India entry.

Sunil Mittal, chairman of Bharti Enterprises, the largest shareholder in the Eutelsat group, the merged entity of French satellite major Eutelsat and the UK's OneWeb, weighed in saying he, too, was waiting for approvals from the government.

Musk wouldn't back down: "There are many areas of India, as there are in all countries, with no Internet access, which denies children the opportunity for education and for small businesses the opportunity to sell their goods to a global market. Starlink would change their lives for the better."

"Ambani's profits will be lower, but he is not going out of business. And, obviously, if Starlink is too expensive in India, no one will buy it, so SpaceX will need to make pricing affordable," he said in yet another post.

That's the story of the tug-of-war which now appears to have quietened down.

Satcom, mobile or direct-to-device?

In its home market, SpaceX, meanwhile, announced an $8-billion deal to buy a nationwide portfolio of 800 MHz spectrum from the investment firm Grain Management, which included 14 megahertz of paired low-band airwaves, subject to approval from the US telecoms regulator.

The impact on global telecom stocks was palpable. Telecom stocks fell across the US, Europe and Australia. In India, Bharti Airtel fell 1.44 per cent, Vodafone Idea 1.02 per cent and Reliance Industries 1.62 per cent.

Telecom sector expert Parag Kar said Starlink's existing satellite-to-phone service using 2 GHz spectrum works outdoors but struggles to penetrate walls. Adding the 800 MHz spectrum would solve that problem and make Starlink a real competitor to traditional telecom services providers.

But analysts noted that without ground infrastructure or towers to propagate the 800 MHz network Starlink would not be able to offer its mobile service in any market.

"This purchase of frequency, which will take months to be confirmed by regulators, is for the US only. The underlying technology would, however, be applicable elsewhere, if SpaceX or a partner could obtain use of similar low-band frequency," said Simon Baker, senior research director at IDC, specialising in satellite and non-terrestrial connectivity.

> THE CHALLENGE ISN'T SIMPLY COMPLIANCE: INDIA WANTS SATELLITE TRAFFIC FROM INDIAN USERS TO BE MONITORABLE AND CONTROLLABLE WITHIN THE COUNTRY

In India, Reliance Jio owns a major chunk of the 800 MHz band. And for Starlink, setting up a tower network on its own will mean spending trillions of rupees. But the possibility of Starlink offering direct mobile services to consumers will be a concern to Indian players, especially after Musk said in an earnings call this month, "We will be building out our terrestrial networks so that there's broad-based connectivity anywhere in the world that SpaceX and Starlink are allowed to operate."

He added, "I think the demand for bandwidth is going to be dramatically higher than it is today. I think in three to five years there's probably a demand for 1,000x more bandwidth than there is currently, because AI or SI (super intelligence) agents will, on a per-agent basis, use far more bandwidth than a person, and there will be far more agents than there are people. So this ends up requiring a several order of magnitude increase in communication bandwidth in order to satisfy that communication demand."

"The strategic significance of Starlink's spectrum moves is greater than the spectrum itself," said Akhilesh Tuteja, partner and national leader - clients and markets, and technology, media and telecommunications (TMT) at KPMG in India.

"It signals an ambition to move satellite connectivity closer to the mainstream mobile ecosystem, particularly through direct-to-device services. That could progressively blur the boundary between a satellite operator and a telecom operator," he said.

Satcom scalability

Interestingly, Jio Platforms Ltd, in its red herring prospectus, says satellite broadband was unlikely to scale in India because fixed wireless access offers fibre-like speeds at cheaper rates. It put Starlink's entry plans at roughly ₹4,800 a month in the US and ₹2,500-4,500 in most African markets — much more than what the average consumer spends in India.

However, it also listed satellite competition as a key risk because satellite spectrum is allocated administratively rather than auctioned, which makes entry costs lower for satellite players than for terrestrial operators.

If satellites scale faster or are cheaper than expected, Jio conceded, its fibre and airfibre offerings could become less competitive, and require additional investments. It argued that satellites were relevant for remote or hard-to-reach locations where terrestrial roll-out was challenging.

The pros and cons of satcom were listed out for investors since Jio is in the process of developing its own constellation of 1,600 satellites to provide connectivity, especially in remote areas. The company said it may even enter into strategic partnerships with leading global constellation providers.

"The Jio constellation will be coming late to the LEO (lower earth orbit) party. Starlink is already well-established globally and Amazon LEO is building up its satellite fleet. Other systems are being deployed or are planned, including from China. As a late entrant, Jio will face a competitive marketplace," IDC's Baker said.

"Satellite will become more integrated into mobile service in the future than it is now, and this justifies launching service at this relatively early stage in development of direct phone-to- satellite technology," Baker said.

KMPG's Tuteja said that while the Indian satcom broadband market will initially be much smaller than the mobile market, the comparison can be misleading. "The attraction of satcom is not that it will replace mobile; it is that it can reach where mobile economics eventually runs out. A smaller market by connections does not necessarily mean a less strategic market," he said.

"In a country of India's geographic scale, even that edge of the network can represent a significant market."

Starlink's India dilemma

Starlink first tried to enter India in 2021 by taking pre-orders before it had a licence, and the government told it to stop. It received its satellite licence in June 2025, followed by the space regulator's approval and provisional trial spectrum. It is still to get security clearance, approval of foreign investment, and a final spectrum price.

However, the challenge isn't simply compliance: India wants satellite traffic from Indian users to be monitorable and controllable within the country, with the ability to restrict services in "emergencies". Starlink's satellites relay data among themselves by laser, a design that enables it to offer its services anywhere in the world — services beamed from satellites are not constrained by political borders. This poses a security concern and makes compliance harder. Indian officials have also cited Starlink's role in conflict zones such as Ukraine and Iran to demand total control.

"Starlink is unwilling to comply with regulations requiring domestic infrastructure," a senior government official said.

To be sure, Starlink's two biggest Indian rivals are also its partners. Both Jio and Airtel signed deals with SpaceX in March 2025 to bring Starlink to their customers, subject to approvals.

RIL statement

On October 16, RIL broke its silence on Musk. A day after filing the RHP, the oil-to-telecoms conglomerate said it "welcomed competition in satellite communications", investment and innovation – homegrown or international. However, all operating in India must follow the rule of law, it said, adding its own satellite services await clearances.

Like Musk, Jio, too, cited the people of India.

"Every player, Jio included, must serve the people of India and abide by the laws and policies of the land," RIL said.

Musk's response was a brief "Much appreciated". But Starlink threw down the gauntlet anyway, saying it was "ready" — "ready to connect India with high-speed internet".

With Starlink planning terrestrial expansion and Jio gazing skywards, all that remains to be seen now is how this rivalry in the booming broadband industry serves India's unconnected.

Timeline of approvals given to Starlink

Date	Approval	Authority
May 2025	Letter of Intent (LoI)	Department of Telecommunications (DoT)
June 2025	Global mobile personal communications by satellite (GMPCS) Licence	DoT
July 2025	Satellite authorisation	IN-SPACe
2026	Security clearance (pending)	Law enforcement agencies under Ministry of Home Affairs

Pending security approvals

- Starlink, backed by SpaceX
- Jio Platforms & SES JV
- Eutelsat-OneWeb, backed by Bharti group

Upcoming satcom players

- Jio Platforms — own LEO constellation for India and global markets
- Amazon Leo — LEO constellation for global market and India

IMPORTANT NOTICE TO SHAREHOLDERS SPECIAL WINDOW FOR RE-LODGEMENT OF TRANSFER REQUESTS OF PHYSICAL SHARES

Pursuant to SEBI Circular No. HO/38/13/11(2)2026-MIRSD-POD/1/3750/2026 dated January 30, 2026, shareholders are hereby informed that a Special Window has been opened for a period of one (1) year, from **February 5, 2026 to February 4, 2027,** for the re-lodgement of transfer requests for physical share certificates.

This facility is applicable to transfer deeds lodged prior to April 1, 2019 which were rejected, returned, or not attended due to deficiencies in documents, process, or otherwise.

Shareholders who missed the earlier deadline may now avail this opportunity by submitting the requisite documents to the Bank's Registrar and Share Transfer Agent at the address mentioned below:

KFin Technologies Limited

Address: Unit: Union Bank of India- Selenium Tower B, Plot Nos. 31 & 32, Financial District Nanakramguda Serilingampally Mandal, Hyderabad – 500032 • **Email: einward.ris@kfintech.com** • **Website: www.kfintech.com** • **Toll Free No 1800 309 4001**

We also request all the shareholders to update KYC details including PAN, email id, address, mobile number and bank account details with the DP (if shares are held in demat form) or with RTA (if shares are held in physical form) to ensure the ease of communication and seamless payment of dividend.

Shareholders holding shares in physical form are requested to demat their shares by submitting share certificate to their Depository Participant (DP).

Indian MBBS aspirants seek a cheaper cure for seat crunch

Central Asia gains appeal on fees as junior doctor status Georgia's faces scrutiny over eligibility

SANKET KOUL
New Delhi, 27 October

Indian students aspiring to pursue medical education abroad are increasingly exploring destinations beyond traditional markets, with Central Asian countries gaining traction as geopolitical disruptions, affordability concerns, and uncertainty over foreign medical qualifications reshape their choices.

The Russia-Ukraine war, regulatory concerns in countries such as Georgia and Uzbekistan, and the rising cost of medical education have prompted students to reassess overseas options, according to education consultants.

"The Russia-Ukraine war has had a domino effect on MBBS (bachelor of medicine, bachelor of surgery) enrolment trends, with the market becoming wider for students," a Delhi-based foreign education consultant said. The conflict disrupted fresh enrolments in Ukraine, which hosted an estimated 18,000-20,000 Indian medical students before the war.

"As a result, hundreds of students from Ukraine took transfers to countries like Georgia and Uzbekistan," said Anuj Goyal, a foreign education consultant.

Georgia is estimated to have 20,000-25,000 Indian students pursuing undergraduate (UG) medical degrees, while Uzbekistan has roughly 16,000, according to industry estimates.

However, students in some of these destinations now face questions over whether their qualifications will meet India's licensing requirements, adding to the uncertainty surrounding overseas medical education.

The overseas MBBS trade-off: Cost versus credentials

- Geopolitical upheaval and licensing uncertainty reshape overseas MBBS choices
- The NMC said Georgia's junior doctor status qualifies only if it legally permits medical practice at the required level
- Georgia has 20,000-25,000 Indian medical students; Uzbekistan, around 16,000
- Parents allege consultants are misleading students about eligibility to practise in India
- First cohort admitted under the 2021 FMGL Regulations expected to return in 2027
- Kazakhstan, Kyrgyzstan are emerging as prominent destinations seeking comparatively affordable medical education

The Georgia degree-to-practice gap

Indian students pursuing medical degrees in Georgia face uncertainty over their eligibility to practise in India following a recent clarification by the National Medical Commission (NMC) on the country's junior doctor status.

In its September 24, response to a student grievance, the NMC clarified that junior doctor status in Georgia would satisfy Regulation 4(b) of the Foreign Medical Graduate Licentiate (FMGL) Regulations, 2021, only if it legally permits medical practice at the level required under the rules. *Business Standard* has seen a copy of the response.

Under Regulation 4(b), a foreign medical graduate must possess a licence to practise medicine in the country where the degree was obtained, on a par with the licence granted to that country's citizens.

Goyal said that while Georgia permits medical graduates to work as junior doctors after completing their UG degree, this status does not necessarily confer the right to practise independently.

"Therefore, junior doctor status would be sufficient only if it legally permits practice at the required level. If independent medical practice in Georgia is permitted only after completing postgraduate certification then the junior doctor status alone would not satisfy Regulation 4(b)," the NMC response observed.

According to Goyal, the pathway to independent medical practice in Georgia requires additional postgraduate qualifications, including a qualification examination and residency. These requirements also involve Georgian-language proficiency, raising questions about how the pathway aligns with the FMGL Regulations, which require foreign medical courses to be taught in English.

The clarification has also brought the role of overseas education consultants under scrutiny.

A Surat-based entrepreneur whose daughter is a second-year medical student alleged that some consultants, in collusion with Georgian colleges, were misinterpreting the rules and misleading students about their eligibility to practise in India.

She said agents were telling students that junior doctor status during or after the UG medical programme, known as an MD in Georgia, would make them eligible to appear for the Foreign Medical Graduate Examination in India and practise in the country.

"Since Georgian public universities have stopped fresh enrolment of international students, many are now working with private medical colleges on a commission basis," said Suyash (name changed), a Jabalpur-based medical aspirant.

The NMC had not responded to *Business Standard*'s queries about the alleged misleading practices until the time of going to press.

Goyal said the first cohort of students admitted after the 2021 FMGL Regulations came into effect would return in 2027, raising concerns over whether they would meet the requirements for registration in India. "The students will learn the reality once they are back after the course. The NMC and the Indian embassy should issue a proper advisory to save the future of thousands of students aspiring to do MBBS from Georgia," he said.

Cheaper degrees, costlier questions

Even as licensing concerns complicate choices in some destinations, affordability continues to draw Indian medical aspirants overseas.

More than 2.2 million students appear for the National Eligibility-cum-Entrance Test (UG) annually, while India has around 130,000 undergraduate medical seats, according to the 2026 seat matrix.

"Only around 63,700 seats are in government medical colleges, where fees are substantially lower than in private and deemed universities," a resident doctor at the All India Institute of Medical Sciences, New Delhi, told *Business Standard*.

Private medical education can cost between ₹80 lakh and ₹1 crore, putting it beyond the reach of many middle-class households. "As a result, Central Asian countries have subsequently gained popularity, with programmes costing between ₹15 lakh and ₹30 lakh," the doctor added.

Lovish Rawal, a founding member of overseas education financing platform GradRight, said Russia, Kazakhstan, and Kyrgyzstan were emerging as prominent destinations for Indian students seeking comparatively affordable medical education.

"Russia attracts an estimated 10,000-12,000 Indian medical students annually, while Kyrgyzstan receives around 4,000 enrolments," he added, citing third-party estimates.

Beyond these markets, Bangladesh and Nepal remain established destinations, while Armenia and Tajikistan are among the other countries attracting attention.

However, consultants cautioned that students must assess not just tuition fees but also clinical exposure, course duration, internship arrangements, language requirements, and eligibility for medical registration.

Regulatory concerns are not confined to Georgia. In 2024 and 2026, the NMC issued alerts concerning private medical colleges in Uzbekistan and Belize over compliance with the FMGL Regulations, including recognition status, course structure, and eligibility conditions.

A consultant quoted earlier pointed out that the NMC does not publish an approved list of foreign medical universities, leaving candidates responsible for checking whether prospective institutions meet India's eligibility conditions.

Amit Upadhyay, regional director for South Asia at Occupational English Test, said students need to assess overseas medical education across the entire professional journey, including qualification recognition, clinical training, licensing, and registration requirements.

For students and families, the challenge is no longer simply finding a lower-cost medical degree abroad, but ensuring that the qualification provides a compliant pathway to medical practice after graduation.

ODISHA, ANDHRA BRACE FOR CYCLONE ARNAB

PHOTO: PTI

Andhra Pradesh and Odisha have set up nearly 4,000 cyclone shelters, moved thousands of people to safer locations, and put disaster management personnel on standby ahead of the "very severe" cyclonic storm Arnab, which is expected to make landfall near Visakhapatnam in the next 24 hours, officials said on Tuesday. The Indian Railways cancelled at least 50 trains in the region as a precaution, while traffic restrictions were imposed on many coastal roads in the region. Andhra Pradesh Chief Minister N Chandrababu Naidu directed officials to ensure essential supplies at relief camps and minimise cyclone-related damage. PTI

Mkts end flat ahead of Fed decision

FPIs buy shares worth ₹4,240 crore, highest 1-day purchase since Sep 2

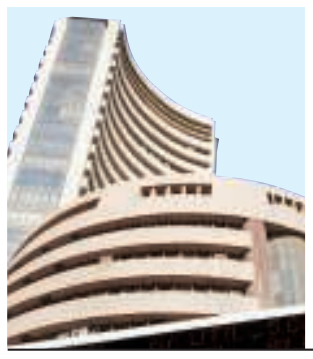
PRESS TRUST OF INDIA
Mumbai, 27 October

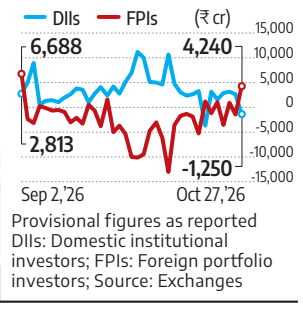
Benchmark stock indices Sensex and Nifty closed largely unchanged in a highly volatile trade on Tuesday amid profit-taking in IT and blue-chip banking shares, elevated crude oil prices and caution ahead of the US Federal Reserve's policy decision.

The 30-share BSE Sensex slipped 8.08 points, or 0.01 per cent, to close at 73,598.67, with 17 constituents higher, 12 lower and one unchanged. During the day, it hit a high of 73,762.98 and a low of 73,179.41.

The 50-share NSE Nifty fell 3.45 points, or 0.02 per cent, to end at 22,749.75.

However, broader market indices rallied on strong buying interest, with the smallcap index gaining 2.59 per cent and the BSE midcap nearly 1 per cent. Sectorally, realty, pharma and auto shares advanced, while banking, financials and IT stocks declined.





Provisional figures as reported
DIIs: Domestic institutional investors; FPIs: Foreign portfolio investors; Source: Exchanges

Brent crude, the global oil benchmark, dipped 0.03 per cent to $115.8 per barrel.

Foreign portfolio investors (FPIs) bought domestic shares worth ₹4,240 crore on Tuesday, while domestic institutional investors were net sellers to the tune of ₹1,250 crore. This was the highest single-day purchase since September 2, 2026.

"Indian equities ended flat amid a volatile session, as elevated crude prices and caution ahead of the US Fed policy decision overshadowed supportive global cues. Profit booking dragged IT and private banks, while pharma, autos, PSU banks and realty gained, with resilient broader-market participation pointing to selective domestic risk appetite," Vinod Nair, head of research, Geojit Investments Limited, said.

Jio Platforms shares at 22% premium in grey mkt

BLOOMBERG
27 October

For investors lucky enough to land shares in Jio Platforms' ₹30,213 crore record initial public offering (IPO), trading on the unofficial market is fuelling hopes of a big debut.

Billionaire Mukesh Ambani's digital and telecommunications giant has attracted stellar demand across investor categories ahead of its October 28 market debut. Investors who got their allocations on Tuesday are now closely watching Jio's grey-market pricing for clues about how the first day might unfold. The premium over the IPO price has hovered at about 22 per cent for roughly 10 days, unusually resilient for an offering of this size, according to the *ipowatch.in* and *investorgain.com* platforms.

Grey market premiums are unregulated and provide no guarantee of where a stock will actually trade once it hits the exchange. Still, they are widely tracked in India as a barometer of demand and listing-day sentiment.

If the pattern holds into the listing, it would make Jio India's second-most valuable company after parent Reliance Industries, pushing rival Bharti Airtel into third place. That prospect is adding to the excitement around an IPO that's already rewritten records in India's capital markets. Jio attracted more than $78 billion in bids and nearly 14 million applications in one of the country's most anticipated listings.

So far, Jio has been able to defy the usual trend of grey market premiums cooling after an IPO closes, as the initial rush of bidding fades and investors shift their focus to allotments and the eventual listing. After National Stock Exchange of India's $2.4 billion IPO, the premium gradually eroded from about 15 per cent to 3 per cent in two weeks and the shares ultimately made a relatively muted debut. The optimism is backed by blockbuster subscription numbers. Jio's IPO was subscribed more than 22 times, with qualified institutional buyers bidding for 71 times the shares reserved for them.

Wealthy investors subscribed 14 times their allocation, while the retail portion was covered 2.7 times.

Ahead of trading debut

Jio Platforms IPO subscription details
No. of times of total meant for each category

Qualified institutional buyers	70.6
Non-institutional investors	14.0
Retail individual investors	2.7
Employee reserved	2.9
Shareholder reservation	7.6
Total	22.2

Infosys draws four downgrades on weaker sales outlook

BLOOMBERG
27 October

Infosys was downgraded by at least four analysts in a single day after India's second-largest software exporter cut its annual sales forecast, deepening concerns over disruption from artificial intelligence.

Axis Capital, Arihant Capital Markets, and IIFL Capital Services were among brokerages that lowered their ratings, data compiled by *Bloomberg* shows. Three others reduced their recommendations over the weekend, pushing its consensus rating to 3.7 out of 5, the lowest since January 2024.

The downgrades for the sector's bellwether threatens to derail a nascent recovery in India's battered technology shares. The Nifty IT Index is on track for its best month since July, even as concerns mount over soaring debt levels being used to fund the global AI buildout.

Infosys cutting its annual sales forecast signals that a broad-based recovery in IT budgets has yet to materialise. Revenue will rise 1 per cent to 2 per cent on a constant-currency basis in the year through March 2027, the company said late Friday, versus analysts' estimates of just over 2 per cent.

India's $280 billion-plus software services industry has been grappling with a slowdown, with companies limiting spending in the midst of geopolitical crises such as the Iran conflict, surging energy prices and elevated inflation.

Infosys shares have fallen 28 per cent this year on ongoing concerns about its ability to weather AI disruption. The average target price from 44 analysts is ₹1,200.

Sebi extends debenture trustees compliance deadline

PRESS TRUST OF INDIA
New Delhi, 27 October

The Securities and Exchange Board of India (Sebi) on Tuesday extended the deadline by six months, till April 27, 2027, for debenture trustees to comply with requirements governing activities that fall outside its regulatory purview.

Under Regulation 9C of the Sebi (Debenture Trustees) Regulations, 1993, a debenture trustee holding a valid certificate of registration is required to transfer activities not regulated by Sebi to separate business units within a prescribed timeline.

The provision was introduced through amendments notified on October 27, 2025, to provide clarity on the scope of activities permitted for debenture trustees.

Sebi had initially given six months for compliance. Subsequently, in April 2026, the regulator granted an additional six months, extending the deadline to October 27, 2026, following industry representations highlighting operational challenges in establishing the necessary systems and processes.

JLL sets up global treasury centre at GIFT City to centralise ops

AKSHAT AYUSH
New Delhi, 27 October

JLL, the global real estate services firm, has set up a corporate treasury centre at Gujarat International Finance Tec-City (GIFT City) to centralise treasury operations and improve capital deployment across its global business.

The company has set up JLL Finance Services (IFSC) Private Limited, a wholly owned subsidiary of Jones Lang LaSalle Property Consultants (India) Private Limited, also known as JLL India, at the International Financial Services Centre (IFSC) in GIFT City.

The centre will oversee JLL's treasury operations across multiple jurisdictions, including the Americas, Europe, West Asia, Africa and Asia-Pacific. It will also help streamline banking administration, funding and liquidity management under the regulatory oversight of the International Financial Services Centres Authority.

"GIFT City's GRCTC model provides the perfect combination of regulatory sophistication and talent depth for our first Asia-Pacific treasury hub. India's highly skilled financial professionals, combined with the jurisdiction's internationally aligned framework and operational efficiencies, enable us to centralise funding operations, optimise capital deployment," said Radha Dhir, chief executive officer, JLL India.

THE CENTRE WILL OVERSEE JLL'S TREASURY OPERATIONS ACROSS MULTIPLE JURISDICTIONS, INCLUDING THE AMERICAS, EUROPE, WEST ASIA, AFRICA AND ASIA-PACIFIC

She added that the centre will help build sustainable treasury capabilities to support the company's global growth and diversification strategy. The move is aimed at strengthening JLL's ability to manage liquidity and funding across regions while providing access to international capital markets.

Gold loan stress rising: How to avoid a debt trap

KARTHIK JEROME

Two years ago, Noida-based contractor Jagdeep Sharma (name changed to protect identity) took three personal loans to fund his sister's wedding. Unable to pay the equated monthly instalments (EMIs) on them, he then pledged his wife's jewellery to generate cash. But with the gold loan (bullet-repayment plan) up for renewal in November, Sharma is struggling to come up with the amount required to pay even the interest due for rolling over the loan.

Gold loan providers are waking up to this risk. Bajaj Finance has reported repayment delays, while Piramal Finance has raised concerns about industry-wide gold lending to borrowers already overdue on other loans. Borrowers juggling several loans must look beyond meeting the next payment and work out a longer-term plan for clearing their debt.

What's causing repayment delays

Multiple borrowings are a major factor behind the delays. "Some borrowers take a new gold loan to clear an older overdue loan with another lender, thereby shifting the debt without reducing it," says Adhil Shetty, chief executive officer (CEO), BankBazaar.

Many borrowers also turn to gold loans to cover recurring shortfalls in their household budget. "This increases financial stress if the underlying debt burden remains unaddressed," says Amit Prakash Singh, chief business officer, Urban Money.

Small business owners and self-employed borrowers are often unable to make timely repayments due to irregular or weak cash flows from their businesses. In the case of a bullet-repayment plan, the full principal and interest fall due together at maturity. "Many borrowers fail to come up with the larger sum all at once," says Shetty.

RBI's rule changes

Prior to April 1, 2026, borrowers could simply roll over a bullet loan. From that date, the Reserve Bank of India (RBI) capped the tenure of consumption-oriented bullet-repayment gold loans at 12 months. It also made it compulsory to clear the accrued interest before the loan could be renewed. "If borrowers cannot arrange the interest payment, renewal becomes difficult," says Raoul Kapoor, co-CEO, Andromeda Sales and Distribution. The pledged gold could be auctioned by the lender.

The changed rules are meant to encourage greater repayment discipline, but are spelling trouble for some. "They could create short-term cash-flow pressures, particularly for small business owners and borrowers with irregular incomes or multiple existing debts," says Kapoor.

Expect greater scrutiny

Experts believe that if the stress in this segment worsens, lenders could tighten their loan sanction norms. Scrutiny of overall debt, overdue accounts, income stability and repayment capacity may intensify.

"Factors such as a borrower's Cibil score, credit information report, and other bureau-based insights can provide valuable signals regarding credit behaviour and repayment capacity," says Bhavesh Jain, managing director (MD) and CEO, TransUnion Cibil.

Renewals and top-ups may require fresh credit appraisals. Highly indebted or delinquent borrowers may find it harder to obtain credit. "They may receive smaller loan amounts and shorter tenures," says Shetty. Little is expected to change for borrowers with clean repayment records.

Read the warning signs

Watch out for signs that point towards an impending debt trap. "Taking fresh loans or using credit cards to meet existing EMIs or outstanding dues, or to cover routine expenses, are warning signs," says Harsh Grover, co-founder, LoansJagat.

Repeatedly paying only the minimum due on credit cards, missing EMI deadlines or allowing bills to become overdue are other indicators of repayment stress. "Using a large part of the monthly income to service debt, leaving little room for essential expenses or emergencies, is another indicator," says Singh.

A repayment plan that depends on a bonus or uncertain future income is another warning sign, as is delaying one lender's payment to pay another. Repeatedly renewing short-term loans, extending repayment periods or pledging more assets to keep up with existing repayments also signals stress.

Devise a repayment plan

Start with a complete picture of what you owe. "Borrowers should list all outstanding loans, interest rates, EMIs and due dates to understand their total debt burden," says Grover.

Account for essential household expenses and required instalments on all loans first. Cut non-essential spending. "Extra funds should be directed towards reducing high-interest debt such as credit card dues," says Grover.

Pay close attention to secured loans where non-payment could cost you an asset. "Borrowers with a gold loan approaching maturity should establish a realistic repayment or settlement plan before the due date," says Singh.

Borrowers may also consider the debt consolidation option. "Consolidation may help only if the revised borrowing lowers the overall cost and provides an affordable repayment schedule," says Singh.

At risk of default? Take these steps

- Contact the lender as soon as repayment problems seem likely
- Confirm maturity date and renewal conditions
- Check overdue interest and penal charges
- Try to repay at least the interest due
- Review the key facts statement for charges and auction terms

Discounted valuations offset near-term headwinds for Tata Consumer

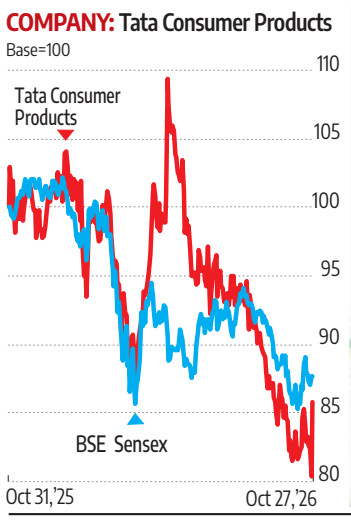
DEVANGSHU DATTA

Tata Consumer Products Ltd (TCPL) on Monday reported its results for the second quarter of financial year 2026-27 (Q2FY27), which met or exceeded consensus. Consolidated revenue was up 14 per cent year-on-year (Y-o-Y) at ₹5,661 crore, with India volume up 11 per cent Y-o-Y. TCPL has taken price hikes of 8-10 per cent in many products in FY27 to date. The portfolio mix is changing with a focus on growth areas.

TCPL has generated double-digit revenue growth across segments (except tea) for the last five quarters. The portfolio is pivoting to high-growth segments like Sampann, Soulfull, Ready to Drink (RTD), Capital Foods, Organic India, etc. This should accelerate revenue growth. TCPL launched 22 new products in Q2FY27.

The gross margin contracted 41 basis points (bps) Y-o-Y and 99 bps quarter-on-quarter (Q-o-Q) to 41.7 per cent due to input-inflation. But the company's earnings before interest, taxes, depreciation, and amortisation (Ebitda) grew 17 per cent Y-o-Y to ₹780 crore, with margin expansion of 31 bps Y-o-Y to 13.8 per cent. India A&P (advertising and promotion) spends were 5.5 per cent of sales in Q2, and 5.8 per cent in the first half (H1) of FY27. Interest costs reduced 23 per cent Y-o-Y, pushing up profit before tax (PBT). The reported profit after tax (PAT) grew 16 per cent to ₹470 crore, while adjusted PAT after exceptional items was up 18 per cent Y-o-Y to ₹480 crore.

TCPL offers premium pulses, dry fruits, breakfast cereals, snacks, RTD beverages, and cold-pressed oils, but tea and salt are the largest components. Salt is moving up the value-chain through a process of formalisation, while tea is a seasonal seller. Salt contributes 20 per cent to TCPL's revenue; its Q2FY27 revenue grew 15 per cent Y-o-Y while volumes rose 9 per cent. TCPL has taken a price hike of 6 per cent in salt in early October (adding to 6 per cent hike in June). The impact would be visible in Q3FY27.



The growth businesses portfolio (which includes Tata Sampann, RTD beverages, Capital Foods, and Organic India) grew sales by 40 per cent Y-o-Y in Q2FY27, contributing 38 per cent to India business revenue. Sampann sales expanded 57 per cent Y-o-Y, while RTD volume grew 34 per cent with value up 47 per cent Y-o-Y. Capital Foods grew by over 18 per cent Y-o-Y, and Organic India grew by over 9 per cent Y-o-Y. Both Sampann and RTD categories grew volumes despite high bases of above 30 per cent in Q2FY26. TCPL has reiterated guidance for over 30 per cent value growth in these fast-track businesses over the next two-three years.

The management says it is focused on operating profit margin (OPM) expansion of 50-70 bps in FY27, and expects margins to expand from current levels due to price hikes and peak seasons for India tea and US coffee. Also Sampann margins have risen 280-290 bps Y-o-Y to over 14 per cent, and international margins are also expected to rise. TCPL thinks the India OPM can cross 17 per cent in next three years.

Tea volume was flat Y-o-Y, while revenue declined 1 per cent. TCPL took a price hike of 6 per cent in early October to meet inflation. In the international segment, beverage sales grew 7 per cent Y-o-Y (down 2 per cent in constant currency, or CC). In CC, while US coffee grew at 6 per cent Y-o-Y, the UK was down 8 per cent, and Canada was up 8 per cent.

The management expects mid-single-digit volume growth for tea and salt, alongside pricing hikes across both portfolios. Better margins are likely in the second half (H2) of FY27, as tea sees gains in autumn and winter seasons. The festive season should push demand for Capital Foods. The margin guidance of 50-70 bps gain in FY27 is based on these assumptions. In terms of raw material costs, robusta and arabica prices may soften, improving US coffee margins. The Soulfull segment grew 23 per cent last year, and targets 25-30 per cent growth in FY27. In the quick-commerce (qcom) category, Sampann portfolio items are in top positions.

TCPL has introduced AI in the Himalayan factory to do online bottling inspection. It is using AI-led guidance about tea to assess crop situation, temperature, and heat, and to provide timing recommendations on when to buy. It is also using AI for invoice validation.

The company has an impressively consistent growth profile. The key risks include volatility in commodity prices, weather-related changes in demand, and disruptions to export routes. The stock has corrected substantially over the past 12 months. This makes valuations more attractive, and analysts now seem to have reached a bullish consensus.

GST officers told to break multiyear notices yr-wise

MONIKA YADAV
New Delhi, 27 October

Notices on goods and services tax (GST) for several years cannot be clubbed into one showcause notice without stating how much is being demanded for each of the years.

In one of the several circulars issued on Monday, the Central Board of Indirect Taxes and Customs (CBIC) told tax officers to split the demand financial year-wise in multiyear notices so that taxpayers could understand and reply to the notice.

The circulars follow the recommendations made by the GST Council at its meeting earlier this month.

Those have set standards for showcause notices, adjudication orders, and appeals under GST so that proceedings are clearer and fairer.

A notice must spell out the facts, evidence, legal provisions and the amount of tax being demanded. Simply copying sections of the law is not enough. Also, officers cannot invoke the stricter provisions meant for fraud, wilful misstatement, or suppressing facts just because tax has not been paid or a mismatch has been found. They must show evidence of intent to evade tax in the notice itself.

Adjudication orders must deal with the points raised by the taxpayer. A line saying "reply has been considered" is not acceptable. Officers should explain why they have accepted or rejected a submission. Personal hearing should be meaningful, but virtual hearing is encouraged.

"The detailed guidance on adjudication is significant. Conceptually, it brings a similar structured adjudication discipline to the GST framework as was available through the Master Circular on showcause notices and adjudication in the pre-GST regime. The emphasis on articulated allegations, supporting evidence, meaningful consideration of taxpayers' submissions and reasoned orders should improve the quality and consistency of adjudication and help reduce avoidable litigation," said Saurabh Agarwal, tax partner, EY India.

Manoj Mishra, partner and tax controversy management leader, Grant Thornton Bharat, said: "The 57th GST Council meeting placed procedural reform and dispute prevention firmly at the centre of the next phase of GST, and through Circular 258, it seeks to address a recurring fault line in GST litigation, where taxpayers are often compelled to first challenge defects in the proceedings before contesting the underlying tax demand. By emphasising evidence-backed notices, year-wise delineation of demands in multiyear showcause notices, and separate grounds and quantification for fraudulent and non-fraudulent demands under Sections 73 & 74, the circular seeks to bring discipline to the initiation and adjudication of GST proceedings. Significantly, while prescribing yearwise clarity, the contentious question of whether consolidated multiyear notices are legally sustainable is still left unresolved."

The CBIC has issued clearer instructions on GST registration. Many businesses face repeat queries or delays because officers in different states interpret the same rules differently. The new guidance reduces that friction. It spells out what documents are needed in common situations, such as when someone operates in a coworking space, or when a family member allows the use of its premises, or when the place of business is an unmanned ATM or a telecom tower. It says that officers should not raise irrelevant or state-specific objections that go beyond the prescribed list of documents. Applicants can better prepare their papers in advance and are less likely to be stuck in avoidable back-and-forth.

Agarwal said the guidance "addresses several issues that often resulted in ground-level queries and disputes, including coworking spaces, consent-based premises, ATMs and telecom towers, and state-specific information requirements. Together with defined documentation requirements for different forms of businesses, this should help reduce differing interpretations and make the registration process more predictable for genuine taxpayers".

On exports, the CBIC has removed a long-standing grey area for services exporters. For a service to qualify as export under GST, the payment for it must meet the conditions laid down in the law. The clarification makes it clear that the money received in special rupee accounts meant for non-residents — such as special non-resident rupee (SNRR) accounts, which are rupee accounts opened by non-residents for specific business purposes, or INR Nostro accounts, held by foreign banks with Indian lenders — will be accepted. It has also said that if an exporter simply nets off what it is supposed to get from overseas against what it owes for imports, and does so in line with Reserve Bank of India (RBI) rules, that too will count as a valid receipt of export proceeds. In short, the tax department will no longer insist only on a direct foreign-exchange inflow when the underlying settlement is already permitted under foreign-exchange rules.

Proposed changes

Tax demands:

- Notice to spell out the facts, the evidence, the legal provisions and the exact amount of tax
- In case of fraud, evidence of intent to evade tax must be included in the notice
- Adjudication orders to deal with taxpayer's concerns; officers must explain why a submission is accepted or rejected

Registration:

- Clearer instructions on issues like co-working spaces, consent-based premises, and state-specific information requirements

Exports:

- For a service to qualify as an export under GST, the payment received in SNRR or INR Nostro accounts will be accepted
- Set-off to be recognised as a valid mode of settlement under FEMA

Circular follows recommendations by the 57th GST Council meeting

DPDP Act may hamper investigative journalism: News publishers to SC

SC issues notice to Centre on petition, application seeking interim stay

BHAVINI MISHRA
New Delhi, 27 October

The Supreme Court (SC) on Tuesday sought the Centre's response to a petition by the Digital News Publishers Association (DNPA) challenging provisions of the Digital Personal Data Protection (DPDP) Act, 2023, and its rules. The plea argued that the absence of an exemption for journalism could hamper investigative reporting and affect press freedom.

A bench comprising Chief Justice of India (CJI) Surya Kant and Justices Joymalya Bagchi and V Mohana issued notice on the petition and an application seeking an interim stay on the challenged provisions. The matter will be heard on November 17.

The implementation of the DPDP Act, 2023, is governed by the Digital Personal Data Protection Rules, 2025, notified in November 2025. The association has argued that the law does not provide a specific exemption for journalistic activities, unlike earlier versions of the proposed data protection legislation.

Senior Advocate Madhavi Divan, appearing for the petitioners on Tuesday, argued that the law could disrupt newsroom operations by requiring journalists to seek consent before using personal information for reporting.

"If I have to ask for permission and consent, what is the point?" Divan asked, warning that the law could introduce a form of pre-censorship by preventing journalists from publishing reports without prior approval.

CJI Kant said the petitioners, given their expertise, could suggest safeguards to the government and the court to prevent misuse of personal data. He emphasised the need to balance citizens' privacy rights with the media's freedom to report.

Divan said the DNPA had submitted a representation to the Ministries of Information and Broadcasting and Electronics and Information Technology on August 10, 2026. A meeting with ministry officials followed on August 25.

The DNPA, which represents the digital arms of 21 major news organisations, including *The Indian Express*, *The Hindu*, *India Today*, the *Times Group*, *Zee*, *NDTV* and *Network18*, has sought to strike down nine provisions of the Act and three rules.

The petition states that requirements relating to notice, consent and deletion of personal data could make investigative reporting difficult, particularly when journalists examine corruption, misconduct by public officials or other matters of public interest. Seeking consent from the individuals being probed could undermine such reporting, it argues. The DNPA has also questioned why the law exempts activities such as research, archiving and statistical processing, but does not provide similar protection for journalism.

The petition further challenges provisions that empower the Centre to seek information from organisations handling personal data. The DNPA argues that the absence of adequate safeguards could expose confidential journalistic sources, including whistleblowers, and discourage them from sharing information about wrongdoing. It has also questioned the government's power to restrict public access to information, arguing that the provision could be used to limit the dissemination of news.

Another part of the challenge concerns the Data Protection Board of India, which investigates violations of the law and can impose penalties.

The petitioners have raised concerns about the Board's independence, pointing out that its members are selected through an executive-led process and that the law does not require a judicial member.

The DNPA has separately challenged the amendment to the Right to Information (RTI) Act, 2005, arguing that it could restrict access to personal information even when disclosure serves the larger public interest.

Army chief visits China border area

SATARUPA BHATTACHARJYA
New Delhi, 27 October

Army chief General Dhiraj Seth visited Mana and Joshimath in Uttarakhand, which borders China, on Tuesday.

He reviewed the general operational preparedness and ongoing infrastructure development in the state that falls in the middle sector — considered the least volatile part of the India-China border.

Interacting with the troops there, Seth emphasised the need for sustained operational vigilance to effectively address evolving security challenges, among other things, according to an Indian Army media statement.

India and China are engaged in a "faceoff" in the eastern sector, along the border in Arunachal Pradesh, Shatrujeet Kapur, director general, Indo-Tibetan Border Police, recently said. The Ministry of External Affairs said on October 23 that the situation on the India-China border "gets disturbed from time to time when Chinese forces diverge from established patrolling patterns."

Business Standard earlier reported that tensions arose in the summer after locals in frontline villages in Arunachal spotted Chinese soldiers or graffiti in "undemarcated areas" along the border.

While the nature of the current "faceoff" is unclear, sources said on Tuesday that patrols in such areas —with differing perceptions of the Line of Actual Control — can last for days and involve night stays in mountainous and general terrains but the confusion is caused when "halting patrols" appear in the vicinity of locals on grazing grounds or in isolated places.

Coal India's capex jumps 27% in H1FY27

SUDHEER PAL SINGH
New Delhi, 27 October

State-owned miner Coal India (CIL) on Tuesday announced that its capital expenditure (capex) during the first half of the current financial year jumped 27 per cent to ₹7,996 crore from ₹6,283 crore last fiscal year.

"The expenditure also surpassed the first half target of ₹7,286 crore, achieving 109 per cent of the planned outlay for the period and over 48 per cent of the annual capex target of ₹16,500 crore," the company said in a statement.

It added the robust capex performance underscores the firm's focus on strengthening mining infrastructure, acquiring land, procuring heavy earth moving machinery (HEMM) and advancing diversification projects.

Mine infrastructure development emerged as the largest area of investment for CIL during the first half of 2026-27, attracting ₹2,152 crore. This included investments in railway sidings and corridors, coal handling plants, silos, and weighbridges to strengthen the coal evacuation and handling infrastructure.

"Land acquisition was another major component of expenditure, accounting for ₹2,033 crore during the period. Additionally, over ₹1,000 crore was spent on mine development to support the expansion and operational readiness of mining projects," the firm said.

Capital expenditure under the Plant and Machinery segment stood at ₹1,394 crore. This included investments in HEMMs, washeries, and other plant and machinery. Of this, ₹452 crore was spent on procuring HEMMs to strengthen mining operations.

PUBLIC ANNOUNCEMENT FOR THE ATTENTION OF EQUITY SHAREHOLDERS/ BENEFICIAL OWNERS OF EQUITY SHARES OF GENUS POWER INFRASTRUCTURES LIMITED ("COMPANY") FOR THE BUYBACK OF EQUITY SHARES ON A PROPORTIONATE BASIS THROUGH TENDER OFFER ROUTE USING STOCK EXCHANGE MECHANISM AS PRESCRIBED UNDER THE SECURITIES AND EXCHANGE BOARD OF INDIA (BUY-BACK OF SECURITIES) REGULATIONS, 2018, AS AMENDED, (INCLUDING ANY STATUTORY MODIFICATION(S), AMENDMENT(S) OR RE-ENACTMENTS FROM TIME TO TIME) ("BUYBACK REGULATIONS").

This Public Announcement ("Public Announcement"/"PA") is being made in accordance with the provisions of Regulation 7(i) of the Buyback Regulations and contains the disclosures as specified in Schedule II read with Schedule I of the Buyback Regulations

OFFER TO BUYBACK UPTO 47,50,000 (FORTY SEVEN LAKHS AND FIFTY THOUSAND) FULLY PAID UP EQUITY SHARES OF THE COMPANY HAVING A FACE VALUE OF ₹1/- EACH (RUPEE ONE ONLY) ("**EQUITY SHARES**") AT A PRICE OF ₹312/- (RUPEES THREE HUNDRED AND TWELVE ONLY) PER FULLY PAID UP EQUITY SHARE IN CASH ON A PROPORTIONATE BASIS FROM ALL EQUITY SHAREHOLDERS THROUGH THE TENDER OFFER PROCESS USING THE STOCK EXCHANGE MECHANISM FOR AN AGGREGATE CONSIDERATION OF UPTO ₹ 148.20 CRORES (RUPEES ONE HUNDRED FORTY EIGHT CRORES AND TWENTY LAKHS ONLY).

Certain figures contained in this Public Announcement, including financial information, have been subject to rounding-off adjustments. All decimals have been rounded off to 2 (two) decimal points. In certain instances, (i) the sum or percentage change of such numbers may not conform exactly to the total figure given; and (ii) the sum of the numbers in a column or row in certain tables may not conform exactly to the total figure given for that column or row.

1. DETAILS OF THE BUYBACK OFFER AND BUYBACK OFFER PRICE

1.1 The Board of Directors of the Company (the "**Board**", which expression shall be deemed to include the Buyback Committee and/or any other committee or officials which the Board may constitute or authorise to exercise its powers, including the powers conferred by the resolution passed by the Board at the Board Meeting), at its meeting held on Monday, October 26, 2026 ("**Board Meeting**"), pursuant to the provisions of Article 56 of Articles of Association of the Company and Sections 68, 69, 70 and 179 and all other applicable provisions of the Companies Act, 2013, as amended (the "**Companies Act**"), the Companies (Share Capital and Debentures) Rules, 2014 (the "**Share Capital Rules**"), the Companies (Management and Administration) Rules, 2014 (the "**Management Rules**") to the extent applicable and other relevant rules made thereunder (including any statutory amendment(s), modification(s) or re-enactment(s) thereof for the time being in force), and in compliance with Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("**LODR Regulations**"), and in compliance with the Buyback Regulations (including any statutory amendment(s), alteration(s), modification(s) and re-enactments thereunder) and subject to such other approvals, permissions and sanctions as may be necessary and subject to such conditions and modifications, if any, as may be prescribed or imposed by the appropriate authorities while granting such approvals, permissions and sanctions, which may be agreed by the Board or any person authorised by the Board, approved the Buyback upto 47,50,000 (Forty Seven Lakhs and Fifty Thousand) fully paid-up equity shares of face value of ₹1/- each (Rupee One only) (the **"Equity Shares"**), representing up to 1.56% of the total number of outstanding Equity Shares of the Company as at March 31, 2026, at a price of ₹312/- (Rupees Three Hundred and Twelve only) per Equity Share (the **"Buyback Price"**), payable in cash for an aggregate amount of upto ₹148.20 Crores (Rupees One Hundred Forty Eight Crores and Twenty Lakh Only), excluding Transaction Cost (defined below) ("**Buyback Size**"), which represents up to 6.77% and 6.72% of the fully paid-up equity share capital and (including securities premium) as per the latest audited standalone and consolidated balance sheet respectively of the Company for the financial year ended March 31, 2026, on a proportionate basis through the tender offer process ("**Tender Offer**") as prescribed under the Buyback Regulations from all the equity shareholders/beneficial owners of the Company who hold Equity Shares as on the record date i.e. October 30, 2026 ("**Record Date**") ("**Eligible Shareholders**") ("**Buyback**" or "**Buyback Offer**").

1.2 In terms of Regulation 5(via) of the Buyback Regulations, the Board or Buyback Committee, may till 1 (one) working day prior to the Record Date, increase the Buyback Price and decrease the number of Equity Shares proposed to be bought back, such that there is no change in the Buyback Size.

1.3 The Buyback Size represents 6.77% and 6.72% of the aggregate of the total paid-up equity share capital and free reserves (including securities premium) as per the latest audited standalone and consolidated financial statements of the Company, respectively, as of March 31, 2026. Since the Buyback Size is less than 10% of the aggregate of the total paid-up equity share capital and free reserves (including securities premium) of the Company, based on the latest audited standalone and consolidated financial statements as on March 31, 2026, accordingly the approval of the shareholders is not required for the Buyback in terms of the Buyback Regulations and Companies Act.

1.4 Under the Companies Act and Buyback Regulations, the maximum number of Equity Shares that can be bought back in any financial year cannot exceed 25% of the total number of Equity Shares in the total paid-up Equity Share capital of the Company as of March 31, 2026. The Company proposes to Buyback upto 47,50,000 (Forty Seven Lakhs and Fifty Thousand) fully paid-up Equity Shares (representing up to 1.56% of the total number of Equity Shares in the existing total paid-up Equity Share capital of the Company as of March 31, 2026), which is within the aforesaid limit of 25% as per the provisions of the Companies Act and Regulation 4(i) of the Buyback Regulations.

1.5 The Buyback Size does not include transaction costs viz. brokerage costs, fees, turnover charges, taxes such as securities transaction tax and goods and services tax (if any), stamp duty, advisors/ legal fees, filing fees, intermediary fees, public announcement publication expenses, printing and dispatch expenses, and other incidental and related expenses ("**Transaction Cost**").

1.6 The Equity Shares are listed on the National Stock Exchange of India Limited ("**NSE**") and the BSE Limited ("**BSE**") (hereinafter together referred to as the "**Stock Exchanges**").

1.7 The Buyback shall be undertaken on a proportionate basis from the Eligible Shareholders of the Company as on the Record Date i.e. October 30, 2026 through the tender offer process prescribed under Regulation 4(iv)(a) of the Buyback Regulations. Additionally, the Buyback shall be subject to applicable laws, implemented by tendering of Equity Shares by Eligible Shareholders and settlement of the same through the "*Mechanism for acquisition of shares through Stock Exchange pursuant to Tender-Offers under Takeovers Buy Back and Delisting*" as specified by SEBI in its circular bearing reference number CIR/CFD/POLICYCELL/1/2015 dated April 13, 2015 read with the circular bearing reference number CFD/DCR2/CIR/P/2016/131 dated December 9, 2016, SEBI circular SEBI/HO/CFD/DCR-III/CIR/P/2021/615 dated August 13, 2021 and circular SEBI/HO/CFD/PoD-2/P/CIR/2023/35 dated March 08, 2023, including all amendments and statutory modifications for the time being in force ("**SEBI Circulars**") or such mechanism as may be applicable. In this regard, the Company shall approach BSE and NSE to provide the acquisition window for facilitating tendering of Equity Shares under the Buyback. For the purposes of this Buyback, the BSE will be the designated stock exchange (**"Designated Stock Exchange"**). The Buyback is also subject to receipt of such other approvals, permissions, consents, sanctions and exemptions of the statutory, regulatory or governmental authorities, as may be required under the applicable laws including from SEBI, the Stock Exchanges, Reserve Bank of India ("**RBI**"), Registrar of Companies, Uttar Pradesh II ("**RoC**") and/ or other authorities, institutions or bodies (together with SEBI, RBI and RoC, the "**Appropriate Authorities**").

1.8 Participation in the Buyback by Eligible Shareholders will trigger capital gain taxation in India and in their country of residence. The transaction of Buyback would also be chargeable to securities transaction tax ("**STT**") in India. In due course, Eligible Shareholders will receive a letter of offer, which will contain a more detailed note on taxation. However, in the view of the particularized nature of tax consequences, Eligible Shareholders are advised to consult their own legal, financial and tax advisors for the applicable tax implications prior to participating in the Buyback.

1.9 All the shareholders of the Company holding Equity Shares as on the Record Date will be eligible to participate in the Buyback, including the promoters and members of the promoter group of the Company. However, the promoters and members of the promoter group have expressed their intention not to participate in the Buyback.

1.10 Pursuant to the proposed Buyback and depending on the response to the Buyback, the voting rights of the promoters and members of promoter group and persons in control of the Company may increase from their existing shareholding in the total equity capital and voting rights of the Company. The Company confirms that after the completion of the Buyback, the non-promoter shareholding of the Company shall not fall below the minimum level required as per Regulation 38 of the LODR Regulations. Any change in voting rights of the promoter and members of promoter group and persons in control of the Company pursuant to completion of the Buyback will not result in any change in control over the Company as defined under Regulation 2(1)(e) of the Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011.

1.11 The Buyback from the Eligible Shareholders who are residents outside India including non-resident Indians, foreign nationals, foreign corporate bodies (including erstwhile overseas corporate bodies), foreign institutional investors/ foreign portfolio investors, etc, shall be subject to such approvals, if any and to the extent necessary or required from the concerned authorities including approvals from the RBI under the Foreign Exchange Management Act, 1999 and the rules and regulations framed thereunder, Income-tax Act, 2025 and rules framed there under, and that such approvals shall be required to be taken by such non-resident shareholders.

1.12 A copy of this Public Announcement is available on the website of the Company at www.genuspower.com, the website of the Manager to the Buyback i.e. IIFL Capital Services Limited *(formerly known as IIFL Securities Limited)* at www.iiflcapital.com and is expected to be available on the website of the SEBI at www.sebi.gov.in during the period of Buyback and on the website of the Stock Exchanges at www.bseindia.com and www.nseindia.com.

2. NECESSITY OF THE BUYBACK

In view of the Company's strong financial position and adequate liquidity, it is proposed to undertake a buyback of equity shares with the objective of optimizing the Company's capital structure, enhancing shareholder value, improving Earnings Per Share (EPS) and Return on Equity (ROE), while continuing to maintain adequate financial resources to support the Company's future growth and business requirements.

The Board at its meeting held on October 26, 2026 considered the accumulated free reserves as well as the cash liquidity reflected in the latest standalone and consolidated audited financial statements as on March 31, 2026 and, considering these, decided to allocate upto ₹148.20 Crores (Rupees One Hundred Forty Eight Crores and Twenty Lakh Only) for the Buyback, excluding any Transaction Cost.

After considering several factors and benefits to the shareholders holding Equity Shares of the Company, the Board decided to recommend Buyback of Equity Shares at a price of ₹ 312/- (Rupees Three Hundred and Twelve only) per Equity Share for an aggregate consideration upto ₹148.20 Crores (Rupees One Hundred Forty Eight Crores and Twenty Lakh Only). The Buyback is being undertaken, *inter-alia*, for the following reasons:

(i) The Buyback will help the Company to enhance the overall return to shareholders;

(ii) The Buyback, which is being implemented through the tender offer route as prescribed under the Buyback Regulations, would involve allocation of number of Equity Shares as per their entitlement or 15% of the number of Equity Shares to be bought back whichever is higher, reserved for the small shareholders as per Regulation 6 of the Buyback Regulations. The Company believes that this reservation for small shareholders would benefit a large number of public shareholders, who would get classified as 'Small Shareholder' as per Regulation 2(i)(n) of the Buyback Regulations;

(iii) The Buyback would help in improving financial ratios like earnings per share and return on Equity, by reducing the Equity base of the Company, leading to increase in long term value for shareholders; and

(iv) The Buyback gives the Eligible Shareholders the choice to either participate in the Buyback and receive cash in lieu of their Equity Shares which are accepted under the Buyback or not to participate in the Buyback and get a resultant increase in their percentage shareholding in the Company post the Buyback, without additional investment.

3. MAXIMUM AMOUNT REQUIRED FOR THE BUYBACK AND ITS PERCENTAGE OF THE TOTAL PAID UP CAPITAL AND FREE RESERVES AND SOURCE OF FUNDS FROM WHICH BUYBACK WOULD BE FINANCED

3.1 The maximum amount required for Buyback will not exceed ₹148.20 Crores (Rupees One Hundred Forty Eight Crores and Twenty Lakh Only), excluding Transaction Cost.

3.2 The maximum amount mentioned aforesaid is 6.77% and 6.72% of the aggregate of the fully paid-up equity share capital and free reserves (including securities premium) as per the latest audited standalone and consolidated financial statements of the Company, respectively, as on March 31, 2026 (being the latest audited financial statements available as on the date of the Board Meeting), which does not exceed 10% of the aggregate of the total paid-up capital and free reserves (including securities premium) of the Company as per latest audited standalone and consolidated financials of the Company as on March 31, 2026.

3.3 The funds for the implementation of the proposed Buyback will be sourced out of free reserves (including securities premium) of the Company and/or such other source as may be permitted by the Buyback Regulations or the Companies Act.

3.4 The Company shall transfer from its free reserves (including securities premium), a sum equal to the nominal value of the Equity Shares so bought to the Capital Redemption Reserve Account and details of such transfer shall be disclosed in its subsequent audited financial statements.

3.5 The funds borrowed, if any, from banks and financial institutions will not be used for the Buyback.

4 BUYBACK PRICE AT WHICH THE EQUITY SHARES ARE PROPOSED TO BE BOUGHT BACK AND BASIS OF ARRIVING AT THE BUYBACK PRICE

4.1 The Equity Shares of the Company are proposed to be bought back at a price of ₹312/- (Rupees Three Hundred and Twelve Only) per Equity Share.

4.2 The Buyback Price of ₹312/- (Rupees Three Hundred and Twelve Only) per Equity Share has been arrived at after considering various factors including, but not limited to, (i) the growth prospects of the Company; (ii) the price earnings ratio of the Company and its sector; and (iii) the trends in the volume weighted average prices of the Equity Shares on the Stock Exchanges.

4.3 The Buyback Price represents a premium of:

i. 20.16% and 20.37% over the closing price of the Equity Shares on BSE and NSE, respectively, as on October 23, 2026 (being one working day preceding the date of the Board Meeting approving the Buyback);

ii. 8.43% and 8.37% over the closing price of the Equity Shares on BSE and NSE, respectively, as on October 16, 2026, (being one working day preceding the date of intimation to the Stock Exchanges of the Board Meeting to consider the proposal for the Buyback);

iii. 7.14% and 6.20% over the volume weighted average market price of the Equity Shares on BSE and NSE, respectively, during the two weeks preceding October 19, 2026, (being the date of intimation to the Stock Exchanges of the Board Meeting to consider the proposal for the Buyback); and

The date on which the Company intimated to the Stock Exchanges of the date of the meeting of the Board of Directors wherein the proposal of Buyback was considered was October 19, 2026. The closing market price of the Equity Shares as on Intimation Date was ₹283.95 on BSE and ₹282.75 on NSE.

5 MAXIMUM NUMBER OF EQUITY SHARES WHICH THE COMPANY PROPOSES TO BUYBACK

The Company proposes to Buyback upto 47,50,000 (Forty Seven Lakhs and Fifty Thousand) Equity Shares of the Company, representing 1.56% of the total number of Equity Shares in the total paid-up equity capital of the Company, from the Eligible Shareholders, for an amount upto ₹148.20 Crores (Rupees One Hundred Forty Eight Crores and Twenty Lakh Only). However, the actual bought back Equity Shares may fall below the indicative maximum buyback shares, if the Buyback Price fixed by the Board/Buyback Committee exceeds the Buyback Price, subject to number of Equity Shares bought back shall not exceed 25% of the total number of Equity shares in the total paid-up Equity Share capital of the Company and the amount utilized shall not exceed Buyback Size.

6 DETAILS OF SHAREHOLDING AND TRANSACTIONS IN THE SHARES OF THE COMPANY BY PROMOTERS, MEMBERS OF PROMOTER GROUP, PERSONS IN CONTROL OF THE COMPANY AND DIRECTORS OF PROMOTERS WHERE PROMOTER IS A COMPANY AND DIRECTORS AND KEY MANAGERIAL PERSONNEL OF THE COMPANY

The aggregate shareholding of the (i) Promoters, members of Promoter Group and of persons who are in control of the Company, (ii) Directors of the Promoters where Promoter is a company, (iii) Directors, and Key Managerial Personnel of the Company as on the date of the Public Announcement are as follows:

(i) Aggregate shareholding of the Promoters, members of Promoter Group and persons who are in control as on the date of the Board Meeting and the date of this Public Announcement:

Except as disclosed below, none of the Promoters, members of Promoter Group and persons who are in control hold any Equity Shares in the Company, as on the date of the Board Meeting and the date of this Public Announcement:

Sr. No	Name of Promoters and members of Promoter Group and persons who are in control	Number of Equity Shares held	% of Shareholding
1.	Amit Agarwal HUF (Karta: Amit Kumar Agarwal)	1,46,150	0.05

7 INTENTION OF THE PROMOTERS, MEMBERS OF PROMOTER GROUP AND PERSONS IN CONTROL OF THE COMPANY TO TENDER EQUITY SHARES FOR BUYBACK INDICATING THE NUMBER OF EQUITY SHARES, DETAILS OF ACQUISITION WITH DATES AND BUYBACK PRICE

7.1 In terms of the Buyback Regulations, under the tender offer route, the promoters and members of promoter group and persons in control of the Company have the option to participate in the Buyback. In this regard, the promoters and members of promoter group and persons in control of the Company, vide their letters dated October 27, 2026, have expressed their intention not to participate in the Buyback. Accordingly, the disclosures as required under paragraph (viii) of Schedule I read with Schedule II of the Buyback Regulations are not applicable. Given that the promoters and members of promoter group have expressed their intention not to participate in the Buyback, the Equity Shares held by them shall not be considered for computing the entitlement ratio, in accordance with the proviso to Regulation 4(iv)(a) of the Buyback Regulations.

7.2 The Buyback will not result in any benefit to promoters and members of promoter group or any directors of the Company except to the extent of the change in their shareholding as per the response received in the Buyback, as a result of the extinguishment of Equity Shares which will lead to reduction in the Equity Share Capital of the Company post Buyback and consequent increase in shareholding of promoter and members of promoter group.

8 DETAILS OF ANY SUBSISTING DEFAULTS IN REPAYMENT OF DEPOSITS, REDEMPTION OF DEBENTURES OR PREFERENCE SHARES OR REPAYMENT OF TERM LOANS TO ANY FINANCIAL INSTITUTION OR BANKS

The Company does not have any subsisting defaults in repayment of public deposits, redemption of debentures or preference shares or repayment of term loans to any financial institution or banks (including interest payable thereon), as the case may be. Further the Company has neither accepted any deposits nor has any outstanding preference shares.

9 CONFIRMATIONS FROM THE COMPANY AS PER THE PROVISIONS OF THE BUYBACK REGULATIONS AND THE COMPANIES ACT:

(i) all Equity Shares of the Company are fully paid up;

(ii) the Buyback will not be in contravention of Regulation 4(vii) of Buyback Regulations, i.e., the Company has not made the offer of Buyback within a period of one year reckoned from the date of expiry of buyback period of the preceding offer of buyback;

(iii) subject to applicable law, the Company shall not issue and allot any Equity Shares or other specified securities including by way of bonus issue from the date of the Board Meeting till the expiry of the buyback period, i.e., the date on which the payment of consideration to the Eligible Shareholders who have accepted the offer of Buyback is made in accordance with the Companies Act and the Buyback Regulations ("**Buyback Period**") except in discharge of subsisting obligations through conversion of warrants, stock option schemes, sweat equity or conversion of preference shares or debentures into equity shares;

(iv) subject to applicable law, the Company, shall not raise further capital for a period of one year from the expiry of the Buyback Period, except in discharge of its subsisting obligations;

(v) the Company, as per provisions of Section 68(8) of the Companies Act, shall not make a further issue of the same kind of shares or other securities including allotment of new shares under clause (a) of sub-section (1) of section 62 or other specified securities within a period of six months from completion of Buyback except by way of a bonus issue or in the discharge of subsisting obligations such as conversion of warrants, stock option schemes, sweat equity or conversion of preference shares or debentures into equity shares;

(vi) in accordance with Regulation 24(v) of the Buyback Regulations, the Company will not Buyback the locked-in Equity Shares and non-transferable Equity Shares till the pendency of the lock-in or till the Equity Shares become transferable;

(vii) the Company shall not buy back its shares or other specified securities from any person through negotiated deal whether on or off the stock exchange or through spot transactions or through private arrangement;

(viii) the Company shall buyback Equity Shares held in physical form from Eligible Shareholders in terms of the applicable SEBI circulars, including SEBI master circular no. SEBI/HO/CFD/PoD2/CIR/P/2023/120 dated July 11, 2023;

(ix) there are no defaults subsisting in the repayment of deposits accepted either before or after the Companies Act, interest payment thereon, redemption of debentures or interest payment thereon or redemption of preference shares or payment of dividend due to any shareholder, or repayment of any term loans or interest payable thereon to any financial institution or banking companies;

(x) borrowed funds from banks and financial institutions, if any, will not be used for the Buyback;

(xi) the Buyback Size does not exceed 10% of the aggregate of the fully paid-up equity share capital and free reserves (including securities premium) of the Company as per the latest audited balance sheet as on March 31, 2026 on standalone and consolidated basis, whichever sets out a lower amount;

(xii) that the maximum number of Equity Shares proposed to be purchased under the Buyback i.e. upto 47,50,000 (Forty Seven Lakhs and Fifty Thousand) fully paid-up equity shares, does not exceed 25% of the total number of Equity Shares in the paid-up Equity Share capital of the Company as per the standalone and consolidated audited balance sheet as on March 31, 2026;

(xiii) the aggregate amount of the Buyback i.e., Up to ₹ 148.20 Crores (Rupees One Hundred Forty Eight Crores and Twenty Lakh Only) does not exceed 25% of the total paid-up capital and free reserves (including securities premium) of the Company as per the standalone and consolidated audited financial statements of the Company as on March 31, 2026.

(xiv) the ratio of the aggregate of secured and unsecured debts owed by the Company shall not be more than twice the paid-up capital and free reserves (including securities premium) after the Buyback, based on both standalone and consolidated financial statements of the Company, whichever sets out a lower amount, as prescribed under the Buyback Regulations, the Companies Act, the rules made thereunder and other applicable laws;

(xv) the Company shall not make any offer of Buyback within a period of one year reckoned from the expiry of the Buyback Period i.e., the date on which the payment of consideration to shareholders who have accepted the Buyback offer is made in accordance with the Companies Act and the Buyback Regulations;

(xvi) the Company shall not undertake the Buyback unless it has obtained the prior consent of its lenders in case it results in a breach of any covenant with such lenders. As per Regulation 5(i)(c) and Schedule I(xii) of the Buyback Regulations, the Company confirms that there is no breach of any covenants of the loans taken. All necessary lender consents required in connection with the Buyback to the extent applicable, have been duly obtained. There is no pendency of any scheme of amalgamation or compromise or arrangement pursuant to the provisions of the Companies Act.

(xvii) the Company will not withdraw the Buyback after the public announcement of the Buyback is made;

(xviii) the Company is not undertaking the Buyback to delist its Equity Shares or other specified securities from the Stock Exchanges;

(xix) consideration for the Equity Shares bought back by the Company will be paid only by way of cash. The Company shall earmark and make arrangements for adequate sources of funds for the purpose of the Buyback in accordance with the Buyback Regulations;

(xx) the Company shall comply with the statutory and regulatory timelines in respect of the Buyback in such manner as prescribed under the Companies Act and/or the Buyback Regulations and any other applicable laws;

(xxi) the Company shall transfer from its free reserves or securities premium account and/or such sources as may be permitted by law, a sum equal to the nominal value of the Equity Shares purchased through the Buyback to the capital redemption reserve account and the details of such transfer shall be disclosed in its subsequent audited financial statements;

(xxii) the Equity Shares bought back by the Company will be compulsorily extinguished and/or physically destroyed, as may be applicable, in the manner prescribed under the Buyback Regulations and the Companies Act within 7 (seven) working days of the expiry of the Buyback Period, and will not be held for re-issuance;

(xxiii) as per Regulation 24(i)(e) of the Buyback Regulations, the Promoters and members of Promoter Group, persons in control of the Company and their associates shall not deal in the Equity Shares or other specified securities of the Company either through the stock exchanges or off-market transactions (including inter-se transfer of Equity Shares among the Promoters and members of Promoter Group) from the date of the Board Meeting till the closing of the Buyback;

(xxiv) the Buyback shall be completed within a period of one year from the date of passing of resolution in Board Meeting approving the Buyback;

(xxv) the Company is in compliance with the provisions of Sections 92, 123, 127 and 129 of the Companies Act;

(xxvi) the Company shall not directly or indirectly purchase its own Equity Shares or other specified securities through any subsidiary company including its own subsidiary companies, or through any investment company or group of investment companies;

(xxvii) the Buyback shall not result in delisting of the Equity Shares from BSE Limited and National Stock Exchange of India Limited;

(xxviii) the Company will comply with the requirement of maintaining a minimum public shareholding of at least 25% of the total paid-up share capital of the Company as provided under Regulation 38 of the LODR Regulations, during the Buyback period and upon completion thereof;

(xxix) the Company shall ensure consequent reduction of its share capital post Buyback and the Equity Shares bought back by the Company will be extinguished and physically destroyed (if applicable) in the manner prescribed under the Buyback Regulations and the Act within the specified timelines;

(xxx) the Company shall not buyback its Equity Shares out of the proceeds of an earlier issue of the same kind of shares or same kind of other specified securities; and

(xxxi) the statements contained in this Public Announcement and the letter of offer in relation to the Buyback shall be true, fair and adequate in all material respects and shall not contain any misleading information.

(xxxii) as per Regulation 24(i)(ea) of the Buyback Regulations, except for tendering shares or other specified securities in the Buyback, the shares or other specified securities held by the promoter and members of promoter group, including their associates, for which Buyback is undertaken, shall remain frozen at the International Securities Identification Number (ISIN) level during the period from the date of the Board Meeting till the closure of the Buyback.

10 CONFIRMATION BY THE BOARD OF DIRECTORS:

As required by clause (x) of Schedule I read with Schedule II of the Buyback Regulations, the Board has confirmed that it has made a full enquiry into the affairs and prospects of the Company and has formed the opinion:

(i) immediately following the date of the Board Meeting there will be no ground on which the Company could be found unable to pay its debts.

(ii) as regards its prospects for the year immediately following the date of the Board Meeting, having regard to the intentions of the Board with respect to the management of the Company's business during that year and to the amount and the character of the financial resources which in the Board's view will be available to the Company during that year, the Company will be able to meet its liabilities as and when they fall due and will not be rendered insolvent within a period of one year from that date; and

(iii) in forming its opinion for the above purposes, the Board has taken into account the liabilities of the Company (including prospective and contingent liabilities) as if the Company were being wound up under the provisions of the Companies Act or the Insolvency and Bankruptcy Code, 2016.

11 REPORT BY THE COMPANY'S JOINT STATUTORY AUDITORS

Report addressed to the Board of Directors by the Company's Auditors on permissible capital payment.

The text of the report dated October 26, 2026 of M S K A & Associates LLP and Kapoor Patni & Associates, the Statutory Auditors of the Company is reproduced below:

"Quote

To
The Board of Directors
Genus Power Infrastructures Limited
G-123 Sector-63, Gautam Buddha Nagar,
Noida, Uttar Pradesh, India, 201307

Independent Auditor's Report on the proposed buy back of equity shares pursuant to the requirements of Section 68 and Section 70 of the Companies Act, 2013 and Clause (xi) of Schedule I of the Securities and Exchange Board of India (Buy-back of Securities) Regulations, 2018 as amended (**"the SEBI Buyback Regulations"**)

1. This Report is issued in terms of our engagement letter dated October 19, 2026 with Genus Power Infrastructures Limited (hereinafter the "**Company**").

We, M S K A & Associates LLP (Formerly known as M S K A & Associates) and Kapoor Patni & Associates, Chartered Accountants, are the Joint Statutory Auditors of the Company and have been requested by the Company to examine the attached Statement of the amount of permissible capital payment for proposed buyback of equity shares" ("Annexure") herein referred to as the "Statement" which has been prepared pursuant to the provisions of Section 68, 69 and 70 of the Companies Act, 2013 ("the Act") and Clause (xi) of Schedule I read with Schedule II of the SEBI Buyback Regulations and has been approved by the Board of Directors of the Company in their meeting held on October 26, 2026. The Statement has been initialed by us for identification purposes only.

Board of Director's Responsibility

2. The preparation of the Statement is the responsibility of the Board of Directors of the Company, including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation; and making estimates that are reasonable in the circumstances.

3. The Board of Directors of the Company is also responsible to make a full inquiry into the affairs and prospects of the Company and to form an opinion as specified in clause (x) of Schedule I read with Schedule II to the SEBI Buyback Regulations on reasonable grounds that the Company will be able to pay its debts and will not, having regard to its state of affairs, be rendered insolvent within a period of one year from the date of passing the board resolution dated October 26, 2026 approving the Buyback of Equity Shares. The Board of Directors is also responsible for ensuring that the Company complies with the requirements of the Act and the SEBI Buyback Regulations.

Auditor's Responsibility

4. Pursuant to the requirements of the Act and SEBI Buyback Regulations, our responsibility is to provide reasonable assurance in the form of an opinion based on our examination of the Statement and according to information and explanations given to us as to:

- we have inquired into the state of affairs of the Company in relation to its audited standalone and consolidated financial statements for the year ended and as at March 31, 2026;
- the amount of permissible capital payment for the proposed buyback of the equity shares as included in the Statement has been properly determined in accordance with the provisions of Section 68(2)(c) of the Act and Regulation 4(i) of the SEBI Buyback Regulations;
- the Board of Directors have formed the opinion as specified in clause (x) of Schedule I to the SEBI Buyback Regulations on reasonable grounds and that the Company will not, having regard to its state of affairs, be rendered insolvent within a period of one year from date of passing the board resolution dated October 26, 2026 approving the Buyback of Equity Shares.

5. Our examination did not extend to any aspects of legal or propriety nature of the subject matter stated above and other compliances thereof. Nothing contained in this report, nor anything said or done in the course of, or in connection with the services that are subject to this report, will extend any duty of care that we may have in our capacity of the statutory auditors of any financial statements of the Company**.**

6. We have audited the standalone and consolidated financial statements for the financial year ended March 31, 2026, on which we issued an unmodified audit opinion vide our reports dated May 16, 2026. Our audits of these financial statements were conducted in accordance with the Standards on Auditing, as specified under Section 143(10) of the Act and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India ("ICAI"). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

7. We conducted our examination of the Statement in accordance with the Guidance Note on Reports or Certificates for Special Purposes (Revised 2016) issued by the ICAI (the "Guidance Note"). The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI.

8. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements issued by the ICAI.

9. A reasonable assurance engagement includes performing procedures to obtain sufficient appropriate evidence on the applicable criteria mentioned in paragraph 4 above. The procedures selected depend on the auditor's judgement, including the assessment of the risks associated with the applicable criteria. Our procedures included the following in relation to the Statement:

- We have inquired into the state of affairs of the Company in relation to its audited standalone and consolidated financial statements for the year ended March 31, 2026. We have obtained and read the audited standalone and consolidated financial statements for the year ended March 31, 2026 including the unmodified audit opinions dated May 16, 2026;
- Read the Articles of Association of the Company and noted the permissibility of buyback;
- Traced the amounts of Paid-up equity share capital and free reserves as mentioned in Statement from the audited standalone and consolidated financial statements for the year ended March 31, 2026.
- Tested whether the amount of capital payment for the proposed buy-back as detailed in the Statement is within permissible limit computed in accordance with section 68(2)(c) of the Act and Regulation 4(i) of the SEBI Buyback Regulations;
- Tested whether the ratio of the aggregate of secured and unsecured debts owed by the Company to the paid-up capital and free reserves after such buyback is as per Section 68(2)(d) of the Act and the SEBI Buyback Regulations, to the extent applicable;
- Read the audited financial statements for the year ended March 31, 2026 in order to assess whether all shares for buyback are fully paid-up;
- Obtained resolution passed in the meeting of the Board of Directors dated October 26, 2026 pursuant clause (x) of Schedule I to the SEBI Buyback Regulations;
- Verified whether, for the purpose of the proposed buyback and solvency of the Company, the Board of Directors in the above resolution have formed the opinion on reasonable grounds that the Company will not, having regard to its state of affairs, be rendered insolvent within a period of one year from the date of passing the board resolution approving the Buyback of Equity Shares. Obtained necessary representations from the management of the Company.

Opinion

10. Based on our examination and the procedures performed by us on the Statement, and according to the information and explanations received, we are of the opinion that:

- We have inquired into the state of affairs of the Company in relation to its audited standalone and consolidated financial statements for the year ended and as at March 31, 2026;
- The amount of permissible capital payment for proposed Buyback of the equity shares as included in the Statement attached herewith, as Annexure, has been properly determined in accordance with the provisions of Section 68(2)(c) of the Act and Regulation 4(i) of the SEBI Buyback Regulations;
- The Board of Directors have formed the opinion as specified in clause (x) of Schedule I of the SEBI Buyback Regulations on reasonable grounds and that the Company will not, having regard to its state of affairs, be rendered insolvent within a period of one year from the date of passing the board resolution approving the Buyback of Equity Shares.

Restriction on Use

11. The Report is addressed to the Board of Directors of the Company solely for the purpose of enabling compliance with the requirements of Section 68 and Section 70 of the Act read with Clause (xi) of Schedule I of the SEBI Buyback Regulations, to enable them to include it (a) in the public announcement and letter of offer to be made to the shareholders of the Company, (b) to file with the Securities and Exchange Board of India, the stock exchanges, the Registrar of Companies, the National Securities Depository Limited, the Central Depository Services (India) Limited, and to share with the manager to the Buyback for onward submission to relevant authorities in connection with the proposed Buyback. This Report should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this Report is shown or into whose hands it may come without our prior consent in writing.

12 RECORD DATE, OFFER PERIOD AND SHAREHOLDERS' ENTITLEMENT

12.1 As required under the Buyback Regulations, the Company has fixed October 30, 2026 as the Record Date for the purpose of determining the entitlement and the names of the equity shareholders who are eligible to participate in the Buyback. Eligible Shareholders will receive a letter of offer along with a tender/ offer form indicating their entitlement. The tender period for the Buyback offer will commence from November 4, 2026 i.e., not later than 4 (four) working days from the Record Date and shall remain open for a period of 5 (five) working days, i.e., until November 11, 2026.

12.2 As per the Buyback Regulations and such other circulars or notifications, as may be applicable, in due course, Eligible Shareholders will receive a letter of offer in relation to the Buyback (**"Letter of Offer"**) along with a tender offer form indicating the entitlement of the Eligible Shareholder for participating in the Buyback. Even if the Eligible Shareholder does not receive the Letter of Offer along with a tender form, the Eligible Shareholder may participate and tender shares in the Buyback. All of the equity shareholders of the Company as on Record Date will be eligible to participate in the Buyback.

12.3 As required under the Buyback Regulations, the dispatch of the Letter of Offer shall be through electronic mode in accordance with the provisions of the Companies Act within two (2) working days from the Record Date along with a tender offer form indicating the entitlement of the Eligible Shareholder for participating in the Buyback. Even if the Eligible Shareholder does not receive the Letter of Offer along with a tender form, the Eligible Shareholder may participate and tender shares in the Buyback. If the Company receives a request from any Eligible Shareholder to receive a copy of the letter of offer in physical form, the same shall be provided.

12.4 The Equity Shares proposed to be bought back by the Company, as a part of the Buyback, are divided into two categories:

i. Reserved category for small shareholders (as defined below); and
ii. General category for all Eligible Shareholders.

As defined in Regulation 2(i)(n) of the Buyback Regulations, 'small shareholder' means a shareholder of a company, who holds shares or other specified securities whose market value, on the basis of closing price of shares or other specified securities, on the recognised stock exchange in which highest trading volume in respect of such securities, as on record date is not more than two lakh rupees;

12.5 In accordance with Regulation 6 of the Buyback Regulations, 15% (fifteen percent) of the number of Equity Shares which the Company proposes to Buyback or such number of Equity Shares entitled as per the shareholding of small shareholders as on the Record Date, whichever is higher, shall be reserved for the small shareholders as part of this Buyback.

12.6 On the basis of the shareholding on the Record Date, the Company will determine the entitlement of each Eligible Shareholder, including small shareholders, to tender their Equity Shares in the Buyback. This entitlement for each Eligible Shareholder will be calculated based on the number of Equity Shares held by the respective shareholder on the Record Date and the ratio of the Buyback applicable in the category to which such shareholder belongs (**"Buyback Entitlement"**). The final number of Equity Shares that the Company will purchase from each Eligible Shareholder will be based on the total number of Equity Shares tendered. Accordingly, the Company may not purchase all of the Equity Shares tendered by an Eligible Shareholder. The Company believes that this reservation for small shareholders would benefit a large number of the Company's public shareholders, who would be classified as "Small

Shareholders". Given that the promoters and members of the promoter group of the Company have expressed their intention not to participate in the Buyback, the Equity Shares held by members of the promoter/ promoter group shall not be considered for computing the entitlement ratio, in accordance with the proviso to Regulation 4(iv)(a) of the Buyback Regulations, and to that extent, the Eligible Shareholders will have a higher Buyback Entitlement ratio.

12.7 In accordance with Regulation 9(ix) of the Buyback Regulations, in order to ensure that the same shareholders with multiple demat accounts/folios do not receive a higher entitlement under the small shareholder category, the Company will club together the Equity shares held by such shareholders with a common Permanent Account Number (PAN) for determining the category (small shareholder or general) and entitlement under the Buyback. In case of joint shareholding, the Company will club together the Equity shares held in cases where the sequence of the PANs of the joint shareholders is identical. In case of physical shareholders, where the sequence of PANs is identical, the Company will club together the Equity shares held in such cases. Similarly, in case of physical shareholders where PAN is not available, the Company will check the sequence of names of the joint holders and club together the Equity shares held in such cases where the sequence of name of joint shareholders is identical. The shareholding of institutional investors like mutual funds, pension funds/trusts, insurance companies, clearing members etc. with common PAN will not be clubbed together for determining the category and will be considered separately, where these Equity Shares are held for different schemes and have a different demat account nomenclature based on information prepared by the registrar and transfer agent (the "**Registrar**") as per the shareholder records received from the depositories. Further, the Equity Shares held under the category of "clearing members" or "corporate body margin account" or "corporate body –broker" as per the beneficial position data as on the Record Date, with common PAN, are not proposed to be clubbed together for determining their entitlement and will be considered separately, where these Equity Shares are assumed to be held on behalf of clients

12.8 After accepting the Equity Shares tendered on the basis of entitlement, the Equity Shares left to be bought back, if any, in one category shall first be accepted, in proportion to the Equity Shares tendered over and above their entitlement in the offer by Eligible Shareholders in that category, and thereafter from Eligible Shareholders who have tendered over and above their entitlement in other category**.**

12.9 The participation of Eligible Shareholders in the Buyback is voluntary. Eligible Shareholders can choose to participate and get cash in lieu of shares to be accepted under the Buyback or they may choose not to participate. Eligible Shareholders may also accept a part of their entitlement. Eligible Shareholders also have the option of tendering additional shares (over and above their entitlement) and participate in the shortfall created due to non-participation of some other Eligible Shareholders, if any. The acceptance of any Equity Shares tendered in excess of the Buyback Entitlement by the Eligible Shareholder shall be in terms of procedure outlined herein. In case any Eligible Shareholder or any person claiming to be an Eligible Shareholder cannot participate in the Buyback Offer for any reason, the Company, the Manager and Registrar to the Buyback and their officers shall not be liable in any manner for such non-participation.

12.10 The maximum tender under the Buyback by any Eligible Shareholder cannot exceed the number of Equity Shares held by the Eligible Shareholder as on the Record Date. In case the Eligible Shareholder holds Equity Shares through multiple demat accounts, the tender through a demat account cannot exceed the number of Equity Shares held in that demat account as on the Record Date.

12.11 The Equity Shares tendered as per the entitlement by the Eligible Shareholder as well as additional Equity Shares tendered, if any, will be accepted as per the procedure laid down in the Buyback Regulations. The settlement of the tenders under the Buyback will be done using the "*Mechanism for acquisition of shares through Stock Exchange pursuant to Tender-Offers under Takeovers Buy Back and Delisting*" notified under the SEBI Circulars. Eligible Shareholders will receive a Letter of Offer along with a tender/offer form indicating their respective entitlement for participating in the Buyback.

12.12 Detailed instructions for participation in the Buyback (tender of Equity Shares in the Buyback) as well as the relevant time table will be included in the Letter of Offer to be sent in due course to the Eligible Shareholders as on Record Date who have their email address registered with the Company/Registrar and transfer agent/ Depositories.

13 PROCESS AND METHODOLOGY TO BE ADOPTED FOR THE BUYBACK

13.1 The Buyback is open to all Eligible Shareholders/ beneficial owners of the Company holding Equity Shares either in Physical or electronic form, as on the Record Date.

13.2 The Buyback shall be on a proportionate basis (subject to the reservation for Small Shareholders in accordance with the Buyback Regulations) through the "Tender Offer" route, as prescribed under the Buyback Regulations, to the extent permissible, and the Buyback will be implemented using the "*Mechanism for acquisition of shares through Stock Exchange pursuant to Tender-Offers under Takeovers Buy Back and Delisting*" notified vide the SEBI Circulars and in accordance with the procedure prescribed in the Companies Act and the Buyback Regulations, and as may be determined by the Board, on such terms and conditions as may be permitted by law from time to time.

13.3 For implementation of the Buyback, the Company has appointed IIFL Capital Services Limited *(formerly known as IIFL Securities Limited)* as the registered broker to the Company ("**Company's Broker**") to facilitate the process of tendering of Equity Shares through the stock exchange mechanism for the Buyback and through whom the purchases and settlement on account of the Buyback would be made by the Company. The contact details of the Company's Broker are as follows:

The Contact details of Company's Broker are as follows:

IIFL CAPITAL

IIFL Capital Services Limited

(formerly known as IIFL Securities Limited)
24th Floor, One Lodha Place, Senapati Bapat Marg,
Lower Parel (West), Mumbai 400 013, Maharashtra, India

Tel. No.: +91 22 4646 4600
Contact Person: Kunal Thakkar/Vishal Hase
Website: www.iiflcapital.com
SEBI Registration No.: INZ000164132
CIN: L99999MH1996PLC132983

13.4 The Company will request both the Stock Exchanges, to provide the separate acquisition window ("**Acquisition Window**") to facilitate placing of sell orders by Eligible Shareholders who wish to tender their Equity Shares in the Buyback. BSE will be the designated stock exchange for the purpose of this Buyback. The details of the Acquisition Window will be specified by the Stock Exchanges from time to time.

13.5 During the tendering period, the order for selling the Equity Shares will be placed in the Acquisition Window by Eligible Shareholders through their respective stock brokers during normal trading hours of the secondary market. The stock brokers ("**Seller Member(s)**") can enter orders for Equity Shares held in dematerialized form as well as physical form.

13.6 In the event the Seller Member(s) of any Eligible Shareholder is not registered with BSE/NSE as a trading member/ stock broker, then that Eligible Shareholder can approach any BSE/NSE registered stock broker and can register themselves by using quick unique client code ("**UCC**") facility through the registered stock broker (after submitting all details as may be required by such registered stock broker in compliance with applicable law). In case the Eligible Shareholders are unable to register using UCC facility through any other registered broker, Eligible Shareholders may approach Company's Broker to place their bids, subject to completion of KYC requirements as required by the Company's Broker.

13.7 Eligible Shareholders will have to tender their Equity Shares from the same demat account in which they were holding such Equity Shares as on the Record Date, and in case of multiple demat accounts, Eligible Shareholders are required to tender the applications separately from each demat account. In case of any changes in the demat account in which the Equity Shares were held as on Record Date, such Eligible Shareholders should provide sufficient proof of the same to the Registrar and such tendered Equity Shares may be accepted subject to appropriate verification and validation by the Registrar.

13.8 Further, the Company will not accept Equity Shares tendered for Buyback which are under restraint order of the court/ any other competent authority for transfer/ sale and/ or title in respect of which is otherwise under dispute or where loss of share certificates has been notified to the Company and the duplicate share certificates have not been issued either due to such request being under process as per the provisions of law or otherwise.

13.9 In accordance with Regulation 24(v) of the Buyback Regulations, the Company shall not Buyback locked-in Equity Shares and non-transferable Equity Shares until the pendency of the lock-in or until such Equity Shares become transferable. The Company shall also not Accept the Equity Shares offered for Buyback where the title to such Equity Shares is under dispute or otherwise not clear.

13.10 The reporting requirements for Non-Resident Shareholders under FEMA and any other rules, regulations, guidelines by the RBI, for remittance of funds, shall be made by the Eligible Shareholders and/ or the Stock Brokers through which the Eligible Shareholder places the order/bid.

13.11 Procedure to be followed by Eligible Shareholders holding Equity Shares in the dematerialized form:

a) Eligible Shareholders who desire to tender their Equity Shares in the electronic/ dematerialized form under Buyback would have to do so through their respective Seller Member by giving the details of Equity Shares they intend to tender under the Buyback.

b) The Seller Member would be required to place an order/bid on behalf of the Eligible Shareholders who wish to tender Equity Shares in the Buyback using the Acquisition Window of the Stock Exchanges. For further details, Eligible Shareholders may refer to the circulars issued by the Stock Exchanges, Indian Clearing Corporation Limited and NSE Clearing Limited (collectively referred to as the "**Clearing Corporations**").

c) The details and the settlement number under which the lien will be marked on the Equity Shares tendered for the Buyback will be provided in a separate circular to be issued by the Stock Exchanges and/or the Clearing Corporation.

d) For custodian participant orders for demat Equity Shares early pay-in is mandatory prior to confirmation of order by custodian. The custodian shall either confirm or reject the orders not later than the closing of trading hours on the last day of the tendering period. Thereafter, all unconfirmed orders shall be deemed to be rejected. For all confirmed custodian participant orders, order modification shall revoke the custodian confirmation and the revised order shall be sent to the custodian again for confirmation. The lien shall be marked by the Seller Member in the demat account of the Eligible Shareholder for the shares tendered in tender offer. Details of shares marked as lien in the demat account of the Eligible Shareholder shall be provided by the depositories to Clearing Corporation. In case, the Shareholders demat account is held with one depository and clearing member pool and Clearing Corporation Account is held with other depository, shares shall be blocked in the shareholders demat account at source depository during the tendering period. Inter depository tender offer ("**IDT**") instructions shall be initiated by the shareholders at source depository to clearing member/ Clearing Corporation account at target depository. Source depository shall block the shareholder's securities (i.e., transfers from free balance to blocked balance) and send IDT message to target depository for confirming creation of lien. Details of shares blocked in the shareholders demat account shall be provided by the target depository to the Clearing Corporation.

e) Upon placing the bid, the Seller Member shall provide a Transaction Registration Slip (the "**TRS**") generated by the exchange bidding system to the Eligible Shareholder. The TRS will contain the details of the order submitted like bid ID number, application number, DP ID, client ID, number of Equity Shares tendered, etc. In case of non-receipt of the completed tender form and other documents, but lien marked on Equity Shares and a valid bid in the exchange bidding system, the bid by such Eligible Shareholder shall be deemed to have been accepted.

f) It is clarified that in case of dematerialized Equity Shares, submission of the tender form and TRS to the Registrar is not required. After the receipt of the demat Equity Shares by the Clearing Corporation and a valid bid in the exchange bidding system, the Buyback shall be deemed to have been accepted for Eligible Shareholders holding Equity Shares in demat form.

g) The Eligible Shareholders will have to ensure that they keep the depository participant ("**DP**") account active and unblocked to receive credit in case of return of Equity Shares due to rejection or due to prorated Buyback decided by the Company. Further, Eligible Shareholders will have to ensure that they keep the bank account attached with the DP account active and updated to receive credit remittance due to acceptance of Buyback of shares by the Company. In the event if any equity shares are tendered to Clearing Corporation, excess dematerialized equity shares or unaccepted dematerialized equity shares, if any, tendered by the Eligible Shareholders would be returned to them by Clearing Corporation. If the security transfer instruction is rejected in the depository system, due to any issue then such securities will be transferred to the shareholder broker's depository pool account for onward transfer to the Eligible Shareholder. In case of custodian participant orders, excess dematerialized shares or unaccepted dematerialized shares, if any, will be refunded to the respective custodian depository pool account.

h) Eligible Shareholders who have tendered their demat shares in the Buyback shall also provide all relevant documents, which are necessary to ensure transferability of the demat shares in respect of the tender form to be sent. Such documents may include (but not limited to): (a) duly attested power of attorney, if any person other than the Eligible Shareholder has signed the tender form; (b) duly attested death certificate and succession certificate/legal heirship certificate, in case any Eligible Shareholder is deceased, or court approved scheme of merger/amalgamation for a company; and (c) in case of companies, the necessary certified corporate authorizations (including board and/or general meeting resolution).

i) In case the Equity Shares are held on repatriation basis, the Eligible Shareholder, being a Non-Resident Shareholder, should obtain and enclose a letter from its authorised dealer / bank confirming that at the time of acquiring such Equity Shares, payment for the same was made by such Eligible Shareholder, from the appropriate account as specified by RBI in its approval. In case the Eligible Shareholder, being a Non-Resident Shareholder, is not in a position to produce the said certificate, the Equity Shares would be deemed to have been acquired on non-repatriation basis, and in that case, the Eligible Shareholder shall submit a consent letter addressed to the Company, allowing the Company to make the payment on a non-repatriation basis in respect of the valid Equity Shares accepted under the Buyback.

13.12 Procedure to be followed by Eligible Shareholders holding Equity Shares in the Physical form:

In accordance with the SEBI Master Circular No. HO/38/13/(4)2026-MIRSD-POD/I/4298/2026 dated February 6, 2026, read with the SEBI Circular No. SEBI/HO/CFD/CMD1/CIR/P/2020/144 dated July 31, 2020, Eligible Shareholders holding Equity Shares in physical form can participate in the Buyback. The procedure is as below:

a) Eligible Shareholders who are holding Equity Shares in physical form and intend to participate in the Buyback will be required to approach their respective Seller Member(s) along with the complete set of documents for verification procedures to be carried out. Such documents include (i) the tender form duly signed (by all Shareholders in case shares are in joint names) in the same order in which they hold the shares (ii) original Equity Share certificate(s), (iii) valid share transfer form(s) i.e. Form SH-4 duly filled and signed by the transferors (i.e. by all registered Eligible Shareholders in same order and as per the specimen signatures registered with the Company) and duly witnessed at the appropriate place authorizing the transfer in favour of the Company, (iv) self-attested copy of the Eligible Shareholder's PAN card, (v) any other relevant documents such as, but not limited to, duly attested power of attorney, corporate authorization (including board resolution/ specimen signature), notarized copy of death certificate and succession certificate or probated will, if the original Eligible Shareholder has deceased, etc., as applicable. In addition, if the address of the Eligible Shareholder has undergone a change from the address registered in the Register of Members of the Company, the Eligible Shareholder would be required to submit a self-attested copy of address proof consisting of any one of the following documents: valid Aadhar Card, Voter Identity Card or Passport.

b) Based on the aforesaid documents, the Seller Member shall place the bid on behalf of the Eligible Shareholder who is holding Equity Shares in physical form and intend to tender Equity Shares in the Buyback using the Acquisition Window of the Stock Exchanges. Upon placing the bid, the Seller Member shall provide a TRS generated by the Exchange Bidding System to the Eligible Shareholder. The TRS will contain the details of order submitted such as folio number, Equity Share certificate number, distinctive number, number of Equity Shares tendered, etc.

c) The Seller Member/Eligible Shareholder is required to deliver the original Equity Share certificate(s) and documents (as mentioned in paragraph (a) above) along with the TRS either by registered post or courier or hand delivery to the Registrar, i.e. Niche Technologies Private Limited, at the address mentioned at paragraph 16 below or the collection centre of the Registrar details of which will be included in the letter of offer within 2 (two) days of bidding by the Seller Member and the same should reach not later than the Buyback closing date. The envelope should be super-scribed as "**Genus Power Infrastructures Limited – Buyback Offer 2026-27**". One copy of the TRS will be retained by the Registrar and it will provide acknowledgement of the same to the Seller Member/Eligible Shareholder.

d) Eligible Shareholders holding physical Equity Shares should note that physical Equity Shares will not be accepted unless the complete set of documents is submitted. Acceptance of the physical Equity Shares for the Buyback shall be subject to verification as per the Buyback Regulations and any further directions issued in this regard. The Registrar will verify such bids based on the documents submitted on a daily basis and all such time the Stock Exchanges shall display such bids as 'unconfirmed physical bids'. Once the Registrar confirms the bids, it will be treated as 'Confirmed Bids'.

e) In case any Eligible Shareholder has submitted Equity Shares in physical form for dematerialization, such Eligible Shareholders should ensure that the process of getting the Equity Shares dematerialized is completed well in time so that they can participate in the Buyback before the closure of the tendering period of the Buyback.

f) An unregistered shareholder holding Equity Shares in physical form may also tender their Equity Shares in the Buyback by submitting the duly executed transfer deed for transfer of shares, purchased prior to the Record Date, in their name, along with the offer form, copy of their PAN card and of the person from whom they have purchased shares and other relevant documents as required for transfer, if any.

g) In case the Equity Shares are held on repatriation basis, the Eligible Shareholder, being a Non-Resident Shareholder, should obtain and enclose a letter from its authorised dealer / bank confirming that at the time of acquiring such Equity Shares, payment for the same was made by such Eligible Shareholder, from the appropriate account as specified by RBI in its approval. In case the Eligible Shareholder, being a Non- Resident Shareholder, is not in a position to produce the said certificate, the Equity Shares would be deemed to have been acquired on non-repatriation basis, and in that case, the Eligible Shareholder shall submit a consent letter addressed to the Company, allowing the Company to make the payment on a non-repatriation basis in respect of the valid Equity Shares accepted under the Buyback.

h) If any of the above stated documents (as applicable) are not enclosed along with the tender form, the Equity Shares tendered by Eligible Shareholders, being Non-Resident Shareholders, under the Buyback are liable to be rejected.

i) The Buyback from the Eligible Shareholders who are residents outside India including foreign corporate bodies (including erstwhile overseas corporate bodies), foreign portfolio investors, non-resident Indians, members of foreign nationality, if any, shall be subject to the Foreign Exchange Management Act, 1999 and rules and regulations framed thereunder, if any, Income Tax Act, 2025 and rules and regulations framed thereunder, as applicable, and also subject to the receipt/provision by such Eligible Shareholders of such approvals, if and to the extent necessary or required from concerned authorities including, but not limited to, approvals from the Reserve Bank of India under the Foreign Exchange Management Act, 1999 and rules and regulations framed thereunder, if any.

j) The reporting requirements for non-resident shareholders under Reserve Bank of India, Foreign Exchange Management Act, 1999, as amended and any other rules, regulations, guidelines, for remittance of funds, shall be made by the Eligible Shareholders and/ or the Stock Broker through which the Eligible Shareholder places the bid.

k) Modification/cancellation of orders and multiple bids from a single Eligible Shareholder will only be allowed during the tendering period of the Buyback. Multiple bids made by a single Eligible Shareholder for selling Equity Shares shall be clubbed and considered as "one bid" for the purposes of acceptance.

l) The cumulative quantity tendered shall be made available on the website of the Stock Exchanges throughout the trading sessions and will be updated at specific intervals during the tendering period.

14 METHOD OF SETTLEMENT

Upon finalization of the basis of acceptance as per Buyback Regulations:

a) The settlement of trades shall be carried out in the manner similar to settlement of trades in the secondary market.

b) The Company will pay the consideration (net of tax deducted at source) to the Company's Broker who will transfer the funds pertaining to the Buyback to the Clearing Corporation's bank accounts as per the prescribed schedule. For Equity Shares accepted under the Buyback, the Clearing Corporation will make direct funds payout to respective Eligible Shareholders. If the Eligible Shareholders' bank account details are not available or if the funds transfer instruction is rejected by Reserve Bank of India/Eligible Shareholders' bank due to any reason, then such funds will be transferred to the concerned Stock Broker's settlement bank account for onward transfer to such Eligible Shareholders in dematerialized form.

c) For the Eligible Shareholders holding Equity Shares in physical form, the funds pay-out would be given to their respective Seller Member's settlement accounts for releasing the same to the respective Eligible Shareholder's account

d) In case of certain client types, i.e., NRI, foreign clients, etc. (where there are specific RBI and other regulatory requirements pertaining to funds pay-out) who do not opt to settle through custodians, the funds pay-out would be given to their respective Seller Member's settlement accounts for releasing the same to the respective Eligible Shareholder's account. For this purpose, the client type details would be collected from the depositories, whereas funds payout pertaining to the bids settled through custodians will be transferred to the settlement bank account of the custodian, each in accordance with the applicable mechanism prescribed by Stock Exchanges and the Clearing Corporation from time to time.

e) Details in respect of shareholder's entitlement for tender offer process will be provided to the Clearing Corporations by the Company or Registrar to the Buyback. On receipt of the same, Clearing Corporations will cancel the excess or unaccepted blocked shares in the demat account of the shareholder. On settlement date, all blocked shares mentioned in the accepted bid will be transferred to the Clearing Corporations.

f) The Equity Shares bought back in the dematerialized form would be transferred directly to the demat account of the Company opened for the Buyback ("**Company Demat Account**") provided it is indicated by the Company's Broker or it will be transferred by the Company's Broker to the Company Demat Account on receipt of the Equity Shares from the clearing and settlement mechanism of the Stock Exchanges.

g) In relation to the physical Equity Shares: If physical Equity Shares tendered by Eligible Shareholders are not accepted, the share certificate would be returned to such Eligible Shareholders by registered post or by ordinary post or courier at the Eligible Shareholders' sole risk. The Company also encourages Eligible Shareholders holding physical shares to dematerialize their physical shares.

If, however, only a portion of the physical shares held by an Eligible Shareholder is accepted in the Buyback, then the Company is authorised to split the share certificate and issue a Letter of Confirmation ("**LOC**") in accordance with the SEBI Master Circular No. HO/38/13/(4)2026-MIRSD-POD/I/4298/2026 dated February 6, 2026, read with the SEBI Circular No. SEBI/HO/MIRSD/MIRSD_RTAMB/P/ CIR/2022/8 dated January 25, 2022 with respect to the new consolidated share certificate for the unaccepted Equity Shares tendered in the Buyback. The LOC shall be dispatched to the address registered with the Registrar and Transfer Agent ("**RTA**"). The RTA shall retain the original share certificate and deface the certificate with a stamp "**Letter of Confirmation Issued**" on the face/ reverse of the certificate to the extent of the excess physical shares. The LOC shall be valid for a period of 120 days from the date of its issuance, within which the Equity Shareholder shall be required to make a request to their depository participant for dematerializing the physical Equity Shares. In case the Equity Shareholder fails to submit the demat request within the aforementioned period, the RTA shall credit the physical Equity Shares to a separate demat account of the Company opened for the said purpose.

h) In the case of inter depository, Clearing Corporation will cancel the excess or unaccepted shares in target depository. Source depository will not be able to release the lien without a release of IDT message from target depository. Further, release of IDT message shall be sent by target depository either based on cancellation request received from Clearing Corporation or automatically generated after matching with bid accepted detail as received from the Company or the Registrar to the Buyback. Post receiving the IDT message from target depository, source Depository will cancel/release excess or unaccepted block shares in the demat account of the shareholder. Post completion of tendering period and receiving the requisite details viz., demat account details and accepted bid quantity, source depository shall debit the securities as per the communication/message received from target depository to the extent of accepted bid shares from shareholder's demat account and credit it to Clearing Corporation settlement account in target depository on settlement date.

i) The Seller Member(s) would issue contract note and pay the consideration for the Equity Shares accepted under the Buyback and return the balance unaccepted Equity Shares to their respective clients. The Company's Broker would also issue a contract note to the Company for the Equity Shares accepted under the Buyback.

j) Any excess physical Equity Shares pursuant to proportionate acceptance/ rejection will be returned to the Shareholders directly by Registrar to the Buyback. The Company is authorized to split the share certificate and issue new consolidated share certificate for the unaccepted Equity Shares in case the Equity Shares accepted by the Company are less than the Equity Shares tendered in the Buyback by the Equity Shareholders holding Equity Shares in the physical form.

k) Eligible Shareholders who intend to participate in the Buyback should consult their respective Seller Member for payment to them of any cost, applicable taxes, charges and expenses (including brokerage) that may be levied by the Seller Member upon the selling shareholders for tendering Equity Shares in the Buyback (secondary market transaction). The Buyback consideration received by the Eligible Shareholder from their respective Seller Member, in respect of accepted Equity Shares, could be net of such costs, applicable taxes, charges and expenses (including brokerage) and the Company accepts no responsibility to bear or pay such additional cost, charges and expenses (including brokerage) incurred solely by the Eligible Shareholders.

l) The lien marked against unaccepted Equity Shares will be released, if any, or would be returned by registered post or by ordinary post or courier (in case of physical shares) at the Eligible Shareholders' sole risk. Eligible Shareholders should ensure that their depository account is maintained till all formalities pertaining to the Offer are completed.

m) The Equity Shares lying to the credit of the Special Demat Account and the Equity Shares bought back and accepted in physical form will be extinguished in the manner and following the procedure prescribed in the Buyback Regulations.

15 COMPLIANCE OFFICER

The Company has appointed Mr. Puran Singh Rathore as the compliance officer for the purpose of the Buyback ("**Compliance Officer**"). Investors may contact the Compliance Officer of the Company for any clarifications or to address their grievances, if any, during office hours i.e. 10.00 a.m. to 5.00 p.m. on all working days except Saturday, Sunday and public holidays, at the following address:

Notes :

1 The above Unaudited Financial Results for the quarter and year to date ended September 30, 2026 have been reviewed by the Audit Committee and approved by the Board of Directors at its meeting held on October 26, 2026. The same were subject to Limited Review by the joint Statutory Auditors of the Company who have issued an unmodified conclusion on the Financial Results.

2 Pursuant to Insurance Regulatory and Development Authority of India (Actuarial, Finance and Investment Functions of Insurers) Regulation, 2024, the actuarial valuation of liabilities in respect of claims Incurred But Not Reported (IBNR) and claims Incurred But Not Enough Reported (IBNER) and Premium Deficiency Reserve (PDR) as at September 30, 2026, have been duly certified by the Consulting Actuary. As per the Certificate, the assumptions considered by him for valuation of liabilities as at September 30, 2026 are in accordance with the guidelines issued by IRDAI and the Actuarial Practice Standards issued by the Institute of Actuaries of India.

3 The Board of Directors of the Company at its meeting held on March 12, 2025, approved the execution of Share Purchase Agreement ("SPA") with respect to the proposed transfer of equity shares by Sanoti Properties LLP, Celica Developers Private Limited, Jaguar Advisory Services Private Limited, Mr. Keki Mistry, Atul DP Family Trust, Shahi Sterling Exports Private Limited, QRG Investments and Holdings Limited and such other employee shareholders (collectively referred to as "Sellers") to Patanjali Ayurved Limited, S.R. Foundation, RITI Foundation, RR Foundation, Suruchi Foundation and Swati Foundation (collectively referred to as "Buyers") at a fair value as set out in the valuation report(s) issued by the Registered Valuer and Category I - Merchant Banker.

Pursuant to the SPA and subject to the terms and conditions thereof, the Buyers propose to acquire such number of equity shares of the Company from the Sellers which will result in the Buyers holding approximately 98% (on a fully diluted basis) of the Company's total issued and paid-up equity share capital.

The proposed acquisition is approved by Insurance Regulatory and Development Authority of India, Competition Commission of India and Debenture Holders of the Company. The IRDAI approval is valid until October 27, 2026.

Vide communication dated October 22, 2026, Buyers have written to IRDAI, under intimation to the Company, seeking extension of the above timeline.

4 Figures of previous period / year and year to date have been regrouped / rearranged / reclassified, wherever necessary, to conform to current period's classification.

STATUTORY ADVERTISEMENT IN COMPLIANCE OF PART II (A) (5) OF SECURITIES AND EXCHANGE BOARD OF INDIA ("SEBI") MASTER CIRCULAR NO. SEBI/HO/CFD/POD-2/P/CIR/2023/93 DATED JUNE 20, 2023 ("SEBI MASTER CIRCULAR") READ WITH RULE 19 (7) OF THE SECURITIES CONTRACTS (REGULATION) RULES, 1957 ("SCRR") PURSUANT TO GRANT OF RELAXATION BY SEBI FROM THE APPLICABILITY OF RULE 19(2)(b) OF SCRR.

ABOUT THE COMPANY AND SCHEME OF ARRANGEMENT

Ennature Bio Pharma Limited ("the Company") was incorporated as "Ennature Bio Pharma Private Limited" on October 01, 2021 under the Companies Act, 2013, in the state of Uttarakhand. Subsequently, on December 04, 2024 the name of our Company was changed to its current name "Ennature Bio Pharma Limited" upon its conversion to a public limited company. The Corporate Identification Number of our Company is U24290UR2021PLC013005.

The Company in its Board meeting dated May 16, 2025 approved the Scheme of Arrangement amongst India Glycols Limited ("Demerged Company"), Ennature Bio Pharma Limited ("Resulting Company 1") and IGL Spirits Limited ("Resulting Company 2") and their respective shareholders ("Scheme/ Scheme of Arrangement"). The said scheme of arrangement was sanctioned by Hon'ble National Company Law Tribunal, Allahabad Bench ("NCLT") vide its order dated July 17, 2026 (a certified copy of which was received on August 20, 2026). Pursuant to Part-II of the Scheme of Arrangement, the Biopharma Undertaking of the Demerged Company was demerged and transferred to and vested in Resulting Company 1, on a going concern basis, with effect from the Appointed Date (i.e. April 1, 2026), in accordance with relevant provisions of the Companies Act, 2013. The Effective Date in relation to the Scheme of Arrangement is September 01, 2026. Further, the Board of Directors of the Company in its Meeting held on September 08, 2026 has allotted 2,23,42,255 (Two Crores Twenty-Three Lakhs Forty-Two Thousand Two Hundred Fifty Five) Equity Shares of INR 5/- each to eligible equity shareholders of the Demerged Company as per their entitlement on September 02, 2026 (Record Date), as per Clause 7.1 of Part-II of the Scheme of Arrangement, the Equity Shares of our Company subject to applicable regulations shall be listed and admitted to trading on the BSE Limited ("BSE") and National Stock Exchange of India Limited ("NSE")

A. Name Change: Incorporated as "Ennature Bio Pharma Private Limited", pursuant to a certificate of incorporation dated October 01, 2021. Subsequently, on December 04, 2024 the name of our Company was changed to its current name "Ennature Bio Pharma Limited" upon its conversion to a public limited company. Since then, the Company has not changed its name.

B. Object Change: There has been no change in the main objects of the Company since its incorporation. The main objects of the Company, as stated in its constitutional documents, are set out in the Information Memorandum, available on the websites the Company at (https://ennaturebiopharma.com/).

H. BUSINESS MODEL/BUSINESS OVERVIEW AND STRATEGY

Business Overview

Our Company was incorporated on October 01, 2021 and is a part of the India Glycols Group. Our Company is engaged in the development and manufacture of value-added, plant-based ingredients for the pharmaceutical, nutraceutical and allied industries.

Operations are focused on developing and manufacturing active pharmaceutical ingredients ("APIs"), branded nutraceutical ingredients, standardized botanical extracts and specialty natural ingredients for use across pharmaceutical, healthcare and wellness applications. The product portfolio comprises plant-derived and specialty ingredients intended to address evolving customer requirements across domestic and international markets.

As a part of the India Glycols Group, the business leverages manufacturing capabilities, process know-how and operational experience developed across bio-based and specialty manufacturing operations. This supports continued focus on technology-led manufacturing, product development and sustainable operating practices.

The business integrates extraction, purification, formulation and manufacturing capabilities for development of ingredients intended for regulated pharmaceutical applications as well as nutraceutical and wellness markets.

Key Product Segments

The Company's product portfolio comprises the following product segments:

I. Active Pharmaceutical Ingredients (APIs) - Operations include the development and manufacture of select plant-based active pharmaceutical ingredients intended for use in pharmaceutical formulations and therapeutic applications. Products are manufactured through controlled processes and quality systems designed to support consistency and compliance with applicable regulatory requirements.

II. Branded Nutraceutical Ingredients - The Company develops branded nutraceutical ingredients, backed by science intended for use across dietary supplements, preventive healthcare and wellness applications. Product development activities are supported through formulation and ingredient development capabilities focused on enhancing ingredient functionality and application suitability. Certain proprietary technology platforms are utilised to support product differentiation and delivery performance.

III. Standardized Botanical Extracts - The Company manufactures botanical extracts standardized for identified bioactive compounds for use across, nutraceutical and related applications. Manufacturing processes are designed to support consistency, purity and reproducibility of ingredient characteristics.

IV. Nicotine and Derivatives - The product portfolio includes manufacture of high-purity nicotine ingredients and related derivatives intended for pharmaceutical and related applications, including nicotine replacement therapies and other specialised applications.

I. RATIONALE FOR SCHEME OF ARRANGEMENT

The Demerged Company is a leading green chemical company. It has grown manifold over a number of years and currently houses four segments, namely, bio-based specialties and performance chemicals, potable spirits, ennature biopharma and bio-fuel. Given its diversified business, it has become imperative for the Demerged Company to reorient and reorganize itself in a manner that allows imparting greater focus on each of its businesses. With this repositioning, the Demerged Company is desirous of enhancing its operational efficiency. It will continue with its bio-based specialties and performance chemicals business. While each of the above businesses may be subject to industry specific risks, business cycles and operate inter alia under different market dynamics, they have a significant potential for growth and profitability.

The Scheme proposes to reorganise and segregate the shareholdings of Demerged Company in various businesses and thus proposes the demerger of Spirits and Biofuel Undertaking and Biopharma Undertaking from Demerged Company to the Resulting Companies. The demerger of the Demerged Undertakings from the Demerged Company to the Resulting Companies will result in the equity shares of the Resulting Companies (as defined below) becoming listed on the National Stock Exchange Limited and BSE Limited, with the Resulting Companies focussing exclusively on their respective undertakings and capable of independent valuation and participation therein by any suitable investor interested in such businesses, in the future.

The proposed restructuring pursuant to this Scheme is expected, inter alia, to result in following benefits:

(i) Segregation and unbundling of the Spirits and Biofuel Undertaking and Biopharma Undertaking of the Demerged Company into the Resulting Companies will offer the following benefits:

a. Each business will have a clear focus, leading to improved management and resource allocation for growth.

b. The demerger will enable independent growth for each business, attracting the right talent, offering better opportunities for employees.

c. The demerger may create a potential to unlock value for stakeholders by drawing focused investors.

d. Each business will manage its capital, investments, and resources based on its specific needs, ensuring more efficient capital use.

e. Each business will adhere to regulations that are specific to its industry.

f. Separating the businesses will reduce the risk of one business affecting the others.

(ii) The proposed restructuring is in the interest of the shareholders, creditors, employees, and other stakeholders in each of the companies.

J. RESTATED AUDITED FINANCIALS FOR THE PREVIOUS THREE FINANCIAL YEARS PRIOR TO THE DATE OF LISTING

(In INR, in Lacs)

Particulars	Stub-Period ended on 30.06.2026*	FY 2025-26	FY 2024-25	FY 2023-24

The copy of the Audited Financial Statements of the abovementioned group companies are available at the website of the Company at https://www.indiaglycols.com/.

P. Internal Risk Factors

1. Regulatory Approval and Compliance Risks

Our operations are subject to various regulatory approvals, registrations, licences, permits and inspections from governmental and regulatory authorities. We are required to comply with a broad range of applicable laws, regulations, guidelines and standards governing our manufacturing, research, storage, quality control, environmental management and business operations. Such approvals and licences are subject to periodic renewal, review and ongoing compliance obligations.

Any failure on our part to obtain, renew, maintain or comply with the conditions attached to such approvals, whether due to internal procedural lapses, non-compliance, deficiencies identified during inspections, inadequate documentation or failure to implement corrective actions in a timely manner, may result in suspension, cancellation or delay in obtaining such approvals. Any such event could disrupt our operations, impact production schedules, restrict our ability to manufacture or sell products and adversely affect our business continuity, reputation, financial condition and results of operations.

2. Supply Chain and Raw Material Risks

Our manufacturing operations depend upon the timely procurement and availability of specialised raw materials, intermediates, chemicals, solvents and other inputs that meet prescribed quality standards and specifications. The availability of such materials is critical for maintaining uninterrupted production schedules and meeting customer requirements.

Any disruption in the supply of raw materials due to procurement delays, quality issues, supplier performance concerns, inventory management deficiencies, transportation delays or internal procurement inefficiencies may adversely affect our production planning and operational efficiency. In addition, fluctuations in the availability or quality of raw materials may increase procurement costs, reduce manufacturing efficiency and impact our ability to fulfil customer requirements within stipulated timelines. Any such disruption may adversely affect our business, financial condition and results of operations.

3. Health, Safety and Environmental Compliance Risks

Our operations involve the handling, processing, storage and disposal of biological materials, chemicals, solvents and other substances that may pose health, safety or environmental risks if not managed appropriately. Accordingly, we are required to maintain comprehensive health, safety and environmental management systems and comply with applicable environmental, occupational health and industrial safety regulations.

Any failure in our internal health, safety or environmental management systems, including deficiencies in operational controls, employee training, monitoring mechanisms or emergency response procedures, may result in workplace accidents, injuries, environmental incidents, contamination events or regulatory non-compliance. Such incidents may expose us to penalties, legal liabilities, remediation costs, operational disruptions and reputational damage, which could adversely affect our business, financial condition and results of operations.

4. Manufacturing and Process Control Risks

The manufacture of Active Pharmaceutical Ingredients ("APIs") and nutraceutical ingredients involves complex, multi-stage and highly sensitive production processes requiring strict adherence to established process parameters, manufacturing specifications and quality standards.

Any deviation from prescribed manufacturing processes, contamination of raw materials or finished products, equipment malfunction, process failure, operator error, utility interruption or inadequacy in manufacturing controls may result in batch failures, reduced yields, production losses, product recalls or rejection of products by customers or regulatory authorities. In addition, any failure to consistently maintain required manufacturing standards may expose us to regulatory scrutiny, penalties, suspension of operations, contractual liabilities and third-party claims, which could adversely affect our business, financial condition and results of operations.

5. Storage, Handling and Inventory Management Risks

Certain raw materials, chemicals and inputs used in the manufacture of our products require specialised storage conditions, controlled handling procedures and continuous monitoring due to their flammable or sensitive nature. Effective inventory management is essential to preserve product quality, minimise losses and ensure compliance with applicable safety and regulatory requirements.

Any leakage, pilferage, evaporation loss, deterioration, contamination, improper storage, mishandling during transportation or deficiencies in inventory control systems may result in loss of materials, increased operating costs, production disruptions or non-compliance with regulatory requirements. In addition, accidents or incidents arising from improper handling or storage of such materials may expose us to financial losses, liabilities and regulatory action. Any such event may adversely affect our business, financial condition and results of operations.

6. Capacity Utilisation and Facility Management Risks

Our financial performance is dependent upon the efficient utilisation and management of our manufacturing facilities, laboratories, research infrastructure and other operational assets. The profitability of our operations is influenced by our ability to optimise production capacity, maintain operational efficiency and effectively manage fixed costs associated with such facilities.

Any under-utilisation of manufacturing capacity, operational inefficiencies, equipment downtime, maintenance-related issues, inadequate production planning or sub-optimal deployment of resources may adversely impact productivity and operating margins. In addition, any inability to effectively manage facility operations or achieve anticipated utilisation levels may result in lower returns on invested capital and adversely affect our financial performance and growth prospects.

7. Quality Assurance and Data Integrity Risks

Maintaining robust quality assurance systems, quality control procedures and data integrity standards is critical to our business and regulatory compliance obligations. Our operations require accurate documentation, reliable testing procedures, proper maintenance of records and adherence to established quality management systems throughout the manufacturing process.

Any deficiencies in our quality assurance framework, quality control processes, laboratory practices, documentation systems or data management procedures may result in inaccurate records, non-compliance observations, regulatory actions, product quality concerns or customer complaints. Further, any failure to maintain the integrity, reliability, traceability or accuracy of manufacturing and testing data may adversely impact our regulatory standing, customer confidence and acceptance of our products in the market. Such events could result in operational disruptions, product recalls, loss of business opportunities and reputational harm.

8. Intellectual Property Management Risks

Our business relies on proprietary manufacturing processes, technical know-how, product development capabilities, confidential information and intellectual property assets. Effective identification, protection, management and enforcement of intellectual property rights are important for maintaining our competitive position and supporting future growth initiatives.

Any failure to adequately protect our intellectual property, maintain confidentiality of proprietary information, monitor potential infringements or effectively manage intellectual property-related matters may result in loss of competitive advantage, unauthorised use of our proprietary processes or erosion of business opportunities. Further, any weakness in our intellectual property management systems may affect our ability to commercialise innovations, expand into new markets or sustain long-term growth. Such events may adversely affect our business prospects, competitiveness and financial performance.

Q. OUTSTANDING LITIGATIONS AND DEFAULTS OF THE TRANSFEREE ENTITY, PROMOTERS, DIRECTORS OR ANY OF THE GROUP COMPANIES

A summary of pending criminal proceedings, taxation proceedings, actions taken by statutory or regulatory authorities and other material litigation proceedings involving us, our Directors, our Promoters and our Group Companiesis set out below:

NOTICE

TRANSFER OF UNCLAIMED DIVIDEND AND EQUITY SHARES OF THE COMPANY TO INVESTOR EDUCATION AND PROTECTION FUND (IEPF)

Shareholders are hereby informed that pursuant to the provisions of Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 ("the Rules"), as amended, the Final Dividend declared for the financial year 2018-19, which remained unclaimed for a period of seven years will be credited to the IEPF on February 27, 2027. The corresponding shares on which dividends were unclaimed for seven consecutive years will also be transferred as per the procedure set out in the Rules.

In compliance with the rules, individual notices are being sent to all the concerned shareholders whose shares are liable to be transferred to IEPF as per the aforesaid Rules, the full details of such shareholders are made available on the Company's Website: **https://www.vedavaag.com**

In this connection, please note the following:

1)In case you hold shares in physical form: Duplicate share certificate(s) will be issued and transferred to IEPF. The original share certificate(s) registered in your name(s) and held by you, will stand automatically cancelled.

2)In case you hold shares in electronic form: Your demat account will be debited for the shares liable for transfer to the IEPF.

In the event of valid claim is not received on or before February 27, 2027, the Company will proceed to transfer the liable dividend and Equity shares in favour of IEPF authority without any further notice. Please note that no claim shall lie against the Company in respect of unclaimed dividend amount and shares transferred to IEPF pursuant to the said rules. It may be noted that the concerned shareholders can claim the shares and dividend from IEPF authority by making an application in the prescribed Form IEPF-5 online after obtaining Entitlement letter from the Company.

For any queries on the above matter, shareholders are requested to contact the Company's Registrar and Share Transfer Agent, M/s. Venture Capital & Corporate Investments Private Limited Plot No. 3, Sagar Society, Road No. 2, Banjara Hills, Hyderabad - 500034, Contact No.: 040-23818475/23868257/35164940

NOTICE TO SHAREHOLDERS

SPECIAL WINDOW FOR RE-LODGEMENT OF TRANSFER REQUESTS IN RESPECT OF PHYSICAL SHARES

The Securities and Exchange Board of India ("SEBI"), vide Circular No. HO/38/13/11(2)/2026-MIRSD-POD/I/3750/2026 dated January 30, 2026, has opened a special window for a period of one year, from **February 5, 2026 to February 4, 2027**, for re-lodgement of transfer requests pertaining to physical shares.

This facility is available only in respect of transfer deeds that were lodged prior to April 1, 2019 and were subsequently rejected, returned, or left unprocessed due to deficiencies in documentation or non-compliance with procedural requirements.

One of the mandatory requirements for availing this special window is the submission of the original share certificate(s). The eligibility criteria are as follows:

Execution Date of Transfer Deed	Lodged for transfer before 1st April, 2019?	Original Security Certificate Available?	Eligible to lodge in the current window?
Before April 01, 2019	No (it is fresh lodgement)	Yes	✓
Before April 01, 2019	Yes (it was rejected/ returned earlier)	Yes	✓
Before April 01, 2019	Yes	No	✗
Before April 01, 2019	No	No	✗

Further, the following cases will **not** be considered under this window:

- Cases involving disputes between the transferor and transferee.
- Securities that have already been transferred to the Investor Education and Protection Fund (IEPF).

Shares re-lodged under this special window will be processed only in dematerialised form. Further, such shares will be subject to a lock-in period of one year from the date of registration of transfer. During the lock-in period, the shares cannot be transferred, pledged, or otherwise encumbered.

Eligible shareholders are requested to avail themselves of this opportunity by submitting the original share certificate(s), together with the requisite documents, to the Company's Registrar and Share Transfer Agent ("RTA"), KFin Technologies Limited (Unit: E.I.D.-Parry (India) Limited), at: **KFin Technologies Limited**, Selenium Tower B, Plot Nos. 31 & 32, Gachibowli, Financial District, Nanakramguda, Hyderabad - 500 032

For any queries, shareholders may contact the RTA at Toll-Free No. **1800-309-4001 or** email**: einward.ris@kfintech.com.**

The requisite documents must be submitted on or before February 4, 2027, in accordance with the aforesaid SEBI Circular.

No requests for re-lodgement will be accepted after February 4, 2027.

NOTICE OF POSTAL BALLOT

Notice is hereby given that pursuant to the provision of Sections 108, 110 and other applicable provisions, if any, of the Companies Act, 2013 (**'Act'**), read with Rules 20 and 22 of the Companies (Management and Administration) Rules, 2014 (**'Rules'**), Secretarial Standard-2 on General Meetings (**'SS-2'**) issued by the Institute of Company Secretaries of India, Regulation 44 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (**'SEBI Listing Regulations'**) and in accordance with the guidelines prescribed by the Ministry of Corporate Affairs (**'MCA'**) for holding general meetings/conducting postal ballot process through electronic voting (remote e-voting) vide General Circular Nos. 14/2020 dated 8th April, 2020, 17/2020 dated 13th April, 2020, and subsequent circulars issued in this regard, the latest being General Circular No. 03/2025 dated 22nd September, 2025 (**'MCA Circulars'**) and other applicable laws and regulations, as amended from time to time (including any statutory modification(s) or re-enactment(s) thereof for the time being in force), Piramal Finance Limited *(Formerly known as Piramal Capital & Housing Finance Limited)* (**'the Company'**) is seeking approval of the Members of the Company by way of Postal Ballot, only through remote e-voting process, for the following special business:

Item No.	Resolution	Resolution Type
1	Appointment of Mr. Dinesh Kumar Khara (DIN: 06737041) as an Independent Director of the Company	Special Resolution

In accordance with the MCA Circulars, the Company has completed the dispatch of the Notice of the Postal Ballot along with the Explanatory Statement on Wednesday, 28th October, 2026 through electronic mode only to those Members whose names appear in the Register of Members/Register of Beneficial Owners and whose e-mail address are registered with the Company/Company's Registrar and Transfer Agent i.e., MUFG Intime India Private Limited *(formerly known as Link Intime India Private Limited)* (**'MUFG'**) / Depository Participants/ Depositories *as* on Friday, 23rd October 2026 (**'Cut-off Date'**). The Notice of Postal Ballot is also available on website of the Company i.e. www.piramalfinance.com, the website of Stock Exchanges www.bseindia.com & www.nseindia.com and on the website of e-service provider National Securities Depository Limited (**'NSDL'**) at www.evoting.nsdl.com. The members who have not received the Postal Ballot Notice may download the same from the above-mentioned websites.

In accordance with the provisions of MCA Circulars, the physical copies of the Notice of Postal Ballot have not been sent to the Members and Members can vote only through remote e-voting. A person who is not a Members as on the Cut-off date should treat the said Notice of Postal Ballot for information purposes only.

The Company has engaged the services of NSDL to provide remote e-voting facility to its Members. The detailed procedure for casting of votes through remote e-voting has been provided in the Notice of Postal Ballot. The remote e-voting facility will be available during the following period:

Commencement of remote e-voting period	9:00 a.m. IST on Friday, 30th October, 2026
Conclusion of remote e-voting period	5:00 p.m. IST on Saturday, 28th November, 2026

The remote e-voting facility will be disabled by NSDL immediately after 5.00 p.m. IST on Saturday, 28th November, 2026 and will be disallowed thereafter.

Only those Members whose names are recorded in the Register of Members/List of Beneficial Owners maintained by the Depositories as on the Cut-off date will be entitled to accord their ASSENT(FOR) or DISSENT (AGAINST) only through the remote e-voting system. Once vote on the resolution is cast, the Members will not be able to change it subsequently. Voting rights of the Members shall be in proportion to the equity shares held by them in the paid-up equity share capital of the Company as on Cut-off date.

The Members holding shares in electronic form and who have not updated their email address are requested to register/update the same in their demat account, as per the process advised by their respective Depository Participant. Members holding shares in physical form and who have not updated their email address are requested to register/update the same by writing to the Company's Registrar and Share Transfer Agent i.e. MUFG either by email at investor.helpdesk@in.mpms.mufg.com or by post at C-101, Embassy 247, LBS Marg, Vikhroli West, Mumbai - 400083.

The Board of Directors of the Company have appointed Mr. Bhaskar Upadhyay, Practicing Company Secretary (Membership No. FCS 8663/ C.P No. 9625), or failing him, Mr. Bharat Upadhyay, (Membership No. FCS 5436/ C.P No. 4457), Practicing Company Secretary of N. L. Bhatia & Associates, as the Scrutinizer, for conducting the remote e-voting process for the Postal Ballot in a fair and transparent manner.

The results of the remote e-voting will be announced on or before Monday, 30th November, 2026. The results along with the Scrutinizer's Report shall be uploaded on the website of the Company at www.piramalfinance.com and on the website of NSDL at www.evoting.nsdl.com. The results shall be simultaneously forwarded to the Stock Exchanges and will be displayed on the notice board of the Company at its Registered Office.

The Resolutions, if approved by requisite majority, shall be deemed to have been passed on Saturday, 28th November, 2026 i.e. the last day of remote e-voting.

In case of any queries, Members may write to the Company at corporate.secretarial@piramal.com. Further, for any queries or grievances pertaining to remote e-voting, Members are requested to contact Mr. Sagar S. Gudhate, Senior Manager at evoting@nsdl.com. Members can also refer the Frequently Asked Questions (FAQs) for Shareholders and e-voting user manual for Shareholders available at the download section of www.evoting.nsdl.com or call on toll free no(s).: 022-48867000 or send a request at evoting@nsdl.com.

NOTICE TO SHAREHOLDERS

Special Window for Transfer and Dematerialisation of Physical Securities

Pursuant to SEBI Circular No. HO/38/13/11(2)2026-MIRSD-POD/I/3750/2026 dated January 30, 2026, a special window has been opened by the Company, from February 05, 2026 to February 04, 2027, to facilitate transfer and dematerialisation of physical securities which were sold/purchased prior to April 01, 2019. The special window shall also be available for such transfer requests which were lodged prior to April 1, 2019 and were rejected/returned/not attended to due to deficiency in the documents/process/or otherwise.

During this period, the securities that are re-lodged for transfer (including those requests that are pending with the listed company/RTA, as on date) shall be issued only in demat mode. However, due process shall be followed for such transfer-cum- demat requests.

Shareholders who wish to avail the opportunity are requested to submit the original security certificate(s), transfer deed and all other documents listed in the Circular, to the Company's Registrar and Transfer Agent, i.e., MUFG Intime India Private Limited at Rasoi Court, 5th Floor, 20 Sir R. N. Mukherjee Road, Kolkata 700001, India (Unit: Ganges Securities Limited) to enable further processing and transfer of shares, in compliance with the applicable laws.

POSTAL BALLOT NOTICE AND E-VOTING INFORMATION

Notice is hereby given that pursuant to Section 108, 110 and other applicable provisions, if any, of the Companies Act, 2013 read with the Companies (Management and Administration) Rules, 2014, the Company has on October 27, 2026, sent the Postal Ballot Notice ("Notice"), only by e-mail, to all Members whose email IDs have been registered with the Depositories/Company as on the cut-off date i.e. Friday, October 23, 2026 ("Eligible Members").

The Notice is also available on the website of the Company - https://www.hdfclife.com/about-us/investor-relations, website of the Stock exchanges at www.bseindia.com and www.nseindia.com and the website of the remote e-voting service providing agency viz. KFin Technologies Limited ("KFintech") - https://evoting.kintech.com.

The Company is providing facility for voting remotely, only by electronic means ("e-voting"), to its Eligible Members, for seeking their approval on the resolution as specified in the Notice, in compliance with the Circulars/Guidelines issued by the Ministry of Corporate Affairs ("MCA Circulars") and Securities and Exchange Board of India, for approval of resolution as set out in the Notice.

In line with the MCA Circulars, physical copies of the Notice, along with postal ballot forms and pre-paid business envelope, have not been sent to any Member. Accordingly, the communication of the assent or dissent of the Members eligible to vote, is restricted only to remote e-voting i.e. by casting their votes electronically.

The e-voting facility will be available during the following period:

Commencement of e-voting period	9.00 a.m. (IST) Wednesday, October 28, 2026
Conclusion of e-voting period	5.00 p.m. (IST) Thursday, November 26, 2026
Cut-off date for eligibility to vote	Friday, October 23, 2026

The e-voting facility will be disabled by KFintech immediately after 5.00 p.m. (IST) on Thursday, November 26, 2026.

Any person who is not a shareholder of the Company as on cut-off date shall treat the Notice for information purpose only.

The instructions on the process of e-voting for Members holding shares in dematerialised and physical form as well as for Members who have not registered their email IDs, have been provided in the Notice.

Members holding shares in dematerialized mode are requested to register/update their KYC details including email address with the relevant Depository Participants. Members holding shares in physical form are requested to register/update their KYC details including email address by submitting duly filled and signed form ISR-1 alongwith relevant enclosures to Company's Registrar and Share Transfer Agent (RTA) KFintech at einward.ris@kfintech.com.

The Board of Directors of the Company has appointed Mr Vaibhav Dandawate and in his absence Ms Deepti Kulkarni, Partners of M/s. Makarand M. Joshi & Co., Practicing Company Secretaries, as the Scrutinizer to scrutinize the e-voting process in a fair and transparent manner.

The results of the Postal Ballot, along with the Scrutinizer's Report shall be announced within 2 working days from the conclusion of e-voting period, and shall be displayed at the registered office of the Company, and shall also be hosted on the Company's website at https://www.hdfclife.com/about-us/investor-relations and on KFintech's website www.evoting.kfintech.com and shall also be communicated to the stock exchanges.

All grievances related to e-voting shall be addressed to Mr. Anil Dalvi – KFintech, by sending e-mail to einward.ris@kfintech.com or call on Toll-free No.: 1800-309-4001. You may also send e-mail to the Company at investor.service@hdfclife.com for queries/ information.

POSTAL BALLOT NOTICE

[Pursuant to Section 110 of the Companies Act, 2013 read with Rule 22 of Companies (Management and Administration) Rules, 2014, as amended]

Members are hereby informed that, pursuant to Sections 108 and 110 of the Companies Act, 2013 (**"the Act"**) and other applicable provisions, if any, of the Act and Rule 20 and 22 of the Companies (Management and Administration) Rules, 2014 (**"Rules"**), as amended from time to time, read with General Circular No. 14/2020 dated April 8, 2020, General Circular No. 17/2020 dated April 13, 2020, and subsequent circulars issued in this regard, the latest being General Circular No. 03/2025 dated September 22, 2025 issued by the Ministry of Corporate Affairs (**"MCA"**) pertaining to holding of general meetings / conducting postal ballot process through voting by electronic means (**"Remote e-voting"**) [hereinafter referred to as **"MCA Circulars"**], Regulation 44 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, (**"SEBI Listing Regulations"**) including any statutory modification(s) or re-enactment(s) thereof for the time being in force, Secretarial Standard on General Meetings (**"SS-2"**) issued by the Institute of Company Secretaries of India and subject to other applicable laws and regulations, approval of Members of RBL Bank Limited (**"the Bank"**) is being sought by way of Postal Ballot through Remote e-voting for the below items of special business:

Sr. No.	Description of the Resolution	Type of Resolution
1.	To approve remuneration payable to Mr. R. Subramaniakumar (DIN: 07825083), Managing Director & CEO of the Bank	Ordinary Resolution
2.	To approve remuneration payable to Mr. Jaideep Iyer (DIN: 06384037), Executive Director of the Bank	Ordinary Resolution
3.	To approve payment of Variable Pay to Mr. Rajeev Ahuja (DIN: 00003545), Retired Executive Director of the Bank	Ordinary Resolution

The Bank has completed the dispatch of the Postal Ballot Notice (**"Notice"**) dated **October 26, 2026**, along with Explanatory Statement through electronic mode on **Tuesday, October 27, 2026**, to all those Members, whose email addresses are registered with the Bank or with the depository(ies) / depository participants and whose names appear in the Register of Members/list of beneficial owners as on **Friday, October 23, 2026**. A person who is not a Member as on Friday, October 23, 2026, should treat the Notice for information purpose only.

In terms of MCA Circulars as the voting is to be executed only by electronic means, the Physical copy of the Notice along with postal ballot forms and pre-paid business envelope has not been sent to the Members. Accordingly, the communication of the assent or dissent of the Members would take place through Remote e-voting only.

Members holding shares in physical or dematerialized form, as on the Cut-off date, being Friday, October 23, 2026, shall only be entitled to exercise their right to vote by electronic means on the items of business specified in the Postal Ballot Notice. The Bank has engaged the services of Central Depository Services (India) Limited (**"CDSL"**) to provide Remote e-voting facility to the Members. The voting rights of the Members shall be in proportion to the percentage of shares held by Members in the paid-up equity share capital of the Bank as on the Cut-off date. **The Remote e-voting period commences on Wednesday, October 28, 2026, 10:00 a.m. (IST) and ends on Thursday, November 26, 2026, 5:00 p.m. (IST)**. During this period, Members of the Bank holding shares either in physical form or in dematerialized form, as on the cut-off date may cast their vote. The e-voting shall not be allowed beyond aforesaid date and time and shall be disabled by CDSL. Once the vote on the resolution is cast by the Member, the same shall not be allowed to be changed subsequently.

Members holding shares in physical form are requested to register/update their KYC details including email address and bank details by submitting duly filled and signed Form ISR-1 along with such other documents as prescribed in the Form to the Registrar and Transfer Agents of the Bank (**"RTA"**) viz. M/s. MUFG Intime India Private Limited, C-101, Embassy 247, L.B.S. Marg, Vikhroli (West), Mumbai – 400083. Form ISR-1 is available on the website of the Bank at https://www.rbl.bank.in/investor-relations/corporate-governance/investors-awareness and on the website of RTA at www.in.mpms.mufg.com. For necessary guidance on the process for updation, the Members can also reach the RTA of the Bank by sending an email on Investor.helpdesk@in.mpms.mufg.com or upload KYC documents with e-sign on RTA's website at the link: https://web.in.mpms.mufg.com/KYC-downloads.html.

The Postal Ballot Notice is available on the Bank's website https://www.rbl.bank.in/investor-relations for download. The Postal Ballot Notice can also be accessed from the websites of the Stock Exchanges i.e. BSE Limited and National Stock Exchange of India Limited at www.bseindia.com and www.nseindia.com, respectively. The Postal Ballot Notice is also disseminated on the website of Central Depository Services (India) Limited (**"CDSL"**) (agency for providing the Remote e-Voting facility) i.e. www.evotingindia.com.

All grievances connected with the facility for voting by electronic means may be addressed to Mr. Rakesh Dalvi, AVP, CDSL, A Wing, 25th Floor, Marathon Futurex, Mafatlal Mill Compound, N M Joshi Marg, Lower Parel (East), Mumbai - 400013 or an email can be sent to helpdesk.evoting@cdslindia.com or call at toll free no. 1800 21 09911.

The Board of Directors of the Bank has appointed Mr. S N Viswanathan, Practicing Company Secretary (FCS: 13685), failing him, Ms. Aparna Gadgil, Practicing Company Secretary (ACS: 14713) of M/s. S. N. Ananthasubramanian & Co., Company Secretaries as the Scrutinizer to scrutinize the Remote e-voting process in a fair and transparent manner.

The results of Postal Ballot will be announced within two (2) working days of conclusion of Remote e-voting period at the Registered Office and Corporate Office of the Bank. The results of Remote e-voting as declared along with the Scrutinizer's Report(s) shall be intimated to the Stock Exchanges i.e. BSE Limited and National Stock Exchange of India Limited and the same shall be simultaneously published on the website of the Bank at https://www.rbl.bank.in/investor-relations and on the website of CDSL www.evotingindia.com.

ASK Investment Managers

PUBLIC NOTICE TO THE MEMBERS FOR 1st EXTRA-ORDINARY GENERAL MEETING OF ASK INVESTMENT MANAGERS LIMITED TO BE HELD THROUGH VIDEO CONFERENCE ("VC") / OTHER AUDIO VISUAL MEANS ("OAVM")

NOTICE is hereby given that the **1st Extra-Ordinary General Meeting ("EOGM")** of the Members of ASK Investment Managers Limited (the **"Company"**) for the financial year 2026-27 is scheduled to be held on **Thursday, 19th November 2026 at 12:30 P.M. (IST)** through Video Conferencing **("VC")** / Other Audio Visual Means **("OAVM")** facility, in compliance with the applicable provisions of the Companies Act, 2013 (the "Act") and the Rules thereunder, as amended from time to time, read with applicable circulars issued by the Ministry of Corporate Affairs ("MCA Circulars"), to transact the businesses set forth in the Notice of the EOGM (the "EOGM Notice"). The deemed venue of the EOGM shall be the Registered Office of the Company.

Dispatch of EOGM Notice and related information:

The EOGM Notice and other documents required to be attached thereto, have been emailed on **Tuesday, 27th October, 2026** to the members whose email addresses are registered with the Company / Registrar and Transfer Agent viz., MUFG Intime India Private Limited (the 'RTA') or their respective Depository Participant(s) (the **"DP"**) as on **Friday, 23rd October, 2026**. The EOGM Notice is also available on the website of the Company at www.askfinancials.com and National Securities Depository Limited (the **"NSDL"**) (agency for providing the Remote e-Voting facility) at www.evoting.nsdl.com.

E-Voting Facility

Pursuant to the provisions of Section 108 of the Act read with Rule 20 of the Companies (Management and Administration) Rules, 2014, the Company is providing its Members the facility to cast their vote by electronic means **(remote e-voting before the EOGM or e-voting during the EOGM)** through NSDL. The information and instructions including login credentials and password generation details for remote e-voting / e-voting are forming part of the EOGM Notice.

Members are requested to note the following key timelines:

Date of completion of dispatch of Notice	Tuesday, 27th October, 2026
Commencement of remote e-Voting	Monday, 16th November, 2026 at 09:00 A.M. (IST)
End of e-Voting*	Wednesday, 18th November, 2026 at 05:00 P.M. (IST)
Cut-off date for remote e-voting	Thursday, 12th November, 2026

* The remote e-voting module will be disabled by NSDL after **05:00 p.m (IST) on Wednesday, 18th November, 2026.**

E-Voting eligibility and participation guideline

Members holding shares as on the **cut-off date i.e. Thursday, 12th November, 2026,** are only entitled to cast their votes either remotely before the EOGM or during the EOGM through e-voting. Any person, who becomes a Member of the Company after dispatch of the Notice of EOGM and holding shares as on the cut-off date i.e. **Thursday, 12th November, 2026,** may obtain the login credentials and password by sending a request at evoting@nsdl.com. However, if the Member is already registered with NSDL for remote e-voting, then he / she can use his / her existing user id and password for casting his / her vote. If he / she has forgotten his / her password, he / she can reset the password by using **"Forgot User Details / Password"** option available on **www.evoting.nsdl.com** or call on +91-22-4886 7000. Members holding shares in demat mode may follow the steps mentioned in the EOGM Notice under **"Access to NSDL e-Voting system".** The same login credentials may also be used for attending the EOGM through VC / OAVM.

Members present at the meeting through VC / OAVM, who have not casted their votes through remote e-voting shall be eligible to vote through the e-voting system at the EOGM. Members who have cast their votes by remote e-voting prior to the EOGM may also attend the EOGM but shall not be entitled to cast their votes again. Once the vote on a resolution is cast by a member through remote e-voting, then such member shall not be allowed to change it subsequently or cast their votes again.

Scrutiniser's details

Mr. Mannish Ghia, (FCS 6252), Partner of M/s. Manish Ghia & Associates, Practicing Company Secretaries, has been appointed as the Scrutiniser to scrutinise the remote e-voting and e-voting at the EOGM in a fair and transparent manner.

The Members are requested to carefully read all the Notes set out in the EOGM Notice and in particular, instructions for joining and attending the EOGM through VC / OAVM, manner of casting vote through Remote e-voting and E-voting during the EOGM.

In case of queries or grievances pertaining to e-voting procedure, members may contact Ms. Prajakta Pawle, Deputy Manager at the designated email id viz. evoting@nsdl.com or call on 022-48867000 or write to NSDL on National Securities Depository Limited at T-301, 3rd Floor, Naman Chambers, G-Block, Plot No. C-32, Bandra Kurla Complex, Bandra East, Mumbai - 400051. Members may refer the Frequently Asked Questions (FAQs) and e-voting manual available at www.evoting.nsdl.com. Members may also write to the Company Secretary of the Company at cosec@askgroup.in or at the Registered Office Address given below.

NOTICE

NOTICE OF TRANSFER OF UNCLAIMED DIVIDEND OF THE COMPANY TO INVESTOR EDUCATION AND PROTECTION FUND (IEPF) AUTHORITY.

This Notice is published pursuant to the provisions of the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 notified by the Ministry of Corporate Affairs and as amended from time to time ("the Rules"). The Companies Act, 2013 and the Rules, inter-alia, contain provisions for transfer of all shares in respect of which dividend has not been paid or claimed for seven consecutive years or more in the name of Investor Education and Protection Fund (IEPF).

Adhering to various requirements set out in the Rules, individual communication is being sent to the concerned shareholders whose Equity shares are liable to be transferred to IEPF under the Rules for taking appropriate action. The Company has uploaded full details of such shareholders, including names, Folio Number or DP ID & Client ID and shares due for transfer to IEPF on its website. Shareholders concerned are requested to refer the Unpaid Dividend Tab in Investor Relations section of www.wonderla.com.

Kindly note that all the future benefits, dividend arising on such shares would also be credited to IEPF. Shareholders may also note that both unclaimed dividend and the shares transferred to IEPF including all benefits accruing on such shares, if any, can be claimed back by them from IEPF Authority after following the procedure prescribed by the Rules.

In case of shares held in dematerialised form, the Company shall inform the depository by way of Corporate Action, where the shareholders have their accounts for transfer in favour of IEPF Authority. Please note that the due date for claiming dividend is February 28, 2027. In case no valid claim in respect of Equity shares is received before the said date or extended date, the Company shall with a view to complying with the requirements set out in the Rules, transfer the shares to IEPF by the due date as per the procedure stipulated in the Rules. Please note that no claim shall lie against the Company in respect of unclaimed dividend amount and equity shares transferred to IEPF. The above information will also be available on the website of the Company. Shareholders concerned are requested to refer the Unpaid Dividend Tab in Investor Relations section of www.wonderla.com.

In case the shareholders have any queries on the subject matter, they may contact the Company/ Company's RTA at KFin Technologies Ltd, Selenium, Tower B, Plot No. 31 & 32, Financial District, Gachibowli, Hyderabad – 500032. Tel: 040 – 67162222, Email: einward.ris@kfintech.com Website: www.kfintech.com

Notes:

1 The unaudited financial results have been reviewed by the Audit Committee and subsequently approved by the Board of Directors of the Company at their respective meeting held on October 27, 2026. The financial results for the quarter and half year ended September 30, 2026 have been subject to limited review by the joint statutory auditors, pursuant to Regulation 52 of the Securities and Exchange Board of India ("SEBI") (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended and the Paragraph 7 of SEBI Master Circular for issue and listing of Non-convertible Securities, Securitised Debt Instruments, Security Receipts, Municipal Debt Securities and Commercial Paper (SEBI/HO/DDHS/DDHS-PoD/P/CIR/2025/0000000137) dated October 15, 2025.

2 The above is an extract of the detailed format of quarterly financial results filed with the Stock Exchanges under Regulation 52 of the LODR (Listing Obligations and Disclosure Requirements) Regulations, 2015. The full format of the audited financial results are available on the Stock exchange website (www.nseindia.com) and on Company's website.

3 For the other line items referred in regulation 52(4) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, pertinent disclosures have been made to the Stock Exchange(s) and can be accessed on the Stock Exchange Website (www.nseindia.com).

4 The Company has prepared these standalone and consolidated financial results in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS) prescribed under Section 133 of the Companies Act, 2013.

5 Figures of previous periods have been regrouped, wherever necessary, to make them comparable with the current period.

GOLD AUCTION CUM INVITATION NOTICE

The below mentioned borrower has been served with margin call notice to pay Margin amount towards the loan facility against gold ornaments ("Facility") availed by them from RBL Bank Limited. Since the borrower has failed to repay Margin amount under the Facility, we are constrained to conduct an auction of the pledged gold ornaments on dates mentioned in the below table.

In the event any surplus amount is realised from this auction, the same will be refunded to the concerned borrower and if there is a deficit post the auction, the balance amount shall be recovered from the borrower through appropriate legal proceedings. RBL Bank has the authority to remove following account from the auction without prior intimation. Further, RBL Bank reserves the right to change the Auction Date without any prior notice.

That the above named borrower(s) have failed to maintain the financial discipline towards their loan account (s) and as per books of accounts maintained in the ordinary course of business by the Company, Column D indicates the outstanding amount.

Due to persistent default in repayment of the Loan amount on the part of the Borrower(s) the above said loan account has been classified by the Company as Non Performing Asset (as on date in Column C) within the guidelines relating to assets classification issued by Regulating Authority. Consequently, notices under Sec. 13(2) of the Act were also issued to each of the borrower.

In view of the above, the Company hereby calls upon the above named Borrower(s) to discharge in full his / their liabilities towards the Company by making the payment of the entire outstanding dues indicated in Column D above including up to date interest, costs, and charges within 60 days from the date of publication of this notice, failing which, the Company shall be entitled to take possession of the Mortgaged Property mentioned in Column B above and shall also take such other actions as is available to the Company in law.

Please note that in terms of provisions of sub - Section (8) of Section 13 of the SARFAESI Act, "A borrower can tender the entire amount of outstanding dues together with all costs, charges and expenses incurred by the Secured Creditor only till the date of publication of the notice for sale of the secured asset(s) by public auction, by inviting quotations, tender from public or by private treaty. Further it may also be noted that in case Borrower fails to redeem the secured asset within aforesaid legally prescribed time frame, Borrower may not be entitled to redeem the property."

In terms of provision of sub-Section (13) of Section 13 of the SARFAESI Act, you are hereby prohibited from transferring, either by way of sale, lease or otherwise (other than in the ordinary course of his business) any of the secured assets referred to in the notice, without prior written consent of secured creditor.

Notes:
1. The above is an extract of detailed format of unaudited financial results for the quarter and half year ended 30th September 2026 filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The detailed unaudited financial results and this extract were reviewed and recommended by Audit Committee and approved by Board of Directors in their respective meeting held on 27th October 2026. The full format of the unaudited financial results are available on the Stock Exchanges websites (www.bseindia.com, www.nseindia.com) and on the Company's website (www.maraloverseas.com).
2. The Statutory Auditors have reviewed the results for the quarter and half year ended 30th September 2026 and issued an unqualified limited review report.
3. Effective 21st November 2025, the Government of India consolidated 29 existing labour regulations into 4 Labour Codes, referred to as the "New Labour Codes". The New Labour Codes have resulted in an increase in the provision for employee benefits on account of recognition of past service costs. Based on the requirements of the New Labour Codes and the relevant Accounting Standard, the Company has assessed and accounted for the estimated incremental impact of Rupees 59.83 Lakh as an Exceptional Item in the statement of profit and loss for the quarter ended 31st December 2025 and year ended 31st March, 2026.Upon notification of the related Rules to the New Labour Codes by the Central/State Government and any further clarification on other aspects of the New Labour Codes, the Company will evaluate and account for additional impact, if any, in subsequent periods.
4. The Company has no Subsidiary, Associate or Joint Venture company(ies), as on 30th September 2026.

NOTICE
(For attention of the Equity Shareholders of the Company)

A. SPECIAL WINDOW FOR TRANSFER AND DEMATERIALISATION OF PHYSICAL SECURITIES

Pursuant to SEBI circular No. HO/38/13/11(2)2026-MIRSD-POD/I/3750/2026 dated 30th January 2026, we bring it to your notice that a Special Window has been opened from **5th February 2026** to **4th February 2027**, to facilitate the transfer and dematerialization ('demat') of physical securities.

The Special Window is for re-lodgement of physical securities transfer and demat, which were sold/purchased prior to 1st April 2019. Shareholders are requested to refer to the details as prescribed by SEBI vide its circular dated 30th January 2026 for guidance on applying for transfer and dematerialisation of physical shares, available at the website of the Company at www.maraloverseas.com → Investor Relations → Disclosure under Regulation 46 of Listing Regulation, 2015 → Notice of Special Window for Transfer and Dematerialisation of Physical Securities.

B. UPDATION OF KYC BY SHAREHOLDERS

The shareholders may further note that the Company is reaching out to shareholders, with an emphasis to update their KYC, bank mandates, email id, nominee and contact information, etc. to enable them to claim their unpaid/unclaimed dividend in order to prevent their shares and dividend amount from being transferred to the IEPF. For any queries on the above matter or lodgement of documents, shareholders are requested to contact the Company's Registrar and Share Transfer Agent at 179-180, DSIDC Shed, 3rd Floor, Okhla Industrial Area, Phase - 1, New Delhi–110020, Phone No. 011-41406149–51, Email: helpdeskdelhi@mcsregistrars.com.

E-TENDER FOR CONVERSION OF SURPLUS SKIM MILK INTO SKIMMED MILK POWDER (IInd Call)

Online tenders for One Year (can be extended for further six months) are invited by Bhopal Sahakari Dugdha Sangha Maryadit, Bhopal for conversion of available surplus skim milk into Skimmed Milk Powder on work-charge basis. Dairy Plants having adequate milk conversion facilities & additional spare capacity may submit their rate offer on-line at **https://www.mptenders.gov.in** with complete technical details including existing product manufacture facilities, rates etc., thus strictly adhering to the details prescribed in the tender document. The cost of tender documents is Rs. 2000/- (Rupees Two Thousand Only). The location of a conversion dairy should be within 350 km. from Bhopal (M.P.).

The tender document can be obtained from the site of M.P. e-procurement **https://www.mptenders.gov.in** on remitting online payment. The detailed Tender Form can be seen (only for reference) at our H.O. **website : www.sanchibhopal.com.** Any Changes in tender documents will be notified on above websites only and not at any other sources/platforms, hence bidders are requested to visit the mentioned site regularly. The Chief Executive Officer Bhopal Sahakari Dugdh Sangh Maryadit has all rights to accept or reject any or all bids.

Date and time of tender form purchase online	Last date and time of tender bid submission online	Date and time of opening technical bid	EMD required
