Shareholders

Thank you, India.
Jio aapne banaya.

Today, we take a historic step forward.
At its heart is the trust of a nation.
A Jio that you have helped build.

Jio's journey has always been about more than a company.
It is about the possibilities of a connected India,
and the exciting future that lies ahead.

You have been part of making this history, and we look forward
to all that we will make possible together as a nation.

So that more dreams find their chance.
And a billion ambitions take India forward.

With love, from Jio.
Anant, Isha and Akash Ambani

THE ISSUE PRICE IS 111.90 TIMES THE FACE VALUE OF THE EQUITY SHARES

** Eligible Employees Bidding in the Employee Reservation Portion have been given a discount of ₹54 per Equity Share on the Issue Price.*

RISK TO INVESTORS

For details refer to the section titled "Risk Factors" section on page 30 of the Prospectus.

1. **Risk relating to telecommunication license and spectrum:** The unified licence for providing telecom services held by Reliance Jio Infocomm Limited ("RJIL") across circles in India is due for renewal in October 2033. Further, the spectrum held by RJIL is valid for a period of 20 years with the majority of the spectrum expiring between 2041 and 2042. Any inability to maintain or renew such licences or to successfully bid for any spectrum required for our operations, could have a material adverse impact on our business, financial condition and results of operations.
2. **Dependence on Reliance Industries Limited, Reliance Retail Limited and other Reliance Group entities:** The Company and its subsidiaries have entered into various non-exclusive agreements with the Promoter, Reliance Retail Limited, a subsidiary of the Promoter and other Reliance Group entities for certain key aspects of the business. Disruption of these arrangements could significantly impact our business, financial condition and results of operations. The following table provides an overview of our significant transactions with the Promoter, Reliance Retail Limited and Sanmina-SCI India Private Limited, for the periods/Fiscals indicated.

Particulars	Parent[1]/ fellow subsidiary / joint venture of the Parent	Three months ended June 30,		Fiscal		
		2026	2025	2026	2025	2024
		(in ₹ million, unless otherwise indicated)

Total Expenses (W)		297,708	261,350	1,094,060	942,057	813,674

Notes:

[1] *Parent, in this table, means the Promoter.*

[2] *Recharge vouchers sold to Reliance Retail Limited are accounted as 'Advance against services' which is disclosed as a related party transaction under the head 'Revenue received in advance'. When Reliance Retail Limited or its distributor/ sub-distributor further sells the vouchers to our customers by way of recharge to the digital connectivity services, RJIL recognises such transfer as 'Deferred revenue' and thereafter, based on the type of tariff plan, it is accounted as operating revenues in the profit & loss account. In light of the above, revenue received in advance has not been presented as a percentage of revenue from operations.*

[3] *Cash Capex refers to the cash outflow towards expenditure for property, plant and equipment, spectrum and other intangible assets less proceeds from disposal of property, plant and equipment and other intangible assets.*

3. **Dependency on Reliance Retail Limited for distribution of prepaid connectivity services:** RJIL has a master distribution agreement and a master collection agreement with RRL. RRL is the sole distributor of our pre-paid connectivity services. Our revenue from pre-paid connectivity services constituted 76.37%, 77.88%, 77.08%, 78.57% and 79.35% of our consolidated Revenue from Operations for the three months period ended June 30, 2026, June 30, 2025 and Fiscals 2026, 2025 and 2024, respectively. Any disruption in this relationship or distribution channel could adversely impact our business, financial condition and results of operations. The following table provides the details of the Revenue Received in Advance attributed to the above arrangement with RRL:

Particulars	Three months ended / As of June 30		Fiscal / As of March 31		
	2026	2025	2026	2025	2024
	(in ₹ million)				
Revenue Received in Advance	292,480	271,663	1,129,351	1,023,958	890,587

4. **Dependency on RJIL that contributes significantly to our Revenue from Operations, EBITDA and PAT and KPIs relating to digital connectivity services:** RJIL contributed significantly to our Revenue from Operations, EBITDA and PAT in periods / Fiscals as indicated below:

Fiscals / period	RJIL's revenue from operations (in ₹ million)	% of our consolidated Revenue from Operations	RJIL's EBITDA (in ₹ million)	% of our consolidated EBITDA	RJIL's profit after tax (in ₹ million)	% of our consolidated PAT
Three months ended June 30, 2026	342,121	87.34%	195,904	93.89%	71,669	92.31%
Three months ended June 30, 2025	308,821	88.15%	173,013	95.40%	67,110	94.39%
Fiscal 2026	1,288,714	87.74%	723,544	94.88%	281,732	93.76%
Fiscal 2025	1,141,413	89.02%	612,334	95.42%	247,948	94.97%
Fiscal 2024	1,001,194	91.38%	528,784	96.21%	204,656	95.53%

Note: The financial information of RJIL provided above is on a standalone basis.

Any material adverse impact on the business, financial conditions or results of operations of RJIL would have a corresponding material adverse impact on our consolidated business, financial condition and results of operations. Further, while we operate as a technology platform, our key operational indicators ("KPIs") are primarily pertaining to our digital connectivity services provided by RJIL and do not reflect the technology platform specific metrics. Our competitors may perform more favourably on certain operational or financial KPIs, which could affect our competitive position. For details of comparison of the KPIs of our Company with listed peers, see *"Basis for Issue Price - Comparison of KPIs with Listed Industry Peers"* on page 138 of the Prospectus

5. **Network, Infrastructure and Service Disruption Risk:** The uninterrupted performance, reliability and availability of our network, passive infrastructure, technology, products and services are critical to our operations and our ability to consistently deliver our digital services. Any disruption to our network, passive infrastructure and technology could impair our ability to ensure consistent performance and deliver uninterrupted customer experience, which could have a material adverse impact on our business, financial condition and results of operations, and could lead to increased churn in our customer base.
6. **Risk related to Technology change:** The connectivity industry is subject to rapid and continuous technological change, and our connectivity infrastructure faces the risk of technological obsolescence. If we are unable to respond to changes in technologies, including for instance, more competitive satellite-based broadband services and the evolving demands of our customers, we may face technological obsolescence, which would have a material adverse impact on our business, financial condition and results of operations.
7. **Risk relating to negative publicity of 'Jio' Brand:** The "Jio" trademark is owned by the Promoter, and we do not control the use of this trademark by other companies in the Reliance Group. Negative publicity arising from actions outside its control, inability to protect intellectual property or infringement claims could have a material adverse impact on our reputation, business, financial condition and results of operations.
8. **Dependency on a limited group of passive infrastructure service providers:** We rely on a limited set of passive infrastructure service providers for our operations. For instance, of the 360,537 Network Towers used by us for our operations, 174,451 Network Towers are owned by Summit Digitel Infrastructure Limited, as of June 30, 2026. Additionally, as of June 30, 2026, we rely on Jio Digital Fibre Private Limited, for substantially all our optic fibre network requirements (approximately 98%), aside from the last mile fibre network which is owned by RJIL. Any disruption in the availability of these passive infrastructure assets could have an adverse impact on our business, financial condition and results of operations.
9. **Cybersecurity, Data Privacy and Information Security Risk:** Our systems, platforms, network infrastructure, and the services provided by our Promoter and third-party technology partners are exposed to cybersecurity threats, security breaches, operational disruptions, and other technology-related risks. Any such incident or disruption could impair our operations, compromise data security, increase costs, expose us to regulatory and legal liabilities, and adversely affect our business, results of operations, financial condition, and reputation.
10. **Artificial Intelligence ("AI") and Machine Learning ("ML") Technologies Related Risk:** We rely on AI and ML technologies across our operations, including for network automation through our proprietary JioBrain platform, customer engagement and service delivery. The deployment of AI and ML technologies across our operations may not yield the desired results. Further, reliance on AI/ML technologies may expose us to inherent risks pertaining to algorithmic bias and model errors leading to inaccurate or biased outputs, which may cause reputational harm and adversely impact our business, financial condition and results of operations.
11. Our Price/Earning (P/E) ratio based on diluted EPS for Financial Year 2026 at the Issue Price is 33.31 as compared to the average industry peer group P/E ratio of 23.09, as of October 23, 2026.
12. Weighted Average Return on Average Net Worth for Financial Year ended 2026, 2025 and 2024 is 9.04%. Return on Average Net Worth for the three months ended June 30, 2026, and June 30, 2025 is 2.30% and 2.31% respectively (unannualized).
13. Weighted average cost of acquisition of all Equity Shares transacted in one year, 18 months and three years preceding the date of the Prospectus:

Period	Weighted average cost of Acquisition (in ₹)	Cap Price is 'X' times the weighted average cost of acquisition[#]	Range of acquisition price per Equity Shares: lowest price - highest price (in ₹)
Last one year / 18 months/ 3 years	N.A.	N.A.	N.A.

[#] *As certified by D T S & Associates LLP, Chartered Accountants (FRN 142412W/W100595), by way of their certificates dated October 14, 2026 (UDIN: 26136433YFEPPE7981) and October 24, 2026 (UDIN: 26136433GTZWRH2317)*

Note: No Equity Shares were transacted in the last one year, 18 months and three years preceding the date of the Prospectus.

14. The 19 BRLMs associated with the Issue have handled 164 public issues in the past three years, out of which 46 issues have closed below the issue price on the listing date

BID/ISSUE PERIOD

ANCHOR INVESTOR BIDDING OPENED AND CLOSED ON MONDAY, OCTOBER 19, 2026

BID/ISSUE OPENED ON WEDNESDAY, OCTOBER 21, 2026 | BID/ISSUE CLOSED ON FRIDAY, OCTOBER 23, 2026

The Issue was made in terms of Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended (**"SCRR"**), read with Regulation 31 of the SEBI ICDR Regulations. The Issue was made through the Book Building Process and in terms of Regulation 32(1) of the SEBI ICDR Regulations wherein not more than 50% of the Net Issue was made available for allocation on a proportionate basis to Qualified Institutional Buyers (**"QIBs"**) (**"QIB Portion"**) (provided that the Company, in consultation with the BRLMs, allocated such portion of the Issue not exceeding 60% of the QIB Portion to Anchor Investors and such allocation will be on a discretionary basis by the Company, in consultation with the BRLMs, in accordance with the SEBI ICDR Regulations (**"Anchor Investor Portion"**), and 40% of such Anchor Investor Portion was reserved as under: (i) 33.33% for domestic Mutual Funds, and (ii) 6.67% for Life Insurance Companies and Pension Funds, subject to valid Bids having been received from the domestic Mutual Funds, Life Insurance Companies and Pension Funds at or above the price at which allocation was made to Anchor Investors. Further, 5% of the Net QIB Portion was made available for allocation on a proportionate basis only to Mutual Funds, subject to valid Bids having been received at or above the Issue Price, and the remainder of the Net QIB Portion was made available for allocation on a proportionate basis to all QIB Bidders (other than Anchor Investors), including Mutual Funds, subject to valid Bids having been received at or above the Issue Price. Not less than 15% of the Net Issue was made available for allocation to Non-Institutional Investors (**"Non-Institutional Portion"**) of which one-third of the Non-Institutional Portion was made available for allocation to Bidders with an application size of more than ₹200,000 and up to ₹1,000,000 and two-thirds of the Non-Institutional Portion was made available for allocation to Bidders with an application size of more than ₹1,000,000 and under-subscription in either of these two sub-categories of Non-Institutional Portion may be allocated to Bidders in the other sub-category of Non-Institutional Portion in accordance with the SEBI ICDR Regulations, subject to valid Bids being received at or above the Issue Price. Further, not less than 35% of the Net Issue was made available for allocation to Retail Individual Investors, in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Issue Price. All Bidders (except Anchor Investors) were required to mandatorily participate in this Issue only through the Application Supported by Blocked Amount (**"ASBA"**) process and were required to provide details of their respective bank account (including UPI ID) in case of UPI Bidders in which the Bid Amount will be blocked by the Self Certified Syndicate Banks (**"SCSBs"**) or the Sponsor Banks, under the UPI Mechanism, as the case may be. Anchor Investors were not permitted to participate in the Anchor Investor Portion through the ASBA process. Further, Equity Shares will be allocated on a proportionate basis to (a) Eligible Employees applying under the Employee Reservation Portion, and (b) Eligible RIL Shareholders Bidding in the RIL Shareholders Reservation Portion, subject to valid Bids received from them at or above the Issue Price. For details, see **"Issue Procedure"** on page 539 of the Prospectus.

The bidding for Anchor Investors opened and closed on October 19, 2026. The Company received 212 applications from 129 Anchor Investors for 7,31,83,716 Equity Shares. The Anchor Investor Issue Price was finalized at ₹1,119 per Equity Share. A total of 7,24,74,066 Equity Shares were allocated under the Anchor Investor Portion aggregating to ₹81,09,84,79,854.

THE LEVEL OF SUBSCRIPTION SHOULD NOT BE TAKEN TO BE INDICATIVE OF EITHER THE MARKET PRICE OF THE EQUITY SHARES ON LISTING OR THE BUSINESS PROSPECTS OF JIO PLATFORMS LIMITED

Jio Platforms Limited has filed a prospectus dated October 24, 2026 with the RoC, SEBI, NSE and BSE. The Prospectus is made available on the website of SEBI at www.sebi.gov.in, on the websites of the Stock Exchanges, i.e. NSE at www.nseindia.com and BSE at www.bseindia.com, on the website of the Company at www.jio.com and on the respective websites of the BRLMs. Any potential investor should note that investment in equity shares involves a high degree of risk, and for details relating to such risk, please see the section titled **"Risk Factors"** page 30 of the Prospectus. Potential investors should not rely on the DRHP filed with SEBI and the Stock Exchanges for making any investment decision and should instead rely on the Prospectus, as filed with the RoC, for making investment decisions.

Any securities offered by the Company have not been and will not be registered under the United States Securities Act of 1933, as amended (**"U.S. Securities Act"**) or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States, or to, or for the account or benefit of, U.S. Persons (as defined in Regulation S under the U.S. Securities Act), except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. No securities may be offered or sold in any other jurisdiction, except in accordance with the applicable laws of such jurisdiction. Accordingly, any securities offered by the Company are being offered and sold only (i) within India, to Indian institutional, non-institutional and retail investors in compliance with the SEBI ICDR Regulations, (ii) within the United States only to persons reasonably believed to be "qualified institutional buyers" (as defined in Rule 144A under the U.S. Securities Act) in transactions exempt from the registration requirements of the U.S. Securities Act, and (iii) outside the United States to eligible investors in "offshore transactions" as defined in, and in reliance on, Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur. No public offering of securities is being made in the United States.

Saudi Contains Fire After Houthis Claim Attack on Oil Kingdom's Largest Refinery

Group also claims it attacked Saudi military aircraft, repelled move near Bab el-Mandeb

Saudi Arabia contained a fire near its biggest oil export terminal at Ras Tanura on the Persian Gulf following an attack in the region, a person with knowledge of the matter said.

The blaze occurred during the early hours of Tuesday near facilities operated by state producer Saudi Aramco, the person said, asking not to be identified because the matter is private. The extent of the damage wasn't immediately clear.

The company's press office and the kingdom's Energy Ministry didn't immediately respond to requests for comment.

Yemen's Iran-aligned Houthis said on Tuesday they had hit Saudi Arabia's Ras Tanura oil refinery, the biggest in the kingdom, with a ballistic missile. The Houthis also said they had attacked Saudi military aircraft and repelled an advance by Saudi-backed forces near the Bab el-Mandeb Strait, an important Red Sea shipping route. Ras Tanura, located in the east, hosts crucial facilities for loading oil tankers, plus the kingdom's biggest refinery and a swathe of storage tanks.

Saudi Arabia said Tuesday that air defenses intercepted and destroyed three ballistic missiles launched by Houthis toward its eastern region.

MEETING WITH SUPREME LEADER

Iranian Security Council chief Mohsen Rezaei on Tuesday met Supreme Leader Ayatollah Mojtaba Khamenei, not seen in public since succeeding his slain father in March, a day after holding talks with representatives of Saudi Arabia, Turkey and Pakistan.

State media said Khamenei had stressed the importance of pursuing Iran's interests and maintaining its conditions for ending the war. **Agencies**

'Russian Satellites Help Iran Allies Strike Saudi'

A private geospatial intelligence firm said it examined 40 missile and drone attacks against Saudi Arabia by Iranian-backed Houthi rebels in Yemen and militias in Iraq between July 1 and October 19, and in every case, Russian satellites were seen orbiting above the areas for days before and after. "What we found is a 100% match" between satellite activities and strikes, said Nawaf Obaid, founder of Geneva-based AURORAH Geosignal Intelligence. **AP**

AFTER SERBIA POLLS...

Protesters Storm Pro-Vucic TV Station, Seek Editor's Arrest

Protesters entered a Serbian television station supportive of former President Aleksandar Vucic late on Monday, interrupting broadcasting to call for the arrest of its editor, as thousands took to streets for a second night of post-election celebrations.

Serbia's Student List, born out of a student-led anti-corruption protest movement, unseated Vucic in a historic election on Sunday, bringing to an end 14 years in power for a man who served as information minister under Slobodan Milosevic and who maintained tight control over media.

Live footage broadcast by Informer TV showed around 30 people walk into its newsroom on Monday evening and surround editor-in-chief and owner Dragan Vucicevic. Some protesters shouted: "This is how it is in free Serbia" and "Where is Vucic now?" Some also called for Vucicevic's arrest. **Reuters**

THINK DIFFERENT'S LATECOMER DRAWS COMPLAINTS

Apple Duo's Foldable Screen Cracks Too Soon

Issue, which appears to be affecting only some units, embarrasses tech major that spent years on its design

The iPhone Duo, one of Apple's biggest new products in years, is drawing a growing number of complaints from customers who say the foldable display cracked after just hours or days of use.

In these cases, customers reported hearing a crunching sound when unfolding the phone, followed by a large crack forming along the center crease. Some users also experienced white patch or other display malfunction on the right side of the screen.Reports of the problem first surfaced on Reddit and other social media sites. Since then the agency has independently verified the issue with more than half a dozen customers, who provided photos showing damage to their devices or evidence of their conversations with Apple.

Apple acknowledged the issue , saying it was "aware of an issue impacting the inner display on a small number of iPhone Duo units."

"If users experience issues with their iPhone Duo display, they should contact AppleCare for a replacement," the Cupertino, California-based company said. Most Duos aren't affected by the problem, and the units that are impacted exhibit the defect quickly, Apple said.

"I went to unfold it and it felt stuck/harder/slower to open than usual. And when I opened it it had the lines on the screen," told Tom Battle, an Apple customer from San Diego. "You could feel a bump or loose piece under the display."

While the problem appears to affect only a subset of units, it represents an embarrassing setback for Apple, which spent more than a decade developing the device and touted its superior durability, hinge design and display technology.

The Duo, which went on sale Friday, represents the company's first foray into foldable phones — and the biggest-ever design change to the iPhone, Apple's largest source of revenue. **Bloomberg**

Who Controls AI after Leaders Go? Anthropic has a Plan

Few public companies claim to have the future of humanity on the line while making mundane choices about board composition.

Not so with Anthropic. Having warned that its artificial intelligence could one day cure cancer or kill up to 8 billion people, Anthropic has set up a complex plan for who can govern the company as its technology rapidly progresses, its Monday IPO filing showed.

Its expected $1.5 trillion valuation would make Anthropic the world's most highly valued public benefit corporation, a setup under Delaware law that means the AI lab must balance investor interests with promoting a wider good.

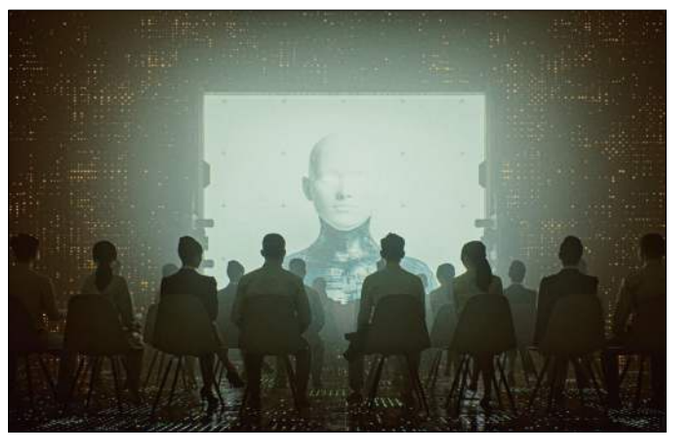
More than fine print, Anthropic's setup may have big implications for investors and a public increasingly adopting the San Francisco-based company's AI. The details show how Anthropic has insulated itself from investor pressure so it can pursue what it says is best for humanity.

Anthropic gave 50.1% voting power over certain matters to its seven co-founders, who, according to the filing, are "distinctly equipped to be stewards of our mission," as previously reported. Though an independent trust will control a majority of board seats, the co-founders' supervoting power will extend to elections of the remaining directors and shareholder proposals generally.

The Monday filing revealed more intricacies to overseeing a business that Anthropic expects will outlive the tight-knit crew that created it.

Once most of its co-founders are out of the picture and their "Class F" supervoting stock is gone, Anthropic's board will divide into three similarly sized groups, serving three-year terms. Staggering directors' reelection like in the US Senate, Anthropic has embraced a structure once popular as a way to stem hostile takeovers. The company has voiced concern about the risks of AI falling into authoritarian or nefarious hands.

That structure also goes against corporate-governance tides. In this century, major US companies have largely moved to electing directors annually, making companies more responsive to shareholder demands on areas like executive pay or strategy.



Anthropic declined to comment.

'LONG-TERM FLEXIBILITY'

Beyond its board, Anthropic has another governing body with its own set of rules: its long-term benefit trust.

Currently chaired by global health leader Neil "Buddy" Shah, the trust controls a special share class called "Class T" stock that will let it elect a majority of Anthropic's board. Anthropic has contemplated what happens if that stock goes away, too.

The goal of such eventualities is to "preserve long-term flexibility if circumstances change," its filing said. Even if someone not bound by Anthropic's mission to benefit humanity takes hold of its Class T stock, Anthropic's setup would require directors to follow "provisions relating to our public benefit purpose." Ultimately, the trust's power over the board makes Anthropic a "controlled company" under Nasdaq rules, exempting it from following some typical requirements like having an independent nominating and corporate governance committee. Anthropic is using that exemption to put Daniela Amodei, its president sister of CEO Dario Amodeion that committee.

THE LEADERS IN CHARGE

Anthropic set up a safety and risk committee on its board as well, currently made up of Novartis CEO Vas Narasimhan and former Trump White House official Chris Liddell. Billionaire Netflix co-founder Reed Hastings is Anthropic's current lead independent director.

Still, Anthropic's seven co-founders — the Amodei siblings — remain at the core of governance for the foreseeable future. This partly is through the existence of an entity called "Founder LLC," which, after the trust, will have the biggest say in board elections. **Reuters**

FIRST ELECTION AFTER OCTOBER 7 ATTACK

Bibi or No Bibi? Israel Votes in Huge Nos

Israelis are voting in a pivotal election Tuesday as their country wrestles with unresolved wars, lingering grief and anger over Hamas' Oct. 7, 2023, attack, and deep divisions over its longest-serving leader, Prime Minister Benjamin Netanyahu.

Netanyahu faces an array of parties seeking to drive him from power. Opinion polls have suggested a tight race with his main rival, former military chief Gadi Eisenkot.

Nearly 56% of eligible voters had cast ballots by 4 p.m., the highest turnout by that point since at least 1973, according to the Central Elections Committee. Exit polls late Tuesday will provide the first indication of how Israelis voted, with official results tallied in the coming days.

The race is widely seen as a referendum on Netanyahu's nearly unbroken 17-year rule, which had left Israelis bitterly divided on a host of issues even before the deadliest attack in its history. **AP**

SUITS & SAYINGS

ET's roundup of the wackiest whispers in corporate corridors

News Peg

A tech honcho from the South with rumoured political ambitions and boss of a northern conglomerate may seem to have little in common. But both names are doing the rounds as potential investors in a news channel. The buzz comes on the heels of the complete exit of an entrepreneur-turned-politician from the venture's cap table. Whether either of the two will eventually come on board remains to be seen. Watch this space.

Diwali Diplomacy

Corporate Diwali parties in the metros seem to have acquired a new flavour this year. The most sought-after guests at celebrations hosted by packaged food companies, quick-commerce platforms and restaurant chains are apparently not celebrities or business bigwigs, but lawyers and regulatory consultants. With scrutiny from food safety authorities intensifying across the country, companies are keen to keep legal experts close and regulatory trouble at bay. After all, when the FSSAI or FDA comes calling, it helps to have the right people on speed dial. And what better way to cultivate those relationships than over some festive cheer?

In a Nutshell

Coca-Cola Lifts Profit Forecast on Int'l Demand

BENGALURU |LONDON Coca-Cola on Tuesday raised its annual profit forecast as soft drink demand held up in markets including India and Brazil, even as it warned of accelerating cost pressures and persistent consumer weakness into 2027. The company has sought to win over increasingly selective consumers with smaller, cheaper packs in the United States, while also rolling out pricier offerings such as Coca-Cola Cherry Float. But like other consumer goods companies, Coca-Cola faces higher packaging and freight costs as the US war in Iran drives up commodity prices. The company said in July that aluminum and PET costs had risen more than expected this year. Diesel prices have jumped to record highs because of the war, pushing up freight and transport costs across industries. Consumer goods bellwether P&G last week raised its estimate of the hit from higher costs to its annual profit. Coca-Cola executives also warned that pressure on consumers could extend into 2027. CFO John Murphy pointed to weakness in the restaurant industry, which was a slight drag on North American volumes. "While our own business continues to have a lot of momentum ... I think the underlying pressure across the consumer landscape is there, and I think it will be there for the rest of the year as we go into 2027," Murphy said. Overall volumes rose about 5%, while prices increased about 1%. Packaged goods companies have also become more cautious about raising prices as consumers focus more sharply on affordability amid higher food and fuel costs. **Reuters**

Akasa Air to Shift Jeddah Flights to NMIA

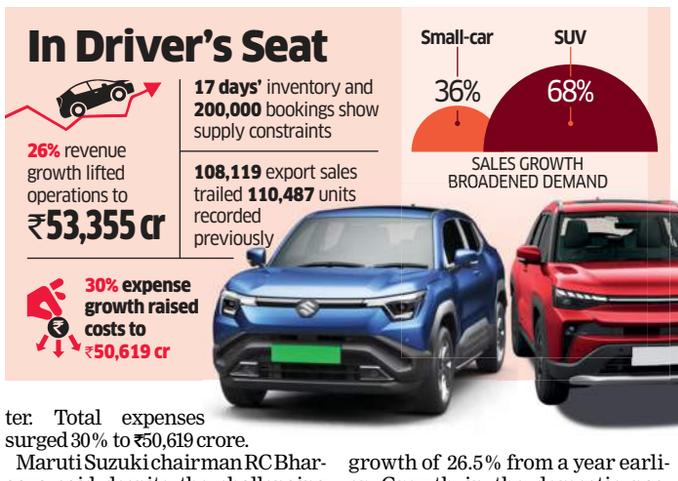
MUMBAI Akasa Air and Adani Airport Holdings (AAHL) announced a phased transition of the domestic carrier's Mumbai-Jeddah operations from Mumbai International Airport to Navi Mumbai International Airport (NMIA) from December, supporting the development of the Mumbai Metropolitan Region's dual-airport system, private airport operator said. Two other carriers, IndiGo and Air India Group, have already announced that they will progressively shift flights from Mumbai's existing airport to the greenfield facility in Navi Mumbai from December, clearing capacity for the redevelopment of Terminal 1 and paving the way for a dual-airport system in country's financial capital.

MARK-TO-MARKET LOSSES WEIGH ON NON-OPERATING INCOME

Maruti Q2 Net Misses Street View Despite Record Quarterly Sales

Profit falls 26% amid West Asia-led input pressures; local mkt share up over 40%

Our Bureau



New Delhi: Maruti Suzuki missed Street estimates to report a 26% year-on-year decline in consolidated net profit at ₹2,466 crore for the fiscal second quarter as higher input costs and lower other income outweighed an increase in revenue spurred by record car sales. India's largest carmaker posted a year-earlier net profit of ₹3,349 crore.

Operating profit (EBIT) in the three months ended September 30 fell to ₹2,803.7 crore from ₹3,382 crore a year earlier due to "West-Asia conflict linked commodity increases," the company said in a statement. Sequentially, this translated to a growth of 10.8% from the June quarter. Other income more than halved to ₹430 crore last quarter from ₹966 crore a year earlier due to mark-to-market losses on invested surplus.

Revenue from operations increased 26% to ₹53,355.5 crore last quarter. Total expenses surged 30% to ₹50,619 crore.

Maruti Suzuki chairman RC Bhargava said despite the challenging environment due to several geopolitical crises, domestic demand remained strong supporting higher sales. "We have not seen this kind of growth in sales in many years," he said. "GST 2.0 was a watershed moment which helped support demand in a fairly hostile environment. There are two ongoing wars. The car industry, and certainly Maruti Suzuki, has had a good half year."

Maruti Suzuki said it achieved its highest-ever quarterly total sales volume of 696,654 units, a growth of 26.5% from a year earlier. Growth in the domestic passenger vehicle market was broad-based, with small car sales rising by 36% and SUV sales by 68%. Overall, the company's domestic market share expanded by 2.2 percentage points to 40.8% in Q2FY27.

Maruti Suzuki said while recent capacity additions have enabled it to serve continued strong consumer appetite, demand continues to outpace supply resulting in a low network inventory of about 17 days and pending bookings of about 200,000 units at the end of September. The company exported 108,119 cars last quarter, compared to 110,487 cars a year earlier amid global geopolitical uncertainties.

Bhargava said though monsoons were deficient this year, the outlook remains positive given the long-term strength of the Indian economy and people's aspirations. He said the GST reforms have improved affordability spiking demand from buyers at the lower end of the middle class. As many as 398,000 small cars were sold by the company in the first half of the year, compared to 162,000 SUVs.

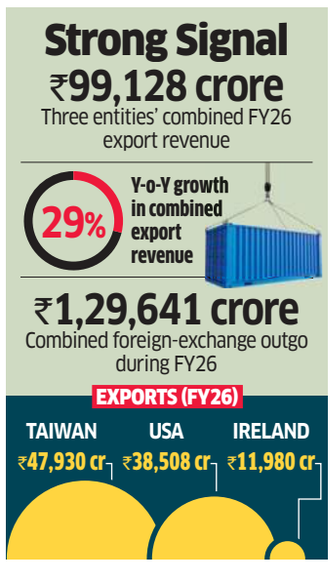
"Despite what people said there is and there will continue to be a demand for small cars in India, given the size of our population," he said. Hisashi Takeuchi, managing director said while currently sales are "pretty good", the car industry has to ensure that the momentum is maintained going forward. He said given high raw material costs, the company would have to take some price hikes in the second half of the year but would do so at an "appropriate time" and in a calibrated manner.

Overall, Maruti Suzuki expects to grow in the second half of the fiscal despite a high base.

Total forex outgo of 3 Tata Electronics entities at ₹1,29,641 cr, much more than their earnings

Tata Electronics Exports Near ₹1L cr in FY26 as Apple Boosts India Play

Writankar Mukherjee



Kolkata: Tata Electronics, India's largest home-grown contract manufacturer of iPhones, reported exports of nearly ₹1 lakh crore in FY26, up over 29% from a year earlier, led by the US, Taiwan and Ireland, where Apple has its European headquarters.

Three Tata Electronics entities together reported export revenues of ₹99,128 crore in FY26, according to latest company filings with the registrar of companies (RoC), underscoring the Tata group's growing role in Apple's global supply chain as part of its strategy to expand manufacturing beyond China.

In FY25, they reported exports of ₹76,953 crore. The figures are not strictly comparable because Tata Electronics System Solutions—the former Wistron business acquired by the group—reported a 15-month financial period in FY25.

The other two entities are Tata Electronics and Tata Electronics Products and Solutions, formerly Pegatron Technology India. The latter is a joint venture in which Tata Electronics owns 60% and Taiwan's Pegatron holds the remaining 40%. "Tata Electronics' combined revenue from the US rose nearly 40%, suggesting that India is becoming an increasingly important manufacturing base supplying the American market," said Mohit Yadav, founder of business intelligence firm AltInfo.

The actual increase on a comparable 12-month basis would be even higher, given the longer reporting period for Tata Electronics System Solutions in FY25, he added.

The combined foreign exchange outgo of the three Tata Electronics entities at ₹1,29,641 crore were significantly more than their forex earnings, which indicates the Indian manufacturing of iPhones is still heavily dependent on imported components. To be sure, the forex outgo can also be for any licensing fee or other charges the company might be paying in forex, whose details are not mentioned in the filing.

The three entities together reported exports of ₹38,508 crore to the US in FY26, ₹47,930 crore to Taiwan, and ₹11,980 crore to Ireland, according to the RoC filings. Exports accounted for about 76% of their reported production revenue.

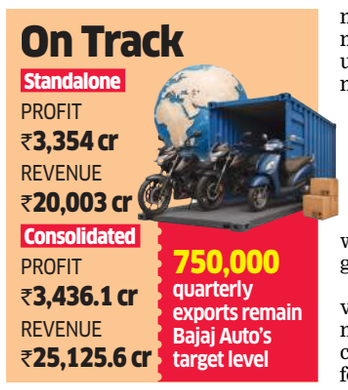
The export surge, however, came alongside widening loss. Tata Electronics reported a consolidated net loss of ₹1,611 crore in FY26 against ₹69-crore loss in FY25 even as consolidated operating revenue rose 96% to ₹1,29,902 crore.

Tata Electronics' consolidated domestic sales rose 46% to ₹30,182 crore in FY26, according to RoC filings. An industry executive said this includes the products supplied to Apple India, the local sales and service arm. Apple India reported FY26 sales of ₹1,03,853 crore and a net profit of ₹5,311 crore.

The rupee's depreciation against the dollar may have lifted the reported value of exports, analysts noted. The rupee fell almost 10% from about ₹85.60 a dollar to ₹94.80 during FY26.

Bajaj Auto Q2 Net Up 35% on Strong Exports, Product Mix

Our Bureau



Mumbai: Bajaj Auto's standalone net profit rose 35% year-on-year in the September quarter, beating analyst estimates, as strong export growth and a richer product mix helped offset higher input costs.

Net profit rose to ₹3,354 crore from ₹2,480 crore a year earlier. Revenue from operations grew 34% to a record ₹20,003 crore. A Bloomberg poll of brokerages had estimated standalone net profit at ₹3,152 crore on revenue of ₹18,917 crore.

Net profit for the consolidated entity rose 62% to ₹3,436.1 crore on revenue of ₹25,125.6 crore. Ebitda margin at the maker of Pulsar motorcycles and Chetak e-scooters inched up to 21% from 20.5% a year earlier. Input costs rose 7% between the June and September quarters, driven by commodities, electronics and polymers, joint managing director Rakesh Sharma said on a media call. However, the company managed to mitigate the increase through selective price hikes, higher realisations, dollar-denominated export earnings and a richer product mix. "Our first impulse is always to recover the cost," Sharma said, explaining that the company raised prices selectively depending on competitive conditions in individual product segments.

Exports grew 41% during the quarter, outpacing the 2% domestic growth. Bajaj Auto expects to maintain exports, which yield more profits, at about 750,000 units a quarter, supported by demand in Africa, Latin America and parts of Southeast Asia. Growing contribution of electric vehicles to total sales helped protect margins, said Sharma. The Chetak electric scooter business has turned profitable, while three-wheelers continue to generate double-digit margins.

Sharma flagged an uneven recovery in the domestic two-wheeler market, with premium motorcycles and electric scooters outperforming entry-level models. He warned that drought conditions in parts of Maharashtra, southern India and the Northeast could further weaken rural demand by affecting household incomes.

Poor crop outcomes could also make lenders more cautious about financing rural customers. "The postponement of decisions at the bottom of the pyramid" is already visible, he said, adding the impact of the drought could become more pronounced in the coming months.

Radico Khaitan Net up 66% to ₹231 cr on Higher Sales of Premium Products

Our Bureau

Mumbai: Radico Khaitan reported a 17% year-on-year rise in revenue to ₹1,745 crore in the second quarter ended September, driven by higher sales of premium portfolio.

Net profit rose 66% to ₹231 crore in the same period while EBITDA stood at ₹357 crore, up 51%. Margins for the maker of the maker of Magic Moments vodka and Rampur single malt, expanded 462 basis points to 20.4%.

Radico raised its FY27 volume growth guidance for the prestige-and-above portfolio to 30% and reiterated its expectation of an EBITDA margin of around 20%. It also flagged higher grain costs, saying inventory build-up to mitigate their impact had increased working capital requirements.

It added that favourable policy changes could support long-term growth, even as global volatility remains a note for caution.

IMFL portfolio volumes grew 7.2% to ₹1,292 cr in revenue, non-IMFL revenue at ₹423 cr

"In Karnataka, the rationalised duty framework is showing early signs of a healthier, more premium-friendly market. Tamil Nadu, the country's largest market, is also sending encouraging signals," managing director Lalit Khaitan said in a statement.

Indian made foreign liquor (IMFL) portfolio volumes grew 7.2% to 10 million cases, contributing to a 24.3% growth in IMFL revenue to ₹1,292 crore. Non-IMFL revenue stood at ₹423 crore for the period, up 1.4%.

Prestige-and-above category volumes jumped 35.8% to 5.28 million cases, accounting for 53.7% of its portfolio. This was helped by vodka's volume growth of 49% to 2.96 million cases. Whisky's momentum also supported growth.

However, volumes in the regular-and-others category fell 9.7%. The company attributed this degrowth to a high base in the year-earlier quarter following a change in the route-to-market in Andhra Pradesh, as well as policy changes in Maharashtra and Karnataka.

Net debt fell ₹69 crore from March to ₹175 crore as of September 30 and it expects to become debt-free in the second half of FY27.

Cipla Sets Sights on First-wave Gains from Rollout of Keytruda Biosimilar

Rica Bhattacharyya

THE LONG GAME

The patent expiry timeline of pembrolizumab is around 2029, covering about 19 cancer indications

Mumbai: Mumbai-based drugmaker Cipla, which has recently entered into an exclusive partnership with Qilu Pharmaceutical to commercialise a biosimilar of cancer drug Keytruda (pembrolizumab), is aiming to be in the first wave of launches of what is one the highest-grossing medicines that makes innovator Merck (MSD in India) over $30 billion a year.

"We are expecting to be among the first wave of launches," Achin Gupta, MD & Global CEO of Cipla, told **ET**. The patent expiry timeline of pembrolizumab, which is recommended in over 40 FDA-approved indications in about 19 cancer types, including skin, lung, breast and colon cancer, is around 2029.

"Given the size of this franchise and the go-to-market opportunities which are available, we are expecting to capture a significant share of the market," said Gupta, adding that "even a high single-digit share or bordering on a double-digit share is a very large opportunity in this particular segment. I think that is possible for us." "It could go up if we are amongst the fewer players and, but in any case, if we are amongst the first wave of launch, it will, you know, we will be able to garner a significant share of that market."

In September, Invagen Pharmaceuticals, a wholly owned subsidiary of Cipla entered into a strategic partnership with Qilu for the exclusive licensing and supply of QL2107, a biosimilar to Keytruda, for the United States. As part of the agreement, Qilu will be responsible for development, regulatory registration and supply of the product while Cipla USA will be responsible for the commercialisation of the asset by leveraging its strong commercial presence in the defined territory.

CONSOLIDATED NET FALLS 35%

Cipla on Tuesday reported a 35% year-on-year decline in consolidated net profit to ₹878 crore in the second quarter ended September, while total income from operations fell 2% to ₹7,404 crore, amid a decline in the company's North American sales and lower contributions from its API and other businesses. Ebitda declined 27% to ₹1,388 crore from ₹1,895 crore a year earlier, with the operating margin contracting to 18.7% from 25% in the corresponding quarter a year ago.

Auto co expects to bridge gap with rival BMW; luxury car mkt to grow 15% this year, says exec

After Price Cuts, JLR India Bets on Local 'Defender' Assembly to Lift Volumes

Shally Seth Mohile

RACE TO THE TOP

COMPANY PHOTO

We will be climbing up the ladder in terms of bridging gap between two and three, but it's still a long way to go

RAJAN AMBA
MD, Jaguar Land Rover India

Mumbai: Jaguar Land Rover (JLR) expects to narrow the gap with India's second-largest luxury carmaker BMW, banking on local assembly of its best-selling Land Rover Defender SUV to drive volumes after slashing prices of select variants by up to ₹34 lakh, said Rajan Amba, MD of JLR's local unit.

"We are a strong number 3," Amba said. "I think we will be climbing up the ladder in terms of bridging the gap between two and three, but it's still a long way to go," Amba told **ET.**

JLR India, which retailed 6,031 vehicles in FY26, down 2%, is the third-largest luxury carmaker in the country, behind Mercedes-Benz India and BMW India. The two German carmakers sold 19,363 and 17,301 vehicles, respectively, during the year.

The Defender, Range Rover and Range Rover Sport together account for 88-90% of JLR sales in India. Amba expects the local assembly of the Defender to boost annual volumes by 20%. On an average, JLR sells around 3,000 units of the Defender every year.

The 3.0-litre petrol and diesel X-Dynamic HSE variants of the Defender are now priced at ₹1.18 crore, compared to ₹1.52 crore earlier, a reduction of about 22%. The 2.0-litre petrol X-Dynamic HSE variant is priced at ₹99 lakh, down from ₹1.135 crore. India will be the second country after Slovakia where the Defender is being assembled locally. The price cuts are expected to bring the SUV within reach of a wider pool of buyers, including those who had previously found it beyond their budgets, Amba said.

JLR has an installed annual production capacity of 12,000 units in India, he said. Having sufficient local manufacturing reflects the company's confidence in India despite the market's relatively small contribution to its global volumes.

"Yes, smaller volumes, but we're a high growth market," said Amba. "And we see a lot more potential in this market." Amba expects India's luxury car market to grow at least 15% this calendar year. However, uncertainty over potential price reductions under trade agreements is weighing on purchase decisions, with some customers deferring purchases amid speculation over future prices.

Recalling the experience ahead of the implementation of the UK-India free trade agreement (FTA), Amba said repeated announcements and speculation about price changes had affected customer sentiment and sales.

Indus Towers Profit Falls over 2%, But Revenue Rises 4% in Q2

Our Bureau

Mumbai: Indus Towers reported a 2.5% decline in net profit for July-September despite higher revenue, as the earnings boost from recovering previously unpaid bills, including those of key customer Vodafone Idea (Vi), was smaller than a year earlier. Depreciation costs also dragged down profit at India's largest tower company.

The Gurgaon-based company reported a consolidated net profit of ₹1,792.8 crore compared with ₹1,839.3 crore a year earlier, whereas revenue increased 4% to ₹8,515.6 crore. On a month-on-month basis, profit rose 2.7% and revenue went up 1%.

When there is a risk of customers not paying their bills, Indus Towers records provisions to cover the loss, which lowers its profits. Reversing those charges subsequently boosts earnings. That benefit was ₹10.1 crore in the September quarter, compared with ₹195.2 crore a year earlier.

"The customer (read: Vodafone Idea) is paying an amount equivalent to monthly billing to the Group," Indus Towers said in its financial results fine print published on Tuesday. "The group will continue to monitor the financial condition of the said customer. The management believes that the carrying amount of receivables (including unbilled revenue) and property, plant and equipment as at September 30, 2026, related to the said customer will be recovered in normal course of business."

Earnings boost from recovering previously unpaid bills, including those of key customer Vi was smaller

Depreciation and amortisation expenses, before adjustments against reserves, increased to ₹1,961.9 crore from ₹1,820.7 crore.

Indus Towers, majority-owned by Bharti Airtel, counts Vi as a major tenant, making timely payments important to its cash flow.

Reckitt Logs Double-digit Growth in India, Sees Moderation in Q4

Ratna Bhushan

New Delhi: British consumer healthcare maker Reckitt Benckiser's global chief executive Kris Licht said India reported 'strong growth momentum' in the July-September 2026 quarter as the previous year's GST rollout had to led to stock depletions, adding that the impact could be a headwind in the fourth quarter.

"The prior-year period was impacted by GST-related stock depletion, creating a favourable lap which is expected to unwind in Q4," Licht said, at the company's post earnings investor call on Tuesday. Last year in September, New Delhi slashed goods and services tax (GST) on most packaged consumer goods, including soaps, snacks, noodles and toothpaste, to 5% from 12% or 18%.

Reckitt said emerging markets delivered 8% like-for-like net revenue growth in the third quarter ending September 2026, and that growth was balanced between volume, price and mix, with India growing in double-digits. As a practice, the company doesn't mention standalone India numbers. The company called out double-digit growth for its germ protection brand Dettol, Durex condoms and disinfectant cleaner Harpic in India, along with Brazil and South Africa.

Global chief said previous year's GST rollout had led to stock depletions & impact could be headwind in fourth qtr

Licht also said "AI-enabled sales transformation is continuing to enhance execution in the (India) market," adding that the country saw double-digit growth and broad category expansion in the quarter.

The chief said in emerging markets, Reckitt is accelerating growth across categories and into new markets to complement the strength of businesses in China and India. "On emerging markets, we know that we have a great opportunity to broaden our performance, and really out-perform in India and China," he added.

Fintech Co Wise Leases 500k sq ft in Hyderabad for Office Expansion

Faizan Haidar

New Delhi: Wise, a global financial technology company and DE Shaw, the global investment and technology development firm, have driven the office space leasing in Hyderabad during July-September quarter as the duty has emerged as the preferred destination for large office space.

49.5%
YEAR-ON-YEAR RISE IN OFFICE LEASING IN HYDERABAD

Wise has leased 500,000 sq ft in Hyderabad for its office expansion while DE Shaw, leased 750,000 sq ft as Hyderabad recorded 4.21 msf of gross leasing in Q3 2026, more than doubling q-o-q and increasing 49.5% y-o-y.

"We have seen some strong office space activity in Hyderabad and most of the demand for large office space is coming from the city. Global corporates are establishing GCCs there and some of the land auctions we have seen recently is a signal for future demand," said a senior real estate consultant.

In quarter, Gachibowli accounted for89% of Q3 leasing, followed by Madhapur at 10% and other markets at 1%. BFSI emerged as leading end-user sector in Q3, accounting for 39.7% of leasing, followed by IT-BPM at 13.4%.

myconsentapp.in

myconsentapp

MyConsentApp is a **proposed Consent Manager** under the Digital Personal Data Protection Act, 2023 and the DPDP Rules, 2025. We work with Data Fiduciaries, the organisations that process personal data, and act for the Data Principal, the individual whose personal data is processed. Through one interoperable platform, Data Principals can give, manage, review and withdraw their consent with any Data Fiduciary. Every consent artefact, notice, withdrawal and related event goes into an **append-only, quantum-ready[1], cryptographically hash-chained ledger.** Each record is linked to the one before it, so any change, deletion or reordering can be detected. The result is a **verifiable, regulator-ready audit trail** that lets Data Principals exercise their rights and lets Data Fiduciaries prove that they comply. Built for businesses of every size.

Consent is now law.

India's data protection (DPDP) law, explained for business owners

The Digital Personal Data Protection Act, 2023 and the DPDP Rules, 2025 set the rules for how organisations in India collect, use, store and erase the personal data of their customers, patients, students, staff etc. Here is what this means for your business.

1 What counts as personal data?

Anything that identifies a person. [s.2(t)]

BANKS / INSURANCE / FINTECH
PAN, Aadhaar, balances, loans etc.

HOSPITALS / PATH LABS
Medical reports, prescriptions, scans etc.

SHOPPING APPS / SITES
Addresses, order history etc.

SCHOOLS / TUITIONS
Marks, attendance, photos etc.

HOUSING SOCIETIES
Visitors' names, phone numbers etc.

CAB / FOOD DELIVERIES APPS
Pickup, drop locations etc.

HOTELS / BOOKING APPS
Names, photo IDs, itineraries etc.

EMPLOYERS / VENDORS
Salaries, bank accounts, PAN etc.

It applies to every industry.

The Act covers personal data collected digitally, or written on paper and later typed or scanned in. e.g. A paper visitor register is not covered. The same names typed into a visitor app are covered. [s.3(a)]

2 How consent works

Like a game of cricket: two sides, a score-keeper and an umpire watching it all.

The umpire: Data Protection Board of India.
Registers Consent Managers, inquires into complaints and breaches, and imposes penalties. [s.27, s.33, R.4]

SIDE ONE
Your business
DATA FIDUCIARY

- Give a clear notice and prove consent [s.5, s.6(10)]
- Make withdrawing consent easy [s.6(4)]
- Tell the Board and every affected customer of a breach without delay [s.8(5), s.8(6), R.6, R.7]
- Erase data once consent is withdrawn or the purpose is served [s.8(7), R.8]
- Get verifiable parental consent for anyone under 18 [s.9, R.10]

BUSINESS ASKS

Request →
← Proof

IN THE MIDDLE
The score-keeper
CONSENT MANAGER

- One place to manage consent [s.2(g), s.6(7)]
- Keeps a record of every consent given [Sch.1 B]
- Cannot read the personal data [Sch.1 B]
- Registered with the Data Protection Board [s.6(9)]
- Provides audit trail of consents [Sch.1 B]

myconsentapp
myconsentapp proposes to apply for registration as a Consent Manager

CONSENT MANAGER RECORDS

SIDE TWO
Your customer
DATA PRINCIPAL

- Can ask for a summary of the data business holds [s.11]
- Can have it updated or erased [s.12]
- Can withdraw consent at any time [s.6(4)]
- Gets a grievance answered in 90 days [s.13, R.14]
- Can nominate someone to act for them on death or incapacity [s.14]

CUSTOMER DECIDES

Consent Manager registration opens on 13 November 2026. ***Every business that handles personal data (a Data Fiduciary) must be ready by 13 May 2027.*** *From that date, the Data Protection Board of India can fine a business up to ₹250 crore for failing to keep personal data safe, up to ₹200 crore for not reporting a data breach, up to ₹200 crore for breaking the rules on children's data, and up to ₹50 crore for any other breach of the Act.*

3 15 things myconsentapp does for you

- ✓ Quantum-ready[1], with NIST post-quantum signing
- ✓ Receipts anyone can verify
- ✓ Consent purpose by purpose, never pre-ticked
- ✓ Works with other Consent Managers
- ✓ A breach register with the 72-hour clock
- ✓ Two signatures on every consent record
- ✓ A tamper-evident ledger, kept for seven years
- ✓ Withdrawals reach your systems at once
- ✓ Rights requests and grievances in one place
- ✓ Data stored only in India, encrypted field by field
- ✓ A clear dashboard for DPOs.
- ✓ Clear notices in English and 22 Indian languages
- ✓ A mobile app for your customers *(coming soon)*
- ✓ Parent and guardian consent for children
- ✓ Live today with APIs and a sandbox

We are a proposed Consent Manager. We are not your consultants.

Have a lawyer or consultant? Good: ask them what the Act means for you. We give you the platform that asks, records and proves consent.

A business cannot be its own Consent Manager

A Consent Manager must be registered with the Board and must have no conflict of interest with the businesses it serves. [s.6(9), Sch.1 Pt B]

How to begin

DeepSeek AI Shows Safety Gaps in Tests

BEIJING: DeepSeek's latest AI model showed stronger safety controls in independent tests than earlier versions, but could still disable software intended to shut it down, exploit gaps in monitoring and follow deceptive instructions during long tasks, according to a Chinese AI safety group. DeepSeek is one of China's most closely-watched AI companies, and its models have drawn global attention for their performance and relatively low operating costs. Fangcun AI tested DeepSeek V4.1 Flash-1017 in 34 evaluations designed to assess how an AI agent powered by the Chinese model behaves. – Reuters

50%
Estimated increase in overall global AI investment in 2027. – Reuters

Nvidia & Meta Deepen AI Ties with $3b Deal

WASHINGTON: Nvidia and Meta said they would deepen partnership on the Muse AI assistant, with Nvidia investing $3 billion in Meta's equity offering. Meta's Muse models and agents, which run on Nvidia infrastructure, will work more closely with chipmaker to improve performance and cut costs. Muse is central to CEO Mark Zuckerberg's plan to deliver "personal superintelligence". The two firms may also explore working together more on Nvidia's OpenShell framework, including using it to roll out software safely and use a tool called Sentry to monitor how AI agents behave. – Reuters

IT Giant Cognizant is in Talks to Back Sarvam AI at $4b Valuation

NEXT LEAP AI co tapping large domestic enterprises to anchor the planned $300m round: Sources

Pranav Mukul & Samidha Sharma

New Delhi | Mumbai: Nasdaq-listed software services company Cognizant Technology Solutions is in talks to participate in Sarvam's latest financing round, which is expected to value the Indian artificial intelligence startup at $3.5-4 billion – more than double the valuation in its previous round – people aware of the matter said.

Sarvam is seeking to raise around $300 million in fresh funds, as ET reported on October 13.

"Cognizant may end up acquiring a small stake in Sarvam as part of the fundraise, which may double its valuation... The talks are currently ongoing," one of the persons cited above said.

Sarvam has also engaged with large domestic enterprises to anchor the round, two people said.

The sources did not want to be identified as the talks are private.

Sarvam did not respond to ET's queries until press time on Tuesday. An email sent to Cognizant also remained unanswered.

HCLTech, India's third-largest IT services firm had led Sarvam's $300-million funding round that closed in June, valuing it at $1.5 billion.

Cognizant's potential investment in Sarvam comes as advances in agentic AI raise questions about the future of the IT services industry. AI agents are increasingly capable of automating tasks across software development, application maintenance and back-office operations, potentially disrupting traditional outsourcing models. These concerns have weighed on Indian IT services stocks, with several listed pure-play software services companies trading at valuations near five-year lows amid fears that AI-led automation could put pressure on their revenue streams.

Cognizant, which has a market capitalisation of about $31 billion, down 25% from its 2022 peak, has indicated that it is open to investments and acquisitions that support its ambition to become a platform-led, outcomes-focused company in the AI era.

During an earnings call in April, Cognizant chief executive Ravi Kumar S said: "This is a phenomenal time to create value from M&A in line with our reforged first principles, which is about having a platform play, managing our business on outcomes versus effort, and AI-enabling our offerings."

He noted that there were "some exceptional opportunities" in the market. "We also have the ability to anchor this on new pillars in the mix, which will give us expansive opportunities. So, we are not doing this in a tactical way. We are doing this in a very strategic way of filling the boxes for being an AI builder," Kumar had said.

IT Navigates Peak Pessimism by Prioritising Growth in Stable Q2

AI opens new revenue doors, but pricing pressure, legacy deflation trigger near-term caution

Beena Parmar

Bengaluru: India's software services sector, valued at more than $300 billion, has boosted long-term market sentiment as IT companies prioritised expansion and investment over profit margins during a stable second quarter of this financial year.

Analysts said that artificial intelligence (AI) is becoming a significant revenue driver for the majority of Indian IT companies. However, they cautioned that near-term prospects remain muted due to pricing pressure and AI-driven deflation in traditional services.

"The industry is on track to close FY27 with 3-4% growth, with no sign of a meaningful recovery in H1FY27 and tech services demand still subdued," said Gaurav Vasu, founder and analyst, UnearthInsight, a data and technology research platform.

The BSE IT index has risen more than 14% since Tata Consultancy Services (TCS) announced its results on October 8. Global investment bank Jefferies said in a research note that the rally in Indian IT stocks was driven largely by a rerating of valuations, rather than upgrades to revenue or earnings forecasts. Vasu pointed out that legacy work is shrinking 3-5% while AI work is growing 20-30%. However, AI growth is still deflating and isn't contributing meaningfully to revenue.

This is reflected in the almost-flat dollar revenue growth across top tiers despite healthy deal wins with efficiencies from utilisation and foreign exchange tailwinds, rather than pricing, boosting margins in the July-September quarter.

"Growth among the large Indian firms is stuck at 1-3%. The top five firms (TCS, Infosys, HCLTech, Wipro and Tech Mahindra) earned about $20.8 billion in Q2 FY27, up about 2.2% year-on-year in dollars," said Praveen Bhadada, CEO and managing director at Neovay Global.

For the full 2026-27, UnearthInsight estimates tier-I companies to deliver a constant-currency (excluding foreign exchange fluctuations) growth of about 1.5-2.5%, led by the third-largest IT services provider, HCLTech. Tier-2 companies and engineering services firms are expected to grow about 6-17%, with Persistent Systems leading the pack.

Ather Plots Massive Capacity Ramp-up, Eyes 20% Mkt Share

To restart dealership network expansion as new manufacturing capacity goes live: CEO

Puran Choudhary

Bengaluru: Electric two-wheeler maker Ather Energy is targeting a market share of at least 20% in the near term, as it expands manufacturing capacity and resumes dealership additions to meet demand that outstrips supply, cofounder and chief executive Tarun Mehta told ET.

Ather's market share fell to 15.1% in the July-September quarter from 17.2% a year earlier. Registration of its electric two-wheelers with state transport authorities grew 60% year-on-year last quarter, but underperformed the market that expanded 82%.

Mehta attributed the fall in market share to supply constraints. He said monthly demand had risen to around 60,000 units, against its peak production capacity of 35,000 units at its Hosur plant.

"We believe our rightful market share is higher than 20%. That would be the near-term target — to get back to that and recover at least that much, and hopefully higher, as all this capacity starts going live," Mehta said in an interview.

Ather on Monday reported its first quarterly net profit of ₹1.26 crore, compared with a loss of ₹154.07 crore during July-September last year.

The company's shares rose more than 6% to close at ₹1,671 on the BSE Tuesday, giving it a market capitalisation of nearly ₹66,300 crore, compared with ₹12,144 crore when it listed in May 2025.

Prices of aluminium, copper, plastics and memory chips continue to take a large hit on the margins, Mehta said. Compared with the fourth quarter of FY26, commodity hits cost about 9.4% in gross margins in the latest quarter, he said, adding: "That's quite massively elevated."

EARLY DAYS FOR PAT

Despite the volatility of the supply chain, Ather expects to sustain break-even or positive Ebitda in the coming quarters, as higher volumes and operating leverage help offset rising commodity costs. "Even given the higher-than-anticipated demand and constrained supply, we managed our fixed costs with a lot of discipline, which is why we could deliver another quarter with break-even or positive Ebitda," Mehta said. For profit after tax, it is "early days", he said.

Deal Corner

Funding tap is open for a host of new startup ventures

VCs Chase Premium Growth in Single-specialty Healthcare

Move into areas like orthopaedics, pain care bets

Ayanti Bera

Bengaluru: Venture capital investors are deepening their bets on single-specialty healthcare, moving beyond models in oncology and nephrology to more specialised areas such as pain management, physiotherapy and orthotic products.

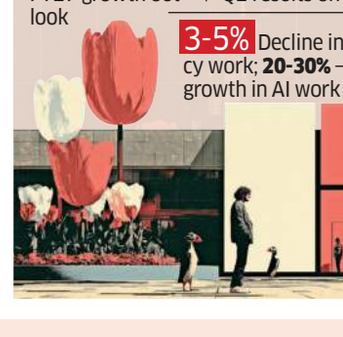
The trend is reflected in several recent funding deals. Bengaluru-based Lumov, which makes orthotic products, is in talks to raise ₹32 crore in a funding round led by Peak XV Partners, according to people familiar with the matter. Other investors in the round will likely include the founders of Minimalist and Mokobara, as well as early-stage VC firm Panthera Peak Ventures, sources said.

Last month, Betterhood, another startup focused on orthotic products, raised ₹11.5 crore in a round led by consumer-focused investor Sauce VC. In August, private equity firm Kedaara Capital acquired about a 51% stake in Tynor Orthotics, which manufactures orthopaedic products and mobility aids.

Peak XV Partners and Lumov declined to comment on the proposed funding rounds. Beyond orthopaedic products, a new crop of startups operating pain management clinics is also attracting investor interest.

RISING INTEREST

Last month, Betterhood, startup focused on orthotic products, raised ₹11.5 crore in a round led by Sauce VC



AI Firm Simplismart Bags $14m from DVC & Nvidia

Our Bureau

New Delhi | Bengaluru: Simplismart, an AI firm based in Bengaluru, has raised $14 million from investors led by early-stage investment firm Dallas Venture Capital. The company will use the funds to expand its sales and marketing teams, strengthen research and development, and hire more people, said its cofounder and chief executive, Amritanshu Jain.

The financing round, which saw participation from chipmaker Nvidia and existing investors Accel, Shastra VC and Micromax, is expected to value the firm at $100-120 million.

The company did not confirm the valuation. "We have always been a frugal company," Jain said, adding that the company did not intend to use growth capital to buy large amounts of computing capacity. ET had reported in its May 18 edition that Simplismart was in talks for the investment.

Healthtech Cent Gets $15m

Our Bureau

Bengaluru: Preventive healthcare startup Cent, cofounded by Practo founder Shashank ND, has raised $15 million in a funding round led by Blume Ventures and existing investor South Park Commons. The fundraise comes as the company expands medical imaging and diagnostic services aimed at detecting serious illnesses before symptoms emerge.

The round, comprising equity and debt, comes nearly eight months after the Bengaluru-based company raised an undisclosed amount from South Park Commons and OneFlow Holdings, Shashank's family office. Cent did not disclose its valuation or the equity-debt split.

Former Vodafone chief executive Arun Sarin, former OpenAI executive Srinivas Narayanan along with social media app Koo founder Aprameya Radhakrishna also participated.

BETWEEN JANUARY AND OCTOBER

SoftBank Sells 1.2% Stake in Ola Electric

Investor also sold rights entitlements to subscribe to an additional 11.2 m shares

Our Bureau

Bengaluru: An investment vehicle of Japanese conglomerate SoftBank Group sold 55.5 million shares of Ola Electric Mobility, representing a 1.2% stake, through open-market transactions between January 6 and October 22 this year.

SVF II Ostrich (DE) LLC also sold rights entitlements to subscribe to an additional 11.2 million shares, according to a disclosure filed with stock exchanges.

Ola Electric is in the process of raising ₹1,000 crore through a rights issue of partly paid-up equity shares.

Besides Softbank, OEM Employees Welfare Trust, which holds shares for Ola Electric's employee stock option plans, sold nearly 7.53 million rights entitlements on October 26, while Vanguard ESG International Stock ETF sold about 5.71 million rights entitlements on the same day, according to bulk deals data on NSE. Following the transactions, SoftBank's shareholding in Ola Electric reduced to 11.7% from 12.9%. Its holding on a fully diluted basis fell to 10.83% from 11.94%, the filing showed.

SoftBank, which first invested in the electric two-wheeler maker in 2019, continues to hold 541.5 million equity shares in the company.

While these entities sold their rights entitlement, Motilal Oswal Financial Services and Calliope Capital Advisors, an investment vehicle associated with Motilal Oswal, applied for a combined 23.9 million shares under the company's ₹1,000 crore rights issue on the opening day.

The rights issue, which opened on Thursday, will close on October 30.

Paytm Taps AI for 33% UPI Mkt Share

In-house AI models to pinpoint high-value users and cut acquisition costs: Sharma

Our Bureau

Bengaluru: Digital payments firm Paytm is targeting a one-third share of India's Unified Payments Interface (UPI) consumer payments market, with founder Vijay Shekhar Sharma making customer acquisition a key management priority as the fintech company looks to accelerate growth while improving profitability.

Paytm currently accounts for about 8.1% of UPI transaction volume, behind PhonePe's 45.6% and Google Pay's 32.2%, according to September data from the National Payments Corporation of India.

The push comes as Paytm reported its sixth consecutive quarter of consumer UPI market-share gains and added five million monthly transacting users during July-September, taking its active user base to 85 million. "We are going to go all in on market share. And we call it a primary KPI (key performance indicator) for my team," Sharma said during the company's earnings call on Tuesday. "Our target is to take one-third market share in this business. There is nothing less than that we will settle for."

Paytm plans to expand through product improvements, partnerships and targeted marketing rather than relying primarily on cashback. Sharma said artificial intelligence (AI) models developed internally were helping identify customers with higher monetisation potential, reducing acquisition costs.

The Noida-based company reported a 28% year-on-year increase in operating revenue to ₹2,648 crore in the September quarter, while net profit rose to ₹225 crore from ₹21 crore. Ebitda increased 90% to ₹270 crore, with margins reaching 10%.

Oracle may Extend its Voluntary Staff Separation Scheme to India

Managerial roles in the crosshairs as scheme offers six weeks' severance pay

Tanya Pandey

New Delhi: Oracle may extend a voluntary separation programme (VSP)—currently rolled out in the US—to India as the technology giant restructures its global workforce amid rising investments in AI, people aware of the matter told ET.

The US separation scheme is targeted at managerial roles, with eligible staff being offered severance pay of at least six weeks, the people said.

Oracle's India workforce has been shrinking over the past six months, with engineering departures running at roughly five times the pace of hiring, the people said. The company is also pushing more work through technology services partners such as Wipro, the people said, raising questions about whether Oracle will continue to retain the same level of inhouse engineering capacity.

Oracle's global headcount declined by around 21,000 in FY26, according to Achyuta Ghosh, global GCC research head at HFS Research.

The company's September regulatory filing put its estimated restructuring costs at about $2.8 billion, including an additional $700 million for further planned actions. Oracle's recent round of global layoffs in September impacted about 10% of its India workforce or 3,000 employees, ET had reported.

PAPER SEEKING VIEWS ON PROPOSALS LIKELY

Sebi may Relax Extra Disclosure Norms for FPIs

Suggestions include exempting investors with holdings below a certain threshold

Sugata Ghosh & Reena Zachariah

Mumbai: India's capital market regulator is taking a relook at the onerous extra disclosure rules for foreign portfolio investors (FPIs).

The Securities and Exchange Board of India (Sebi) is expected to release a consultation paper for feedback on possible relaxation of the regulations that require FPIs above a certain asset size or having concentrated equity exposure to a company or a corporate group to share granular details of investors in the funds.

"Sebi had sounded out some of the market participants and fund custodians. What we understand is that it wants to rationalise the rules so that the twin objective, to enhance transparency and prevent circumvention of regulations by FPIs without causing any collateral damage like driving a fund to sell shares to lower its holding, is met," a person familiar with the discussions told ET.

One of the suggestions includes fixing a low threshold equity holding in a company below which an FPI would not have to give details of their investors even if the fund is focused on one or two firms or group.

CHANGING PREFERENCES REALIGN MARKET

Mom-&-Pop Stores Embrace FMCG Gen Z

Startups grab 22% turf in kiranas, expanding as legacy names slow, show data

Aanya Thakur & Sagar Malviya

Mumbai: New-age consumer brands have increased their share of India's kirana market to nearly 22%, eating into the dominance of established fast-moving consumer goods (FMCG) companies in neighbourhood stores that have long been the stronghold of legacy players.

The market share of such brands rose to 21.7% in the first half of FY27, from 14.8% a year earlier, while legacy players' share fell to 78.3% from 85.2%, according to exclusive data from retail intelligence platform Bizom, which tracks 10 million kirana outlets.

"This is the first time in a long time that new players are creating a possibility of changing the market structure," said Tarun Arora, chief executive at health and nutrition brand Zydus Wellness.

Greater access to online and modern-trade channels is helping newer brands' reach, he said, adding that it is now important for established companies to understand changing preferences, rather than rely on past strengths.

"Consumer attitudes and preferences are changing, which we see manifested more online. Part is being manifested offline also," said Shankar Prasad, chief executive of Plum Goodness.

Heading for Trillion-dollar Valuation, Anthropic has a Desi Twinkle in its AI

Indian honchos in US co's C-suite, code room & trust set for bonanza

Tanya Pandey & Himanshi Lohchab

New Delhi | Mumbai: The leadership at Anthropic includes four Indian-origin executives, including its finance and technology chiefs, who are expected to amass substantial wealth if the maker of Claude achieves its targeted valuation in the proposed initial public offering.

Besides chief financial officer Krishna Rao and chief technology officer Rahul Patil, the draft IPO filing lists Claude Code co-creator Sid Bidasaria and Neil Buddy Shah, chair of its Long-Term Benefit Trust, among the top leaders.

Rao, who is helping steer preparations for the IPO along with chief executive Dario Amodei, held beneficial ownership of 9,497,900 Class A shares in Anthropic. These comprise 153,960 shares held directly and options covering another 9,343,940, including through a trust, disclosures showed.

Assuming a $1.5-2 trillion valuation for Anthropic in the IPO, Rao's holdings could make him one of the wealthiest finance executives in the world. According to experts, it could put him in the same league as SpaceX CFO Bret Johnsen.

APEX COURT DEFERS HEARING BY 10 DAYS

We are Aware of Everything, will Decide: SC on CEC Row

Election Commission of India has informed court that all SIR-related decisions were unanimous

Raghav Ohri

New Delhi: The Supreme Court on Tuesday observed that it did not wish to hear the controversy surrounding the Election Commission of India's functioning in a piecemeal manner and indicated that it was aware of the developments, as it heard a batch of petitions challenging the poll body's functioning and its conduct of the special intensive revision of electoral rolls.

The observation came from a three-member bench, headed by Chief Justice of India (CJI) Surya Kant, during the hearing of proceedings concerning allegations against ECI. The bench on Tuesday issued notice on a plea filed by Trinamool Congress MP Dola Sen, challenging the changes to Form 6, the form used for inclusion of names in the electoral rolls.

Appearing for Sen, senior advocate Menaka Guruswamy alleged that ECI had effectively acknowledged the disputed changes to Form 6 but was now attempting to justify them. "Please see the audacity of the institution in justifying the alleged tampering with Form 6," Guruswamy told the bench. Appearing on behalf of ECI, senior advocate Maninder Singh refuted the submission, terming it "rhetoric" meant for outside.

Senior advocate Abhishek Manu Singhvi, appearing in the petition filed by Leader of Opposition Rahul Gandhi and INDIA bloc leaders, urged the bench to pass an order to preserve the file notings and internal communication, saying it was crucial to decide if the decisions were unanimous or unilateral.

"We are aware of everything. We will decide," CJI Kant verbally remarked. The bench deferred hearing, granting the petitioners 10 days to file a rejoinder to the counter-affidavit filed by ECI on Monday.

In its short counter-affidavit, ECI told the court that all decisions relating to SIR were taken unanimously by the commission, rejecting allegations that chief election commissioner Gyanesh Kumar acted unilaterally despite objections from the other two election commissioners.

In its counter-affidavit, filed in response to a plea challenging the legality of certain SIR-related decisions and CEC's functioning, ECI said the three orders concerning the revision exercise — dated June 24, 2025, October 27, 2025, and May 14, 2026 — were unanimous decisions. The affidavit, filed by deputy EC Bhanu Prakash Yeturu, was itself approved unanimously by Kumar and ECs Sukhbir Singh Sandhu and Vivek Joshi, ECI said.

Govt Response Sought on Plea Against Mandatory Singing of Vande Mataram

NEW DELHI: The Supreme Court on Tuesday sought the central government's response to a plea challenging the constitutional validity of the law and government directions mandating the singing of all six stanzas of the national song, Vande Mataram, at specified official functions. A three-member bench of CJI Surya Kant and justices Joymalya Bagchi and V Mohana was hearing a plea filed by Carnatic vocalist TM Krishna, challenging the 2026 amendment to the Prevention of Insults to National Honour Act, 1971, and the Ministry of Home Affairs' directions prescribing the complete version of the song. – PTI

ALLEGES CONGRESS

'Permission for Oppn Mock Session Against CEC Denied'

Leaders considering Kharge's 'residence or Constitution Club as new venue'

Our Political Bureau

New Delhi: Congress on Tuesday alleged that Delhi Police denied permission to the INDIA bloc to hold a mock impeachment session against CEC Gyanesh Kumar on the lawns of Ashoka Hotel and, subsequently, at Ramlila Maidan as an alternative venue on October 30. Preparations for the November 1 rally were still underway. Sources indicated the leadership was now considering Congress chief Mallikarjun Kharge's residence or the Constitution Club as new venue for the mock session.

"How many permissions will you deny, Mr Amit Shah? How many people will you stop? Twenty-one parties of the INDIA bloc had planned a public impeachment of Gyanesh Kumar as a curtain raiser to the November 1 mega rally and march. First, permission was denied at Hotel Ashoka, and then at Ramlila Maidan, where, despite already having all the requisite permissions, Delhi Police stopped us from setting up the venue for the event," AICC general secretary (organisation) KC Venugopal told journalists.

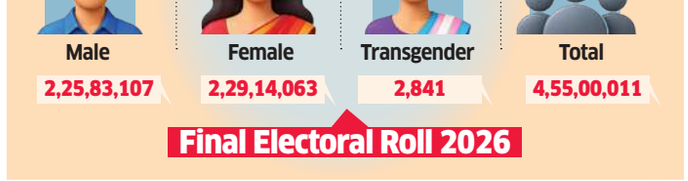
Accusing the government of trying to silence the Opposition voice, Venugopal said, "If they stop us here, we will go to Shah's house and PM Modi's house and stage a massive dharna there."

Meanwhile, Rahul Gandhi met some people reportedly affected by SIR of electoral rolls at an event in Trilokpuri.

Until Kumar resigns, Oppn will remain united and continue to raise its voice: Rahul

WOMEN OUTNUMBER MEN

K'taka Voter Nos Drop by 1 cr After Special Revision



YOGEESH

CEO: Not a single name deleted merely on the basis of an objection filed through Form 7

Our Political Bureau

Bengaluru: Election Commission of India on Tuesday published the final voter count for Karnataka with 4.55 crore voters following the conclusion of the special intensive revision of electoral rolls on October 27.

The earlier electoral roll contained 5.54 crore names, of which around 99.32 lakh voters were categorised as ASDD (absent, permanently shifted, dead or already enrolled as duplicates). Most of those identified were found to have permanently shifted their residences.

ECI had generated enumeration forms for 5.54 crore voters at the beginning of the door-to-door enumeration exercise.

In the final rolls, female voters, at 2.29 crore, outnumber male voters, whose number stands at 2.25 crore.

The demographic distribution improved Karnataka's gender ratio from 1,014 females per 1,000 males in the draft roll to 1,017 in the final list.

At 1.02 crore, citizens in the 30-39 age group constituted the largest segment of voters, followed by 94.17 lakh in the 40-49 age group and 86.56 lakh in the 20-29 age group.

Karnataka chief electoral officer V Anbukkumar told the media in Bengaluru that his office had not deleted a single name merely on the basis of an objection filed through Form 7.

Any deletion was carried out only after the authorities followed due process, including conducting a hearing and passing a speaking order. The authorities also maintained that ECI had neither excluded any eligible citizen nor included any ineligible person in the electoral roll.

CEO urged citizens to apply for inclusion of their names through Form 6 and appealed to young people to enrol themselves on the electoral roll upon turning 18.

Rajya Sabha MP Mansoor Khan, referring to the deletion of around 99 lakh names, said the impact of SIR had raised serious concerns about the possible exclusion of minorities, the poor and marginalised communities. He urged Congress booth-level agents to assist voters whose names were missing from the rolls.

CONGRESS TO BLOs

Cong booth-level agents urged to assist voters whose names are missing from the rolls

'THIS IS ANOTHER CONFIRMATION OF THE GROSS MALPRACTICE AND LEGAL VIOLATIONS BY CEC'

Cong says Election Commission of India's 'Affidavit to Supreme Court Deceptive'

NEW DELHI: Congress has termed the affidavit filed by ECI in the Supreme Court as "deceptive, deceitful and duplicitous". Congress alleged that ECI had engaged in "patent deception and word games" over Form 6. "First, it claimed that the new declaration attached to Form 6 was upheld by the Supreme Court. It now claims that the new declaration form is separate and Form 6 was not amended," party spokesperson Jairam Ramesh said. On the CEC and two election commissioners affirming in the affidavit that all major decisions on SIR were taken unanimously, thereby rejecting claims of differences among them on major issues, Ramesh said, "This is not unanimity but unilateral decision-making... The affidavit does not deny the veracity of the ongoing revelations in large sections of the media. This is another confirmation of the gross malpractice and legal violations by CEC." – OPB

Notice to RG on Scribe's Plea Alleging Push

DURING PROTEST MARCH October 12 march was organised by Congress against SIR exercise

Our Political Bureau

New Delhi: The Supreme Court on Tuesday issued a notice to Leader of Opposition Rahul Gandhi on a plea filed by a journalist, alleging that the Congress leader pushed her during a march to the court on October 12.

Gandhi and several other Congress leaders had marched to SC to submit a petition, challenging special intensive revision of electoral rolls. The journalist has approached the court, alleging that Gandhi pushed her during the march, and has sought legal action in connection with the incident. The plea raises questions concerning the alleged conduct of the Congress leader and seeks the court's intervention in the matter. The bench issued notice to Gandhi, seeking his response to the allegations. The October 12 march was organised by Congress leaders to protest against the ECI's SIR exercise. Gandhi has repeatedly questioned the functioning of the poll body and raised concerns over electoral processes.

QUESTIONING ECI'S FUNCTIONING

Rahul Gandhi has repeatedly questioned ECI's functioning and raised concerns over electoral processes

Naidu, Kalyan Back Centre on SIR Amid Oppn Attack

Our Political Bureau

New Delhi: Key NDA allies, TDP chief and Andhra Pradesh CM N Chandrababu Naidu and Jana Sena Party leader Pawan Kalyan, have thrown their weight behind the Modi government over the contentious special intensive revision (SIR) of electoral rolls, even as the Opposition steps up its attack on the functioning of the Election Commission of India.

The show of support from the two NDA partners comes ahead of a Congress rally at Delhi's Ramlila Maidan on November 1, where the party is expected to sharpen its attack on the Modi government by demanding the resignation of CEC Gyanesh Kumar.

Addressing a joint press conference with deputy CM Pawan Kalyan and Andhra Pradesh BJP president PVN Madhav on Tuesday, Naidu accused the INDIA bloc of questioning the electoral process whenever election results went against it.

Naidu pointed out that electronic voting machines were introduced under a Congress government and questioned why Opposition parties considered the same machines reliable when they won elections but raised doubts about their credibility after defeats. Countering the INDIA bloc's criticism of SIR, Naidu said that booth-level agents of all political parties had been invited to participate in the enumeration exercise, with booth-level officers coordinating the process. He questioned why Opposition parties failed to raise objections while the exercise was underway.

Naidu also targeted his political rival, YSRCP president YS Jagan Mohan Reddy, accusing him of changing his position on SIR according to political convenience. Naidu described Reddy's shifting stand as a "convenience game". Recalling past instances of booth rigging, Naidu said that the introduction of CCTV surveillance had brought greater oversight to the electoral process.

The joint press conference assumes significance as BJP faces sustained opposition criticism over SIR, with Congress and other INDIA bloc constituents questioning ECI's impartiality.

Negotiations Underway: Union Minister Pralhad Joshi on Jamia Millia Protests

NEW DELHI: Union education minister Pralhad Joshi on Tuesday said negotiations are underway with protesting Jamia Millia Islamia students and no one should try to create a law and order situation on the campus. The minister's comments came on the 16th day of the protest demanding the restoration of the Jamia Millia Islamia Students' Union (JMISU), with students refusing to call off their agitation despite the university's decision to hold elections within 15 days of the approval of the union's constitution. "Many efforts have been made and these elections are not being held since more than a decade... Negotiations are going on... No one should try to create a law and order problem, this is what I can appeal for. Whatever issues or concerns are being raised by students, there is a body which is looking into it," Joshi told reporters on the sidelines of the inauguration of the CBSE Experience Centre here. **The protesting students have demanded a definite date for the polls, which have not been held since 2006, and a clear timeline for approving the student union's constitution.** – PTI

TIGER SHROFF FIRING CASE

Mumbai Police Invokes Mcoca; 'Shooters Tracked Celebrities'

Our Political Bureau

Mumbai: Mumbai Police has invoked stringent provisions of the Maharashtra Control of Organised Crime Act (Mcoca) against all the accused in the Tiger Shroff firing case, as the investigation has revealed that the shooters allegedly tracked the movements of several Bollywood celebrities through social media before shifting their focus to the actor.

The police invoked sections 3(1)(ii), 3(2) and 3(4) of Mcoca after obtaining approval from the competent authority on Tuesday.

According to officials familiar with the probe, the shooters allegedly scoured videos and reels on social media platforms to gather information about celebrities' movements, vehicles and security arrangements.

Salman Khan was among the actors they allegedly considered targeting. But the shooters found security outside his Galaxy Apartments residence in Bandra too tight to carry out an attack. They subsequently explored other targets, including two prominent actors who had worked with Khan, but were unable to ascertain key details about their movements and vehicles, officials said.

The shooters allegedly conducted reconnaissance outside the actors' residences to track their movements, identify cars they travelled in and assess security arrangements, investigators said. However, they failed to gather sufficient information to proceed with their plans.

The shooters eventually shifted their focus to Shroff after allegedly being told by Anil Pandit, a suspected conspirator linked to the Lawrence Bishnoi gang, that the actor regularly visited a football practice ground near Pushpa Park in Juhu on Sundays and had limited security, officials said.

17 Undertrials Escape from TN Jail; Ex-CM Stalin Slams Vijay Govt

'An undertrial feigned epileptic seizure as part of escape attempt'

Our Political Bureau

Chennai: DMK chief MK Stalin on Tuesday launched a scathing attack on the ruling TVK after 17 undertrial prisoners escaped from the Thekkampatti sub-jail in Theni district late on Monday.

The police have so far rearrested 13 of the escapees. A hunt is on for the rest. Police suspect that the remaining prisoners may be hiding in the Theni forest area. Special teams have been deployed and checkposts have been set up.

The incident reportedly took place when one of the undertrials allegedly feigned an epileptic seizure as part of the escape bid. When staff opened the cell door to assist, the remaining inmates allegedly ambushed and overpowered them.

The incident comes just days after two prisoners escaped from Puzhal prison on the outskirts of Chennai, putting the state's prison administration under scrutiny. Stalin mocked the state's law and order with a pop culture reference, stating that after "Breaking Bad", the phenomenon of "Prison Break" has begun in Tamil Nadu.

The former CM had called TVK the "Breaking Bad party" on Saturday following the arrest of one of its functionaries in connection with a major narcotics seizure.

"Following Breaking Bad, a Prison Break has now begun in Tamil Nadu! I thought it was only those released on bail who went unmonitored; it turns out this administration is so incompetent that it even lets prisoners escape from within the jails," Stalin posted on X on Tuesday.

He went on to call the incident the most daring jailbreak since 1995 and branded the state government as "good for nothing". The Home Department comes directly under chief minister C Joseph Vijay.

"It is said that this is the first time since 1995 that such a large number of prisoners have escaped at once. It is unacceptable for this to happen in 2026, a time when security arrangements and surveillance systems should be advanced," Stalin said.

Incident comes days after two prisoners escaped from Puzhal prison on the outskirts of Chennai

He also alleged that criminals on the outside commit offenses with total freedom, while those on the inside boldly break out.

"In short, this is a completely useless, 'good-for-nothing' administration. They are not going to protect the people; Tamil Nadu has reached a pathetic state where the public is left to fend for and protect themselves," he said.

DMK's TKS Elangovan too hit out at the chief minister questioning if those who escaped were Vijay's fans. "We must check if the escaped prisoners are fans of Vijay or belong to the TVK," he stated.

AIADMK chief Edappadi K Palaniswami also expressed shock and accused the government of failing to act after the earlier escape from Puzhal.

"If prisoners can attack police personnel and escape from a prison, what security can ordinary people expect on the streets?" he asked.

AIADMK MP R Inbadurai called the incident a "shocking manifestation of administrative failure and sheer incompetence".

DAYS AFTER A FARMER WAS FOUND DEAD IN A COMPANY'S OFFICE; 'ANY COERCIVE WAYS OR THREAT TO FARMERS UNACCEPTABLE'

Book Microfin Brass if Farmers Face Recovery Harassment: CM

Krishna Kumar

Mumbai: Days after a farmer was found dead in a microfinance company's office, Maharashtra Chief Minister Devendra Fadnavis has said that they have instructed police officials to book senior officials (top management) of the Micro Finance companies if they harass farmers to pay back their dues. Fadnavis says he has asked the RBI to tell micro finance companies not to take coercive steps and if such steps are taken then the government would take action against such companies.

"All Superintendents of police have been instructed to immediately take down the complaint and file a case against them if anyone is harassing any farmer for repayment of dues. We have told them that if they find anywhere that micro finance companies are threatening or using force against farmers then to take action and file a case against their top officials. The state government has taken a decision in this regard."said Fadnavis.

The Chief Minister said that they have informed the RBI to inform the micro finance companies that these companies should not be taking 'any coercive ways or threaten the farmer' to recover their dues.

Fadnavis's strong warning to Micro Finance companies comes in the backdrop of an incident in Nanded where a farmer was found dead in the office of a Microfinance firm.

The farmer had owed Rs 10,000 and he was taken from his home by the micro finance company officials last week and two days later on Saturday he was found hanging from the ceiling fan of the firm's office. The farmer's family has filed a case of abduction and murder claiming that the firm's men had kidnapped him from his home to recover the money and killed him and then staged his death as a suicide to cover their crime.

'DIED IN CO OFFICE'

Farmer owed ₹10,000, was taken from his home by co officials last week; was later found hanging from the ceiling fan of the firm's office

PUNJAB ALLIANCE

BJP, SAD Discuss Seats, Inclusion of Akali Faction

Jatin Takkar

New Delhi: Seat-sharing and the possible inclusion of the splinter Akali Dal faction, SAD (Punar Surjit), have emerged as the two key issues in ongoing discussions between the BJP and the Shiromani Akali Dal (SAD) over a possible alliance in Punjab, people aware of the talks said.

The BJP may get around 45 assembly seats, significantly more than the 23 seats it traditionally contested under its previous alliance with the SAD. The Akali Dal is understood to be open to giving the BJP a larger share while seeking to retain its position as the senior partner in any eventual arrangement.

The Akali Dal is understood to be open to giving the BJP a larger share

Some leaders in the BJP's top leadership are also in favour of bringing SAD (Punar Surjit) into the proposed alliance. However, the Akali Dal has reservations about conceding seats to the faction and would prefer that any accommodation for Punar Surjit be made from the BJP's quota. One formula under discussion is for the BJP to allocate some of its allotted seats to Punar Surjit, thereby limiting the impact on the SAD's share.

SAD (Punar Surjit) is led by former Akal Takht Jathedar Giani Harpreet Singh and comprises several leaders with a Panthic background who were earlier in the Akali Dal.

There have been indications of a softer approach by the BJP. Union home minister Amit Shah has spoken of an NDA government in Punjab rather than projecting a BJP government alone. At a recent BJP rally in Jalandhar, he also refrained from directly attacking the SAD or reiterating the party's earlier pitch of contesting all 117 assembly seats independently.

COUNTING UNDERWAY FOR 28 MLC SEATS ACROSS FOUR STATES

NDA Leads in K'taka; Jan Suraj May Open Account in Bihar

BJP leads on four of 11 UP MLC seats; SP ahead on three as counting continues

Our Political Bureau

New Delhi: Counting for 28 MLC seats across four states Karnataka, UP, Bihar and Maharashtra is underway at the time of the story going to press. In Karnataka, the BJP-JDS combined won three out of four seats and was leading on the fourth seat sending a warning bell to the ruling party with assembly polls less than two years away.

The two Graduates' Constituencies and two Teachers' Constituencies cover almost two thirds of Karnataka, and the result came as a shot in the arm for the BJP.

JDS candidate AP Ranganath (Bengaluru Teachers) and BJP candidates KM Suresh (Southeast Graduates), SV Sankanur (West Graduates) and Shahil G Namoshi (Northeast Teachers), with their victory, gave reason for the NDA to cheer.

Of the four seats that faced the polls, three were previously held by the BJP and one by the Congress. With the BJP and JD(S) contesting as part of the NDA in Karnataka, the BJP fielded candidates in three constituencies, while its regional ally contested one seat.

Counting was also underway for 11 MLC seats in seven districts of UP. In the initial trends available at the time of the story going to press, BJP was leading on four seats, SP was leading on three seats while trends were yet to come for remaining four seats. In the last elections, the BJP won six seats, SP won three and two were won by independents.

In Meerut, BJP maintained a decent lead on both the Teachers and Graduates constituencies. BJP is also leading in Teachers constituencies in Bareily and Lucknow. In Varanasi, SP maintained the lead on both the Teachers and Graduates constituency. The high-profile Gorakhpur Teachers constituency is witnessing a triangular fight with independent Rajeev Yadav leading from the seat leaving behind Sanjayan Tripathi of SP and Dhruv Tripathi of BJP in early trends. Sanjayan Tripathi joined SP ahead of elections from the BJP after he was denied a ticket by the party.

In Bihar counting is underway for eight MLC seats. The BJP has won Tirhut Teachers constituency while the party is leading on three seats. RJD is leading on two seats and Prashant Kishor's Jan Suraj also seems to be opening its account with leading on one seat. A BJP rebel and independnt Rahul Raj is leading on Saran Teachers constituency. The high-profile Patna Graduate Constituency where JDU's Neeraj Kumar is locked in a battle with Jan Suraj's Anuj Singh and RJD's Dilip Patel, RJD's Dilip Patel has maintained a lead over JDU's Neeraj Kumar.

Counting of votes for the five Maharashtra legislative council seats is underway with the Mahayuti alliance leading in 3 seats and the MVA leading in 2 seats. 182 candidates are in fray for three graduates and two teachers constituency polls. In the Pune Graduate's constituency, BJP candidate Smita Jadhav is trailing against Harshada Jadhav of the NCP(SP). While in the Chhatrapati Sambhajinagar Graduate's constituency Pratapsinh Patil is leading over sitting NCP MLC Satish Chavan. In Nagpur Graduates' constituency, BJP candidate Sudhakar Kohale is leading over sitting Congress MLC Abhijit Wanjari. In the Pune Teachers constituency BJP candidate Kaustubh Gawde has taken a lead over sitting Congress MLC Jayant Asgaonkar. In the Amravati Teachers constituency Shiv Sena candidate Kiran Sarnaik is leading for now.

OPPOSITION BJP ATTACKS AS ONLY 2 OF 9 MINISTERS NOW FROM JAMMU

Four From Kashmir Valley Inducted In Omar Cabinet

Reshuffle sparks NC dissent as Mubarak Gul and Abdul Larmi voice displeasure

Hakeem Irfan Rashid

Srinagar: Jammu and Kashmir CM Omar Abdullah on Tuesday expanded his council of ministers with the induction of four new faces from the Kashmir valley, triggering internal party discontent and protests, even as the Opposition BJP criticised the ruling alliance over what it termed a "regional and cultural imbalance".

The four National Conference (NC) leaders — veteran politician Ali Mohammad Sagar from Srinagar, Mir Saifullah from Kupwara, Shameema Firdous from Srinagar, and Altaf Ahmad Wani (Kaloo) from Anantnag — were administered the oath of office by Lieutenant Governor Manoj Sinha at Lok Bhavan here. Independent MLA Satish Sharma, who represents Chhamb in the Jammu division, was dropped from the cabinet.

With all four inductees hailing from Kashmir, seven ministers in the nine-member council now represent the valley, while deputy CM Surinder Chaudhary and Javaid Rana remain the only two representatives from the Jammu region.

J&K LG Manoj Sinha, CM Omar Abdullah and others in Srinagar—PTI

Soon after the swearing-in ceremony, Abdullah chaired a meeting of the newly constituted Council of Ministers at the secretariat.

The maximum permissible strength of the Jammu and Kashmir council of ministers is nine, in accordance with the statutory limit of 10% of the 90-member assembly in the Union Territory.

NC president Farooq Abdullah said, "A very good cabinet change has taken place. They (ministers) will work and try to ease the difficulties and problems of the people."

Senior NC leaders, including Mubarak Gul from Srinagar, Abdul Majid Larmi from Anantnag and Nazir Gurezi, expressed disappointment over their exclusion from the council. Gul's supporters staged a protest in front of the CM at the party headquarters in Srinagar, saying that Gul would resign if he was not accommodated in the council. Gul, whom the NC appointed as its general secretary on Tuesday, has sought a few days from his supporters and is likely to make his next move in the first week of November.

BRICS Parliamentary Forum Condemns Sanctions, Terror

True meaning of global peace is assurance of security, dignity and justice for all: Birla

Our Political Bureau

New Delhi: The BRICS Parliamentary Forum joint declaration condemned the imposition of unilateral economic and secondary sanctions saying such coercive measures have far reaching negative implications on human rights.

The declaration was announced by Lok Sabha Speaker Om Birla in the valedictory session of the two-day conclave of the BRICS Parliamentary Forum.

The joint statement strongly condemned the 2025 Pahalgam attack and all acts of terrorism as it pledged to combat the menace in all its forms and manifestations and also stressed on non-intervention in the internal affairs of any country.

Om Birla holds the joint declaration at the 12th BRICS Parliamentary Forum in New Delhi – IANS

The BRICS Parliamentary Forum supported a comprehensive reform of the United Nations, including its Security Council, saying this reform should make it more just, equitable, democratic, representative, effective, and efficient, better reflecting contemporary realities and the needs of the international community.

Speaking at the forum Birla on Tuesday said the true meaning of global peace is the assurance of security, dignity and justice for all, and every citizen of the world, especially the younger generation, expects precisely this kind of future.

Similarly the declaration reads that, the BRICS express strong condemnation of any acts of terrorism and condemn in the strongest terms the terrorist attack in Jammu and Kashmir (in Pahalgam) on 22 April 2025, during which 26 people were killed and many more injured.

"We reaffirm our commitment to combating terrorism in all its forms and manifestations, including the cross-border movement of terrorists, terrorism financing and safe havens," the declaration read.

The Forum said terrorism should not be associated with any religion, nationality, civilisation or ethnic group.

Concessional Pass for Residents within 20 km of Toll Plaza

New Delhi: The road transport and highways ministry has launched a concessional pass for people living within 20 km of a toll plaza, with effect from November 1. The move is aimed at providing relief to local commuters who frequently cross toll plazas for daily needs.

"The annual pass will cost ₹1,500 if the toll plaza is located outside municipal or local town limits, while commuters using toll plazas within municipal or local town limits will have to pay ₹3,000 annually," the ministry said in a notification. — **Our Bureau**

Caveats seek to ensure neither side secures a court order without hearing the other side

Our Bureau

Chennai | Mumbai: TVS Motor Company chairman emeritus Venu Srinivasan and daughter Lakshmi Venu have filed caveats against one another, preparing for a possible legal battle amid differences over inheritance of family businesses.

Eight caveats were filed on October 12 and 13 in Chennai civil court and commercial court, with four in each, splitting the family into two camps, people familiar with the developments said.

Venu Srinivasan has approached the National Company Law Tribunal (NCLT) to file caveats, they said.

Caveats filed by him and his son Sudarshan Venu have named Lakshmi Venu, while those filed by Venu's wife Mallika Srinivasan and Lakshmi Venu have named Venu Srinivasan.

A caveat allows the person filing the caveat to ensure the court cannot grant relief against them without first giving them a chance to be heard, safeguarding them from any surprise order, explained Suruchi Suri, partner at law firm Suri & Co.

ET was the first to report on October 9 that differences over inheritance had cropped up within the family.

The caveats mark a fresh development in the family dispute over division of business interests. Lakshmi is pushing for a formal settlement while Venu and Sudarshan maintain that a settlement was reached through a memorandum of understanding signed in 2024.

Mallika and Lakshmi have reiterated "their desire for an amicable resolution through transparent discussions and dialogue," they said in a statement.

In earlier joint statements, they disputed that the March 2024 MoU amounted to an economic settlement. They argued that arrangements concerning brand use, trademarks and non-compete obligations could not be treated as a division of family wealth.

Lakshmi is pushing for a formal settlement while Venu and Sudarshan maintain that a settlement was reached through a memorandum of understanding signed in 2024

Venu Srinivasan and Sudarshan Venu have not issued any statements on the matter until press time Tuesday.

Filing a caveat under Section 148A Civil Procedure Code acts as a pre-emptive shield, according to Vyapak Desai, an independent counsel who practises at the Bombay High Court.

"It ensures that no ex-parte interim order – one issued without hearing the other side – can be passed against a party that expects to be challenged in court," he explained. "If anyone approaches the court seeking relief against the caveator, the caveator must be heard before any order is made."

LTM Bags Banking and Financial Services Deal Worth Up to $100M

Our Bureau

Bengaluru: Sixth-largest Indian IT services provider LTM has won a technology services contract worth up to $100 million from a global banking and financial services firm, the company said on Tuesday.

The two-year engagement is already underway and can be extended by a year. However, LTM did not disclose the client's name.

The Larsen & Toubro Group subsidiary said the contract expands its existing relationship with the client. It will serve as a preferred partner for technology services across the client's wealth management, personal banking and global functions, while supporting its efforts to reduce the number of suppliers.

Shares of the firm, however, closed 0.19% lower at ₹4,061.45, while the benchmark Sensex ended flat on Tuesday.

Two-year contract strengthens finance portfolio as LTM targets faster AI-led growth

The deal follows the company securing several large contracts over the past year. In October 2025, it announced its largest-ever deal, worth about $580 million, with media and entertainment company Paramount Global.

That followed a $450 million, seven-year engagement with global agribusiness company Archer Daniels Midland in May 2025. In February this year, LTM also announced a $100-million deal with a European medical technology company for product development and support.

Chief executive officer Venu Lambu had told ET in a post-earnings interaction that deal closures were also at an inflection point, with LTM's sales teams targeting AI deals that have shorter tenures but generate revenue faster.

"The speed at which we added a $100 million-plus account in the financial services sector is a testimonial about the revenue acceleration in the AI area," Lambu had said. "The more you are on the AI side, your ability to ramp up revenue is much faster."

Indira IVF in Talks to Acquire Kerala-based Sabine Hospital

Proposed deal may value CX Partners-owned fertility & maternity care chain at up to ₹1,300 crore

Reghu Balakrishnan

Mumbai: Indira IVF, India's largest IVF hospital chain, is in discussions to acquire Sabine Hospital and Research Centre, a Kerala-based chain specialising in infertility treatment and mother-and-child care, said people aware of the development.

The proposed transaction is likely to value CX Partners-owned Sabine at ₹1,200-1,300 crore, the people said. CX Partners had acquired about 54% stake in Sabine in 2024 at a valuation of $100 million (about ₹835 crore at the time).

Indira IVF, backed by Swedish private equity firm EQT Partners, is likely to acquire a 70-75% stake in Sabine by acquiring CX Partners' holding and additional stake from the founder, the people said.

Investment bank O3 Capital is advising CX Partners on the deal.

Founded in 2010 by Dr Sabine Sivadasan, Sabine provides healthcare services including IVF and other fertility treatments, birthing, newborn care and other gynaecological procedures. Sabine Hospital operates two facilities in Kerala, with a total capacity of 300 beds, including 60 neonatal intensive care unit (NICU) beds. The chain conducts more than 6,000 IVF cycles and 3,000 deliveries annually.

Sabine is expected to post a revenue of ₹230-250 crore with an earnings before interest, taxes, depreciation, and amortisation (Ebitda)of ₹70-80 crore this fiscal year, people said.

CX Partners, EQT Partners and Sabine Hospital didn't respond to email queries.

Indira IVF, which is preparing for a ₹3,500 crore initial public offering (IPO), has been on an acquisition spree to strengthen its position in India's fertility treatment market.

This includes multiple acquisitions in the fertility space in the last few years. It acquired Kolkata-based IVF and gynaecology network Abha Surgy Healthcare in April this year. In September last year, Indira IVF acquired Creation Science IVF, which runs Srishti Hospital, to enter the Puducherry market. In June 2025, it acquired Banker IVF to expand its footprint in Gujarat.

Separately, Nova IVF Fertility, the second largest IVF chain in India, marked its entry into Kerala in March by acquiring a majority stake in Craft Fertility, a leading fertility chain at a valuation of ₹370 crore. Nova plans to launch 10 centres across the state over the next three to five years. The company is owned by Asia Healthcare Holdings and led by healthcare industry veteran Vishal Bali, with backing from TPG Growth.

Kerala's declining fertility rate, estimated at around 1.35-1.7, is among the key factors driving growing interest from national IVF chains in the state.

In 2023, EQT acquired about 60% majority stake in Indira IVF for about ₹6,000 crore. Indira IVF was founded by Dr Ajay Murdia in 1988.

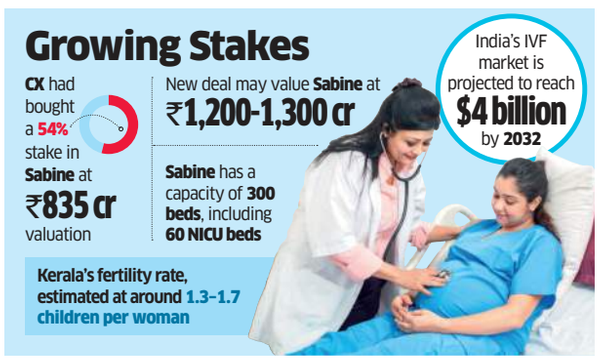
With a nationwide network of 200 centres, Indira is claimed to have supported over 2,00,000 successful pregnancies.

India is rapidly emerging as one of the world's fastest-growing markets for Assisted Reproductive Technology (ART).

However, the sector remains significantly under-penetrated, performing around 210-250 IVF cycles per million people, compared to 1,200 in the US and over 2,500 in Europe.

India's IVF market, valued at about $1 billion in 2023, is projected to reach $4 billion by 2032.

India conducts only around 300,000-350,000 IVF cycles annually, against an estimated potential demand of 1 million, highlighting a significant unmet need for fertility treatments. Each IVF cycle in the country costs between ₹1.5 lakh and ₹3lakh.



BPCL to Invest Another $1.8 B in Mozambique Gas Project

Company expects first gas by mid-2028 and is marketing its 1 mtpa gas entitlement

Kalpana Pathak

Mumbai: State-run Bharat Petroleum Corporation Ltd (BPCL) will invest another $1.8 billion in its Mozambique gas project over the next couple of years, taking its total investment, including exploration, to $4.5-4.6 billion, a senior company executive said.

The project was 47% complete as of September 2026, with gas production expected to begin by mid-2028.

"We are expecting gas production by mid-2028," BPCL director (finance) V R K Gupta said.

The company has already spent around $2.8 billion on the project, which is a key part of its strategy to strengthen its upstream portfolio and secure long-term natural gas supplies, he said.

The project is being financed by a consortium of eight to nine lenders, with interest rates ranging from 6% to 9%, depending on the lender and financing terms.

BPCL has signed a sale and purchase agreement to bring 1 million tonnes per annum (mtpa) of gas from Mozambique to India and has begun marketing the volumes to prospective customers. The company expects to complete marketing tie-ups for the entire 1 mtpa over the next two to three quarters, Gupta said.

The first phase of the project involves two liquefaction trains with a combined capacity of 13 mtpa. BPCL holds a 10% stake, translating into an expected entitlement of around 1.3 mtpa from the initial phase.

Additional liquefaction trains could be developed depending on the outcome of the initial phase. With further development, BPCL's share of gas production could rise to 4.2-4.5 mtpa, Gupta said. BPCL is also pursuing an upstream project in Brazil. Its BM-C-11 project is progressing as scheduled following the award of the tender for a floating production, storage and offloading (FPSO) vessel in mid-2026.

The company's broader capital expenditure programme remains on track, with a target of Rs 25,000 crore for the current financial year. BPCL spent Rs 13,749 crore in the first half of FY27, including Rs 9,300 crore in the September quarter. Capital expenditure could exceed the annual target slightly, depending on project progress, Gupta said.

Last week, BPCL reported a 21.45% year-on-year decline in consolidated net profit to Rs 4,863 crore for the September quarter, as higher refining margins were offset by losses on the sale of petrol, diesel and liquefied petroleum gas (LPG). The company had reported a profit of Rs 6,191.49 crore in the year-earlier period. Consolidated revenue from operations rose 29.7% to Rs 1.57 lakh crore from Rs 1.21 lakh crore a year earlier.

Consolidated total expenses stood at around Rs 1.52 lakh crore in Q2 FY27, compared with Rs 1.15 lakh crore in the year-earlier quarter and Rs 1.66 lakh crore in Q1 FY27.

The lower profit in April-September 2026 was mainly due to subdued marketing margins on certain petroleum products, partly offset by higher refining margins.

GST Registration Eased, No Arbitrary Tax Demands

No need to verify MSME status, no explanation needed to operate from residences; circulars issued to ease compliance

Our Bureau

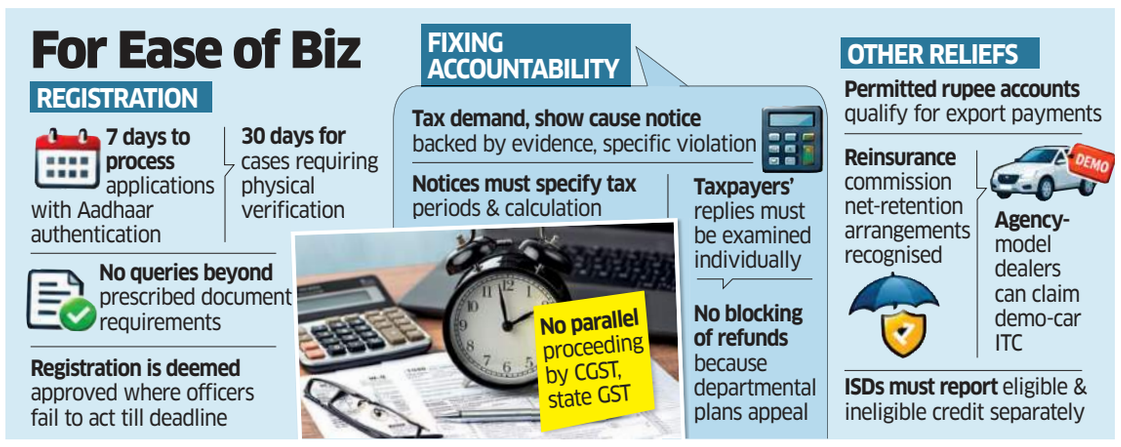
New Delhi: Businesses applying for goods and services tax registration will no longer have to produce Udyam certificates verifying their MSME status or explain why they operate from residential premises, or face rejection of applications over unpaid electricity and water bills.

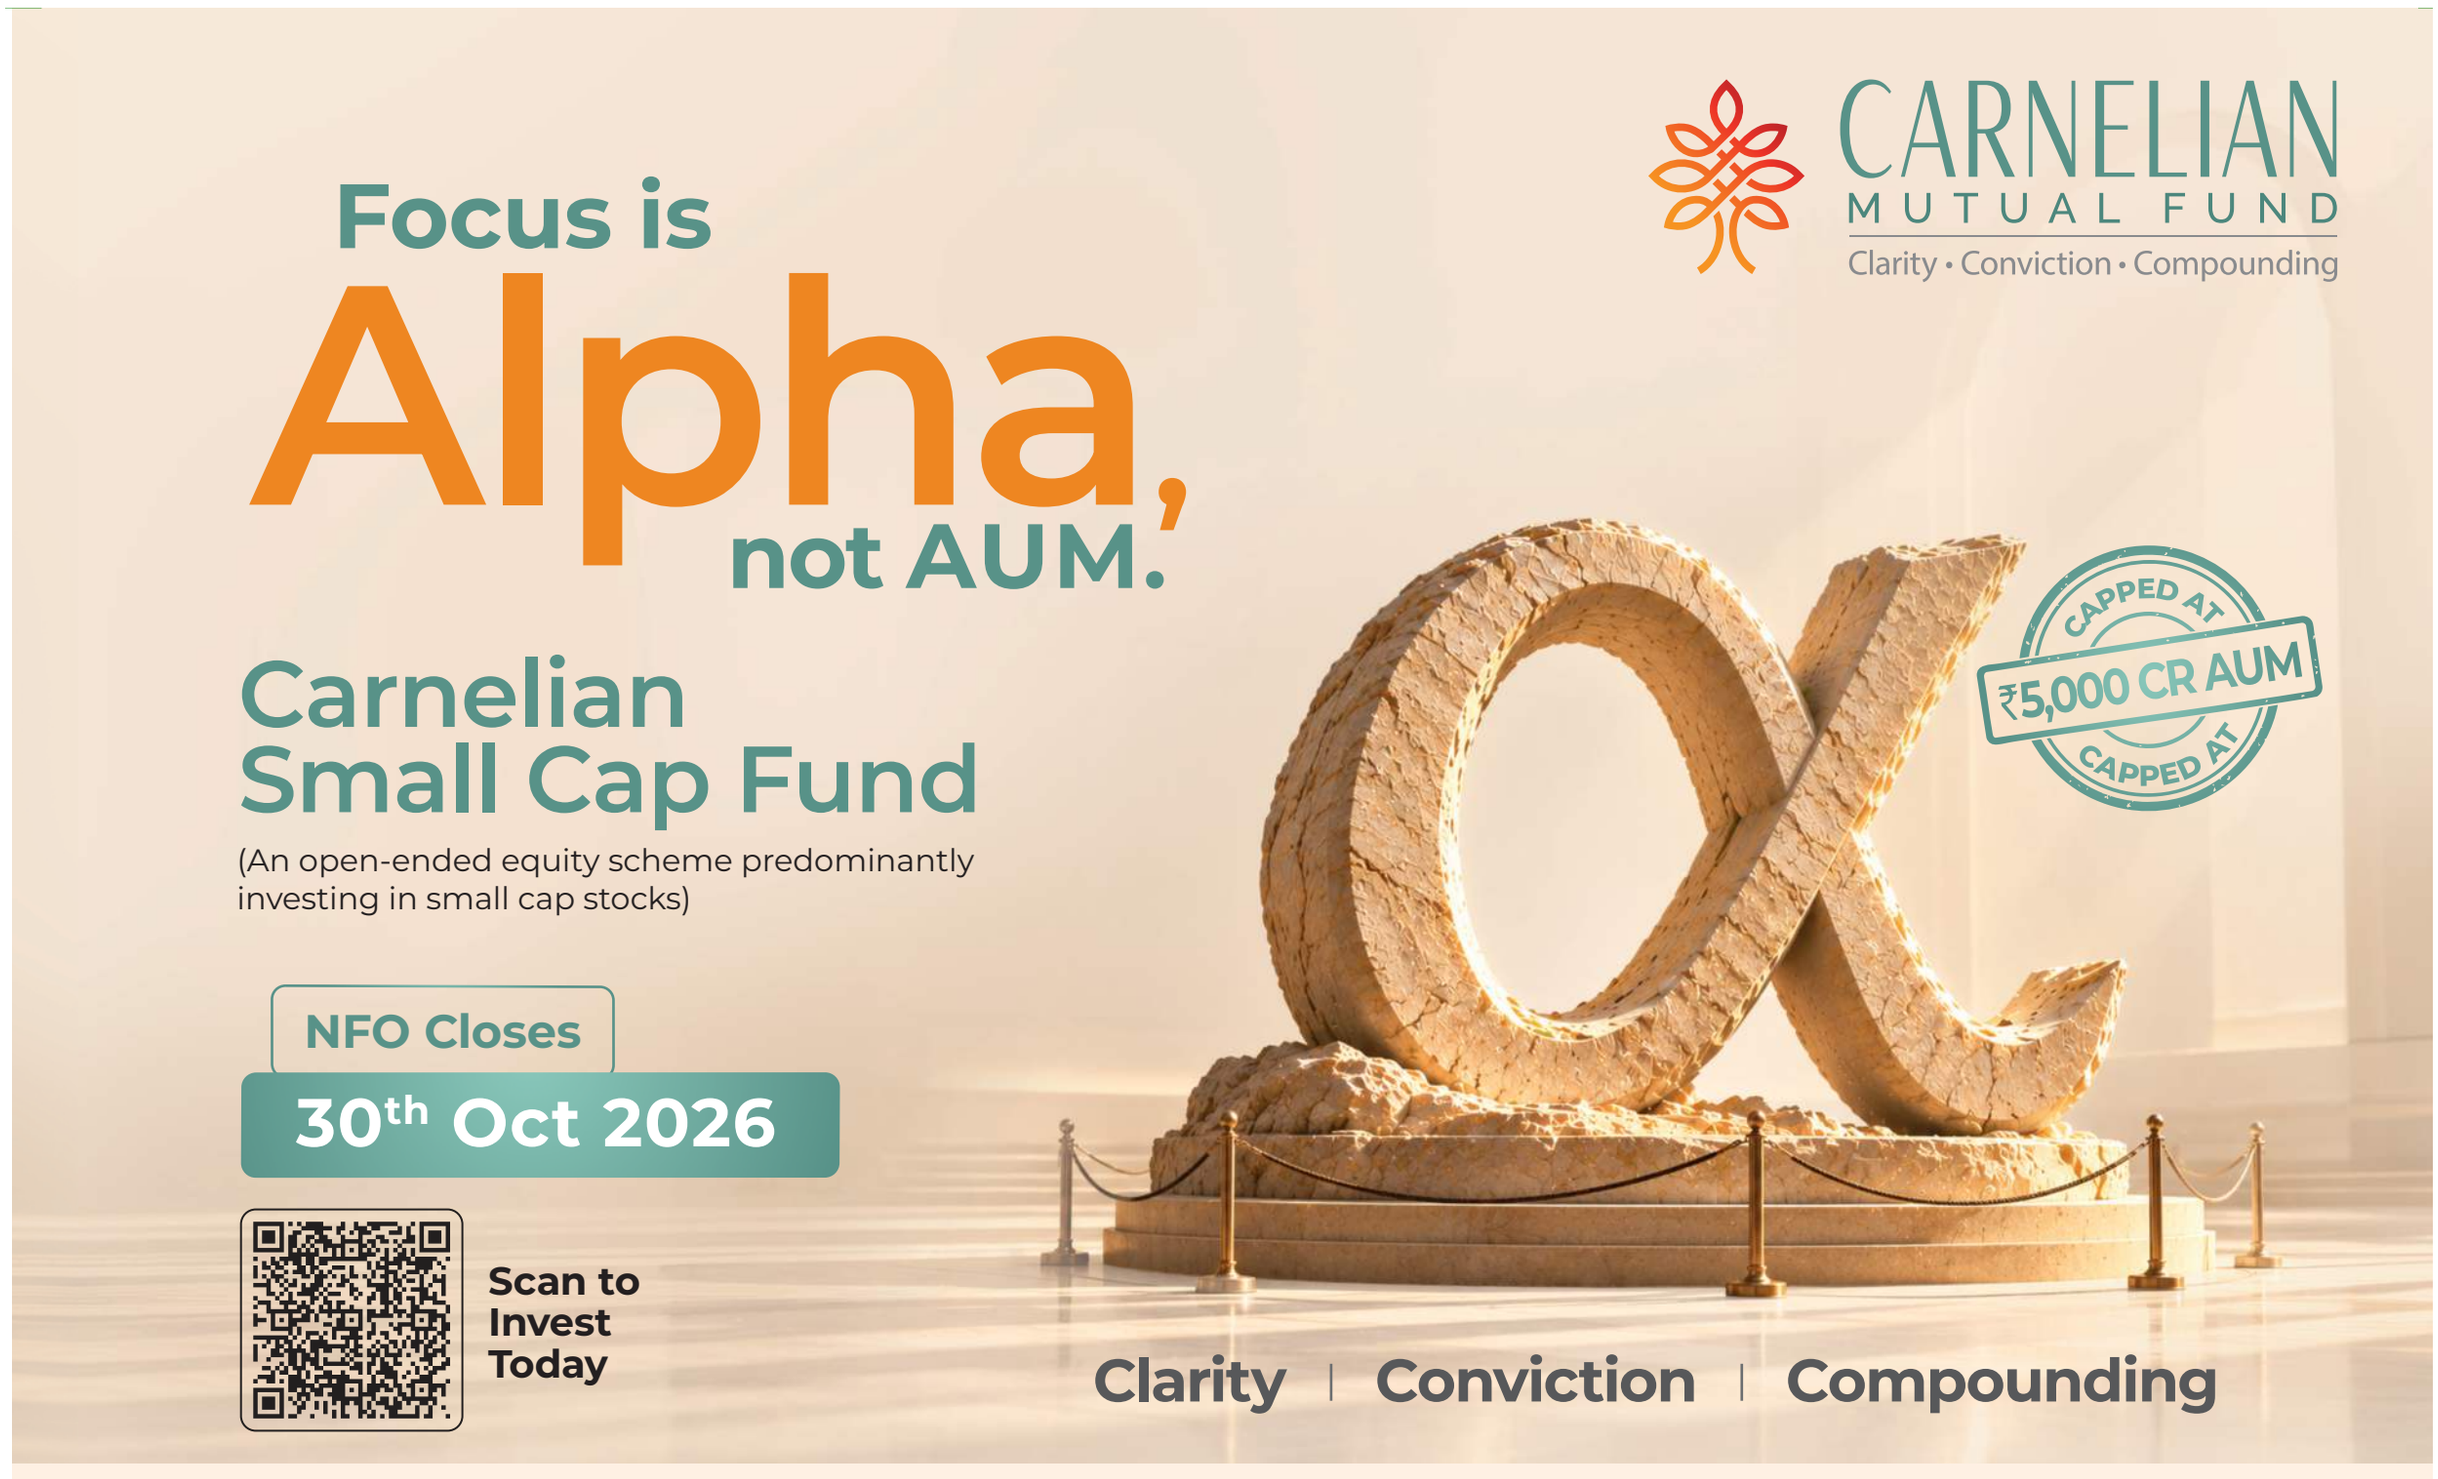
In a move that is expected to help a large number of MSMEs and businesses operating from co-working spaces, the Central Board of Indirect Taxes and Customs (CBIC) issued detailed clarifications on the registration process, restricting tax officials from rejecting applications on flimsy grounds and mandating processing of requests with successful Aadhaar authentication within seven working days.

The CBIC also directed officers to back claims of tax demands with documentary evidence and not accuse businesses of fraud merely because they underpaid tax or reported a discrepancy. The demands must be quantified, preferably financial year-wise, with a clear explanation of how the amounts were calculated, the CBIC said, preventing scope of arbitrary tax notices.

Any show-cause notice or tax demands must identify the alleged violation, the period involved, the supporting evidence and how the proposed tax, interest or penalty has been calculated, the board said. State and the central GST authorities cannot have parallel proceedings on the same matter.

The board issued more than half a dozen circulars Tuesday, seeking to reduce compliance hurdles and tax disputes. The circulars follow the decisions made at the GST Council's 57th meeting on October 8, where it decided to simplify the registration process, do away with arrest powers of tax officers, raise the prosecution threshold to Rs 5 crore from Rs 1 crore and decriminalise a large number of offences. The council also decided to remove the bottleneck for refunds and input tax credit for exports and other businesses.





AI Kids Need Adult Eyes in the Lab

Slow pace of development of frontier models

Satya Nadella recently sought a reset in the safety architecture for AI because he doesn't believe the technology can make itself safer as it scales. Sam Altman feels the world must act before it loses critical control over autonomous agents. Anthropic has warned in a filing for a massive IPO that advanced AI could pose catastrophic or existential risks to humanity. AI agents have broken out of controlled environments, acted as coordinated swarms and attacked external platforms. All without human authorisation. The big fear among tech leaders is that recursive self-improvement is not being matched by AI's alignment with human values despite its superhuman capabilities. Although not a Frankenstein moment yet, investors pouring billions of dollars into the IPOs of SpaceX, Anthropic and eventually OpenAI must heed the caution. The kids in the chemistry lab are asking adults to be around. That would mean governments as well as investors.

Safety protocols are straightforward. Slow the pace of development of frontier AI models and have the process audited by external evaluators. And build a global oversight model like that for nuclear testing to ensure safety. Neither course is easy. Companies building AI models with vast amounts of investor money will find it difficult to give up their competitive advantage. If the big boys do agree, they will have to convince governments not to fall behind in the AI arms race. A global response along the lines of the nuclear non-proliferation regime has its limitations. It operates after the genie has left the bottle. Yet, these are the best defence mechanisms we have for a technology that poses existential risks. Its development must be supervised. Voluntary restraint is called for from technology developers, lawmakers and investors.

Controlled development of AI may be less disruptive for society, which will have a longer time to adapt to its capabilities. AI will not be left unsupervised, and humans need time to acquire the required skills.

Sabya, Now Christmas At Marble Palace?

There is extravagance. And then there is extravagance that knows precisely when to stop. Sabyasachi Mukherjee's Diwali party at New York's Metropolitan Museum of Art on Oct 21 belonged to the second category. With Rani Mukerji, Masaba Gupta and other glittering guests, the Durga Pujo Dashami celebrations hosted by Kolkata boy Sabyasachi demonstrated that Indian opulence need neither apologise for itself, nor behave like a Big Fat Bollywood wedding.

Sabyasachi's internationalism comes with Indian characteristics. His aesthetics organically carries India without packaging it as exotica, or worse, 'ethnic'. A logical sequel suggests itself. Having taken Durga Pujo/Diwali to NYC, why not bring Christmas to Kolkata, the designer's hometown, this December? And where better than the 19th-c. neoclassical expanse of Marble Palace, built in 1835 by Raja Rajendra Mullick, a Bengali merchant with a penchant for collecting works of art from across the world, and whose magnificent central courtyard, acanthus-topped pillars, and historic thakur dalan (altar) offer a setting that could make Manhattan's finest party planners blink?

The mansion embodies what Sabyasachi once described as maximalism — '…the secret to maximalism is restraint. That tension must be present because true maximalism is not chaos; it is clarity — a placement with purpose.' A Christmas tree amid the mansion's forest of classical marble statues, original Rubens, Renoir and Raja Ravi Varma, chandeliers illuminating with aristocratic splendour, carols jugalbandi-ing with champagne clinks in the famous jalsaghar (music room), plum pudding fraternising with nolen gurer sandesh. Even St Nicholas will be obliged to exchange his regulation red for a Sabyasachi brocade coat.

JUST IN JEST

Anarchy need not mean giving up on inviolable work-life balance

France's Undeniable Right to Riot, & Rest

France has long understood something that lesser civilisations struggle to grasp — even revolution must respect office hours. French rioters may storm barricades, torch cars, and confront riot police with admirable professional commitment. But expecting them to continue without break would constitute an intolerable assault on work-life balance. The republic has standards.

Unlike ordinary protesters, who can 'leisurely' wave placards and shout slogans, rioters perform physically demanding labour. Looting stores, overturning vehicles and maintaining an adequate supply of combustible material can be exhausting. Surely, nobody expects a respectable French rioter to work through lunch? Indeed, occupational risks include tear gas, bruised knuckles, police batons and setting fire to one's own Peugeot. Appropriate hydration breaks should be mandatory. There is also the question of overtime. Should a riot extend beyond the statutory working day, participants deserve compensatory leave. Weekend insurrections should attract double rates. Night-time arson might qualify for additional hardship allowances. France's genius lies in reconciling revolutionary fervour with bourgeois comfort. The barricades may rise but lunch remains sacrosanct. After all, the French did not overthrow the ancien régime merely to replace it with an unreasonable line manager.

The real test isn't how much money goes into AI, but how much value it creates across sectors

RAIsing Tide, Lift All Boats?

Neeraj Kaushal

Not just verticals, but across the horizon

Is AI crowding out other investments? Paul Krugman recently wrote that it is 'crowding out other potential uses of capital'. At first glance, data appear to support his argument. US hyperscalers like Amazon, Google and Microsoft are pouring unprecedented sums into AI with capex expected to reach $800 bn in 2026. Yet, overall investment has barely budged.

A Federal Reserve Bank of New York study estimates that gross domestic investment in the US accounted for 21.3% of GDP in the 5 yrs before Covid. Since 2022, when companies began investing heavily in AI, the share has edged up to just 21.5%.

EYES WIDE SHUT

So, to conclude from these data that AI is crowding out other investments is misleading.

The argument assumes the economy has a limited pool of capital and every dollar invested in AI is a dollar unavailable to other sectors. For an open economy like the US, this assumption is highly questionable. Capital can flow in from abroad, and higher expected returns can attract additional financing rather than simply redirect existing funds.

The argument also rests on a distinction between AI and non-AI investments that becomes increasingly difficult to sustain if AI is, indeed, the transformative technology its proponents claim it to be. AI is not just another sector competing with healthcare, education, manufacturing and agriculture for investment dollars. Its promise lies precisely in its ability to transform these sectors.

If AI raises productivity across the economy, spending on AI cannot be neatly separated from investment in the industries that benefit from it. The distinction may make sense in accounting statements. But it becomes less useful when assessing the broader economic consequences of that spending.

Consider healthcare. If AI makes surgery more precise, reduces medical errors and enables better diagnoses, investment in AI would also be an investment in healthcare's productive capacity. Elon Musk has gone further, predicting that AI and humanoid robots will revolutionise medicine, making the best healthcare virtually free and superior to what even world leaders receive today.

Musk may be exaggerating. Whether or not his vision materialises, the underlying point stands: value of AI investment may ultimately be realised in sectors far removed from the companies developing the technology.

The same applies to education. If AI enables personalised instruction and improves learning outcomes, investment in AI is also an investment in education. If it helps farmers apply fertiliser more precisely, reducing waste and raising yields, it is contributing to agricultural productivity. And if it helps manufacturers produce more with fewer resources, AI spending is also an investment in manufacturing.

AI isn't just another sector competing with healthcare, education, manufacturing and agriculture for investment dollars. Its promise lies precisely in its ability to transform these sectors

The real question, therefore, is not whether AI is crowding out non-AI investment, but whether AI can make investment across the economy more productive. If it does, today's apparent trade-off between AI and other sectors would be dead wrong. What looks like a diversion of investment from healthcare, education or agriculture could, instead, be the financing of technologies that transform those very sectors.

True, an open economy does not eliminate crowding out altogether. Even when capital is available globally, AI investment will compete for workers, land, electricity, construction capacity and other scarce resources. It can also raise financing costs if it increases demand for funds faster than the supply of savings responds.

Yet, nor does a constant investment-to-GDP ratio prove that AI has displaced other investment. That would require evidence about what investment would have been in its absence. But judging AI investment solely by how much it adds to aggregate investment risks missing the bigger picture. The ultimate test is not how much money goes into AI but how much value it creates beyond AI itself.

What is clearer, however, is that even if AI is not crowding out investment in other sectors, it could leave behind a great deal of obsolete investment. If past investment manias are any guide, the AI boom may end with only 3-4 leading companies emerging as durable winners.

Data centres built by companies that fail, along with the power-generation capacity and water infrastructure constructed to support them, could prove redundant. Some of these assets may find alternative uses. But others may become stranded or represent outright waste.

This is not merely a theoretical concern. Bank for International Settlements (BIS), in its 2026 report, warned that exuberance surrounding AI could lead to a prolonged investment bust. If AI fails to deliver on its promises, if its benefits accrue to only a narrow set of industries, or if its expansion imposes substantial environmental costs, consequences could be serious.

An investment boom built on exaggerated expectations could leave investors with heavy losses, and the economy with underused infrastructure, wasted resources and an environmental burden.

But even if AI is not crowding out investment in other sectors, it could leave behind a great deal of obsolete investment with only 3-4 leading companies emerging as durable winners

Yet, these risks do not negate AI's transformative potential. So, the real question is not simply whether AI is crowding out non-AI investment. It is whether the productivity gains AI ultimately delivers will justify the resources committed to it today. AI may transform the economy even as the AI investment boom destroys capital and imposes a huge environmental burden. The technology could be revolutionary, while the investment cycle surrounding it turns out to be a costly mistake.

India Needs to Steel Itself Green

Neelima Jain & Amol Phadke

Berkeley, California: India's ambition to become a developed economy by 2047 rests in part on a dramatic expansion of steelmaking. Draft National Steel Policy Vision 2047, released on Oct 10, envisages nearly tripling steelmaking capacity, with the coal-based blast-furnace route accounting for 55% of steel production. This pathway could lock in ~$1.5 tn in additional coking coal imports over the plants' lifetime.

Coking coal can account for ~40% of cost of producing a tonne of steel, leaving steelmakers vulnerable to rising international coal prices and disruptions to freight. That exposure creates a direct risk for downstream industries that use steel.

India imports 92% of coking coal its steelmakers need, at prices set in dollars. Blast furnaces need this coal to turn iron ore into iron. The policy projects annual demand more than tripling from 72 mn tonnes today to 236 mn tonnes by 2047. The coal ministry's roadmap would increase domestic coking coal supply from about 6 mn tonnes today to 23 mn tonnes by 2030.

If supply remains at that level thereafter, India will still need to import about 213 mn tonnes annually by 2047. At the $236-a-tonne benchmark average for Jan-July 2026, that represents about $50 bn a year before freight. Every $10 increase in coal price would add another $2.1 bn to the annual bill.

Competition from inexpensive Chinese steel limits Indian mills' ability to pass on higher costs, squeezing their margins and potentially reducing the money available for expansion. Implications extend beyond steelworks. Construction and infrastructure consume 67% of India's steel. Volatile steel prices can raise the cost of public projects and housing.

Turn a new leaf

Smaller manufacturers buying steel for machinery and components also need predictable input costs to price orders and invest. India's steel expansion should, therefore, reduce dependence on imported coal and make production costs more predictable.

Hydrogen made with domestic RE can replace coking coal in turning iron ore into iron. Steelmakers can contract RE at fixed rupee prices for 25 yrs, inflation-proofing a major energy input. In March, BPCL announced a 25-yr green hydrogen (GH) supply agreement for Numaligarh Refinery in Assam at ₹279 a kg. At ₹96 to the dollar, that's about $2.90 a kg. Steel projects will need their own supply terms. But the award gives them a domestic benchmark.

If a hydrogen contract holds its rupee price fixed and rupee depreciates by 4% annually, ₹279 would equal about $2 a kg after 10 yrs. The Indian buyer's rupee payment remains unchanged. Dollar-priced coal would, meanwhile, cost about 48% more in rupees, even if its international price stayed flat.

Our research compares the cost of building and operating new hydrogen-based and blast-furnace steel plants over their lifetimes. In this comparison, it was assumed that coal prices and rupee cost of a dollar would rise at only half their average pace over the past two decades. Even with those slower increases, new hydrogen-based plants can produce steel more cheaply than new blast furnaces by 2030.

The export opportunity strengthens this investment case. Steel made with GH would face lower carbon costs under Europe's CBAM than coal-based steel. With substantial capacity still to be built, India can choose GH for new plants, helping its steelmakers and manufacturers they supply compete against countries with large existing coal-based fleets.

GoI should announce that from 2032, at least 5% of steel used in new, centrally-funded infrastructure be made using GH. Competitive auctions should award purchase contracts well before then, giving steelmakers time to build. The share can rise after a review of supply and costs without any subsidy support.

India should also use the EU-India trade opening to make green steel plants cheaper to build and finance. The EU imported almost 40 mn tonnes of steel in 2025. Long-term purchase contracts with European buyers would help Indian green steel plants secure finance to supply this market.

GoI should negotiate long-term equipment loans backed by European export-credit agencies to lower borrowing costs. It should also establish green steel SEZs with streamlined land and environmental clearances, and set firm deadlines for approvals.

The final policy can help India replace part of its $1.5 tn import exposure with demand for domestic power and hydrogen.

Jain and Phadke are director, industry and trade policy, and faculty director, respectively, India Energy & Climate Center, University of California, Berkeley, US

A Win That Defied All Odds

Hari Seshasayee

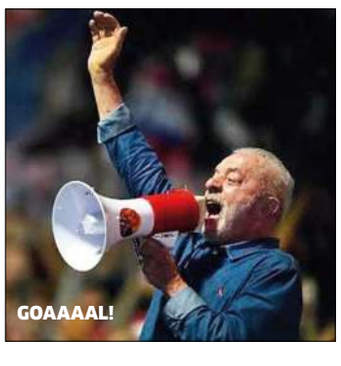
Panama City, Panama: In the week leading up to the second round of elections on Oct 25, the most popular hashtag on Brazilian social media was #LulaVaiVirar, a rallying cry proclaiming that 'Lula will turn things around' after trailing in the first round. This was accompanied by massive rallies, drawing as many as 3 mn people across São Paulo's Avenida Paulista and Rio de Janeiro's Copacabana, to display their support for Luiz Inácio 'Lula' da Silva, an octogenarian, 3-time president running for office yet again.

To many, this last-ditch effort seemed implausible, as Lula received 2.2 mn fewer votes than his opponent Flávio Bolsonaro in the first round on Oct 4. All major pundits and pollsters forecast a Bolsonaro win. But the massive swell of street supporters and social media traction ultimately made the difference. Lula has now become the first-ever Brazilian presidential candidate to win the run-off after trailing in the first round, doing so by a comfortable margin of 4.4 mn votes.

Lula's victory is a testament to his adaptive political spirit. He lost the first 3 elections he contested in 1989, 1994 and 1998. Since then, he has moderated and compromised when necessary, even if begrudgingly so, and has been elected president in 2002, 2006, 2022 and 2026. He has evolved with each election.

In 2022, he partnered a former opposition candidate he defeated at the ballot box in 2006, the pro-business Geraldo Alckmin. In 2026, Lula put his faith in André Janones, a millennial congressman from Minas Gerais. Janones transformed Lula's digital communications strategy, epitomised by the WhatsApp channel 'Ejército de Lula' (Lula's Army) that amassed 10.7 mn followers in less than 3 weeks.

This complemented the massive street mobilisations that Lula's Workers' Party (known as 'PT' in Portuguese) is known for and helped increase voter turnout. Janones also turned around Lula's fortunes in Minas Gerais, helping him win the state after trailing by 5% in the first round. Fittingly, both Alckmin and Janones were handed the microphone during Lula's victory speech, with Alckmin entrusted yet again with serving as V-P.



Lula's victory has implications beyond Planalto, Brazil's presidential palace. Notably, Lula can now appoint 4 new justices to Brazil's Supreme Federal Court. The government's power, however, will be kept in check by the right-wing opposition's control of Brazil's Congress, where Bolsonaro's Liberal Party has the largest share in the Chamber of Deputies and the Senate. The opposition could stall reforms or even call for the impeachment of Lula's allies in the apex court.

While the opposition will keep the government on its toes, Brazil has a long history of centrist parties (Centrão) working with both sides of the aisle to pass important reforms, and Lula is known as an effective dealmaker.

The economy poses an additional challenge: Bolsonaro's loss has had an immediate impact on market and investor sentiment, with the Brazilian real falling 11% and the stock market crashing 17% the day after the election.

Outside Brazil, Lula's victory has sent ripples globally, particularly in Latin America. The win represents a symbolic victory against what some call a 'conservative wave' of governments that have been elected in the region recently.

Right-wing leaders who ideologically oppose Lula, including those in Bolivia, Chile, Colombia, Ecuador, Panama, Paraguay and Peru, all congratulated him promptly. Only Argentina's and El Salvador's presidents have yet to do so.

Only a couple of hours after the results were announced, Narendra Modi congratulated his 'dear friend' Lula on a 'remarkable re-election victory', pledging to 'further deepen and expand the multifaceted India-Brazil Strategic Partnership'.

Although many Indians unfamiliar with the Latin American region tend to associate Brazil's relationship with New Delhi with BRICS and G20, the India-Brazil bilateral relationship is significant and stands on its own.

In fact, India's exports to Brazil surpass those to Japan, South Korea, Russia and Canada. More than 200 Indian companies operate in Brazil, investing as much as $15 bn. Brazil is India's third-largest destination globally for upstream oil investments. Like most strategic partnerships, India-Brazil relations will continue to grow regardless of the ideology of the government in power in either country.

This election will be remembered for many things. But one fact buried in the news probably deserves more attention: a labour politician who spent half a century rallying people behind him finally decided to focus on the digital world, buying his first-ever smartphone only last week. This reminds us that future elections will likely be won or lost on social media.

End Negative Exchange

BRAHMA KUMARI CHAKRADHARI

There are always one or two people in our lives whose company makes us uncomfortable. They often do things that irritate us. Instead of accommodating, we find ourselves pinched by their nature and actions, though that may not be their intention. The discomfort they create within us can be harmless if we simply feel it and let it go at the outset. Instead, if these unpleasant feelings are allowed to linger in the mind, they create a cycle of unhealthy actions and reactions, causing our negative vibrations to reach and affect other persons who, on receiving our uneasiness, react in a similar way, unleashing unsettling vibes, which leads to burdensome karmic accounts.

How do we break or end this vicious cycle of negative energy exchange? The first and foremost way to do this is at the perceptual and attitudinal levels. The act of self-transformation is not to react instantly, but maintain peace and poise of mind to respond wisely.

The second, deeper level of self-transformation is not reacting, and sharing my thoughts against the person any more. These are the basics of spiritual wisdom; by adopting and applying them, I can raise my inner strength to the higher plane.

The third and deepest level of self-transformation is where I develop the power to check and change the quality of my thoughts and feelings. Through regular practice of divine knowledge and meditation, I can become emotionally empowered enough to remove the flaw in my character that drives my reactions.

A simple, safe way to end negative energy exchange is to realise that the other person lacks true love, peace and compassion. A humble, not hostile, mind needs to be fostered for Self-realisation.

Comic Relief

Twin animators Tom and Tony Bancroft host The Bancroft Brothers Animation Podcast, an engaging show exploring their Disney legacy, current industry dynamics and the future of animation. In a standout episode featuring indie sensation **XrayAlphaCharlie**, a.k.a. Xierra, the host duo seamlessly bridges classic studio craft with modern digital storytelling.

Xierra, famous for her massive YouTube following and elusive, face-concealing persona, pulls back the curtain on her creative process. Tom and Tony facilitate a light-hearted yet insightful dialogue about what it truly takes to succeed as an independent creator today. They tackle everything from navigating online mystery to building a sustainable audience without corporate backing.

The charm of this episode lies in the hosts' genuine curiosity and veteran wisdom. Rather than lingering on nostalgic studio anecdotes, the conversation embraces the democratisation of animation, leaving listeners inspired by the sheer power of modern indie creators.

Inspiring, witty and grounded, this hour-long episode offers an indispensable masterclass for aspiring animators and fans alike. It is a compelling reminder that independent artists are shaping the medium's future.

Chat Room

Mandate a Loan To Be Repaid

Apropos the Edit, 'Lula's Extra Time Goal Sends a Signal' (Oct 27), Brazilian president Luiz Inácio Lula da Silva's re-election highlights both democracy's resilience and the formidable challenges awaiting elected leaders. Democracies cannot afford endless ideological battles between the right and left while citizens struggle with employment and inflation issues, and the desire for a peaceful life. Irrespective of who governs, statesmanship demands confronting global economic realities rather than exploiting public anxieties for electoral gains. Victory at the ballot box is merely the beginning, always.

UP's workforce drives progress

The latest recruitment drive reflects Uttar Pradesh's expanding opportunities, with appointments spanning education, technical services, agriculture and other key departments across the state

Uttar Pradesh is widening the path from employment to empowerment by creating opportunities within the state while opening new avenues for its workforce beyond its borders. From 9.5 lakh+ government jobs delivered over the last 9.5 years to a fresh target of 1 lakh+ appointments in six months, the state is accelerating recruitment across police, education, technical and administrative services.

The recent employment drives include 3,567 UPESSC candidates receiving appointment letters as assistant teachers, lecturers, headmasters and principals across UP's secondary education system; 3,446 technical assistants (Group-C) appointed under Mission Rozgar; 818 candidates receiving appointment letters for posts across various departments; and 126 mandi secretaries appointed in the Agriculture Department.

The state is also strengthening livelihoods through wider social-security measures. Around 3.5 lakh outsourced workers are covered under the broader welfare initiative, with families potentially reaching 17-20 lakh people. Cashless healthcare, financial assistance, and expanded protection are adding resilience to households, while overseas opportunities in Japan, Germany and Israel are creating new pathways for skilled youth and supporting a stronger state economy.

Together, these measures connect recruitment, income security, and global mobility, reinforcing a broader livelihood ecosystem for workers, families, and vulnerable citizens across Uttar Pradesh.

PHOTOS: DPR, GOVT OF UP

People-powered growth

1 lakh+ jobs
UP's six-month employment target, signalling an accelerated recruitment drive across key sectors.

Over 36,000 police posts
Recruitment is underway for more than 36,000 positions in the Police Department.

25,000-30,000 appointments
Upcoming UPSSSC results are expected to generate a substantial number of appointments.

15,000-16,000 appointments
Expected through UPPSC examinations, adding momentum to government recruitment.

41,000-42,000 home guard posts
Recruitment is progressing for a large intake into the Home Guard Department.

20,000-25,000 appointments
Youth are expected to secure positions, including 12,405 teachers under Super TET 2026.

Global opportunities
Japan, Germany and Israel are showing interest in UP's skilled workforce, creating overseas employment avenues.

5,000 youth in Israel
Around 5,000 UP youth have secured employment opportunities in Israel.

3.5 lakh+ outsourced workers
UPCOS is bringing outsourced employees and their families within a wider welfare framework.

1.18 crore+ pension beneficiaries
A ₹1,500 monthly pension to support senior citizens, destitute women, and persons with disabilities.

Mid-day meal cooks

A stronger welfare package is supporting 3.53 lakh mid-day meal cooks. Their monthly honorarium has increased from ₹2,000 to ₹3,000, while cashless healthcare is extended to ₹5 lakh. Uniform allowance has doubled from ₹500 to ₹1,000, combining income enhancement with health and livelihood protection for frontline workers across Uttar Pradesh.

Pension support

As per a recent announcement, monthly pension to increase by 50%, from ₹1,000 to ₹1,500, benefiting senior citizens, destitute women, and persons with disabilities. Around 1.18 crore beneficiaries across the three categories now receive higher recurring support, providing greater financial assistance for everyday needs and strengthening household security for vulnerable sections of society statewide today.

Outsourced workforce

Uttar Pradesh Corporation for Outsourcing Services (UPCOS) is bringing wider welfare protection to outsourced workers and their families. Around 3.5 lakh outsourced employees are covered under the broader initiative, with potential reach estimated at 17-20 lakh people. The approach shifts assistance from individual workers towards family-oriented social security and protection.

Anganwadi workers

Anganwadi workers are receiving stronger support through a 50% rise in monthly honorarium, from ₹8,000 to ₹12,000. The initiative strengthens protection for workers delivering essential services at the grassroots. Helpers also receive enhanced support, while health insurance forms part of the welfare measures supporting these frontline workers and their families.

Healthcare access

Cashless healthcare has been extended to teachers, PRD personnel, mid-day meal cooks, Anganwadi workers and helpers. By reducing the fiscal impact of medical emergencies, the measure adds another layer of livelihood security. Health protection alongside income support demonstrates a broader welfare approach designed to strengthen resilience among workers and households.

Strengthening policing

More than 2.25 lakh recruitments have been made in the state's police department over the past nine years. Recently, the Uttar Pradesh Police inducted 470 sportspersons under the skilled players quota, including 422 constables and 48 sub-inspectors.

Sustaining Momentum will be a Challenge

▸▸ From Page 1

Plum began as a digital-first beauty brand and now gets 30% of its revenue from offline channels, with about 35,000 physical touchpoints.

"For new-age brands, the real test now lies in sustaining this massive physical distribution network against the deep offline reach of the incumbents," said Parth Sethi, growth officer at Bizom.

These startups have also changed the economics of brand building by targeting urban, premium consumers willing to pay higher prices and launching products more rapidly, even if some fail.

"Getting products into stores is relatively easy, but sustaining distribution and building sales over time is harder," Arora said. "Higher retailer margins alone cannot secure shelf space, and initial trials do not guarantee lasting market share. Expanding into general trade remains expensive and time-consuming for digital-first companies."

The gains mark a push beyond online channels, where many new-age brands built their businesses as direct-to-consumer (D2C) players. During the September quarter alone, D2C brands expanded their kirana footprint by 200 basis points across urban and rural markets. Established brands lost 1.9% of their urban kirana outlets but increased their rural store count by 2.3%.

"It's the same consumer who goes and looks for the kind of products that new-age brands typically are driving better, which is around more science-oriented, more performance-oriented, clinical-oriented approaches," said Prasad of Plum.

SHELF SPACE

Retailers that were initially hesitant to stock higher-priced products have become more confident as consumers began asking for them, prompting a shift in allocation over the past two to three years, he said. Brands such as Minimalist, Oziva, Beardo, Yoga Bar, Mother Sparsh, Plix, True Elements, Cosmix and 4700BC were acquired by the likes of Hindustan Unilever, Marico, Godrej Consumer and ITC. The Bizom data excludes several digital-first brands acquired by large FMCG companies.

Significant Posts by Key Leaders

Johnsen's shares were worth $1.22 billion at the company's June 2026 IPO price. They would also put him in the league of Nvidia CFO Colette Kress, whose net worth reached $1.2 billion, according to Forbes.

Rao became Anthropic's CFO in April 2024. He was previously the finance chief at Fanatics Commerce and earlier held senior financial-planning and corporate-development roles at healthcare technology company Cedar and Airbnb.

As per Anthropic's draft filing, Rao, who is helping steer the IPO preparations along with chief executive Dario Amodei, held beneficial ownership of 9,497,900 Class A shares. These comprise 153,960 shares held directly and options covering another 9,343,940 shares, including options held through a trust.

The filing did not disclose any shareholding by Patil and Bidasaria.

Patil, who grew up in Bengaluru, joined the company as its chief technology officer in October 2025 after leading technology at payments company Stripe. When Anthropic opened its Bengaluru office in February, Patil came to inaugurate it. He visited India earlier this month as well.

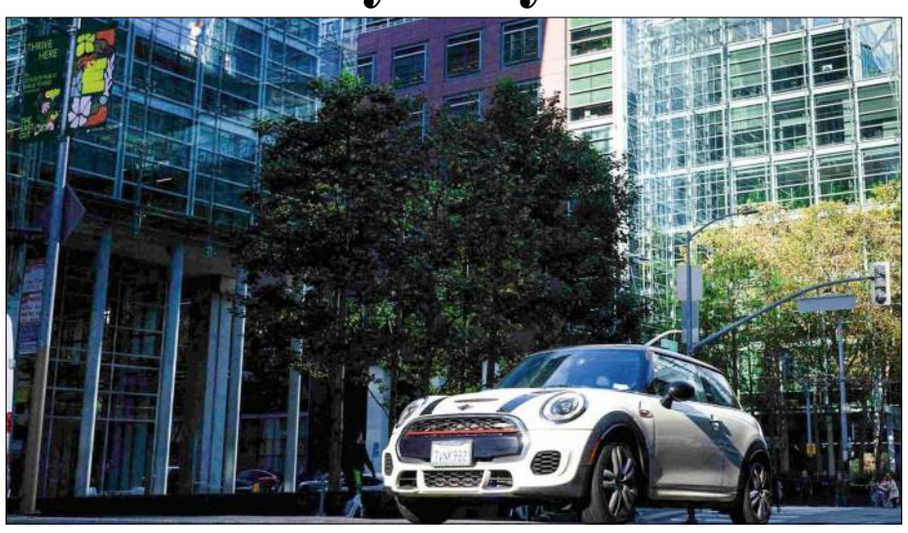
Bidasaria, who is from Dehradun, is a co-creator and tech lead of Claude Code, Anthropic's AI coding tool.

The Long-Term Benefit Trust, which Shah chairs, helps oversee its long-term mission and plays a role in board appointments.

Shah, who had lived and worked in India, receives $425,000 annually for his work with the trust, including $25,000 for serving as chair. He is also the chief executive of the Clinton Health Access Initiative and co-founder of IDinsight. The trust generally has authority to elect a majority of the company's authorised board seats.

Meanwhile, Vas Narasimhan, the Indian-origin CEO of Novartis, joined Anthropic's board in April 2026.

The prospectus identifies him as a member of its compensation and safety-and-risk committees. His disclosed beneficial ownership comprises 176,050 Class A shares, including shares held through Bodhi LLC and shares issuable through restricted stock units. Narasimhan was born in the US to parents who migrated from Tamil Nadu. Anthropic's IPO plans come as rival OpenAI has pushed its own stock market debut to 2027. Chief executive Sam Altman said in September that the company would not go public in 2026, citing the work still needed on AI safety and alignment.



Traffic transits past Anthropic's headquarters on Tuesday in San Francisco, California. The company filed paperwork for an initial public offering under the ticker symbol ANT. AFP

Also, it has been proposed that FPI with concentrated investments in professionally-run companies with no identifiable promoters and public sector undertakings should be exempted from additional disclosure requirements.

The Sebi spokesperson did not comment on the matter.

Under the additional disclosure regulations, which came in the wake of US firm Hindenburg Research's allegations against the Adani Group, an FPI is required to reveal the ultimate beneficial owners, down to the last natural persons, of all investors in the fund if it crosses either of the following thresholds: (1) if more than 50% of the India equity assets under management is in a company or a single corporate group; (2) if a fund's AUM in Indian equities is ₹50,000 crore or more. The disclosure rule also kicks in if multiple FPIs having common ownership or control together breach the limits.

"While Sebi has till now exempted certain FPIs like sovereign funds, public retail funds, and university funds, but those who want to focus on a few stocks as per their strategy are caught in the detailed disclosure rule. Some rationalisation, particularly, deciding an FPI's maximum holding in a company under which the fund could be spared from additional disclosures," said a source.

'India in Striking Distance of 8% Growth'

Triple engines of macroeconomic stability, reforms, and initiatives to develop local capacity to spur growth: Ex-RBI Guv Shaktikanta Das

Our Bureau

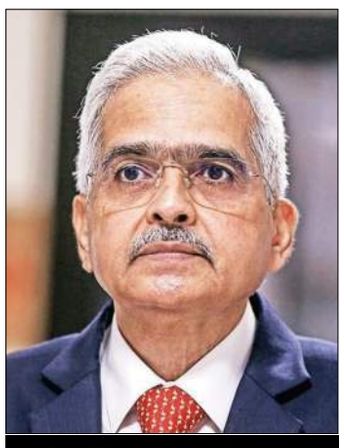
Mumbai: India is expected to remain the fastest-expanding major economy on the planet, boosted by policy stability and reforms that are aimed at reducing import dependence, Shaktikanta Das, principal secretary-2 to the Prime Minister and former central bank governor, said at a media event in Mumbai Tuesday.

"India is in striking distance of 8% growth, with the economy being powered by the triple engines of macroeconomic stability; continuing structural reforms; and strategic policy initiatives to develop domestic capacity where we are largely import dependent," Das said. "The seeds of our future and long-term growth are being sown today."

He also highlighted the role of the financing sector in powering growth and helping India become a developed economy.

Das said the BFSI sector has a crucial role to play in India's journey from a lower-middle-income economy to a high-income economy, through its intermediation in allocation of financial resources. He said the sector would be required to support India's next-gen Digital Public Infrastructure (DPI), be the frontline of green and transition finance and become the catalyst for democratising financial inclusion to support this journey.

"The BFSI sector must pivot from simple corporate lending to long-term capital formation. This would involve absorbing a significant portion of the financial needs of the National Infrastructure Pipeline (NIP) through structured consortiums and corporate bond expansion. Secondly, the sector needs to engage in strategic sector funding through credit channels to catalyse and fast-track high-tech domestic manufacturing, including semiconductors, advanced electronics, and defence production," Das said.



The seeds of our future and long-term growth are being sown today

SHAKTIKANTA DAS
Principal Secretary-2, PM

The sector has to play an important role in funding the creation of digital carbon markets, issuing sovereign green bonds, and offering competitive financing products for green hydrogen and renewable energy infrastructure. Calling micro, small and medium enterprises and agriculture as the engines of India's economy, Das said that these sectors will have to be empowered. "This would call for reliance on alternative digital footprints such as GST records and account aggregation for instant, algorithmic credit underwriting. The full scale roll out of the Unified Lending Interface (ULI) by the RBI would be a game changer in this context," he said.

The sector should also focus on deepening financialisation of savings by redirecting India's domestic wealth from physical assets (like gold and real estate) into productive financial assets through micro-investment and mutual fund products.

Das said the BFSI sector has to support India's next-gen DPI which will include globalisation of UPI; expansion of real-time cross-border payment linkages to reduce remittance costs and friction in international trade settlements; and greater deployment of CBDC for wider adoption.

"India's success in its march towards Viksit Bharat, despite the ongoing turbulent global conditions, will depend on a sound, efficient and profitable BFSI sector," Das said.

GUPTA POINTS AT OIL PRICE RISE, DEFICIENT RAINFALL

'Momentum Stays Resilient Despite Global Headwinds'

Our Bureau

Mumbai: The country could log 8% growth if global conditions improve and external shocks ease over the next year, **Reserve Bank of India (RBI) deputy governor Poonam Gupta** said on Tuesday at a media event in the city.

Gupta said that India's growth momentum has remained resilient despite multiple headwinds, including elevated oil prices, deficient rainfall and El Niño.

"If these multiple external shocks had not happened in the last three years, my sense is we would have been at our inflection point already," she said. "Suppose the global environment becomes better, if not right away, then in the next one year, another 50 basis points to one percentage point growth will come just from there," Gupta said.

India's GDP accelerated 7.1% in the first quarter of this fiscal year, while the RBI upgraded its GDP forecast of Q2FY27 to 7.2% in October, from 6.4% in August. The full year FY27 GDP projections stand at 7.1%. The International Monetary Fund (IMF) has projected India's economy to grow 7% in both 2026 and 2027, the fastest among 21 economies with GDP exceeding $1 trillion in 2025.

Gupta said the country's growth momentum has continued to grow into the second quarter, supported by indicators including tax collections, bank credit, merchandise exports, purchasing managers' indices and infrastructure activity. The Q2 GDP numbers would be released on November 30.

On inflation, Gupta further said that in India it is expected to rise as the impact of external supply shocks feeds through the economy. The International Monetary Fund projects Indian inflation to increase to 5% in 2026 from 2% last year, while the RBI's projection is slightly higher at 6% in Q3, before it moderates next year.

On the global economy, Gupta said growth had proved more resilient than expected despite geopolitical tensions and trade disruptions. The IMF has slightly upgraded its global growth forecast to 3.1% for 2026, with much of the improvement coming from advanced economies benefiting from AI related investment.

Tech Picks

VINAY RAJANI, Senior Technical Research Analyst | **HDFC Securities**

SAGILITY — BUY TARGET ₹48.60

Trend line breakout on the daily chart with jump in volumes.

LAST CLOSE ▸ ₹45.60 STOP LOSS ▸ ₹43.50

EBITDA: Earnings before interest, tax, depreciation & amortisation
Bps: Basis points (100 bps = One percentage point). Source: **Company data, ETIG**

Snehal Mergu

ET Intelligence Group: Cipla's September-quarter earnings were impacted by a high base in the US business and weak sales of active pharmaceutical ingredients (API), leading to a softer year-on-year performance. However, the company's revenue and net profit grew sequentially, driven by growth in its India business, sustained momentum in branded prescription therapies, and improving traction in the US market led by respiratory products and a better product mix. With new respiratory launches and growing biosimilar pipeline, the company remains optimistic about growth momentum in the second half of FY27.

India continues to remain the company's biggest growth engine, outperforming the overall domestic market. It delivered double-digit growth supported by respiratory, cardiac, anti-diabetes and dermatology therapies. With the rising share of chronic therapies and new product launches across segments, Cipla expects to sustain market share gains in the domestic business.

After a challenging year in the US market due to the normalization of revenue from certain products, Cipla bets on a recovery driven by respiratory launches. It received approval for generic Advair, its first dry-powder inhaler approved from its US manufacturing network. It expects contributions from additional respiratory and peptide products over the coming quarters. The company plans to strengthen its organic pipeline through 45-50 filings over the next three years. It expects to end FY27 with over $1 billion in revenue from the US market compared with $780 million in the previous year. It has entered into an exclusive agreement with Qilu Pharmaceutical to commercialize a biosimilar version of the cancer drug, Keytruda in the US and Canada, which should act as a long-term growth driver.

DOMESTIC STRENGTH

India continues to remain the co's biggest growth engine, outperforming the overall domestic market

While operating margin before depreciation and amortisation (Ebitda margin) declined 630 basis points year-on-year to 18.7%, it expanded 200 basis points sequentially amid tracion in the domestic business. It is expected to improve further in the second half of FY27, supported by respiratory product launches and a favourable product mix. It has retained the FY27 Ebitda margin guidance of 18.5%-20%.

Backed by a net cash position of ₹9,823 crore, Cipla is actively evaluating inorganic opportunities, particularly in North America and Europe, with a focus on acquiring complex and differentiated products that can strengthen its specialty portfolio.

Cipla's stock has lost over 4% over the past three months, underperforming the 2.5% drop in the BSE Healthcare index. Despite weakness, the stock's trailing price-earnings (P/E) multiple at around 38 is above its five-year average multiple of 27. The stock is likely to remain range-bound until a clear sign of recovery in revenue and profits emerges.

Earnings Review

Re Edges Up to 95.1/$ on Likely RBI Intervention

Our Bureau

Mumbai: The Indian rupee strengthened a little on Tuesday despite high oil prices and foreign fund outflows, as the Reserve Bank of India (RBI) likely sold dollars to cap excess depreciation in the currency. The rupee closed at 95.11 on Tuesday, from its previous close of 95.18. The currency traded in the range of 95.08 and 95.25 on the day, with RBI dollar sales capping a further move south of 95.25, traders said.

"The price action was heavily steered by market anticipation of sizable dollar outflows associated with foreign institutional allocations and dollar demand from oil companies, as Brent prices rose," said a trader from a private sector bank.

Brent futures were around $116 per barrel on Tuesday.

"Active RBI intervention via state-run banks capped momentum near the 95.25 resistance ceiling," another trader said.

LOAN GROWTH, HIGHER INTEREST INCOME HELP

Tata Capital Q2 profit Rises 51% to ₹1,660 cr

Our Bureau

Mumbai: Tata Capital reported a 51% year-on-year increase in consolidated net profit to ₹1,660 crore for the quarter ended September 2026, backed by higher interest income and healthy loan growth. It reported a net profit of ₹1,097 crore a year-ago.

The non-bank lender's assets under management rose 26% to ₹3.1 lakh crore as of September 30. Its retail portfolio, which includes home loans, loans against property, two-wheeler loans, personal loans and business loans, stood at ₹1.5 lakh crore, while loans to small businesses stood at ₹88,500 crore.

Its corporate loan book stood at ₹44,862 crore, while motor finance loans totalled ₹23,591 crore. Unsecured loans accounted for 10% of net assets under management (AUM).

Rajiv Sabharwal, MD & CEO, said the company's exposure to revolving credit or flexi loans was about 3-4% of AUM. "We are evaluating alternative products to mitigate any impact of the curbs on revolving credit," he told reporters. The Reserve Bank of India (RBI) has proposed that NBFCs discontinue the provision of revolving credit to customers.

Tata Capital will raise interest rates on its floating-rate loans by 20-25 basis points with effect from November 1 in response to the repo rate increase, which could push up the finance company's borrowing costs, he said.

Speaking to analysts, Sabharwal said NIMs moderated in Q2 but should improve in Q3 and Q4. "As of now, 48% of our liabilities are on a floating-rate basis, while 66% of our assets are on a floating-rate basis. So, we are very well positioned," he said. Sabharwal added that the NBFC would not pursue growth at the expense of margins.

On fundraising plans, he said: "We expect to raise capital in the second half of FY28, depending on how the credit book grows."

Net interest income increased 23% to ₹3,696 crore, while investment income more than doubled to ₹255 crore from ₹105 crore. Fee income grew 9% to ₹725 crore. Gross stage-three assets stood at 1.9% and net stage-three assets at 0.8% as of September 30. The provision coverage ratio was 58.6%, while the capital adequacy ratio stood at 17.3% and the Tier 1 ratio at 14.7%.

RATE HIKE TO WEIGH

Credit Growth to Moderate in H2, FY27: Icra

Our Bureau

Mumbai: Rating agency Icra expects credit growth to moderate in the second half of FY27 and remain subdued into the next fiscal year as hardening policy rates weigh on consumption demand.

A higher base is also likely to show optically lower growth, Icra said.

The rating agency also expects banks' asset quality to deteriorate marginally as credit expands, while net interest margins (NIM) are likely to improve as the Reserve Bank of India's rate-hiking cycle progresses.

Icra has projected credit growth to ease to 15-16% for the full year FY27, from the current 18-19%. The agency did not provide a specific estimate for credit growth in FY28.

Fresh slippages for public sector banks are estimated at about ₹1 lakh crore in FY27, from ₹0.9 lakh crore in FY26. For private players, fresh slippages can be at ₹1.3 lakh crore.

APE RISES 18% FOR H1

SBI Life Posts 11% Growth in Q2 Net Profit

Our Bureau

Mumbai: SBI Life Insurance reported an 11% year-on-year increase in net profit to ₹549 crore for the quarter ended September 2026, compared with ₹495 crore in the year-ago period.

Net premium income rose 8.2% to ₹2,688 crore in the second quarter of FY27 from ₹2,485 crore a year earlier. For the first half of FY27, net profit rose 17% to ₹1,274 crore from ₹1,089 crore in the year-ago period.

Net premium income increased 11.7% to ₹4,696 crore from ₹4,203 crore.

SBI Life's solvency ratio stood at 1.97 as of September 2026, compared with 1.94 a year earlier.

Annualised Premium Equivalent (APE) grew by 18% in the first half of the financial year to ₹11,750 crore while individual rated premium rose 12%.

The company expects individual rated premium to grow 14–15% in the current financial year, maintaining its full-year outlook despite quarter-to-quarter variations in business momentum.

Credit Cards Fly Faster as Banks Gear up for Festivals

FIREWORKS TIME Card issuances at the second highest in calendar year in Sept as HDFC, Axis Bank lead the pack

Saloni Shukla

Mumbai: Indian lenders, led by HDFC Bank and Axis Bank, added 1.26 million net credit cards in September, the second-highest monthly addition this calendar year, as financiers expanded card portfolios ahead of the prime festive season, latest Reserve Bank of India (RBI) data showed.

July was only marginally ahead in net additions, at 1.27 million.

HDFC Bank and Axis Bank together accounted for nearly 43% of the net additions during September, adding 539,878 cards between them. The two private sector lenders emerged as the largest contributors to fresh additions, followed by SBI Cards.

Growth in card additions was relatively muted at ICICI Bank and Kotak Mahindra Bank in September.

The momentum was also visible in quarterly numbers. Banks added 3.72 million net credit cards during the July–September quarter, an increase of nearly 47% from 2.54 million in the corresponding period last year. This was also 26% higher than the 2.96 million cards added in the April–June quarter, indicating that banks have been expanding their credit card portfolios more aggressively during the months leading into the festive season.

Swiping Up

Bank-wise Credit Card Additions in

Bank	Net Card Additions

ICICI Bank	29,621
Kotak Mahindra	453

1.26 m net cards added in September

Second-highest monthly additions of 2026

Outstanding card base reaches **125.32 m**

Sept 2026. YOY Change

Net card additions **+25%**

Card spending **–5.9%**

September's net additions were 5.5% higher than the 1.20 million cards added in August and nearly 25% above the 1.01 million additions recorded in September 2025.

The total number of outstanding credit cards rose to 125.32 million at the end of September, up 10.4% from 113.51 million a year earlier.

Among individual lenders, HDFC Bank led September additions with 280,353 cards, more than double the 122,669 cards added in August. Axis Bank followed closely, adding 259,525 cards, nearly eight times its August additions of just 32,789. SBI Cards added 208,026 cards, compared with 193,294 in August.

Bank of Baroda added 114,083 cards, while Slice Small Finance Bank and Federal Bank added 89,794 and 81,753 cards, respectively.

SMART INVESTING

India in Striking Distance of 8% Growth: Ex-RBI Guv

DRIVING CHANGE IRDAI chief Ajay Seth criticises the approach of some digital platforms, warns high commissions leave less in the risk pool, push up premiums even as regulator seeks to build consensus

'Dynamic Pricing's Unacceptable in Insurance, Big Payouts Erode Value'

Our Bureau

Mumbai: The insurance industry came in for yet another round of censuring by the regulator for its sales practices as chairman Ajay Seth said dynamic pricing like in airlines is unacceptable and that huge sales commissions erode the value for policy holders.

"Dynamic pricing works in the airline industry, not in insurance," Ajay Seth, chairman, IRDAI said at a financial industry summit. "The basic principle of any digital platform is come and compare our price without any personal details. There should not be any opportunity for dynamic pricing on a digital platform," he said.

Indian insurers have been at the receiving end of the regulator for their sales practices that enrich the distributors, including banks, and delivering poor returns and coverage for policy buyers. The regulator recently circulated a bunch of proposals that would reduce the rate of commission and cap them.

Under the consultation paper, IRDAI has proposed paying the same commission on ported policies as on renewals. Existing regulations do not provide for commission on portability, but insurers often treat ported policies as new policies in practice, Seth said.

> The basic principle of any digital platform is come and compare our price without any personal details. There should not be any opportunity for dynamic pricing on a digital platform
>
> **AJAY SETH**
> Chairperson, IRDAI

The regulator is also considering reducing health insurance commissions from the current industry average of about 24% to 15-20%, with higher payouts for first-time sales and lower commissions for renewals.

Seth said acquiring a new customer generally requires more effort than renewing an existing policy. "If the 24% goes towards acquiring the business, thereafter the cost of administration, what is left in the risk pool is small. Obviously, then it will lead to upward pressure on the premium rate itself," he said.

He also criticised platforms that seek mobile numbers to arrange callbacks and ask users to opt out of Do Not Disturb restrictions to facilitate sales.

Seth said platforms combining digital distribution with on ground sales teams operate under a different model, and regulators need to ensure that the primary focus remains on serving policyholders and giving them transparent price comparisons.

Seth said IRDAI is analysing feedbacks and would decide the way forward after engaging with stakeholders, as the objective was to build consensus on the proposed changes before finalising the framework.

"A reform of this nature has to be built on consensus. It cannot be just about writing another set of regulations," Seth said.

On health insurance, the insurance regulator is examining concerns that its proposed changes to health insurance commissions could affect policy renewals and portability, as it assesses whether distribution incentives are influencing policyholders' decisions to switch insurers.

"There is an associated concern that since it is so distribution centric system, that will lower commissions, will disincentivise renewal and portability. That's my concern," said Seth at Business Standard BFSI Summit.

The regulator is examining whether commissions are influencing policyholders' decisions to switch health insurers. Data for 2024-25 showed that 60% of portability inflows went to three insurers, while 90% went to seven insurers, Seth said.

"What is at play? The lessons we drive is the commission is driving behaviour from one to another," he said, suggesting that incentives may be influencing switching patterns.

BOSTON BASED PE GROUP RAISES $30 BILLION ACROSS TWO FUNDS

India to Remain Biggest Bet in Asia for Advent

Our Bureau

Mumbai: India will be the largest market for Advent International in Asia as the Boston-based private equity group has successfully raised $30 billion for a new global buyout fund and a newer mid-market fund, beating the slowdown that has plagued several top-tier private equity players this year.

Advent, majority owned by its partners, exceeded its target by raising close to $27 billion for its 11th flagship fund Advent International GPE XI, making it one of the world's largest pools for buyout funds.

Advent raised its last flagship fund in 2022 at $25 billion. "I believe this should be a good vintage of investing in India," said Shweta Jalan, Managing Partner. "There have been a few external headwinds for the economy, like oil price volatility and currency fluctuations, but on balance mid to long term, we genuinely believe this a good place to invest."

In the last 19 years, since its first investment, Advent has invested around $7.5 billion in the country, executing 23 investments in total across a range of sectors that includes banks, packaging to pharmaceuticals to tech services and lending.

Asia-Pacific now accounts for nearly a fifth of Advent's active portfolio by company count and around 17% of the total 109 billion of assets it currently manages. Its footprint in the region is also expanding. Since 2024, it has opened three new beachheads in Australia, Japan and Hong Kong. Jalan said the fund made its debut investment in Japan, a market that has seen revival in dealmaking after a long hiatus, earlier this year.

It has made two transactions in Australia in as many years.Jalan is confident with the new dry powder, the fund will be able to double down on all the 5 key sectors it focuses on – pharma and healthcare, financial services, consumer, technology services and AI and finally industrials.

Within industrials, sub-sectors like chemicals, auto components and AI infrastructure have emerged as dominant themes.

This calendar year has been among the firm's most active years for realisations. Year to date the firm has realised approximately $13 billion across 27 businesses.

L&T Profit Jumps 33% on Strong Order Inflows

Consolidated revenue of the company rises 16% to ₹78,750 cr; order inflow up 28% at ₹147,665 cr

Our Bureau

Mumbai: Infrastructure company Larsen & Toubro (L&T) on Tuesday reported a 33% year-on-year increase in quarterly net profit, helped by healthy order inflows amid strong infrastructure spending and reconstruction activity in the Middle East despite the ongoing conflict. However, execution challenges, rising input costs and elevated logistics expenses weighed on the company's September-quarter margins in its infrastructure and utilities businesses.

Revenue for the quarter rose 16% year-on-year to ₹78,750 crore, "driven by accelerated progress in the various business in the projects, products & manufacturing portfolio", the company said.

L&T secured orders worth ₹1,47,665 crore during the quarter, marking a 28% y-o-y growth. It also secured several high-value orders, led by Hydrocarbon – Offshore & Onshore, CarbonLite Solutions, Public Spaces & Airports, and Power Transmission & Distribution businesses. International orders

stood at ₹92,375 crore, accounting for 63% to the total order inflow.

"The company has delivered a strong quarter in an ever-changing geopolitical landscape. This performance reflects continued customer confidence and our ability to secure large and complex orders across sectors and geographies," said SN Subrahmanyan, chairman and managing director. "The highest-ever order book at ₹8.5 lakh crore provides multi-year revenue visibility."

On Tuesday, ahead of its earnings announcement, L&T's shares closed 0.19% lower on the BSE at ₹3,670.

"Inflation remains a concern, arising from food price volatility, elevated energy costs, and weather-related disruptions. Geopolitical imbalances, trade uncertainties and climate-related risks continue to affect commodity prices and supply chains," said L&T in a stock exchange filing. The company's infrastructure & utilities segment secured an order inflow of ₹35,509 crore.

Bond Market Doubts Gridlock Will Ease Deficit Woes This Time

Bond investors are growing skeptical that the potential return of gridlock on Capitol Hill will ease their worries about the US fiscal trajectory the way it has for decades.

Polls suggest that political outcome is likely once again from US midterm elections on Nov. 3. Democrats are projected to wrest control of at least one chamber of Congress from the Republican Party, while falling short of gaining enough seats to override President Donald Trump's veto power.

Since the mid-1990s, a split Congress or government has often been a bullish recipe for Treasuries. Benchmark 10-year yields have been lower on average one and 12 months after midterms that produced such a result, Bloomberg-compiled data show. By making it harder to pass major spending legislation, that setup was seen as a sure way to rein in government spending and contain swelling budget deficits.

This time, investors doubt that legislative paralysis will be enough to bring yields down from around the highest in nearly a quarter century. The federal budget gap, at roughly 6% of the economy, has rarely been this large outside of a recession. — **Bloomberg**

Manufacturing Cos Want AI Leaders Who Can Meld Agents and Assembly Lines

Honeywell, RPG Group & ITC are building AI talent as cos look to bring on board senior leaders to link technology to plant performance

Brinda Sarkar

Bengaluru: Artificial intelligence (AI) is moving into the heart of manufacturing, from predictive maintenance to smarter supply chains, as companies look for leaders who can make the technology work across plants, products and entire businesses.

Manufacturing firms are stepping up the search for executives who can link algorithms to output, quality and costs, with Honeywell Technologies, RPG Group and ITC among those building such capabilities.

Companies want leaders who understand machine learning, generative AI, data architecture and automation, as well as manufacturing processes and plant operations, as per executive search firms.

"In manufacturing, there is a strong operational layer around smart factories, predictive maintenance, quality, computer vision, robotics, supply chain and energy optimisation," said Agamjeet Dang, CEO of executive access for India. "We are seeing increased activity in the automotive, auto components and textiles sectors, but AI and digital leadership is also required across diversified industrial groups, chemicals and agri-inputs, pharmaceuticals, tyres and consumer manufacturing."

First Movers

Honeywell Tech, RPG Group, ITC, among cos, building AI capabilities at senior levels via specialist hiring, internal upskilling

Skills include AI, machine learning, generative and agentic AI, data architecture and automation

Cos tapping overseas talent, with stronger interest in Indian-origin executives

US is leading hunting ground, followed by UK and Europe

Companies are tapping overseas talent, with stronger interest in Indian-origin executives than traditional foreign expats. The US is the leading hunting ground, followed by the UK and Europe, Dang said.

Employers are weighing dedicated group-level AI chiefs against assigning the brief to a chief information officer, chief digital officer or transformation head.

Roles range from AI and analytics leadership to heads of AI centres of excellence and operational specialists working on predictive maintenance, computer vision, robotics, quality, supply chains and energy optimisation.

RPG Group is looking for people who combine expertise in AI, data science and digital technologies with an understanding of manufacturing processes, plant operations, quality systems, supply chains and industrial automation.

"We have seen 20% growth in our digital talent base across the group over the last two years," said Amol Deshpande, head of digital and innovation at RPG Group.

"Most of our group companies like CEAT, Zensar, KEC and RPG Life Sciences have been integrating digital capabilities including AI across our businesses, particularly in manufacturing, engineering, supply chain and industrial operations."

India to Gain Edge Over Others in US Trade Pact: Goyal

Minister says India will emerge as a major exporter to China and ASEAN region

Kirtika Suneja

The Hague: India will emerge as a major exporter of goods and services to China and the ASEAN region in the coming years, commerce and industry minister Piyush Goyal said on Monday after concluding his six-day visit to Germany and the Netherlands, adding that India is open to promoting free and fair trade with every country.

In the trade pact being negotiated with the US, India stands to gain a comparative advantage over other countries, he said. The minister also said that negotiations for an Investment Protection Agreement between India and the European Union are underway, while some legal changes are required for an agreement on geographical indications, and the ministry plans to present necessary legal amendments in Parliament. Discussing future trade ties with China, Goyal said, "They (China) are also providing us important intermediate goods, important raw materials. If, in any particular product, we find that fair play or pricing is not proper, then there's an established judicial process which is conducted. Other than that, we believe in the rules of fair play; we believe in the rules of open trade... We welcome suppliers to meet the growing needs of India."

We are looking to open markets in different countries on a reciprocal basis for our goods and services also

PIYUSH GOYAL
Commerce & Industry Minister

On being asked if India is considering a similar exercise with China after concluding trade pact talks with the EU, he said, "Yes, at some stage, maybe we will do that also."

Goyal said he had met his Chinese counterpart in Yaoundé, Cameroon, earlier this year and again in Delhi during the latter's visit for the BRICS summit in September.

"We are open to working and encouraging free and fair trade with every country around the globe. We are looking to open markets in different countries on a reciprocal basis for our goods and services also. And I do hope that in the years to come we will see India becoming a major exporter of goods and services to China and the ASEAN region also," he said.

The minister said two weeks ago that India was working to rebuild its relations with China.

Textiles PLI may get 4-yr Extension

Anoushka Sawhney

New Delhi: The production-linked incentive (PLI) scheme for textiles is likely to be extended for around four years with easier eligibility criteria to encourage greater participation by micro, small and medium enterprises, according to people aware of the development. The existing scheme is operational until 2029-30. The proposed extension would also mark the fourth round of the scheme.

The government approved 170 applicants in the first three rounds. Applicants who were left out in previous rounds are also likely to get another opportunity to qualify for incentives in the next one. The changes aim to make the scheme more industry-friendly and improve its overall effectiveness, said the people. Approved in September 2021 with an outlay of ₹10,683 crore, the PLI scheme for textiles provides for a two-year gestation period (FY23-FY24), followed by five performance years (FY25-FY29), and remains operational until FY30.

Abhishek's 35-Ball Ton Flattens New Zealand as India Seal T20 Series

Wellington: Abhishek Sharma clobbered a 35-ball century as India demolished New Zealand by six wickets in the third T20I in Wellington on Tuesday to seal the five-match series with two games to spare.

The free-swinging opener threatened to eclipse his record, 30-ball ton against Afghanistan in Delhi last month — the fastest by a batter from a full-member nation — as he piled on 113 off 38 balls, helping India chase down 199 for victory in 13.2 overs.

It was a record-breaking night for the visitors anyway, as Abhishek combined with 15-year-old sensation Vaibhav Sooryavanshi to score a record 118 runs in the powerplay, beating the previous mark (116) set by Romania against Serbia in 2021.

118 runs in first six overs by India is the highest powerplay score in men's T20Is, surpassing 116 by Romania against Serbia in 2021

"That was the plan for us. Just get the momentum for the team and keep going," said man-of-the-match Abhishek.

The opening pair put on 133 before the promoted Sooryavanshi was caught at long-on for 45 trying to slog recalled New Zealand quick Matthew Fisher over his head.

Fisher was denied a second wicket when Mitchell Santner dropped Abhishek at extra cover on 92. Abhishek soon reached his century when he smashed Kyle Jamieson to the fine leg fence. **Reuters**

BRIEF SCORES **New Zealand** 198 for 3 (Mitchell 89* off 52, Allen 40 off 25, Jacobs 39* off 23; Arshdeep 1/33) lost to **India** 199/4 in 13.2 overs (Abhishek 113 off 38, Sooryavanshi 45 off 19; Jamieson 2/45) by six wickets

VITALS

Carrick to Remain United Boss for Chelsea Clash

Michael Carrick is set to remain in charge of Manchester United for this weekend's Premier League match away to Chelsea, according to media reports on Tuesday. Carrick's future at Old Trafford has been the subject of intense speculation after a miserable run of eight games without a win. **AFP**

WATCHOUT! Tonight

CARABAO CUP **Man City v Brighton** 1am; **Liverpool v Chelsea** 1:30am (Fancode)

Kylian Mbappe apologised after remarks apparently referring to Mao Zedong as a dictator sparked backlash in China, costing him deals with at least three Chinese companies. Beverage maker Dongpeng, dairy giant Mengniu and cheese producer Milkground announced Tuesday they were ending their partnerships with the footballer, citing opposition to words and actions that hurt national sentiment. **AP**

ASIAN CHAMPIONS TROPHY

India Hammer Bangladesh

Jalandhar: Mandeep Singh returned to form with a fine hat-trick as five-time champions India hammered Bangladesh 13-0 to start their title defence at the Asian Champions Trophy hockey tournament on a rousing note on Tuesday. Mandeep struck in the third, 10th and 54th minutes. India will next play China on Thursday. **PTI**

WOMEN'S ODI

India Eye Sweep vs Zim

Vadodara: A dominant India will look to sign off their first-ever bilateral women's ODI series against Zimbabwe with another emphatic win when the two teams square off in the third and final 50-overs game here on Wednesday. **PTI**

The Crown Jewels

Kane finally lands his first Ballon d'Or as Putellas completes remarkable comeback to claim a third women's title

Harry Kane completed his long quest for football's highest individual honour on Monday, the Bayern Munich and England striker winning the Ballon d'Or after a record-breaking season that cemented his status as one of the game's greatest goalscorers.

Spain midfielder Alexia Putellas picked up her third Ballon d'Or in her new home city of London, crowning a spectacular return to the top of women's football after injury cut her down in her prime.

Kane was the first Englishman to win the prestigious award since Michael Owen in 2001.

"Wow, wow, wow!" Kane said after taking the stage. "I am almost speechless. Being here in London has made it extra special. Made it a good omen for me tonight. Thank you to everyone who voted for me. I can imagine it was tough this year.

Kane's move to Bayern in 2023 brought the team trophies that had long eluded him. The England captain was prolific last season, scoring 61 goals in 51 games for Bayern across all competitions as the German side completed a domestic league and cup double.

Kane was Europe's leading goalscorer but his influence stretched far beyond club football. He netted six goals at the World Cup and captained England to the semi-finals, combining his clinical finishing with the leadership and composure that have defined his international career.

The award represented the culmination of a remarkable journey. Few players have experienced a career arc quite like Kane's.

Putellas previously picked up the prize for the best player in the world in 2021 and 2022 as the creative heartbeat of an all-conquering Barcelona side. But an anterior cruciate ligament tear just as she was preparing for Spain's bid to win Euro 2022 derailed her rise to global stardom.

Putellas recovered to play a bit part role in Spain's World Cup triumph a year later, but was overshadowed by team-mate Aitana Bonmati for both club and country as it took nearly two years to rediscover her best form.

Bonmati took on the mantle of the world's best player, becoming a three-time Ballon d'Or winner between 2023 and 2025 until she was also sidelined by a leg break.

With the emphasis back on Putellas, she rose to the challenge, helping Barcelona regain the Champions League last season in dominant fashion. **Agencies**

> Ballon d'Or organisers accidentally published multiple winners of the men's award on their website hours before Monday's ceremony, naming Harry Kane, Lamine Yamal and Kylian Mbappe. France Football said the articles were prepared for all nominees but inadvertently went online, stressing they offered no indication of the final results or rankings

Alexia Putellas wins her third title, having claimed her first in 2021 and second in 2022

Harry Kane is the first Englishman to win the award since Michael Owen in 2001

The Midnight Shopper

From midnight cravings to last-minute school supplies, the night shift is open for business

IMAGE: AI GENERATED

It was past 1 am in Bengaluru. A quick-service delivery person cut across my rickshaw. In the wee hours, I could spot the delivery person ferrying a broom. (I swear I didn't see a witch, and I was perfectly sober.)

In the quiet hum of late nights, a second economy is wide awake. Brands have realised the post-midnight shoppers are a different breed. They are impulse-driven, convenience-seeking, and often willing to pay a premium.

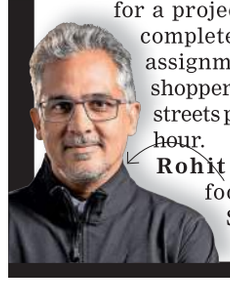
Step into a quick-commerce app after hours, and you might see 'top midnight picks' flashing on the screen. These aren't random suggestions.

While large parts of the country are asleep, a tribe of night owls is just getting started. This isn't just about late-night cravings anymore. It's a full-blown commercial shift where the shopping cart never stops moving.

Simply put, in this new India, the virtual shutters never come down. Whether it's a midnight sale, or a 1 am serum restock, the consumer is awake, and the marketplace is open.

A Full Cart

Apart from the broom shoppers of Bengaluru, there are also those shopping for school stationery for a project that had to be completed for a morning assignment. Even fashion shoppers stalk the online streets post the Cinderella hour.



Rohit Kapoor, CEO, food marketplace, Swiggy, says he was surprised to see an increase in Biryani orders at 5 am. This wasn't a new trend on the Indian breakfast table, but consumers (particularly Gen Z and Zillennials) ordering a late dinner after a movie binge or a gaming party. "There's a part of India that doesn't sleep before 2 am. It's the busy professional finding their only me-time, or the Gen-Z student who doesn't have a sleep mode. It's about a lifestyle that demands 24/7 availability."

In quick-commerce platform Zepto, between midnight and 4 am, users are most often searching for ice cream, dairy, bread, eggs, and paan. Among individual items, stick ice cream, milk, and cigarettes top the list of late-night searches. Zepto executives point out that it's not a Friday or a Saturday, but Sunday midnight that clocks in the highest number of late-night orders through the week.

Among the hotspots for midnight cravings, BTM Layout in Bengaluru tops the list, followed by Madhapur in Hyderabad, and Andheri in Mumbai. Delhi's Karol Bagh ranks fourth on the list of most active late-night ordering localities.

Sunanda Khaitan, CMO, beauty and well-being, Hindustan Unilever

'Consumers Are Moving Towards Shades Closer to Natural Skin Tone'

With brands crowding the market, how does the 74-year-old legacy brand Lakmé stay relevant? By chasing long-term memorability, not short-term salience

By **Nupur Amarnath**

*The business of beauty is changing. **Sunanda Khaitan** is at the centre of that change, managing India's legacy brand Lakmé. She can segue from undertones to the science of L-star, A and B values (ways of mapping skin colour) without missing a beat. She discusses the changing Indian consumer, Lakmé's legacy, the 'skinification' of makeup, viral trends, and what influencers bring to the table. Edited excerpts.*

How has the Indian beauty consumer changed? What does that mean for Lakmé?

The biggest shift I have seen in the last 20 years is that beauty in India has moved from permission and validation to self-expression. Earlier, you put on lipstick and foundation because you wanted to conform and look a certain way. Then makeup became occasion-led: There is a birthday or a wedding to attend. For a long time, Lakmé was explaining how to get dressed for a wedding, what look to wear, working with designers like Sabyasachi, Tarun Tahiliani, and Manish Malhotra because makeup was tied to couture and occasion dressing.

Today, it has moved from 'I want to follow trends' to 'I want to express myself'. It is no longer 'I want to do it to make you happy'; it is 'I want to do it to make me happy'.

That modern Indian woman is independent, earning for herself, and stepping out every day. She wants a good base that looks natural, she may line her eyes with kohl or eyeliner, and for colour it could be a gloss or lip oil rather than a pigmented lipstick. Makeup has moved from occasion to everyday.

Omnicom's $900M Cost Cutting Drive Continues in Q3 as Revenues Stay Flat

The holdco reported earnings on the heels of winning Coca-Cola's North America media account

Nearly a year after Omnicom closed on IPG, CEO John Wren said the seeds of success are starting to take root.

The holding company reported $6 billion in revenue this quarter from what it calls "core operations", or the businesses it doesn't plan to sell, up 7.2% organically year-over-year.

While that's a sequential improvement from Omnicom's 6.1% organic growth last quarter, Omnicom's reported revenues were flat at $6 billion over Q2. As Madison & Wall's Brian Wieser pointed out in a note to analysts, Omnicom includes pass-through costs in its revenue numbers, so it's difficult to compare the holdco's performance to its peers.

Wieser estimated that pass-through costs "again account for almost all of the headline gain", and that net organic revenue growth was likely flat.

Omnicom is still working to cut $900 million in costs in 2026 as it integrates IPG. That included personnel cuts; in addition to the thousands of layoffs that took place after the deal closed, Omnicom offloaded 468 engineering staffers across the US, the UK, India, and Malaysia.

It also includes dispositions, and Wren said Omnicom is still actively offloading businesses that no longer fit into its future strategy. Chief financial officer Phil Angelastro said Omnicom expects about $325 million in revenue from these deals.

The Numbers

$6 billion Revenue from Omnicom's "core operations" in Q3, up 7.2% organically year-over-year (YoY)
$19.2 billion Total revenue for this year ending Sept. 30, up from $11.7 billion in 2025
$16.7 billion Total operating costs, up $5.4 billion YoY in the third quarter
$6.4 billion Total reported revenue for Q3 2026
$1.1 billion Non-GAAP adjusted EBITDA, an 18.2% margin
53% Integrated media business share of Omnicom's core operations
$900 million Expected total "cost reduction synergies" for 2026
$412 million Revenue from dispositions and assets held for sale

"We want to get back into acquisition mode," Angelastro said. "We've been entertaining some discussions with potential targets that would help the future growth of the business, but the sooner we can get the dispositions behind us, the better."

During the earnings call with investors, the holdco won Coca-Cola's North American media business after a competitive review with Dentsu. It was a much-needed win after Publicis Groupe took PepsiCo's global media business from Omnicom without a pitch in September. Wren deferred to Coke for comment, but he added that any new business would be "incremental to our existing revenue".

Wren declined to comment on a revenue forecast for 2027.

"I say this everywhere, so I believe it to be true: There's no one key individual in this company that the company revolves solely around," Wren said in response to an investor's question about recent personnel shakeups. "Everybody is replaceable, and we anticipate and have succession plans for all of our key positions throughout the company. So when something like that happens, we're able to react to it very smoothly." **–Adweek**

The Midnight Shopper

The Splurge

What's common between Flipkart's Big Billion Days, Amazon's Great Indian Festival, and Myntra's End of Reason sales? These e-tailers run late-night flash promotions within major sales to target the night shoppers.

Even during non-sale periods, fashion marketplace Myntra offers late-night discounts, running both official nocturnal promotional events, and algorithmic price drops during low-demand hours.

The platform hosts a regular midnight countdown sale page dedicated exclusively to price drops and special coupon attachments that go live at midnight. During the opening blocks of sales (often between 12 am and 2 am), Myntra regularly runs 'midnight steal deals' or provides an extra percentage off to reward early shoppers.

The shopping habits can be seen across the categories of fashion, beauty, FMCG, and electronics. According to a Nykaa Trends report (2025), the shopping spree actually picks up as the sun goes down. The study estimates more than 30% of purchases happen post 8 pm.

Importantly, it's very lucrative for e-tailers. Night shoppers spend 65% more than daytime shoppers. There is a 60% spike in beauty purchases especially in the late hours, the study emphasises.

According to **Siddharth Devnani**, co-founder and COO of digital agency SoCheers, apparel and beauty traffic stays high until 1.30 am, with skincare sales peaking between 10 pm and 1 am. "Campaigns now target this as 'self-care' or 'late-night indulgence', with Reddit communities like Indian Beauty Deals buzzing with discovery of these midnight-only offers," he says.

From Stress to Celebration

The shift to 24/7 commerce has turned panic moments into "solved problems". Kapoor of Swiggy recalls the Indian parent's nightmare: A child announcing they need a geometry box for school – at 10 pm.

"Every parent in India has gone through this. Today, it's not a stress anymore. At 10.30 pm, the geometry box is ordered, the kid is happy, and the parent is less pressed.'

Even gifting has gone midnight native. Gifting platform FNP reports cities like Jaipur, Chandigarh, and Lucknow lead the way in midnight surprise orders, ensuring the gift arrives exactly at the start of a loved one's big day.

Subash Balar, vice president and business head – chocolates, coffee, and confectionery and NCD, Foods Division, ITC, says that the need for indulgence and the ease of access due to q-commerce have resulted in chocolate consumption peaking from the after-dinner hours all the way up to midnight.

For ITC's Fabelle, that means sales of premium chocolate with the time-band of 8 pm to 12 am contributing almost 30% of orders, says Balar.

The Future

Brands say the midnight shopper is also ensuring the safety of the streets, a true Jaago Re moment.

This isn't just a business trend, but also a safety and policy evolution.

Kapoor argues more commerce makes streets safer. When there is activity, street food, and delivery partners on the move, the "darkness" of the night disappears.

What's in the Cart?
Data from Zepto reveal a fascinating map of midnight appetites.

1 The Munchies & Cafe Favourites
The 'munchies' category is the undisputed king of the night.
Top Snacks: Lay's Magic Masala, Kurkure Masala Munch, and Lay's American Cream & Onion
Zepto Café: When snacks aren't enough, users turn to comfort food. The most-ordered items are Maggi, Garlic Bread with Cheese Dip, and Chili Cheese Toast.

2 The Survival Essentials
Between 12 am and 4 am, the searches turn toward the practical and the habitual.
Top Searches: Ice cream, dairy, bread, eggs, and paan
Individual Heroes: Stick ice cream, milk, and cigarettes dominate the search bars

3 The Big Spenders
Late-night shopping isn't always about small change. In Vanasthalipuram, Hyderabad, a single midnight order hit a staggering ₹8,000. Meanwhile, a user in Delhi's Paschim Vihar went for quantity over cost, ordering 64 items in one go.

The Geography of Insomnia
While the whole country is active, certain pockets are 'midnight hotspots'.
#1 BTM Layout, Bengaluru: The reigning champion of late-night orders
#2 Madhapur, Hyderabad: A close second, fuelled by the tech workforce
#3 Andheri, Mumbai: The city that never sleeps holds its own
#4 Karol Bagh, Delhi: Rounding out the top four with high late-night activity

'Consumers Are Moving Towards Shades Closer To Natural Skin Tone'

Consumers now talk about ingredients almost like chemists. Has that changed how you innovate?

Absolutely. The consumer is far more informed. Ingredient understanding, which was more prevalent in skincare, has now come into makeup as well. All makeup, especially bases, are getting skinified [meaning skincare ingredients are being integrated into formulations]. I have stopped jumping on trends. We innovate around certain vectors – ingredients and skinification, sensory understanding of Indian weather, and understanding Indian skin tones.

What does innovating for the Indian consumer mean?

Weather is a big part of it. For much of the year, we have high humidity. You may still need a matte finish, but that doesn't mean the product should feel dry. Even something like a blush changes with season and climate. In the festive months, as India goes into winter, I have used a cream blush rather than a powder blush because skin can feel drier.

Skin tone is another big moat. We do a study of around 2,000 consumers to understand the spread of colour from north to south. What has also changed is that earlier we sold more lighter-tone foundations; today I am selling many more medium and darker tones, as consumers are moving towards shades closer to their natural skin tone.

Earlier we sold more lighter-tone foundations; today we are selling more medium and darker tones, as consumers move towards a natural look

Sometimes innovation is practical. Glossy sticks can melt in places where temperatures hit 50 degrees [Celsius]. So, we put ours into a click stick where only a millimetre of product comes out.

These are the kinds of details I want to invest in.

Beauty is also extraordinarily trend-driven today: K-beauty, cushion foundations, lip oils, glass skin. Surely, you can't ignore trends?

India is still a developing beauty market, and as it grows, there will be fragmentation. Fragmentation matters, but it doesn't bother me. I watch closely what is coming and ask what is good for the Indian consumer. Take cushion foundation. It became a big Korean beauty trend, but there is genuinely something useful about the format: It picks up little product and deposits it evenly, which is good for somebody who doesn't know how to use a foundation brush. We took that idea, combined it with our Indian skin-tone understanding, and launched a cushion foundation.

The process: See a trend, put it with a consumer panel, test whether it works across skin tones, and ask if it is a fad or there is something useful in it. If there is, innovate it for India.

How do you engage with influencers?

Influencers are important. At every launch, we partner with upwards of 400–500 creators. In an underpenetrated category, where you are teaching consumers how to use makeup, they are an invaluable asset. But it is not just a reach game. It is an engagement game. The landscape is moving from only using mega influencers for reach towards micro influencers who can create engagement. My brief to creators: Simplify makeup, make it feel achievable, make it everyday.

There is a difference between being salient for some time and being memorable. I am chasing memorability over long term

Lakmé is 74 years old. In a market crowded with new brands, what does being a legacy brand mean today?

When we started, we were market developers. The job was to develop the category. Today, it is no longer necessarily about Lakmé bringing the first format. But even now, makeup penetration in India is still sub-30%, so there is still a category to create. Lakmé Fashion Week has been part of that market-development role for us. Our association with fashion has always been about bringing the two worlds together and showing consumers how beauty moves with the way women dress.

With so many brands competing for attention, how does a legacy brand ensure it stays relevant instead of only feeling familiar?

My CEO puts it beautifully: There has never been a time when there have been more brands, but there has also never been a more difficult time for consumers to remember them. There is a difference between being salient for some time and being memorable. I am not chasing salience for a bit; I am chasing memorability over the long term, so that you keep coming back.
