'Tata row must be settled by the group, should not spill into public'

AMICABLE SETTLEMENT. On government intervening in the dispute, FM Sitharaman says it is a sensitive issue

Our Bureau
Mumbai

Finance Minister Nirmala Sitharaman has urged the two sides in the Tata Group to talk through their differences and reach an amicable settlement soon, saying the dispute should not spill into the public domain.

"It has to be amicably settled among themselves. So, they [should] talk it out to make sure that it comes back quickly to some normalcy," she said at a media event in Mumbai on Monday. "I think these are very delicate matters. And matters where a lot of commercial and business acumen will have to work. Business cordiality will have to work."

WORDS OF WISDOM. Finance Minister Nirmala Sitharaman at an interactive session organised by HSBC Bank in Mumbai on Monday PTI

POLITICAL PRESSURE
The dispute involves Tata Sons Chairman N Chandrasekaran and Tata Trusts Chairman Noel Tata, with differences reportedly extending to Chandrasekaran's reappointment and the question of listing Tata Sons. This has also led to political pressure, with Congress leader Rahul Gandhi raising allegations concerning the group's affairs and questioning the Centre's position.

"I know the brand value of Tata. The contribution that the Parsi community has made Tata a huge global brand. I also know the expanse of activity in which Tatas are invested in. So, this is a very critical component to the Indian economy," she said. "It cannot be spilling out like this in public. And for the maturity of that leadership, we would like to have this scene settled sooner."

Asked whether the government would bring the two sides together for a compromise, Sitharaman said: "That's where I said it is rather a sensitive issue. It's not something I would want to quickly comment on."

EQUITY TAXATION
On concerns over equity taxation and foreign portfolio investor outflows, the Finance Minister said she recognised the anxiety among retail investors and equity market participants.

She said no taxation changes were made for drawing investments in 2023-24 when FPI inflows were at the highest. "More FII net outflows have happened. It has started resuming now. They have started coming back now. So, I know that circumstances have changed and, therefore, voices of concern are louder. I quite appreciate that. So, I will consider all this," she said.

'INDIA NEEDS CAPITAL'
Sitharaman said India needs capital, particularly equity, to sustain growth of over 7 per cent. While the government had focused on deepening and widening the bond market in recent years, she said it was also hearing calls for similar support for the equity markets.

Separately, at an HSBC event, she said the government's capital expenditure would remain important until private companies begin expanding existing capacities or setting up new ones.

"Capex is a very important component of our growth strategy because till such a time the private sector is going to expand capacities or establish newer capacities, it's important for the government to push through capital expenditure," she said.

Clean power key to energy security; over-reliance on fossil fuels will disrupt economies: PM

Rishi Ranjan Kala
New Delhi

Emphasising that energy security is directly connected with economic security, Prime Minister Narendra Modi on Monday pointed out that the geopolitical upheavals this year have demonstrated that clean energy can ensure energy security and that over-reliance on fossil fuels will continue to lead to disruptions in the global economy.

Inaugurating the Bharat Renewable Energy Summit & Expo (BRESE) 2026, the Prime Minister noted that in the last 10 years, India had pursued sustained domestic investment and systemic reforms in the clean energy sector, which shielded the country from severe external shocks.

CLEAR MESSAGE
"The global crisis has given a clear message to every country that energy security is directly related with economic security. We all know that the future of energy security is in clean energy. If we continue to be over-dependent on fossil fuels, then the global economy will be disrupted again and again because fossil fuel resources are limited and concentrated in some regions, while renewable energy is unlimited and every country and region can use it," he stressed.

Prime Minister Narendra Modi addressing the Bharat Renewable Energy Summit & Expo in New Delhi on Monday

Inviting global investors to leverage India's demand, scale, scope and political and policy stability, Modi noted that the renewable energy sector had attracted over ₹15 lakh crore, or $164 billion, over the past decade, including over ₹6 lakh crore, or $63 billion, in just the two years since the 2024 RE-INVEST Summit.

FRESH INVESTMENTS
Investment opportunities are projected to exceed ₹20 lakh crore, or $220 billion, by the end of this decade.

A new sky of opportunities will open up in India's clean energy sector for all, Modi affirmed.

Emphasising that India wishes to share the benefits of its innovations and experiences with all of humanity, the Prime Minister stated that the nation approached green energy with the same cooperative spirit and gave specific examples.

"The successes of India in this field will come in handy for numerous countries of the world," the Prime Minister added.

"Over the next 10-11 years, our effort will be to add 500 gigawatts of new non-fossil fuel capacity. This target is somewhat difficult, but I have faith in the capabilities of our country. And that is why I say, We will do it," he said.

Minister for New and Renewable Energy Pralhad Joshi noted that the sector is growing at a fast pace in India and will play an important role in meeting the country's future power demand.

India's non-fossil power capacity has risen to 308 gigawatt (GW) from over 200 GW in September 2024.

'37 of top 100 firms still combine roles of chairperson & CEO/MD'

Akshata Gorde
Mumbai

Thirty-seven of India's top 100 listed companies continued to have the same individual as chairperson and managing director or chief executive officer in FY26, while board meetings at 21 companies lasted less than 30 minutes, according to the seventh annual corporate governance survey by Excellence Enablers.

The chairperson leads the board and its oversight of management, while the MD or CEO is responsible for running the company. When both roles are held by one person, the responsibility for overseeing management and the authority to manage the business are concentrated in the same hands, blurring accountability.

M Damodaran, former Chairman of the Securities and Exchange Board of India (SEBI) and founder of Excellence Enablers, in his latest newsletter, urged the markets regulator to bring back the requirement for the chairperson and MD or CEO to be different individuals.

In 2020, SEBI had introduced the separation mandate for the top 500 listed companies, along with the additional condition that the two should not be related. However, only 54 per cent of the companies had complied as of December 31, 2021, despite an extension.

MADE VOLUNTARY
Later, the provisions were made voluntary due to representations from companies, low level of compliance and disruption caused by the pandemic.

The resistance was seen particularly since the second condition would have shut out the legitimate aspirations of younger family members aspiring for higher office. "Is this a case where in pursuit of an ideal situation, even the minimum requirement was lost?" said Damodaran, adding that the two conditions need not go together.

M Damodaran, former Chairman of SEBI

A survey found that 17 firms did not meet the requirement for independent directors against 18 in FY25. Four PSUs had no independent directors

Requiring different individuals to hold the posts would preserve the distinction between board supervision and executive management, even if the individuals are related.

The separation of the two positions has remained a concern over the years, with 39 companies combining the roles in FY23, 38 in FY24 and 39 in FY25, before easing to 37 in FY26. The survey also found that 21 companies held meetings lasting less than 30 minutes in FY26, while eight held only the four meetings prescribed under the regulations.

The duration of a meeting by itself does not establish the quality of the discussion, but the figures offer a measure of how much time some boards set aside for their work.

The survey also found that 17 companies did not meet the requirement for independent directors, against 18 in FY25. Four PSUs had no independent directors.

Similarly, one company had fewer than six directors, while six companies had 14 or more directors, including three with more than 15.

There were also shortcomings in the composition of audit committees, which play an important role in financial reporting and oversight.

Three companies had fewer than the prescribed minimum of three members on their audit committees.

The survey further found that 64 companies relied on an in-house process for board evaluation, rather than engaging external evaluators.

IP of govt projects remains under Indian ownership and control, says Pixxel CEO

Our Bureau
Bengaluru

The establishment of Pixxel Federal, the US government-focused subsidiary of spacetech start-up Pixxel, has triggered a debate over the balance between global expansion and India's strategic interests, raising questions around IP ownership, corporate control and access to capital.

The discussion intensified after Bengaluru-based competitor GalaxEye, led by Suyash Singh, published a lengthy post on X on November 1, titled 'Built in India, Headquartered in India: The GalaxEye Story'. While the post did not name Pixxel, it emphasised that the company had consciously chosen to remain headquartered in India despite having opportunities to establish itself in other geographies.

"Today, we remain an India-headquartered company,

Awais Ahmed, CEO, Pixxel BLOOMBERG

designing and building in Bengaluru, and we are proud of it," said GalaxEye in its post. The remarks came amid social media criticism questioning Pixxel's corporate structure and whether its overseas presence could have implications for its work with Indian defence institutions.

In a detailed clarification on X, Pixxel Co-founder and Chief Executive Awais Ahmed said the company was Indian-headquartered, Indian-owned, managed and controlled. He said its primary Indian entity was incorporated in 2018, before any international Pixxel entity, and was responsible for executing its Indian government, space and defence programmes.

"All IP developed for Indian government projects is held in India, under Indian ownership and control," said Ahmed, adding that no foreign entity had ownership, control or decision-making authority over these programmes. He clarified that Pixxel Federal's board and CEO had authority limited to the US subsidiary and its American operations, with no control over Indian government programmes.

OWNERSHIP, CONTROL
The debate also raised questions about how Indian space-tech companies can attract international capital and pursue overseas government contracts without compromising domestic strategic interests.

Bhargav KS, Managing Partner at KS & BKS Law Associates, Bengaluru, said overseas incorporation alone did not determine the ownership of intellectual property developed by an Indian company. "Incorporating a US subsidiary does not, by itself, transfer ownership or control of an Indian company's IP. Legal title depends on applicable law, project contracts and valid assignments; control requires examining governance, licensing and access arrangements," he said.

He said under iDEX, innovators generally retain IP, subject to grant conditions and government rights, while Indian Air Force contracts must be assessed on their specific terms. "Where the IP legally resides is decided by the contract, the entity holding the patents, code and data, and the Indian law under which they were created, not by where the group has offices or investors," said Vinay Butania, Partner, Economic Law Pratices.

From smartphones to MRI systems, memory chips driving up costs

Aishwarya Kumar
Jyoti Banthia
Bengaluru

Smartphone makers are raising prices as a sharp increase in memory costs adds to the pressure on the consumer electronics industry, even as the festival season growth in mobile sales is expected to slow significantly.

Lava International announced a price revision of up to ₹3,000 across its smartphone portfolio from November 15, citing the memory shortages.

The move comes against the backdrop of a sharp rise in component prices. A 2 GB LPDDR5X memory die, which cost around $6.8 in January, is now priced about $30, an increase of approximately 341 per cent, said Abhilash Kumar, Lead Research Advisor (Director) at Smart Analytics Global (SAG).

"Smartphones are the most exposed category in the current memory shortage and are likely to experience the most pronounced impact in India," said Kumar, adding that smartphones and laptops use significantly more DRAM and NAND than products such as televisions, TWS earbuds and smartwatches.

According to Datum Intelligence's festival outlook report, mobile gross merchandise value (GMV) growth is projected to slow to 6 per cent in 2026 from 26 per cent in 2025.

FESTIVAL SALES
The category's share of festival sales is also expected to decline to 29.8 per cent from 35.2 per cent last year. Overall festival-market growth, however, is forecast to remain at 25 per cent.

Lava said consumers planning to upgrade their devices should make use of current festival offers before the revision takes effect. "Consumers looking to upgrade their devices have a strong opportunity at this moment as our products are currently available at festival prices across leading e-commerce platforms and offline retail network," the company said.

PRICE PRESSURE
Kumar cited the case of Vivo V70 (12 GB + 256 GB), launched around ₹49,999 in February 2026, which is now retailing at approximately ₹64,999, a rise of nearly 30 per cent.

The newer iPhone Pro model was launched at ₹1,64,900, compared with ₹1,34,900 for the iPhone 17 Pro, reflecting a 22 per cent increase in launch pricing, he said.

The impact is likely to be less pronounced in wearables, which generally require less memory. While smartphones typically use around 6 GB of RAM, true smartwatches use about 2 GB, and TWS earbuds and smart rings have memory requirements measured in megabytes, said Kumar.

OTHER CATEGORIES
The shortage is also affecting businesses that rely on other categories of chips.

Voxelgrids, which develops MRI systems, has seen the cost of its GPU-based workstations nearly double over the past year, with prices rising from around ₹7 lakh to ₹13.5 lakh, said Co-founder and CEO Arjun Arunachalam.

Delivery timelines have also stretched from less than four weeks to nearly 16 weeks.

MRI SYSTEMS
The company has seen prices of chips used across its MRI systems, including GPUs, FPGAs and microprocessors, rising sharply. This has translated into an overall increase of about 35 per cent in its costs, said Arunachalam.

Anthropic Q3 loss falls to $23 b

Reuters

Anthropic's net loss narrowed sharply in the third quarter as revenue jumped, an amended IPO filing with the US Securities and Exchange Commission showed on Monday. The AI company's net loss fell to $23.29 billion in the three months ended September 30 from $66.3 billion in the second quarter, while revenue rose to $16.96 billion from $11.56 billion.

Anthropic filed to go public last week, setting the stage for what could be the biggest initial public offering on record, as investors scrutinise the vast sums being poured into AI infrastructure. Some current and prospective investors are valuing Anthropic at about $1.5 trillion, down from roughly $2 trillion, after the AI startup disclosed financial details at a recent investor event.

The amended prospectus gives investors a fresh look at Anthropic's finances as the company moves closer to its highly anticipated IPO, seen as a crucial test of investor appetite for AI companies.

Anthropic posted an operating loss of $567 million in the third quarter, compared with operating income of $974 million in the second quarter.

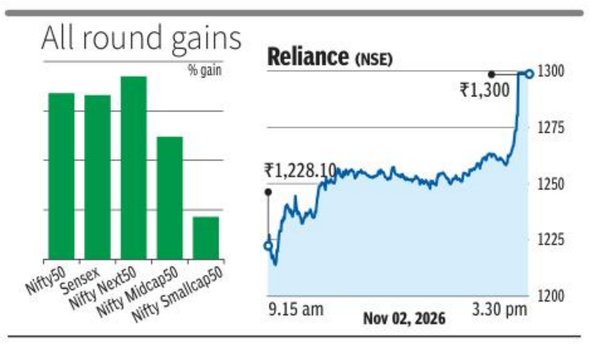
Surge in Reliance lifts Sensex by 1.6%; Nifty tops 23,400

POSITIVE SENTIMENT. Falling crude prices and improving FII flows aid in all-round rally

Our Bureau
Mumbai



A nearly 12 per cent surge in Reliance Industries, its third-biggest single-day gain in the past 10 years, powered Indian equities sharply higher on Monday.

The stock accounted for about 61 per cent of the Sensex's gains and nearly half of the Nifty 50 rise, helping the benchmarks extend their winning streak to a third consecutive session amid falling crude oil prices, foreign fund inflows and improving risk sentiment.

The 30-share BSE Sensex rose 1,233.25 points, or 1.66 per cent, to close at 75,692.78, while the NSE Nifty 50 gained 387.7 points, or 1.68 per cent, to settle at 23,440.80.

Both the indices closed at their day's highs.

The market breadth remained firmly positive, with advances comfortably outnumbering declines.

The broader market also participated in the rally, with the Nifty MidCap 100 rising 1.19 per cent and the Nifty SmallCap 100 gaining 0.71 per cent.

METALS SHINE

Besides Reliance, metal stocks were among the biggest contributors to the rally, with Tata Steel and JSW Steel posting strong gains.

Oil marketing companies also advanced as global crude prices fell sharply on hopes of progress in negotiations between the US and Iran, easing concerns over energy costs for import-dependent economies such as India.

Positive regional cues supported domestic equities through the session. Foreign portfolio investors (FPIs) were net buyers of equities worth ₹3,115 crore, while domestic institutional investors were net sellers for ₹392 crore.

LIMITED TRIGGERS

Nitin Bhasin, Head of Institutional Equities at Ambit, said: "The broader market narrative has not changed materially. Geopolitical risks and concerns around the global AI trade continue to persist. Today's move was largely a Reliance-led rally, with the stock catching up after the strong performance seen in Jio post-listing. Beyond that, I do not see any immediate catalyst for a sustained market bounce."

Dhananjay Sinha, Co-Head of Institutional Equities at Systematix, said the markets were likely pricing in the prospect of lower oil prices and a gradual revival in foreign institutional investor flows, both supportive of Indian equities.

A correction in AI-led global trades could also improve India's relative appeal to foreign investors, he said.

However, these remained hypotheses rather than established trends. Given the uncertainty, the markets were likely to remain largely range-bound and trading-oriented, with no strong trigger for a sustained directional move, he added.

BOND, RUPEE

Government bond yields also declined, with the benchmark 10-year yield falling to 7.31 per cent, its lowest in six months, amid lower crude prices and continued foreign inflows. Expectations of stable liquidity conditions also supported sentiment.

Brent crude prices fell about $10 to $108 a barrel. The rupee depreciated marginally by 5 paise to close at ₹94.9 against the US dollar.

Khambata exits Tata Trusts, says 3rd term for Chandra sullied Tata Sons' image

Aneesh Phadnis
Mumbai

Tata Sons' September 17 decision to grant N Chandrasekaran a third term as Chairman has sullied the company's reputation and dented the image of corporate India, outgoing Tata Trusts board member Darius Khambata has said.

Khambata expressed this view in a letter to Tata Trusts Chairman Noel Tata while declining reappointment as a trustee.

"The sad events of September 17, 2026, a day that will live in infamy, have sullied Tata Sons' reputation and imperilled the image of corporate India. No amount of spin doctoring can mask what happened," Khambata wrote on Monday.

"Would the board of Tata Sons have acted as it did on September 17 had Ratan Tata still been alive? Of course not. But duties are owed to institutions, not individuals. And as Ratan Tata used to say, the institution is always bigger than the individual," he said.

Noel Tata has opposed Chandrasekaran's reappointment and has termed the board's decision void.

Darius J Khambata, member of the Tata Trusts board

Khambata, a senior lawyer, has served as a trustee of the Sir Dorabji Tata Trust (SDTT) and the Sir Ratan Tata Trust (SRTT), the two key shareholders of Tata Sons, since 2023.

LISTING ISSUES

Khambata has been aligned with Noel Tata on key issues, including retaining Tata Sons' private status. The issue has divided the trusts, with fellow trustees Vijay Singh and Venu Srinivasan supporting a share sale.

The SRTT continues to remain under a regulatory ban. Khambata's term at the SDTT was due to end in November, and he is believed to have opted against reappointment amid expectations of opposition from Singh and Srinivasan. An executive with the trusts said Noel Tata continued to command a majority within the trusts despite Khambata's exit.

Tata Sons declined to comment on Khambata's letter. In the letter, Khambata recounted his tenure with the organisation and highlighted key resolutions, including those opposing the listing of Tata Sons shares.

"Since May 2025, I have consistently maintained that opposition to listing must go hand-in-hand with providing liquidity to the Shapoorji Pallonji group through the sale of some or all of their shares," he wrote.

TRUSTEES' RESPONSIBILITY

Khambata also criticised Singh and Srinivasan for allegedly acting against the interests of the trusts.

"It is now untenable to argue that a nominee director of a public charitable trust, particularly a serving trustee, may act against the trusts' interests merely because he owes a duty to the company. He sits on the board precisely to protect the trusts. There cannot be two classes of trustees, those who are nominee directors and those who are not. All trustees owe an equal fiduciary duty to the trust," he said.

CUMI reports decline in Q2 profit to ₹12 crore

Chennai: Murugappa Group materials entity Carborundum Universal (CUMI) reported a net profit of ₹12 crore in Q2 FY27, a steep decline from ₹74 crore it made in the same quarter last year. Profit was impacted by an exceptional item of ₹80 crore, related to the closure of operations of CUMI Awuko Abrasives GmbH (CAAG), a German step-down subsidiary. The company's consolidated sales stood at ₹1,455 crore, growing 13.1 per cent. Consolidated ceramics sales grew 36.1 per cent, while consolidated electrominerals sales grew 11.1 per cent y-o-y. Consolidated abrasives revenue grew marginally by 4 per cent. OUR BUREAU.

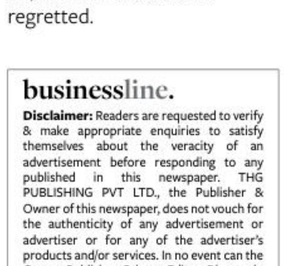
Granules India's Q2 profit up 39% at ₹182 crore

Hyderabad: Granules India's net profit increased 39 per cent at ₹182 crore in Q2 FY27. Total revenue grew 20 per cent to ₹1,560 crore. "Cost pressures will persist and we are working with customers to manage them with a lag," said Krishna Prasad Chigurupati, Chairman and Managing Director. "We recently concluded a US FDA audit at our Gagillapur unit. The observations are of a nature that can be fully addressed," he added. OUR BUREAU

TVS Holdings given Home Credit India Fin's shares

Chennai: TVS Holdings Ltd on Monday informed the exchanges that it has been allotted an additional 12,55,26,842 equity shares of ₹10 each in Home Credit India Finance Pvt Ltd (HCIFPL), a subsidiary of the company pursuant to a right issue offer made. The consideration of the offer stands at ₹484 crore. The aggregate cost of this additional investment exceeds the materiality threshold specified under regulations but the company's aggregate holding in HCIFPL remains at 74.45 per cent since it was a rights issue, it explained. HCIFPL is a non-deposit-taking NBFC registered with the RBI. During 2025-26, HCIFPL generated a turnover of ₹2,112.74 crore with profit after tax of ₹132.24 crore and had a net-worth of ₹2,654.35 crore. The additional investment is made towards sustaining and accelerating the current growth rate of HCIFPL, TVS Holdings said. OUR BUREAU

ESDS Software Solutions Q2 net up 41% to ₹31 cr



Mumbai: ESDS Software Solutions reported a net profit growth of 41 per cent to ₹31.1 crore and revenue growth of 48 per cent to ₹138.3 crore led by sustained demand in the digital infrastructure business. Infrastructure-as-a-service dominated the revenue share, accounting for 47 per cent of the performance, with a total of ₹65.6 crore in Q2. Of this, colocation and data centre services accounted for 25 per cent at ₹16.3 crore. OUR BUREAU

Correction

In the article, "It's a GIANTHROPIC IPO", published on November 1, 2026, it was erroneously mentioned that the figures in Table 1 are in $ billion while they are in fact, in $ million. The error is regretted.

ITC's Q2 net falls 20% as taxes hit cigarette business

THE OTHER SIDE. Non-cigarette FMCG segment at a 14-quarter high, revenue up 15%

Our Bureau
Kolkata

Lacklustre quarter

(Standalone figures) (in ₹ cr)

	Q2 FY26	Q2 FY27	Change (in %)
Revenue from operations	19,441.5	28,317.67	45.65
Net profit	5,175.7	4,137.12	-20.6
EBITDA	6,250.00	5,160.00	-17.44
Total expenses	13,581.7	23,617.78	73.89

Diversified conglomerate ITC Ltd reported a nearly 20 per cent year-on-year fall in its standalone net profit in the second quarter this fiscal to ₹4,137.12 crore, as its cigarette business profitability was hit owing to higher taxation following the introduction of a new tax regime.

The conglomerate had posted a net profit of ₹5,175.70 crore in Q2 FY26.

Revenue from operations during Q2 FY27 grew 45.65 per cent y-o-y to ₹28,317.67 crore (₹19,441.50 crore), backed by strong performances across all non-cigarette business segments. The non-cigarette FMCG business revenue recorded a 14-quarter high growth during the period.

WHAT HURT

ITC, in a statement, said crude oil and crude-linked input prices remained elevated, while supply chain disruptions and higher freight costs persisted. The company's total expenses witnessed a 73.89 per cent y-o-y to ₹23,617.78 crore in the second quarter this fiscal year, with cost of materials consumed rising 15 per cent.

During Q2, overall EBITDA saw a decline of 17.4 per cent y-o-y to ₹5,160 crore compared with ₹6,250 crore in the corresponding period of FY26. EBITDA for the non-cigarette businesses, however, grew 23 per cent.

Revenue from the company's cigarettes business rose 78.11 per cent to ₹15.536.13 crore in Q2, while operating profit from the segment decreased 27.23 per cent y-o-y to ₹3,813.45 crore, according to the company's stock exchange filing. The country's largest cigarette maker said legal industry volumes remained under pressure due to an unprecedented increase in tax.

OTHER BUSINESS

During the period, the non-cigarette FMCG business registered a 15.67 per cent growth in revenue to ₹6,967.17 crore, while the segment posted a 27.80 cent increase in operating profit to ₹558.30 crore. The segment's EBITDA margin expanded over 50 basis points. During the period under review, digital-first and organic portfolio sustained a high growth trajectory. The company said sharp input cost escalation across categories was mitigated through portfolio mix enrichment, cost management initiatives and calibrated pricing actions.

The company's agri business witnessed an 11.96 per cent increase in revenue to ₹4,451.69 crore, and the segment registered an 11.23 per cent rise in operating profit to ₹510.67 crore. The revenue growth was led by value-added products and leaf tobacco exports. Overall, the agri business remained impacted by disruptions arising from the conflict in West Asia and delayed call-offs by customers, the company said.

The paperboards, paper and packaging business witnessed a 35.85 per cent growth in revenue to ₹3,015.85 crore. The business posted a 47.59 per cent increase in its operating profit to ₹281.93 crore.

Global consumer firms see India as a key growth market

Meenakshi Verma Ambwani
New Delhi

OPPORTUNITY ZONE

- Mondelez added 1.3 lakh outlets to expand distribution in India
- Coca-Cola said each of its top 10 brands grew in double digits in Q3 CY26
- India is a call-out on both Maggi and KitKat: Nestle

Global FMCG companies have said that India is emerging as a key growth region amid challenging macroeconomic conditions and geopolitical uncertainties. Companies including Unilever, Coca-Cola, Nestle, L'Oreal, Reckitt and Mondelez said their India business posted strong growth in the September quarter.

DEFEATING THE ODDS

Mondelez International, known for Cadbury and Oreo, noted that the India business clocked "north of 20 per cent growth" while it added 1.3 lakh outlets to expand distribution in the country in the quarter.

"I think it is not by coincidence that you see us delivering numbers that are north of 20 per cent growth in India or for that matter, in China, numbers that have, quite frankly, defeated the odds of the market, particularly if you compare us to other companies. The reason why those numbers are being delivered is because we pursue incremental distribution opportunities rigorously," said Luca Zaramella, COO and EVP, Mondelez International, on the earnings call.

On the Q3 earnings call, Unilever's Global CFO Srinivas Phatak said, "India, our largest emerging market, grew 15 per cent with 7 per cent from volume continuing the momentum of the first half and lapping a GST-led lower prior year comparator. Growth was broad-based."

Coca-Cola said India delivered a strong volume growth with each of its top 10 brands growing double digits in Q3 CY2026. "We are expanding our consumer base by scaling both affordability and premiumisation, strengthening execution, and leaning into emerging channels," said Henrique Braun, Global CEO, The Coca-Cola Company.

STRONG MOMENTUM

Consumer products maker Reckitt, known for Dettol, Harpic and Lizol, said the India business grew double digits supported by broad-based growth momentum. "India maintained strong momentum, with double-digit growth and broad category expansion. Our AI-enabled sales transformation is continuing to enhance our execution in the market," the company added.

Swiss packaged food major Nestle, too, noted that in the September quarter, growth momentum continued in the Asia, Oceania and Africa zone with India recording 20 per cent organic growth. Philipp Navratil, CEO, Nestlé SA, said, "India is a call-out on both Maggi and KitKat. As you see, this is driven by our billionaire brands that again receive focused investment there. Maggi, KitKat, but also Milo are performing really well..."

Recently, global beauty major L'Oreal said its consumer products division posted double-digit growth in India in Q3. The company said it is witnessing a "great turnaround" in the India market.

Channel inventory build-up for Deepavali drives October 2-w sales

Two-wheeler sales

(in units)

	Oct-25	Oct-26	Change (%)
Hero MotoCorp	6,04,829	7,05,084	16.5
HMSI	5,98,952	6,64,831	11
TVS Motor	4,21,631	5,14,764	22
Bajaj Auto	2,66,470	2,92,885	10
Suzuki Motorcycle India	1,03,454	1,24,559	20
Royal Enfield	1,16,844	1,21,527	4

Source: Companies

The domestic two-wheelers wholesales (dispatches) saw a healthy growth in October with most of the original equipment manufacturers (OEMs) growing by double digits year-on-year, led by festival sentiments among buyers.

Market leader Hero MotoCorp reported domestic dispatches of 7,05,084 units during the month, which was a growth of 16.5 per cent y-o-y compared with 6,04,829 units in October 2025.

The company's domestic internal combustion engine (ICE) business delivered dispatches of 6,75,017 units in October as compared to 5,90,806 units in the same period last year reflecting a 14 per cent y-o-y growth with Scooters and the 100cc motorcycles driving its growth performance, it said.

Hero MotoCorp also mentioned that its emerging mobility business unit Vida, continued to maintain its strong growth momentum in October 2026 with dispatches of 30,143 units. Vida's market share in the electric two-wheeler segment increased to 13.6 per cent in October, up from 11.1 per cent in the corresponding month last year, it added.

FESTIVAL DEMAND

Scooter major Honda Motorcycle & Scooter India (HMSI) reported 11 per cent y-o-y growth in its domestic wholesales to 6,64,831 units during the month as compared with 5,98,952 units in October 2025.

In October 2026, HMSI said it continued to witness steady underlying demand during the festival season and remained focused on serving customers through its product portfolio and dealer network of over 7,000 touchpoints.

Meanwhile, Pulsar maker Bajaj Auto also reported a growth of 10 per cent y-o-y to 2,92,885 units in October, as compared with 2,66,470 units in the corresponding month last year. Suzuki Motorcycle India (SMIPL), the two-wheeler subsidiary of Suzuki Motor Corporation, Japan, also recorded an all-time high of 1,24,559 units, a 20 per cent increase y-o-y over 1,03,454 units sold in the same month last year.

"October has been an encouraging month for Suzuki Motorcycle India... This performance reflects the strong connect that Suzuki has established with customers across India," Deepak Mutreja, Vice President – Sales and Marketing, SMIPL, said.

Royal Enfield reported 4 per cent y-o-y growth in its domestic dispatches to 1,21,527 units last month as against 1,16,844 units in October 2025.

According to analysts, October wholesale volumes were particularly encouraging, with most major OEMs reporting double-digit growth. "The demand was especially visible in the electric two-wheeler segment," Vinay Jain of Karma Capital, said.

Gulf Oil to scale EV arm, eyes ₹6,000 cr revenue by FY30

Amit Vijay Mohile
Mumbai

> We are expecting the [electric vehicle] charger business to go to ₹300-400 crore in three to four years
>
> **RAVI CHAWLA**
> MD and CEO

Gulf Oil Lubricants India Ltd is eyeing over ₹6,000 crore in annual revenue by FY30, up from nearly ₹4,000 crore in FY26, according to people familiar with its growth plans. This, as the Hinduja Group company expands lubricant production and scales Tirex, its EV charging equipment subsidiary. The ambition, implying nearly 11 per cent annual revenue growth, is supported by investments of ₹110-112 crore across the two businesses.

THE FIVE-YEAR MATH

Ravi Chawla, MD and CEO, said the company had historically doubled turnover roughly every five years. "So typically, if you do the math, we have been growing double digit. And if you take the history of our business, every five years we have doubled our turnover."

Gulf is raising its lubricant manufacturing investment to ₹60-62 crore from ₹55 crore, alongside a previously disclosed ₹50 crore investment in Tirex for a new plant. The expansion will increase annual lubricant capacity by 70 per cent to 240 million litres.

Chawla said the plants were operating third shifts, with additional capacity expected to support growth for 3-4 years. CFO Manish Gangwal told analysts that the Chennai unit remained on schedule for December, while the Silvassa one could slip into April-June 2027.

MARGIN PRESSURE

Core lubricant volumes rose 16 per cent to 47,000 kilolitres in Q2 FY27, following 17 per cent growth in the preceding quarter. Chawla said Gulf gained business by maintaining supplies during industry disruptions, ensuring supply security for its more than 50 OEM partners and other customers.

Consolidated net profit attributable to shareholders increased 34.9 per cent to ₹115.43 crore, while revenue from operations rose 45.7 per cent to ₹1,408.66 crore.

However, standalone EBITDA margin stood at 11.8 per cent, below management's 12-14 per cent range. Management said earnings per litre remained resilient despite higher raw-material costs. Gulf has implemented three consumer-channel price increases, while some automakers have shifted to monthly raw-material price adjustments. Further increases could follow if higher crude prices feed into base-oil costs.

Tirex crossed ₹100 crore in FY26 revenue and is expanding manufacturing capacity towards 3,000 chargers. "We are expecting the charger business to go to ₹300-400 crore in three to four years," Chawla said.

Norton Motorcycles to debut 450 cc bike

NEW MODEL. TVS Motor Company's Chairman Sudarshan Venu with the newly announced 450 cc motorcycle

Our Bureau
Chennai

Norton Motorcycles on Monday announced its new 450 cc urban motorcycle in a significant step in the British brand's resurgence.

Developed as part of Norton's new product strategy, the motorcycle is powered by a liquid-cooled 454 cc single-cylinder engine producing 45 Nm of torque, with an emphasis on responsive, accessible performance.

"An aluminium frame provides the foundation for agile, confidence-inspiring handling, while an 8-inch TFT touchscreen introduces a contemporary digital experience with advanced connectivity features," the company said in its announcement.

Sales will begin in 2027, with the motorcycle's official model name to be revealed ahead of launch.

Norton's resurgence is supported by TVS Motor Company's long-term investment in the British major, including the continued development of its unit in Solihull, UK, as a centre for motorcycle design and engineering along with the TVS Motor global engineering centre in Italy and TVS Motor's R&D headquarters in India. The company has established a retail network of more than 50 locations across 10 markets.

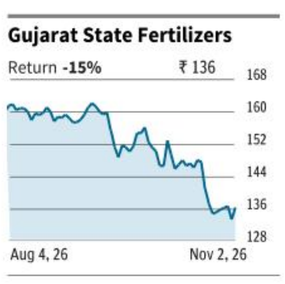
Preparations are also progressing for Norton's introduction into India and the US.

'MOST DESIRABLE'

Sudarshan Venu, Chairman, TVS Motor Company, said, "Norton has never been defined just by engine capacity or a particular category of motorcycle. It is defined by its character, its design, engineering and the emotional connection it creates with riders. Our vision is to bring this compelling experience forward to a new generation of customers while remaining true to the principles that define Norton now and into the future... Supported by TVS Motor Company's long-term commitment, global engineering capabilities and investment in the brand, we are building a new generation of Norton motorcycles for customers around the world. Our strategy is to establish Norton as one of the most desirable names in modern motorcycling, recognised for exceptional design, engaging performance and a truly discerning ownership experience."

GSFC's Q2 profit falls 38% despite revenue growth

Our Bureau
Ahmedabad



Gujarat State Fertilizers & Chemicals Ltd (GSFC) reported a 38 per cent year-on-year decline in consolidated net profit to ₹200 crore for the second quarter of FY27, despite a sharp increase in revenue.

Revenue from operations rose 49 per cent year-on-year to ₹4,741 crore, driven by a 53 per cent increase in revenue from fertilizer products and a 30 per cent rise in revenue from industrial products.

SHAREHOLDING CUT

In a separate development, GSFC's board approved steps to reduce its shareholding in Gujarat Port and Logistics Company Ltd (GPLCL) to 11 per cent from 60 per cent, following which the latter will cease to be its subsidiary. As part of the restructuring, GSFC will renounce its entitlement to 18 lakh equity shares in GPLCL's rights issue. Of these, 13 lakh shares will be renounced in favour of Gujarat Industrial Development Corporation and five lakh shares in favour of Gujarat Rail Infrastructure Development Corporation Ltd.

Strong sales push up Arvind Fashions' profit

Our Bureau
Ahmedabad

Arvind Fashions reported a 29 per cent year-on-year increase in consolidated profit after tax to ₹48.5 crore in Q2 FY27, aided by stronger retail sales, improved margins and growth in direct-to-consumer channels. Revenue from operations rose 10 per cent to ₹1,559 crore. The company attributed its performance to a 15 per cent growth in its retail channel and momentum in online direct-to-consumer sales.

The company has set a revenue growth target of 12-15 per cent for FY27, focusing on expanding direct channels, strengthening its presence in apparel categories and accelerating growth in adjacent categories.

GNFC sees top line rise 41%, aided by fertilizer biz

Our Bureau
Ahmedabad

Gujarat Narmada Valley Fertilizers & Chemicals Ltd (GNFC), a Gujarat government-backed joint-sector enterprise, reported an 8 per cent year-on-year increase in consolidated net profit to ₹194 crore for Q2 FY27, supported by higher realisations and volumes across its fertilizer and chemicals businesses. But elevated input and fixed costs, particularly amid higher feedstock and energy prices, partly offset the gains.

Revenue from operations rose 41 per cent to ₹2,773 crore. It was aided by revenue from the fertilizer segment which increased 43 per cent, while the chemicals segment reported a 40 per cent growth in revenue. Managing Director Sanjeev Kumar said revenue growth was driven by higher volumes across a majority of products, partly offset by lower realisations on a sequential basis.

The fertilizer segment's loss narrowed sequentially, primarily due to the positive impact of revised urea energy norms and lower input costs, partially offset by higher fixed costs.

Defence Min awards ₹53,866 cr warship contracts to GRSE, GSL

MARITIME MUSCLE. GRSE will construct 5 corvettes, while GSL will manufacture three

Our Bureau
New Delhi

In a maiden maritime project conceived, designed and to be produced indigenously through competitive bidding, the Ministry of Defence has signed contracts worth ₹53,866.5 crore with defence PSUs Garden Reach Shipbuilders & Engineers Ltd (GRSE) and Goa Shipyard Ltd (GSL) for the acquisition of eight next generation corvettes (NGCs) for the Navy, adding to its combat capabilities during growing insecurities.

The Kolkata-based GRSE will construct five corvettes and GSL the remaining three, the Ministry of Defence said in a statement on Monday.

The project marks a significant milestone in India's indigenous warship design and construction capabilities as it is the first project in which the ships will be indigenously designed by the Navy and constructed by defence public sector undertakings (DPSUs) selected through a competitive process, the Ministry stated.

COMBAT CAPABILITIES. The contracts were inked in the presence of Defence Secretary Rajesh Kumar Singh and senior officials from the Ministry of Defence and PSUs

The deals came following the Cabinet Committee on Security (CCS) giving approval to the major procurement proposal.

Subsequently, the contracts were inked in the presence of Defence Secretary Rajesh Kumar Singh and senior officials from the Ministry and the DPSUs on Monday.

The NGCs will be equipped with state-of-the-art capabilities, including advanced missiles, weapons and sensor suites, enabling them to undertake missions across the air, surface and sub-surface domains. The MoD stated that the induction of the ships would significantly enhance the Navy's operational capabilities in safeguarding maritime trade routes, conducting anti-surface and anti-submarine warfare operations, strengthening coastal defence, undertaking littoral combat operations and carrying out maritime presence and surveillance missions.

LANDMARK ORDER

The GRSE has manufactured and delivered 10 corvettes to the Navy but none were of the next generation class. These are multi-role stealth surface combatants and are expected to roll out from 2031. The GSL will be manufacturing them for the first time.

The NGC project represents the largest order ever secured by GSL in its history, underscoring its capabilities in the construction of advanced naval combat platforms. This landmark order strengthens GSL's order book and reinforces its position as a key contributor to India's indigenous defence shipbuilding programme, the shipyard stated.

PMI manufacturing drops to 54.7 in Oct

Our Bureau
New Delhi

Amid the festivities, manufacturing activity in India slowed a bit, with the Purchasing Managers' Index (PMI) dropping to 54.7 in October, S&P Global reported on Monday. However, fresh job creation recorded an increase during the month, albeit at a slower pace.

The data showed mixed trends. While output and new orders rose sharply, growth was at softer rates. Meanwhile, export order growth hit a six-month high and selling price inflation eased to a four-year low.

"India's manufacturing PMI softened to 54.7 in October from 55.1 in the previous month but remained firmly in expansionary territory and above its long-run average," Pranjul Bhandari, Chief India Economist at HSBC, said. Further, she said that strong international demand pushed growth of new export orders to a six-month high, supporting a robust rise in output.

JOB OPPORTUNITIES

On job creation, the PMI Manufacturing report said that higher production requirements and rising workloads encouraged a second successive monthly increase in factory employment. "The pace of job creation eased, however, and was only slight," it said, adding that capital goods producers reduced staffing, with growth seen elsewhere.

JOB CREATION

The report said higher production needs and rising workloads encouraged a second successive monthly increase in factory employment

Meanwhile, cost pressures moderated across all three broad areas of India's manufacturing industry monitored by the PMI survey. Although survey members reported higher prices for several materials and energy, the overall rate of input cost inflation retreated to its lowest since February. Indian goods producers raised selling prices to protect margins, but the increase was only slight and the weakest in just under four years. "Producers also increased input inventories to the greatest extent in eight months, building precautionary buffers to mitigate potential shortages and meet rising production requirements amid a volatile global environment. Although some material and energy costs increased, overall input and output price pressures eased slightly from the previous month," Bhandari said.

According to the survey report, input purchasing growth entered its 64 straight month in October, but the pace of expansion slowed to the weakest over this period. Despite continued demand growth, business confidence slipped from September and remained below its long-run average.

LPG consumption hits 8-month high in October

Rishi Ranjan Kala
New Delhi

India's consumption of liquefied petroleum gas (LPG) rose to an 8-month high in October, hitting roughly 2.61 million tonnes (mt) as supplies of the critical cooking fuel increased from the US and Algeria even as the Strait of Hormuz (SoH) remains under blockade.

According to the Petroleum Planning and Analysis Cell, LPG usage by the world's second largest consumer rose by roughly 2.8 per cent on a monthly basis. The consumption, however, fell by almost 9 per cent year-on-year. October numbers are provisional.

This is the sixth consecutive month to record an uptick in LPG consumption as India bulked up on cargoes from the US and Algeria.

Kpler expects India's demand for LPG to decline likely by around 1,00,000 barrels per day (b/d) in 2026, as closure of the SoH impacted roughly 90 per cent of its imports of the cooking fuel.

Priti Mehta, Kpler's Senior Oil Demand Modelling Analyst, anticipated that LPG demand would recover from its Q2 2026 and Q3 2026 lows during Q4, supported by the festival season and higher imports, but the recovery is expected to remain incomplete. However, the company expects the demand to increase by around 60,000 b/d in 2027, recovering slightly more than half of the 2026 decline.

Diesel consumption surged to a four-month high, rising by almost 19 per cent month-on-month to hit 8.51 mt last month.

On an annual basis, the usage of the main transport fuel was higher by around 12 per cent. Analysts and refiners attributed the rally to rising industrial, mining and commercial activity. "Adding to the rally is the jump in agricultural activity with rabi crop sowing going on in full swing. Stocking of FMCG and FMCD before the Deepavali season added to the consumption. Diesel demand will continue to remain high during November and December," said one of the sources.

Petrol consumption rose by 3 per cent each on a monthly and annual basis to hit 3.78 mt in October. Sustained economic activity, coupled with growing vehicle ownership both for four-wheelers and two-wheelers, is pushing up the demand for motor spirit.

DIESEL DEMAND

Kpler expects global diesel demand to decline by 5,00,000 b/d in 2026, making it the hardest-hit refined product.

However, India remains a major exception, with diesel demand forecast to increase by around 90,000 b/d in 2026, Mehta said.

APPOINTMENT

NaBFID National Bank for Financing Infrastructure and Development

NATIONAL BANK FOR FINANCING INFRASTRUCTURE AND DEVELOPMENT
Human Resources Department, Mumbai
www.nabfid.org

RECRUITMENT OF
EVP & HEAD- MARKET RISK, ALM & ENTERPRISE RISK
ON FIXED TERM CONTRACT BASIS

National Bank for Financing Infrastructure and Development, set up under an Act of Parliament, 2021, is the principal entity for infrastructure financing in the country. The entity is regulated and supervised as an All-India Financial Institution (AIFI) by the Reserve Bank of India (RBI). Institution is poised to play an extremely crucial role in supporting infrastructure funding by driving the development of innovative financing instruments and development of bond and derivatives markets and promoting best practices in financing and data-driven risk management.

Online Applications are invited from Indian Citizens for appointment on Fixed Term Contract Basis as per details given below:

S.No.	Post / Grade	Advertisement No.	Vacancy
1	EVP & HEAD- MARKET RISK, ALM & ENTERPRISE RISK	NABFID/EVP/16	01 (UR)

1. For eligibility criteria (age, experience, job profile etc.), vacancy and other details, please visit the Bank's website **https://nabfid.org/careers or scan the QR code.**
2. Refer detailed advertisement to ensure eligibility and other details before applying. Application starts from **03/11/2026.**
3. Remuneration will be offered based on qualification, experience, suitability, last drawn salary, market benchmark, as per advertisement. For other information, please refer detailed advertisement on the Banks website.
4. Any addendum / corrigendum / modification in this regard will ONLY be available on the Bank's website.
5. Selection will be solely at the discretion of the Bank, and its decision will be final.

India, EU to address pending issues ahead of FTA rollout

PAVING THE WAY. Commerce Secretary to met key EU officials to discuss two-way trade

Our Bureau
New Delhi

In high-level official talks in Brussels, India and the European Union (EU) agreed to maintain close contact to address all remaining procedural and implementation-related issues surrounding the bilateral Free Trade Agreement (FTA), expected to kick off by mid-2027.

Commerce Secretary Rajesh Agrawal led key discussions with European Commission officials last week, including Director General for Trade Ditte Juul Jørgensen, focusing on measures to facilitate two-way trade, improve market access, strengthen supply chain resilience, and unlock new commercial opportunities for both economic powers, per a statement issued by the Commerce Department on Monday.

DISCUSSING THE DETAILS. Commerce Secretary Rajesh Agrawal (centre) at a high-level meeting with European Commission officials and industry representatives ANI

INDIA-EU FTA

Agrawal also met Gerassimos Thomas, Director General, Directorate General for Taxation and Customs Union (DG TAXUD). "... The meetings focused on customs co-operation, trade facilitation and preparations for the implementation of the India-EU FTA. Both sides recognised the importance of efficient, transparent and digitally enabled customs procedures in supporting businesses, reducing transaction costs and ensuring the smooth movement of legitimate trade," it said.

The India–EU FTA is likely to be officially signed in December in Brussels during a planned visit by Prime Minister Narendra Modi. It is projected to enter into force in early to mid-2027, after the EU Parliament clears it, with phased tariff reductions rolling out over up to 10 years. In their discussions with Agrawal, the EU officials highlighted a shared commitment to a fair, balanced and mutually beneficial economic framework, the statement noted.

With the EU's focus on sustainability also reflected in the trade pact, Agrawal met Koen Doens, Director-General for International Partnerships, exchanging views on deepening strategic cooperation across the sustainable development, clean energy and green technology sectors.

DIAMOND ECOSYSTEM

The Commerce Secretary also met stakeholders from the Antwerp diamond ecosystem to discuss the global value chain, certification, traceability requirements and responsible sourcing. Recognising Antwerp, Mumbai and Surat as primary diamond hubs, both sides identified gems and jewellery as vital pillars for enhanced industrial collaboration.

Agrawal participated in a BusinessEurope roundtable with European industry leaders to discuss opportunities for expanding trade and investment ties. "He highlighted India's strong economic growth, reform momentum and investment opportunities across key sectors and invited European businesses to deepen their engagement with India and participate in its expanding value chains," the statement underlined.

Tax filers turn to investment and trading: ClearTax data

Our Bureau
Mumbai

More than 62 per cent of all tax returns filed on ClearTax in assessment year (AY) 2026-27 went beyond a basic salary form, up from 53 per cent the previous year and 40 per cent two years ago, according to the company's annual filing report released on Monday.

The data signal a broad structural shift in how Indians earn and report income. Nearly half, 47 per cent, of self-filers reported income from investments, business, freelancing or cryptocurrency in AY 2026-27, compared to just 9.5 per cent in AY 2022-23.

The share of filers combining two or more such non-salary income sources rose from 3.5 per cent to 24.4 per cent over the same four-year period.

ITR-3 SURGE

Capital gains reporting saw particularly sharp growth. The proportion of filers reporting capital gains reached 41.7 per cent in AY 2026-27, up 7.3 percentage points from 34.4 per cent the year before. ITR-3 filings, used by traders reporting business income from markets, surged from 20.6 per cent to 28.4 per cent of all filings in a single year, more than doubling its share from 13.5 per cent two years ago.

The trend is most pronounced among younger filers. Among those under 25, 75 per cent filed a complex return in AY 2026-27, up from 60 per cent the prior year, the steepest rise of any age group.

ITR-3 became the most commonly filed return in this age group, rising from 28 per cent to 44 per cent, while basic salary returns (ITR-1) fell from 41 per cent to 25 per cent.

SMALL INCOMES

Contrary to expectations, filers with the smallest reported incomes showed some of the highest rates of return complexity. Among those earning under ₹1 lakh, 73 per cent filed a complex return, higher than every income bracket up to ₹50 lakh, driven largely by market trading and freelancing activity.

Women filers are moving up income brackets faster than men, with those earning above ₹50 lakh growing 38 per cent year-on-year compared to 27 per cent for men, though the absolute gap remains wide.

Marico Q2 profit rises 31%; food, personal care biz drive growth

OTHER ENGINES. Easing copra prices, strong domestic volumes and 22% expansion in Vietnam aid financials

Amit Vijay Mohile
Mumbai

Marico reported a 31 per cent increase in consolidated net profit attributable to shareholders to ₹550 crore in Q2 FY27, as easing copra prices expanded margins, price reductions supported Parachute coconut oil volumes, food and premium personal care businesses gained traction, and strong growth in Vietnam helped offset sluggish demand in Bangladesh.

Consolidated revenue from operations rose 13 per cent to ₹3,897 crore.

"The strength of our first-half performance underscores Marico's evolution into a more resilient and diversified business, with several growth engines and a proven ability to deliver strong growth across commodity cycles," said Saugata Gupta, MD and CEO.

Scorecard

(in ₹ cr)

	Q2 FY26	Q2 FY27	Change (in %)
Net profit attributable to owners	420	550	31
Revenue from operations	3,450	3,897	13
EBITDA	--	709	27
EBITDA margin (%)	16.20	18.20	200 bps

MARGINS UP

Consolidated EBITDA increased 27 per cent to ₹709 crore, its strongest growth in 50 quarters. Operating margins expanded 200 basis points to 18.2 per cent.

Gross margins improved roughly 600 basis points, aided by a favourable product mix and copra prices around 35 per cent below their previous-year peak. Advertising and promotional expenditure rose 44 per cent to ₹451 crore. For H1 FY27, consolidated revenue increased 18 per cent to ₹7,854 crore, while EBITDA grew 26 per cent to ₹1,528 crore. In Q2, Marico's India business recorded a 10 per cent underlying volume growth, with revenue increasing 10 per cent to ₹2,916 crore.

Parachute Rigids registered 13 per cent volume growth, its highest in 22 quarters, following price reductions undertaken earlier in FY27.

PARACHUTE VOLUMES

Revenue increased by around 1 per cent, while the volume market share rose by more than 570 basis points to 60 per cent. Value-added hair oils registered 21 per cent value growth. Saffola edible oils, however, recorded a high-single-digit volume decline despite revenue growing 6 per cent.

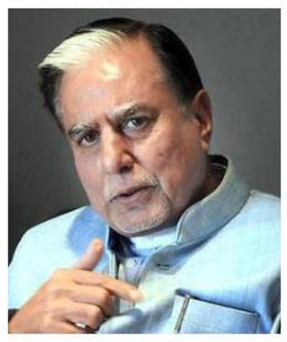
Marico's food portfolio grew 45 per cent in Q2, crossing an annualised revenue run rate of ₹1,500 crore. Premium personal care crossed ₹500 crore annualised revenue run rate. The digital-first portfolio reached approximately ₹1,150 crore.

"Robust momentum across the portfolio and several businesses reaching new highs, alongside multi-quarter high operating profit growth, reflect the strength of our franchise and execution," Gupta said.

For FY27, Marico expects revenue to comfortably cross ₹15,000 crore, with revenue growth in the teens and EBITDA growth in the mid-twenties.

After CBI, ED books Subhash Chandra for ₹1,322 cr loan fraud

Our Bureau
New Delhi



Subhash Chandra, Founder, Zee Entertainment Enterprises and Essel Group

After the CBI, the Enforcement Directorate has booked Subhash Chandra, Founder of Zee Entertainment Enterprises Ltd (ZEEL) and Essel Group, on charges of alleged involvement in laundering of a loan that caused a ₹1,322 crore loss to the Life Insurance Corporation Housing Finance Ltd (LICHFL).

The ED registered a case under the Prevention of Money Laundering Act, taking cognisance of a CBI FIR, accusing Chandra of inflating his net worth to fraudulently get loans from LICHFL. The CBI earlier acted against Chandra in September on a complaint received from LICHFL.

'NO BEARING'

Responding to the ED's action, a spokesperson for Zee Entertainment Enterprises Ltd said the ED filed the case against Chandra in his personal capacity, and it had no bearing on the company or its operations.

"... The matters pertain to Subhash Chandra and the promoter entities and have no bearing on Zee or its operations in any manner," the spokesperson said.

On March 28, 2018, LICHFL sanctioned a ₹500-crore business expansion loan to Vasant Sagar Properties Private Ltd and Pan India Infra Projects Private Ltd. The facility was approved following a "letter of continuing guarantee" furnished by Chandra. To back the guarantee, he submitted a net-worth certificate issued by DJM & Co., valuing his assets at ₹59,113.21 crore as of March 2017.

"Thereafter, defaults occurred in the Vasant Sagar loan facility and the digital loan facility," per the FIR.

According to the complaint to the CBI, Chandra, during subsequent proceedings under the Insolvency and Bankruptcy Code, "categorically denied having the net worth stated in the certificates" he had submitted to LICHFL for approval.

During the proceedings, Chandra pegged his net worth in 2024 at ₹31.79 crore and in 2017-18, at no more than ₹40,000 crore, the FIR says.

"Chandra had thus, acting in collusion with the borrowers, Vasant Sagar Properties Pvt Ltd, Pan India Infraprojects Pvt Ltd, Digital Subscriber Management and Consultancy Services Pvt Ltd, and Spirit Infrapower and Multiventures Pvt Ltd and their officers and directors, defrauded and cheated LICHFL into advancing the loans to the borrower entities, which have since misappropriated the same," the FIR alleged.

PNB, Indian Bank up MCLRs; BoI increases term deposit rates

Our Bureau
Mumbai

Punjab National Bank (PNB) and Indian Bank have upped their marginal cost of funds-based lending rates (MCLRs) across all tenors by 10 basis points, even as Bank of India (BoI) increased retail term deposit rates by 10-20 bps in select maturity buckets.

The aforementioned interest rate changes come in the backdrop of the Reserve Bank of India's rate-setting panel raising the policy repo rate by 25 basis points from 5.25 per cent to 5.5 per cent on October 7, and changing the monetary policy stance from "neutral" to "calibrated tightening".

PNB's one-year MCLR is at 8.9 per cent, up from 8.8 per cent, with effect from November 1.

Indian Bank's revised one-year MCLR will be 8.95 per cent, up from 8.85 per cent, with effect from November 3.

On retail term deposits (TDs) of up to ₹3 crore, BoI has raised interest rates on one-year and above one-year to less than two years to 6.6 per cent (from 6.5 per cent) and 6.7 per cent (6.5 per cent), respectively, with effect from November 2.

The public sector bank has upped the interest rate on TDs in the 2 years to less than 3 years bucket to 6.7 per cent (6.6 per cent). It introduced a 500-day FD at 6.85 per cent. On TDs of ₹3 crore and above but less than ₹10 crore, BoI has raised interest rates on one-year and above one-year to less than two years to 6.55 per cent (from 6.5 per cent) and 6.65 per cent (6.25 per cent), respectively.

Cholamandalam expects AUM to grow 23-24% this fiscal

Sindhu Hariharan
Chennai

D Arul Selvan, CFO, Cholamandalam Investment and Finance Company

MARGINS PROTECTED

The company has been able to protect its net interest margins on account of growing contribution from its newer lending businesses, the CFO said

Murugappa Group NBFC Cholamandalam Investment and Finance Company Ltd (CIFCL) expects to grow its assets by 23-24 per cent in FY27, and is choosing to retain its earlier growth guidance despite a strong Q2.

While acknowledging that Q3 and Q4 had been always better than the first two quarters, D Arul Selvan, Chief Financial Officer, told *businessline* that among other reasons, the base of H2 FY26 was higher and so, the company is not rasing the guidance. Similarly, on the pre-tax return on assets (ROA), it is choosing to remain cautious on various counts.

"While we have the levers to reach 3.5 per cent pre-tax ROA, interest cost is going up a bit and we need to see where we close the year with regard to our various other parameters of opex and credit cost," he said.

CIFCL has seen a healthy 47 per cent disbursement growth across businesses in Q2 and loan losses have been significantly lower than last year. AUM at ₹2.68 lakh crore grew 25 per cent y-o-y. Asset quality also improved.

Despite the cost of funds moving up, with borrowing rates influenced by forex movements, liquidity conditions and global interest rates, Selvan said the company had been able to protect its net interest margins on account of the growing contribution from its newer lending businesses.

EQUITY CAPITAL RAISE

Cholamandalam has obtained an enabling board resolution to raise up to ₹5,000 crore via QIP, which the CFO expects to execute over the next 3-9 months, depending on market appetite. "The proposed raise is for the existing businesses only; as we keep growing, we need to also keep improving our capital adequacy and build this capital."

On concerns over asset-quality stress in the gold-loan segment noted by some NBFCs, Selvan said CIFCL's exposure remained relatively small and the company had been cautious in its underwriting and expansion strategy. "We have a very strong auditing and assessment process, where the gold goes through at least 3-4 different audits, depending on different sampling approaches," he said.

Of the 360 branches planned for gold loans in FY27, around 250 had already been opened in H1.

Vultr launches 20 MW AI supercluster in Chennai

Our Bureau
Chennai

Vultr, a US-based cloud infrastructure company, has expanded its Indian infrastructure footprint with a 20 MW AI supercluster in Chennai, the company's largest such facility outside the US.

The centre, powered by over 10,000 AMD Instinct MI355X GPUs, will be capable of powering largescale AI training and inference workloads.

Speaking at a press conference here on Monday, Kevin Cochrane, Chief Marketing Officer, Vultr, said the centre is India's largest AMD GPU cluster deployment.

He added that the centre will provide computing services for Indian AI start-ups, developers and digital businesses.

1 GW TARGET

"India is emerging as a global centre for AI development and is moving beyond consuming AI technologies to actively building and developing AI applications for global markets. This engineering talent is a key driver of Vultr's investment in the market," he said. Cochrane added that the Chennai data centre is just the beginning and the company is actively looking to scale its presence in India with a target of about 1 GW of capacity in the near future.

During the launch, Vultr signed an MoU with StartupTN to extend cloud computing credits and preferential pricing to eligible start-ups across the State.

Under the partnership, Vultr will provide $45,000 worth of computing credits to eligible start-ups with a 20 per cent discount.

Record Date	Friday, November 06, 2026
Dividend payout date (on or before)	Tuesday, December 01, 2026
Last date to submit tax related documents	Friday, November 06, 2026

Pursuant to the provisions of the Income-tax Act, 2025, dividend income is taxable in the hands of shareholders. The Company shall pay dividend to shareholders after deducting Tax Deducted at Source (TDS) at applicable rates on the dividend, when declared, in the following manner:

1.	Resident shareholders	• 10% with valid PAN
		• 20% without/invalid PAN or inoperative PAN or non-linking with Aadhaar
		• 0% where dividend does not exceed ₹10,000 p.a. (eligible individuals)
2.	Non-resident shareholders	• 20% (plus applicable surcharge & cess)
		• Lower DTAA rate, subject to submission of prescribed documents (PAN, TRC, Form 41, declarations)

Shareholders are requested to update PAN, bank details, KYC and submit applicable tax declarations (including Form 121, if applicable) with their Depository Participant or with Company's Registrar & Transfer Agent (RTA, Cameo Corporate Services Limited) within the prescribed timelines to enable correct tax deduction. For detailed instructions and submission facility, please visit: https://investors.cameoindia.com

The detailed communication regarding the TDS has been already sent to the shareholders whose email Ids are registered with the Company. The detailed TDS communication is also available on the website of the Company: https://www.amararajaeandm.com/Investors/dividend-unclaimed-dividend-content. The dividend will be paid after deduction of applicable TDS. No claim shall lie against the Company for taxes deducted.

In case of any query, you may reach out to us by sending an email at investor@cameoindia.com or investorservices@amararaja.com or contact Mr. P Muralidharan, Manager, Cameo Corporate Services Limited at +91 44 28460718.

Extract of Unaudited Standalone and Consolidated Financial Results for the Quarter and Six Months ended 30th September, 2026

(₹ in Crores)

Sl. No.	Particulars	Standalone			Consolidated		
		3 Months ended 30.09.2026	6 Months ended 30.09.2026	Corresponding 3 Months ended 30.09.2025	3 Months ended 30.09.2026	6 Months ended 30.09.2026	Corresponding 3 Months ended 30.09.2025
1	Total Income from operations	29125.19	56713.75	20340.97	31085.76	61264.77	21840.26
2	Net Profit / (Loss) for the period (before tax and Exceptional items)	5507.41	10266.82	6759.27	5720.28	11175.25	6890.60
3	Net Profit / (Loss) for the period before tax (after Exceptional items)	5481.75	10241.16	6847.35	5694.62	11555.47	6978.68
4	Net Profit / (Loss) for the period after tax (after Exceptional items)	4137.12	7715.94	5175.70	4229.33	8738.12	5186.55
5	Total Comprehensive Income for the period [Comprising Profit / (Loss) for the period (after tax) and Other Comprehensive Income (after tax)]	3958.85	7980.78	4987.38	4096.24	8970.74	5051.18
6	Equity Share Capital	1253.05	1253.05	1252.71	1253.05	1253.05	1252.71
7	Earnings Per Share (of ₹1/- each) (not annualised):						
	1. Basic (₹):	3.30	6.16	4.13	3.32	6.83	4.09
	2. Diluted (₹):	3.30	6.16	4.13	3.32	6.83	4.09

Note:

a) The above is an extract of the detailed format of the Statements of Unaudited Standalone and Consolidated Financial Results filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The unaudited Financial Results and Segment Results were reviewed by the Audit Committee, and approved by the Board of Directors of the Company at its meeting held on 2nd November, 2026. The complete Statements of Unaudited Standalone and Consolidated Financial Results are available on the Company's website at https://itcportal.com/investors/quarterly-results.html and on the websites of the National Stock Exchange of India Limited (www.nseindia.com) and BSE Limited (www.bseindia.com). The same can also be accessed by scanning the QR Code provided below.

b) Exceptional items in the Standalone and Consolidated Financial Results for the quarter and six months ended 30th September, 2026 represent expenses of ₹25.66 Crores incurred in relation to acquisition of the pulp and paper business of Aditya Birla Real Estate Limited, operated under the name of 'Century Pulp and Paper', and for the quarter and six months ended 30th September, 2025 represent final settlement of the insurance claim of ₹88.08 Crores towards leaf tobacco stocks, which were destroyed due to fire at a third party owned warehouse in an earlier year.

Further, exceptional items in the Consolidated Financial Results for the six months ended 30th September, 2026 also include gain of ₹405.88 Crores on remeasurement of the Group's existing interest in Sproutlife Foods Private Limited ('Sproutlife') in accordance with Ind AS 103 - Business Combinations, upon Sproutlife becoming a subsidiary of the Company.

c) The Limited Review for the Standalone and Consolidated Financial Results, as required under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, has been completed by the statutory auditors of the Company, who have issued an unmodified report on the same which has been forwarded to the Stock Exchanges.

Press protection

Journalism needs carve out in data privacy law

In a healthy democracy, investigative journalism works as a crucial instrument of public accountability. From exposing financial irregularities at a company to uncovering administrative failures, journalists routinely handle personal data, often — and inevitably — without the knowledge or consent of the individuals concerned. India's Digital Personal Data Protection (DPDP) Act has given rise to legitimate questions on how such public-interest journalism will coexist with a statutory framework that contains no specific exemption for journalistic activity.

Section 7 sets out a range of "legitimate uses" for which personal data may be processed without obtaining consent. These include certain State functions, compliance with legal obligations, court orders, medical emergencies and employment-related purposes. But journalism, editorial work and public-interest reporting do not appear among these specified uses. Subjecting such activity to a data-protection regime designed primarily for commercial and institutional processing could compromise the working of the press. The Act's provisions on correction and erasure raise a second set of questions. Section 12 gives a Data Principal rights including correction, updating and erasure in relation to personal data. Without a journalism-specific exemption, it remains unclear how these rights should interact with digital news archives, particularly when a published report contains personal data and the individual later seeks its removal.

There are concerns over the Government's powers to obtain information. Section 36 empowers the Centre to require a data fiduciary or an intermediary to furnish information for the purposes of the Act. Media organisations are concerned that such information-gathering powers could intersect with confidential journalistic material and sources. The Centre's assurance that bona fide journalism is not intended to be brought within the DPDP framework is welcome. But where constitutional freedoms are involved, executive assurances are not an adequate substitute for statutory protection. The fact that the Digital News Publishers Association has challenged several provisions of the Act and Rules before the Supreme Court underscores this unease.

Other jurisdictions offer a useful template. Article 85 of the European Union's General Data Protection Regulation requires member states to reconcile data-protection rights with freedom of expression and information, including processing carried out for journalistic purposes. The UK's Data Protection Act 2018 provides a specific exemption framework. The European Court of Justice has interpreted "journalistic purposes" broadly, focusing on the purpose of disclosing information, opinions or ideas to the public rather than restricting the concept to traditional media organisations or professional journalists. A journalistic safeguard does not imply the erosion of privacy. For privacy violations, the law of defamation and other civil remedies continue to apply.

Building immunity to shocks

India has weathered oil shocks emanating from the Middle East tensions. This resilience must be turned into advantage

ASHIMA GOYAL

Escalating Middle-East tensions and higher oil prices have made the issue of macroeconomic policy design under poly-shocks live again. Although pass through of oil shocks in the first six months of the year, was lower than expected for many countries, not only India, old fears seem to have magnified. This sentiment particularly hits oil-importers, creating pressure to give up attempts to smooth shocks and revert to standard tightening under external shocks.

The view seems to be that adjustments that worked cannot continue indefinitely. Oil reserves have fallen and will need re-building. But the many longer term trends that reduce vulnerability to oil shocks are only getting reinforced. Lower and falling energy intensity means oil impacts unit costs less. Substitution toward alternative energy sources continues apace and rapid entry of new oil production sources reduces the importance of any one geographical area. India's large refining capacity continues to be protective.

Moreover, counter-cyclical government excise and oil pricing policy moderates the pass through of oil shocks to the economy and the inflation targeting regime in turn moderates firms' pass through of the shocks to the consumer. The pass through will rise if oil shocks prove persistent. But oil prices had fallen in the summer when OMCs recovered some of their losses as retail prices were not reduced. India's high taxes on oil products support such countercyclical adjustments. Falling debt ratios due to post-pandemic fiscal consolidation and tax buoyancy with higher growth give fiscal space to counter shocks.

New production sources and many energy substitutes have changed the oil market. Oil prices cannot continue high for long. Even currently supply exceeds demand but war risk premium keeps prices high. Even so, the effect of a sustained high patch will be lower for the above reasons.

Current oil prices may have crossed the red flag of 100, but in real terms they are much below levels reached in past oil shocks, even as their impact on cost of production has fallen. For example, they are less than half the real levels reached in 2012.

India's continued high growth despite high oil prices is not surprising, therefore. The IMF had to upgrade Indian growth every year since 2022, so they have made India an exception as a country for which they expect high growth despite being an oil importer and not at the top of the AI league. Signs of learning from outperformance at last!

GROWING STRENGTHS. Oil price volatility is less of a worry now GETTY IMAGES

But markets still haven't internalised that India no longer has the earlier type of vulnerability to oil shocks. Firms, however, seem finally convinced that India's growth prospects can survive geo-economic volatility, since the long-awaited rise in private investment is becoming apparent.

Closing the gap between financial stress and real performance requires good communication from policy-makers. But officials tend to highlight various policy measures taken without explaining how elements are customised to and reinforce each other to counter the current set of shocks.

As a result some commentators ascribe high growth to an unsustainable sugar high due to fiscal-monetary stimulus. But this is not true if measures are well calibrated to needs.

POLICY DESIGN

Policies can be classified as those improving the supply-side including ongoing fiscal consolidation with better quality of expenditure; use of buffers and regulation to help sustain counter-cyclical policy while reducing market volatility; third, as fiscal policy expands potential output, monetary policy can keep output at potential — which requires preventing large or persistent misalignment from equilibrium real interest and exchange rates.

Current oil prices may have crossed the red flag of $100, but in real terms they are much below levels reached in past oil shocks, even as their impact on cost of production has fallen

This sustains aggregate demand while anchoring inflation expectations, which prevents second-round inflation. That the policy rate is conditional on inflation keeps fiscal policy focused on reducing cost-led inflation, where it has an advantage.

Central bank credibility and independence is not compromised. Emerging markets are beginning to understand how monetary-fiscal coordination differs for them. Central Bank of Sri Lanka has a committee for this, but without decision-making power, thus preserving independence.

Supply-side policies have to be specially adapted to current shocks, which require continuing reforms towards green substitution, increasing contributions of States, enhancing India's natural diversity as well as that in trade, while harnessing technology to raise productivity, competitiveness and therefore jobs.

While transient shocks can be absorbed, persistent ones that supply-side policies are unable to counter must be passed in order not to compromise fiscal consolidation and maintain financial stability. The vulnerable can be protected with targeted and time-limited liquidity and credit that do not create perpetual dependence.

Excess liquidity creation needs to be avoided since it contributes to volatility. This approach helps identify gaps that need to be filled.

RESILIENCE: COSTS OR BENEFITS?

The technical meaning of resilience is to revert to status quo after a shock. But it is also possible to use a shock to do better, for example, it may overcome resistance to required changes, or help build on comparative advantage. Then building resilience turns from a cost into an advantage.

Specialisation may be more efficient but diversity creates resilience and India as a large country has a natural diversity that can be enhanced. There is commentary on the cost of using FX reserves, but there is also a cost of carrying FX reserves especially if they are never used. Strategic intervention in troubled times ensures the policy rate does not have to be used for interest rate defence.

Does building fiscal space sacrifice spending? But the discipline imposed on quality of expenditure, falling debt-deficit ratios from lower volatility in real interest and growth, and lower servicing costs can raise spending over time. The regulatory cost of financial stability can be minimised with benefits from reduced crises and lower risk premia. The recommended policy set is feasible only above a threshold of development and of critical buffers.

Consider three areas where hitherto infeasible reform may become possible. If the focus is not just on rising cost but also on soil health, nutritional balance and green local production of urea, the political resistance to fertilizer policy reform may fall.Foreign capital outflows during prolonged global risk-off cause stress, since India's current account deficit (CAD) creates dependence on foreign financing. Rising AE debt and AI investment may be causing a structural reduction in foreign capital flows to EMs. But in normal years inflows far exceed India's CAD which is low at less than 1 per cent. It can fall further with FTAs and growing net exports, removing the source of self-fulfilling fears of currency depreciation.

Increasing domestic diversity and compensating for global pressures also requires more States to perform. While many will respond to crisis-time need, this is the time to institutionalise more decentralisation and accountability required to improve the quality of life for the average citizen. Poor local services are triggering protests.

Action on these fronts could reduce domestic and external vulnerability, creating a net gain while raising resilience.

Irrigation helps in climate resilience but it's not enough

Irrigation must be complemented with better soil management and cropping practices

Saurabh Bandyopadhyay
Laxmi Joshi
Charu Jain
Kushagra Thakral

To deal with climate change in agriculture, India has responded with a wide range of programmes covering irrigation, micro-irrigation, crop insurance, climate-resilient seeds, weather advisories, soil management and digital agriculture. But the real test of these interventions is whether farmers are better able to absorb a climate shock, recover from it and sustain their livelihoods.

A recent NCAER study of major irrigation projects covered 57 irrigation projects across 20 States, nearly 600 villages and about 10,000 households. It compared households in command areas receiving benefits from canal irrigation with those outside these areas.

The findings suggest that irrigation can make an important contribution to climate resilience. About 68 per cent of households in command areas reported higher agricultural productivity and incomes, while 67 per cent of households in non-command areas reported stagnation or decline. About 76 per cent of command-area households also reported improved access to input and output markets.

Irrigation was also associated with the growth of agri-service enterprises, dairies, repair shops and other local economic activities. Migration also appeared to be lower in command areas: 34 per cent of command-area households reported increasing migration, compared with 46 per cent in non-command areas. New business and service opportunities were reported by 30.2 per cent of command households, compared with 17.4 per cent in non-command households. These findings matter because climate resilience is not simply about producing more. It is also about maintaining income and livelihoods when conditions become uncertain.

ENVIRONMENT ANGLE

The environmental evidence from the study reinforces this argument. About 43.9 per cent of respondents in command areas reported improved soil quality, compared with only 5.5 per cent in non-command areas. I

The study also provides evidence that command areas have greater adoption of practices intended to strengthen agricultural resilience. About 58.7 per cent of command-area households reported adopting resilient farming practices, compared with 51.1 per cent in non-command areas. For climate-smart agricultural practices, the corresponding figures were 49.4 per cent and 43.6 per cent.

AGRICULTURE. Climate adaptation

These terms overlap but are not identical. Resilient farming practices broadly refer to practices that help farms withstand and recover from shocks such as drought, floods or rainfall variability. Climate-smart agricultural practices have a broader objective: improving productivity and incomes while adapting to climate change and, where possible, reducing greenhouse-gas emissions. Better water and soil management, crop diversification and climate-resilient varieties can contribute to both.

Access to reliable water creates the conditions for farmers to diversify crops, adopt improved technologies, manage soil better and reduce their dependence on rainfall. But whether these benefits materialise depends on what farmers do with that additional water and how the resource is managed. An irrigation project can improve water availability, agricultural productivity, soil conditions and farm incomes. But if greater water availability subsequently encourages excessive groundwater extraction or unsustainable cropping patterns, some of those gains could eventually be weakened. Agriculture must adapt to climate change while reducing its own environmental footprint. India's Fourth Biennial Update Report estimates that agriculture accounted for 13.72 per cent of the country's greenhouse-gas emissions in 2020. This makes it important to promote practices that can deliver both adaptation and mitigation benefits — efficient water and fertilizer use, better soil management, appropriate crop diversification and improved livestock practices.

Irrigation is an important component of climate-resilient and potentially climate-smart agriculture. But its full value emerges when reliable water is combined with better soil management, appropriate cropping practices, resilient technologies and sound resource management. India therefore needs to move from thinking about climate adaptation as a collection of schemes to seeing it as a system of resilience.

Develop R&D fast

This refers to "How Indian enterprises can scale up R&D spend" (November 2). Higher R&D expenditure by firms is necessary to promote innovation, which is the path to becoming a developed country. But India ranks 138th in the Global Innovation Index.

To correct this, the government should encourage multi-industry participation and cultivate broad-based R&D growth across diverse mid-sized industries.

Next, the government should take measures to remove the bottlenecks to facilitate transition of research output from lab to market.

Besides, R&D requires acquisition and retention of bright talent. Here collaboration between the trio of govt-industry-academia would be worth considering.

YG Chouksey
Pune

Funds outflow

With reference to the Editorial 'Missing the point' (November 2). Despite growing economic activity, the Indian stock market remains unattractive to Foreign Portfolio Investors, as evidenced by capital outflows. New inventions to create AI-based assets are lacking, and as a result, capital formation is not growing.

Investment opportunities are facing challenges due to the growing demand for such investment in the rest of the world. Policies must be framed to enhance capital expenditure for the manufacturing of AI-based products to expand India's space in the global market.

As a consequence of the persisting war, the risk of disruptions in the supply of commodities and price volatility is growing, which is adversely affecting price stability and interest rates. To counter rupee depreciation, capital inflow is imperative. Creating an investment-enabling environment for research, besides implementing measures for stability in returns on capital, is paramount to enhance foreign investments.

VSK Pillai
Changanassery

Sustaining investments

The article 'How America punishes India' (November 2) offers a fresh perspective on market jitters. Blaming one tax or one foreign policy quarrel makes for a neat story, but markets rarely move on single triggers. The real lesson is that a fast-growing economy needs a deeper pool of patient money, not louder debates over blame.

Here is one out-of-the-box idea. Pension funds, insurance companies and ordinary families could be gently nudged into long-term rupee bonds through government tax-friendly small savings schemes. Such money stays put even during storms, unlike a foreign portfolio investor who exits at the first whiff of trouble. Dependence on dollar flows would shrink, and the rupee itself would be less hostage to every headline from abroad.

Animal trials being curbed

Other methods now in use to test drugs for humans

PT Jyothi Datta

The last few weeks have seen mass campaigns by people seeking recall of a draft notification on animal trials issued by the Committee for Control and Supervision of Experiments on Animals (CCSEA).

The plea for recall is because the draft does not seem to keep the welfare of animals at the core of this scientific exercise.

Animal trials involve testing medicines for toxicity and safety, on monkeys, beagle dogs, guinea pigs and rats.

The first exposure of a prospective medicine to humans comes only after animal trials — when the medicine is given during Phase I of clinical trials, to human volunteers. With animals, there is no volunteering or consent — they did not sign up for trials. But if you don't want to go down that humane, ethical road there are scientific reasons , outlined by international drug regulators, explaining why "animal models fail humans".

Oddly, the latest draft seems to take two steps back, when international drug regulators are moving full steam ahead to replace animal trials with non-animal and alternative methods — to modernise drug development.

UNETHICAL. Animal trials involve testing medicines for toxicity, safety

DILUTES NORMS

Animal welfare voices say, the CCSEA draft dilutes the existing regulatory framework, and relies on ethical committees at institutions to judge trials done at the same institution. It also leaves the door open on trails involving endangered species, and community/feral dogs and cats.

Contrast this with the world view. The United States Food and Drug Authority (USFDA), for example, in its status report on reducing animal testing in preclinical safety studies (April 2026), said: "One year later, that vision has translated into measurable progress that is already saving lives — both human and animal."

The transformation, "rests on concrete achievements," it says, pointing to "new policies that eliminated unnecessary six-month primate studies for monoclonal antibodies; expanded weight-of-evidence approaches that can replace entire carcinogenicity studies requiring over 1,000 animals per product; and the first AI-based drug development tool qualified for regulatory use."

And the clincher — "over 90 per cent of drugs that appear safe in animals fail to receive FDA approval, predominantly due to safety and/or efficacy issues that only become apparent in human trials," the report says, citing studies, explaining the science "when animal models fail patients".

A chilling example further illustrates how the animal-human disconnect affects patient safety. A monoclonal antibody, designed to treat autoimmune diseases and leukaemia, underwent "extensive" preclinical testing in monkeys at doses up to 500 times higher than the planned human dose, the report says — no adverse effects were observed. But within minutes of administration to six healthy human volunteers in a 2006 Phase I trial, "all experienced catastrophic immune system activation — life-threatening cytokine release syndrome that caused multiple organ failure, with some participants requiring intensive care for months," it recounts.

In March 2026, the UK's Medicines and Healthcare products Regulatory Agency (MHRA) outlined action to phase out animal testing by helping developers make greater use of New Approach Methodologies (NAMs). And in October 2026, the European Medicines Agency (EMA) endorsed a joint statement from the International Coalition of Medicines Regulatory Authorities, calling on medicine developers, manufacturers, regulators and national control laboratories to "advance and implement alternative methods or approaches to animal testing throughout the lifecycle of human medicines, wherever, and as soon as possible."

Similar direction comes from the World Health Organization, as well. The effort is towards getting effective, "human-relevant" medicine, without the cruelty of animals locked-up, maimed or euthanised in trials.

REUTERS

Construction needs a productivity revolution

BUILDING BLOCKS. For this, intelligence must be put into the entire construction ecosystem, from quarry tracking, design and execution to the people who build it

In June, my wife and I travelled by road from Delhi to Agra to visit the famed Taj after four decades. Sitting before the 17th-century wonder, I was amazed by an extraordinary achievement in planning, materials, craftsmanship and construction that has endured for generations.

Yet today, we in India sometimes see newly built roads, bridges and expressways developing serious problems within months, or even weeks, of completion.

Back home in Bengaluru, I saw reports of problems on two recently inaugurated expressways: the Kanpur-Lucknow Greenfield Expressway developed depressions and sank in many places, while the Ganga Expressway saw an approach road wash away after heavy rain.

These incidents should not lead us to condemn the entire construction industry.

Building infrastructure in a country as vast and geographically diverse as India is enormously complex. But they should make us ask: Why has construction in India not experienced the productivity and quality revolution that has transformed almost every other major industry?

Computing has followed something close to Moore's Law for decades. Manufacturing has been transformed by robotics, automation, sensors and data. Logistics can track an individual parcel across continents.

Construction, by comparison, remains remarkably dependent on manual processes, fragmented supply chains, variable skills and decisions made on site with incomplete information. This is not merely a technology problem. It is a productivity problem.

THE HIDDEN COST

Some of the biggest construction costs are hidden: material wastage, rework, idle equipment, lost man-hours, poor coordination, delays and decisions revisited because the right information was not available at the right time.

Construction has another problem: lessons learnt in one project often do not systematically find their way into the next.

Site engineers, supervisors and workers accumulate practical knowledge about soil, materials, machines and local conditions.

But much of this knowledge remains in people's heads.

When the project ends, much of it leaves with them. That is a terrible loss of institutional memory.

I learnt early in my career that construction is not simply a set of drawings handed to a contractor. It is a process in which materials, people, engineering judgment, site conditions and execution come together.

Technology now gives us the possibility of applying that practical intelligence at a scale previously impossible.

AI AS AN AID

AI should not replace the civil engineer or the experience of people who have spent years on construction sites. But it can examine scores of possibilities, compare alternatives and identify combinations that humans may not immediately consider.

Imagine an AI system evaluating a construction proposal simultaneously for cost, structural performance, construction time, material consumption, energy use, safety, maintainability, local site conditions and carbon footprint.

Using past meteorological data, it can help predict potential stresses such as flooding and seismic activity.

That is where AI becomes valuable — not as a substitute for engineering judgment, but as an amplifier of it.

INTELLIGENT CONSTRUCTION

The next step is to bring intelligence into every stage of construction — from design and surveying to execution, maintenance and operation.

Construction remains remarkably dependent on manual processes, fragmented supply chains, variable skills and decisions made on site with incomplete information

Building Information Modelling (BIM) can integrate architectural, structural and building services information into a common digital model, enabling coordination, clash detection and reduction of rework.

Digital twins can create a living digital replica of a building or infrastructure, showing progress during construction and performance after completion.

AI and construction analytics can analyse schedules, costs, productivity, materials and quality data to identify anomalies and anticipate delays.

Drones, laser scanning and 3D mapping from photographs can create accurate digital records of sites and progress and help monitor structural health.

Connected equipment can move maintenance from reacting to breakdowns towards predicting them. Prefabrication and automation can improve precision and reduce waste. Computer vision can check whether work is being carried out according to specifications.

Digital work instructions can put the right information in front of a worker at the right time, while geotagged photographs and digital quality records can create a permanent record of what happened at a particular location.

The result could be a construction site with eyes, ears and memory — rather than one dependent on occasional inspections and fragmented records.

AUTOMATE REPETITIVE JOBS

Construction has many activities that are repetitive, physically demanding or dangerous. If a machine can perform such a task more accurately and safely, we should use it.

The objective should be to move people towards activities where human judgment, problem-solving and responsibility add greater value.

The construction worker of the future should increasingly be a skilled operator, technician, quality professional or supervisor working alongside intelligent systems.

But technology alone is not enough. Who will operate these machines? Who will use the data? And who will ensure that knowledge gained on one project is carried to the next?

The Taj Mahal reminds us that construction can create something that outlives generations. Its endurance was the product of design, materials, craftsmanship, discipline and attention to detail working together.

The 21st century gives us something its builders did not have: the ability to capture, analyse and learn continuously throughout a structure's life.

Construction will not have its productivity revolution merely by putting AI on a construction site.

It will happen when we put intelligence into the entire construction ecosystem, beginning with quarry tracking all the way to design, execution and the people who build it.

It is time the buildings and civic infrastructure of the 21st century are built to last — not until the next rains, but forever.

Norsk Hydro offers OVL stake in Angola, Iran blocks

Norsk Hydro of Norway has offered ONGC Videsh Ltd (OVL), the overseas arm of ONGC, stake in an Angolan exploration block and the Aranan field in Iran. OVL, on its part, has offered Norsk Hydro participation in its two exploratory deep water blocks in Cuba.

Credit Suisse to restart operations in India

The Zurich-based Credit Suisse is to restart broking and asset management activities in India. In 2001, the Securities and Exchange Board of India had suspended the Indian arm of Credit Suisse from broking activities for two years on charges of price manipulation. It did not subsequently resume operations after the ban period.

NTPC gets waiver on investment ceiling

The Cabinet Committee on Economic Affairs has given its approval for waiving the ceiling of ₹1,000 crore for equity investments by NTPC Ltd to establish financial joint ventures and wholly-owned subsidiaries in India or abroad for ultra mega projects. This is for participating in the bidding of ultra mega projects being established at the initiative of the Ministry of Power.

Tech giants' borrowings jump on AI debt surge

ANI

The combined debt of the seven largest US technology companies, widely known as the Magnificent Seven, has increased nearly 45 per cent to $578 billion by mid-2026, raising concerns over the financial risks linked to the rapid expansion of artificial intelligence infrastructure, according to a report by SBI Research.

The Magnificent Seven comprises Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla. The report said their combined debt, which stood at around $399 billion in 2025, is now nearly 1.7 times its 2023 level. It also flagged substantial off-balance-sheet commitments, including obligations related to purchases and investments, as companies continue to expand their AI infrastructure.

PRESSURE ON VALUATIONS

"Higher borrowing costs and rising Treasury yields could put pressure on their valuations by increasing the discount rate applied to future earnings," the report cautioned. Using an equity duration approach, the report estimated that a rise in yields could result in a potential market capitalisation decline of around $1.67-2 trillion for the seven companies, whose combined market value was estimated at approximately $23 trillion.

AI INFRA. Rapid expansion can be risky

The report also pointed to the expected entry of Anthropic into public equity markets, likely around November 12, with a target valuation of $1.5-2 trillion. It described the proposed listing as a "high-stakes litmus test" for the financial viability of the AI boom, allowing public investors to assess whether rising enterprise revenues can justify the substantial infrastructure and computing costs involved.

Beyond technology companies, SBI Research highlighted the impact of rising bond yields on the US Federal Reserve's holdings of government securities. Its unrealised losses on Treasury holdings increased by $26.3 billion, from $535.3 billion in December 2025 to $561.5 billion in June 2026.

During the same period, the US 10-year Treasury yield rose from 4.18 per cent to 4.44 per cent.

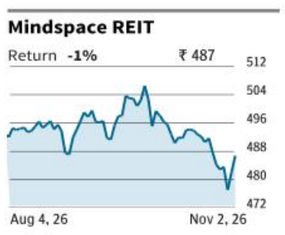
Mindspace REIT Q2 net income up 32% to ₹836 cr



New Delhi: Mindspace Business Parks REIT on Monday reported a 32 per cent annual increase in net operating income to ₹836 crore (₹634 crore) and declared a distribution of ₹442 crore to unit holders for the second quarter. Revenue jumped 30 per cent to ₹1,010 crore in the July-September period this fiscal from ₹778 crore a year ago. "Our performance reflects the strength of our portfolio and our ability to execute. NOI grew 31.9 per cent in the September quarter, with occupancy reaching a record 96.1 per cent, supported by strong leasing, rising rents and completed developments," said Ramesh Nair, MD and CEO, Mindspace REIT. PTI

Brookfield India REIT to pay ₹5.7 to unitholders

New Delhi: Brookfield India Real Estate Trust on Monday reported a 51 per cent increase in its NOI to ₹767.2 crore in the second quarter of this fiscal year and declared a distribution of ₹473 crore to unit holders for Q2. In a regulatory filing, the company said the board approved a distribution of ₹473.03 crore or ₹5.7 per unit for the quarter ending September 30, 2026. "We registered a strong operating performance during the September quarter, with gross leasing of 1.6 million sq ft, early commitments against future expiries of 0.6 million sq ft and committed occupancy of 93 per cent," said Shashank Jain, CEO and Managing Director, Brookfield India Real Estate Trust. PTI

Reliance jumps 11.6% as brokerages maintain bullish view after Q2 results

BOOSTER SHOT. Analysts raise target price for the stock, expecting retail recovery, strong refining margins

Madhu Balaji
Bengaluru

Reliance Industries shares rallied 11.6 per cent on Monday following the company's Q2FY27 results, with consolidated net profit rising 33.8 per cent year-on-year to a record ₹29,550 crore.

The stock closed 11.6 per cent higher at ₹1,300 (the day's high level) on the NSE from ₹1,164.90, the previous close. It led the gainers of the Nifty 50 in Monday's session; the 11.6 per cent gain is the largest since April 2020.

EBIDTDA JUMPS

The company's quarterly performance drew positive views from brokerages Jefferies, Kotak and JPMorgan, while all the three highlighting the performance of its refining and petrochemical businesses.

According to Jefferies, Reliance Industries' consolidated EBITDA rose 23 per cent y-o-y to ₹56,600 crore in Q2, beating estimates by 6 per cent. The brokerage said the oil-to-chemicals (O2C) business led the performance. However, retail EBITDA missed estimates by 6 per cent as investments in quick commerce and inflation weighed on margins.

JPMorgan also highlighted the 23 per cent y-o-y increase in consolidated EBITDA to ₹56,600 crore. It noted that profit after tax grew 41 per cent to ₹25,550 billion.

Jefferies maintained its 'Buy' recommendation on Reliance Industries with a target price of ₹1,710. The brokerage raised its FY27 and FY28 EBITDA estimates by 6 per cent and 2 per cent, respectively. It also expects strong winter refining profitability.

Kotak maintained its 'Buy' rating with a target price of ₹1,500. The brokerage said strong refining and petrochemical margins support the O2C outlook amid global supply disruptions.

Kotak highlighted growth opportunities from FMCG brands Campa and Independence, while flagging retail profitability as a concern.

JPMorgan maintained its 'Overweight' rating and raised its target price to ₹1,675 from ₹1,625. The brokerage increased its FY27 and FY28 earnings per share estimates by 10.9 per cent and 5 per cent, respectively.

JPMorgan expects retail recovery and strong refining margins to support earnings.

Thumbs up for RIL

Brokerages	Outlook	Target (₹)
Jefferies	Buy	1,710
Religare	Buy	1,701
Motilal Oswal	Buy	1,520
Systematix	Buy	1,400
PL Capital	Buy	1,490
Equirus Sec	Long	1,419
Emkay Global	Buy	1,550
Kotak Sec	Buy	1,500
JPMorgan	Overweight	1,675

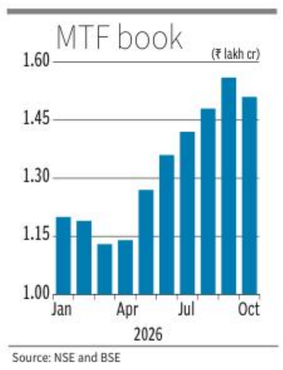
Reliance Industries Limited

HOLDCO DISCOUNT

Analysts at Motilal Oswal Financial estimates that RIL is currently trading at a 54 per cent holdco discount) on its 64.5 per cent stake in JPL, which it believes as excessive. "The energy segment drives a near-term earnings upgrade; however, we view recovery in RRVL's growth and profitability as the key driver of RIL's stock price," the domestic brokerage said.

Small-cap sell-off intensifies as MTF positions unwind

Suresh P Iyengar
Mumbai



Source: NSE and BSE

The unwinding of leveraged positions built through margin trading facility (MTF) resulted in a sharp fall in small stocks last month.

In fact, the Nifty Small-cap 250 index fell 5.81 per cent and the BSE Small plunged 6.3 per cent in October. The average MTF in October has fallen to ₹1.51 lakh crore in October against ₹1.56 lakh crore in September as traders unwound their MTF book with concern on small-cap stocks earnings.

MARGIN RETREAT

The NSE accounted for the lion's share of the MTF book at ₹1.44 lakh crore while the same on the BSE was at ₹7,405 crore last month. The NSE flagged brokers for MTF violations, including inadequate margins and funding against ineligible stocks outside the Group I category, besides lapses in monitoring of authorised persons.

As per BSE and NSE data compiled by Care Edge Ratings, the MTF book size has been growing consistently from ₹96,000 crore in August 2025 to ₹1.48 lakh crore in August 2026. With the banks and other source of funding becoming tight, investors are taking risky bets using MTF.

Pankaj Agrawal, Director, Valmiki Leela Capital, said a fall in small-caps could put pressure on blue-chip stocks too, as investors may be forced to sell them to meet their repayment obligations.

Money coming into small-cap funds through SIPs had helped keep the market supported, but that does not mean valuations can keep rising without earnings support, he said.

Rising interest rates could make things more difficult for small-cap companies, especially those that depend on borrowing to run their businesses or fund expansion, said Agrawal.

STEADY INFLOWS

The Nifty Small-cap 250 has been trading at about 32 times against the five-year average of about 27 times on back of steady flows through MF route. The inflows into small-cap MF schemes was up 42 per cent at ₹24,779 crore in the September quarter against ₹17,433 crore in June quarter.

Siddharth Purohit, Fund Manager-Equity, Invest-Value Capital, said nearly 44 per cent of SIP inflows were channelled into mid- and small-cap schemes where valuations in certain pockets have become stretched.

While near-term valuation concerns remain, investors who maintained their investments over the past 4–5 years have witnessed relatively strong returns from these segments, he said.

Select companies had consistently delivered high double-digit earnings growth, a trajectory that is relatively difficult to replicate across large-cap and index constituents, he added.

Aakansha Shukla, AVP, Wealth Management, Master Capital Services, said if MTF positions face margin calls, investors could be forced to sell liquid large caps to raise cash, creating temporary pressure across the market.

SEBI backs removal of LTCG for FPIs

Reuters
Mumbai

The Securities and Exchange Board of India (SEBI) has recommended that the government remove the long-term capital gains (LTCG) tax imposed on foreign investors, two people with direct knowledge of the matter said, as India looks to galvanise its underachieving equity markets.

SEBI has also proposed tax relief for domestic mutual fund investors, suggesting they be exempt from LTCG if they are selling existing holdings to invest in new ones, the sources said.

The recommendations, which come months before the annual Budget in February, are not binding and a final call rests with the government.

Investors currently pay long-term capital gains tax of 12.5% for securities held for more than a year

The Indian equity market has lagged emerging market peers over the past two years. Foreign investors have sold a record $31billion in stocks this year.

SEBI's recommendations follow scores of meetings held by the regulator with foreign investors over the last two years as selling persisted, putting pressure on the Indian currency. One consistent piece of feedback from investors has been the need to change how India taxes them, the people said.

"The proposals are aimed at reducing the upfront tax burden on foreign investors," one of the two said.

The people declined to be named as the recommendations, which have not been reported previously, are part of pre-budget representations and are private.

Email queries sent to SEBI and the Finance Ministry were not answered.

"Scrapping the long term and short term capital gains tax would be a clear positive, improving post tax returns and removing a longstanding friction in allocating capital to India," said Gary Tan, Portfolio Manager, Active Equity, Allspring Global Investments.

However, the move would not remove concerns that AI could erode labour cost arbitrage growth model, he added.

SEBI has said that transaction costs associated with investing in equities in India are among the highest across jurisdictions.

Investors currently pay long-term capital gains tax of 12.5 per cent for securities held for more than a year and short-term capital gains tax of 20 per cent, in addition to securities transaction taxes on trades and withholding taxes on dividends.

Coal India's arm files IPO papers with SEBI

Press Trust of India
New Delhi

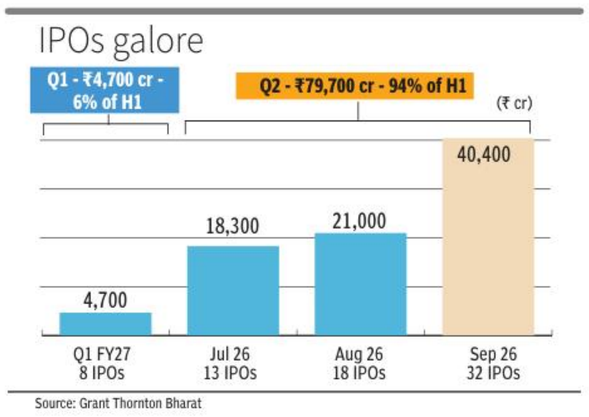
South Eastern Coalfields Ltd (SECL), an arm of Coal India Ltd, has filed preliminary papers with SEBI for its initial public offering (IPO).

The proposed IPO is entirely an offer for sale (OFS) of up to 66.81 crore shares by its promoter Coal India with no fresh issue component, according to the Draft Red Herring Prospectus (DRHP) dated November 1.

Incorporated in 1985 and headquartered in Bilaspur, Chhattisgarh, SECL is among India's largest coal producers.

Fund raise via mainboard IPOs jumps 30% to ₹84,400 cr in H1

Our Bureau
Mumbai



Source: Grant Thornton Bharat

Funds raised through mainboard initial public offerings (IPOs) increased 30 per cent to ₹84,400 crore in the first half of this fiscal with 94 per cent of the capital mobilised between July and September.

The concentration of activity underscores how quickly the issuance window opened after a subdued first quarter, according to Grant Thornton Bharat's report, India IPO Market Review.

About 71 mainboard companies entered the public markets between April and September against 55 in the same period last year.

RETAIL INTEREST

India Inc has raised ₹64,900 crore in the FY26, while average listing-day gains improved to 18 per cent from 10 per cent.

The average retail oversubscription also rose to 28 times from 25 times. The acceleration was led by September, when 32 IPOs raised ₹40,400 crore, more than half of Q2's fundraising and the highest amount recorded in a single month.

Financial services accounted for 43 per cent of overall fundraise in H1, while capital goods led issuance volumes was 15 IPOs.

Karan Marwah, Partner & Capital Markets Advisory Leader, Grant Thornton Bharat, said India's IPO market moved from caution to acceleration in Q2 FY27, helping deliver a record first half.

While the scale of fundraising shows the market can absorb new issuance, investor demand stayed selective and increasingly focused on fundamentals, pricing, governance and the use of proceeds, he said.

BROKER'S CALL.

Jefferies

PB FINTECH (BUY)
Target: ₹1,540
CMP: ₹928.10
PB Fintech's september quarter revenue grew by 35 per cent y-o-y, ahead of Jefferies expectations. However, adj. EBITDA at ₹220 crore (+39 per cent y-o-y) was a miss due to higher expenses.
PB discussed levers to offset regulatory risks, including building non-insurance revenue, improving productivity, and aligning costs with NPVs. PB highlighted the risk of slower 2H growth, as GST tailwinds are behind.
Total insurance premium grew 38 per cent y-o-y, with core new health and term growing 42 per cent (o/w health +46 per cent). The renewal take rate improved by around60 bps to 7.9 per cent on account of a higher share of health renewals and the transition to a "Combined Operating" model. Management expects PB Health to reach a monthly revenue run-rate of ₹40-50 crore by Mar'26, equivalent to ₹500 crore annualised, with the business broadly around break-even.
Total expenses ex. ESOP grew by 35 per cent y-o-y vs JEFe of 29 per cent, led by higher advertising and promotion expense (+59 per cent).
This led to Sep'26 quarter adjusted EBITDA missing our est. by 3 per cent. Paisabazaar sequential momentum was muted: credit disbursal were broadly flat q-q as the company kept marketing growth subdued.
We cut FY27e PAT by 3 per cent to account for higher opex. Our SOTP-based PT of ₹1,540 based on 26x Dec'28e EV/adjusted EBITDA.

Equirus Securities

INTERGLOBE AVIATION (LONG)
Target: ₹5,560
CMP: ₹4,929
IndiGo delivered a better-than-expected 2QFY27 performance, with revenue growing 26 per cent y-o-y to ₹23,360 crore, supported by a 34 per cent y-o-y increase in yield to ₹6.30. Despite passengers declining 5 per cent and ASK falling 1 per cent, EBITDA stood at ₹1,910 crore versus our estimate of ₹630 crore. The net loss of ₹1,880 crore was also narrower than our estimate of ₹3,070 crore, reflecting stronger realisations and better-than-expected operating performance.
Despite elevated fuel prices and the withdrawal of the ATF price cap, fuel cost per ASK declined 2 per cent q-o-q, contrary to the expected increase in unit fuel costs. This provided some relief against the broader cost pressure. However, capacity rationalisation amid high fuel prices, rupee depreciation and geopolitical uncertainty has weighed on passenger growth and constrained fixed-cost absorption, limiting the extent of margin improvement. Management expects PRASK growth of over 25 per cent in Q3-FY27, with capacity growth in the early single digits and load factors broadly flat y-o-y. We expect earnings to improve as fuel-cost pressures ease and capacity deployment normalises. IndiGo's scale, pricing flexibility and market position support our constructive view, although the pace of recovery remains sensitive to fuel prices, currency movements and demand.
We maintain Long with a Mar'28 target price of ₹5,560, based on 8x one-year-forward EV/EBITDAR.

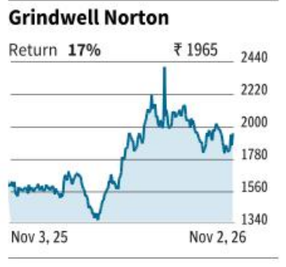
TODAY'S PICK.

Grindwell Norton (₹1,965.30): BUY

Gurumurthy K
bl. research bureau



The short-term outlook is bullish for Grindwell Norton. The stock has bounced after forming a good base around ₹1,800. The presence of the 200-Day Moving Average (DMA) around ₹1,800 makes this bounce a significant one. The region between ₹1,820 and ₹1,800 will be a good support zone now. Immediate resistance is around ₹2,000.

The stock can break above this resistance. Such a break will boost the momentum and take the Grindwell Norton share price higher to ₹2,200 in the coming weeks. Traders can buy Grindwell Norton shares now at ₹1,965. Accumulate on dips at ₹1,880. Keep the stop-loss at ₹1,775. Trail the stop-loss up to ₹1,995 as soon as the stock goes up to ₹2,030. Revise the stop-loss higher to ₹2,060 and ₹2,130 when the price touches ₹2,095 and ₹2,160 respectively. Exit the long positions at ₹2,195.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading

Pts: Impact on index movement

Bombay Coated IPO subscribed 60.77 times

Press Trust of India
New Delhi

The initial public offer (IPO) of Bombay Coated and Special Steels Ltd was subscribed 60.77 times on the final day of bidding on Monday.

The ₹183-crore IPO received bids for 100.47 crore shares against 1.65 crore shares shares on offer, as per NSE data.

The non-institutional investor category garnered 158.32 times subscription, and the quota for qualified institutional buyers (QIBs) was subscribed 35.5 times.

The portion for retail investors received 33.73 times subscription.

The initial public offering of Bombay Coated and Special Steels Ltd was fully subscribed on the first day of bidding on Thursday last week.

EAAA India ends 3.8% higher at ₹1,727.80 against IPO price

MODEST GAINS. Ashish Chauhan (third from left) , MD and CEO, NSE, with officials of EAAA India Alternatives at the listing of the company shares on Monday

Press Trust of India
New Delhi

Shares of EAAA India Alternatives Ltd, an arm of Edelweiss Financial Services, on Monday closed with a premium of nearly 4 per cent against the issue price of ₹1,665.

The stock started trading at ₹1,673, up 0.48 per cent from the issue price on the BSE. During the day, it climbed 5.85 per cent to ₹1,762.55. Shares of the firm ended at ₹1,727.05, up 3.73 per cent.

At the NSE, the stock listed at ₹1,675.50, a premium of 0.63 per cent. It ended at ₹1,727.80, higher by 3.77 per cent.

The company's market valuation stood at ₹11,166.28 crore.

The initial public offer (IPO) of EAAA India Alternatives was subscribed 5.25 times.

The company fixed the IPO price band at ₹1,585-1,665 per share.

The IPO was entirely an offer for sale (OFS) by the Edelweiss Group, with no fresh issue component.

India assures commitment to lower Scotch tariffs

New Delhi: The Indian government on Monday assured liquor companies that it will honour the India-UK trade pact and settle a dispute over Scotch tariffs, easing concerns that have rattled the $65 billion industry and players like Pernod and Diageo, five people with direct knowledge said. "We are potentially moving towards a resolution. Bulk scotch whisky imports are indeed part of concessions under the trade deal," said one of the sources, while describing New Delhi's thinking in a closed door meeting with the industry on Monday. Bond rally spurs rush to tap debt market as borrowing costs ease

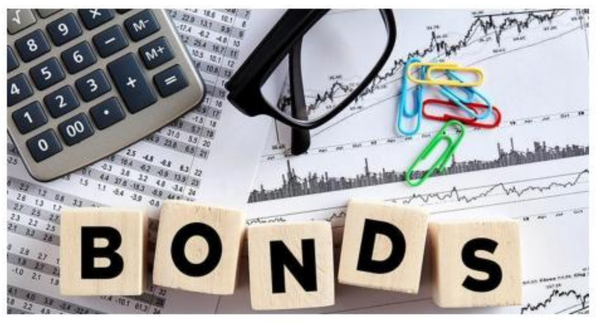
KEY ATTRACTIONS. Falling yields and softer crude prices help borrowers lock in lower funding costs

Mahesh Ravidas Nayak
Mumbai

A sharp rally in government bonds, driven by falling crude oil prices and improving global risk sentiment, is prompting corporates and government-backed financial institutions to accelerate bond issuances to lock in lower borrowing costs.

The benchmark 10-year government security (G-Sec) yield fell about 10 basis points on Monday to close at 7.31 per cent, aided by a more than 4 per cent decline in crude oil prices amid renewed hopes of progress in US-Iran talks. The drop in yields has quickly translated into lower borrowing costs for issuers.



MAKING HAY. Market participants said issuers are keen to take advantage of the favourable market conditions before any further monetary tightening

BOND ISSUANCES

Nabard on Monday raised ₹6,000 crore through bonds at 8.27 per cent, lower than the 8.3 per cent coupon at which REC raised ₹4,000 crore last week. SIDBI is scheduled to tap the market on Tuesday for ₹6,000 crore, with market participants expecting strong investor demand amid the ongoing bond rally.

"The rally in government securities has created a favourable backdrop for issuers," said Venkatakrishnan Srinivasan, Founder and Managing Partner of Rockfort Fincap LLP. "A lot of buying has emerged as investors turn more optimistic about global developments, including softer oil prices and expectations surrounding the US political landscape," he said.

The decline in yields has improved issuance conditions even though corporate borrowing costs remain elevated in absolute terms. Srinivasan noted that Nabard's pricing appeared attractive compared with REC's recent bond sale, largely because government securities have rallied since REC came to the market. "Typically, REC is able to raise funds at a lower cost than Nabard," he said.

YIELD OUTLOOK

Market participants said issuers were keen to take advantage of favourable market conditions before any further monetary tightening. While expectations of another rate hike persist, lower crude prices and hopes of easing geopolitical tensions could provide room for yields to soften further.

Srinivasan said the benchmark 10-year yield could potentially move towards 7 per cent if oil prices moderate further and positive developments emerge on the rupee and geopolitical fronts.

"Traders are reacting quickly to every positive development, and that is helping the bond market rally," he said.

The improving sentiment is also prompting potential issuers to revisit fundraising plans. Reliance Industries Ltd recently secured board approval to raise up to ₹15,000 crore through debt, while REITs, InvITs and other issuers are also evaluating market opportunities, Srinivasan noted.

The attractiveness of the bond market has increased as alternative funding avenues have become more expensive.

Rates on short-term instruments such as commercial papers and certificates of deposit have risen sharply, putting pressure on corporate treasuries.

As a result, even with corporate bond yields remaining elevated, issuers continue to find the bond market a relatively competitive source of funding.

GSMA board re-elects Airtel's Gopal Vittal as Chair

Press Trust of India
New Delhi

Global telecom industry body GSMA's Board of Directors has re-elected Bharti Airtel Executive Vice Chairman Gopal Vittal as Chair for the upcoming 2027-2028 term until December 2028, the organisation said on Monday.

Vittal served on the GSMA Board for 10 years, including as Chair from 2025. As GSMA Chair, Vittal oversees the organisation's strategic direction, which represents the world's mobile operators and companies in the broader mobile ecosystem.

The GSMA Board also elected Margherita Della Valle as Co-Deputy Chair, alongside Ralph Mupita, who has been re-elected.

Mupita has been Group President and CEO of MTN Group from September 2020, having previously served as Group Chief Financial Officer.

He has served as Deputy Chair of GSMA since April 2025.

Ambuja Cements plans 30 mtpa expansion, targets 155 mtpa capacity by FY30

Our Bureau
Mumbai

Ambuja Cements, part of the Adani Group, plans to add about 30 million tonnes per annum (mtpa) of cement capacity through greenfield and brownfield projects, taking its total capacity to 155 mtpa by FY30.

The expansion programme, involving an investment of about ₹14,500 crore, will strengthen its presence in the Eastern, Western and Northern markets.

The proposed expansion includes 15.5 mtpa of grinding capacity in the West, 11.6 mtpa in the East and 2.9 mtpa in the North.

CAPACITY EXPANSION

In the eastern region, the company plans grinding units at Rangia and Hojai in Assam, Godda in Jharkhand and Muzaffarpur in Bihar, with a capacity of 2.9 mtpa each. The projects in the West include Mundra and Hazira in Gujarat, and Raigad, Kalyan and Amravati in Maharashtra, each with 2.9 mtpa capacity, besides a 0.7 mtpa unit at Dahanu. The northern expansion includes a 2.9 mtpa unit at Dadri in Uttar Pradesh.

The company will also add a clinker capacity of 4 mtpa each at Umrangso in Assam and Maratha in Maharashtra, and 2.3 mtpa at Mundra.

Vinod Bahety, CEO, Cement Business, Adani Group, said the expansion will improve the balance between clinker and grinding capacity, bringing manufacturing closer to consumption centres and lower logistics costs.

The company aims to reduce its cement manufacturing cost to ₹4,000 per tonne by FY28 through improved efficiencies and shorter transportation distances.

The new programme builds on capacity additions already completed. Ambuja added 4.6 mtpa during the first half of FY27 through expansions at Dahej and Kalamboli and the commissioning of the Salai Banwa grinding unit in Uttar Pradesh, taking its capacity to 113.5 mtpa. Another 3.2 mtpa is expected to be stabilised and ramped up in the second half of FY27, while the 2.4 mtpa Warisaliganj grinding unit in Bihar is scheduled for commissioning during the period.

The company expects its total capacity to reach 119 mtpa by next March.

Since its acquisition by the Adani Group, Ambuja has completed 11 capacity projects, adding 16.3 mtpa of cement and 9 mtpa of clinker capacity. The latest expansion marks the next phase of its effort to strengthen its national footprint and improve operating competitiveness.

Star Health does not see much disruption from distribution rule changes: CFO Kambli

bl.interview

Mithun Dasgupta
Kolkata

Insurance regulator IRDAI's proposed changes in insurance distribution norms are positive for the industry as a whole, especially for the proprietary channels, and Star Health and Allied Insurance does not see much of a disruption in it, said Chief Financial Officer Nilesh Kambli.

Kambli said there is an indication that many group health insurance businesses would shift to retail on the bancassurance channel if the proposed changes to distribution economics take effect in their current form.

Edited excerpts:

> The ultimate objective is to ensure that we earn mid-teens to high-teens ROE in the next two to three years
>
> **NILESH KAMBLI**
> Star Health CFO

Star Health and Allied Insurance posted around 233 per cent year-on-year growth in its net profit at ₹265 crore in Q2 this fiscal. What were the factors that contributed to it?

First, there was an improvement in the core operating result, which is the underwriting result, that improved from negative ₹40 crore in Q2 FY26 to positive ₹99 crore in Q2 FY27. It was a function of both improvement in the Loss Ratio and the Expense Ratio.

The loss ratio improved as we have been taking many business level decisions in terms of regular price increase. That has helped us a lot in terms of having the yield on the portfolio. We have considered strict underwriting decisions. In terms of new to insurance business, we have reduced our focus on portability, where the loss ratio is higher.

Secondly, we are focusing on business from preferred geographies. We see that the Tier 2 and 3 cities operate at a decent loss ratio, compared to other cities or metros because of the higher cost of treatment.

If I come to the clearing side, there is a lot of clearing efficiency that we have seen. One is the improved use of tech and AI for fraud, waste and abuse. We certainly have a better solution to detect some of the hard and soft frauds, and that has helped us in reducing the claims cost.

What are the combined ratio and loss ratio that you are looking at in this fiscal?

We are not giving any guidance, but what we see is the efforts that we have taken, and we have seen a consistent improvement in our loss ratio for the last five quarters now. We believe there should be a natural improvement going forward as well. The ultimate objective is to ensure that we earn mid-teens to high-teens ROE in the next two to three years.

What percentage of the total premium currently comes from the retail health insurance and the group health insurance? And, how is the mix expected to change going forward for the company?

Retail is now around 96 per cent of the business. Group is around 4 per cent, which is a mix of bancassurance channel group business and the employer-employee group business. We will see now that with the proposed distribution regulations coming in, how the retail-group mix pan out going forward. There is an indication that many of these group businesses will shift to retail on the bancassurance side. The commission reduction is very drastic in that segment. On the group employer-employee side, we are focused on agency business, which is profitable. We will have to see, but largely we should be in this range for the next one or two years at least.

What do you think of the proposed changes in the insurance distribution norms?

We believe that it's positive for the industry as a whole, and especially for proprietary channels, which is our agency channel. We don't see much of a disruption. With productivity improvement and more consumer awareness that is being created, I think they should be able to make up for their lost income with higher volumes. The objective of the regulator is to ensure affordability of the products going forward, which should be achieved with this distribution navigation.

Are you talking to your bancassurance partners and brokers on the proposed changes in distribution norms?

We are in discussion with them. The initial stage is to give feedback to the regulator in terms of the changes that one wants. So, it's at this stage. The final regulations are still awaited.

City Union Bank receives RBI nod for new ED

Our Bureau
Chennai

Private sector lender City Union Bank said on Monday that the RBI had approved the appointment of Sankaran G, currently the bank's Executive President, as Whole-time Director (Executive Director) for a three-year term from the date he assumes charge.

The bank said that it would take the necessary steps to induct him on its Board as a Whole-time Director, designated as Executive Director, in due course. A separate communication would be made to the stock exchange after the Board approves his appointment.

Crude oil falls 4% on US-Iran peace hopes

London: Crude oil fell more than 4 per cent on Monday as talks between Iranian and Qatari officials on a deal to end the US-Israeli war on Iran raised hopes that the West Asia supply disruptions could ease. Brent crude futures fell $4.79, or 4.2 per cent, to $108.64 a barrel by 1020 GMT, while US West Texas Intermediate crude traded at $99.71, down $4.41 or 4.2 per cent. REUTERS

Gold rebounds over 1% as oil prices soften

Gold prices rose more than 1 per cent on Monday, rebounding from a one-year low hit in the previous session, supported by a retreat in oil prices that tempered inflation worries, while investors awaited US midterm elections later this week. Spot gold was up 1.74 per cent to $3,942.57 per ounce at 0911 am EDT (1411 GMT), having ended 3.6 per cent lower and hit its lowest since October 2025 on Friday. US gold futures for December delivery gained 1.38 per cent to $3,952.80. REUTERS

Palm oil slips on lower export costs, rising stocks

Kuala Lumpur: Malaysian palm oil futures fell on Monday, as lower Indonesian export costs intensified competitive pressure, while weaker crude oil prices and concerns over rising inventories added further pressure. The benchmark palm oil contract for January delivery on the Bursa Malaysia Derivatives Exchange slid 31 ringgit, or 0.66 per cent, to 4,650 ringgit ($1,144.19) a tonne at the close. REUTERS

Sowing of all rabi crops delayed

CROP WATCH. Coverage of mustard, pulses, gram and wheat down by over 40%; paddy trails marginally

Prabhudatta Mishra;
New Delhi

The area under India's rabi crops is down by 46 per cent, with 37.56 lakh hectares (lh) being covered as of October 30 against 69.02 lh a year ago, according to a weekly update on rabi crop sowing released by the Union Agriculture Ministry on Monday.

This includes 20.5 lh under mustard, down by 47 per cent from 38.07 lh, and 9.45 lh under pulses, down by 52 per cent from 19.56 lh a year ago. Also, the winter-grown paddy has been transplanted on 3.16 lh against 3.29 lh.

In the pulses category, gram acreage stood at 5.9 lh, down 59 per cent from 14.35 lh, while lentil (masur) acreage stood at 1.1 lh, compared with 2.14 lh.

The rabi season's main crop, wheat, has been sown on 19,000 hectares, compared with 3.34 lakh hectares a year ago, the data show.

The main sowing window for wheat begins in the first week of November and continues for about two months, varying from State to State.

Sowing slump

Rabi crops acreage (lakh hectare)

	2025-26	2026-27	% change
Wheat	3.34	0.19	-94.2
Paddy	3.29	3.16	-3.8
Total Pulses	19.56	9.45	-51.7
Gram	14.35	5.90	-58.9
Lentil	2.14	1.10	-48.5
Shri Anna cum Coarse Cereals	4.22	3.78	-10.4
Jowar	2.72	2.71	-0.3
Maize	0.93	0.78	-16.1
Barley	0.22	0.01	-94.6
Total Oilseeds	38.62	20.97	-45.7
Rapeseed & Mustard	38.07	20.50	-46.2
Groundnut	0.15	0.25	62.1
Grand Total	**69.02**	**37.56**	**-45.6**

As on October 30, 2026

SOWING TO PICK UP
Officials said that while earlier there was insufficient moisture, high temperatures during day were not conducive for sowing. As the temperature has started cooling, the sowing is expected to pick up.

Data show that the sowing area during the week ending October 30 was 19.54 lh as against 40.76 lh a year ago, down by 52 per cent.

Meanwhile, Union Agriculture Minister Shivraj Singh Chouhan on Monday reviewed the progress of rabi crop sowing and kharif harvesting at an internal meeting with senior officials.

Chouhan was briefed on challenges arising from drought, cyclones and erratic rainfall in various parts of the country.

He directed officials to formulate a robust strategy in the best interests of farmers, stressing that they must be treated with utmost sensitivity during times of crisis and that there should be no procedural delays in relief operations.

KHARIF HARVEST
Officials told the Minister that harvesting of kharif crops was underway across the country, with moong (green gram) and soybean harvesting nearing completion. Chouhan asked the officials to ensure that rabi sowing was accelerated immediately after harvesting, making optimal use of the residual moisture in the fields, an official statement said. "Farmers are receiving prices significantly higher than the Minimum Support Price (MSP) for major crops, including paddy, wheat, maize, gram, lentil, pigeon pea (arhar), soybean and mustard, ensuring better and more remunerative returns for their produce," the government said.

PRODUCTION TARGET
Last year, wheat acreage reached a record 336 lakh hectares, compared with the five-year average of 315.23 lakh hectares, helping the country achieve an all-time high production of 120.66 million tonnes (mt).

Wheat production is crucial for the country as a marginal decline of less than 2 mt in the 2021-22 crop year led to a four-year export ban, which began in 2022.

The government has set a foodgrain production target of 177.72 million tonnes (mt) for the rabi season, including 121 mt of wheat, 17.2 mt of pulses and 22.3 mt of nutri/coarse cereals.

El Nino threatens mining, metals sectors' supply chain

Subramani Ra Mancombu
Chennai

On the London Metal Exchange, the three-month copper contract ended at $14,154.50 a tonne over the weekend

The impact of the ongoing El Nino weather will likely affect the metals and mining sector, too, with supply-side risks even as copper production has already been affected, say analysts and experts.

"A potentially record-strong El Nino through early 2027 is poised to heighten supply-side risks across the metals and mining complex, with energy- and water-intensive mining operations susceptible to extreme weather conditions, which can disrupt power and transport infrastructure, let alone mine sites," said research agency BMI, a unit of Fitch Solutions.

"The ripple effects of this extreme weather have already reached the copper supply chain. Several overseas copper miners have announced production cuts or lowered their output guidance, while Chinese-listed companies are proactively developing contingency plans to hedge against climate-related risks," said Chinese commodity data group SunSirs.

VISIBLE SIGNS
"Operational and policy responses are already visible: Antofagasta (in Chile) cut guidance after severe weather in Chile, Peru, declared preventive flood emergencies for the 2026-27 event, and Zambia continues to ration power following the 2023-24 drought," said Green Stocks Research.

Australia's Office of the Chief Economist (AOCE) said the intensification of El Nino had implications for the demand and supply of energy commodities for heating and cooling, especially thermal coal.

The weather phenomenon and the corresponding extreme heat and drought conditions across Asia and Africa, on the one hand, and flooding in the Americas, on the other, could pose growing operational challenges in key producing markets, said BMI.

On October 21, the World Meteorological Organisation (WMO) said El Nino is likely to reach "unprecedented" risks, raising global weather risks.

L PROJECTIONS CUT
SunSirs said that following extreme weather in Chile, multinational copper producers Antofagasta and Lundin Mining had disclosed that their operations have been affected. This has led to pruning annual production guidance and an increase in cash costs. Green Stocks Research said Chile, Peru and Zambia together mine close to 40 per cent of the world's copper. "El Nino typically brings heavy snow to the Chilean Andes, flooding to the Peruvian coast and drought to the Zambezi basin that powers Zambia's copper belt," it said.

Sugar production up at a record high of 8.5 lt in Oct

Prabhudatta Mishra
New Delhi

India produced a record 8.45 lakh tonnes (lt) of sugar in the first month of the 2026-27 (October-September) crushing season, largely driven by the 7.2 lt produced by mills in Maharashtra.

Only 1 lt of sugar was produced in October 2025, according to data compiled by the National Federation of Cooperative Sugar Factories.

Considering an opening stock of about 36 lt on October 1 and the government's allocation of 27 lt to sugar mills for sale during October, the record production last month is expected to boost availability in November.

This comes as all the remaining sugar mills across the country are expected to commence crushing operations in the next 7-10 days.

According to data from the National Federation of Cooperative Sugar Factories, 152 mills had commenced operations, compared with just 31 mills in October 2025.

Sugarcane crushing stood at 105.43 lakh tonnes (lt) against 11.84 lt a year ago. The all-India sugar recovery rate during October was 8.04 per cent, compared with 8.36 per cent in the year-ago period.

NO OUTPUT IN UP
Sugar production data show that there was no output in Uttar Pradesh, the largest sugarcane producer in the country, despite three mills beginning crushing last month. As many as 10 mills in Uttar Pradesh produced 10,000 tonnes of sugar in October 2025.

In Maharashtra, 123 sugar mills had started crushing against only two in the year-ago period. No sugar was produced in the State in October 2025. The recovery rate in the State has also improved; initially, when 20-30 mills started crushing, it was less than 6 per cent, and for the entire month of October, the recovery is recorded at 7.90 per cent.

In Karnataka, only 7 mills crushed 8.33 lt of sugarcane and produced 80,000 tonnes sugar with 9.6 per cent recovery in October 2026, whereas in the year-ago period 17 mills crushed 7.07 lt of sugarcane and produced 70,000 tonnes of sugar with 9.9 per cent recovery. Farmers are agitating in the State, demanding higher price for sugarcane, which recently ended after the State government's intervention.

FOOD MINISTRY FIAT
The Centre fixes the fair and remunerative price (FRP), while some States also announce a State-advised price (SAP) each season.

The sugar mills are required to buy sugarcane from farmers at the government-notified rates.

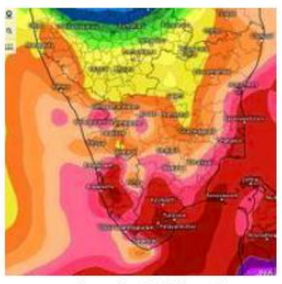
The FRP is linked to a basic sugar recovery rate of 10.25 per cent.

Easterly waves may keep TN, Kerala wet post-Cyclone Murasu

Vinson Kurian
Thiruvananthapuram

Easterly waves and the odd cyclonic circulation, even without developing into a full-fledged low-pressure area, could keep the South Peninsula under a generous wet blanket for at least another week, even after Severe Cyclone Murasu makes landfall along the south Andhra Pradesh coast late on Monday.

This flies in the face of conventional wisdom and historical experience. Back-to-back cyclones over the Bay of Bengal have often been blamed for draining the moisture reservoir and depriving the South Peninsula, particularly Tamil Nadu and Kerala, of their due share of North-East monsoon rainfall. This time, however, the script could be markedly different, if the forecasts are anything to go by.



Accumulated rainfall points to heavier showers over central Kerala and south-east Tamil Nadu till November 12

MET WINDFALL
For the South Peninsula, the immediate prospect is an unusual meteorological windfall: Murasu may make landfall and move inland, but the easterlies blowing across the Bay appear ready to keep the rain taps open. The region could yet make up some lost ground from a disappointing South-West monsoon, provided the forecast signals translate into actual rainfall.

Short-to medium-range outlooks of the India Meteorological Department (IMD), broadly endorsed and further reinforced by the European Centre for Medium-Range Weather Forecasts (ECMWF), suggest that the evolving pattern could prove a godsend for Tamil Nadu, Kerala and Karnataka. All three States have had to contend with the fallout of a largely failed South-West monsoon during June-September.

Rain may gather momentum immediately after Murasu makes landfall by Monday midnight. The ECMWF projected the heaviest falls over north Kerala, adjoining south interior Karnataka and interior north-west Tamil Nadu, even as coastal Tamil Nadu could remain largely outside the initial rain belt. The zone of heavy rainfall is then expected to shift northwards, covering Rayalaseema, parts of Telangana and the north Andhra Pradesh coast, before the system-induced activity briefly eases.

INCOMING SPELL
But the respite may be short-lived. A moisture-laden easterly wave is expected to line up along the Tamil Nadu coast by Wednesday, while coastal Karnataka would get rain as the weakened remnant from Murasu moves over central Andhra Pradesh and adjoining Telangana. The easterly flow across the Bay could then unleash another spell of heavy rain over Tamil Nadu and Kerala, with the rain belt extending north-eastwards into north Andhra Pradesh and adjoining coastal Odisha.

HUMMING RAIN ENGINE
By Thursday, the rainfall footprint could reach the southern parts of Marathwada while remaining active along the Kerala and Tamil Nadu coasts. The ECMWF sees rain from strong easterly waves continuing to lash southern and central Kerala and Tamil Nadu on Friday. Sri Lanka, too, could share in the bounty. The easterly waves, tracing their moisture-laden trajectory back to the Sumatra region, are expected to carry rain activity across the island.

ANOTHER DEPRESSION?
The next significant spell could arrive on November 8, when very heavy rainfall is indicated over Kerala, southern and central Tamil Nadu and Sri Lanka. The heaviest activity may subsequently concentrate over the southern parts of Kerala and Tamil Nadu. All this could unfold even as the Bay threatens to throw up another weather system, potentially a third depression if not a cyclone, over its south-eastern sector, with projections suggesting that it could track away towards the Myanmar coast.

Cotton imports in 2026-27 may hit new peak amid crop concerns, duty relief

Vishwanath Kulkarni
Bengaluru

India's cotton imports for the 2026-27 marketing year (October-September) are set to hit a new high, with the Centre extending the customs duty exemption until December-end amid concerns over domestic crop size, which has been affected by lower acreage and drought in key producing States.

Trade sources said cotton imports in 2026-27 would match or surpass last year's 71 lakh bales of 170 kg each, as the extension of the duty exemption would help mills access contamination-free cotton at competitive prices. India's cotton imports in the year ended September 2026 are estimated to have touched a record 71 lakh bales, against 41 lakh bales in the previous year.

"The duty exemption will help Indian mills access contamination-free cotton, enhancing the competitiveness of our textile products against those from countries such as Bangladesh and China in the global market. Imports will take place as the domestic crop is expected to be lower than last year," said Vinay N Kotak, President, Cotton Association of India .

The Centre extended the cotton import duty exemption until December 31, 2026.

DUTY EXEMPTION
The Centre late on Friday extended the customs duty exemption on cotton imports by two months, until December 31, 2026, from the earlier deadline of October 31. The move aims to boost the supply of the fibre crop to the textile sector.

Atul Ganatra, CMD of Radhalakshmi Group, said the extension of the import duty waiver would provide a boost to the Indian textile industry.

Anand Popat of CotYarn Tradelink, Rajkot, said premiums on imported cotton could rise by about 1-2 cents per pound following the extension of the duty exemption. Following the extension of the duty exemption, domestic cotton prices eased by around ₹500 per candy of 356 kg to ₹65,700-66,200. "The market is subdued and prices fell by ₹500 per candy on Monday, with buyers quoting even lower rates," said Ramanuj Das Boob, a sourcing agent in Raichur. The Cotton Corporation of India also cut its sale prices for the 2025-26 crop by ₹400 on Monday.

Stay out of natural gas futures for now

Gurumurthy K
bl. research bureau

Natural gas prices have come down from their highs last week.

COMMODITY CALL.

The natural gas futures contract traded on the Multi Commodity Exchange (MCX) touched a high of ₹296.20 per mmBtu and has been coming down since then. It is currently trading at ₹279 per mmBtu.

OUTLOOK
The immediate picture is slightly unclear. The fall from the high last week indicates an absence of fresh buyers. A cluster of resistance is there in the ₹282-₹288 region. A strong break above ₹288 is needed to ease the downside pressure. Only then can the contract gain strength and go higher. If that bullish break above ₹288 happens, then the MCX Natural Gas Futures contract could rise to ₹310-₹315 in the coming weeks.

On the other hand, if the contract fails to break above ₹288, it could continue to trade under pressure. In that case, a fall to ₹250-₹245 could be seen. The daily chart indicates weakness. But on the weekly chart, the bias is slightly positive. So overall, it is a mixed picture as of now. We will have to wait and see.

TRADE STRATEGY
Since the daily and weekly charts are giving diverging signals, it is better to stay out of the market.

POSTAL BALLOT NOTICE AND E-VOTING INFORMATION

NOTICE is hereby given that in accordance with the provisions of Section 110 read with Section 108 and other applicable provisions, if any, of the Companies Act, 2013, ('**the Act**') (including any statutory modification(s) or re-enactment(s) thereof for the time being in force), read with Rules 20 and 22 of the Companies (Management and Administration) Rules, 2014, ('**Rules**'), Regulation 44 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ('**Listing Regulations**') and the Secretarial Standard-2 on General Meetings issued by the Institute of Company Secretaries of India ('**SS-2**'), each as amended, and in accordance with the requirements prescribed by the Ministry of Corporate Affairs ('**MCA**') vide its General Circular Nos. 14/2020 dated April 8, 2020; 17/2020 dated April 13, 2020; and subsequent circulars issued in this regard, the latest being 03/2025 dated September 22, 2025 (collectively referred to as '**MCA Circulars**') from time to time, the Resolution as set out hereunder is proposed for approval of the Members of Tata Teleservices (Maharashtra) Limited ('**the Company**'), through postal ballot by way of remote electronic voting (remote e-Voting) process only.

Sr. No.	Resolution	Type of Resolution
1	Appointment of Mr Gaurav Gupta (DIN:11999617) as a Non-Executive Non-Independent Director	Ordinary

In accordance with the aforesaid Circulars, the Company has sent the Postal Ballot Notice on Monday, November 2, 2026 in the electronic form only to those Members whose names appeared in the Register of Members/List of Beneficial Owners as received from MUFG Intime India Private Limited (previously known as Link Intime India Private Limited), the Company's Registrar and Transfer Agent ('**RTA**') / Depositories as on Friday, October 23, 2026 ('**Cut-Off date**') and whose email addresses are registered with the Company/RTA/Depository Participants ('**DP**'). Accordingly, physical copy of the Notice along with the Postal Ballot Form and pre-paid business reply envelope has not been sent to the Members for this Postal Ballot. A person who is not a Member on the Cut-Off date shall treat this Notice for information purpose only.

The Postal Ballot Notice and the Explanatory Statement pursuant to Section 102 of the Act read with other applicable laws, is also available on the Company's website at https://www.tatatelebusiness.com/ general-meetings-postal-ballot/, the website of the National Securities Depository Limited ("**NSDL**") www.evoting.nsdl.com and the stock exchanges where the equity shares of the Company are listed i.e., BSE Limited ('**BSE**') at www.bseindia.com and the National Stock Exchange of India Limited ('**NSE**') at www.nseindia.com.

The Company has engaged the services of NSDL to provide remote e-Voting facility to its Members and the communication of assent or dissent of the Members would only take place through the remote e-Voting system.

Remote E-Voting Schedule:

Commencement of remote e-Voting period	Tuesday, November 3, 2026, at 9:00 a.m. (IST)
Conclusion of remote e-Voting period	Wednesday, December 2, 2026, at 5:00 p.m. (IST)

The remote e-Voting module shall be disabled by NSDL thereafter and the Members will not be allowed to vote electronically beyond the said date and time. The voting rights of the Members shall be in proportion to the shares held by them in the paid-up equity share capital of the Company as on the Cut-off date. Once a vote on the Resolution is cast, the Member will not be able to change it subsequently. Only those Members whose names are recorded in the Register of Members of the Company or in the List of Beneficial Owners as on the Cut-off date will be entitled to cast their votes by remote e-Voting.

To facilitate the Members to receive this Notice electronically, the Company has made arrangements with its RTA for registration of email addresses in terms of the MCA Circulars, eligible Members who have not registered their email addresses with the Company may register the same with the RTA by visiting the Link: https://web.in.mpms.mufg.com/EmailReg/Email_Register.html on or before 5.00 p.m. (IST) on Friday, November 13, 2026 and completing the registration process as guided therein, basis which, NSDL will email a copy of the Notice along with the remote e-Voting User ID and Password. The procedure to register email address with the RTA and the procedure for remote e-Voting is provided in the Notice of Postal Ballot. The Members holding shares in the physical form or who have not registered their email address with the Company may also exercise their voting rights by following the procedure given in the Notice of Postal Ballot.

The Board of Directors of the Company has appointed Mr Vaibhav Dandawate (Certificate of Practice No. 27947) failing him Ms Deepti Kulkarni (Certificate of Practice No. 22502), Partners at M/s Makarand M. Joshi & Co., Practicing Company Secretaries, as the Scrutiniser, to conduct the Postal Ballot through remote e-Voting process in a fair and transparent manner.

After completion of scrutiny of the votes casted, the Scrutiniser will submit his/her report to the Chairman of the Company, or any other person as authorised by him. The results declared along with Scrutiniser's Report shall be announced by the Chairman or such authorised person within two working days from the conclusion of remote e-Voting period for Postal Ballot. The results of remote e-Voting along with the Scrutiniser's Report will be displayed on the website of the Company at https://www.tatatelebusiness.com/general-meetings-postal-ballot/, the website of NSDL at www.evoting.nsdl.com and shall also be communicated to the Stock Exchanges where the Company's Equity Shares are listed viz. BSE and NSE and made available on their respective websites viz. at www.bseindia.com and www.nseindia.com. The results shall also be displayed on the Notice Board at the Registered Office of the Company.

The Resolution, if passed by the requisite majority, will be deemed to have been passed on the last date of remote e-Voting, i.e., Wednesday, December 2, 2026.

In case of any queries or issues regarding e-Voting, you may refer to the Frequently Asked Questions (FAQs) for Shareholders and e-Voting user manual for Shareholders available at the download section of www.evoting.nsdl.com or write an email to Ms Pallavi Mhatre, DVP of NSDL at evoting@nsdl.co.in or call at 022-48867000 and for CDSL, write an email to Mr Rakesh Dalvi, AVP of CDSL at helpdesk.evoting@cdslindia.com or call at toll free number 1800-21-09911.

Maharashtra to launch new maritime policy

Mumbai: The Maharashtra government is working on a new maritime policy to boost port infrastructure and coastal shipping, the State's Minister for Fisheries and Port Development, Nitesh Rane, said at the Ficci Maritime India conference in Mumbai on Monday. Last month, the State government signed an MoU with Mazagon dock to develop a ₹26,000 crore shipyard in the State. OUR BUREAU

SC allows bursting of green firecrackers for Deepavali on Nov 7-8 in Delhi-NCR

TIMETABLE SET. Certified fire crackers can be used on both days between 6 am and 7 am, 8 pm and 10 pm

Krishnadas Rajagopal
New Delhi

The Supreme Court has allowed the bursting of certified green firecrackers between 6 am and 7 am and 8 pm and 10 pm on November 7 and 8 for Deepavali in the Delhi-National Capital Region (Delhi-NCR).

However, in the order published on Monday, it said, "There shall not be any bursting of fireworks within a 300-m radius of hospitals, nursing homes, primary and district health centres, old age homes and any notified silence zones. These areas will be declared as 'no-cracker zones', and shall be marked on the ground and published," the court said in the 23-page order.

The same restriction would be applicable to educational institutions.

The Supreme Court termed the bursting of firecrackers during Deepavali a "religious practice", which, if left unregulated, takes a heavy toll on the environment and on public health.

WITHIN LIMITS. No fireworks are allowed within 300 m of hospitals, nursing homes, primary and district health centres, old age homes and any notified silence zones JOTHI RAMALINGAM B

"Bursting of firecrackers, though constitutes a religious practice meant to celebrate the occasion, shall result in severe environmental pollution, especially air and noise, apart from the creation of solid wastes... Amongst human beings, children, disabled and the elderly people constitute the most vulnerable groups," a Bench of Justices MM Sundresh and Prasanna B Varale observed in the order.

The unregulated use of firecrackers during Deepavali in the modern day had chronically led to a huge spike in the air quality index (AQI) as well as pollution levels, including the release of particulate matter, the court said.

The Bench stressed that the right to practice, profess and propagate religion conferred under Article 25(1) of the Constitution was "certainly subject to public order, morality and health". The right to life under Article 21 included the right to a healthy, safe and pollution-free environment.

The state had "utterly failed" in complying with the court's orders since 2015 to impose restrictions on fireworks, the Bench said. In fact, the situation had not improved even after the resumption of a complete ban on firecrackers.

A significant spike in AQI levels was evident on the Dasara festival day and the one following it. The "complete ban" had not only facilitated the illegal sale of firecrackers, but also prevented people from purchasing legitimate green crackers, the court said.

GREEN CRACKERS

In a series of directions, the court ordered that only manufacturers certified by CSIR-NEERI (Council of Scientific and Industrial Research - National Environmental Engineering Research Institute) and PESO (Petroleum and Explosives Safety Organisation) would be permitted to produce green crackers between November 2 and November 6.

The cracker boxes would be sealed and not mixed with any of the unauthorised or conventional firecrackers. There would be no manufacture or sale of firecrackers joined in series ('ladis') and garlands. Only firecrackers carrying product-specific QR codes would be allowed to be sold. Cancelled licences of traders would be restored temporarily from November 4 to November 6.

Manufacturers and traders of firecrackers in Delhi-NCR must furnish a monetary security, which should be a "handsome amount" determined by the authorities.

Centre quizzed for stalling enforcement of Vedanta arbitration awards

Aaratrika Bhaumik
New Delhi

The Supreme Court on Monday dismissed the Union government's challenge to a Delhi High Court order allowing mining major Vedanta Ltd and Ravva Oil (Singapore) Pvt Ltd to enforce foreign arbitration awards involving claims of nearly $99 million from the Centre. The court questioned the Centre's resistance to the enforcement of the awards, warning that such delays could undermine India's standing as an arbitration hub.

A Bench of Justices JB Pardiwala and Manmohan questioned why the government continued to oppose enforcement, particularly when it was seeking to position itself as a preferred venue for international arbitration. "What are these arguments? You are frustrating an arbitral award like this? At the stage of enforcement of it? And we talk about all of this arbitration and seat and this and that? ... Nobody will trust you," the Bench remarked.

LEGAL BATTLE

The Bench also took note of the prolonged nature of the dispute, pointing out that the first arbitral award was rendered in 2004, while the final award followed in 2016. It ultimately found no reason to interfere with the Delhi High Court's July 1 judgment rejecting the Centre's objections to the enforcement of the awards in favour of Vedanta and Ravva Oil, which were passed by an arbitral tribunal seated in Kuala Lumpur, Malaysia.

"We are of the view that no error, not to speak of any error of law, could be said to have been committed by the High Court in passing the impugned judgment and order," the Bench said while dismissing the appeal.

The dispute dates back to a 1994 production-sharing contract for the development of the Ravva oilfield in the Krishna-Godavari basin. The agreement was signed between the Union government and a consortium comprising ONGC, Videocon Petroleum, Ravva Oil and Cairn Energy. Cairn Energy's stake in the project subsequently passed to Cairn India and later to Vedanta.

At the heart of the dispute was how payments towards costs previously incurred by ONGC in developing the oilfield were to be accounted for while calculating the companies' share of revenue from oil production. The matter was referred to arbitration in Kuala Lumpur under Malaysian law and the United Nations Commission on International Trade Law (UNCITRAL) Arbitration Rules. Vedanta and Ravva Oil subsequently moved the Delhi High Court to enforce the awards in India.

The Centre opposed the plea on grounds, including limitation, public policy and the tribunal becoming functus officio after passing the earlier award. In July, the High Court rejected the objections, holding that enforcement proceedings could not be used to reopen the underlying dispute or reconsider the tribunal's findings. It also held that the proceedings were within the limitation period and directed the release of the companies' bank guarantees within eight weeks.

5 nations seek WTO support for professional qualification pacts

Amiti Sen
New Delhi

India, Pakistan, Bangladesh, Nepal and the Kyrgyz Republic have jointly called for greater cross-border recognition of professional qualifications at the WTO, arguing that developing economies' limited participation in mutual recognition arrangements (MRAs) is preventing their professionals and services exporters from fully benefiting from international trade.

In a recent submission to the WTO Committee on Trade and Development (CTD), the five countries sought targeted technical assistance and capacity building to help developing countries bridge gaps in their regulatory systems, professional accreditation and licensing frameworks.

INCORPORATE ISSUE

This, they noted, would improve their ability to negotiate and implement MRAs.

They demanded that the issue be incorporated into the WTO's Technical Assistance and Training Plan, with support tailored to the requirements and export potential of developing countries and least developed countries (LDCs).

"India has had limited success with MRAs so far. Implementation becomes difficult, especially with developed countries," a source told *businessline*.

KEY REASON

The submission highlighted that MRAs for professional qualifications have historically been easier to establish and more common between advanced economies than between advanced and developing economies.

"The key reason for this is greater regulatory compatibility amongst the advanced economies. Institutional and human capacity constraints, differences in domestic qualification, licensing and accreditation systems, weak coordination among relevant authorities and professional bodies, and limited access to information and experience have been identified as key constraining factors impacting the ability of developing members and LDCs to engage in and benefit from recognition arrangements," it added.

The proponents suggested that the WTO Secretariat, in consultation with developing countries and LDCs, identify their specific technical assistance requirements and assess where support could be provided. The assistance should be demand-driven and development-orientated, with priority for sectors where countries have export potential but face significant barriers because their professional qualifications are not recognised.

Proposed areas of support include mapping domestic systems for professional education, qualifications, licensing and accreditation.

J&K seeks to boost silk industry through local processing, private investment

Gulzar Bhat
Srinagar

Jammu and Kashmir is stepping up efforts to strengthen its traditional silk industry by expanding local cocoon processing and encouraging private investment, aiming to shift the Union Territory from a supplier of raw cocoons to a centre for silk production and value addition.

The Union Territory produces around 800 to 900 tonnes of cocoons annually, but only about 30 per cent is consumed locally, while the rest is sold outside.

Under its proposed development strategy, the department plans to upgrade marketing infrastructure and establish reeling, twisting and dyeing units, besides facilities for designing, printing and selling silk fabrics and other products.

"To attract investors, the proposed funding structure provides for an 80 per cent central subsidy and a 10 per cent UT subsidy, with beneficiaries contributing the remaining 10 per cent towards eligible projects", said Aijaz Ahmad Bhat, Director Sericulture Department.

The existing infrastructure includes nine functional reeling units, six in Kashmir division and three in Jammu division. The UT also has 102 cocoon hot-air dryers, 11 cocoon auction market sheds and six warehouses. An automatic reeling unit has been established at Khonmoh in Srinagar district.

"The 200-end unit, operated by Bombyx Mori Silks, processes around 600 kg of green cocoons daily and has an annual capacity of approximately 1.8 lakh kg," Bhat said. The government is planning to expand processing capacity through new projects. In Jammu division, an automatic reeling unit has been proposed under the Holistic Agriculture Development Programme (HADP), with site inspections completed in Udhampur and Jammu districts.

In Kashmir division, a proposed 120-end automatic reeling unit in Anantnag district is under consideration by the Project Monitoring Committee. The Cocoon Bank Revolving Fund has been increased to ₹3.50 crore to improve market liquidity and encourage local reeling units to purchase cocoons. "The government has increased the minimum support price for dry commercial cocoons paid to rearers from ₹510 to ₹800 per kg. The highest bid recorded for silk cocoons during the current year was ₹2,110 per kg", said an official.

He said funding had been recommended for a digital silk printing machine, costing ₹165 lakh, and a twisting unit to convert raw silk yarn into finished textile yarn.

Construction material movement curbs by TN raise costs for Bengaluru developers, delay projects

Aishwarya Kumar
Bengaluru

Construction cost uncertainty is squeezing Bengaluru developers, with overall costs estimated to have risen by ₹200–300 per sq ft since July following Tamil Nadu's restrictions on the inter-State movement of construction materials.

Developers report that aggregate prices have risen by 150–200 per cent, while cement and steel costs have increased by 8–10 per cent. The disruption has also affected the availability of manufactured sand, plastering sand and ready-mix concrete (RMC), forcing developers to find alternative suppliers and contend with delays.

Jawahar Gopal, Chairman of the Featherlite Group, said projects in south and east Bengaluru rely on crushers in Krishnagiri, Tamil Nadu. Following the restrictions, RMC prices have risen by more than ₹1,000 per cubic metre.

"Time is the bigger loss. Every new supplier has to be found and its material tested before a slab can be poured, which has set one of our projects back by over two months," he said.

Gopal said the issue required coordination between the two States rather than being treated as a State-specific problem.

Arhanth Dinesh, Managing Director of Krishvi Group, said, "We did not realise how dependent we were on Tamil Nadu because supply was seamless. Once the restrictions came in, it was clear that these materials, which form the main components of the structure, relied heavily on that route."

Nesara BS, Chairman of Concorde, said the direct impact was concentrated in manufactured sand, plastering sand, aggregates and their transportation. Labour and other construction inputs had separate cost drivers, making it difficult to attribute a precise per-square-foot increase without examining project-level procurement and material consumption. The challenge is not simply finding alternative suppliers, but ensuring that they can meet specifications and sustain the required delivery volumes. Shifting orders to Karnataka suppliers addresses only part of the problem if production and transport capacity remain inadequate, he added.

Some developers have diversified their sourcing to reduce the disruption. TV Ganesh, Executive Director – Technical, Shriram Properties Ltd, said the company had expanded procurement from Karnataka suppliers and other available routes.

"This has helped us replace a substantial part of the affected supply, although availability and consistency continue to vary by location and material," he said.

UNDER PRESSURE

The disruption has also changed procurement arrangements. Krishvi Group, which previously purchased materials on credit, found that the market shifted to cash-and-carry almost overnight, Dinesh said. Local suppliers were charging nearly three times the prices the company paid for materials sourced from Tamil Nadu. "Prices have eased as alternatives emerge, but they remain well above earlier levels," he said.

Supply delays are also disrupting concreting, plastering and block masonry. When concrete does not arrive in time for a scheduled pour, labour can remain idle even as developers continue to incur costs.

Ganesh said the shortage had slowed execution across Shriram Properties' ongoing Bengaluru projects, with timelines now expected to extend by four to six months.

For projects that have already been launched and sold, developers generally cannot revise agreed sale prices to account for the increase in construction costs. The additional expense, therefore, falls on the developer, putting pressure on project margins.

iD Fresh revenue up 28% in FY26, exceptional items hit bottom line

Our Bureau
Bengaluru

Bengaluru-based ready-to-cook food maker iD Fresh Food reported a 28 per cent year-on-year increase in consolidated revenue from operations to ₹879.3 crore in FY26, even as exceptional items of over ₹700 crore pushed it into a reported net loss of more than ₹600 crore, according to data accessed from market intelligence firm Tracxn.

However, the company's underlying profitability improved during the year. Profit before tax and exceptional items rose to about ₹78 crore from ₹23.6 crore in the previous fiscal.

Total expenses increased to around ₹800 crore during the year. The cost of materials consumed rose to ₹260 crore from ₹230 crore, an increase of about 13 per cent year-on-year. Purchases of stock-in-trade, meanwhile, increased 27.6 per cent to ₹131 crore from ₹102.6 crore.

iD Fresh is planning 10 production hubs across Singapore, Sri Lanka, the US, the UK, Europe and Canada over the next two years

iD Fresh built its business around ready-to-cook products such as *idli* and *dosa* batter and has since expanded into *parathas*, *chapatis*, paneer, curd and other packaged food categories. The company has also entered the snacking segment as it seeks to diversify beyond its core fresh-food offerings.

GLOBAL MARKETS

International expansion is another part of its growth strategy. The company plans to establish 10 manufacturing hubs across markets including Singapore, Sri Lanka, the US, the UK, Europe and Canada over the next two years. Its proposed model involves completing most of the production process at dedicated facilities, with final-stage processing undertaken in destination markets.

The expansion comes as iD Fresh prepares for a potential initial public offering by October FY27.

PM Modi likely to open Bengaluru's elevated Pink Line on November 13

Our Bureau
Bengaluru

Bengaluru's elevated Pink Line metro corridor is expected to open to the public on November 13, following safety clearance from the Commissioner of Metro Railway Safety (CMRS). Prime Minister Narendra Modi is likely to inaugurate the corridor.

Bengaluru South MP Tejasvi Surya took to X hinted at the likely opening date in a post: "November 13th. #PinkLine".

The elevated section has seven stations: Kalena Agrahara, Hulimavu, IIMB, JP Nagar 4th Phase, Jayadeva Hospital, Ragigudda and Tavarekere.

The remaining 13.8-km underground section will connect Dairy Circle to Nagawara, passing through MG Road and Shivajinagar. Once the entire line is operational, it will link south Bengaluru with the central and northern parts of the city, improving connectivity for commuters, including office-goers.

Last Wednesday, Krishna Byre Gowda, Karnataka's Minister for Revenue and the minister in charge of Greater Bengaluru Development, said the elevated section had received safety clearance and was ready to begin services once the Centre announced an inauguration date.

We are happy to obtain the clearance from Commissioner for Metro Railway Safety for elevated portion of Pink Line. We are ready to launch public service as soon as the Centre gives a date for inauguration, he said.

IRDAI streamlines procedures for insurer share transfers, IPOs and mergers

G Naga Sridhar
Hyderabad

The Insurance Regulatory and Development Authority of India in a master circular on IRDAI (Registration, Capital Structure, Transfer of Shares and Amalgamation of Insurers) Regulations, 2024, along with the amendments notified in 2026, replaced the previous master circular issued in May 2024 and a separate circular on subscribers to Other Forms of Capital issued in September 2024.

A key provision is the reduction in the processing fee for applications seeking approval for transfer of shares under Regulation 22(4) from ₹50 lakh to ₹10 lakh, following the 2026 amendments. However, fees already paid before notification of the amendments will not be refundable; applications seeking prior approval for share transfer in connection with a proposed listing must disclose the purpose and size of the initial public offering, including the fresh issue component and offer for sale, besides the existing and proposed shareholding patterns.

For mergers and amalgamations, the Authority has prescribed extensive documentation requirements, including audited financial statements, transaction agreements, board and shareholder approvals, and an independent actuary's assessment of the impact on technical reserves, solvency, product pricing and financial condition of the merged entity. Employee stock options issued by insurers, including through trusts, will be subject to statutory shareholding restrictions. Prior IRDAI approval will be required where the exercise of options by key managerial personnel or directors breaches the prescribed thresholds.

Hikal inks CDMO deal with European agrochem firm

Mumbai: Hikal Ltd has signed a multi-year contract with a Europe-based global agrochemical company to supply a specialised agrochemical product to markets worldwide, it said. The contract executed through Hikal's Crop Protection division involves contract development and manufacturing (CDMO) of the product "for which Hikal undertook process development and scale-up," it added. Commercial launch of the product is expected by end FY 2026-27, the company said.

Marvell to buy Lumentum in $115 b all-stock deal

Marvell Technology is buying optical components maker Lumentum in a $115 billion all-stock deal, including debt, as the custom chipmaker steps up to the AI spending boom. Under the agreement, Marvell will pay $1,132 per share in stock, a 23.9 per cent premium to Lumentum's last unaffected closing price on October 28. That gives the deal an equity value of $102.54 billion.REUTERS

IndiGo develops premium offerings, mulls fuel hedging for global push

COMPETITIVE EDGE. Weighs larger business-class cabins on A350s; detailed hedging to be reviewed by board

Rohit Vaid
New Delhi

EXPANDING SCOPE. Willie Walsh, Chief Executive Officer of IndiGo, addressing the media in New Delhi on Monday REUTERS

Airline major IndiGo is developing new premium products, as well as reviewing its fuel hedging policy, to support its international expansion as it prepares to compete with global airlines in a challenging operating environment.

Speaking at a media briefing, IndiGo's Chief Executive Officer Willie Walsh said the first 10 Airbus A350s would feature 16 business-class flatbed seats, alongside premium economy and economy cabins.

However, the airline is debating whether to increase the number of business-class seats in subsequent deliveries. Walsh said he personally believed there was a strong case for doing so.

IndiGo has 60 A350s on order. The first aircraft is scheduled for delivery in the second quarter of calendar year 2028, subject to Airbus and supplier readiness.

FLEET EXPANSION
Besides, the airline has four A321XLR aircraft in operation, with the fleet expected to increase to seven next year. According to Walsh, IndiGo will continue investing in its "Stretch" offering, expressing confidence in the product's prospects in both domestic and international markets.

The airline, he said, is undertaking a detailed review of fuel hedging, with its international expansion bringing a different competitive environment into consideration. In aviation parlance, fuel hedging means using financial contracts to manage exposure to changes in fuel prices. At present, the crisis in West Asia, along with other global events, has pushed up jet fuel prices.

HEDGING TALKS
Walsh said the issue was discussed with the board last week, and management would return at a future meeting after completing a more comprehensive assessment.

"Our long-haul expansion gives us an opportunity to review our hedging policy," he said.

Walsh said remaining unhedged was currently the right approach, and any policy change would be accompanied by an explanation of its rationale.

Walsh described hedging as a means of managing risk and providing stability, rather than betting on future fuel prices.

Furthermore, he said that hedging while domestic competitors remained unhedged could introduce an additional competitive risk for IndiGo. Internationally, however, IndiGo faces airlines with varying degrees of fuel-price protection. He said major Asian carriers were typically around 40 per cent hedged, while European airlines were generally around 70–80 per cent hedged. The difference had complicated competition during IndiGo's leased Boeing 787 operations, alongside Pakistani airspace restrictions and elevated fuel costs, he said.

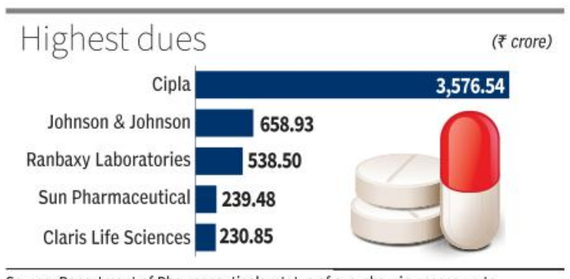
He identified Delhi, Mumbai and Bengaluru as cities from which IndiGo would look at international services, with greater visibility on A350 routes to come closer to their introduction.

LONG-TERM PLANS
Separately, Walsh described the Navi Mumbai airport as a significant long-term opportunity, with IndiGo planning to expand its domestic and international operations across both Mumbai airports.

Its existing domestic network could feed long-haul services without compromising the efficiency of its narrow-body operations.

IndiGo would not redesign its short-haul network at the expense of operational efficiency to support wide-body expansion, he said. Separately, he said that the Indian aviation market would perform better with lower charges and taxes.

Cipla tops drug overcharging dues with ₹3,576 crore



Source: Department of Pharmaceuticals, status of overcharging cases up to March 2026, Annexure B

Ankita Upadhyay
New Delhi

For more than four decades, India's drug price regulator has been trying to recover money from pharmaceutical companies that charged patients more than the prices allowed under the law. But the latest government data show that thousands of crores remain unpaid, with several cases stuck in courts, under recovery proceedings or pending with district authorities. As of March 2026, ₹8,530 crore in overcharging dues, including interest, remains outstanding, with Cipla alone accounting for ₹3,576 crore.

When a company sells a price-controlled medicine above the applicable ceiling price set by the government, it is liable to pay the excess amount to the National Pharmaceutical Pricing Authority (NPPA), along with interest under the Drug Price Control Order (DPCO). The latest data from the Department of Pharmaceuticals show that Cipla, Johnson & Johnson, Ranbaxy Laboratories, Sun Pharmaceutical Group and Claris Life Sciences are among the top companies with the highest outstanding dues. The cases span successive Drug Price Control Orders, with several dating back to the 1990s and early 2000s. Cipla has the highest outstanding dues at ₹3,576.54 crore across formulations and brands, including cases in which the company is named alongside manufacturing or marketing partners.

BRANDED MEDICINES
Among its branded medicines, Ciplox-TZ alone accounts for ₹307.27 crore in outstanding dues, including ₹189.08 crore in interest. Ciplox 500 mg tablets account for another ₹232.09 crore, while Duolin Rotacaps have outstanding dues of ₹250.82 crore.

Johnson & Johnson is second on the list, with outstanding dues of ₹658.93 crore, with its liabilities largely concentrated in the Benadryl cough syrup range.

Ranbaxy Laboratories follows with outstanding dues of approximately ₹538.5 crore, largely linked to antibiotic formulations. Sun Pharmaceutical Group is the fourth, with outstanding dues of nearly ₹239.48 crore, followed by Claris Life Sciences with outstanding dues of ₹230.85 crore.

The figures include interest and account for amounts already recovered. However, the recovery remains incomplete, with several cases still under litigation.

TRAI tightens grievance rules, proposes penalties up to ₹20 lakh

Our Bureau
New Delhi

The Telecom Regulatory Authority of India (TRAI) on Monday amended the Telecom Consumers Complaint Redressal framework, thereby tightening the rules for consumer grievance redressal, under which telecom or Internet service providers (ISPs) may be penalised up to ₹20 lakh per quarter per service area, for improperly handling consumer complaints.

"Consumer support through Complaint Centres will be available round the clock on all days of the week, instead of the existing 16-hour arrangement. Such support may be provided through human representatives, automated systems, AI agents, other customer-centric technological solutions, or a combination thereof," TRAI said.

HUMAN ASSISTANCE
It said human assistance should be available for at least 16 hours daily and technology-based solutions should function with appropriate human oversight to ensure ease and convenience to consumers. The amended regulations will apply to ISPs having more than 10,000 subscribers as of the last day of the preceding financial year. The existing alternative criterion based on annual financial turnover exceeding ₹5 crore has been dispensed with, thus simplifying the applicability clause, it said.

The upgrade comes after the Authority released a consultation paper on the Draft Telecom Consumers Complaint Redressal (Fourth Amendment) Regulations, 2026, on May 7, 2026, inviting comments and counter-comments from the stakeholders by June 19.

A total of 32 comments and 24 counter-comments were received from stakeholders, and an online Open House Discussion was also held on July 17, TRAI mentioned.

The regulator noted that although it does not have the mandate to handle individual complaints, the number of complaints received from telecom subscribers had shown an increasing trend over the years. Despite the mechanism that was first introduced in 2012 and amended twice subsequently, the number of complaints had risen only over the last few years.

PERIODIC REVIEWS
"This has been done to ensure suitable review and oversight of the disposal of complaints and appeals by the service providers at the highest level," TRAI said.

In case the regulator finds contravention in complaint disposal, then a penalty of ₹1,000 will be levied per violation, and ₹5,000 per instance by the appellate authority, but the total amount will not exceed ₹20 lakh per quarter per authorised service area, which has been reduced from ₹50 lakh, proposed earlier by the regulator in May.

TRAI can also impose a penalty of up to ₹10 lakh for failure to submit the quarterly performance report as per the rules.

Airlines panel seeks govt intervention to protect Mumbai airport slots

Our Bureau
Mumbai

The Airline Operators Committee (AOC) of Mumbai airport has petitioned the Civil Aviation Ministry for protection and approval of historical slots in the upcoming summer schedule.

The committee wrote to the Ministry on Monday expressing concern over the Adani Group-run Mumbai International Airport Ltd's (MIAL) decision to reduce capacity by five million passengers from next summer.

The AOC, which represents domestic and foreign airlines operating at Mumbai, is opposed to an unilateral reduction in slots and has sought the Ministry's intervention.

REDEVELOPMENT
The letter follows a meeting between the airlines and Adani Group officials last week. The group has proposed to reduce capacity as it redevelops Terminal 1 at Mumbai. At the meeting, the officials made a presentation on facilities at Navi Mumbai airport and asked the airlines to share their transition plans by November 3.

The airlines, however, have sought more time and want adherence to regulations. The AOC said the airport's actions appear inconsistent with the assurances given during the meeting on October 13, wherein it was stated that future decisions would be taken mutually and in consultation with all stakeholders.

"We further request that no historical slots be denied, reduced, cancelled or reallocated unilaterally, without due process and adherence to the Civil Aviation Ministry and IATA slot guidelines," the AOC said.

Dr Reddy's HIV prevention injectable gets tentative US nod

Our Bureau
Hyderabad

Dr Reddy's Laboratories has received tentative approval from the US Food and Drug Administration (USFDA) to its long-acting injectable lenacapavir for pre-exposure prophylaxis (PrEP) to reduce the risk of sexually acquired HIV-1 in adults and adolescents weighing at least 35 kg. The approval was granted under the US FDA's President's Emergency Plan for AIDS Relief (PEPFAR) program.

"The US FDA approval validates that work and brings us a significant step closer to making this twice-yearly HIV prevention option available to people across low- and middle-income countries," Deepak Sapra, CEO, API and Services, Dr Reddy's Laboratories, said on Monday.

Tech firms eye opportunity in AI model routing

Sanjana B
Bengaluru

The growing use of multiple AI models within enterprises is opening up a new monetisation opportunity for technology companies in model routing, which helps businesses select the most cost-effective model for each task based on its complexity, performance and security requirements.

Model routing is the intelligent selection of the best AI model for each task, based on quality, cost, speed, security, or context, Jaspreet Bindra, Co-Founder & CEO of AI & Beyond, explained. This matters because enterprises will increasingly use many models. IDC expects 70 per cent of leading AI-driven enterprises to use dynamic multi-model routing by 2028.

"If two software products use the same underlying models, the winner may be the one that consistently chooses the right model for each task. Better routing can mean lower cost, faster responses, higher reliability, and better output quality, making orchestration itself part of the product moat," he said.

For instance, Snowflake is using dynamic model routing through its recently launched Cortex AI Gateway to help enterprises reduce AI costs by recommending models based on each use case's complexity and economics.

RECOMMENDING
Vijayant Rai, Managing Director, India, Snowflake, said Snowflake's AI Data Cloud allows customers to keep their data on the platform while accessing AI and LLMs from providers like Anthropic and OpenAI, and open-weight models such as DeepSeek and GLM. Recently, Snowflake also announced support for the latest models from DeepSeek-V4-Flash 0731 and GLM-5.3.

"With dynamic model routing, we're making recommendations; it gives them the option of which models to use for what inferencing, based on cost efficiency. For a simple thing to be done at scale, you might want to use an open-weight model over a frontier model because the latter is too expensive. For some deep research work like complex enterprise planning, you might want to use a frontier model," Rai had said in an earlier conversation with *businessline*.

Dynamic model routing analyses usage patterns for a specific use case and recommends the most appropriate model. For example, instead of using a frontier model, enterprises could opt for an open-weight model that delivers comparable accuracy at one-third the cost.

In an earlier interaction with *businessline*, Kamalkanth Tummala, India Country Manager at Databricks, had said the company offers Unity Gateway, which helps organisations manage AI costs through configurable budgets and spending limits, cost tracking and attribution by model, user or service. It also provides a centralised dashboard to track estimated spending across Databricks-hosted and external models.

COST BASKET
For instance, drafting an email using GPT-5.5, Claude Fable 5 and Claude Haiku 5.5 would incur different costs. Similarly, one employee might use Haiku while another uses an open-weight model. The cost of the same prompt could vary significantly across models, with some costing up to 10 times more than others.

"Since our engineers use multiple frontier models, it creates a cost basket. Our internal team has been trying to move from token maxxing to value maxxing. We became Unity Gateway's customer zero. It gives you access to a catalogue of models, including frontier, Chinese, and open-weight models, letting you choose the relevant one. You can also set budgets based on user profiles. For instance, a salesperson may get a budget of $100, while an engineer may get $1,000. If the salesperson exhausts 80 per cent of the budget by midday, they can switch to an open model. The Gateway provides the flexibility to choose between models," he shared.

The key questions are which model is most cost-effective for a given use case, how organisations can control what internal information is shared with different models, and how they can provide organisational context to each model.

Brokerages bullish on telecom Q2, led by ARPU, subscriber growth

Vallari Sanzgiri
Mumbai

The telecom sector is expected to enjoy a healthy quarter with brokerages anticipating good ARPU growth and subscriber additions, including Bharti Airtel and Vodafone Idea. Analysts have also postponed the tariff hike to mid-2027.

The telecom operators are expected to report around a 0.8 to 2 per cent sequential increase in ARPU led by 2G to 4G/5G migration, postpaid addition, and a higher number of days in the quarter. Airtel will also benefit from the discontinuation of lower-value packs, likely to encourage subscribers to upgrade to higher-value plans. However, the benefit will likely be limited to one month, as the tweaks were implemented in mid-August, with different frequencies/timelines of recharges also having an impact, said IIFL Capital.

TARIFF HIKE
In terms of subscriber adds, Airtel will continue to gain subscriber market share and is expected to report around 3 million India wireless subscribers sequentially. Meanwhile, Vi is expected to add around a million customers in the quarter.

"Data usage per customer would remain robust, led by growing penetration of 4G/5G networks. Airtel have covered over 95 per cent of districts with 5G services, and the focus is on adding more 5G devices to their network," said Centrum.

While brokerages seemed confident of a tariff hike by the end of calendar 2026, analysts are now pushing the timeline to mid-2027.

"The pricing environment has become more favourable with only 3+1 players, and we expect another 12-15 per cent tariff hike over the next 4 to 5 months," said Centrum. Meanwhile, JP Morgan pushed out tariff hikes from Q3 FY27 to Q1 FY28, leading to a cut in earnings estimates.

Analysts advise investors to focus on the impact of eliminating the entry-level plan by Airtel in August. For Vi, brokerages focus on the timeline for its ₹300-350 billion debt fundraise, capex plans for the coming year and 5G rollout plans.

IDBI Bank staff protest against Fairfax deal

Bloomberg

IDBI Bank Ltd employees started a two-day nationwide strike on Monday to protest against the planned privatisation of the lender, calling on the Centre to scrap the sale to Fairfax Financial Holdings Ltd.

More than 10,000 staff will participate in the agitation on November 2 and 3, according to a statement by the United Forum of IDBI Officers & Employees posted on social media platform X.

The strike comes just weeks after Canadian billionaire Prem Watsa-led Fairfax agreed to acquire a 60.72 per cent stake in IDBI Bank. The transaction will be the biggest foreign investment in India's financial services sector.

Binance customers pull out $4.7 billion after hack, but experts label figure as 'modest'

Reuters

Binance's customers have withdrawn almost $5 billion from the world's biggest crypto currency exchange since it reopened after a hack that saw $6.3 billion of crypto stolen from the platform in what could be the largest financial heist in history.

Customers have withdrawn a net $4.72 billion since a suspension was lifted on Sunday morning, a spokesperson said. The exchange froze withdrawals for about 48 hours after the hack, which the FBI said was carried out by North Korea.

Binance said the net outflow amounted to about 2.8 per cent of assets on the platform, a relatively modest figure that analysts said suggested customer confidence had largely held up.

The outflow compares with about $7 billion withdrawn from Circle's USDC stablecoin over a week after the collapse of Silicon Valley Bank in 2023.

SECURING PLATFORM
"Our top priority right now is to ensure the environment is secure, after which users can withdraw their funds and Binance can resume operations," Binance co-CEO Yi He said in a post on Xon Monday.

Trading volumes increased across the crypto market as investors grappled with what could be the biggest theft from a financial institution ever. The attack marks a step up in North Korea's crypto thefts. Blockchain analytics firm TRM Labs said North Korea-linked hackers have stolen $7.4 billion so far in 2026.

STABILISING
Binance said it was covering the losses with company funds and had already raised $6 billion from its corporate treasury, an insurance fund and reserves set aside for security breaches.

"It has not yet triggered widespread panic or a massive,concentrated withdrawal," said Tim Sun, a senior researcher at Hash Key Group, a company in Hong Kong.

Binance, which says it has more than 335 million users worldwide and average daily trading volumes of $95 billion across digital assets and derivatives, also sought to reassure customers. "After an initial spike, withdrawal volumes have declined and are stabilising," Binance said on X. A spokesperson said there had been $2.7 billion in inflows.

The FBI said on Saturday that the North Korean state-sponsored group Trader-Traitor was responsible for the attack. Researchers describe the group activities help fund the country's weapons programmes.
