Tata Sons AGM to take up Chandra reappointment

URVI MALVANIA
Mumbai, July 27

THE REAPPOINTMENT OF Tata Sons Executive Chairman N Chandrasekaran as a director will be among the key items on the agenda for the Tata Group holding company's annual general meeting (AGM) on August 18.

In its AGM notice issued on Monday, Tata Sons said its board believed that Chandrasekaran's "skills, experience and knowledge" and his continued association would "immensely benefit the company". The board has accordingly recommended his reappointment.

Chandrasekaran is due to retire by rotation at the AGM and, being eligible, has offered himself for reappointment as a director. His current term as executive chairman of Tata Sons runs until February 2027.

Chandrasekaran's continuation as a director would normally have been a procedural matter. This time, however, the vote comes against the backdrop of a regulatory dispute over the composition and functioning of the Sir Ratan Tata Trust (SRTT).

INFLATION FEARS EASE AS 70% OF SOWN AREA COVERED

Rain boost shrinks kharif sowing gap

SANDIP DAS
New Delhi, July 27

A NORMAL MONSOON in July, following a severely deficient June, has significantly boosted the sowing of kharif crops — including paddy, pulses, oilseeds, cotton and sugarcane — across the country, particularly over the past fortnight.

The improvement has somewhat eased concerns over a sharp spike in food prices. Consumer Price Index (CPI)-based inflation rose to an 18-month high of 4.38% in June, driven largely by higher food and fuel prices.

On Sunday, Finance Minister Nirmala Sitharaman said that apart from imported inflation stemming from elevated crude oil prices and their derivatives, a below-normal monsoon could also stoke inflationary pressures.

The total kharif sown area has reached 78.73 million hectares (Mha) so far, down 4.7% from a year ago. However, the gap has narrowed sharply from a 1.6% deficit recorded just a fortnight ago.

According to the agriculture ministry, sowing till July 24 covered more than 70% of the normal kharif area of 110 Mha. Officials said sowing activities are expected to continue until the end of August.

Rice, the country's principal kharif crop, has been sown over 23.44 Mha, marginally lower by 2.57% year-on-year. The average paddy sowing area is 41.2 Mha. At the beginning of July, paddy acreage was trailing last year's level by 13%. Improved rainfall in eastern and central India has helped

IMPROVING SITUATION

accelerate paddy transplantation over the past two weeks, an official said.

Pulses have been sown across 8.45 Mha, down 6.9% from a year earlier. A fortnight ago, pulse acreage was 23% below last year's level, largely due to deficient rainfall in central India until the end of June.

Tur (pigeon pea), the key kharif pulse crop, has so far been sown over 3.11 Mha, still more than 11% below last year's level because of delayed monsoon onset in Maharashtra and Karnataka.

"Sowing of pulses may not be impacted yet. The distribution of rainfall during August and September will be crucial for yields, especially for tur, which is a long-duration crop," Nitin Kalantri,

managing director of Latur-based Kalantri Food Products, told FE.

Cotton acreage is down 3.88% year-on-year at 9.87 Mha. Area under oilseeds — mainly soybean and groundnut — is lower by 3.45%, although rainfall in key producing states such as Gujarat and Madhya Pradesh has been adequate during July.

"The latest kharif sowing data points to a gradual recovery in the season, though the pace varies across crops. While rice and oilseeds have shown encouraging progress, pulses and coarse cereals continue to lag, reflecting persistent regional disparities in field conditions," said MK Dhanuka, chairman of agrochemicals major Dhanuka Agritech.

Power market coupling may face delay as Grid India flags risks

SAURAV ANAND
New Delhi, July 27

THE PROPOSED MARKET coupling of India's power exchanges could be delayed well beyond current regulatory expectations, with Grid India flagging unresolved concerns over the scope of implementation, software robustness, settlement mechanisms, cost allocation and the risk of a single point of failure, Indian Energy Exchange's (IEX) stated in their post-earnings analyst meeting.

"APTEL (Feb-2026) held that CERC's July-2025 coupling order was invalid absent IEX consent, and the matter is now before the Supreme Court. Grid India has itself raised unresolved concerns on scope, software robustness, single-point-of-failure and cost allocation — implement-

IMPLEMENTATION HURDLES

- Grid India flags concerns over implementation, software robustness
- It has also raised concerns on settlement mechanisms, cost allocation
- IEX's appeal against APTEL Feb 13 order is pending before SC
- CERC has completed a public hearing in June
- Final norms are yet to be notified. Even after notification, Grid India may require at least six months to build clearing technology

tation timeline pushed out, in management's view potentially years away," Axis Capital said in a report.

"IEX, at its Analyst Meet, flagged that market coupling uncertainty persists — final regulations could face legal challenges, and Grid India may need time to implement even when finalised," IIFL Capital

said in another report.

The issue has returned to the spotlight as IEX's appeal against the Appellate Tribunal for Electricity's (APTEL) February 13 order is pending before the Supreme Court, with the matter listed for hearing this week. While the Central Electricity Regulatory Commission (CERC) completed a public

hearing in June, the final norms are yet to be notified. Even after notification, Grid India may require at least six months to build clearing technology and operating procedures, while IEX could pursue fresh legal options.

Market coupling seeks common price discovery across power exchanges.

Tier-II cities drive rooftop solar rush

SAURAV ANAND
New Delhi, July 27

INDIA'S ROOFTOP SOLAR expansion is being driven by regional cities rather than the country's largest metros, with Lucknow and Nagpur each crossing the 100,000-installation mark. Surat, Ahmedabad and Rajkot completes the top five district markets.

The nationwide rollout has now crossed 4 million rooftop solar installations, covering nearly 4.9 million households and adding 14,416.51 MW of decentralised solar capacity. The Centre has disbursed ₹27,343.9 crore in subsidies so far, accounting for more than 36% of the ₹75,021-crore outlay for the PM Surya Ghar: Muft Bijli Yojana. The scheme is now about 137,000 households short of the

GOING GREEN

(July 27, 2026)

5-million beneficiary milestone.

Lucknow leads the district rankings with 124,387 installations, followed by Nagpur with 101,560. Surat has recorded 93,886 installations, Ahmedabad 87,764 and Rajkot 83,689,

according to the latest data from the Ministry of New and Renewable Energy. The rankings underscore the growing role of state capitals, industrial hubs and tier-II cities in the Centre's drive to solarise 10 million

households.

At the state level, Gujarat remains the largest market with 766,278 installations, followed by Uttar Pradesh with 703,661 and Maharashtra with 692,853. Together, the three states account for 2,162,792 installations, or more than 53% of the national total.

Kerala has emerged as a key southern market, ranking fourth with 305,977 installations. Rajasthan rounds out the top five with 272,818 systems. Collectively, the five leading states account for 2,741,587 installations, representing nearly 68% of the nationwide total. While the figures underscore the scale achieved by the early adopters, they also point to growth potential in states that have yet to match the pace of the leaders.

LIBERALISATION: 35 YEARS HENCE

THE 1991 ECONOMIC reforms have accelerated India's growth, underscoring the salience of an open, optimally deregulated economy. Several indicators, such as exports, investments, and foreign exchange reserves rose at rates faster than the GDP thanks to the large-scale policy liberalisation undertaken 35 years ago. Tax buoyancy has improved significantly but tax-GDP ratio (~18% for Centre and States combined) needs to rise further for government budgets to be large enough. Policy directions will need recalibration to ensure growth is inclusive and faster. The much-feared middle-income trap can be avoided only by strengthening growth impulses adequately and

without delay. Public spending on education, healthcare, and assured infrastructure sectors requires more impact. Structural reforms should promote entrepreneurship, ease of doing business and reduce logistics costs. Policies must aid the growth of MSMEs and ensure competition. Manufacturing needs more incentives to diversify across labour-intensive and new-age tech-driven sectors. Adequate wages and reasonable social security cover for workers are critical for raising purchasing power. Capital allocation must be more productive. Public resources ought to be apportioned in the right spirit of cooperative federalism.

Global demand fuels recovery in cotton yarn biz

FE BUREAU
New Delhi, July 27

INDIA'S COTTON YARN industry is poised for a strong recovery this fiscal, driven by a revival in global demand, easing trade disruptions and widening profit margins, according to a study by Crisil Ratings.

After remaining largely flat last fiscal, industry revenue is expected to grow 9-11% in FY27, the rating agency said in an analysis of 70 spinning companies. The rebound will be driven by a 6-8% increase in yarn realisations and a 2-4% rise in sales volumes.

Overseas shipments are expected to be the primary engine of this growth. Export revenues are expected to surge 12%-14%, increasing exports' share in total industry revenue to around 31% from 28% in the previous fiscal.

A sharp increase in shipments to China — India's second-largest cotton yarn market — is providing significant tailwinds as lower Chinese domestic cotton acreage forces higher import reliance. Mean-

while, demand from Bangladesh, the top destination for Indian yarn, is bouncing back as improving political stability revives its vital ready-made garment sector.

"Exports are expected to be the key growth engine for cotton yarn makers this fiscal," said Ankush Tyagi, director, Crisil Ratings.

The domestic market, which accounts for the remaining 70% of revenue, is also forecasted to grow by 7%-9%. Demand is picking up across downstream sectors such as home textiles and apparel, bolstered by the rationalisation of US tariffs from last year's highs.

The industry also remains largely insulated from the direct impact of the West Asia conflict because of its limited exposure to the region and negligible dependence on crude-linked inputs.

This surge in demand is giving spinners the pricing power needed to offset rising input costs. Despite an estimated 10%-15% increase in raw cotton prices, cotton-yarn spreads are expected to reach ₹108-110 per kg.

House panel calls for JVs to contain fertiliser import costs

SANDIP DAS
New Delhi, July 27

TO REDUCE THE impact of global fertiliser price fluctuations due to geopolitical disruptions, a Parliamentary Standing Committee on Chemicals and Fertilisers on Monday recommended more long-term agreements and joint venture projects with countries rich in fertiliser raw materials, particularly phosphorus (P) and potassium (K).

"The dependence exposes the country to global market shocks, exchange rate fluctuations and delicate geopolitical situation which also affect the optimal operation of fertiliser plants to their installed capacity," the panel noted in its report submitted in Lok Sabha.

The committee recommended that the government forge strategic partnerships to

■ About 50-60% of domestic requirements of Di Ammonium Phosphate are met via imports

secure access to fertiliser raw materials abroad, ensuring supply chain stability at the most competitive rates, thereby avoiding price volatility.

The panel also urged the Department of Fertilisers to acquire phosphate mines overseas, particularly in Jordan,

Morocco and South African countries, to ensure seamless availability of fertiliser raw materials. The panel expressed concern that domestic fertiliser production capacity has failed to keep pace with rising demand, resulting in higher import dependence.

India imported 28 million tonne (MT) of fertilisers in FY26 against total consumption of more than 70 MT. During the fiscal, the country imported 10 MT of urea out of total consumption of around 40 MT. In addition, nearly 80% of the liquefied natural gas (LNG) used as

feedstock for urea production was imported.

The panel has noted that India, the second largest consumer and third largest producer of various variants of fertiliser, has so far achieved 80% self-sufficiency in production capacity in urea. However, the

FOURFOLD SURGE IN PEOPLE WITH ₹100-CR+ INCOME

THE NUMBER OF individuals with gross total income of ₹100 crore or more have increased four-fold in the five years through FY25, the finance ministry told Lok Sabha on Monday. In FY25, 576 individuals reported gross total income of ₹100 crore or more, compared with 415 in the previous fiscal, an y-o-y growth of 39%. In contrast, India's real GDP grew 7.1% in FY25, nominal GDP by 9.7%.

CBDT's crypto reporting norms to aid transparency

SHUBHAM RANA
New Delhi, July 27

THE NEW GUIDANCE norms by the Central Board of Direct Taxes (CBDT) on the adoption of the Crypto-Asset Reporting Framework (CARF) provide operational clarity and will bring in transparency, experts said. The CBDT has issued a guidance note for the adoption of the CARF, developed by the Organisation for Economic Co-operation and Development (OECD) to extend global tax transparency standards to crypto-asset activities.

The note gives guidance to Reporting Crypto-Asset Service Providers (RCASPs) for compliance with the reporting obligations under section 509 of the Income-tax Act, 2025, and under Rules 241 to 244 and Form 167 of the Income-tax Rules, 2026. "The guidance note is a timely step in operationalising India's crypto-asset reporting framework and is aligned with the OECD's CARF standards," said Richa Sawhney, partner — Tax, Grant Thornton Bharat. Sawhney said the note provides practical guidance to

RCASPs on their obligations under the Income-tax Act and Rules, and addresses the key facets of implementation, including scope, due diligence, reporting requirements, filing process and penalties.

Under the CARF, crypto exchanges are required to report eligible crypto transactions annually. Experts said this is only a reporting compliance update, not a regulatory measure. "Importantly, it is a tax transparency and information-reporting measure, not a broader regulation of the legitimacy or permissibility of crypto-asset transactions," Sawhney said.

In India, cryptocurrency operates in a grey area with no government policy on either banning or regulating such assets.

AIR INDIA REMAINS BIGGEST LOSS-MAKER FOR THE GROUP

One-off gains drive 22% jump in Tata Sons' PAT

Dividend income falls for only third time in a decade as TCS payout declines

URVI MALYANIA
Mumbai, July 27

TATA SONS ON Monday reported a 21.8% rise in profit after tax (PAT) for FY26, aided largely by one-time gains from the sale of investments and securities, even as losses at its long-gestation businesses such as Air India, Tata Electronics and Tata Digital continued to weigh on earnings, according to the holding company's annual report.

PAT rose to ₹31,961 crore in FY26 from ₹26,231.74 crore a year ago, despite a 10% decline in dividend income to ₹32,528.36 crore. The increase in profit was driven by a sharp jump in other income to ₹6,798.18 crore from ₹124.88 crore in FY25, largely due to a ₹6,530.64-crore gain from the sale of investments, buyback of securities and premium received on redemption of debentures. Revenue for the Tata Group holding company rose 9.1% to ₹42,366.55 crore during the year.

The decline in dividend income marked only the third such fall in the past decade, with all three instances coinciding with lower dividend payouts from Tata Consultancy Services (TCS), Tata Sons' largest source of dividends. Dividend receipts

from TCS fell to ₹28,290.94 crore in FY26 from ₹32,184.19 crore in the previous year.

While dividends from mature businesses continued to underpin Tata Sons' earnings, the group's newer bets in semi-conductors, digital commerce and aviation remained in investment mode.

Air India remained the group's biggest loss-making business, reporting revenue of ₹71,870 crore and a net loss of ₹22,238 crore in FY26 as the airline continued its multi-year transformation. Tata Digital posted revenue of ₹35,990 crore and a net loss of ₹4,974 crore, while Tata Electronics' revenue was ₹1,31,082 crore with a net loss of ₹1,611 crore.

In his message to shareholders, Tata Sons Chairman N Chandrasekaran said the group's investments in aviation, semiconductors and digital

businesses should be viewed as long-term institution-building efforts rather than near-term financial bets.

Highlighting the progress at Tata Electronics, Chandrasekaran said it had, in just four years, become the fourth-largest Tata Group company by revenue and was on track to become India's first integrated player across the electronics value chain. He said operating profits had reached breakeven and pointed to milestones including the construction of India's first high-volume semiconductor fabrication facility at Dholera, packaging of the country's first indigenous micro-processor and development of capabilities across semiconductor manufacturing, advanced packaging and materials.

On Tata Digital, Chandrasekaran said the company had navigated an e-commerce

market reshaped by the rapid rise of quick commerce. Despite continuing losses, the business had scaled to a gross merchandise value (GMV) of ₹46,515 crore in four years. He said Tata Neu would now sharpen its focus on financial services, with plans to increase monthly payments users tenfold while expanding its lending and insurance offerings.

Referring to Air India, Chandrasekaran described FY26 as the airline's most challenging year, citing airspace closures, higher fuel prices, foreign exchange volatility and the AI171 crash. The carrier nevertheless made progress on fleet refurbishment, customer experience and operational performance, adding that rebuilding Air India would be a long-term effort spanning fleet renewal, training, service transformation and network expansion.

Tata Chem profit plunges 81%; total income jumps

TATA CHEMICALS ON Monday reported an 81% decline in consolidated net profit to ₹60 crore for the quarter ended June on higher expenses.

Its net profit stood at ₹316 crore in the year-ago period.

The company's total income rose to ₹4,311 crore in the first quarter of this fiscal from ₹3,815 crore in the corresponding period of the preceding year, according to a regulatory filing.

Tata Chemicals pointed out that its profit after tax declined in the June quarter "primarily due to lower realisations, reduced other income, and lower JV (joint venture) income."

Commenting on the results, Tata Chemicals Managing Director and CEO R Mukundan said the company delivered a resilient performance in the quarter, aided by higher sales and production volumes, strong operating efficiencies and disciplined cost management.

SUNIL D'SOUZA, MD & CEO, TATA CONSUMER PRODUCTS

'No rush to do acquisitions, focus is on execution'

Tata Consumer's growth businesses, including Capital Foods, Organic India, Tata Sampann, Soufull and ready-to-drink beverages, now account for 36% of its India business, up from 31% in FY26 and 28% in FY25. This could go up to 40-45% over the next three years, Managing Director and CEO Sunil D'Souza told Viveat Susan Pinto in an interaction. He also discussed the company's growth strategy, margin outlook and inflation risks for the year. Excerpts:

continue to evaluate opportunities, but our priority is delivering on Capital Foods and Organic India in terms of our targets. There is no rush for acquisitions, the focus is on execution. We will look at inorganic opportunities, but only if these make strategic and financial sense. We are considering adding capabilities in health, wellness and nutrition.

Inflationary pressures are building again. Where are you seeing the biggest impact on the business?

Fuel and packaging are the biggest pressure points. If fuel prices remain elevated, inflation will eventually flow through the supply chain. We've already seen higher coal costs and currency-related pressure in the salt business,

which required a price increase. If this trend continues, there will be further pricing action this year. The biggest variable in our business is inflation. Government measures and easing food inflation have supported consumption in recent quarters. But if higher crude prices lead to sustained downstream inflation, discretionary spending could come under pressure.

How do you see FY27 shaping up? Will volume or price growth drive revenue growth?

We will continue to target double-digit revenue growth this year. We've also guided for 50-70 basis points of Ebitda (earnings before interest tax depreciation and amortisation) margin expansion this year. India delivered 13% underlying volume growth in the June quarter. If inflation persists, pricing will become a bigger contributor to top line growth, but ultimately our job is to deliver growth while protecting profitability.

Quick commerce has become meaningful to your business. What's driving its growth?

Quick commerce and e-commerce together now contribute 21% of our sales, compared with 15.5% a year ago. Our philosophy has been simple—we will be where the consumer is. We invested early, built capabilities ahead of the curve and today hold leadership positions in several categories on these platforms. Quick commerce also enables us to test products, promote and price them much faster before scaling them through offline channels.

WE'LL CONTINUE TO TARGET DOUBLE-DIGIT REVENUE GROWTH THIS YEAR

Tata Power Q1 profit up 11%

RAGHAVENDRA KAMATH
Mumbai, July 27

TATA POWER ON Monday reported an 11% year-on-year rise in consolidated net profit to ₹1,176 crore for the first quarter of FY27, marginally beating analysts' estimates, driven by steady operational performance across businesses.

The company had posted a net profit of ₹1,060 crore in the year-ago quarter. Analysts had estimated profit at around ₹1,144 crore.

Revenue from operations rose 5.6% to ₹19,051 crore during the April-June quarter from ₹18,035 crore a year earlier, surpassing analysts' estimate of ₹18,549 crore.

However, Ebitda declined 3% year-on-year to ₹4,013 crore from ₹4,139 crore in the corresponding quarter last year, although it was higher

Commercial real estate lending by NBFCs may retain momentum

RAGHAVENDRA KAMATH & MANJU AB
Mumbai, July 27

LENDING TO COMMERCIAL real estate is set to remain robust, driven by record office leasing, the expansion of global capability centres (GCCs) and data centres, and lenders' growing preference for organised developers with stronger balance sheets.

Bank and non-bank financing to the sector has already accelerated sharply. Reserve Bank of India data show that NBFC (non-bank finance companies) loans to commercial real estate jumped 40.2% year-on-year to ₹1.20 lakh crore at the end of May 2026, compared with growth of 10.2% in the year-ago period. Bank credit to the sector rose 19% to ₹6.42 lakh crore, up from 15% growth a year earlier.

The momentum reflects

both rising demand for office space and a structural shift in the real estate market. Consolidation among developers and greater financial discipline following the implementation of the Real Estate (Regulation and Development) Act, or RERA, have made lenders more comfortable increasing their exposure. Developers are also refinancing costlier bonds with relatively cheaper bank loans.

"All the big groups are in the market today and bank funding is rising," said Niranjan Hiranandani, managing director of Hiranandani Group.

GCCs are emerging as a particularly important driver of office demand. According to real estate consultant Colliers India, the number of GCCs in the country is expected to cross 4,000 by 2030, from 2,100 at the end of 2025. In the first half of 2026, GCCs accounted for 46% of total office leasing

ATTRACTIVE VENTURE

India office market trend and outlook

across Mumbai, Bengaluru, Hyderabad, Delhi-NCR, Pune, Chennai and Kolkata.

"Banks are increasing their exposure as large groups such as the Tatas, Godrej and I&T are in the field, and this trend will continue," said Promod Kumar Dwivedi, ED, Bank of India. "RERA provides an added comfort. Banks and NBFCs that burnt

their fingers on high-yielding, unsecured loans will see this segment as an opportunity."

Developers expect organised commercial real estate to maintain its recent annual growth rate of around 12%, supported by demand for Grade-A properties and flexible workspaces.

"Around 20% of the additional space being created is for

flexible-office operators such as WeWork and Smartworks. Add to that the huge demand for Grade-A office space, and we expect the momentum to continue," Hiranandani said.

Office leasing touched a record 83 million square feet in 2025, while the completion of fresh assets also expanded financing opportunities. Con-

struction loans for completed and leased properties are increasingly being converted into lease rental discounting (LRD) facilities, which are backed by rental income.

"2025 was a bumper year for office leasing, and fresh pools of assets were completed. There was a significant increase in banks' loan books as construc-

tion finance was converted into LRD loans," said Vishal Srivastava, head of corporate finance and managing director at Anarock Capital. "After its IPO, Tata Capital has also started signing larger financing deals."

Completed office buildings, data centres and logistics properties are attracting lenders because of their high occupancy and predictable cash flows. Lower bond yields and an easing interest-rate cycle have also prompted some real estate companies to refinance existing borrowings. "Some commercial real estate entities are tapping banks and financial institutions to refinance bonds that are coming due," said R Srinivasan, vice-president and sector head, financial sector ratings, ICRA. "Refinancing opportunities after the transition from construction-stage funding also remain healthy, particularly for completed office, data-centre

and logistics assets with strong occupancy levels."

NBFCs, meanwhile, see greater opportunities following the consolidation of the sector around developers with stronger balance sheets and better execution records.

"With RERA, there is much more discipline in the market, while consolidation has resulted in fewer developers with stronger balance sheets and greater efficiency. Lenders are, therefore, becoming more confident about the sector," said Jairam Sridharan, MD and CEO, Piramal Finance.

Piramal Finance disbursed ₹1,200 crore during the June quarter and received repayments of an equivalent amount. "RERA has ensured that repayments flow through the appropriate accounts, helping builders meet their loan obligations in an orderly manner," Sridharan said.

FIRM IS TARGETING \$3-BILLION LISTING NOW

Zepto halves IPO valuation amid investor pushback

ANEES HUSSAIN
Bengaluru, July 27

QUICK COMMERCE FIRM Zepto has begun discussions with investors to launch its initial public offering (IPO) at a post-money valuation of about \$3 billion (₹29,000 crore)—less than half the roughly \$7 billion (₹60,000 crore) valuation it commanded just nine months ago. The sharp reset follows resistance from large domestic institutional investors to the pricing the company had initially sought, people familiar with the matter said.

The company is targeting a pre-money valuation of around \$2.5 billion (₹24,000 crore) for the issue, the people added.

At this valuation, Zepto is expected to raise around ₹5,000 crore through a primary issue, along with a relatively small offer-for-sale (OFS) component.

The anchor book is likely to be around ₹2,300 crore, while the institutional portion is expected to be about ₹1,530 crore.

The high-net-worth individual (HNI) segment could account for ₹766 crore, with the retail portion pegged at ₹511 crore, the people said.

The final structure of the IPO will depend on investor feedback, they added.

Led by co-founder and chief executive officer Aadit Palicha, Zepto received the Securities and Exchange Board of India (Sebi)'s approval for its IPO in April. The company last raised \$450 million in October 2025 from investors, including US pension fund CalPERS, at a valuation of \$7 billion.

The proposed issue is significantly smaller than what Zepto had outlined in its updated draft red herring prospectus (UDRHP) filed last month. The filing proposed a

■ Anchor book likely to be around ₹2,300 cr
■ Institutional portion expected to be about **₹1,530 cr**

■ HNI segment could account for ₹766 crore, with retail portion pegged at **₹511 crore**

■ Final structure of IPO to depend on investor feedback

■ Firm last raised **\$450 mn** in October 2025 from investors

■ Proposed issue significantly smaller than what Zepto had outlined in its UDRHP filed last mont

fresh issue of up to ₹8,010 crore, along with an offer for sale of up to 113.47 million shares by existing investors, including Nexus Ventures, Contrary, Razor Ventures and entities linked to Kaiser Permanente.

The valuation reset comes after domestic mutual funds and insurance companies pushed back against Zepto's expectations, seeking a valuation 30-40% lower than the \$4-5 billion range the company had already indicated it was willing to accept—a sharp markdown from its \$7-billion peak. At the centre of the disagreement is the valuation benchmark.

According to the people, Zepto wanted its IPO to be valued in line with listed peers Eternal and Swiggy. However, investors argued that the comparison was inappropriate because, unlike its rivals, Zepto does not operate a food delivery business, which accounts

for a significant portion of their revenues and market valuations.

Zepto's business is focused entirely on quick commerce, including groceries, electronics and other daily essentials.

Investor caution towards new-age technology listings has also intensified following the weak post-listing performance of several recent IPOs. Swiggy, which debuted in November 2024, is still trading about 35% below its IPO price of ₹390.

Bankers and one of Zepto's key investors are now working to bridge the valuation gap by persuading institutional investors to meet the company halfway. They have also stepped up efforts to secure commitments from high-net-worth individuals and large family offices, the people said. Zepto did not respond to an emailed request for comment until the time of going to press.

UltraTech Cement eyeing its biggest rupee bond raise

REUTERS
Mumbai, July 27

ULTRATECH CEMENT IS in talks with merchant bankers and arrangers to raise what would be its biggest rupee bond funding, two bankers aware of the matter said on Monday, as it seeks to tap debt markets ahead of the central bank's policy decision next week.

The country's largest cement producer by capacity plans to raise an aggregate ₹5,000 crore (\$517.80 million) through bonds maturing in two-and-a-half years, three-and-a-half years and five years, the sources said requesting anonymity as the talks are still private.

It is targeting ₹1,500 crore each in the shorter two

tranches at annual coupons of 7.22% and 7.23%, respectively, and ₹2,000 crore in the five-year tranche at 7.25%.

The bankers said UltraTech aimed to complete the sale before the Reserve Bank of India's monetary policy decision on August 5.

The company did not respond to a Reuters email seeking comment outside regular business hours.

The bonds are rated AAA by Crisil and may attract demand from mutual funds seeking high-quality credit, the bankers said.

In March 2025, UltraTech raised ₹1,000 crore each through three-year and five-year bonds at an annual coupon of 7.34%.

It has ₹3,500 crore of bonds outstanding.

Kiran Thadimarri to succeed Gaurav Negi as IndiGo CFO

NITIN KUMAR
New Delhi, July 27

THE BOARD OF Inter-Globe Aviation, the parent of IndiGo, on Monday appointed Kiran Thadimarri as its chief financial officer (CFO), replacing Gaurav Negi, who has been redesignated as advisor to the Managing Director Rahul Bhatia.

Negi stepped down as CFO at the close of business hours on July 27 and will assume his new role as advisor to the managing director. Thadimarri, currently the deputy CFO, will take over as CFO and key managerial personnel from July 28, the company said in a regulatory filing.

The airline did not specify the reason for the management reshuffle, saying only that Negi was transitioning to the advisory role and Thadi-

marri was being elevated from deputy CFO's role.

A chartered accountant, Thadimarri has more than 24 years of experience in finance, spanning controllership, financial planning and analysis (FP&A), business finance, treasury, capital raising, audit, taxation and investor relations.

Before joining IndiGo, he held leadership roles at Inter-Globe Enterprises, business-to-business e-commerce platform Udaan, where he served as finance leader, and Gen-

Meesho arm's in-house logistics push plateaus

FE BUREAU
Bengaluru, July 27

THE SHARE OF Meesho's orders handled by its in-house logistics arm, Valmo, has remained at around 50% for three consecutive quarters, suggesting the e-commerce platform's push to internalise deliveries may have reached a plateau.

On the company's post-earnings call, Chief Financial Officer Dhiresb Bansal declined to indicate whether Valmo's share would rise further. "There is no specific guidance on what Valmo's share would be at any point in time," he said.

Valmo's share has remained broadly unchanged since peaking at over 60% around the middle of last year, when it briefly overtook Delhivery as the largest carrier of Meesho's shipments.

DHIRESB BANSAL,
CFO, MEESHO

There is no specific guidance on what Valmo's share would be at any point in time

The shift marks a change in the company's narrative. Since its launch in February 2024, Valmo rapidly expanded from handling just 2% of Meesho's shipments in FY23 to around half by December 2024.

When Meesho filed for its initial public offering (IPO) late last year, it positioned Valmo as a key competitive differentiator. Its rise beyond the 60% mark had fuelled expectations that Meesho would continue increasing insourcing, moving closer to the captive logistics networks of Amazon and Flipkart, which JM Financial estimates handle 85-90% of their shipments internally. Instead, Valmo's share has flattened.

Meesho now presents the platform less as a vehicle for progressively taking over deliveries and more as a tool to benchmark logistics costs and keep third-party delivery partners competitively priced.

The plateau also lends support to a long-held view among third-party logistics players that captive delivery networks are structurally more expensive than independent logistics providers.

Maruti eyes broader EV, SUV lineup

AKBAR MERCHANT
Mumbai, July 27

MARUTI SUZUKI IS preparing a major expansion of its electric vehicle (EV) and SUV portfolios, with plans to introduce EVs across nearly every passenger vehicle (PV) segment while evaluating a new compact SUV below the Brezza to strengthen its presence in the fast-growing entry-level SUV market.

Speaking to FE, Partho Banerjee, senior executive officer, marketing & sales, Maruti Suzuki India, said the firm's EV strategy extends well beyond the upcoming eVitara, which will mark Maruti's entry into the battery electric passenger vehicle segment.

"In the EV segment also, we are going to launch models across all segments. There is something above the eVitara, and there will be a play below it as well," Banerjee said.

While declining to comment on specific future products, his remarks suggest Maruti is preparing a multi-product EV offensive spanning a wide range of price points.

Asked whether the company was working on a more affordable EV below the eVitara, Banerjee said, "I have read the reports, but I have no comments to offer on that. If I can say one thing, it is that we will have an EV in almost all segments."

Sources told the FE that Maruti is developing an all-new three-row electric MPV, internally codenamed YMC, which is expected to go on sale in the coming months.

The firm is also exploring smaller, more affordable EVs below the eVitara to broaden its electric portfolio and lower the entry price for prospective buyers. The aggressive EV roadmap comes as demand gathers pace.

As per the latest Federation of Automobile Dealers Associations (FADA) data, electric passenger vehicle retail sales more than doubled year-on-year to a record 31,823 units in June.

GOLD, SILVER REBOUND, MAKE STRONG GAINS

GOLD PRICES REBOUNDED by ₹2,440 to ₹1.49 lakh per 10 gram while silver prices climbed ₹5,300 to ₹2.3 lakh per kg on Monday following strong trends in global markets. Traders said both the precious metals gained after two consecutive sessions of losses amid easing inflation concerns as crude oil prices retreated. "Gold gained on Monday as easing tensions in West Asia triggered a sharp decline in crude oil prices, easing inflation concerns, while a weak US dollar and lower Treasury bond yields provided further support for bullion," said Saumil Gandhi, senior analyst - commodities at HDFC Securities. Gains in the domestic market remained limited as the rupee strengthened against the US dollar.

WARNING LETTERS ALSO ISSUED IN MSRDC DEPOSIT CASE

HDFC Bank board fines CEO, CFO for ‘business overreach’

KSHIPRA PETKAR
Mumbai, July 27

HDFC BANK’S BOARD has issued warning letters to Managing Director and CEO Sashidhar Jagdishan, Chief Financial Officer Srinivasan Vaidyanathan and Group Head-Retail Assets Arvind Vohra, and imposed a monetary penalty of ₹1 lakh each, the bank informed the stock exchanges on Monday.

The board concluded that their conduct in connection with the Maharashtra State Road Development Corporation (MSRDC) deposit arrangements amounted to “business overreach” rather than any mala fide action or personal enrichment.

However, the bank said the warning letters and penalties were issued “keeping in view any potential divergence” from applicable Reserve Bank of India (RBI) directions, and based on the recommendations of the special disciplinary committee of independent directors.

The disclosure, it added, was being made from a good governance perspective.

The action follows an internal review of arrangements with MSRDC for mobilising deposits in 2017 and 2021.

“The conduct of the employees involved constituted business overreach rather than any mala fide action, personal enrichment, or improper motive,” the bank said. The remaining employees identified

in the review will also receive warning letters, it added.

The board further directed that the matter be communicated to the Reserve Bank of India. In May, *The Indian Express* reported that the private-sector lender had allegedly disguised ₹45 crore in interest payments to MSRDC as marketing expenses.

Following the report, HDFC Bank told the stock exchanges on May 28 that HDFC had denied any wrongdoing, saying it had robust internal oversight, audit & control processes and all issues were dealt with in accordance with the established norms.

Recently, three US law firms launched investigations into HDFC Bank over possible violations of US federal securities laws. The firms — the Law Offices of Frank R. Cruz, the Law Offices of Howard G. Smith, and Glancy Prongay Wolke & Rotter LLP — said investors who suffered losses in HDFC Bank securities could contact them regarding potential claims.

Responding to the development, the bank said, “In the United States, it is common for plaintiffs’ law firms to issue

press releases like these in an effort to identify a potential plaintiff after a decline in a company’s stock price. We wish to confirm that no lawsuit has been filed and if a lawsuit is filed, the Bank intends to vigorously defend itself.”

This comes after another independent legal review found no evidence or record to support the ethical and governance concerns raised by former chairman Atanu Chakraborty when he resigned in March 2026.

Shares of HDFC Bank closed 0.4% lower at ₹739.55 on the BSE on Monday.

Biggest single-day gain for rupee in nearly 2 months

CHRISTINA TITUS
Mumbai, July 27

THE RUPEE LOGGED its biggest single-day gain in nearly two months on Monday, buoyed by a sharp fall in crude oil prices and intervention by the Reserve Bank of India (RBI), dealers said.

The domestic currency appreciated 67 paise to close at 95.89 against the US dollar, its strongest one-day gain since June 5, when the RBI had announced its last monetary policy.

Brent crude prices tumbled more than 9% to \$87.60 a barrel after the US and Iran paused hostilities and initiated peace talks, easing concerns over oil supply disruptions. Traders also said the RBI sold dollars in the spot market, lending further support to the rupee.

“The fall in oil prices, along with RBI intervention, contributed to the rupee’s gains today. Sentiment also improved after the RBI’s comments on inflows through its recent forex measures,” said Dilip Parmar, research analyst at HDFC Securities.

The rupee emerged as the best-performing Asian currency on Monday. Despite the rally, it has depreciated 6.7%

RISES 67 PAISE

against the dollar so far in the current calendar year.

Market sentiment was also aided by strong inflows under the RBI’s foreign exchange mobilisation measures. RBI Governor Sanjay Malhotra told a news agency that banks have mobilised nearly \$32 billion through the recent mea-

sures, with the bulk coming via FCNR(B) deposits.

“What is important is the pattern of these schemes. Historically, the surge comes in the final phase, in the last few weeks before the window closes at the end of September,” said Anindya Banerjee, head of currency and commodity research at Kotak Securities.

He added that if the current run rate holds and that end-phase surge materialises, total inflows can comfortably reach \$50-60 billion.

“That would provide significant ammunition to the RBI, although the extent of support for the rupee will depend on how much of these inflows the central bank allows into the spot market instead of absorbing them into its foreign exchange reserves,” he said.

Parmar said crude oil prices would remain the key driver for the rupee in the near term. “Geopolitical uncertainty continues to weigh on the currency. However, concerns over forex flows have eased somewhat as inflows have remained encouraging so far,” he said, adding that the rupee is expected to trade in the 95.50-96.30 range in the near term.

Yield plunges most in two months as oil rally falters

REUTERS
Mumbai, July 27

GOVERNMENT BONDS RALLIED on Monday, driving the benchmark yield to its steepest one-day drop in two months, amid a sharp decline in crude oil prices after US-Iran strikes were suspended, fuelling hopes of a diplomatic resolution. The benchmark 6.94% 2036 bond yield ended at 6.7739%, down from a closing level of 6.8253% on Friday and erasing last week’s rise.

Lower oil prices are likely to ease inflationary pressures and give the Federal Reserve greater policy flexibility ahead of its rate decision on Wednesday. Interest rate futures imply a 66% probability of a status quo in this meeting, with the market widely expecting a rate hike in September. The 10-year Treasury yield eased to 4.64%.

Capital Economics’ analysts said monsoon rainfall has so far been weak and could add to inflation risks if conditions do not improve.

Overnight index swap rates plunged, as a sudden move in oil prices led to the unwinding of recent aggressive paid positions. The one-year swap rate ended at 5.90%, while the two-year rate closed at 6.07%.

‘Aim to raise \$150 mn through FCNR (B) and overseas borrowings’

DCB Bank is targeting to mobilise \$150 million through FCNR(B) deposits and overseas foreign currency borrowings by September. Managing Director and CEO Praveen Kutty speaks to Kshipra Petkar about the lender’s growth strategy and funding plans. Excerpts:

How much have you mobilised under the FCNR (B) deposit scheme?

Internally, we have set a target of \$150 million by September through a combination of FCNR (B) deposits and OFCB (overseas foreign currency borrowing). We have seen a good start, with inflows largely coming from existing customers in the US, Western Euro-pe, the Gulf and Singapore.

Are you planning to leverage partnerships with other

WE BELIEVE SUSTAINING 18–20% LOAN GROWTH IS ACHIEVABLE ALONGSIDE 6–7% ECONOMIC GROWTH

Loan growth was 17% year-on-year, but remained flat sequentially. What led to the slower momentum during the quarter?

We had consciously built-up liquidity, anticipating a larger economic impact from the West Asia conflict. This supported 20% deposit growth in the June quarter, but weighed slightly on margins. We also sold around ₹300 crore of loans through IBPC, reducing reported advances. With a comfortable credit-deposit ratio of 80.4%, we are now well positioned to accelerate loan growth.

How do you see margins evolving?

NIMs were affected by seasonality due to the day count convention, but the broader trajectory will be driven by funding costs. Our cost of deposits declined by 14 bps sequentially in Q1 and had fallen consistently over the last five quarters. Improving asset quality and lower interest reversals should support margins, and we expect full-year NIM of around 3.4%.

Crude crash sparks relief rally

EQUITY BENCHMARKS LOG 1% GAIN

Nifty Intra-day on (₹), July 27

● **Indices snap five-day losing streak; investors richer by ₹5.1 L cr**

KISHOR KADAM
Mumbai, July 27

THE BENCHMARK EQUITY indices rebounded nearly 1% on Monday, snapping a five-session losing streak, as Brent crude prices plunged nearly 10% (about \$9) to \$87.6 a barrel after the US paused its strikes on Iran. A sharp 67-paise appreciation in the rupee against the US dollar further lifted investor sentiment.

The Sensex surged 776.01 points, or 1.02%, to close at 76,835.78, while the Nifty advanced 228.50 points, or 0.96%, to settle at 23,995.95.

The rally added ₹5.10 lakh crore to investors’ wealth, taking the BSE’s total market capitalisation to ₹480.80 lakh crore.

“Investors cheered the sharp fall in global crude oil prices, triggering a strong rally in Indian equities after five consecutive sessions of decline. Recovery in global markets and the rupee’s appreciation against the dollar also spurred buying in IT, banking and realty stocks,” said Ankur Punj, managing director and business head, Equirus Wealth.

“Indian equities are witnessing a short-term relief rally as easing tensions in West Asia and the consequent decline in crude

oil prices have provided interim support. Going forward, geopolitical developments and the trajectory of crude prices will remain the key drivers for the market,” said Siddhartha Khemka, head of research, wealth management, Motilal Oswal Financial Services.

Market breadth was firmly positive, with 2,779 stocks advancing against 1,579 declining on the BSE. The BSE Midcap and Smallcap indices outperformed the benchmarks, rising 1.15% and 1.31%, respectively.

According to provisional exchange data, foreign portfolio investors (FPIs) sold shares worth ₹1,688.23 crore, while domestic institutional investors (DIIs) bought shares worth ₹2,329.14 crore.

Monsoon risks, geopolitical uncertainties call for status quo

■ ADITI NAYAR

THE UPCOMING MEETING of the Monetary Policy Committee (MPC) in early August is keenly awaited, as multiple global and domestic developments have taken place since the last meeting in June. The main conundrum faced by the MPC is whether to continue with the “wait-and-watch” approach given the persistent uncertainty from everlasting West Asia tensions, or to hasten to turn the tide towards restrictive monetary policy, amid growing first

round inflationary risks from El Nino and high crude oil prices.

The year-on-year (YoY) CPI inflation hardened from 3.5% in April 2026 to 3.9% in May and further to 4.4% in June, reflecting the passthrough of elevated global energy prices via fuel price hikes, and higher inflation for edible oils, ready-made food items and restaurants. Nevertheless, the stricter measure of core CPI inflation (CPI excluding food & beverages, fuel & light, petrol, diesel and jewellery) remained at comfortable levels (2.4%/2.5% in May/June 2026), suggesting that demand pressures were largely subdued. This offers the chief support towards an extended pause on the monetary policy front.

Having said that, the southwest monsoon has been defi-

cient and rather erratic so far, fuelled by the developing El Nino conditions. After recording a large deficit of 40% from normal levels in June 2026 (steepest in 12 years), rainfall picked up in July, trending at 102% of the long period average (LPA) during July 1-26. Consequently, the cumulative rainfall stood

15% lower than LPA during June 1-July 26, 2026.

Benefitting from surplus rains, the YoY contraction in kharif sowing narrowed materially to 4.7% up to July 24, from as high as ~21% till July 5, 2026.

GDP growth had eased somewhat to 7.8% in Q4FY26 from 8.0% in Q3, while remain-

ing robust amid stronger-than-expected performance of the services sector. This suggested that the economy did not see a material impact of the West Asia conflict in the quarter. Thereafter, the YoY expansion in several high frequency indicators slowed in April-May, before witnessing a strong recovery in

MPC’s growth forecast for Q1FY27.

The growth and inflation projections have yo-yoed materially over the last few months, in line with geopolitical developments and global commodity prices. ICRA expects the MPC to remain in a cautious mode and maintain a status quo on policy rates and stance.

Nevertheless, there is a likelihood of a rate hike in the latter part of the fiscal, after there is some clarity around monsoon turnout and its implications for farm output and rural demand, contingent on the generalisation of inflationary pressures becoming more evident across the CPI basket.

Canara Bank Q1 profit nearly flat at ₹4,856 cr

FE BUREAU
Chennai, July 27

CANARA BANK ON Monday reported a modest rise of 2% in its net profit to ₹4,856 crore for the quarter ended June, compared with ₹4,752 crore in the year-ago period, as muted growth in interest income and lower treasury gains weighed on earnings.

Interest income rose 6% year-on-year to ₹32,957 crore, while non-interest income declined 5% to ₹6,727 crore. The fall was primarily due to a sharp decline in treasury income, which dropped to ₹1,057 crore from ₹1,993 crore in the same period last year.

Managing Director and Chief Executive Brajesh Kumar Singh attributed the fall in treasury income to hardening of bond yields. "Last year during the same period, yields softened to as much as 6.13%. So, we could sell our investment and earn handsomely." The bank's profit on sale of investments fell to ₹654 crore from ₹1,617 crore in the first quarter of FY26.

Interest expenses increased at a slower pace of 3%, enabling

the bank to cross the ₹10,000-crore milestone in net interest income in Q1FY27. Net interest margin (NIM) stood at 2.52%, marginally lower than 2.55% a year ago, but within the bank's FY27 guidance range of 2.50%-2.60%.

Advances continued to outpace the deposit growth. Gross domestic advances grew 17% year-on-year to ₹12.07 lakh crore, while domestic deposits rose 10% to ₹14.73 lakh crore.

The lender has guided for 11%-12% global advances growth and 9%-10% global deposit growth in FY27. Retail, agriculture and MSME (RAM) advances grew 21% to ₹7.64 lakh crore. Corporate and other sector advances stood at ₹5.28 lakh crore, registering a 14% year-on-year increase. On the liability side, low-cost CASA deposits grew 12% to ₹4.38 lakh crore, while term deposits increased 10% to ₹10.35 lakh crore.

TMB profit up 35% to ₹412 cr

FE BUREAU
Chennai, July 27

TAMILNAD MERCANTILE BANK (TMB) reported a 35% year-on-year rise in net profit to ₹412 crore for the quarter ended June 2026 (Q1FY27), driven by strong growth in interest income and lower operating expenses. The robust earnings lifted the bank's shares to a 52-week high of ₹917 on the NSE on Monday.

Interest income rose 20% year-on-year to ₹1,662.43 crore, while interest expenses increased at a slower pace of 11% to ₹897.35 crore.

This helped the lender post a 32% jump in net interest income (NII) to ₹765.08 crore during the quarter. Net interest margin (NIM) expanded to 4.29%, compared with 3.81% in the corresponding quarter last year.

MD and CEO Salee S Nair

Retail, agriculture and MSME advances grew 28% to ₹54,083 crore, accounting for over 94% of the bank's gross advances

said the Q1 performance is particularly encouraging against the backdrop of an evolving macroeconomic environment, "reaffirming the

resilience of our business model and the strength of our fundamentals." Credit growth outpaced deposit mobilisation, pushing the credit-deposit ratio up by 511 basis points to 88.97%.

Gross advances grew 27% year-on-year to ₹57,306 crore, while deposits increased 20% to ₹64,409 crore. Total business stood at ₹1.22 lakh crore.

Retail, agriculture and MSME advances grew 28% to ₹54,083 crore, accounting for more than 94% of the bank's gross advances. TMB's export credit accounted for 3.53% of its total MSME and corporate loan book, while its exposure to West Asian countries stood at ₹32.14 crore, representing 0.06% of total advances.

On the liabilities side, low-cost CASA deposits grew 17% year-on-year to ₹16,852 crore, while term deposits increased 21% to ₹47,557 crore.

Tata Sons AGM to take up Chandra reappointment

PROCEEDINGS IN THE matter are pending before the Maharashtra charity commissioner. SRTT and the Sir Dorabji Tata Trust (SDTT) are Tata Sons' two largest shareholders and together hold a controlling stake in the company.

SRTT has been unable to convene trustee meetings pending further directions from the charity commissioner. The proceedings relate to complaints over whether the presence of permanent or life trustees on its board complies with the Maharashtra Public Trusts Act.

This has created uncertainty over the conduct of the AGM. Under Tata Sons' Articles of Association, a valid quorum requires the presence of an authorised representative jointly nominated by SRTT and SDTT.

While SDTT remains free to take decisions, SRTT's inability to meet has raised questions over how the two trusts will jointly authorise a representative for the AGM. One option would be for SRTT to seek the charity commissioner's permission to hold a limited meeting to

authorise its participation. If the required quorum is not available, the AGM may have to be adjourned. However, the Articles do not expressly clarify whether an adjourned meeting can proceed if the requirement for a jointly nominated representative remains unmet.

Chandrasekaran's extension as chairman has been a focal point in the Tata ecosystem for the past few months. In May, the board of Tata Sons held a review of the capex-intensive and loss-making businesses of the group, a step seen by many as an evaluation of Chandra's leadership and business decisions. The last Tata Sons board meeting on June 12, however, did not take

up the matter of his reappointment as chairman. At the AGM, shareholders will also consider the adoption of the firm's stand-alone and consolidated financial statements for the year ended March 31, 2026, and the declaration of a dividend on ordinary shares.

The Tata Sons annual return for FY26 showed Chandrasekaran received total remuneration of ₹158.66 crore during the year, up 1.83% from ₹155.81 crore in FY25. His remuneration comprised a gross salary of ₹17.34 crore, commission of ₹140.69 crore and other payments of ₹63.22 lakh. He did not receive any stock options or sweat equity during the year.

The increase in remuneration was driven almost entirely by a higher gross salary, which rose by ₹2.81 crore from ₹14.52 crore. The commission component, which accounted for the bulk of his remuneration, remained unchanged at ₹140.69 crore, while payments under the 'others' category increased marginally to ₹63.22 lakh from ₹59.64 lakh.

Bank of Baroda data breach...

ACCORDING TO CYBERSECURITY activist and Cashless Consumer Founder Srikanth L, at least 90,000 files across the bank's 1,088 branches have been exposed and remain accessible on the dark web.

"The leaked data includes personal customer information, branch data, and the bank's corporate and IT records. The data is still accessible," Srikanth said.

Hacking group TripleX has claimed responsibility for the attack, alleging that it leaked around 1 TB of data containing customer identification

documents, Aadhaar details, application forms and internal audit files.

Srikanth said the compromised data spans 1,088 branches across several states, including Haryana, Uttar Pradesh, Maharashtra, Karnataka, Madhya Pradesh, Rajasthan, and Kerala.

According to him, the data was advertised on the dark web on Saturday as a cache of more than 700 GB based on meta-data analysis, containing both retail and corporate banking information as well as internal bank documents.

A senior Bank of Baroda official said the bank immediately isolated internet-connected computers at its headquarters after detecting signs of the breach.

"The breach is believed to have originated from an employee's laptop. Customer account details, Aadhaar information and other internal branch documents appear to have been compromised," the official said.

An email sent to Bank of Baroda seeking further details did not elicit a response till press time.

Adani Energy launches ₹3,500-cr QIP

FE BUREAU
Mumbai, July 27

ADANI ENERGY ON Monday launched a qualified institutional placement (QIP) of its shares to raise ₹3,500 crore from institutional investors. It has fixed a floor price of ₹1,698.15 per share for the issue.

Under the rules, the company can offer a discount of up to 5% on the floor price while finalising the issue price. The floor price was 0.3% lower than Monday's closing price of ₹1,708 on the National Stock Exchange (NSE).

The issue price will be determined in consultation with the book-running lead managers. The company has also filed the preliminary placement document with the BSE and the NSE. Jefferies, SBI Capital Markets, ICICI Securities and IIFL Securities are the book running lead managers to the issue.

Shriram Finance in no hurry, but open to universal bank licence

MANJU AB
Mumbai, July 27

SHRIRAM FINANCE MAY revisit its plans to apply for a universal bank licence if market conditions become favourable and its new strategic investor, MUFG Bank, supports the move, a top company executive said.

The non-banking financial company (NBFC) had applied for a universal bank licence in July 2013, but did not pursue the application. "We don't have any immediate plans, but if the situation changes, we can reconsider it. However, for at least the next one or two years, we have no such plans," said Umesh Revankar, executive vice chairman of Shriram Finance.

Revankar said converting into a full-service bank would bring several regulatory and operational challenges. These include compliance with cash reserve ratio (CRR) and statutory liquidity ratio (SLR) requirements, building a strong deposit franchise to match the asset book, and potential pressure on margins.

"Shriram Finance has always been a specialised lending institution. That was one of the reasons we did not pursue the banking licence after applying

UMESH REVANKAR,
EXECUTIVE VICE CHAIRMAN,
SHRIRAM FINANCE

With MUFG bringing in capital and our credit rating improving, borrowing costs have come down

in 2013," he said.

Any future move would require broad consensus within the company and the backing of MUFG Bank, which acquired a 20% stake ₹39,618 crore in the largest cross-border investment in India's financial sector.

"We need to evaluate it carefully and proceed only when there is complete comfort. We will also have to discuss it with our new partner, MUFG Bank. They need to be on the same page," Revankar said. While a

banking licence would lower the company's cost of funds, he noted that building a low-cost current and savings account (CASA) franchise has become increasingly difficult.

"Banks now face challenges in mobilising low-cost CASA deposits. With digital payments, customers can move money instantly, so they do not need to maintain large balances. That is something we will have to work on," he said.

Revankar said MUFG's investment has strengthened Shriram Finance's position in vehicle financing by helping it retain customers and leverage the Japanese bank's relationships with original equipment manufacturers (OEMs) such as Honda, Suzuki and Toyota.

"With MUFG bringing in capital and our credit rating improving, our borrowing costs have come down. We can pass on part of that benefit to customers, which should support business growth," he said.

The firm's incremental borrowing cost has declined to around 7.8% from about 8.3%. However, Revankar said it would take around 18 months for the lower funding costs to be fully reflected in the balance sheet as existing liabilities are repriced.

Making capital welcome

Simpler rules can ease flows, but sustained FDI needs policy certainty

THE RESERVE BANK of India's (RBI) proposed overhaul of foreign investment rules last week is a welcome attempt to simplify a regulatory architecture that has grown increasingly complex through years of amendments, clarifications, and overlapping requirements. By replacing the existing framework with a more consolidated, principles-based regime, the draft seeks to make it easier for foreign investors to understand how investments are classified, structured, and regulated. Greater clarity on the distinction between foreign direct and portfolio investment, ownership and control, downstream investment, and other cross-border transactions should reduce uncertainty and compliance costs. This matters at a time when India needs substantially more foreign capital. But expectations need to be realistic. Simplifying the rulebook can remove friction; it cannot by itself persuade investors.

That distinction is particularly important given the paradox in India's recent foreign direct investment (FDI) numbers. Gross foreign investment has remained substantial, reflecting continued international interest in the Indian economy, but net FDI has been far less impressive as repatriation and disinvestment have risen. This suggests India's challenge is no longer simply attracting foreign investors through headline growth rates or liberal sectoral caps. It is also about persuading existing investors to stay, reinvest, and expand. The proposed rules can help by reducing ambiguities that complicate transactions and by making the regulatory treatment of investments more predictable. Clearer definitions of ownership and control, for instance, could reduce disputes over whether downstream investments by foreign-backed Indian firms must comply with FDI conditions. A simpler framework could also make private equity transactions, mergers, restructurings, and exits easier.

Yet, regulatory simplification addresses only one part of the problem. FDI is ultimately driven by expected returns adjusted for risk, and investors assess far more than FEMA rules. Policy stability, taxation, contract enforcement, the speed of regulatory approvals, ease of repatriating capital, and the predictability of enforcement all influence investment decisions. India's large domestic market and relatively strong growth remain formidable attractions, but these advantages can be diluted when investors face prolonged disputes or uncertainty over the interpretation of rules. Nor should rising repatriation automatically be viewed negatively: mature investments must be allowed to generate returns and exits if fresh capital is to enter. The concern arises if new investment fails to keep pace with money leaving, or if investors increasingly prefer acquisitions and financial transactions to creating new productive capacity. India needs more greenfield FDI in manufacturing, infrastructure, and emerging technologies if foreign capital is to contribute meaningfully to jobs, exports, and productivity.

The FDI reset should therefore be seen as part of a larger reform agenda rather than a solution in itself. The government has progressively liberalised foreign investment across sectors, and the RBI's attempt to replace detailed prescription with clearer principles is the right direction. The next step should be to ensure consistency between RBI regulations, the government's FDI policy, and the way different agencies interpret and enforce them. Faster approvals and fewer opportunities for retrospective or conflicting interpretations would do as much to improve investor confidence as rewriting the rules. India is competing for capital at a time when global companies are diversifying supply chains and governments everywhere are offering incentives to attract investment. It has the market, skills, and growth potential to capture a larger share of those flows. A simpler FDI regime makes the doorway wider. Whether more capital walks through it will depend on how predictable and rewarding investors find what lies beyond it.

Gen Z is coming for the market incumbents

EVERY GENERATION REWRITES the rules of competition. Baby Boomers rewarded trust and distribution. Millennials rewarded convenience and digital access. Gen Z rewards relevance, identity, and experience.

This shift matters because India has nearly 375 million Gen Z consumers, roughly one in four Indians. Gen Z accounts for around 40% of India's online shoppers, despite representing only about a quarter of the population. Today they influence purchasing decisions; tomorrow, as they enter the workforce and incomes rise, they will become India's largest incremental spending cohort. Their product discovery rarely begins inside a store. It begins on Instagram, YouTube, Blinkit, Amazon, Nykaa, or via creators.

For decades, leadership in consumer industries followed a familiar formula: build a quality product, create nationwide distribution, advertise heavily, and leverage scale. That strategy created India's strongest consumer franchises. Those businesses remain fundamentally strong. What has changed is the consumer.

Investors spend enormous time analysing market share, pricing power, and customer retention. Yet another question may become equally important over the next decade: Is the company replacing today's customer with tomorrow's?

A business may continue reporting healthy revenues because its existing customer base remains loyal. But if it fails to attract younger consumers, growth eventually slows as purchasing power shifts to the next generation. Market leaders rarely lose because they lose their current customer. They lose because they fail to replace them.

Every board should ask: Are we merely retaining loyal customers, or are we becoming relevant to the 25-year-old who will define the next 20 years of consumption?

Maruti illustrates this well. It still possesses exceptional competitive benefits — cost leadership, an unmatched service network, strong resale values, and high reliability.

Yet its market share has declined as consumers shifted towards SUVs, connected technology, premium interiors, and stronger safety perception. Maruti continues to win the rational purchase decision, as rivals increasingly win the emotional one. A similar story is unfolding in quick-service restaurants. Domino's built its leadership around affordable pricing and fast delivery. But once food-delivery platforms democratised access to restaurants, convenience stopped being a unique advantage. The transition is visible in footwear too. Bata built one of India's most trusted brands through affordability and reliability. Today, footwear has become an expression of fashion and identity. FMCG is seeing a similar shift. Traditional companies built powerful moats through physical distribution and shelf space. Today, digital platforms have democratised discovery. Distribution is becoming easier to replicate; relevance is becoming harder.

Retail could become the next major battleground. D-Mart remains one of India's finest retail businesses. However, quick commerce has changed shopping behaviour, particularly among younger urban consumers who prioritise instant delivery, digital discovery, and wider assortment. D-Mart's recent growth moderation reflects several factors — not Gen Z alone — but the bigger question remains: where will tomorrow's incremental consumer spending migrate?

Many of the strongest Gen Z opportunities share four common characteristics. First is premiumisation — buying better rather than buying more. Second is convenience, where saving time has become a product feature in itself. Third is experiences, with spending shifting towards travel, dining, and entertainment. Finally, tech is becoming embedded across consumption, from connected products to digital services. These themes are shaping where future demand and value creation will emerge.

The broader lesson is that the source of competitive advantage is changing. Distribution once determined what consumers could buy. Today, algorithms increasingly determine what consumers discover. The companies that win Gen Z today are far more likely to become the market leaders of tomorrow.

INDO-US RELATIONSHIP

SOARING VISIONS & AMBITIONS OF ACHIEVING GLOBAL GREATNESS ARE RESHAPING THE DYNAMIC

The changing contours

SINCE THE EARLY Cold War, America has seen India, with its size, economic resources, and strategic position in Asia as a counterpoise to communist China. Over the last two decades, the world's two largest democracies have built up their strategic partnership and America is the largest single buyer of India's exports. And it has long been the foreign country in which many Indians wish to study, work, or live.

The deterioration of US-India relations under the second Trump administration is, to a considerable extent, being viewed through the lens of the friction over trade and the shifting US positions on China and Pakistan in Washington's national security strategy. Trump has presented China, the world's second largest economic and military power but behind America, with the gift of equality.

At another level, Trump's recent decision to do away with the term "Indo-Pacific", which he himself started using in 2017, has dismayed Delhi, which thought it reflected India's rising stature in Asia. This is probably why Prime Minister Narendra Modi referred to the importance of the Indo-Pacific during his recent official visits to Indonesia, Australia, and New Zealand.

Alliances have characterised one of the most important aspects of US defence and foreign policies, so non-aligned India has never been a high priority for America. Because India is not a treaty ally, America has never given Delhi its most sophisticated matériel. That situation has existed since Indian independence in 1947.

Fissures in the Indo-US relationship were apparent even under a more India-friendly Joe Biden, whose abrupt decision to withdraw American forces from Afghanistan in August 2021 enabled the Pakistan-backed Taliban to return to power. This was followed two weeks later by the creation of AUKUS, between allies

ANITA INDER SINGH

Founding Professor, Centre for Peace and Conflict Resolution

Australia, the United Kingdom, and the US as an exclusive trilateral pact focussing on sharing highly sensitive nuclear-submarine technology. Delhi responded cautiously to AUKUS. While perceiving AUKUS as countering Chinese expansion, it also feared that AUKUS could overtake India's own position in the eastern part of the Indian Ocean.

On another plane, the Biden administration was also both wary of, and disappointed with, India's refusal to condemn Russia's invasion of Ukraine, which strained the relationship between them. Trump has realised that Delhi cannot or will not be a peace-maker in Ukraine, which is an additional reason why he shows little interest in India.

Pakistan's mediation in the ongoing Gulf crisis has been helpful to Washington. In return, Washington has actively modernised Pakistan's F-16s, making them more lethal against India, the country with which Islamabad is likely to fight a war. Over the past year, Washington and Islamabad have renewed strategic accommodation, driven in part by insecurity in West Asia. This is not in India's interest because Pakistan, like its all-weather friend, China, claims part of north Indian territory. The outstanding fact is that Trump's diplomatic move towards Pakistan has taken the veil off India's claim to be the Vishwaguru.

America's rivalry with China has never inspired Washington to treat India as an equal. Trump has only highlighted the inequality between them. It has taken India's "strategic autonomists" long to realise that Washington does not see India as an equal partner.

Meanwhile, China, simultaneously a Pacific and South Asian country, claims Indian territory. It also offers stiff competition in Delhi's crucially important immediate Indian Ocean neighbourhood and presents more economically and in terms of arms sales to all of India's neighbours. Like Biden, Trump expects India to settle its border dispute with China bilaterally, while Delhi hopes that in the event of a strategic crunch, America will aid India.

India's economic dependence on the US remains strong despite Trumpian tariffs. Indeed, unlike America, no European country buys 21% of its exports. The UK and Germany buy less than 3% each; as does Australia, a leading Pacific trading partner. America's imports come from India; 2.2% of US exports go to India. America's trade deficit with India largely explains Trump's economic threats and imposition of heavier tariffs on Indian goods. Ironically, the US remains economically more important to India rather than vice-versa. India may

As identity politics and boasts about their respective national greatness become more obvious in both countries, they could further strain Indo-US ties

Section 301: A test of competitiveness

TARIFFS, ONCE USED largely to protect domestic industry or correct trade imbalances, are increasingly being deployed to advance wider objectives relating to national security, supply-chain resilience, environmental sustainability, labour standards, and human rights. The USA's latest decision to impose an additional 10% tariff on imports from India under Section 301 of the Trade Act reflects this changing architecture of global commerce.

The immediate debate has understandably focused on the additional customs burden. However, the more relevant question is whether this fundamentally alters India's competitive position in the US market. The tariff, effective July 24, has been introduced on the ground that India has not fully aligned its import regime with US expectations on goods produced through forced labour.

This is neither an embargo nor a product-specific restriction directed against Indian manufacturers. It should also not be interpreted as an allegation that Indian exports are produced using forced labour. It is essentially a country-specific trade action and part of a broader trend in which advanced economies are linking market access with the domestic policy and regulatory choices of their trading partners.

Labour standards may be the present focus, but carbon emissions, sustainability, traceability, and human-rights due diligence are likely to play an equally important role in future trade policy. Competitiveness will therefore depend not only on production efficiency but also on the ability to meet increasingly demanding regulatory and social standards.

At first glance, an additional 10% tariff appears substantial. Yet international competitiveness is rarely determined by absolute tariff alone. Buyers assess the relative tariff burden across competing suppliers along with production cost, quality, reliability, freight, contractual relationships, and delivery schedules.

If competing countries face the same duty, sourcing patterns may not change significantly. Conversely, even a small tariff differential can influence orders in highly price-sensitive sectors.

Several of India's principal com-

petitors, including Bangladesh, Pakistan, Sri Lanka, Cambodia, Indonesia, Malaysia, Mexico, Canada, and the UK, are also subject to the additional 10% tariff. In many labour-intensive sectors, India's relative position hence remains broadly unchanged.

A second group of major manufacturing economies, including China, Vietnam, Thailand, Türkiye, Brazil, South Africa, the Philippines, and Saudi Arabia, faces a higher tariff of 12.5%. This gives India a relative advantage of 2.5 percentage points. In price-sensitive products, such a differential can influence sourcing decisions, particularly when supported by India's expanding manufacturing capabilities and reputation as a dependable supplier.

The comparison with certain developed economies is more complex. The EU, Japan, South Korea, Taiwan, and Switzerland benefit from a capped-duty arrangement under which the cumulative customs incidence is limited depending on the existing most-favoured nation (MFN) tariff. In products already subject to high MFN duties, suppliers from these economies may face a lower overall burden than Indian exporters.

A significant feature of the US measure is its extensive list of exemptions. The exclusions recognise that disruption of critical supply chains could raise costs for American manufacturers and consumers. Pharmaceuticals, pharma ingredients, several agricultural products, semiconductor manufacturing equipment, certain wood products, and other strategically important goods have been kept outside the additional tariff. Products already covered under Section 232 tariffs, including specified categories of steel, aluminium, and auto components, also generally remain outside its scope.

This provides protection to important Indian export sectors. Pharmaceuticals, where India has a strong global position, remain largely insulated, while several engineering products already covered by

Section 232 are unaffected. The greater pressure is likely to fall on labour-intensive and consumer-oriented products competing primarily on price.

Textiles and apparel illustrate the mixed impact. India competes with Bangladesh, Cambodia, Pakistan, Sri Lanka, and Vietnam. Since most of these countries face either the same or a higher tariff, India's relative position remains reasonably favourable.

India enjoys a modest tariff advantage over Vietnam. But that alone will not guarantee additional orders. Productivity, lead times, design capabilities, scale, and integration with global retail supply chains will ultimately determine whether India can acquire greater market share.

Engineering, electronics, gems and jewellery, and processed food will also experience differentiated outcomes. Some engineering products are exempt. India may nevertheless gain a relative advantage over China and certain East Asian suppliers in select categories.

In electronics, India's long-term attractiveness as an alternative manufacturing base will depend more on infrastructure, policy stability, skilled manpower, scale, and depth of the component ecosystem than on one tariff measure.

Gems and jewellery may face greater price sensitivity, but design, craftsmanship, branding, and long-standing buyer relationships can offset moderate differences in landed cost, particularly in higher-value segments. For processed food and marine products, quality, food-safety compliance, traceability, and supply reliability will remain crucial.

The tariff must also be viewed against the broader restructuring of global supply chains. The pandemic, geopolitical conflicts, and strategic rivalry among major powers have shifted corporate priorities from maximum efficiency to greater resilience.

MNCs increasingly seek multiple production locations to avoid excessive

dependence on any one geography. Their objective is no longer simply to minimise costs but also to secure continuity of supply during periods of geopolitical or logistical disruption.

India enters this changing environment with several structural strengths: a large manufacturing workforce, a substantial domestic market, a diversified industrial base, improving logistics, an expanding network of trade agreements, and increasing integration into global value chains.

India is also being viewed as a stable and trusted economic partner. These advantages are unlikely to be negated by a 10% tariff. This does not mean that the tariff is inconsequential. It will raise landed costs and lead to tougher commercial buyer-supplier negotiations. Labour-intensive sectors with thin margins may face pressure, and some exporters may have to share part of the additional cost with customers. However, exchange-rate movements, freight, logistics efficiency, productivity, quality, technology, policy predictability, and delivery reliability often exert a greater medium-term influence than tariffs alone.

India's response should not be confined to individual tariff actions. The larger priority must be to accelerate structural reforms that strengthen manufacturing competitiveness. Investment in logistics, technology adoption, research, skilling, standards infrastructure, and sustainability will deliver benefits far beyond the immediate US measure.

India must deepen domestic value addition and reduce excessive dependence on imported components in strategic sectors. At the same time, India's expanding network of trade agreements can support market diversification — an important source of economic resilience — and reduce dependence on any single destination.

The larger lesson is that future competitiveness will be defined by more than labour costs. Countries will compete on trusted supply chains, responsible manufacturing, tech capability, sustainability, policy stability, and institutional credibility.

PAKISTAN BANK HOLDS POLICY RATE AT 11.5%

PAKISTAN'S CENTRAL BANK held its policy rate at 11.50% on Monday, the bank's governor told reporters, as US-Iran hostilities threaten to push up energy costs and inflation in the import-dependent country. The central bank decision comes weeks after the collapse of a ceasefire agreement between Washington and Tehran, with the two sides exchanging fire over control of the Strait of Hormuz, a critical corridor for global oil shipments.

ANDY BURNHAM WELCOMES ZELENSKIY TO UK

UK'S NEW PM, Andy Burnham, welcomed Ukrainian President Volodymyr Zelenskyy as his first global visitor, in a move that underscores London's support for Ukraine. The two met at a naval base where they were due to hear how UK-led training programmes are helping strengthen Ukraine's armed forces.

SAUDI ARABIA, JORDAN, IRAQ TARGETED; IRAN CLAIMS HORMUZ STRAIT STILL IN ITS CONTROL

Drones attack Iran's neighbours as Tehran tests Trump's pause

Dubai, July 27

SAUDI ARABIA, JORDAN AND Iraq reported drone attacks on Monday, two days after the United States abruptly suspended a two-week campaign of air strikes against Iran, as Tehran appeared to put US President Donald Trump's latest strategic U-turn to the test. Saudi Arabia said it shot down drones aimed at petroleum targets, some in its eastern province and others in the capital Riyadh. It said the drones had been launched from Iraq by Iran-backed militia, and it reserved the right to respond. Separately, Iran's Houthi allies in Yemen said they had targeted transit sites carrying oil to Saudi Arabia's main Red Sea oil port of Yanbu, in retaliation for what it said were Saudi drone incursions into Yemeni airspace.

Earlier, Jordan reported shooting down two drones, and Iraqi security sources reported a series of drone attacks on camps housing Iranian opposition Kurdish forces in northern Iraq. Jordan and northern Iraq were the locations where four US service members were killed

during the two-week air campaign, which Trump suspended abruptly over the weekend after his top brass advised him that the strategy had run its course. Iran has said it will pause its own attacks for as long as Trump's self-imposed ceasefire continues. But it also said it was still in control of the

contested Strait of Hormuz, and was not seeking to resume peace talks with US. Trump's decision to suspend the campaign reflected advice from his military that the bombing had reached the limits of what it could achieve, according to a US official.

Wall St climbs, focus on Fed

WALL STREET'S MAIN indexes rose after US and Iran paused hostilities, boosting risk appetite ahead of a week of major earnings and an interest rate decision. Energy price-sensitive stocks led gains, with United Airlines rising 3.3%. However, a 6.7% drop in Brent crude to \$90.37 a barrel dragged energy shares lower. Markets had ended last week on edge as escalating West Asia tensions stoked fears of higher oil prices and renewed inflationary pressures ahead of Fed's policy meeting on Wednesday.

China's Moonshot to release AI model

MOONSHOT AI IS poised to make its Kimi K3 model available for public download, expanding its reach and influence in the global open software community at a time of growing US concern about Chinese encroachment into the top echelons of AI development. The Beijing-based company on Monday released the model's weights, which are used to steer AI systems toward answers. That will enable developers to download, tweak and host the technology freely in a move to broaden the userbase of Moonshot's AI. Founder Yang Zhilin has said he wants to win users by focusing on openness and greater availability than competing US proprietary systems. Kimi K3's initial announcement and benchmark performance triggered a selloff in AI-

related stocks this month, as it demonstrated Chinese-made models are closing the gap on American leaders OpenAI and Anthropic PBC. Much like DeepSeek's release in 2025, the K3 debut was taken as evidence that Chinese companies can keep pace on a smaller budget and with fewer cutting-edge resources than rivals with full access to Nvidia AI accelerators.

Japan's Takaichi defends yen policy amid slump

LEIKA KIHARA
Tokyo, July 27

JAPANESE PRIME MINISTER Sanae Takaichi said government efforts to boost the country's growth potential will underpin market trust in the yen, countering views that the rising cost of living from the weak currency was hurting her approval ratings. She also said while the Bank of Japan held jurisdiction over monetary policy, the central bank was required by law to work closely with the government on economic policy. "Exchange rates move on various factors and are set by markets. It's hard to gauge the direct impact of any specific factor," Takaichi told parliament. "But creating a strong econ-

China's CXMT soars 466% in debut after record IPO

KEY TAKEAWAYS

■ Shares surged 466% after Asia's biggest IPO of 2026, making it China's most valuable listed company despite a global tech selloff

■ One day surge was the biggest and the strongest for a Chinese listing worth \$5 billion

■ Shares closed at 49 yuan versus the 8.66 yuan IPO price

■ The rally lifted CXMT's market capitalisation to 3.3 trillion yuan

REUTERS
Singapore/Shanghai, July 27

SHARES OF CXMT CORP soared 466% on their Shanghai trading debut on Monday following Asia's biggest IPO this year, catapulting the chipmaker to the top of China's stock market by valuation despite a recent selloff in global tech stocks.

The one-day surge was the largest among the world's 10 biggest IPOs this year by deal value, based on Dealogic data. The jump was also the largest recorded among Chinese new listings valued at \$5 billion or more in Dealogic data going back to 2006.

The stock closed at 49 yuan, compared to its sale price of 8.66 yuan per share, after reaching an intraday high of

55.03 yuan. The rally lifted CXMT's market capitalisation to 3.3 trillion yuan (\$487.73 billion), sharply up from \$85.5 billion during the IPO process. As US curbs intensify competition in the global semiconductor race, CXMT has emerged as a key pillar of Beijing's drive to build a self-sufficient chip industry and close the gap in strategic technologies such as artificial intelligence. The explosive debut crowned CXMT as China's most valuable listed company, overtaking banking giant Industrial and Commercial Bank of China, long the market's heavyweight. Around 141.1 billion yuan worth of CXMT shares were traded in Shanghai on Monday, becoming the first A-share stock to exceed 100 billion yuan turnover in a day, according to local media reports.

Nvidia to back OpenAI's \$500-bn data centre hub

NVIDIA CORPORATION is in talks to provide a financing guarantee to help OpenAI lease computing from a US data centre project planned for 2028, underscoring how the world's most valuable company is funneling capital into the infrastructure that drives its business. Nvidia is in talks to help the creator of ChatGPT lease a \$500 billion, 10-gigawatt hub that SoftBank Group is overseeing in Ohio, sources said. The US chipmaker may

provide a guarantee of as much as \$250 billion to the AI lab, said a source. Negotiations are in their early stages and could collapse or financing terms may change, it said, asking to remain anonymous to describe private talks. A guarantee by Nvidia would highlight the increasingly circular financing behind the AI boom, as tech giants fund ever-larger projects that ultimately generate business for themselves.

● What is the govt order on Bitchat?

ON JULY 23, close to midnight, the Indian Cyber Crime Coordination Centre (I4C) under the ministry of home affairs had asked the cloud-based web platform GitHub to remove three pages hosting the source code of Bitchat, a Bluetooth mesh messaging app. Twitter co-founder Jack Dorsey who had created the offline, decentralised app, posted photographs of the takedown order on X and wrote, "The government of India is making demands for this tech to be shut down." The order listed three URLs: the Bitchat repository, the Bitchat Android repository, and the releases page of the Android repository to be taken down. The order came days after allegations that mobile internet services had been disabled around protest sites in the Capital, and demonstrators had shifted to offline Bluetooth mesh messaging apps which could help them communicate in the absence of internet signals. The notice came as the Cockroach Janta Party (CJP) intensified its protests in Delhi, seeking the resignation of Education Minister Dharmendra Pradhan over irregularities in medical entrance examinations. Pradhan later resigned on Saturday.

● What is Bitchat, and how does it work?

BITCHAT IS A peer-to-peer messaging app that enables encrypted communication between nearby devices over Bluetooth mesh networks. No internet or server or phone number is required for mesh chats which hop from one device to another via automatic peer discovery as Bluetooth is

SECURITY CONCERNS

Why the govt ordered GitHub to take down Bitchat app

Last week, in the midst of the student protests in Delhi, the government ordered GitHub to take down three pages hosting the source code of messaging app Bitchat. **Banasree Purkayastha** looks at why the internet-free app is at the centre of a government crackdown

switched on in a device. Every mobile device becomes a relay station allowing communication without mobile data, Wi-Fi or cellular signals. Messages exist only in the device and there's built-in Tor network integration for enhanced privacy when internet connectivity becomes available.

Microsoft-owned GitHub is a code hosting service used by developers to collaborate on software. Open-source projects such as Bitchat keep their source files there, and users can download the finished app from the releases page. Bitchat is available on Android mobiles as well as iPhones.

THE I4C ORDER SAID THE ABSENCE OF A CENTRAL SERVICE PROVIDER IN BITCHAT LIMITS THE ABILITY OF LAW ENFORCEMENT AGENCIES TO OBTAIN SUBSCRIBER DETAILS

Sec 79(3)(b)

OF INFORMATION TECHNOLOGY ACT, UNDER WHICH ORDER ISSUED

● Why the govt wants it to be taken down?

THE I4C ORDER, as put up on X by Dorsey, said Bitchat "significantly impedes lawful interception, attribution, and investigation by law enforcement agencies", and the platform "can be misused to evade lawful surveillance, facilitate anonymous coordination, and circumvent lawful restrictions imposed by competent authorities during situations involving public disorder, riots, terrorism, organised crime, or internet shutdowns". It said the absence of a central service provider in Bitchat limits the ability of law enforcement agencies to obtain subscriber information or communication records. It pointed out that the app's design creates a substantial risk of misuse by anti-national elements, terrorist organizations, organised criminal groups seeking to evade lawful detection and continue communication despite legally imposed restrictions.

● What laws were allegedly being violated by the app?

THE ORDER WAS issued under Section 79(3)(b) of the Information Technology Act, 2000, read with Rule 3(1)(d) of the IT Rules, 2021. The provisions listed as violated are Sections 43, 84B and 84C of the IT Act, 2000, and Section 61 read with Sections 196 and 197 of the Bharatiya Nyaya Sanhita, 2023. The signatory is described as a nodal officer designated to notify intermediaries.

● Other similar messaging apps

BRIAR AND BRIDGEFY are two other such apps used where mobile networks are disrupted. During protests where local authorities may shut down the internet or install jammers to stop mobile signals, these platforms allow people to exchange messages without relying on internet access or telecom services. Hong Kong protestors in 2019 used Bridgefy to bypass internet bans while protestors in Uganda, Iran and Nepal have increasingly used Bitchat to rally around supporters.

● What the order says about state surveillance

WHILE BITCHAT IS still available on Google Play — perhaps because the protests were called off two days after the order — the government notice does raise concerns over the government's approach to digital connectivity during periods of public unrest. The Internet Freedom Foundation (IFF) criticised the order saying it was unconstitutional and authoritarian. "It is striking that the order does not identify a single unlawful message. It objects to what BitChat is," it said, alleging that the government finds the app dangerous because citizens can speak to one another when it has switched the internet off. It also pointed out that deleting a repository does not delete the application from any phone that carries it, and the mesh keeps functioning without servers. "What the takedown actually prevents is scrutiny of the underlying code," it posted on X.

The Shareholders may note that the Board of Directors at its meeting held on May 04, 2026, had recommended a final dividend of Rs. 3/- per equity share for the Financial Year ended March 31, 2026. The record date for the purpose of determining the entitlement of the shareholders for the final dividend is Friday, August 07, 2026. The final dividend, once approved by the shareholders at the ensuing 19th AGM, will be paid within the statutory timelines, electronically through various online transfer modes to those shareholders who have updated their bank account details.

The Shareholders who have not registered their email IDs/ bank account details and/ or other KYC details are requested to follow the instructions below to register their email IDs to obtain the Annual Report and update the bank account details for receiving the dividend:

Shareholders holding shares in dematerialised mode	Register/ update email ID, bank account details and other KYC details with your Depository Participants.
Shareholders holding shares in physical mode	Register/ update the email ID and other KYC details with MUFG Intime India Private Limited, the RTA of the Company, by sending the requisite documents at the below address: MUFG Intime India Private Limited (Formerly Link Intime India Private Limited), C 101, 247 Park, LBS Marg, Vikhroli West, Maharashtra, Mumbai – 400083 Email ID: investor.helpdesk@in.mpms.mufg.com The Shareholders may download the prescribed Forms from the Company's website at https://www.quesscorp.com/investor-other-information/ .

The Shareholders may note that as per Master Circular dated February 06, 2026, issued by the SEBI, read with any other amendments therein, Shareholders who hold shares in physical form and whose folios are not updated with any of the KYC details [viz., (i) PAN (ii) Contact Details (iii) Mobile Number (iv) Bank Account Details and (v) Signature] shall be eligible to get dividend only through electronic mode with effect from April 01, 2024. Accordingly, the final dividend, subject to approval by the shareholders in the AGM, shall be paid to physical holders only after the above details are updated in their folios.

Further, the Shareholders may note that, as per the provisions of the Income Tax Act, 2025, dividends paid or distributed by a Company shall be taxable in the hands of the shareholders. The Company shall therefore be required to deduct tax at source (TDS) at the time of making the payment of the said dividend at the prescribed rates. The TDS rate may vary depending on the residential status of the shareholder and the documents submitted by them and accepted by the Company in accordance with the provisions of the Income Tax Act, 2025.

In this regard, an email communication has been sent to the shareholders, informing the relevant procedures to be adopted/ for the submission of documents to avail the applicable tax rate. The said communication, the exemption forms and other documents are available on the Company's website at <https://www.quesscorp.com/investor-other-information/>. The requisite documents are required to be uploaded on the website of the RTA at <https://web.in.mpms.mufg.com/formsreg/submission-of-Form-121-41.html> on or before Friday, August 14, 2026.

The Shareholders may write to the RTA at investor.helpdesk@in.mpms.mufg.com in case of queries or for any clarification on this matter.

Notice to Shareholders for Transfer of Equity shares of the Company to the Investor Education & Protection Fund (IEPF)
This Notice is being published pursuant to the provisions of Section 124(6) of the Companies Act, 2013, read with the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016, as amended from time to time ("the Rules"). The said Rules prescribe the manner of dealing with the shares in respect of which dividend have remained unclaimed/unpaid for a period of seven consecutive years. As per the said Rules, such shares along with unclaimed/unpaid dividend shall be transferred to the Investor Education and Protection Fund ("IEPF"). The list of such shareholders is uploaded on the Company's website at https://aplapollo.com/investors/downloads#Others.
In compliance with the said Rules, individual notices have been sent to the shareholders who have not encashed their dividend since the Final Dividend for FY 2018-19, or who have otherwise obtained any order(s) from Court/Tribunal/Statutory Authorities, etc. in respect of their shares. These notices were sent at their latest available address and through e-mail whose e-mail address registered with the Company/Registrar and Transfer Agent providing them with an opportunity to claim their unclaimed/unpaid dividend and take necessary action to avoid transfer of such shares to IEPF.
The concerned shareholders are requested to write to the Company/Registrar and Share Transfer Agent ("RTA"), along with proof of dividend encashment or relevant document(s)/order(s) etc., as the case may be at the earliest but not later than November 2, 2026. For any clarification, shareholders are requested to refer to the individual notices sent to them or contact the RTA at Abhipra Capital Limited, A-387, Abhipra Complex, Dilkush, GT Karnal Rd, Wazirpur Industrial Area, Azadpur, Delhi, 110033, Email ID: rta@abhipra.com or to the email ID: investors@aplapollo.com. Shareholders are requested to quote folio/DP-Client ID number in all correspondence.
Shareholders holding shares in physical mode, who have not yet updated their PAN, KYC details, are requested to do so by submitting Form ISR-1, Form ISR-2, self-attested copy of PAN (of all holders, in case of joint holding), a cancelled cheque etc., to the RTA of the Company. Detailed instructions and specimen KYC forms are available on the Company's website at https://aplapollo.com/investors/downloads#Communication, to Shareholders.
Please note that in case the Company does not receive any communication including a valid claim from the concerned shareholder latest by November 2, 2026, the Company shall proceed to transfer their shares to the IEPF's Demat Account, without any further act or liability on the part of the Company.
Further, to avail the inherent advantages of dematerialization, shareholders holding shares in physical form are requested to convert their holding into dematerialized mode at the earliest. For more details, please visit https://aplapollo.com.
Special window for Re-Lodgement of transfer request of physical shares:
Pursuant to SEBI Circular No. HO/38/13/11(2)/2026-MRSD-POD/1/3750/2026 dated January 30, 2026, a Special Window has been opened from February 5, 2026 to February 4, 2027 to facilitate the transfer and dematerialisation of physical securities that were sold or purchased prior to April 1, 2019. The facility is available to eligible investors who had not lodged the securities for transfer, as well as those whose transfer requests were rejected/returned/not attended to due to deficiency in the documents/process/or otherwise.
The request may be submitted to the Company's Registrar & Share Transfer Agent (RTA): Abhipra Capital Limited, Abhipra Complex, Dilkush Industrial Area, G.T. Karnal Road, Azadpur, New Delhi - 110033.
011-42390725 E-mail: rta@abhipra.com
Note: Re-lodged transfers will be processed only in demat form. A demat account is mandatory. Investors must provide Client Master List along with Transfer Documents, Share Certificates and other relevant documents. No requests will be accepted after February 04, 2027.

Notes:
1) The above audited results were reviewed by the Audit Committee and approved by the Board of Directors at their meetings held on 27th July 2026.
2) The Statutory Auditors have carried out audit of the above financial results for the fourth quarter and year ended 31st March 2026.
3) The financial results of the Company have been prepared in accordance with Indian Accounting Standards (IND AS) as prescribed under Section 133 of the Companies Act, 2013 read with Companies (Indian Accounting Standards) Rules, 2015 (as amended).
4) The figures for the quarter ended 31-03-2026 and 31-03-2025 are the balancing figures between audited results in respect of the full financial year and year-to-date figures up to the third quarter of the relevant financial year.
5) During Q4, pursuant to the modification of the terms of concessory unsecured loans from related parties, the Company recognized a credit of ₹4,190.96 Lakhs in the Statement of Profit and Loss. (₹2,099.35 Lakhs towards waiver of interest and ₹2,095.59 Lakhs reduction in fair value of loan).
6) For the quarter under report, the Company has provided interest of ₹702.11 Lakhs and deferred income of ₹236.21 Lakhs as per Ind AS 109.
7) Deferred Tax Asset of ₹68.20 Crores is not recognized considering the uncertainty associated with the earning of taxable income by the Company to recover the same in the near future.
8) Employee Cost - The gratuity provision for the quarter has been recognized based on the actuarial valuation certificate obtained at the end of the previous financial year. As there have been no material changes in employee strength during the quarter, management considers the provision to be reasonable.
9) During the financial year ended March 31, 2026, the Company achieved full commercial operations with effect from June 25, 2025. Although the Company incurred a net loss for the year ended March 31, 2026, primarily due to initial operational stabilization and ramp-up, the management has evaluated the Company's financial position and operational outlook.
10) The Company has consistently honored all its loan obligations on time and discharged its trade creditors without any default. Based on projected operational cash flows and full-scale operations, management is confident of meeting its future obligations as and when they fall due. Accordingly, the financial statements have been prepared on a Going Concern basis.
11) The figures for the corresponding previous quarter have been restated, regrouped and reclassified, wherever necessary, to conform with those of the quarter under report.

RISKS TO INVESTORS

1. Risk to Investors: Top 5 Risk factors:

- We are subject to various laws and extensive government regulations and if we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required in the ordinary course of our business, including environmental, health and fire safety laws and other regulations, our business financial condition, results of operations and cash flows may be adversely affected.
 - Our Promoter, Mr. Rupapara Jay Rameshbhai, was formerly associated with a partnership firm against which Goods and Services Tax proceedings are pending. Although he has retired from the partnership and has no present role in its affairs, any adverse developments in such proceedings may require his participation in regulatory proceedings and may adversely affect his reputation and, consequently, our business, financial condition, results of operations and prospects.
 - A significant portion of our domestic revenue is derived from customers located in Gujarat, Maharashtra and Uttar Pradesh which accounted for 62.45%, 59.22%, and 78.70% of our revenue from operations for the financial years ended March 31, 2026, 2025 and 2024, respectively. Any adverse developments in these regions may materially and adversely affect our business, financial condition, results of operations and cash flows.
 - We export our products to various countries and our revenue from customers outside India represented 35.40%, 37.72%, and 18.57%, of the total revenue from operations for the financial years ended March 31, 2026, 2025 and 2024, respectively. Our international operations expose us to risks relating to foreign market conditions, geographic concentration, regulatory requirements and foreign exchange fluctuations which could adversely affect our business, financial condition and results of operations.
 - We have certain outstanding litigation against us, an adverse outcome of which may adversely affect our business, reputation and results of operations.
2. Our Equity Shares have never been publicly traded and may experience price and volume fluctuations following the completion of the Issue. Further, our Equity Shares may not result in an active or liquid market, and the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price or at all.
3. The Merchant Banker associated with the Issue has handled following public issues in the past three years which have closed below the Issue Price on Listing date:

This Issue was made through the Book Building Process, in terms of Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended (the “SCRR”) read with Regulation 229 of the SEBI ICDR Regulations and in compliance with Regulation 253 (1) and 253 (2) of the SEBI ICDR Regulations read with SEBI ICDR (Amendment) Regulations, 2025, wherein not more than 50.00% of the Net Issue was available for allocation on a proportionate basis to Qualified Institutional Buyers (“QIBs”) (the “QIB Portion”), provided that our Company and the selling shareholders in consultation with the BRLMs allocated up to 60.00% of the QIB Portion to Anchor Investors on a discretionary basis (“Anchor Investor Portion”). With effect from December 01, 2025, pursuant to the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) (Third Amendment) Regulations, 2025, of which, up to 40% of the Anchor Investor Portion was reserved in the following manner: (i) 33.33% was available for allocation to domestic Mutual Funds and (ii) 6.67% was available for allocation to life insurance companies and pension funds, subject to valid Bids being received from domestic Mutual Funds, life insurance companies, and pension funds at or above the Anchor Investor Allocation Price. In the event of under-subscription under (ii) above, the allocation was made to domestic Mutual Funds. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares were added to the remaining QIB Portion (other than the Anchor Investor Portion) (“Net QIB Portion”)Further, 5.00% of the Net QIB Portion was available for allocation on a proportionate basis to Mutual Funds only, and the remainder of the Net QIB Portion was available for allocation on a proportionate basis to all QIB Bidders, other than Anchor Investors, including Mutual Funds, subject to valid Bids being received at or above the Issue Price. However, if the aggregate demand from Mutual Funds is less than 5.00% of the Net QIB Portion, the balance Equity Shares was available for allocation in the Mutual Fund Portion was added to the remaining Net QIB Portion for proportionate allocation to QIBs. Further, the SEBI ICDR Regulations, as amended, stated that not less than 35% of the Net issue was to be available for allocation to Individual Investors who applied for minimum application size. Not less than 15% of the Net issue was to be made available for allocation to Non-Institutional Investors of which one-third of the Non-Institutional Portion was available for allocation to Bidders with an application size of more than two lots and up to such lots as equivalent to not more than ₹ 10.00 Lakhs and two-thirds of the Non-Institutional Portion was available for allocation to Bidders with an application size of more than ₹ 10.00 Lakhs and under-subscription in either of these two sub-categories of Non-Institutional Portion to be allocated to Bidders in the other sub-category of Non-Institutional Portion. Subject to the availability of shares in non-institutional investors’ category, the allotment to each Non-Institutional Investors was not less than the minimum application size in Non-Institutional Category and the remaining available Equity Shares, if any, to be allocated on a proportionate basis in accordance with the conditions specified in this regard in Schedule XIII of the SEBI (ICDR) (Amendment) Regulations, 2025. All Bidders, other than Anchor Investors, were required to participate in the issue by mandatorily utilising the Application Supported by Blocked Amount (“ASBA”) process by providing details of their respective ASBA Account (as defined hereinafter) in which the corresponding Bid Amounts will be blocked by the Self-Certified Syndicate Banks (“SCSBs”) or under the UPI Mechanism, as the case may be, to the extent of respective Bid Amounts. Anchor Investors were not permitted to participate in the issue through the ASBA process. For details, please refer to the chapter titled “Issue Procedure” on page 377 of the Prospectus.

NOTICE OF THE 5TH ANNUAL GENERAL MEETING

Notice is hereby given that the 5th Annual General Meeting ("AGM") of Sagility Limited ("Company") will be held on Thursday, August 20, 2026 at 04:00 PM IST through video conferencing ("VC") to transact the business that is set forth in the Notice of the AGM, in compliance with the applicable provisions of the Companies Act, 2013 ("Act"), the General circular nos.14/2020 dated April 8, 2020, 17/2020 dated April 13, 2020, and subsequent circulars issued in this regard, the latest being General Circular No. 03/2025 dated September 22, 2025 issued by the Ministry of Corporate Affairs ("MCA"), and circular nos. HO/49/14/14(7)2025-CFD-P0D2/13762/2026 dated January 30, 2026 issued by Securities and Exchange Board of India ("SEBI") and all other applicable laws.

Electronic copies of the Notice of the AGM and the Annual Report for the Financial Year 2025-26 have been sent on July 27, 2026, to all those Members whose e-mail addresses are registered with the Registrar and Share Transfer Agents ("RTA")/Depositories as on Friday, July 24, 2026.

Further, in accordance with Regulation 36 (1)(b) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, a letter providing a web-link for accessing the Annual Report, including the exact path, is being sent to those Members who have not registered their email address with the Company.

The Notice of the AGM and the Annual Report for the Financial Year 2025-26 are also available on the Company's website at <https://sagility.com>, websites of the Stock Exchanges i.e., BSE Limited and National Stock Exchange of India Limited at www.bseindia.com and www.nseindia.com respectively, and on the website of Company's RTA, MUFG Intime India Private Limited at <https://instavote.linkintime.co.in/>. Shareholders who acquire shares of the Company after July 24, 2026, may refer to the above web links to access the Annual Report and the Notice of the AGM, which includes the login credentials and instructions for attending the meeting and participating in the e-voting.

The Company is providing the facility to its Members to exercise their right to vote on the business as set forth in the Notice of the 5th AGM by electronic means through both remote e-voting and e-voting at the AGM. Members are requested to register their email addresses, mobile numbers and update their Bank details with relevant depositories through their Depository Participant(s).

Members whose names appear in the register of beneficial owners maintained by the depositories as on the cut-off date i.e., Thursday, August 13, 2026, shall only be entitled to vote through remote e-voting or e-voting at AGM, as the case may be.

Remote e-voting shall commence at 9 AM IST on Monday, August 17, 2026 and ends at 5 PM IST on Wednesday August 19, 2026. Remote e-voting shall not be allowed beyond 5 PM IST on Wednesday, August 19, 2026 and once the vote on a resolution is cast by the Member, the Member shall not be allowed to change it subsequently.

Members who have cast their vote by remote e-voting prior to the AGM may attend the AGM through VC but shall not be entitled to cast their vote again. Members who have not cast their vote through remote e-voting and are present in the AGM through VC, shall be eligible to vote through e-voting at the AGM.

The voting rights of the shareholders shall be in proportion to the equity shares held by them in the paid-up equity share capital of the Company. Shareholders participating through VC facility shall be reckoned for the purpose of quorum under Section 103 of the Companies Act, 2013.

The instructions for participating through VC, and the process of remote e-voting and e-voting at AGM, including the manner in which the Members who have not registered their e-mail addresses can cast their vote through e-voting, are provided as part of the Notice of the 5th AGM.

The Company has fixed Friday, August 07, 2026, as the 'Record Date' for determining entitlement of Members to the final dividend for FY 2025-26, if declared at the AGM.

The dividend, if approved by shareholders at the AGM, will be paid only to those shareholders whose names appear in the list of beneficial owners as on the Record Date, after applicable TDS deductions.

A separate communication providing detailed information on TDS requirements has already been sent to the Members and the same has been made available on the website of the Company at <https://sagility.com/investor-relations/shareholder-services/>.

Pursuant to SEBI directives, effective November 18, 2025, dividends will be paid only through electronic means, and payment by cheque or warrant has been discontinued.

In case of any queries, you may refer the Frequently Asked Questions (FAQs) for Shareholders and e-voting user manual for Members available at the download section of <https://instavote.linkintime.co.in/> (under help section) or write an e-mail to investorservices@sagility.com or enotices@in.mpmis.mufg.com or contact Mr. Rajiv Ranjan, Sr. Assistant Vice President - E-voting Team or Mr. Ashish Upadhyay, Senior Associate - E-voting Team, from MUFG Intime India Private Limited at +91 22 4918 6000, e-mail: rajiv.ranjan@in.mpmis.mufg.com, Ashish.Upadhyay@in.mpmis.mufg.com, Address - C-101, Embassy 247, L.B.S. I. BUSINESS OVERVIEW AND STRATEGY:

Business Overview

Prima Innovation Limited is an unlisted public limited company incorporated on June 20, 2024 under the provisions of the Companies Act, 2013 bearing Corporate Identification Number U22207DD2024PLC010039 with the Registrar of Companies, Central Registration Centre. The Equity Shares of Prima Innovation Limited are currently not listed on any stock exchange(s).

Prior to the Scheme of Arrangement becoming effective, our Company was a wholly owned subsidiary of Prima Plastics Limited. Our Company was incorporated with the objective to engage in business of rotational moulding business. Pursuant to the Scheme becoming effective on March 31, 2026, the rotational moulding business of Prima Plastics Limited, having its manufacturing facility in Pithampur, Madhya Pradesh and Daman, Gujarat got demerged and vested in our Company with effect from July 1, 2024 (i.e. the Appointed Date).

Strategy

Our wide spectrum of products caters to a diverse range of needs. In order to cater to evolving customer demands, we launch new products by leveraging our experience, market knowledge and in-house product design team. As at March 31, 2026, we had 217 (two hundred and seventeen) SKUs across our four product categories: Road safety, Pallets, insulated box and water tanks.

J. REASON FOR SCHEME OF ARRANGEMENT:

The rationale of the Scheme as set out in the Scheme is reproduced as under:

- The Demerged Company is 100% holding company of the Resulting Company.
- The Demerged Company proposes to demerge and transfer the Demerged Undertaking (as defined hereinafter) from the Demerged Company to the Resulting Company and in consideration thereof, the Resulting Company will issue their Equity Shares to the shareholders of the Demerged Company.
- As part of an overall strategy for the optimum running, growth and development of the businesses of the Demerged Company, it is considered desirable and expedient to reorganise and reconstruct the Demerged Company by segregating its Roto Business (as defined hereinafter) from its Remaining Business (i.e. furniture and other allied businesses). This will result in the creation of two separate listed entities viz., the Resulting Company focusing exclusively on Roto Business and the Demerged Company shall continue to be in the Remaining Business (i.e. furniture and other allied businesses).
- These listed entities will be subject to public, media, analysts and regulatory review. A clean corporate structure with no cross holdings will ensure transparency, accountability, highest standards of corporate governance and compliance. It also enhances operational flexibility and helps quick response to competitive or environmental challenges.
- The said demerger will enable the Parties (as defined hereinafter) to concentrate its resources and managerial bandwidth entirely to such businesses which would enable focused strategy, better coordination and cohesiveness in their working and assist in standardization of its business processes as may be prevalent to the specific businesses. The proposed restructuring pursuant to the said Scheme is expected, inter alia, to result in following benefits for the Parties:
 - the distinctive profile and established business model of Roto Business (as defined hereinafter) makes it suitable to be housed in a separate listed entity, allowing sharper strategic focus in pursuit of its independent value creation trajectory;
 - segregating different businesses would result in better and efficient control and management for the segregated roto business having different risk and return profiles, and also providing investors with better flexibility to select investments which best suit their investment strategies and risk profile;
 - unlocking the value of the Demerged Undertaking for the shareholders of the Demerged Company;
 - attracting investors and providing better flexibility in accessing capital;
 - effective utilisation of cash flows of different businesses;
 - enabling focused growth strategy for each of the businesses for exploiting opportunities specific to each business;
 - greater visibility on performance of each of the businesses;
 - operational efficiency; and
 - focused management approach for pursuing the growth in the respective business verticals and de-risk the businesses from each other.

The Scheme is in the interests of all stakeholders (shareholders, creditors, employees, and all other stakeholders) of the Demerged Company and the Resulting Company.

Q. INTERNAL RISK FACTORS

- Our historical performance may not be indicative of our future growth or financial results and if we fail to manage our growth or implement our growth strategies, our business, financial condition, results of operations and cash flows may be adversely affected.
- Dependence on a single operational Manufacturing Facility If may have an adverse effect on our business, results of operations and financial condition.
- We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.
- Our business depends on a trusted brand, and any failure to maintain, protect, and enhance our brand would hurt our business.
- Uncertainty around the completion of the Scheme.
- Any increase in the cost of our raw material or other purchases or a shortfall in the supply of our raw materials, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.
- We are currently dependent on the continued efforts and contributions of our Promoters for the success of our business and if they cease to be involved in or decrease their involvement in our business prior to us having a succession plan in place, it could have a material adverse effect on our business, financial condition, results of operations and cash flows.
- Any inability on our part to maintain quality standards could adversely impact our business, results of operations and financial condition.
- We had negative cash flows in relation to our investing and financing activities. Sustained negative cash flows in the future could adversely affect our results of operations and financial condition.

More risk factors have been disclosed under the heading "Risk Factors" on page 14 of the Information Memorandum.

ANALYSTS EXPECT APPLE'S DEBUT TO VALIDATE THE CATEGORY

Samsung ups foldable game as Apple prepares for entry

OJASVI GUPTA
New Delhi, July 27

SAMSUNG'S DECISION TO unveil three new Galaxy Z foldable smartphones ahead of Apple's widely expected foldable iPhone launch has intensified the battle for India's nascent foldable smartphone market, with analysts saying Apple's entry could become the trigger that pushes the category into the mainstream.

While Samsung remains the dominant player, Apple's arrival is expected to lend credibility to the form factor, accelerate rival product cycles and spur wider consumer adoption, even as the broader smartphone market slows.

Samsung last week introduced the Galaxy Z Fold8, the Galaxy Z Flip8 Ultra and Galaxy Z Flip8, while Motorola has also refreshed its Razr foldable portfolio in recent weeks. The launches come ahead of Apple's much speculated iPhone Fold, expected around

spots in an otherwise slowing smartphone market. According to Counterpoint Research, India's cumulative foldable smartphone shipments are expected to cross 3 million units by the end of 2026, growing at a compound annual rate of nearly 80% since 2019. Annual foldable shipments are projected to rise around 8% this year, even as overall smart-

phone shipments are expected to decline 13-14% to about 133-134 million units due to rising memory and component costs. Samsung currently accounts for about 89% of India's foldable market, with Motorola holding around 8%.

Analysts, however, believe Apple's significance lies less in the volumes it may sell and more in the confidence it could bring to the category. Unlike others smartphone brands, Apple has a large base of users who typically remain within its ecosystem, many of whom have waited for a foldable iPhone before considering the form factor.

"Apple's entry is likely to be the biggest catalyst for the foldable market since Samsung introduced the modern foldable smartphone. Beyond its own sales, it will add greater credibility to the category, especially among iPhone users who have been waiting for an Apple foldable," Prachir Singh, senior research analyst at Counterpoint Research, said.

Women weightlifters win silver, bronze

PRESS TRUST OF INDIA
Glasgow, July 27

WEIGHTLIFTER GYANESHWARI YADAV continued India's medal rush, clinching a silver as records were broken left, right and centre in a riveting women's 53kg competition at the Commonwealth Games here on Monday.

The 23-year-old from Bhondiya village in Chhattis-

garh totalled 199kg (88 kg snatch + 111kg clean and jerk) but Nigeria's Onome Omolola Didih stole the show with a stunning 206kg (93kg + 113kg), rewriting both the Commonwealth and Commonwealth Games records to take the gold.

Gyaneshwari equalled her

personal best in the snatch (88kg) and set new personal best in the clean and jerk (111kg) and total (199kg).

"I am very happy, I wanted to give my personal best and I have been able to do that," Gyaneshwari said.

In yet another glory for women's weightlifting, expe-

rienced lifter Bindyarani Devi won the bronze medal in women's 58kg category competition.

Bindyarani lifted 87 in the snatch section, and 112kg in clean and jerk for a total lift of 199kg. She started with 83kg in snatch, and lifted 85kg on her second attempt, before getting 87kg on her third attempt.

Nigeria's Rafiatu Folashade won the gold medal with a total lift of 229, which is a Games record, while Canada's Ann Sophie Taschereau bagged silver with a total lift of 215.

Bindyarani had won the CWG silver in 2022 in Birmingham and finished second at the Commonwealth Championship in Ahmedabad last year.

The Odyssey nears \$1 bn at global box office

FE BUREAU & AGENCIES
New Delhi, July 27

CHRISTOPHER NOLAN'S THE ODYSSEY is well on course to become another global box office blockbuster, grossing nearly \$640 million worldwide in just 10 days and emerging as a strong contender to cross the coveted \$1-billion mark.

The film has maintained exceptional momentum in its second weekend, a key indicator of sustained audience interest. In North America, it collected \$87 million, taking its domestic total to \$286.4 million. The 30% drop from its

opening weekend is among the smallest recorded for a film that debuted with more than \$100 million, outperforming even Nolan's *The Dark Knight* in terms of second-weekend hold.

Internationally, *The Odyssey* earned another \$128.3 million across 81 markets, taking its overseas total to \$353.2 million. With worldwide collections now standing

Protest can't justify police excesses: SC

POLICE EXCESSES OR a 'lathi charge' cannot be justified merely because there is an agitation, the Supreme Court said on Monday while observing that the right to peaceful protest is "absolutely guaranteed."

A bench headed by Chief Justice Surya Kant also said it will hear on Tuesday a batch of pleas alleging police excesses against students protesting over exam irregularities and the NEET paper leak during the just concluded agitation spearheaded by the Cockroach Janta Party (CJP).

Besides, the bench, also comprising Justices Joyymaya Bagchi and V Mohana, agreed to take up a separate plea filed by a few family members of those police personnel who were attacked during the protest along with other listed petitions.

The CJP-led march on July 20 in Delhi saw clashes between protesters and security personnel, who used lathis and teargas shells to disperse crowds attempting to move towards Parliament.

"The right to peaceful protest is absolutely guaranteed. That cannot be denied. Merely because there is agitation cannot justify police excesses," the CJ said. —PTI

NOTICE
(For the attention of Equity Shareholders of the Company)
Transfer of Equity Shares of the Company to the Investor Education and Protection Fund ("IEPF") Authority

Notice is hereby given to the Equity Shareholders of the Company pursuant to Section 124(6) of the Companies Act, 2013 ("Act") read with Rule 6 of the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016, as amended ("IEPF Rules"). The IEPF Rules, inter alia, require the transfer to the IEPF Authority of all shares in respect of which dividend has remained unpaid or unclaimed for seven consecutive years or more.

Accordingly, individual communications are being sent to the concerned shareholders at their registered address whose shares are liable to be transferred to the IEPF Authority, requesting them to take the necessary action.

The details of the concerned shareholders and their Folio Numbers or DP ID-Client ID, as applicable, whose shares are due for transfer to the IEPF Authority, are available on the Company's website at www.radickokhaitan.com. The Shareholders may further note that the details uploaded by the Company on its website would be regarded and shall be deemed as adequate Notice in respect of transfer of Shares to the IEPF Authority in pursuance to the IEPF Rules.

The concerned shareholders, holding shares in physical form and whose shares are liable to be transferred to the IEPF Authority, may note that the Company would be issuing new share certificate(s) in lieu of the original share certificate(s) held by them for the purpose of dematerialization and transfer of shares to the IEPF Authority as per the Rules and upon such issue, the original share certificate(s) which stands registered in their name will stand automatically cancelled and deemed non-negotiable. The shareholders may further note that this notice shall be deemed to be adequate notice in respect of issue of New Share Certificate(s) by the Company for the purpose of transfer of shares to the IEPF Authority pursuant to the Rules. In case Shares are held in electronic mode, the Demat Account of the concerned shareholder(s) will be debited for the Shares liable to be transferred to the IEPF Authority by way of Corporate Action through respective Depository(s). Any further dividend, including other corporate benefits, on such Shares shall be credited to the IEPF Authority and no claim shall lie against the Company in respect of the unclaimed dividend amount and the Shares transferred to the IEPF Authority. The concerned shareholders are requested to claim the unpaid/unclaimed dividend by submitting a request, duly signed by all joint holders, if any, together with: (i) a self-attested copy of the PAN Card; (ii) a self-attested copy of address proof, mentioning the e-mail address and telephone/mobile number; and (iii) bank account details supported by an original cancelled cheque bearing the name of the account holder or a copy of the bank passbook/statement duly attested by the bank, so as to reach the Company at its Corporate Office or KFin Technologies Limited, the Company's Registrar and Share Transfer Agent ("RTA"), at the address given below, on or before October 10, 2026, failing which:

a) the unpaid/unclaimed dividend for the financial year 2018-19 will be transferred to the IEPF; and

b) the corresponding equity shares in respect of which dividend has remained unpaid or unclaimed for seven consecutive years or more will be transferred to the demat account of the IEPF Authority in accordance with the IEPF Rules.

If the Company does not receive a valid claim on or before October 10, 2026, it will proceed to transfer the relevant dividend and shares to the IEPF/IEPF Authority within the applicable statutory timelines. No claim shall lie against the Company in respect of the dividend and shares so transferred. However, the shareholder may claim the dividend and shares from the IEPF Authority by following the procedure prescribed under the IEPF Rules.

REQUEST FOR UPDATION OF PAN, KYC, BANK ACCOUNT AND OTHER DETAILS: Shareholders are also requested to update their PAN, KYC details (including postal address with PIN code, mobile number and e-mail address), bank account details and nomination:

a) with their respective Depository Participants, if the shares are held in dematerialised form; or

b) with the RTA, by submitting Forms ISR-1, ISR-2, SH-13/SH-14/ISR-3, as applicable, if the shares are held in physical form. The forms and the applicable procedure are available on the Company's website.
