Q1 GDP BEATS FORECASTS TO GROW AT 7.8%

Growth beats war blues

● Investments, services, exports drive strong economic expansion

SHUBHAM RANA
New Delhi, August 31

INDIA'S ECONOMY GREW a stronger-than-expected 7.8% in the April-June quarter despite the West Asia war and the accompanying energy price shock, as robust investment, resilient services and a pick-up in exports powered expansion.

The growth, according to data released by the Ministry of Statistics and Programme Implementation (MoSPI) on Monday, was well above the Reserve Bank of India's forecast of 7% and most analysts' estimates.

Growth could have been even higher but for the impact of the West Asia crisis on government finances. Higher subsidy payouts and excise duty cuts on auto fuels weighed on net product taxes, creating an unusually wide gap between GDP and gross value added (GVA).

GVA, considered a better measure of underlying economic activity, expanded 8.2% in Q1 FY27, with services growing 10% and the secondary sector 8.6%.

upwards from the earlier estimate of 7.8% — and 7% in Q1 FY26.

The better-than-expected first-quarter performance prompted some analysts to raise their FY27 growth forecasts to around 7-7.5%, from 6.5-7% earlier.

A key driver was investment.

Gross fixed capital formation (GFCF), a proxy for investment, surged 11.9%, the fastest in the new GDP series going back to FY23. Investment growth has now accelerated for four consecutive quarters, helped by sustained government capital expenditure.

The Centre's budgetary capex

rose 24% in April-June and 30% in April-July, reflecting its continued use of public investment to crowd in private-sector projects.

The share of GFCF in nominal GDP rose sharply to 34.3% in the June quarter from 31.4% a year earlier.

Aspirations to upgrade & availability of affordable credit fuel premium shift

CONSUMPTION PUZZLE-IV SMARTPHONES

OJASVI GUPTA & ASHUTOSH MISHRA
New Delhi, August 31

INDIA'S SMARTPHONE MARKET is splitting in two — and the bottom is falling out. Shipments in the April-June quarter dropped 10% year-on-year, the steepest June-quarter fall in six years, according to Counterpoint Research. The damage was concentrated at the bottom: volumes of phones priced below ₹15,000 crashed nearly 50%.

Yet the average selling price climbed to around ₹30,000, up almost 20% from a year earlier. Indians aren't buying fewer phones because they can't afford them — those who are buying are spending more

than ever.

"Demand in the mid-premium segments is sustaining fairly well, whereas volumes at the lower end are languishing," says Upasana Joshi, senior research manager at IDC India and South-East Asia. The ₹15,000-30,000 band and above remains

robust as consumers chase upgrades. Samsung has raised Galaxy prices several times in eight months; its volumes haven't flinched.

The premium shift isn't new. In the September 2025 quarter, Apple alone shipped 5 million units — the iPhone 16 took 5% of total shipments,

the iPhone 17 and iPhone Air another 16%. Total smartphone sales hit 48 million that quarter, up 4.3% year-on-year, IDC data show. For 2025 as a whole, though, shipments were flat at 152 million units. The market isn't growing; it's trading up.

What's funding the splurge? Credit, in large part. "Aspirations to upgrade to a better phone, combined with the availability of affordable credit, is driving sales at the higher end," executives at a smartphone company said. RBI data show 'other' retail loans — excluding car, home and credit card debt — grew a brisk 23-24% year-on-year every month from January to June. Not all of that went into devices, but a fair share of high-end phones is bought on EMI, with banks and shadow lenders partnering brands right at the checkout counter.

Fiscal deficit at 26.8% of FY27 target

● Capex grows 30%, net tax revenue up 27.6% in April-July

FE BUREAU
New Delhi, August 31

THE CENTRE'S FISCAL deficit was contained at 26.8% of the annual target in the first four months of FY27, aided by strong revenue growth even as capex surged.

The Centre's fiscal deficit was at 29.9% of the relevant annual target in April-July of FY26. The Centre's net tax collections rose by a healthier 27.6% in April-July of FY27, amidst a contraction in tax devolution to the states, as four tranches of devolution have been shared with the states in April-July compared with five in April-July in the previous year.

"With two tranches being shared in August 2026 vs. one in August 2025, the pace of growth will normalise and come closer to that of gross tax revenues," rating agency ICRA chief economist Aditi Nayar said.

The centre's capital expenditure grew by a robust 30% on year in April-July of the current financial year, reflecting the government's thrust to provide support to economic activity.

The Centre's gross tax revenues rose by 11% on year in April-July 2026, led by over 20% growth in direct taxes, aided by a lower base, and a 38% growth in customs duty collections aided by the hike in duties on gold and silver.

While this seems modest

compared to our current expectation of a double-digit nominal GDP growth for the fiscal, some shortfall is likely on account of union excise duty collections following the duty cut on petrol and diesel, and PIT collections (barring STT), which need to expand by around 15% during the remainder of the fiscal. These would be partly offset by higher-than-budgeted collections on the customs duty front, aided by the duty hikes on gold and silver imports, she added.

approvals, and marketing the device to providers such as hospitals and physicians," the study said.

Developing an innovative medical device can take 5-15 years with costs ranging from \$100 million to \$1 billion, as per the study.

Despite efforts to grow domestic manufacturing, import dependence remains high. Imports account for around 60% of domestic medical device consumption, according to the DoP.

The study covered 23 medical device manufacturers, 10 promoters, two incubators and three VC firms. As many as 82.6% of respondents talked about government guarantees, including assured purchases from government organisations, to reduce investment risks. It also recommended additional government in the form of subsidies, tax incentives and grants.

"The real trouble the medical device manufacturers

face is the capital expenditure. In order to set up a manufacturing unit, they need to invest huge capital. For addressing this issue, the Government can invest on the land, infrastructure and to an extent on machinery for scientific facilities," the study stated.

The sector's growth makes the funding gap more significant. Estimates suggest that medical device market stood at \$12 billion in FY24. With the annual growth rate of about 15% the sector is expected to reach \$50 billion by FY30.

The report recommended milestone-based funding with money released as companies meet targets such as prototype development, clinical trials and regulatory approvals. It also backed blended finance, grants, medical device parks and shared testing facilities, along with faster regulatory clearances, to lower the cost and risk of developing new devices.

MOMENTUM DEFIES GLOBAL GLOOM

Growth strong, external risks persist: CEA

FE BUREAU
New Delhi, August 31

INDIA'S ECONOMIC GROWTH remains resilient despite global uncertainties, with strong domestic demand, improving investment activity and robust exports providing support to the economy, Chief Economic Adviser Anantha Nageswaran said on Monday.

"As of now, strong domestic momentum and export performance have combined to deliver another quarter of very strong growth," Nageswaran said, adding that India was now reaping the benefits of structural reforms undertaken over the past 12 years.

The Indian economy remained resilient in Q1 with GDP growth at a better-than-expected 7.8%, despite a challenging global environment. Analysts are now forecasting GDP growth to be around 7.3-7.5% in FY27 as against less than 7% estimated earlier.

Q1 strength pushes FY27 growth towards 7.5%

● Economists lift growth outlook, see rate hikes

SHUBHAM RANA
New Delhi, August 31

A HIGHER-THAN-expected GDP growth of 7.8% in the April-June quarter has raised expectations that the Indian economy can continue to grow over 7% even in the face of the war in West Asia and higher energy prices. A more resilient economic activity than previously anticipated should also allow the Reserve Bank of India's (RBI) rate setting panel to raise interest rates this year, economists said.

Economists at Morgan Stanley, State Bank of India, CareEdge Ratings, HDFC Bank, and India Ratings and Research all raised their growth projections for FY27 after the latest data. GDP growth is now seen between 7% and 7.5%, against 6.5%-7% earlier.

Data released by the Ministry of Statistics and Programme Implementation (MoSPI) on Monday showed GDP growth slowed to 7.8% in April-June from 8.6% in the March quarter. Growth was, however, stronger than the RBI's projection of 7% and the economists' median estimate of 7.2%.

Economic activity was driven by investments, the services sector, and higher exports. Private consumption also remained strong, though the expansion was slower than headline GDP growth.

ANANTHA NAGESWARAN, CHIEF ECONOMIC ADVISER

What we are witnessing is continued resilience in India's growth performance. I think that is the key message here," he said, adding that the strength reflected in quarterly GDP data was supported by high-frequency indicators.

He said manufacturing and services had performed well in the first quarter, while agriculture had also contributed to growth. Private consumption remained healthy, while early signs of a pickup in private-sector investment were visible in

some sectors. "Bank credit growth also reinforces this assessment, indicating that more credit is available and that more investment activity is taking place across the country," he said.

Nageswaran said merchandise exports, excluding oil, gold and gems and jewellery, had grown strongly in the opening months of the financial year. The performance, he said, suggested that India's export growth was becoming more diversified.

SPRINGING A SURPRISE

Going forward, growth is expected to slow due to risks from geopolitical tensions, weather-related uncertainties, and higher inflation. The RBI projects GDP growth of 6.7% in FY27 with quarterly growth rates seen between 6.4% and 6.8% for the next three quarters.

But after the release of the April-June GDP data, economists believe GDP growth could be higher than 7% this year. "India's economy is resilient despite supply-side risks. While growth could moderate in coming quarters, the strong start to FY27 raises upside risks to our 6.7% full-year forecast and should make monetary policy normalisation easier," said ANZ Bank economists Dhiraj Nim and Sanjay Mathur.

The government has also revised growth estimates for the previous financial years. As per the revised prints, GDP growth was higher by 0.1 percentage points in all of the last

three financial years. GDP growth was 7.8% in FY26, 7.2% in FY25, and 7.3% in FY24.

With war-led hit to economic activity contained and inflation on the rise, economists see the RBI's Monetary Policy Committee (MPC) raising the repo rate by around 50 basis points in FY27 from the current 5.25%.

"We expect robust growth and elevated inflation to prompt RBI to deliver 50bps of rate hike in 2HFY27, especially as real rates move towards negative zone and as we come closer to the Fed rate hiking cycle," said Upasna Bhardwaj, chief economist, Kotak Mahindra Bank. Economists at ANZ Bank see the first of two 25 basis points rate hikes in December. A rate hike would somehow align with and vindicate RBI MPC minutes giving much needed clarity to markets, said Soumya Kanti Ghosh, State Bank of India Group Chief Economic Adviser.

Nageswaran, however, flagged risks from the ongoing geopolitical tensions in West Asia, particularly their potential impact on energy prices and global demand. While the impact on crude oil prices has so far been more muted than expected, prolonged disruptions could keep Brent crude prices elevated.

"Globally, however, higher petroleum-product prices could pose a risk to global demand and, therefore, to the prospects for export growth in

‘Doomsayers doomed, India bloomed again’

FE BUREAU
New Delhi, August 31

HAILING INDIA'S 7.8% GDP growth in the first quarter of 2026-27 as a "herculean feat," Prime Minister Narendra Modi credited the country's collective strength and resilience for sustaining robust economic growth despite global uncertainties, oil price shocks and supply chain disruptions.

"The collective strength of our people ensured India delivered such growth despite oil price shocks and supply chain issues in the midst of global uncertainties," Modi said in a post on X.

"Doomsayers were doomed and India bloomed...yet again!" he said, taking a potshot at naysayers.

During the peak of the West Asia conflict, some analysts revised down their forecast to as low as 6% for FY27. However, with the war slowing down and commodity prices softening, the forecast for the year was revised to around 6.8%. Now, analysts expect FY27 growth to be 7-7.5%.

Commenting on the GDP numbers, Finance Minister Nirmala Sitharaman said: "This strong performance is credited to the people of India and their tireless hard work."

She said the positive outcomes of the reforms implemented by the NDA government and the dynamic management of the economy are becoming evident.

"Under the leadership of Prime Minister Shri @narendramodi, the NDA govern-

ment is committed to further expanding economic opportunities for all its citizens," she said.

According to official data released on Monday, nominal GDP is estimated to have increased by 10.3% in Q1FY27 while the real gross value added (GVA) recorded a growth of 8.2% during the quarter.

Reforms undertaken by the NDA Government, together with an agile management of the economy, are bearing results, she added.

While EPC is likely to remain the favoured route for road awards by MoRTH, the Ministry is gradually shifting its focus to BOT (Toll) road projects to boost their share in overall awards.

However, the extent to which it translates into a meaningful revival in construction activity remains to be seen," Co-Group Head, Corporate Ratings, Icria, Suprio Banerjee said.

AUTO MAJOR BOOSTS CAPEX FOR CAPACITY EXPANSION, R&D

Maruti to invest ₹77,500 cr by FY31, bets on small cars

NITIN KUMAR
New Delhi, August 31

MARUTI SUZUKI WILL invest ₹77,500 crore between FY27 and FY31 as the country's largest carmaker prepares for higher vehicle demand, with the spending earmarked for capacity expansion, new models, research and development, plant maintenance, sales and marketing infrastructure, carbon-reduction measures and logistics.

The auto major has budgeted ₹14,000 crore of capital expenditure for FY27, a 40% increase from ₹10,000 crore in FY26. Its installed production capacity is expected to rise to 2.9 million vehicles by the end of FY27 and to 3.65 million vehicles by FY31 as manufacturing facilities are expanded.

Chairman RC Bhargava said the company was reassessing its long-term production and sales targets following the recent goods and services tax (GST) reforms, which he said had given fresh impetus to the automobile industry and several other sectors.

"The company is in the process of making as accurate an estimate as possible of the likely growth of the car market in the next five years, a happy exercise necessitated by the

GST reforms. This could lead to some changes in our long-term production and sales targets," Bhargava told shareholders at the company's annual general meeting on Monday.

Maruti Suzuki currently estimates that India's passenger vehicle market could grow to 6.1-6.3 million units by 2031. Bhargava expects the small-car segment to grow considerably faster over the next five years than it did during the previous five.

The outlook follows a sharp

recovery in demand for small cars. Maruti Suzuki's small-car sales grew 17% in the second half of FY26 and accelerated to 35% in the first quarter of FY27. Managing Director and CEO Hisashi Takeuchi said small-car volumes had increased 63% between April and July, with the company commanding an 83% share of the segment.

Overall sales grew 38% in the first quarter, compared with 28% growth for the industry. The revival in small-car demand has prompted Maruti Suzuki to

reassess its manufacturing strategy. The company ended FY26 with around 190,000 pending bookings because it lacked adequate capacity for some models in demand. Bhargava attributed this partly to capacity adjustments made over several years as demand for small cars weakened and consumers shifted towards SUVs.

The company is now designing new production lines with greater flexibility, allowing them to switch between platforms and models.

Twist in Chandra case: NCLT says no consensus

MANU KAUSHIK
New Delhi, August 31

IN A SURPRISING development, the repayment plan proposed by Zee Group founder Subhash Chandra faces another round of scrutiny after the original National Company Law Tribunal (NCLT) bench held that no majority view had emerged on the proposal. It said third member Nilesh Sharma's opinion differed materially from the views of the two members of the original bench.

NCLT has on Monday referred the matter to its president under Section 419(5) of the Companies Act, 2013, who has formed a five-member special bench to decide the issue. The development means Sharma's August 25 opinion in favour of approving the repayment plan did not translate into a final approval order.

The NCLT has directed that the case be heard by a special bench comprising the NCLT president, judicial members Bacha Venkat Balam Das and Mahendra

Khandelwal, and technical members Atul Chaturvedi and

Ravindra Chaturvedi. The bench will sit on September 1.

Sharma had considered the matter after a difference of opinion emerged between judicial member Ashok Kumar Bhardwaj and technical member Reena Sinha Puri. Sharma directed that the repayment plan be approved provided that claims submitted through Anil Kumar, on behalf of 960 individuals, and Sunil Jain, on behalf of 300 individuals, were excluded.

The repayment plan involves a haircut of more than 99% for

creditors, with only ₹6.25 crore proposed to be paid against admitted claims of about ₹22,006.6 crore. The original bench has now held that the difference between the opinions was material. Bhardwaj's earlier view approved the plan while allowing dissenting creditors to pursue independent recovery, whereas Sharma held that an approved plan would bind all creditors, including those who opposed it. This difference meant Sharma's opinion could not be combined with Bhardwaj's to form a majority.

Zomato bans sale of analogue dairy dishes on platform

FE BUREAU
Bengaluru, August 31

ZOMATO ON MONDAY said it will not allow dishes made with analogue dairy on its platform, and has begun removing items that restaurant partners have themselves declared as containing such ingredients.

The Eternal-owned food delivery platform said it has adopted a zero-tolerance policy on the sale of analogue dishes and reserves the right to pull down any listing found in violation. Restaurants that remain non-compliant will be delisted, it said. However, the company did not provide a timeline for compliance or the number of restaurants that have been delisted so far.

Analogue paneer and cheese replace milk fat and milk solids with vegetable oils, starches and emulsifiers, producing a product that looks and behaves like dairy at a lower cost but carries less protein. The platform has asked restaurant partners to switch to natural dairy, drop items containing analogue dairy from their menus where a switch is not immediately possible, and re-examine supplier labels and ingredient declarations to confirm what is actually going into the food listed on the app.

ETERNAL-OWNED FOOD delivery platform Zomato has shut its customer support centre in Hyderabad and laid off around 240 employees, people aware of the matter said. Employees were informed of the decision on Monday. The closure follows a shift of most of the company's customer support work to specialised external vendors over the past six months. **FE BUREAU**

Analogue paneer ban to lift organised mkt

FE BUREAU
Chennai, August 31

THE ONGOING CRACKDOWN by the Food Safety and Standards Authority of India (FSSAI) on analogue dairy products across several states could significantly expand the opportunity for organised dairy companies in India's estimated ₹1-lakh-crore paneer market, according to Milky Mist Dairy Food Chief Executive K.Rathnam.

"Right now, it (crackdown) is only a few states like Maharashtra, Gujarat, Uttarakhand and other places in Delhi. If the ban of analogue paneer extends across the country, the paneer volumes will go up," he said.

Milky Mist is the largest private packaged paneer brand in India's organised market,

with a paneer-making capacity of 150 tonne a day at its Perundurai plant in Tamil Nadu. The facility is currently operating at about 60% capacity.

Rathnam said the company would assess the need for additional capacity by the end of the second quarter. "We may have to rethink our strategy maybe in this Q2," he said.

India's paneer market is estimated at around ₹1 lakh crore, with the unorganised sector accounting for about 94% and organised players, including Milky Mist, making up the remaining 6-7%. Within the organised segment, Milky Mist has a market share of around 20%. Paneer volumes have grown at a compound annual growth rate of 19% over the past six years through FY26.

ReNew puts asset recycling at heart of growth

RAGHAVENDRA KAMATH
Mumbai, August 31

RENEW ENERGY GLOBAL is looking to make asset recycling a key part of its growth strategy, selling up to 1 GW of operational projects every year even as it targets annual commissioning of around 3 GW of new capacity through 2030.

The strategy is designed to serve two purposes: release capital locked into mature renewable assets for deployment into new projects, and progressively reduce leverage at a time when the Nasdaq-listed company has sizeable debt maturities over the next two years.

"The idea is to invest in assets, mature them with signed power purchase agreements (PPAs), exit and invest in new projects," said a person familiar with the company's plans. ReNew intends to commission around 3 GW annually and could sell up to 1 GW each year through 2030, the person said.

The approach is already visible in a series of transactions. ReNew recently agreed to sell

1.4 GW of operational renewable assets across Rajasthan and Karnataka to CESC, part of the RP Sanjiv Goenka Group, at an enterprise value of ₹4,859 crore. On completion, the transaction is expected to reduce ReNew's debt by around ₹3,500 crore.

In March 2026, the company signed an agreement to divest its sole commissioned project in Tamil Nadu—a 100 MW/117.5 MWp solar facility—to Technique Solaire Group at an enterprise value of \$49 million. More transactions could fol-

low. ReNew is working on a few asset sales that have yet to be announced, according to people familiar with the matter. These could include a 100 MW hydro-electric project in Uttarakhand and some of its smaller transmission assets.

The capital recycling assumes significance given the scale of ReNew's balance sheet. As of June 30, the company had net debt of ₹67,120 crore and gross debt of ₹78,611 crore. It faces bond maturities of about ₹5,600 crore in FY27 and

₹3,300 crore in FY28, besides long-term debt maturities of around ₹3,200 crore in FY27 and a similar amount in FY28.

Asset sales, however, are only one leg of the strategy. ReNew is also looking to refinance part of its borrowings and lower its funding costs. It is in talks for refinancing that could reduce its average cost of debt by 50-75 basis points, people familiar with the matters said. Its average cost of debt currently stands at around 8.9%, according to its latest investor presentation.

Earlier this year, ReNew raised an \$800-million offshore loan to refinance debt associated with a hybrid power project, *Bloomberg* reported in March. A third source of capital could come from the manufacturing business that ReNew has incubated. The business currently carries relatively low debt and could raise equity at some stage, which would also help lower leverage at the consolidated level, a person familiar with the plans said.

The strategy effectively allows ReNew to separate the economics of developing renewable projects from owning them indefinitely. Once projects are commissioned, de-risked and backed by long-term PPAs, some can be monetised and the capital redeployed into ReNew's development pipeline.

That model also allows the company to continue expanding without funding all incremental growth through fresh borrowing. As of June 30, 2026, ReNew had a portfolio of 20.5 GW of renewable capacity, including 1.7 GW/6.2 GWh of

battery energy storage systems. Including BESS, its operational capacity stood at 13.1 GW. Its solar module and cell manufacturing capacities were 4 GW and 2.5 GW, respectively.

In Q1 FY27, ReNew's net profit rose 16% year-on-year to ₹595.3 crore, while total income increased 16% to ₹4,786.4 crore. The asset recycling strategy comes as founder, chairman and CEO Sumant Sinha and Canadian investor CPP Investments are seeking to buy out ReNew's public shareholders in the US and take the company private, with a potential India listing subsequently.

The key question is whether the recycling programme can keep pace with ReNew's growth ambitions. An analyst who did not want to be identified said net debt of about ₹67,000 crore and net debt-to-last-twelve-month adjusted Ebitda of roughly 5.7 times mean the company remains highly leveraged, leaving it exposed to interest costs and refinancing risks.

An email sent to ReNew did not elicit a response.

NOEL, DARIUS, JEHANGIR APPROACH CHARITY COMMISSIONER INDIVIDUALLY

SRTT trustees make fresh bid to lift meeting ban

URVI MALVANIA
Mumbai, August 31

THREE TRUSTEES OF the Sir Ratan Tata Trust (SRTT) have individually approached the Maharashtra Charity Commissioner afresh, seeking partial relief from the ban on board meetings so that the trust can take up urgent business, including matters related to the selection of the next Tata Sons chairman, people familiar with the matter said.

Tata Trusts Chairman Noel Tata, trustees Darius Khambata and Jehangir HC Jehangir are believed to have written to the Charity Commissioner late last week after previous attempts to secure relief from the meeting ban failed.

Since the SRTT board itself cannot meet, the three are understood to have made the fresh appeals in their individual capacities as trustees.

The other two trustees, Jimmy Tata and Venu Srinivasan, are believed not to have written to the charity authority.

"The trustees have appealed for lifting the ban so that the trust can carry out business on a regular basis. They have not sought relief

FRESH PLEA FOR RELIEF

■ Three of five SRTT trustees make fresh appeal to Charity Commissioner

■ Previous attempts to secure relief from meeting ban were unsuccessful

■ Tata Sons chairman selection process among key matters awaiting SRTT action

■ Philanthropic grants of nearly ₹400 crore remain in limbo

■ SRTT also needs to approve its FY26 accounts

for just one or two meetings, but have asked that the trust be allowed to meet for specific business," one of the persons cited above said.

Among the most urgent matters is SRTT's participation in the process of selecting a new chairman for Tata Sons, the group holding company.

Earlier this month, Tata Sons Chairman N Chandrasekaran wrote to the company's board saying he would not seek reappointment when his current term ends on February 20, 2027.

While the Tata Sons board has not commented on the development, the Sir Dorabji

Tata Trust (SDTT), the other key promoter trust, said in a statement on August 13 that it had accepted Chandrasekaran's communication and passed a resolution to initiate the formation of the Selection Committee that will choose his successor.

The formation of the five-member Selection Committee requires the participation of both SRTT and SDTT, which together nominate three members. With SRTT unable to convene a board meeting, the process of nominating members to the committee has been stalled.

Another matter requiring SRTT's participation is the

nomination of a joint representative of the Trusts for the Tata Sons FY26 annual general meeting.

The AGM scheduled for August 18 had to be adjourned for lack of quorum after SRTT and SDTT were unable to jointly nominate a representative.

Tata Sons has since secured an extension from the Registrar of Companies (RoC), giving it until December 31 to hold the AGM.

The fresh appeal also reiterates the need to resume routine trust business, particularly the approval of philanthropic grants.

In an earlier letter, Noel Tata had told the Charity Commissioner that the meeting ban had left grants worth nearly ₹400 crore in limbo.

SRTT is also yet to close its accounts for FY26, according to people familiar with the matter. Approval of the accounts is therefore among the key items the trust would need to take up to meet its regulatory and compliance obligations.

The fresh approach effectively seeks a way for SRTT to conduct essential business while the larger issue that led to the restriction on its meetings remains unresolved.

Chairman's Speech at the 52nd Annual General Meeting held on Monday, the 31st August 2026

Dear Stakeholders,

Namaskar, and a very warm welcome to each one of you to the 52nd Annual General Meeting of your Company. On behalf of the Board of Directors, I thank you for taking the time to join us, whether as long-standing shareholders or as those who have more recently placed your trust in Coal India.

Two Landmark Milestones in Coal India's Transformation

Before I take you through the performance of your Company during FY 2025-26, I would like to highlight two milestones that, in many ways, capture the transformation underway at Coal India.

The first is the successful market debut of two of our subsidiaries. Bharat Coking Coal Limited was listed on 19th January 2026 following an offer for sale of a 10% stake, receiving subscription of nearly 147 times. Central Mine Planning and Design Institute Limited was subsequently listed on 30th March 2026 following a 15% stake sale. These listings mark an important step in unlocking value from our subsidiaries, broadening their access to capital markets and strengthening Coal India's position as a diversified listed public sector enterprise. The Board has since accorded in-principle approval for the listing of Mahanadi Coalfields Limited and South Eastern Coalfields Limited as well.

The second milestone is the laying of the foundation stone on 20th June 2026 for India's first commercial coal gasification project, being developed by Bharat Coal Gasification and Chemicals Limited, our joint venture with BHEL. With an investment of around ₹25,000 crore and an annual capacity of 6.6 lakh tonnes of ammonium nitrate, this project represents an important step in converting India's abundant coal resources into higher-value products and creating new industrial capabilities. The foundation stone was laid by the Hon'ble President and the Hon'ble Prime Minister, making the occasion particularly significant for Coal India and for India's journey towards greater self-reliance in energy and industrial inputs. Taken together, these milestones demonstrate that Coal India is not only strengthening the scale and efficiency of its core business, but is also building new platforms for growth and value creation. They reflect our commitment to evolve with India's changing energy and economic requirements while remaining firmly anchored in our responsibility towards national energy security.

India's Energy Security and Coal India's Role

We meet at a moment when India's energy needs continue to expand with the pace of the nation's growth, and when coal, despite the many conversations around energy transition, remains the anchor of that growth. Global energy markets through the year continued to be shaped by geopolitical uncertainty and shifting trade patterns, and in that environment, the case for a secure, indigenous and affordable source of baseload energy has only strengthened. For Coal India, FY 2025-26 was a year in which the Company delivered steady operational performance and sustained its role as the backbone of the nation's energy security.

Operational Performance

On the operational side, coal production for the year stood at 768.19 million tonnes against 781.06 million tonnes, while offtake stood at 744.83 million tonnes against 762.98 million tonnes, and overburden removal came in at 1,990 million cubic metres compared to 2,019 million cubic metres. Production and dispatch were affected by unusually heavy rainfall in the second quarter and evacuation constraints, but the fourth quarter of the year showed a marked recovery, underlining the resilience of our core operations.

The e-auction platform allocated 101.72 million tonnes during the year, up from 89.38 million tonnes previously, though the average premium over floor price moderated to 38% from 48%.

The performance of our subsidiaries remained an important contributor to the Group's operating strength. Mahanadi Coalfields Limited remained the largest producer among our subsidiaries with 218.31 million tonnes of production, closely followed by South Eastern Coalfields Limited with 176.29 million tonnes and Northern Coalfields Limited with 140.50 million tonnes. Central Coalfields Limited produced 82.26 million tonnes, while Western Coalfields Limited produced 63.03 million tonnes.

Financial Performance

Turning now to the financial performance of your Company on a consolidated basis for the year ended 31st March 2026. Revenue from operations stood at ₹1,68,400 crore, compared to ₹1,69,177 crore in the previous year. EBITDA stood at ₹53,276 crore against ₹57,139 crore, while Profit Before Tax stood at ₹41,923 crore compared to ₹47,163 crore and Profit After Tax stood at ₹31,071 crore against ₹35,450 crore. Earnings per share stood at ₹50.46, compared to ₹57.61 in the previous year.

While revenue remained broadly stable, profitability moderated during the year. This was primarily on account of lower average realisation, higher depreciation

arising from continued capital investment, and increased contractual and statutory expenses. The moderation is reflected in our margins, with EBITDA margin declining to 32% from 34% and net profit margin to 18% from 21%.

At the same time, your Company continued to demonstrate strong financial resilience. Return on Average Equity stood at 30% while Return on Average Capital Employed stood at 21%, reflecting the Company's strong earnings-generating capacity and the substantial capital deployed to support its long-term growth.

Our balance sheet remained robust. Net worth increased by 17% to ₹1,19,102 crore from ₹1,01,720 crore, while capital employed stood at ₹2,18,009 crore. The book value per share also increased significantly from ₹165.06 to ₹193.26, reflecting the strengthening of the Company's net worth. The debt-equity ratio remained low at 0.12, despite a modest increase during the year. These indicators reflect our continued financial strength and prudent approach to leverage. Your Company continued to maintain the highest domestic credit rating of AAA with a stable outlook.

The financial contribution of our major operating subsidiaries also remained strong. Mahanadi Coalfields Limited delivered the highest profit after tax of ₹10,698 crore, closely followed by Northern Coalfields Limited with ₹10,657 crore. South Eastern Coalfields Limited reported profit after tax of ₹4,755 crore, Central Coalfields Limited ₹2,967 crore, and Western Coalfields Limited ₹1,598 crore.

Creating and Sharing Value with Shareholders

During the year, the Board declared three interim dividends aggregating ₹21.25 per equity share and has now recommended a final dividend of ₹5.25 per equity share, subject to your approval. Taken together, this represents a total dividend of ₹26.50 per equity share, or 265% of face value, maintaining the total dividend payout of the previous year despite the moderation in profits.

Since its listing in 2010, Coal India has distributed approximately ₹1.88 lakh crore to its shareholders, reflecting our consistent commitment to sharing the value created by the Company. During the year, CIL also contributed around ₹10,272 crore to the Government of India by way of dividend.

Improving Working-Capital Efficiency

A significant structural change during the year was the revision in the Goods and Services Tax on coal, effective 22nd September 2025, from 5% to 18%. This eliminated the long-standing inverted duty structure and enabled the Company to utilise accumulated input tax credit of ₹5,985 crore during the year. This represents an important improvement in working-capital efficiency, with benefits expected to continue in the coming years.

Momentum in the Current Financial Year

Turning, for a moment, to the current financial year, performance through the first quarter and into July 2026 has been encouraging on the offtake and revenue front even as production remained under some pressure. For the quarter ended 30th June 2026, offtake rose 4% year-on-year and revenue from operations grew 8% to ₹46,255 crore on firmer realisations, with profit after tax improving marginally to ₹8,850 crore. This momentum has carried forward: offtake for July 2026 grew by a strong 18% over the corresponding month last year. Our e-auction platform, operating under the Single Window Mode Agnostic framework, has sustained healthy demand through this period, with cumulative allocations for April to July 2026 commanding an average premium of 43% over notified prices.

Strengthening the Core Coal Business

Your Company's continued position as the world's largest coal producing Company, meeting close to three-fourths of India's domestic coal production, rests on a clear set of operational priorities. Chief among these is strengthening evacuation infrastructure. Nine First Mile Connectivity projects became operational during the year, and mechanised evacuation capacity is being scaled up from around 151 million tonnes per annum to nearly 994 million tonnes per annum, an investment of roughly ₹25,600 crore across 72 identified projects, supported by various strategic partnerships.

On the underground mining front, your Company continued its shift toward mass production technology, with continuous miner deployment and highwall mining being expanded, alongside a roadmap targeting 70 million tonnes of production from underground mines by FY 2029-30.

Growth Strategy: Strengthening the Core, Building New Platforms

Your Company's growth strategy rests on two pillars: strengthening our core coal business and building new platforms for the future. On the core business, we remain focused on our long-term production roadmap of approximately one billion tonnes by FY 2029-30, supported by 124 ongoing mining projects with a combined capacity of over 1,045 million tonnes per annum and sanctioned capital exceeding ₹1.69 lakh crore.

On diversification, the year witnessed genuine momentum. In the renewable energy vertical, Coal India commissioned its first 100 MW solar plant at Patan, Gujarat on 4th May 2026 and commissioned 200 MW of our 300 MW Khavda solar project on 8th July 2026. The Company recorded its first-ever revenue of ₹5.68 crore from the sale of energy in the first quarter of this financial year. We have set a target of 9.5 GW of renewable capacity by FY 2029-30, building this out through projects in coal mine areas, joint ventures with state utilities in Rajasthan and Uttar Pradesh, alongside battery storage projects in Odisha and Telangana.

Coal Gasification and Coal Beneficiation

The coal gasification initiative highlighted earlier is a defining part of this diversification journey, taking Coal India beyond conventional coal production into higher-value industrial applications. Alongside this, we commissioned an additional 2 million tonne per annum coal washery at Bharat Coking Coal Limited, taking that subsidiary's total washing capacity to 17.35 million tonnes per annum, and commenced production from our first revenue-sharing mine developer and operator project at the ASGKCC mine in Katras.

Beyond Coal: Critical Minerals and International Footprint

We have also taken a step beyond coal itself. Your Company secured the Kawalapur Rare Earth Elements (REE) Composite Licence Block in Maharashtra in January 2026, which has taken CIL's total critical mineral blocks to five. Earlier this month, your Company secured Gadadharpur iron ore block in Odisha, with an estimated resource of 288 million tonnes, marking Coal India's first move into iron ore mining.

CIL has strengthened its international footprint through the incorporation of its wholly owned subsidiary, CIL Global Pte. Ltd., in Singapore on 24th August 2026, to facilitate overseas critical mineral asset acquisition. Taken together with our continuing exploration of critical minerals, our joint venture with Damodar Valley Corporation to build a 1,600 MW thermal power project at Chandrapura and the maiden dividend of over ₹404.37 crore received from our fertiliser joint venture, Hindustan Urvarak and Rasayan Limited, these initiatives reflect a Company deliberately building the platforms that will define its next decade.

Sustainability, Environment and Social Responsibility

Coal India's social responsibility commitments go well beyond regulatory compliance. Against a statutory requirement of ₹17.60 crore for the standalone company, we spent ₹156.57 crore during the year, and on a consolidated group basis, against a requirement of roughly ₹892 crore, the group spent ₹1,016.28 crore.

Healthcare and nutrition remained our largest single area of engagement, with flagship programmes such as the Thalassaemia Bal Sewa Yojana crossing the milestone of 1,000 bone marrow transplants, and Project Nanhua Sa Dil completing 500 life-saving cardiac surgeries for children in Jharkhand. We also completed a girls' hostel at IIT Bombay, supported infrastructure at a Kendriya Vidyalaya at NIT Rourkela, and continued digital education and hygiene programmes for tribal students across Eklavya Model Residential Schools. These initiatives were recognised through several national awards during the year, including from ET Now and the Greentech Foundation.

During the year, we planted 52.92 lakh saplings across nearly 2,404 hectares and took our developed eco-parks count to 39. Further, CIL has registered over 1,793 hectares of degraded forest land under the Government's Green Credit Programme. We shared 3,140 lakh cubic metres of treated mine water with surrounding communities, benefiting over 16.2 lakh people across 971 villages, and received final closure approval for 32 mines, taking our cumulative closed mines count to 40. Capital expenditure on solar projects specifically rose 188% from ₹573 crore to ₹1,651 crore, part of a broader ₹6,797 crore green technology outlay for the year.

Governance and Institutional Strength

As Coal India expands in scale and diversifies its portfolio, strong governance remains central to our business. The Board continues to provide strategic oversight across business performance, capital allocation, project execution, risk management and long-term planning. Your Company has complied with the Corporate Governance Guidelines for Central Public Sector Enterprises issued by the Department of Public Enterprises, the applicable provisions of the Companies Act, 2013, and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, except for the appointment of the requisite number of Independent Directors, which rests with the Government of India. The matter has been taken up with the Ministry of Coal.

The Annual Report includes a separate section on Corporate Governance, the requisite compliance certificate from a peer-reviewed Practising Company Secretary and the Secretarial Audit Report for FY 2025-26. Guided by the principles of integrity, transparency and accountability, we continue to strengthen our governance framework in line with evolving regulatory requirements while creating long-term stakeholder value.

Coal India and India's Next Phase of Growth

Coal India's growth story and Coal India's growth story remain deeply intertwined. As the country pursues its ambitions under the broader vision of Atmanirbhar Bharat, building a self-reliant nation less dependent on external sources for its critical inputs, energy security sits at the very centre of that ambition.

Every tonne of coal that Coal India produces domestically is a tonne that need not be imported; every rupee we invest in evacuation infrastructure strengthens the logistics backbone of the Indian economy; and every new business we build, from solar power to coal gasification to critical minerals, reduces the nation's reliance on imported technology and materials for the energy transition itself.

We do not see coal and clean energy as competing forces; rather, we see them as complementary pillars of India's energy basket and transition, supporting the nation's growth today while enabling a more sustainable energy future. We see Coal India's role as ensuring that India's growth is never held back for want of reliable energy, while we simultaneously build the capabilities that will carry this Company, and the country's energy sector, into a more diversified and sustainable future.

Looking Ahead

Looking ahead, our focus will be on improving the quality and sustainability of earnings. We will continue to work towards improving realisation, enhancing productivity, containing controllable costs and improving asset utilisation. As our large portfolio of mining and diversification projects progressively becomes operational, our objective will be to translate these investments into higher productivity, stronger cash generation and sustainable earnings growth.

As we look to the year ahead, your Company will continue to focus on strengthening production and evacuation capacity, deepening our presence in renewable energy and coal gasification, and maintaining the financial discipline that has allowed us to reward our shareholders consistently since our listing in 2010.

Before I close, I would like to state my sincere appreciation for the employees of Coal India across every subsidiary and coalfield, whose work through weather disruptions and operational challenges kept this Company running. I am equally grateful to the Ministry of Coal and the Government of India for their continued guidance and support, to our consumers for their sustained confidence in us, to our auditors and regulators, and most of all, to each of you, our shareholders, for the trust you continue to place in this Company.

Jai Hind.

BOND YIELD SEES BIGGEST MONTHLY RISE THIS FISCAL

GOVERNMENT BONDS TUMBLED on Monday, with the 10-year benchmark yield recording its biggest monthly rise of the fiscal year, as elevated oil prices and hawkish signals from the RBI were reinforced by the Federal Reserve. The yield on the benchmark 6.94% 2036 bond ended at 6.9452%, its highest since June 8, after closing at 6.9108% on Friday. The yield rose 11 basis points in August, its biggest monthly increase this financial year.

NIIF infra fund secures ₹19,000-cr first close

BLOOMBERG August 31

NATIONAL INVESTMENT AND Infrastructure Fund (NIIF) on Monday said it has secured ₹19,000 crore (around \$2 billion) in the first close of its latest infrastructure fund, NIIF Infrastructure Fund II. The first close represents more than 60% of the overall ₹30,000-crore target size.

Vinod Giri, managing partner of NIIF's infrastructure fund, said in an interview that it now plans to raise the remaining portion within 18 months. The fund is courting a broader pool of investors from Japan to Europe, betting that the country's infrastructure boom will keep drawing long-term overseas capital.

TARGET PRICES CUT; CREDIBLE SUCCESSION SEEN KEY TO RERATING

HDFC Bank's succession test goes beyond CEO

CHRISTINA TITUS
Mumbai, August 31

SASHIDHAR JAGDISHAN'S IMPENDING EXIT may have removed one uncertainty for HDFC Bank, but the succession challenge goes well beyond the CEO's office. No wonder, brokerage firms have lowered their target prices. They have, however, retained their "buy" recommendations, betting that a credible successor and a refreshed leadership team could eventually trigger a rerating.

Sample this: Executive Director V Srinivasa Rangan's term ends in November 2026, while the bank is yet to appoint a successor to former Executive Director Bhavesh Zaveri, according to a report by proxy advisory firm Institutional Investor Advisory Services. Directors Sandeep Parekh and D Ranganathan will complete their terms in January 2027.

CFO Srinivasan Vaidyanathan is also due to retire in November, while Bhavin Lakhpatwala, head of strategy and investor relations, resigned in June.

The changes leave HDFC Bank facing a potentially significant reshaping of its senior leadership over the coming months.

The churn intensified on Saturday when the bank announced that Jagdishan would not seek reappointment and would step down at the end of his term in October 2026. Investors initially cheered the development, sending the stock up nearly 3% on Monday, before the gains evaporated. The shares eventually closed 1.53% lower at ₹709.

"We believe Jagdishan's decision is incrementally positive as it removes one binary uncertainty. However, clarity on the successor could take time,

CHALLENGING TIME

■ Exits of a number of senior executives have compounded the problem

■ The market waits to see the reshaping of the lender's senior leadership

■ Investor confidence has taken a hit by a series of regulatory, legal and governance-related developments

■ HDFC Bank shares have fallen 28% in 2026, compared with 2.61% fall in Bank Nifty

potentially extending into 2027F, in our view. Until then, we believe the leadership overhang remains," Nomura said.

The brokerage expects the stock to remain under pressure in the near term until there is clarity on both the next CEO and the mandate. A credible appointment, however, could become a "meaningful rerating catalyst," it said. "In short, one overhang closes; and the market now waits to see who leads HDFC Bank into its next phase."

That question assumes greater significance given the stock's prolonged underperformance. HDFC Bank shares have fallen 28% in 2026, compared with a 7.84% decline in the Nifty and a 2.61% fall in the Bank Nifty, wiping around ₹4.33 lakh crore off the lender's market capitalisation.

The weakness has come

amid concerns over growth as well as a string of governance and regulatory issues.

Brokerages see Deputy MD Kaizad Bharucha as the frontrunner among internal candidates. His candidature, however, comes with a complication: The 15-year cap on board tenures at banks could leave him unable to serve a full three-year CEO term unless the Reserve Bank of India grants an exemption.

Media reports have also named external contenders, including Anup Bagchi, CEO of ICICI Prudential Life Insurance; Rajiv Sabharwal, CEO of Tata Capital; and Amitabh Chaudhry, CEO of Axis Bank, and Dinesh Khara, former chairman of State Bank of India.

Investor confidence has been dented by a series of regulatory, legal and governance-related developments, includ-

ing the Credit Suisse AT1 bond controversy and the MSRDC deposit-pricing issue, which resulted in warning letters and monetary penalties involving Jagdishan and other officials. The abrupt departure of former chairman Atanu Chakraborty, a US lawsuit and Jagdishan being named in the Lilavati Hospital-related matter have added to the concerns.

Jefferies expects the transition to weigh on revenue momentum, particularly deposit mobilisation and fee income, prompting it to cut its FY27-FY29 earnings estimates by 3% each. It does not, however, see a material risk to the asset quality, citing the bank's record of maintaining high-quality assets.

The broker age cut its target price to ₹880 from ₹1,050, arguing that heightened uncertainty could raise the bank's cost of equity and compress valuations. ICICI Securities, Nuvama and Motilal Oswal are among brokerages to have lowered their price targets.

Yet, analysts also see the leadership reset as an opportunity for HDFC Bank to draw a line under a difficult period.

Motilal Oswal said changes in the leadership team could help address the scepticism that has engulfed the lender in recent months. "A new leadership team, along with an improvement in growth and earnings trajectory, should improve investor sentiment over the medium term," it said.

For investors, therefore, Jagdishan's departure settles only one part of the leadership question. The bigger test is who comes next — and how quickly HDFC Bank can rebuild the team around the new chief.

Liquidity tops ₹5L cr

FE BUREAU Mumbai, August 31

BANKING SYSTEM LIQUIDITY has strengthened significantly on account of inflows from foreign currency non-resident (FCNR) deposits. The system liquidity was at a surplus of ₹5.04 lakh crore as on Sunday, the highest since April 15. It has averaged at ₹3.57 lakh crore in August, compared to ₹1.07 lakh crore in July, according to data from the Reserve Bank of India.

Banks have mopped up \$65.4 billion via FCNR(B) deposits till August 21, according to the latest central bank data. Total inflows, including external commercial borrowing and overseas foreign currency borrowing,

stood at \$72.8 billion.

To drain out excess liquidity, the RBI conducted two variable rate reverse repo (VRRR) auctions with 15-day and overnight tenures on Monday. The 15-day VRRR saw less demand, receiving bids worth ₹1.35 crore, against the notified amount of ₹6 lakh crore. The overnight VRRR received bids worth ₹2.5 lakh crore, against the notified amount of ₹4 lakh crore.

A report from HDFC Bank on Monday said estimated total flows under the concessional swap facilities are expected to be closer to \$90-95 billion, reports PTI.

Collectively, these inflows are expected to add rupee liquidity of anywhere between Rs 8.5-9 lakh crore.

RBI support, inflows push rupee to near 1-mth high

CHRISTINA TITUS Mumbai, August 31

THE RUPEE STRENGTHENED to nearly one-month high, supported by likely intervention from the central bank and equity-related inflows, said market participants. The domestic currency rose 21 paise to 95.17 against the dollar on Monday, its highest level since August 5, according to Bloomberg.

"The rupee was supported by the RBI intervention and MSCI-related inflows. A softer dollar index also aided the currency. These factors together drove the rupee's gains on (Monday)," said Dilip Parmar, research analyst, HDFC Securities.

The rupee was the third-top performing currency compared to its Asian peers on Monday after South Korean won and Japanese yen.

Oil prices rose 2.32% to \$91.38 a barrel on Monday amid fresh geopolitical tensions, putting pressure on the rupee and capped gains.

Premium phones fly, budget ones flag

GEN Z remains the prize target — a cohort flush from the 2025-26 income tax cuts that zeroed out tax for salaried employees earning under ₹12.75 lakh a year.

The entry level tells the opposite story: Affordability is eroding fast. Memory costs for a ₹10,000 phone have nearly quadrupled to ₹4,500, and manufacturers have little choice but to pass some of it on. The result: Phones under ₹15,000 made up just 27% of shipments at the end of June, down from nearly 46% a year earlier, Counterpoint estimates — even with makers like Boltt absorbing a sizeable chunk of the cost increase.

"Passing on the entire increase would directly affect demand," said Boltt founder and CEO Arnav Kishore, noting these buyers are acutely price-sensitive.

With fewer affordable models on shelves, consumers are simply holding on to their phones longer. Replacement cycles of 18-24 months have stretched out, experts say — and incremental upgrades in display or connectivity are no longer sealing the deal. "Buyers are beginning to question whether the extra spend is worth it," says Faisal Kawoosa, founder and chief analyst at Techarc.

MSCI rebalancing fires up NSE closing auction

TEJAS SHAH, head of trading at Equirus Securities, said institutional investors routed large MSCI index-adjustment orders through the CAS window to minimise tracking errors, resulting in a sharp surge in high-value liquidity.

According to him, the smooth execution of such large orders could help build investor confidence in the new mechanism and draw more participants into the closing auction. However, stock-specific volatility could remain elevated until liquidity deepens further.

Of the 210 stocks traded in the NSE CAS on Monday, 60 — nearly three in every 10 — touched the daily 3% price limit allowed during the auction. As many as 47 stocks hit the 3% upper limit, while 13 touched the lower limit.

"CAS volumes were significantly higher on expiry days,

suggesting that event days do attract trading interest. Therefore, it is not surprising that MSCI rebalancing-related flows attracted additional liq-

uidity," said Anand James, chief market strategist at Geojit Investments.

Eternal dominated the closing auction both by vol-

ume and value, with 201.9 million shares worth ₹6,626 crore changing hands. Laurus Labs, Reliance Industries, Adani Energy Solutions and Adani Enterprises were among the other most actively traded stocks by value.

Reliance Industries also featured among the most traded stocks by volume, alongside Vodafone Idea, GMR Airports and Yes Bank.

The Nifty gained 30.15 points, or 0.13%, during the CAS before settling at 24,080.40, down 95.25 points, or 0.39%, for the day.

The impact was far more dramatic on the Bank Nifty. The banking index jumped 628.60 points, or 1.09%, during the closing auction to finish at 58,024.95 — up 528.65 points, or 0.92%, from its previous close of 57,496.30.

At 3:15 pm, when normal trading ended, the Bank Nifty

was down 98.95 points, or 0.17%, at 57,397.35. The closing auction transformed what had been a losing session for the index into a gain of nearly 1%.

The MSCI-driven activity spilled over into the broader cash market as well. NSE cash-market turnover surged 64.2% to ₹1.82 lakh crore, its highest level in two months.

Monday also marked the completion of the first month of the CAS. During this period, NSE recorded a cumulative turnover of ₹63,000 crore (approximately \$6.6 billion), with a market share of 98.2%.

Sebi Chairman Tuhin Kanta Pandey recently described CAS as a microstructural reform modelled on closing mechanisms already used in developed markets including Japan, the US, Germany and Australia, as well as several European markets.

Growth beats war blues

"THIS IS a major takeaway as this involves both private and government expenditure, with the former being driven by data centres and power besides metals," said Madan Sabnavis, chief economist at Bank of Baroda.

Foreign trade provided another significant boost despite supply disruptions and uncertainty caused by the US-Iran war. Exports of goods and services grew 12%, while imports contracted 1.1%. Net exports are estimated to have contributed 3 percentage points to headline GDP growth, the highest since January-March 2024.

Household demand also remained supportive. Private final consumption expenditure, the largest component of aggregate demand, grew 7.1%, moderating slightly from 7.5% in the March quarter.

Rajani Sinha, chief economist at CareEdge, said measures such as income-tax cuts and GST rate rationalisation, along with low inflation, augured well for private consumption. The government's capex thrust had also translated into sustained double-digit investment growth for two consecutive quarters, she said.

Among the broad sectors, services led growth at 10%, although this was slower than 11.5% in the previous quarter. Industry expanded at a three-quarter high of 7.7%, while agriculture growth eased to 3.6% from 3.9%.

Within industry, manufacturing grew 9.2%, its fastest pace in three quarters, while electricity and other utility services expanded 8.9%, an eight-quarter high. Mining was the outlier, contracting 2.4%.

Nominal GDP growth accelerated to an eight-quarter high of 10.3% in April-June from 8.1% a year earlier.

THERE WILL BE A RESPONSE AFTER IRANIAN ATTACK, SAYS TRUMP

US, Iran exchange attacks; UAE and Jordan targeted

PARISA HAFEZI & DAVID LAWDER
Dubai/Asheville, North Carolina, August 31

US PRESIDENT DONALD Trump was quoted on Monday as promising to "hit them hard" after Iran launched missiles overnight at two US air bases in Jordan in response to a US attack on Iran's Larak island. "We're going to hit them hard," a Fox News reporter quoted Trump as telling the channel. "There will be a response."

A senior Iranian source, described the overnight hostilities between the US and Iran, the first since late July, as a "limited and contained confrontation" but added that Tehran would deliver a harsh response if attacked again.

Trump also said US air defences had shot down all Iranian missiles that could have caused any damage and said that tough new US economic sanctions on Iran were having a big impact, Fox News reported.

US Treasury Secretary Scott Bessent, echoing Trump, said on

The senior Iranian source, said conditions in Hormuz would "become worse for vessels that violate" rules set by Tehran for passage through the waterway. The source added that no target was beyond Iran's reach. Iranian President Masoud

Pezeshkian struck a milder tone on Monday, telling India's Prime Minister Narendra Modi on the sidelines of a regional security meeting in Kyrgyzstan, that his country still sought a negotiated resolution of the conflict. Aon to acquire USI from KKR in \$17-bn deal

ARASU KANNAGI BASIL
August 31

AON SAID ON Monday it will buy rival USI Insurance Services in a \$17 billion deal from private equity firm KKR, in one of the biggest insurance acquisitions in recent years.

Mega buyouts have become more typical in the highly fragmented insurance brokerage industry in recent years as companies turn more willing to pay top dollar to bolster their market presence and competitive edge.

The deal highlights Aon's efforts to further expand its presence in US middle-market insurance segment, which caters to mid-sized businesses. "USI will substantially enhance our middle-market footprint and expand access for our firm in the E&S (excess & surplus) segment," Aon CEO Greg Case said. The E&S segment is among the fastest-growing areas in US commercial insurance.

The US middle-market segment is pegged at more than \$40 billion and accounts for more than one-third of US commercial property and casualty direct written premiums. —REUTERS

Chinese factory slump eases, but services struggle

YUKUN ZHANG AND LIZ LEE
Beijing, August 31

CHINA'S FACTORY ACTIVITY improved in August on stronger demand but remained in contraction, while services activity stayed weak, underscoring deepening imbalances in the economy and fuelling calls for policy measures to boost the economy.

The divergence between manufacturing and services sectors suggests that China will continue to rely on manufacturing and exports to drive growth as momentum remains under pressure from lacklustre domestic consumption and investment.

The official manufacturing purchasing managers' index (PMI) picked up to 49.8 from 49.2 in July, remaining below the 50-mark separating growth from contraction, a survey by the National Bureau of Statistics showed. It beat the median forecast of 49.6 in a Reuters poll.

NBS data showed both demand and output improved in August, with sub-indices for new orders and production returning to expansion territory above 50.

"Domestic demand seems to be coming back, although it's more likely to have been driven by AI and exports than by policy expansion," said Xu Tianchen, senior economist at the Economist Intelligence Unit.

Toyota & Honda may get stuck with Trump's Canada tariff bill

DANIEL LEUSSINK & MAKI SHIRAKI
Tokyo, Aug 31

US PRESIDENT DONALD Trump is targeting Ottawa with a proposed 50% tariff on Canadian car imports — but Japan's Toyota and Honda may end up footing the bill.

The two Japanese automakers account for more than three-quarters of all cars made in Canada. They could be forced to shutter some production lines if the tariffs go into effect on January 1 as proposed, analysts said.

While a deal could still be reached, the timing of the US tariffs couldn't be worse, as Japanese automakers are being

stung by competition from low-cost Chinese EVs in markets such as Southeast Asia, Europe and Latin America.

The US remains Toyota and Honda's biggest market and, crucially, one where Chinese

rivals like BYD aren't allowed in.

Canadian-built cars accounted for almost a quarter of Honda's US sales and 17% of Toyota's last year, the most among major automakers, according to Barclays analysts. As a result, the two face the biggest potential hit from Trump's plan to double the levies from the current 25%.

"If you really wanted to destroy the Canadian auto industry, you could with these tariffs," said Julie Boote, autos analyst at Pelham Smithers Associates in London.

Both companies would likely have to close some of their Canadian assembly lines, she said. —REUTERS

Nvidia to invest \$3.5 bn in chipmaker MediaTek

NVIDIA IS INVESTING \$3.5 billion in MediaTek, deepening collaboration with the Taiwanese chipmaker at a time when it's working to persuade more firms to build chips that plug into its dominant data centre ecosystem. Nvidia will buy bonds convertible into MediaTek shares, the companies said. The transaction will be Nvidia's largest direct investment outside the US. The investment broadens a tie-up between the two chip designers that will see MediaTek using NVLink Fusion and NVHBM technology as part of an Nvidia tech suite to help components communicate seamlessly in data centres. The smaller firm is trying to challenge Broadcom and Marvell

Technology by helping owners of data centres create their own components.

THE YEN'S BREACH of 160 versus the dollar underscores the Japanese currency's vulnerability to further weakness and the heightened risk of authorities entering the market again to slow its decline. AGENCIES

● What is ITF? How did it start?

IN THE 1970s, inflation increased in most economies due to rise in oil prices and failure of monetary policy. Economist Milton Friedman proposed monetarism to tackle inflation, but that did not work. The inflation targeting framework (ITF) emerged from the shadows of monetarism. In the late 1980s, the government of New Zealand gave its central bank an inflation target to achieve. The combination of a transparent inflation target backed by autonomy and accountability became the ITF. The ITF achieved a miracle in not only lowering inflation to the desired target but also helped it remain around the target for a long period of time. As of 2026, nearly 50 countries have adopted the ITF.

● When did ITF discussions start in India?

IN 1985, THE Sukhamoy Chakravarty Committee endorsed monetarism to achieve inflation target of 4%. In 1997, the Committee on Capital Account Convertibility under SS Tarapore suggested adoption of the ITF as one of the measures to achieve capital account convertibility. In the early years of the 21st century, four expert committees — Fuller Capital Account Convertibility (Tarapore 2006), Mumbai as International Financial Centre (Percy Mistry 2007), Financial Sector Reforms (Raghuram Rajan 2008) and Financial Sector Legislative Reforms Commission (B. N. Srikrishna 2013) all suggested the ITF.

MONETARY POLICY

How RBI's inflation targeting ensured price stability & growth

The RBI's inflation targeting framework (ITF) completes a decade this year. It is not just a major milestone in India's monetary policy but also in its macroeconomic framework. The ITF has been successful in lowering inflation in its first 10 years, but big challenges remain going forward, writes *Amol Agrawal*

● Why was it not accepted initially?

FIRST, THE RESERVE Bank of India (RBI) did not wish to straightjacket its policy by focusing only on inflation and instead adopted a multiple-indicator approach where it tracked indicators such as growth, credit, money supply, etc. Second, India did not have a national measure of Consumer Price Index (CPI) which was the preferred

inflation measure for ITF. There were three CPI indices — Industrial Workers, Agricultural Labour and Rural Labour — but they were used for adjusting wages for the three occupational groups. The RBI used Wholesale Price Index (WPI) for its monetary policy which did not measure inflation at consumer level.

4.6%
AVERAGE CPI INFLATION IN THE TARGET PERIOD OF 2016-26 AGAINST 8.1% IN THE PREVIOUS DECADE
THE DEBATE ON WHETHER RBI SHOULD TARGET HEADLINE INFLATION OR CORE INFLATION IS LIKELY TO INTENSIFY

● What finally led to its implementation?

FIRST, FROM 2011 onwards, the government started releasing CPI inflation data at all-India level. Second, after the global financial crisis, the sharp rise in inflation led to questions about the RBI's priorities to stabilise inflation over the multiple indicators. In 2013, the RBI constituted a committee under then Deputy Governor Urjit Patel whose recommendation on the ITF was finally implemented.

The government played a central role in adoption of the ITF by amending the RBI Act in May 2016. A Monetary Policy Committee (MPC) was tasked to achieve CPI inflation target of 4% with a band of

+/- 2%. The band was adopted to help the RBI deal with supply shocks which constantly impact and change food and fuel prices, leading to sudden changes in inflation. The minutes of the MPC were to be released 14 days after the meeting. In case the target is not met for three consecutive quarters, the Governor has to write to the government citing reasons for the deviation. The RBI also adopted a flexible ITF which aimed to "maintain price stability while keeping in mind the objective of growth." The ITF became operational from October 2016 and was to be renewed every five years.

● Has ITF been able to deliver?

THE AVERAGE CPI inflation has declined by 3.5 percentage points from 8.1% in the pre-inflation targeting (IT) decade (2006-16) to 4.6% in the IT period (2016-26). The average GDP growth has edged up marginally from 6.8% in the pre-IT decade to 7% in the IT decade. Thus, the ITF has achieved both price stability and higher growth. Not surprisingly, the ITF has been renewed twice in 2021 and 2026.

● What reforms does MPC need?

THE MPC VOTES only on the repo rate; other monetary instruments such as Cash Reserve Ratio, Open Market Operations, etc., remain outside the scope of the MPC. This implies that the MPC does not have full control on deciding the monetary policy. The RBI Act should be amended to ensure that all the monetary instruments are brought within the purview of the committee.

● What are the immediate challenges?

THE GLOBAL ECONOMY is re-entering a phase of supply shocks which is likely to keep prices of food, fuel and precious metals elevated for a long time. The weight of these commodities is close to 50% in India's CPI basket, implying that supply shocks will test inflation levels. The monetary policy is designed to manage demand shocks and not supply shocks. The RBI has faced this dilemma

of managing monetary policy amidst supply shocks for long due to domestic factors; it now faces it due to global factors. The debate on whether the RBI should target headline (inflation of all items) or core inflation (inflation excluding food and fuel) is set to intensify.

Resilient India

The economy has shrugged off elevated oil prices, tariff woes, and high input costs

WITH A STELLAR 7.8% year-on-year expansion in the June quarter, the Indian economy has demonstrated a degree of resilience that few expected amid the disruptions caused by the war in West Asia. Growth has moderated from the 8.6% recorded in the March quarter, but the latest print is nonetheless impressive. More encouragingly, the strength is fairly broad-based. Gross value added grew an even stronger 8.2%, supported by both manufacturing and services. Manufacturing in particular has posted a good 9.2% increase during the quarter; corporate results suggest the output from segments such as capital and engineering goods as also automobiles and other durables has been strong. Despite tariff troubles in the US market and the hostilities in West Asia, exports grew at 12% during the quarter.

Services, which generate a large number of jobs, have also held up well. Financial services benefitted from robust credit growth, while the employment-intensive trade and transport segment managed to overcome both war-related disruptions and an unfavourable base. Public administration grew 7.5%, suggesting that spending by the Centre and states continued to support economic activity. The more important takeaway, however, is on the demand side: both consumption and investment pulled their weight. Gross fixed capital formation surged nearly 12%, its strongest showing in the new gross domestic product (GDP) series. Government capex has undoubtedly contributed, but the number is encouraging at a time when a broad-based revival in private-sector investment is still awaited.

Consumption, too, proved more resilient than anticipated. Higher oil prices and concerns over employment might have been expected to constrain household spending, yet private final consumption expenditure grew a healthy 7.1%. Income-tax relief and goods and services tax rate cuts appear to have provided support, something also reflected in high-frequency indicators such as automobile sales and property purchases. There is, however, reason for some caution. Nominal GDP grew just 10.3%, well below expectations of 12.5-13%. The relatively narrow gap between nominal and real growth suggests moderate aggregate price pressures, but inflation in specific categories can still erode household purchasing power. Moreover, the consumption boost from tax cuts will eventually fade. The pace of expansion could therefore moderate in the coming quarters. El Niño conditions pose a risk to farm output, while a prolonged period of elevated oil prices would squeeze both household budgets and corporate margins. Global conditions are another source of uncertainty, particularly if higher US interest rates weigh on growth and capital flows. Even so, the strength of the first-quarter numbers suggests that growth of 7% or more for FY27 is increasingly achievable, barring a fresh external shock. The composition of Q1 growth — investment, consumption, and exports all contributing meaningfully — is arguably as reassuring as the headline number itself.

There is also an important implication for monetary policy. The strong growth performance gives the Reserve Bank of India greater room to raise rates if inflation becomes more generalised and begins to overshoot its projections. The central bank expects headline retail inflation to remain above 5% from September through June 2027, but has so far refrained from tightening because price pressures have not become broad-based. There is no reason to pre-empt that judgement. But with growth displaying considerable resilience, the trade-off facing the Monetary Policy Committee has become easier: rising inflation broaden, it can act without having to worry unduly about jeopardising the recovery.

Children should be more than a luxury good

IT'S INCREASINGLY APPARENT that humanity won't be returning to levels of fertility that helped quadruple the world's population over the past century. Wistful state programmes almost guarantee disappointment, given households are getting smaller — and costlier. But some political leaders aren't giving up yet.

Singapore, with one of the lowest fertility rates in Asia, had hoped enticements like baby bonuses would make a difference. But its fertility rate slipped to 0.87 last year, below Japan's and within sight of South Korea, which has often ranked near the bottom among major industrial countries. (A total fertility rate, or TFR, is the number of kids a woman has during her childbearing years; 2.1 is regarded as the pace at which a society can reproduce itself.) The city-state is trying a fresh tack.

In a speech last week, Prime Minister Lawrence Wong signalled that traditional incentives alone won't do the job. Singapore will now underwrite almost the entirety of childhood, not just the earliest stages. Each child will receive almost \$S70,000 (\$55,000) in direct assistance through the age of 17. Leave for parents is getting a sizeable boost, childcare fees are being cut, and income thresholds to buy prized apartments built by the government will be eased. As powerful as he hopes these measures are, Wong was at pains to emphasise there's no returning to yesteryear. The TFR will still fall far short of replacement. "We are not alone in this," he said. "It's a challenge confronting virtually every society." One that comes with consequences: The nation's population, now 6.1 million, will grow more slowly, as will the labour force.

A recent paper offers little encouragement for those hoping the decline in fertility is a passing stage. The UN created waves a couple of years ago when it projected the planet's headcount would peak at 10.3 billion in the 2080s, something it had earlier deemed to be far off. But, if anything, it could be too optimistic.

In the absence of a substantial change, the peak is likely to hit sooner, at roughly 9 billion around 2056, according to Jesus Fernandez-Villaverde, a professor at the University of Pennsylvania, and Patrick Norrick at Northwestern University.

Society is more urban and far less agricultural than in prior centuries, women aspire to higher educational qualifications and rewarding careers. Advances in reproductive health, the steepening cost of putting youngsters through school, and soaring real estate prices get their share of the responsibility. Add to that the failure of many men to adapt to changing social mores — the prevalence of duds rather than dads, in the words of a Nobel laureate. Even the iPhone and cumbersome car seats have been faulted. Might some of these be symptoms rather than the root cause? If so, the conclusions are troubling.

The culprit could be the 21st century. "We live in a society built around large organisations and formal credentials, which makes a third child expensive and childlessness cheap, and that circumstance has created a mismatch between women's position outside the home and men's inside it," Fernandez-Villaverde and Norrick write. "As modernity has spread everywhere, even to countries with low income per capita, fertility has also fallen everywhere." They observe "children are becoming a luxury good."

The decline in household size is especially pronounced in Asia, which developed more rapidly in the postwar years than Western societies did over far longer periods. Is Singapore's latest approach destined to fall short? Not necessarily. Some places have had a modicum of success. Korea has provided a range of incentives, childcare services, expanded cash allowances, and leaned on lenders to offer preferential mortgage programmes. Companies have offered baby bonuses to employees. The country's fertility rate edged up for two consecutive years.

The implications of fewer births (and the expanding proportion of the elderly population) for pensions, healthcare and even national security are profound. All must be funded; over-reliance on income taxes is unsustainable. Singapore's last boost to the consumption tax was framed around the need to provide for its fast ageing society.

Children shouldn't be seen as a high-end product, burnished to demonstrate material success. We can put smart phones down for a while, provided the incentives are right.

SITA declaration of war? On July 31, at the opening ceremony of the World Artificial Intelligence Conference at Shanghai, Chinese President Xi Jinping positioned China as the leader of a new AI global order, challenging the US. Xi was reiterating the Chinese intent to not just shape, but govern this space. Because, while the US retains decisive advantage in frontier model performance, hi-end compute, and private capital, China already leads in research, patent volume, and industrial deployment.

The Chinese pitch was well thought through. Their articulation of this battle-of-giants hinges around expensive, less accessible, closed-source models (grappling with breach issues) versus the general public availability of their own open-source models. Xi Jinping's says, "AI development should not be a solo performance by a single country, but a symphony of international cooperation." As expected, China led the creation of a new AI governance body last month.

It's also about China challenging the Pax Silica coalition — which was constituted to counter their stranglehold on critical minerals.

The battleground: The US compute ecosystem is far ahead by way of physical infrastructure, and American firms dominate advanced chip design. Their policies have oscillated between banning advanced chips to restricting usage — forcing China to prioritise efficiency, smarter algorithms, novel design choices, and alternative architectures.

The US sought to increase their lead with the US CHIPS and Science Act, 2022, that committed \$52 billion to domestic fabrication. China's national chip fund of \$47.5 billion followed in 2024.

China is consciously directing more investments towards state-backed firms like Huawei and Cambricon to reduce outside dependence, underscoring a fascinating contrast between private, market-

led US innovation and Chinese state and local government-led execution. An important datapoint is the vast gap in private AI investments. Stanford's 2026 AI Index Report puts this at \$286 billion for the US, 23 times that of China in 2025. That picture is already changing, with IPOs in Hong Kong powering 40 new listings with \$110 billion this JFM quarter.

What complicates the scenario is that global supply chains are deeply entwined. Chip designers, including in the US, rely on Taiwan and South Korea in terms of manufacturing, and Chinese chips are widely embedded, given their extensive footprint in general infrastructure gear.

The world's most impactful researchers have been trained in US institutions. Yet, China leads comfortably vis-à-vis sheer research volume — ascribable in part to the increasing reverse-flow of Chinese researchers to their home country. Further, the Stanford '26 Report says that AI scholars moving to the US has dropped precipitously — 89% since 2017. Consequently, China's 38,000 generative AI inventions are now about six times that of the US.

The Chinese government's emphasis on maintaining core manufacturing dominance is paying off. Tellingly, China has nearly nine times the US volume of industrial robot installations.

The Chinese govt's emphasis on maintaining core manufacturing dominance is paying off. Tellingly, China has nearly nine times the US volume of industrial robot installations

China has quietly and deliberately overinvested in its electricity infrastructure over decades, while AI's insatiable power demand is outpacing the grid's stretched development cycles in the US. Goldman Sachs suggests that this could stymie near-term US AI growth.

However, the US leads in AI adoption to accelerate services, whether it be in healthcare or mobility, which reflects the superiority of the country in connecting algorithms to capital-intensive physical networks — like roads, vehicles, warehouses, airports, maps, sensors, and the agencies involved. This has resulted in higher productivity, greater personalisation, and a reinforcing improvement loop.

How do their AI models stack up? On July 31, Chinese AI startup Moonshot released Kimi K3. It has 2.8 trillion parameters, making it the world's largest open-weight AI system, which is fast catching up with the most advanced US systems. That announcement shook the markets (as always happens when Chinese models threaten US tech leadership). The Dow Jones Industrial Average went down 40 points, the Nasdaq Composite went 1.7% lower, and the S&P 500 dropped 0.8%.

SC dismissal of Vantage Point's review petition has signalled that forum hunting & endless litigation cannot gut the insolvency resolution ad infinitum

A MODERN ECONOMY is built on three foundational aspects comprising the freedom to enter, to operate on fair and neutral terms, and to exit a business. The first two draw most of the attention, but the third is quieter and equally important. An economy that fundamentally recognises that failure is the unavoidable companion of risk does not penalise the very risk-taking that leads to successful businesses.

If designed and enforced well, a law dealing with insolvency or closure of businesses can help firms reorganise and recover while allowing unviable ones to exit before they drag the broader economy with them. But, at the same time, an insolvency law that allows unsuccessful resolution suitors to drag the recovery of a company can starve insolvent businesses into an eventual collapse. India's Insolvency and Bankruptcy Code (IBC) is this exact attempt to institutionalise the freedom to exit, and despite all the legal and operational challenges, has fairly delivered on its intended purpose.

A recent case reflects this perfectly well. On July 15, the Supreme Court of India dismissed Vantage Point's review petitions, sparing a paragraph on the exercise. It said there was neither any error apparent on the record, nor did the case have any merit. Behind the dismissal order sat a resolution that took four years to become final, even though the creditors who mattered had settled the question in the summer of 2023.

The case deserves a closer analysis for

various reasons. With the court giving finality to the matter, a question arises as to who and how one can account for the uncertainty, scattered managerial attention, and the wariness of the next serious bidder watching from a distance?

SKS Power Generation (Chhattisgarh) Limited was admitted into insolvency in April 2022 after it underwent severe operational challenges due to unresolved disputes and broader issues in the power sector. After a competitive process that drew seven applicants and an inter-se bidding round, the Committee of Creditors approved the plan proposed by Sarda Energy and Minerals with 100% vote by June 2023. Every creditor who carried the real financial and economic risks backed the plan. This would have ideally meant that the resolution process was complete there and then.

However, SKS's unsuccessful resolution applicants challenged the case through various litigation before the National Company Law Tribunal (NCLT), the appellate tribunal, an appeal to the Supreme Court, and finally a review petition. The litigation was by applicants whose plans the creditors had already turned down, based on their commercial wisdom. On the facts, the court found no sweetening at all. The figures the appellants seized upon had formed part of the

winning plan from the very start.

Some of the largest insolvency cases have witnessed a familiar pattern. While the methods may differ, the loser of a commercial auction reaches for procedure precisely because the commercial contest is gone. Some parties allege that there's a departure from the process. Others rely on arguments to cast doubt on how the highest bidder emerged and does not deserve to be chosen. This pendency keeps a closed process ajar, becoming a source of leverage for such failed applicants.

In the case of SKS Power, a company that should have been steady under new ownership from 2023 itself had to instead spend years where the resolution was under a cloud. While the successful resolution applicant worked on integrating SKS Power after approval by the NCLT in August 2024, it cannot be denied that bandwidth which belonged to the revival of a distressed power asset could have gone into affidavits and appearances before the courts. Seen from a legal perspective, this is the quiet erosion that the IBC intended to prevent.

Instances like these cast a shadow on the larger insolvency ecosystem. If serious bidders watch a unanimous creditor decision get relitigated across five forums over four years, they would incorporate this risk into their offers or may

also trim the value to account for a contested aftermath. Some might even prefer to stay away from the messier situations, meaning that the outcome is thinner competition and weaker recoveries, the exact reverse of what a resolution process exists to deliver.

The Supreme Court's dismissal of the review petition thus counts for more than its length. By declining even to hear the review in open court, it signalled that the tiers of challenge are not an endless staircase, and that there is a floor and the review petition sits close to it. In doing so, the court has signalled that applicants weighing one more throw of the litigation dice should not use it as an endless exercise.

While the gates to challenge approval of a resolution plan must stay open in areas such as statutory non-compliance and real irregularity by the resolution professional, the dismissal of the review petition means that the court will not entertain endless litigation over a case that has undergone the stipulated process.

The IBC was drafted with the precise purpose of avoiding the failures of earlier insolvency regimes that were scattered under multiple statutes. Every avoidable tier of litigation is a withdrawal against that. The Supreme Court has signalled that forum hunting and endless litigation cannot gut the insolvency resolution ad infinitum. This is a strong signal for a system whose credibility rests on the certainty of its endings.

AI @ WORK

THE NEXT LEAP

THE BIGGEST GAINS WILL COME FROM EXECUTION

SOMEONE ASKED ME at a conference recently whether India is winning or losing the AI race. I think that is the wrong question. If the race is defined by who builds the biggest or most powerful frontier model, it will inevitably be a contest among a handful of global labs with enormous capital and compute. But that is not where the biggest economic value will ultimately be created. The more consequential race is about who can make AI work at scale—in banks, hospitals, entertainment, government departments and global enterprises.

If we are talking about building from India for the world from day one, Galleri5 is an interesting example. Its founder, Rahul Regulapati, and his studio recently released India's first AI-generated television series. It reflects the shift underway. As AI moves fast, builders need more than tools—they need platforms to build, ship, govern and secure what they create. Platforms such as GitHub and GenAI Foundry programmes by Nasscom and Microsoft are helping teams move from experiments to products people can trust.

Three things are working together: a huge, fast-moving developer base, enterprises that are actually putting AI into production and public digital infrastructure built to work at the scale of over a billion people. Put those three together, and each one makes the others stronger.

India did not invent the first wave of computing, but it built a world-class developer ecosystem and turned it into a global IT services industry. That pattern is repeating, only faster. India is now GitHub's largest developer community, with over 27 million developers, including 2 million who joined in 2026. Indian developers are also the world's second-largest open-source contributors, with more than 7.5 million contributions to AI projects.

India's technology industry is on track to cross \$315 billion in FY26, growing 6.1%. AI services

already account for \$10-12 billion and are expanding at a mid-teen pace. TCS's annualised AI revenue run-rate reached \$2.6 billion in Q1 FY27, up 13.6% quarter-on-quarter. Infosys reported AI revenue of \$417 million, or 8.2% of total revenue, while HCLTech's advanced AI revenue rose 10.3% sequentially to \$171 million.

A Nasscom Global Enterprise Survey of 500 companies found that around 25% have moved agentic AI from pilots into production. Deloitte's 2026 enterprise AI survey ranks India first among 15 countries on at-scale adoption, with 40% of Indian respondents reporting significant or full AI use, against a global average of 28%.

McKinsey estimates that AI and agentic AI could create a \$300-400 billion opportunity by 2030 across enterprise transformation, data and application modernisation, infrastructure, agent management and security and governance. This is where three decades of Indian IT services experience in enterprises, domains and integration matter more than raw model capability.

Underneath this is something few countries possess: infrastructure built to operate at population scale. Over the past decade, India has built digital systems for identity, payments and data that reach hundreds of millions.

The road ahead, however, requires sustained investment in infrastructure and R&D, while continuing to adapt as models evolve. It also opens a large opportunity in forward-deployed engineering, where technology teams work alongside customers to implement and adapt AI systems rather than simply hand them over.

This creates a reinforcing cycle. Indian founders are building for global customers, working with partners and investors worldwide, and moving quickly from idea to product. That ambition is visible in companies such as Sarvam AI, Krutrim and Qure.ai. In this race, how fast you learn may matter as much as how good your model is. India is well placed to learn fast.

INDIA'S AI INFLECTION POINT

TAKING AI FROM PILOT TO SCALE

THE REAL OPPORTUNITY NOW LIES IN TURNING PILOTS INTO MEASURABLE BUSINESS VALUE

IN THE PAST FEW decades, India has time and again shown it can move quickly when technology changes the way businesses and consumers operate. From mobile and internet connectivity and digital payments to cloud and digital infrastructure, adoption has often happened at a scale that has compressed the journey from access to impact. AI presents another opportunity to leapfrog, not simply by adopting the technology faster but to move faster from experimentation to application and from application to value.

That shift is already visible in Indian businesses. AI currently supports 33% of business tasks in India and is expected to reach 51% within the next two years, according to SAP's 2026 Value of AI research. At the same time, 71% of Indian businesses have an AI strategy aligned with their business goals. The advantage will not come from having more AI tools, but from using AI to change how businesses make decisions, run processes and serve customers.

India does not need to retrace steps taken by markets that began experimenting with AI earlier. It can learn from the first wave of pilots and move more quickly towards enterprise-wide application, because while a successful pilot is useful, it is not a full transformation. The real work begins when AI operates across business processes, connects with existing data and systems and influences decisions and outcomes. In a supply chain, for instance, demand, inventory, production, suppliers, logistics and customer requirements are interconnected. AI can provide an answer, but its value depends on understanding those connections and what action the business can take.

This is where the next five years become important. In that time, AI could increasingly become part of how companies forecast demand, manage operations, engage customers, allocate resources and make decisions, rather than remain a separate technology initiative. Market leadership will belong to organisations that systematically rethink their operating models and workflows. In fact, cross-functional AI adoption in India is projected to more than double to 40% over the next two years. Compressing the journey from experimentation to embedded, enterprise-wide use will become an advantage in itself. Strong data foundations, redesigned workflows, workforce readiness and governance will be critical to making that happen.

As AI moves into the core of the enterprise, the boardroom conversation must change. The question cannot simply remain 'how much AI are we deploying?' It needs to become 'where is AI creating meaningful value, and can that value be scaled?' A growing number of use cases may indicate activity, but activity is not necessarily impact. Better customer experiences, faster decisions, greater resilience and improved produc-

tivity may matter more than the number of AI applications deployed. Indian businesses are already increasing their commitment. AI spending is expected to rise by 45% over the next two years, while overall AI ROI is projected to increase from 22% to 39%.

The focus, therefore, has to be on what AI delivers, not simply what it could do.

This also changes the role of the board. It is less about choosing a model or tool and more about asking whether the organisation has identified the right busi-

ness problems, whether its data and processes are ready, whether people are prepared for change and whether outcomes can be measured. It also means establishing clear accountability for AI decisions, understanding where human oversight remains essential and ensuring that value is measured consistently across the enterprise. AI will take on more execution, but businesses will still need people who understand context, exercise judgement and know when an AI-generated recommendation needs to be challenged.

India's AI opportunity lies in moving faster, as much as it rests on moving differently. Using the experience of the first wave of adoption to shorten the distance between experimentation and business transformation, the next five years will determine whether AI becomes another technology layer or part of how Indian businesses are designed to operate. For a nation defined by its ability to leapfrog, success will undoubtedly be measured by how well the volume of AI can elevate enterprise performance and business outcomes.

Sept monsoon to be below normal: IMD

SANDIP DAS
New Delhi, August 31

RAINFALL IN SEPTEMBER, the last month of the southwest monsoon season, is likely to be “below normal”—less than 91% of the benchmark long period average (LPA)—the India Meteorological Department (IMD) said on Friday, citing strengthening El Niño conditions.

“Most parts of the country are expected to receive deficit rainfall in September, except some areas in east, northeast and central India,” Mrutyunjay Mohapatra, director general, IMD,said in a briefing.Mohapatra said a moderate to strong El Niño condition prevailed over the equatorial Pacific, these conditions are expected to strengthen further in the coming months,”IMD said.

The met department noted that spatially,many parts of the country are likely to receive below-normal rainfall. However, some areas of Northwest, Northeast, East, Eastcentral and Southeast Peninsular India, are likely to receive “normal” to “above-normal” rainfall in September.

With a monsoon deficit of 13.8% against the benchmark after the three months of the 2026 southwest monsoon season (June-September), overall rainfall is likely to be ‘deficient’, below 90% of the benchmark this season. This season’s rainfall is likely to be the lowest since 2009.

Previously, in 2002 (-20.9%), 2009 (-18.3%), 2015 (-12.7%) and 2014 (-10.15),

EL NINO IMPACT

■ Rainfall in September, is likely to be less than 91% of the benchmark LPA

■ Most parts are expected to receive below-normal rainfall, except some areas in east, northeast and central India, said IMD DG Mrutyunjay Mohapatra

■ With a monsoon deficit of 13.8% against LPA after the three months of 2026 SW monsoon season, overall rainfall is likely to be below 90% of LPA this season

overall rainfall during the monsoon season was in the ‘deficient’ range.

In terms of distribution, during June-August, out of 740 odd districts, 47% or 350 districts have received “deficient” to “large deficient” rainfall. Over 52% or 370 districts have so far received “normal” to “large excess” precipitation. Only the central India region, also referred to as the rainfed monsoon core zone, has received ‘normal’ rainfall, just 3.8% below the benchmark. All other regions show a serious rainfall deficiency: northwest (-10.7%), east/north-east (-25.7%), and south peninsular (-24.2%).

Rainfall in the range of 94-90% of LPA is considered ‘below normal’ and precipitation below 90% of benchmark is categorised as ‘deficient’.

After scanty rainfall received in June at 36% below the benchmark, July saw revival of monsoon rains at 1% above the LPA, which is within the “normal” range and had given a boost to

kharif crop sowing. However, the August rainfall was also unevenly distributed with 16.3% below the LPA with all the regions except the monsoon core zone of central India receiving ‘deficient’ rainfall.

In May, the IMD had revised its June-September rainfall projection to 90% of the LPA, from 92% in its April forecast. It also added that there is an 84% probability that rainfall during the season will remain in the “deficient to below-normal” range. These forecasts will continue to hold.

The sowing of Kharif crops – including paddy, pulses, oilseeds, cotton and sugarcane – across the country till August 28, had been sown in 107.1 million hectare (Mha), just 1.7% down from a year ago. Normal or last five year’s average sown area is 110.4 Mha.

According to consulting firm ICRA’s assessment, the cumulative kharif sowing is set to decline by 1%-2% by October 2026 from 112.1 Mha in 2025.

ONGC targets over ₹1 lakh cr deepwater drive, new trading unit

SAURAV ANAND
New Delhi, August 31

STATE-RUN ONGC is lining up more than ₹1.07 lakh crore of investment in deepwater exploration and strategic crude storage, while preparing a 50-million-tonne (MT) global trading platform and seeking a bigger operating role in Venezuela, in a major expansion across exploration, energy security and international oil markets.

The state-run explorer plans to invest ₹1 lakh crore over five years to drill 87 deepwater and ultra-deepwater wells by March 2031. ONGC expects to drill about seven deepwater wells this year and 10 next year, before sharply scaling up activity once additional seismic data becomes available.

The programme comes alongside the government’s ₹84,000-crore offshore exploration support initiative, which ONGC expects will help generate better 2D and 3D seismic data and enable substantially higher drilling in frontier acreage. “We believe that the frontier that is awaiting us is deep water and ultra-deep water,” Chairman and CEO Arun Kumar Singh told reporters after the company’s annual general meeting.

Deepwater and ultra-deepwater basins are offshore zones with very high water depths. India’s eastern and western offshore basins extend to depths of up to 3,000 metres and are estimated to hold more than 5,600 MMTOE of hydrocarbon potential, according to the Union ministry of petroleum and natural gas.

BIGGER ROLE

■ State-run explorer plans to invest ₹1 lakh cr over five years to drill 87 deepwater and ultra-deepwater wells by March 2031

■ Initiative comes alongside govt’s ₹84,000-cr offshore exploration support initiative, which ONGC expects will help generate better 2D and 3D seismic data

■ ONGC has so far bagged about 68% of the total deepwater acreage

ONGC has so far bagged about 68% of the total deepwater acreage awarded up to the ninth round of bidding under the Open Acreage Licensing Policy (OALP), giving it a dominant position as India steps up exploration of deeper offshore prospects.

ONGC will separately invest around ₹7,000 crore to build a 1.75-million-tonne strategic petroleum reserve at Mangalore, adding roughly one-third to India’s existing dedicated emergency crude-storage capacity of 5.33 million tonnes.

The land has already been acquired and construction is expected to begin shortly.

IndianOil aims to boost 1.5x gas sales by 2030

● Refiner steps up shipping and upstream push

SAURAV ANAND
New Delhi, August 31

INDIAN OIL CORPORATION (IOC) plans to increase its natural gas sales by 1.5 times by 2030 and is at an advanced stage of forming a partnership to jointly acquire and operate a fleet of vessels, as India’s largest fuel retailer broadens its energy portfolio while strengthening supply-chain resilience after disruptions through the Strait of Hormuz. IOC’s natural gas business recorded its highest-ever sales of 7.09 million tonnes in FY26, while its city gas distribution business turned Ebitda-positive. The company plans to expand across the global gas value chain to meet its 2030 target.

At the same time, IndianOil is working with a leading Indian shipping company and other oil marketing companies

on jointly acquiring and operating vessels. The initiative, now at an advanced stage, is aimed at giving the company greater strategic control over energy logistics and improving supply reliability.

The move comes after the West Asia conflict sharply exposed India’s dependence on the Hormuz corridor. India imports more than 88% of its crude requirement, while around 45% of crude imports and nearly 90% of LPG imports are linked to the strategic waterway.

“For Indian Oil, the priority during this unprecedented cri-

sis has remained crystal clear—to maintain continuity of energy supplies despite constrained sourcing options and volatile international markets,” Chairman AS Sahney said at the firm’s 67th annual general meeting (AGM).

IOC diversified crude sourcing, realigned refinery operations and secured alternative supplies during the disruption. Despite a significant shift away from West Asian crude grades, its refineries operated at above 100% utilisation, while LPG production was ramped up by nearly 30% in a short period.

Seventy years of LIC: An institution evolves

■ R DORAISWAMY

ON SEPTEMBER 1, 1956, a new institution was born with a mission. A mission seemingly simple but of epic proportions: To take life insurance to every corner of India and provide financial protection at a reasonable cost. Life Insurance Corporation of India (LIC) was established under an Act of Parliament, bringing together 245 private life insurance companies and provident societies under one roof, with an initial capital contribution of just ₹5 crore from the government.

On September 1, 2026, LIC completes 70 years of glorious operations. As LIC marks this milestone, the first and most appropriate sentiment is one of gratitude—to its policyholders, agents, employees, shareholders and the government, whose confidence and support have made this journey possible.

The anniversary is, therefore, not merely a corporate milestone, but a moment to look back at seven decades in which India’s economy changed, its society transformed, its aspirations multiplied and its financial landscape was repeatedly reshaped.

For FY26, total premium income, stood at ₹5,35,984 crore (up 9.80%), while the profit after tax rose 19.25% to a record ₹57,419 crore.

The claims figures for the anniversary year are equally telling. LIC processed 25 million individual claims, including 24.1 million maturity and survival benefit claims. Maturity claims amounting to ₹2.80 lakh crore and death claims of ₹24,885 crore were paid during the year, with the individual death-claim settlement ratio at 99.44%.

Leadership that has survived competition

Perhaps LIC’s greatest achievement is not that it became large. It is that it remained a leader after the rules of the game changed.

For decades, LIC operated in an environment where it was the dominant national life insurer, but the liberalisation of India’s insurance sector in 2000 transformed the landscape. Private insurers entered the market, customer choice expanded, technology accelerated, distribution models evolved, products became increasingly sophisticated, and competition grew relentless. LIC no longer had the luxury of standing still; it had to continuously reinvent itself and earn its leadership again, and again, and again.

For FY2025-26, LIC accounted for 56.66% of India’s life insurance market by first-year premium income, and an extraordinary 70.11% in group business; its market

GROWTH STORY

share by number of policies was 65.16%.

Customer at centre of transformation

Future years cannot be built on the strengths of the past. LIC recognises that today’s customer expects speed, convenience, transparency and digital engagement. This is why the corporation’s digital transformation is significant: The launch of the Milic App in April 2026 puts an LIC office in the customer’s hands, offering policyholders digital access to their portfolio and servicing facilities, alongside the Super Sales Saathi App for marketing intermediaries.

LIC has also been steadily modernising its product portfolio. It now has a suite of 52 products and eight riders, including recent launches such as Bama Lakshmi (a plan exclusive to women), Protection Plus (a ULIP), Bama Kavach (a term plan), Jeevan Utsav (a single-premium plan) and, most recently, New Jeevan Sathi (a joint-life plan).

Bima Sakhi: Insurance as empowerment

LIC’s purpose is better illustrated by Bima Sakhi, a mahila career agent scheme that seeks to create employment and financial independence for women while taking insurance deeper into rural India. As at March 31, 2026, the number of active Bama Sakha’s was 2,83,249; during FY2025-26 they completed 2.194 million policies with first year premium income of ₹3,769 crore. LIC has now covered 59% of India’s Gram Panchayats with at least one Bima Sakhi.

Rewarding shareholders

LIC’s evolution into a listed corporation has added a further dimension to its accountability. Since its 2022 listing, it has consistently paid dividends. For FY26, the board recommended a final dividend of ₹10 per equity share of ₹10 face value – equivalent to ₹20 per share on a pre-bonus basis. The 1:1 bonus issue approved

in 2026 effectively doubles LIC’s outstanding equity shares, intended to improve liquidity and reward shareholders for their continued confidence in the corporation.

Opportunities and challenges

Customers today have more choices than ever before, and technology has reshaped expectations. The changing factors have been identified and LIC is striving to adapt. The focus areas are: product mix, technology and persistence, distribution mix, asset management and expectations of a listed company.

India remains underinsured, and the country’s economic expansion, rising household incomes, growing financial awareness and increasing longevity will create enormous demand for protection, savings and retirement solutions in the years ahead. Meeting that demand, while adapting its distribution and product mix to a more competitive and digital market, will define LIC’s next chapter.

Measure that cannot be counted

The institution that began in 1956 with ₹5 crore of capital has become a financial giant. But its greatest asset cannot be measured in rupees. It is trust.

For seventy years, generations of Indians have placed their savings, hopes and family security in LIC. That trust was earned by the institution, but it was also built by its customers, sustained by its employees and agents, and backed, throughout, by the Government of India.

As LIC enters its eighth decade, it stands at the intersection of tradition and transformation, armed with a robust digital infrastructure, a diversified product suite, unmatched financial might, a strong army of dedicated agents, distribution partners, employees and the unconditional love of millions of citizens.

RISK TO INVESTORS | FOR DETAILS, REFER TO THE SECTION TITLED "RISK FACTORS" ON PAGE 28 OF THE PROSPECTUS.

- 1) **Revenue dependence on sale of Active Pharmaceutical Ingredients ("APIs"):**
We derive almost all of our revenue from the sale of API products, including corticosteroid and steroidal-hormones. In addition to manufacturing API products that we sell, we offer our services as a contract development and manufacturing organisation ("CDMO") for specialty pharmaceutical and nutraceutical companies. Any reduction in demand for API products, and our top products in particular, or a temporary or permanent discontinuation in our manufacturing operations for such products, could have an adverse effect on our business, results of operations, financial condition and cash flows.

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)
Sale of APIs (A)	8,350.05	96.07%	7,447.54	99.10%	7,162.47	100.00%
Sale of complex injectables (B)	330.50	3.80%	-	-	-	-
CDMO services (C)	10.94	0.13%	68.00	0.90%	-	-
Total (A+B+C)	8,691.49	100.00%	7,515.54	100.00%	7,162.47	100.00%

- 2) **Audit and inspections risk:** We operate in a highly competitive industry where regulatory standards are not only extensive but also continuously evolving. We are required to comply with regulations and quality standards stipulated by regulatory authorities and certain of our customers. Our manufacturing facilities and products are subject to periodic inspections and audits by these regulatory authorities and customers. If we are not in compliance with the requirements prescribed by such authorities or terms stipulated in contracts with our customers, we may be subject to regulatory actions, including issuance of warning letters, imposition of sanctions, amendment or withdrawal of our existing approvals, product seizure, interruption of our operations, or claims resulting from non-compliance with contractual obligations.

- 3) **Dependence on export markets:** As of March 31, 2026, revenue from external customers outside India contributed 67.04%, 55.19% and 59.97% of our revenue from operations in Fiscals 2026, 2025 and 2024, respectively. Our inability to handle risks associated with our export sales could adversely affect our sales to customers in foreign countries, our results of operations, financial condition and cash flows.

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)
Revenue from external customers - India (A)	2,865.05	32.96%	3,367.75	44.81%	2,867.23	40.03%
Revenue from external customers outside India (B)	5,826.44	67.04%	4,147.79	55.19%	4,295.24	59.97%

Revenue from operations (A+B)	8691.49	100.00%	7515.54	100.00%	7162.47	100.00%

* Rest of the world includes Asia (other than India and China) and Africa.

- 4) **Tariff and anti-sourcing risk:** Revenue from the United States represented 13.12%, 4.02% and 8.97% of our revenue from operations for Fiscals 2026, 2025 and 2024. The imposition of tariffs or other anti-sourcing measures by the United States could increase our costs, affect the competitiveness of our products and adversely affect our business, results of operations, financial condition and cash flows.

- 5) **Customer concentration risk:** We derive a substantial portion of our revenue from certain key customers, with our top ten customers accounting for 57.59%, 55.90% and 61.65% of our revenue from sale of products in Fiscals 2026, 2025 and 2024, respectively. Any loss of, or reduction in orders from, these customers could adversely affect our business, results of operations, financial condition and cash flows.

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of revenue from sale of products (%)	Amount (₹ million)	Percentage of revenue from sale of products (%)	Amount (₹ million)	Percentage of revenue from sale of products (%)

Top ten customers	4,654.71	57.59%	4,015.76	55.90%	4,009.50	61.65%

- 6) **Geographic concentration risk:** As of March 31, 2026, we operated the Rau Facility and the Pithampur Facility in the state of Madhya Pradesh in India. In addition, our Ujjain Facility and our Mhow Facility, which we have commissioned and where we have started R&D and pilot-scale operations as of March 31, 2026, are also located in Madhya Pradesh. Any adverse developments affecting Madhya Pradesh or its surrounding regions could adversely affect our business, results of operations, financial condition and cash flows. A slowdown, interruption or shutdown in our manufacturing operations could have an adverse effect on our business, results of operations, financial condition and cash flows.

- 7) **Supplier concentration risk:** We depend on certain suppliers for raw materials for our operations. Purchases from our top ten suppliers accounted for 25.50%, 18.41% and 50.33% of our total expenses in Fiscals 2026, 2025 and 2024, respectively. Any loss of such suppliers or non-performance of their obligations could adversely affect our business, results of operations, financial condition and cash flows.

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of total expenses (%)	Amount (₹ million)	Percentage of total expenses (%)	Amount (₹ million)	Percentage of total expenses (%)
Top five suppliers	1,501.96	21.16%	850.41	13.97%	2,293.90	38.81%
Top ten suppliers	1,810.15	25.50%	1,120.78	18.41%	2,974.31	50.33%

- 8) **Competition risk:** We operate in a highly competitive market. We face competition both within our API manufacturing business and in our role as a CDMO, which we have recently commenced. An inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.

- 9) **Dependence on imported raw materials:** We procure a portion of our raw material requirements from different countries, including China and the United States. Any adverse developments in these countries, or the laws governing our imports from these countries, could disrupt our raw material supply and adversely affect our results of operations, financial condition and cash flows

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of total expenses (%)	Amount (₹ million)	Percentage of total expenses (%)	Amount (₹ million)	Percentage of total expenses (%)

*Other countries include countries such as Singapore, Malaysia and Germany.

- 10) **Product development risk:** Our success depends on our ability to develop and commercialise new products in a timely manner. Our research and development ("R&D") efforts are central to our ability to build, scale, and sustain complex manufacturing technologies across platforms. If our research and development efforts do not succeed, or the products we commercialise do not perform as expected, the introduction of new products may be hindered, which could adversely affect our business, results of operations, financial condition and cash flows. In order to remain competitive, we must develop, test and manufacture new products, which must meet regulatory standards and receive requisite regulatory approvals.

Research and development expenses (₹ million) (A)	296.95	311.43	205.09

Research and development expenses, as a percentage of total expenses (%) (A/B*100)	4.18%	5.12%	3.47%

Move from endless war to end of war: PM tells Putin

PRESS TRUST OF INDIA
Bishkek, August 31

CALLING FOR AN immediate end to the Russia-Ukraine conflict, Prime Minister Narendra Modi on Monday urged Russian President Vladimir Putin to move from "endless war towards end of war," asserting that a peaceful resolution of the conflict is humanity's shared priority.

In a meeting with Putin on the sidelines of the Shanghai Cooperation Organisation (SCO) summit in this capital city of Kyrgyzstan, Modi said every day of war sets the humanity back and that India, the land of Gandhi and Buddha, supports all efforts towards peace and will continue to do so.

The two leaders also extensively deliberated on ongoing cooperation in areas of trade and investment and energy and fertiliser security among others.

"We have always discussed the Ukraine issue. When we last met, you had extensively briefed me on all aspects of it. India supports all efforts for peace and will continue to do so," Modi said in his televised opening remarks at the meeting.

"Every day spent on war pushes humanity backwards, whereas every step taken towards peace fills humanity with new hope and enthusiasm. We must move from endless war towards the end of war, which is very crucial for the well-being of humanity," the prime minister said in Hindi.

India supports peace effort in West Asia: PM

PRIME MINISTER NARENDRA Modi conveyed to Iranian President Masoud Pezeshkian on Monday that India supports all efforts toward ending the conflict in West Asia and emphasised the importance of freedom of navigation and the protection of civilians and civil infrastructure in the region.

Modi met Pezeshkian on the sidelines of the Shanghai

Cooperation Organisation (SCO) summit in the Kyrgyz capital for their first bilateral talks since the outbreak of the Iran-US conflict in February.

In the meeting, Modi also told the Iranian leader that New Delhi wants to "expand and diversify" the trade basket with Tehran in the "times to come."

"Met President Masoud Pezeshkian in Bishkek. Reit-

erated our commitment to strengthening India's long standing friendship with Iran across diverse sectors," the prime minister said on social media. "We want to expand and diversify our trade basket in the times to come. We had a discussion on the prevailing situation in the region. India will continue to support all efforts aimed at ensuring lasting peace," he said. —PTI

issues as soon as possible is the call of humanity, and this is also India's message. The land of Gandhi and Buddha has a single message: the path of peace," he said.

Modi and Putin travelled

together in the Russian President's limousine to Nomad Games. Television footage showed them jointly entering the venue for the inauguration ceremony of the games. The two leaders had travelled in the

same car in the Chinese city of Tianjin during the SCO summit last year too.

The talks between the two leaders came over a week before Putin travels to India to attend the annual BRICS summit.

Nepal floods: Death toll crosses 930

A man sticks photos of his missing relative amongst the pictures of missing and deceased people pasted on a wall outside Tribhuvan University Teaching Hospital in Kathmandu

THE DEATH TOLL from the flash floods in Nepal rose to 939 on Monday, with more bodies being recovered, even as more than 4,000 people were missing, authorities said.

More than 10,000 people have been rescued so far, as rescuers struggle to reach those still stranded amid intermittent rain, swollen rivers and damaged roads and bridges.

The flash floods, believed to have been triggered by a collapse or avalanche of ice and rock near the Nepal-Tibet border, devastated towns and villages in northern and central Nepal on August 26. The Bhotekoshi River, which flows south from the Himalayan bor-

der region, carried the floodwaters downstream, sweeping away homes, vehicles, roads and bridges and damaging hydropower projects.

In Nepal, 272 bodies have so far been recovered in Chitwan district, 207 in Nawalparasi East, 151 in Nawalparasi West, 95 in Nuwakot, 62 in Gorkha, 55 in Dhading, 37 in Tanahu and 24 in Rasuwa, the National Disaster Risk Reduction and Management Authority (NDRMA) said on Sunday.

The disaster also killed 16 people on the Chinese side, while nearly 550 people remain missing in Tibet, according to Chinese media reports.

SC dismisses PIL for ethanol disclosure at petrol pumps

PRESS TRUST OF INDIA
New Delhi, August 31

THE SUPREME COURT on Monday dismissed a PIL seeking a directive to the Centre and others to ensure mandatory and uniform labelling on every dispensing nozzle at fuel pumps, disclosing the exact percentage of ethanol in petrol.

A bench of Justices MM Sundresh and PB Varale said it is not going to entertain the PIL under Article 32 (right to approach Supreme Court directly) and the petitioner Narendra Kumar Goswami can approach the jurisdictional high court for relief.

Attorney General R Venkataramani, appearing for the Centre, submitted that it is a proxy litigation as a petition on a similar issue has been dismissed by the court.

"The petitioner wants the government of India to be answerable to him," the AG submitted.

Goswami, who produced a petrol pump receipt before the court, contended that he has the right to know the content of the petrol given at fuel

pumps. "Not only me but citizens at large should be informed about the composition of the fuel given to them," he submitted, adding that in the receipt there is no mention of ethanol content.

He further contended that the Attorney General had described the ethanol-blending programme as an "experiment" in an earlier hearing, and said the government later issued a clarification denying such a statement being made.

The bench asked Goswami, appearing in-person, to raise his contentions before the high court.

Goswami has also sought a direction that every fuel invoice should specifically and legibly state the percentage of ethanol in the petrol sold.

"Direct the respondents (Centre and others) to prepare and publish within a stipulated time an official, public, vehicle-wise compatibility database searchable by manufacturer, model, engine type and year of manufacture, indicating the suitability or otherwise of various ethanol blends for each vehicle," his plea said.

Messi retires from international football

REUTERS
Buenos Aires, August 31

LIONEL MESSI, WHO captained Argentina to World Cup victory in 2022 and the final in 2026, is retiring from international football, he said on Monday.

The record eight-times Ballon d'Or winner is his country's record appearance-maker and scorer with 125 goals in 207 games, having transformed a complicated relationship with the national team into a story of redemption and triumph.

"It was a decision that hurt — and still hurts deep down — but I understand that the time has come. I swear to you that I always gave it my all — not just in these last few years when we won everything, but before that too; I always fought and left everything on the field for this jersey, to bring you joy and make you feel proud to be Argentine through football," the 39-year-old Messi wrote on Instagram.

Lionel Messi kisses the trophy after winning the World Cup final in Lusail, Qatar, in 2022

"Time is running short, chapters come to a close, and this is one that hurts me deeply. I love, have loved, and will always love being part of the national team. I've given everything I had; I have nothing left to give, and besides, there are some great young players coming up who

deserve to be here." Defeat in this year's World Cup final by Spain denied Messi a fairytale farewell, but his place among the game's greats had long since been secured.

After years of disappointment with Argentina, including defeat in the 2014 World

Cup final and successive Copa America finals, Messi won his first major international trophy at the 2021 Copa America before leading his country to glory at the 2022 Qatar World Cup.

The former Barcelona and Paris St Germain forward, who now plays for Inter Miami, added another Copa America title in 2024 and arrived at his sixth World Cup hoping to complete an extraordinary final chapter.

A 1-0 loss to Spain after extra time ensured that did not happen, but Messi, who made his Argentina debut in 2005, walks away having emerged from the shadow of 1986 World Cup-winning captain Diego Maradona to forge a legacy of his own as another defining figure in his country's football history.

"I leave with the peace of mind and pride of having given you — alongside my teammates — moments we once only dreamed of," Messi added.

Any adverse outcome of these proceedings, including prosecution or regulatory action, could materially and adversely affect the reputation, business, financial condition and results of operations of our Company and the Material Subsidiary. Our Company and the concerned subsidiaries are contesting the allegations and pursuing appropriate legal remedies. Separately, the Complainant has also filed a writ petition before the Hon'ble Delhi High Court, against our Company, our Material Subsidiary, Brace Port Logistics Limited, SEBI and others, seeking, inter alia, directions to the SEBI to consider and decide representation dated 18.08.2026 submitted by the Complainant. The Hon'ble High Court passed an order dated August 25, 2026 directing SEBI to consider and decide the representation, in accordance with law, within a period of two weeks. The writ petition was accordingly disposed of in the aforesaid terms.

5. Revenue Growth Sustainability Risk:

Our revenue from operations has grown significantly from ₹1,28,911.01 lakhs in Fiscal 2024 to ₹2,81,289.89 lakhs in Fiscal 2026, representing a CAGR of 47.72% over the period, primarily driven by strong growth in our air freight forwarding business, higher air cargo volumes, expansion of our customer base and increased airline partnerships. There can be no assurance that we will be able to sustain this rate of growth in future. Any slowdown in the air freight forwarding industry, reduction in cargo volumes, loss of key customers or airline relationships, increased competition, adverse changes in freight

rates or capacity constraints, or inability to effectively execute our growth strategy could adversely affect our revenue growth, profitability, financial condition and results of operations.

6. High Working Capital Requirements Risk:

Our business operations involve substantial working capital requirements, primarily to finance trade receivables and other current assets. These requirements have historically been funded largely through borrowings. Our working capital gap is majorly financed through working capital loans to the tune of 86.23%, 100.00% and 82.62% respectively for the fiscal years ended on March 31, 2026, 2025 and 2024. Our company's working capital gap grew from ₹24,265.23 Lakhs in Fiscal 2024 to ₹31,107.09 Lakhs in Fiscal 2026. Any inability to maintain adequate cash flows or obtain timely funding to meet our working capital and debt obligations could materially and adversely affect our financial condition and results of operations. The details of the working capital gap is as follows:

Particulars	For the year ended on March 31,		
	2026	2025	2024
Working Capital Gap (₹ in Lakhs)	31,107.09	23,705.89	24,265.23
% Funded through Borrowings	86.23%	100.00%	82.62%
Debt-to-Equity Ratio (times)	1.26	1.42	1.92

7. Contingent Liabilities and Commitments Risk:

As of March 31, 2026, our contingent liabilities and commitments aggregated ₹28,908.02 Lakhs, tantamounting to 86.90% of our total net worth of ₹33,264.21 Lakhs as of that date. If any of these were to materialise, our financial position, profitability and cash flows could be adversely affected.

8. Litigation and Legal Proceedings Risk:

Our Company, Subsidiaries, Promoters, Directors and Senior Managerial Personnel are involved in certain outstanding legal and regulatory proceedings, including criminal, tax and civil litigation. The proceedings include 1 criminal, 1 statutory or regulatory proceedings and 9 tax cases against the Company involving an aggregate amount of ₹3,752.49 lakhs, 2 criminal, 2 statutory or regulatory proceedings and 29 tax cases against Subsidiaries involving ₹640.72 lakhs, and 10 criminal and 2 civil proceedings initiated by the Company and its Subsidiaries involving ₹1,588.59 lakhs. Any adverse decision in such proceedings may have a material adverse effect on our business, financial condition, cash flows and results of operations.

9. Regulatory Compliances Risk:

Our business is dependent on obtaining, renewing and maintaining various statutory licences, registrations, permits and approvals. While we have obtained all material approvals required for our operations, certain approvals remain pending, including a Fire NOC for our Delhi warehouse. Any delay or failure in obtaining, renewing or complying with the conditions of such approvals may result in penalties, regulatory action, operational restrictions or legal proceedings, which could materially and adversely affect our business, financial condition, cash flows and results of operations.

10. Significant Dependence on Air Cargo Business Risk:

Our business is significantly dependent on our air freight forwarding operations, which contributed a substantial portion of our operating revenue. We handled 83,923.81 tonnes of air cargo and generated revenue of ₹2,16,639.87 lakhs which amounts to 77.02% of our revenue from operations from air freight services during Fiscal 2026. Although we had business relationships with 56 airlines during Fiscal 2026, including performance-based arrangements with certain leading international airlines, there can be no assurance that such relationships will continue on existing terms or at all. Any disruption in our air freight forwarding business or inability to maintain cargo volumes, airline relationships or service quality could materially and adversely affect our business, financial condition, cash flows and results of operations.

11. Risk of Inability to Fully Utilise Contracted Container Capacity:

Our ocean freight forwarding business requires us to purchase container space from shipping lines in advance at fixed rates. If we are unable to utilise or sell the contracted container capacity, we may be unable to recover the associated costs, which could adversely affect our profitability, financial condition and results of operations. Although we have not experienced such an event during the last three Fiscals, there can be no assurance that it will not occur in the future.

12. Pre-IPO Pricing Risk:

The bidders in the IPO face the risk of applying in the IPO at a price band of ₹131/- to ₹138/- which is higher than ₹120/- at which the shares were allotted in the Pre-IPO.

13. The Price to Earnings ratio based on diluted EPS for fiscal year ended 2026 for the Company at the upper end of the Price Band is 38.76 times and at the lower end of the Price Band is 36.80 times.

14. The average cost of acquisition of Equity Shares by Promoters and selling shareholders is ₹0.0005 for Mr. Yashpal Sharma (Promoter and selling shareholder) and NIL for Mr. Tarun Sharma (Promoter and selling shareholder), Mr. Himanshu Chhabra (Other Selling shareholder) and Mr. Rohit Sehgal (Other Selling shareholder) and the Offer Price at upper end of the Price Band is ₹138/- per Equity Share.

15. Weighted Average Return on Net Worth for Fiscals 2026, 2025 and 2024 is 14.83%.

16. The three BRLMs associated with the Offer have handled Eight public issues in the past three Fiscal Years out of which One Issue has closed below the Issue Price on Listing Date.

RISK TO INVESTORS

For details, refer to section titled "Risk Factors" beginning on page 28 of the RHP

- Geographical concentration risk:** Our business is entirely concentrated in the state of Kerala. As of June 30, 2026, all our Completed Projects, Ongoing Projects and Upcoming Projects are located in Kerala, primarily across Kochi, Thiruvananthapuram, Kozhikode and Thrissur. Accordingly, our business and financial performance are significantly dependent on residential real estate market conditions, regulatory developments, economic factors and climatic events in Kerala. Any downturn in the residential real estate market in Kerala or adverse developments affecting these micro-markets could adversely affect our business, financial condition, results of operations and cash flows.
- Project execution and timely completion risk:** As of June 30, 2026, we had 12 Ongoing Projects and 3 Upcoming Projects, comprising an aggregate saleable area of approximately 23.19 lakh square feet. Our Ongoing Projects comprised 994 units, of which 637 units had been sold to customers, and approximately 63.62% of the saleable area (excluding JDA allocation) had been booked. A significant portion of our future revenues and cash flows is dependent on the timely execution of our Ongoing Projects and successful transition of our Upcoming Projects into construction and sales. Any delays, cost overruns, inability to obtain approvals or inability to complete or sell these projects could adversely affect our business, results of operations, cash flows and financial condition.
- Dependence on third-party contractors and specialist agencies:** We do not undertake construction activities in-house and are dependent on independent contractors, architects, consultants and specialist agencies for the construction, design and execution of our projects. Any failure, delay, financial stress or sub-standard performance by such parties could result in project delays, cost overruns, quality issues or regulatory non-compliance. The cost incurred by us towards services received from third-party contractors and

specialist agencies constitutes a significant portion of our operating costs. Set out below are details of the cost incurred towards such contractors and specialist agencies, including such cost as a percentage of our total operating cost, for the periods indicated:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Cost incurred towards services received from third-party contractors and specialist agencies (₹ in lakh)	11,214.65	6,552.15	3,928.48
As a percentage of total operating cost	44.92%	31.66%	45.43%

- Volatility in financial performance:** Our revenues, profitability and return ratios have fluctuated across periods due to the project-based and milestone-linked nature of our real estate development business. Such fluctuations are influenced by the timing and stage of project execution, revenue recognition and capital deployment. Set out below are certain financial and return metrics for the periods indicated:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Revenue from operations (₹ in lakh)	25,097.62	19,237.53	11,076.76
Profit after tax (₹ in lakh)	2,661.46	2,042.59	786.88
Return on Equity (%)	16.02%	36.96%	19.12%
Return on Capital Employed (%)	11.89%	13.75%	9.85%

Accordingly, our financial performance in any particular period may not be indicative of our future performance.

Continued on next page...

...continued from previous page.

5. Negative operating cash flow risk: We have experienced negative cash flows from operating activities in certain periods, primarily due to working capital outflows, including increases in land inventories and trade receivables and actual customer collections. Set out below are our net cash flows from operating activities for the periods indicated:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Net cash flow from / (used in) operating activities (₹ in lakh)	(7,425.95)	(4,399.56)	882.73

We reported negative operating cash flows in Fiscals 2026 and 2025 despite recording profits before tax during such periods. Continued negative operating cash flows could constrain our liquidity, increase our dependence on external financing, limit our ability to undertake new projects and adversely affect our business, financial condition and results of operations

6. Capital intensity and financing risk: Our business is capital intensive and requires significant upfront investment towards acquisition of land or development rights, construction, statutory approvals and project management. Accordingly, our ability to execute our Ongoing and Upcoming Projects is dependent on our ability to maintain adequate liquidity and access financing on commercially acceptable terms. Set out below is our debt-equity ratio for the periods indicated:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Debt/Equity (in times)	0.32	2.70	2.67

Our debt-equity ratio was higher in Fiscals 2025 and 2024 primarily on account of borrowings availed from our Promoters, which were repaid during Fiscal 2026. Any inability to obtain adequate financing or meet our working capital requirements, or any increase in financing costs, could adversely affect our ability to execute our projects, meet our obligations and adversely affect our business, financial condition, results of operations and cash flows.

7. Objects of the Issue and land acquisition risk: We propose to utilise the Net Proceeds towards part-funding development expenditure of our Ongoing Projects. We also propose the portion of the Net Proceeds towards acquisition of unidentified land and general corporate purposes. There can be no assurance that suitable land parcels will be identified or acquired on commercially acceptable terms or within anticipated timelines. Further, at the time of filing of the DRHP, we had proposed to utilise a portion of the Net Proceeds towards acquisition of an identified land parcel at Maradu, Ernakulam, Kerala. The proposed acquisition could not be completed within the agreed timeline, and we have consequently decided not to proceed with such acquisition and have removed it from the Objects of the Issue. Failure to deploy the Net Proceeds as proposed could require revision of our development or funding plans.

8. Regulatory approval risk: Development of our projects requires multiple statutory and regulatory approvals, including building permits, fire and safety approvals, environmental and pollution control approvals, municipal permissions, K-RERA registrations and occupation certificates. Any delay, failure, withdrawal or modification of such approvals could require us to reschedule, suspend or discontinue project development, resulting in increased costs, deferred revenues or abandonment of projects.

9. Construction input cost and supply-chain risk: Construction materials, labour and other direct expenses constitute a significant portion of our total expenses. We generally do not enter into long-term fixed-price arrangements for construction materials and are therefore exposed to fluctuations in the prices of key construction inputs and labour costs. Set out below are our construction materials, labour and direct expenses for the periods indicated:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Construction materials, labour and direct expenses (₹ in lakh)	12,350.39	10,265.65	6,791.65
As a percentage of total expenses (%)	56.66%	61.12%	65.69%

Any increase in the prices of cement, steel, ready-mix concrete and other construction materials, increase in labour costs or disruption in supply chains may result in cost overruns and adversely affect our project margins, particularly where we are unable to pass on such increased costs to our customers.

10. Related party transactions and historical dependence on Promoter funding: We have entered and may continue to enter into transactions with related parties in the ordinary course of our business. All the Related Party Transactions have been carried out on arm's length basis in accordance with the applicable laws. However, such transactions may have included or may involve conflicts of interest. Further, we have historically relied significantly on borrowings from our Promoters and other related parties to fund our operations and project development activities. During Fiscal 2025, loans from related parties amounted to ₹17,562.06 lakh, representing approximately 99.24% of our total borrowings of ₹17,696.99 lakh for such Fiscal. Such borrowings were primarily utilised towards construction costs, land-related payments and working capital requirements and, as on date, have been repaid.

While future related party transactions shall be subject to review by the Audit Committee, Board and Shareholders, as per applicable law, there can be no assurance that these will always be in the best interests of our minority Shareholders or that our Promoters or other related parties will be willing or able

to provide financial support on similar terms or at all, if required in the future. Any conflicts of interest arising from related party transactions or inability to obtain adequate alternative financing could adversely affect our business, financial condition, cash flows and results of operations.

11. Dependence on housing finance and customer demand: Demand for our residential projects is dependent on the availability and affordability of housing finance and prevailing interest rates, taxation, stamp duty and broader macroeconomic conditions. Any increase in home loan rates, tightening of credit availability, withdrawal or reduction of tax incentives, increase in stamp duty or other transaction costs or deterioration in economic conditions could reduce customer affordability, delay or result in cancellation of purchase decisions and adversely affect our sales, collections, cash flows and financial condition.

12. The Price/Earnings ratio based on diluted EPS for Fiscal 2026 for the Issuer at the upper end of the Price band is 15.96 compared to the average industry peer group PE ratio of 46.54.

13. Weighted Average Return on Net Worth for Fiscal 2026, 2025 and 2024 is 23.52%.
