NOTICE OF POSTAL BALLOT

NOTICE is hereby given to the shareholders ('Members') of DCB Bank Limited (the 'Bank' or 'DCB Bank'), pursuant to the provisions of Section 108, Section 110 and other applicable provisions, if any, of the Companies Act, 2013, as amended (the 'Companies Act'), read with Rules 20 and 22 of the Companies (Management and Administration) Rules, 2014 ('Rules'), and relevant circulars including General Circular Nos. 14/2020 dated April 08, 2020, 17/2020 dated April 13, 2020, 11/2022 dated December 28, 2022, 09/2023 dated September 25, 2023 and 09/2024 dated September 19, 2024 and the latest Circular No. 03/2025 dated September 22, 2025 issued by the Ministry of Corporate Affairs (hereinafter collectively referred to as the 'MCA Circulars'), Regulation 44 and other applicable provisions of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended ('SEBI Listing Regulations'), Secretarial Standard on General Meetings ('SS-2') issued by the Institute of Company Secretaries of India, including any statutory amendment(s), modification(s), variation(s) or re-enactment(s) thereof, for the time being in force, and any other applicable laws, rules, guidelines, notifications, circulars and regulations, if any, the special business is proposed to be passed by the Members of the Bank through postal ballot ("Postal Ballot") via electronic voting ('e-Voting') as set out below:

1) Re-appointment of Mr. Thiyagarajan Kumar (DIN: 00735914) as a Non-Executive (Independent) Director of the Bank

The Bank has completed dispatch of the electronic copies of the Postal Ballot Notice along with the explanatory statement on Monday, October 26, 2026, through electronic mode to those Members whose e-mail addresses were registered with the Bank/ depository participants or the Registrar to an Issue and Share Transfer Agent ('RTA') viz MUFG Intime India Private Limited as on Friday, October 23, 2026 ('Cut-off Date'). The said Postal Ballot Notice is also available on the Bank's website www.dcb.bank.in, the relevant sections of the website of the stock exchanges where the equity shares of the Bank are listed, i.e. BSE Limited at www.bseindia.com and the National Stock Exchange of India Limited at www.nseindia.com ("Stock Exchanges") and on the website of Central Depository Services (India) Ltd at www.evotingindia.com.

In accordance with the provisions of MCA Circulars, Members can vote through remote e-Voting only. The voting rights of the Members shall be reckoned on the basis of the equity shares of the Bank held by them as on the Cut-off Date. Any person who is not a Member of the Bank as on the Cut- off Date, should treat this Postal Ballot Notice for information purpose only.

The Bank has engaged the services of Central Depository Services (India) Ltd ('CDSL') for the purpose of providing remote e-voting facility to all its members. The necessary instructions for Remote E-Voting have been set out in the Notice dated October 23, 2026. The voting period, through remote e-voting shall commence from Tuesday, October 27, 2026, at 9.00 a.m. (IST) and ending on Wednesday, November 25, 2026, at 5.00 p.m. (IST). The voting right of the members shall be in proportion to their shares of the paid-up equity share capital of the Bank as on the Cut-off Date. The remote e-voting module shall be disabled by CDSL for remote e-voting thereafter. Further, please note that once a vote on the resolution is cast by the Member, he/ she shall not be allowed to change its subsequently or cast their vote again.

Members who have not registered/ updated their email address, are requested to register the same in respect of the equity shares held by them in the electronic form by accessing the following link:

MUFG Intime India Private Limited (for more details, please refer the Postal Ballot Notice) or by contacting the RTA viz., MUFG Intime India Private Limited at: investor.helpdesk@in.mpms.mufg.com or by contacting the Bank at: investorgrievance@dcb.bank.in

The Board of Directors of the Bank (the 'Board') has appointed Ms. Manisha Maheshwari, [FCS 13272 & CP 11031] and failing her Mr. Saurabh Somani [ACS. 69826 & CP 26495], Partners of M/s. Bhandari & Associates, Company Secretaries, as the Scrutinizer for conducting the Postal Ballot/e-Voting process in fair and transparent manner.

The results of the voting conducted through Postal Ballot (through the Remote E-Voting Process) along with the Scrutinizer's Report will be announced by the Chairman and/or Managing Director & CEO or person authorized by the Board of Directors of the Bank on or before Friday, November 27, 2026. The results will also be displayed on the website of the Bank at www.dcb.bank.in and on the website of the Stock Exchanges, at www.bseindia.com and www.nseindia.com respectively and on the website of CDSL at www.evotingindia.com.

In case of any queries or issues regarding e-voting, you may refer the Frequently Asked Questions ('FAQs') and e-voting manual available at www.evotingindia.com, under help section or write an email to helpdesk.evoting@cdslindia.com or call1800 21 09911. All grievances connected with the facility for voting by electronic means may be addressed to Mr. Rakesh Dalvi, Sr. Manager, Central Depository Services (India) Limited, A Wing, 25th Floor, Marathon Futurex, Mafatlal Mill Compounds, N M Joshi Marg, Lower Parel (East), Mumbai - 400013 or send an email to helpdesk.evoting@cdslindia.com or call on 1800 21 09911.

Founder and Non-executive Director, Kotak Mahindra Bank

SUBRATA PANDA
Mumbai, 26 October

Indian banks are preparing for a higher interest-rate environment, with further rate increases, rising funding costs and pressure on deposit mobilisation emerging as key themes at the inaugural day of the 2026 edition of *Business Standard* BFSI Insight Summit, on Monday.

State Bank of India (SBI) Chairman C S Setty — who delivered the inaugural address at the three-day event at Mumbai's Jio World Convention Centre and participated in a fireside chat — said rates could rise by 50 basis points (bps) by December, even as demand for productive credit remained strong. Higher rates could moderate borrowing in rate-sensitive segments and strain highly leveraged.

Amitabh Chaudhry, managing director (MD) and chief executive officer (CEO) of Axis Bank, said tighter liquidity and rising incremental deposit rates could push up funding costs. Infrastructure investment, working capital needs and formal credit expansion continued to support lending.

The discussions also highlighted the repayment burden associated with the Reserve Bank of India's foreign currency non-resident (bank), or FCNR(B), deposit scheme under a concessional swap window. Banks mobilised nearly $133 billion from June to August.

Uday Kotak, founder and non-executive director of Kotak Mahindra Bank, called the scheme a "strong insurance policy" against macroeconomic and geopolitical volatility. However, he estimated repayments, including interest, could reach $160-170 billion, urging policymakers to use the next three to five years to strengthen the economy and prepare for the payout.

Changing household savings patterns are adding to deposit mobilisation challenges. Setty said customers were moving funds more readily between savings accounts and fixed deposits. Lenders remained confident about the sector's resilience.

Technology was another priority, with private-sector bank chiefs urging a shift from artificial intelligence pilots to large-scale deployment, supported by reliable data, cybersecurity and clear accountability.

Oil, AI play weigh on funding

ANJALI KUMARI
Mumbai, 26 October

Elevated oil prices, global investors' appetite for artificial intelligence (AI) investments and weak foreign capital inflows are pressuring the rupee and bond markets, while smaller non-banking financial companies face tighter funding, speakers at the *Business Standard* BFSI Insight Summit said on Monday.

Economists differed on India's reliance on foreign capital. Aastha Gudwani, India chief economist at Barclays, said the *Viksit Bharat* 2047 ambition required foreign financial capital, while Sonal Varma, managing director (MD) and chief economist for India and Asia at Nomura, argued for reducing dependence on volatile overseas flows.

Samiran Chakraborty, MD and India chief economist at Citibank, said India would need $600 billion in foreign capital over the next decade as investment requirements rise to $3.2 trillion. Yet net capital account inflows have been almost nil for two years, with AI investments diverting funds towards developed markets.

Treasury executives warned that oil prices, foreign equity outflows and higher US bond yields could keep the rupee and government bond yields under pressure. Aditya Bagree, head of markets at Citi India and the Indian subcontinent, said AI-related investments had contributed to equity outflows, while foreign currency non-resident (bank) deposits had given the Reserve Bank of India room to manage the rupee's depreciation. However, repayments fall due in three to five years.

Shailendra Jhingan, head of treasury and economic research at ICICI Bank, said the deposits were buying time, not permanently changing the rupee's outlook.

Jairam Sridharan, MD and CEO of Piramal Finance, said lenders rated A and below had limited funding options, favouring larger players.

Investing lessons: SIPs to multibaggers

Business Standard Smart Investor Arena

VEDANT VICHARE
Mumbai, 26 October

From navigating market volatility to building financial freedom and spotting multibaggers, the first day of *Business Standard*'s Smart Investor Arena at the BFSI Insight Summit 2026 had experts discuss investing and long-term wealth creation.

Vikas Satija, managing director (MD) and chief executive officer (CEO) of Shriram Wealth, said systematic investment plan (SIP) inflows supported Indian equities amid foreign investor selling. He stressed long-term asset allocation over fund selection and the continued relevance of relationship managers despite artificial intelligence (AI).

Edul Patel, cofounder and CEO of Mudrex, launched a report on tokenisation, exploring its potential to unlock wealth in gold and property, improve ownership verification and ease borrowing costs. Financial educator Neha Nagar said financial freedom meant choice, not just wealth. A ₹3 crore retirement corpus, she suggested, could suffice for many Indians.

In a session on multibagger investing, U R Bhat, co-founder and director of Alphaniti Fintech, and independent market analyst Ambareesh Baliga highlighted research, management quality, contrarian thinking and patience.

Harsh Roongta, founder and principal officer of Fee-only Investment Advisers, urged beginners to master financial basics. The day ended with financial educator Anant Ladha discussing wealth creation. "The first crore is always earned through active income and skills," he said.

QUICK READ

Paytm Q2 net profit jumps 10-fold to ₹225 cr, revenue up 28 %

One 97 Communications Ltd, the parent company that operates the brand Paytm, reported an over 10-fold rise in profit after tax to ₹225 crore in the July-September quarter of FY2026-27 (Q2 FY27), from ₹21 crore a year ago, on a reported basis, marking its sixth consecutive profitable quarter. Operating revenue rose 28 per cent year-on-year (Y-o-Y) to ₹2,648 crore, driven by sustained momentum across merchant and consumer businesses, expanded monetisation and AI adoption. Earnings before interest, taxes, depreciation and amortisation (Ebitda) rose 90 per cent Y-o-Y to a record ₹270 crore, with Ebitda margin expanding to 10 per cent, reaching double digits for the first time and reflecting stronger operating profitability. For the first half of FY27 (H1FY27), profit after tax more than tripled Y-o-Y to ₹445 crore, from ₹144 crore a year ago period. PTI

Jakson Solar to invest $525 mn in solar cells, ingot-wafer plants

Jakson Solar plans to invest up to $525.2 million to build 3 gigawatt (Gw) each of solar cell and ingot-wafer manufacturing capacity, a top company executive said. The company aims to commission 3 Gw of solar cell manufacturing capacity by December 2027, Managing Director Ivan Saha said on the sidelines of the Renewable Energy India Expo. The facilities will primarily cater to the merchant market, Saha said. Jakson Solar already has a 1.2 Gw solar module-making plant. Equipment procurement tie-ups for manufacturing have already been secured, Saha added. Developing a domestic manufacturing ecosystem across the solar chain is necessary to avoid potential supply shocks, Saha said. The government has also laid out framework to extend local-content requirements to solar ingots and wafers from June 1, 2028, in a move to deepen domestic manufacturing and reduce import dependence on China. Tata Comm to invest $450 mn to build fibre network

10,000 km network to connect key data centres, AI hubs in three phases over 3-5 years

GULVEEN AULAKH
New Delhi, 26 October

Tata Communications will invest $400-450 million over the next three to five years to build 10,000 km of fibre network offering 7.2 petabytes of capacity across India, linking key data centres and artificial intelligence (AI) hubs, the company said in a statement on Monday. (1 petabyte = 1,000,000 gigabytes)

The new fibre network will be one of India's largest AI-ready connectivity networks, the Tata group company said. The infrastructure will be integrated with its global network backbone, creating an AI super highway that will provide customers with a seamless, end-to-end connectivity fabric, supporting the performance, resilience and scale required for next-generation AI workloads, it added.

Ganesh Lakshminarayanan, managing director and chief executive officer (MD & CEO), Tata Communications, said the data centre-to-data centre connectivity opportunity in India could evolve into a market exceeding $1 billion over the medium term.

"With our planned investments, we are building on our existing strengths to create one of the most comprehensive data centre connectivity platforms in the market, positioning us to capture this significant growth opportunity. As we scale, a growing proportion of our expansion is being driven by anchor customer commitments and contracted demand, providing a strong foundation for sustainable growth, efficient capital deployment, and long-term value creation," he said.

> "WITH OUR PLANNED INVESTMENTS, WE ARE BUILDING ON OUR EXISTING STRENGTHS TO CREATE ONE OF THE MOST COMPREHENSIVE DATA CENTRE CONNECTIVITY PLATFORMS IN THE MARKET"
>
> Ganesh Lakshminarayanan
> MD & CEO, Tata Communications

The fibre network will come up in three phases, starting with the Mumbai-Pune-Hyderabad-Chennai corridor in the first phase. The corridor is one of India's most important AI and hyperscale growth routes with key gateways and cable landing stations. The second phase will be Hyderabad-Vizag-Chennai, while the third phase will be Bhubaneshwar-Vizag-Bengaluru-Chennai-Mumbai-Ahmedabad-Jamnagar, expanding connectivity into emerging East Coast and Western India data centre ecosystems, including GIFT City and other strategic locations.

Rupesh Chokshi, chief product and technology officer, executive vice-president and global business head – network services at Tata Communications, said that the company will fund the investment for the fibre networks through operating cash flows. As of September 2026, the company had ₹1,562 crore of net cash flows from operating activities for the first half of financial year 2026-27 (H1FY27). The number was ₹4,479 crore for FY26. For the quarter ended September 2026, the company recorded a profit of ₹335.6 crore on revenues of ₹6,704 crore.

"Revenues and margin accretion will ramp up progressively as fibre is lit and capacity is brought online, with meaningful financial contributions kicking in around FY28-FY29."

He added that discussions were underway across several key segments, including hyperscalers, neo-cloud/neo-scaler providers, AI platforms/frontier model labs, techno giants, digital native firms, SaaS (software as a service) providers, and large enterprises rolling out AI use cases. "Capacity will not be kept captive. This is a commercial-grade, multi-tenant AI superhighway built specifically to be commercialised and leased out via long-term contracts," Chokshi stressed.

The investment comes at a time of rapid data centre expansion, with facilities projected to reach 19 gigawatt (Gw) of IT workload. This growth runs alongside the emergence of generative and agentic AI, both of which require an infrastructure standard that traditional networks cannot support. It aims to boost India's emergence as a global AI and cloud connectivity gateway by meeting the unprecedented demand from hyperscale and neo-cloud providers, AI workloads, and digital-native businesses.

CORPORATE SCORECARD

Tata Consumer Q2 net profit up 16%

SHARLEEN DSOUZA
Mumbai, 26 October

Fast moving consumer goods (FMCG) major Tata Consumer Products' net profit rose 16 per cent to ₹469 crore in the second quarter of the current financial year (Q2FY27).

Net sales grew 14 per cent year-on-year (Y-o-Y) to ₹5,661 crore on the back of strong volume growth in its India business. Salt revenue rose 15 per cent. However, tea volumes were flat due to subdued category demand.

Tata Sampann recorded 57 per cent revenue growth during the quarter, backed by strong volume growth. "Growth was broad based across the portfolio, underpinned by distribution expansion, premiumisation and a strong innovation pipeline," the release said.

Earnings dashboard

Tata Consumer

Consolidated figures (₹ cr) | Change %

	Q2FY27	Q-o-Q	Y-o-Y
Revenues	5,661	5.8	14.0
PBT	632	6.8	20.8
Net profit	469	9.9	16.0

PBT: Profit before tax; Source: Company Compiled by *Business Standard* Research Bureau

Capital Foods and Organic India delivered combined revenue growth of 15 per cent for the quarter and was impacted by shipping disruption in the exports business. The domestic revenue grew 24 per cent.

Tata Starbucks revenue for the quarter grew 15 per cent, a multi quarter high, backed by strong same store sales growth, it said. It closed the quarter with 505 stores.

Sunil D'Souza, managing director and chief executive officer at Tata Consumer Products, said, "We delivered our second consecutive quarter of double-digit revenue growth in FY27, backed by strong underlying volume growth in India business. This volume-led performance, together with disciplined execution, drove 18 per cent Ebitda (earnings before interest, tax, depreciation and amortisation) growth."

Ather plans production capacity ramp-up

Electric vehicle maker Ather Energy on Monday reported profit after tax of ₹1.26 crore and said its board has approved plans to increase annual production capacity across its plants by an additional 225,000 units per annum by the July-September quarter of 2027-28 (Q2FY28).

According to an exchange filing, the automaker will raise annual capacity in Hosur to 495,000 units from 420,000 units, while at Factory 3.0, under construction in Chhatrapati Sambhajinagar, it will increase planned annual capacity to 650,000 units from 500,000 units. These capacity additions will take Ather Energy's total installed annual capacity to approximately 1,140,000 units by Q2FY28.

REPORTS ₹1.26 CRORE PAT IN Q2

Ather has earmarked ₹122 crore for the expansion, with ₹58 crore for Hosur and up to ₹64 crore for Factory 3.0. The company will fund the investments through a combination of debt and internal accruals.

The company noted that existing capacity utilisation at Hosur was 98 per cent at peak production. Factory 3.0 is still under construction. The capital expenditure for the Hosur investment includes ₹53 crore for a new battery line, which the company said will "address demand scenarios and reduce supply-chain risk."

Revenue from operations during Q2FY27 rose 63 per cent year-on-year to ₹1,464.2 crore from ₹898.9 crore in the year-ago period. Its vehicle sales rose 44 per cent to 93,000 units from 66,000 units last year. Its market share in the electric two-wheeler segment was 15.1 per cent. PTI

ITC Hotels net zooms 52%

ITC Hotels Limited's consolidated net profit rose 52 per cent year-on-year (Y-o-Y) to ₹203 crore in the July-September quarter of 2026-27 (Q2FY27), compared with ₹133 crore in the corresponding period last year.

Revenue from operations rose 26 per cent to ₹1,054 crore from ₹839 crore a year ago. Total income rose 25 per cent Y-o-Y to ₹1,106 crore in Q2FY27 from ₹885 crore in the year-ago period. The Board of ITC Hotels approved the incorporation of a wholly owned subsidiary of the company in Dubai, United Arab Emirates, subject to receipt of the necessary regulatory approvals. The firm is developing new properties in Puri, Visakhapatnam, and New Delhi, while expanding its Bhubaneswar hotel and ITC Grand Bharat in Gurugram, expecting to add over 700 rooms to its portfolio. HEMLATA SAMANT

Mankind Pharma net up 37.7%

Pharma major Mankind Pharma reported a 37.7 per cent year-on-year (Y-o-Y) rise in consolidated net profit for the July-September quarter of 2026-27 (Q2FY27) on strong domestic demand for its chronic drugs used to treat long-term illnesses.

The drugmaker recorded profit after tax (PAT) of ₹716 crore, up from ₹520 crore in the same quarter last year. Its revenue from operations also grew 17.3 per cent Y-o-Y to ₹4,338 crore from ₹3,697 crore in Q2FY26. Commenting on the numbers, Rajeev Juneja, vice-chairman and managing director at Mankind Pharma, said the rise in the firm's topline was due to performance in domestic markets and growth in Bharat Serums and Vaccines' (BSV's) speciality portfolio. SANKET KOUL

Hyundai eyes 250K mid-size SUV sales in 2027: MD & CEO

DEEPAK PATEL
New Delhi, 26 October

Hyundai Motor India's MD & CEO Tarun Garg said with Creta the firm is drawing on its brand value, while Bayon is aimed at buyers seeking a more tech-led experience

Hyundai Motor India Ltd (HMIL) is expecting sales of at least 250,000 units of mid-size sport utility vehicles (SUVs) — which include Creta and newly launched Bayon — in 2027 due to rapid growth being observed in the segment for past several years and the two models' ability to attract different sets of buyers, its Managing Director and Chief Executive Officer (MD & CEO) Tarun Garg said on Monday.

While speaking to reporters on the sidelines of the launch of the Bayon in Gurugram, Garg said the aforementioned target was a baseline rather than a ceiling. Bayon's deliveries are expected to begin during the ongoing festival season.

Garg said HMIL expects to sell around 170,000 units of the Creta in 2026. "The mid-SUV segment today is 16.5 per cent of the market already," he noted. The mid-size SUV segment in India has risen at a compound annual growth rate (CAGR) of 25.6 per cent over the past five years and is projected to record 64 per cent volume growth between calendar years 2026 and 2032.

He said the segment's size and growth made room for more than one model from the same manufacturer. Hyundai is now looking to build on Creta's established customer base through Bayon.

Bayon is being positioned differently from Creta, with Hyundai targeting customers who are quicker to adopt new technology. Garg added that the distinction was based on customers' attitudes and preferences rather than age, with Creta drawing on its established brand value and loyal customer base, while the Bayon is aimed at buyers seeking a more technology-led experience. "Creta created a market (of mid-SUV segment) when it was launched 10 years ago. We expect that the launch of Bayon will allow us to do for next 10 years what Creta did then," he stated.

Garg said Hyundai's market research suggested petrol would account for the largest share of demand in Bayon's segment. The model will also get a compressed natural gas (CNG) option in January 2027.

Hyundai plans to begin exporting the Bayon two to six months after its domestic launch, following its usual product-export strategy. Garg said the firm would announce export destinations in due course. The SUV will be manufactured at Hyundai's Chennai plant and is intended for more than 50 markets globally.

Bonfiglioli will review royalty arrangement with Indian arm where appropriate

Q&A Bonfiglioli Transmissions, a leading gearbox and drive systems manufacturer in India, recently made its stock market debut after a ₹2,534 crore initial public offering (IPO) structured entirely as an offer for sale (OFS) by its parent company, the Italian industrial power transmission major Bonfiglioli group. Bonfiglioli Riduttori SpA Executive President and Chief Executive Officer (CEO) **Sonia Bonfiglioli** and Bonfiglioli Transmissions Managing Director **Kennady V Kaippally** discuss the royalty arrangement between the group and its Indian unit and future investment plans in an email interview with **Sohini Das**. Edited excerpts:

What prompted the Bonfiglioli group to list its Indian unit?

■ **Sonia Bonfiglioli:** The listing is an important milestone in our 25-year-long association with India and reflects the maturity and strength of the business we have built over the years. Bonfiglioli India has established a strong market position, healthy cash generation and a sound balance sheet. Since it did not require fresh equity capital for its current business needs, we chose the OFS route. We felt this was an appropriate stage to bring public shareholders into the company and allow them to participate in its future journey. The Bonfiglioli group remains the majority shareholder, and our commitment to India's long-term development remains unchanged. We believe the listing will further strengthen the company's visibility, governance and accountability.

Would the group consider revisiting the 6 per cent royalty arrangement with its Indian unit?

■ **Bonfiglioli:** The technology and trademark licensing arrangement is a formal agreement that has been in place for several years. It has been an integral part of the business model under which Bonfiglioli India has developed. It provides access to the group's technology, intellectual property (IP), engineering know-how and global brand. The contractual royalty of 6 per cent applies to sales of specified licensed products, not to the company's entire revenue.

Like any long-term commercial arrangement, its terms can be reviewed where appropriate, taking into account the technology and support provided as well as shareholders' interests.

Kennady V Kaippally: From Bonfiglioli India's perspective, access to the group's IP and technology is a significant competitive advantage. We benefit from seven global research and development (R&D) centres and 70 years of engineering expertise without having to independently invest in and maintain a comparable global R&D infrastructure. Around 35 per cent of our 2025 sales came from products introduced in the preceding three years. Access to the group's technology and product portfolio helps us continuously introduce new products and respond quickly to evolving customer requirements. Our business also involves extensive co-engineering with customers, requiring continuous product development and engineering support. We have built a competitive and profitable business over the years while operating under this licensing framework.

> "WE BELIEVE THE LISTING WILL FURTHER STRENGTHEN THE COMPANY'S VISIBILITY, GOVERNANCE AND ACCOUNTABILITY"
>
> Sonia Bonfiglioli
> Executive president & CEO, Bonfiglioli Riduttori SpA

> "ACCESS TO THE BONFIGLIOLI GROUP'S INTELLECTUAL PROPERTY AND TECHNOLOGY IS A SIGNIFICANT COMPETITIVE ADVANTAGE"
>
> Kennady V Kaippally
> MD, Bonfiglioli Transmissions

Could India become a major manufacturing and engineering hub for the group?

■ **Bonfiglioli:** India's role within the group has evolved significantly from what began primarily as an investment to serve the domestic market, into an important manufacturing and engineering base. Over the years, we have built strong manufacturing capabilities, engineering expertise and a competitive supplier ecosystem in India. Today, our Indian operations serve both domestic and international customers across industrial, mobility and renewable energy (RE) applications. We see India playing an increasingly important role in our global manufacturing network, complementing the capabilities of our operations in Italy and other locations.

What are the group's investment plans for India?

■ **Kaippally:** India's continued investments in manufacturing, infrastructure, automation, construction equipment and RE provide a favourable environment for our businesses industry & automation, mobility and wind. We have a broad product portfolio, established manufacturing capabilities, strong engineering expertise and long-standing relationships with leading customers. The priority is to build on these strengths with greater localisation, continuous product development, manufacturing efficiency and closer customer collaboration. We also see opportunities to expand our participation in global supply chains. The group will continue to evaluate capacity expansion and strategic investments based on market opportunities, while remaining open to acquisitions where there is a clear strategic fit.

IIT-Kharagpur to set up India's first dedicated school of Physical AI

IIT-Kharagpur on Monday said it will establish India's first dedicated academic school focused on Physical Artificial Intelligence (AI), with an investment of ₹35 crore. The Benjamin Gupta School of Physical AI will be set up under a memorandum of understanding (MoU) signed by IIT-Kharagpur, its distinguished alumnus and philanthropist Vinod Gupta, and the IITKGP Foundation USA, according to an institute statement. The initiative will receive ₹12.5 crore from the Vinod Gupta family, ₹10 crore from an anonymous alumnus, with the institute funding the remaining amount. PTI

Backdoor attacks on small firms rose 52% in H1 2026: Kaspersky

Backdoor malware attacks on systems of Indian small and medium businesses (SMBs) rose 52.1 per cent year-on-year in the first half of 2026, according to cybersecurity firm Kaspersky.' Kaspersky Security Network data showed 452,000 backdoors were detected between January and June, up from 297,000 in H1 2025 and 408,000 in H2 2025. Exploit detections fell 35.1 per cent to 463,000. A "backdoor" lets attackers bypass authentication and secretly return to steal data or launch further attacks. Once in place, a backdoor allows attackers to return at will to steal data, move deeper into the network or launch further attacks. PTI

Manastu Space inks pact with Japan's Axelspace

Navi Mumbai-based space technology firm Manastu Space Technologies has signed a memorandum of understanding (MoU) with Japans Axelspace Corporation to integrate its green propulsion system into the Japanese firm's spacecraft, while exploring the possibility of an in-orbit demonstration. Green propulsion systems are a non-toxic, environmentally friendly alternative to conventional chemical propulsion systems. The announcement came on the same day the Ministry of Science and Technology said that Manastu Space Technologies would receive ₹116 crore under the Research Development and Innovation (RDI) Fund to advance indigenous green propulsion technology. PTI

Cadence unveils Nvidia-backed AI models to help design chips

Cadence Design Systems on Monday launched a portfolio of AI models tuned to help design computer chips, deepening its partnership with Nvidia and diverging from rival Synopsys's recent deal with OpenAI. Both companies make software used to design computing chips, a process that involves arranging billions of transistors precisely to meet cost and performance targets and are racing to have AI "agents" use those tools on behalf of human engineers to speed up the process. The new suite, called Cadence Maestro was built in part on Nvidia's open-weight Nemotron model and secured with Nvidia's OpenShell safety technology, the companies said. REUTERS

Chasing US capital, Indian AI startups weigh cost of moving

UDISHA SRIVASTAV
New Delhi, 26 October

Teething issues
- High local hiring costs and visa are hurdles for expansion plans
- Customer access, finding product-market fit in a new market among top challenges
- Absence of a peer network
- VCs providing support beyond funding

Even as venture capital (VC) firms create pathways for Indian artificial intelligence (AI) startups to enter the US market, winning their first few American customers remains a major challenge. US enterprises typically seek a proven track record before signing up with new vendors, making it difficult for startups to secure their initial clients.

VC firms such as Antler India and All In Capital have launched programmes to help homegrown AI startups establish a foothold in the US. While several startups have shifted their headquarters, secured customers, and raised follow-on funding, high local hiring costs and visa hurdles continue to complicate their expansion plans.

According to Ashish Bhatia, founder and chief executive officer of India Accelerator, securing the first few customers is among the biggest challenges for Indian startups entering the US market. "First, US buyers want references, so the first two or three logos are the hardest to win. Second, security, compliance and architecture expectations are much higher. Third, hiring US sales and business development people is expensive, and visas for founders who travel back and forth add friction," Bhatia said.

Similarly, All In Capital identified customer access, finding product market fit in a new market, and building a local network as key challenges. Antler India highlighted another difficulty: the absence of a peer network. Founders entering a new market may have no trusted contacts to consult on hiring, pricing, legal structures or investor introductions.

To address these challenges, VC firms are providing support beyond funding, helping startups access potential customers, build local networks, and navigate operational requirements.

Antler India launched its Embark programme in May 2025. Since then, more than 50 startups have participated across four editions, including over 15 from India. Raghav Goyal, director of investments at Antler India, said, "Seventy-five per cent now have paying customers or active pilots in the US. Over half have raised their next round. Almost 50 per cent have moved to the US, with their holding company flipped to a US entity and O-1 visas in place for founders. Most of them signed their first US customer within three to four weeks of Embark." Startups that have shifted their headquarters to the US include Dodge, KuboCare, Nudge, and Aina.

Similarly, All In Capital launched its Golden Ticket programme in January this year to help Indian startups expand into the American market. The programme received more than 750 applications within its first 10 days and aimed to select 20-30 startups. Its portfolio includes Vasuki AI, which is developing AI solutions for commodity hedging desks; Tross, which is building the data and application programming interface (API) layer for AI agents in healthcare; and Mowito AI.

Among these, Mowito has established an office in Detroit, launched pilots with US customers, and raised a follow-on funding round from a Canadian investor.

Kushal Bhagia, cofounder and partner at All In Capital, said early progress should be assessed based on the quality of customer engagements and pilots, as well as the ability to demonstrate value in specific workflows, rather than simply the number of users.

Recognising the challenges of entering a new market, VC firms are increasingly offering operational support alongside capital. For instance, Antler India's Embark programme facilitates introductions to US customers and provides hands-on support for early sales. It also works with partners including Deel, Rho, Alma, and Inkle to help startups obtain visas and setting up US entities.

However, not every Indian startup looking to expand into the US is shifting its headquarters overseas. "Some startups keep their engineering and product teams in India while building out their US teams, so the move is about being close to customers and capital rather than leaving India behind," said Jasnoor Gill, director of investments at Antler India.

The expansion journey, however, has not been the same for every startup. A few firms participating in these programmes have also reversed their relocation.

News publishers contest new privacy law

REUTERS
26 October

A group of 21 news publishers, including companies owned by billionaires Mukesh Ambani and Gautam Adani, has challenged India's privacy law in court, arguing it would trample investigative work and let New Delhi identify journalists' sources, documents show.

Prime Minister Narendra Modi's government last year announced implementation of a privacy law to protect digital personal data of users, raising compliance requirements for platforms like Meta and Google. The publishers have said that since media outlets were not exempt, the law was an invasion of press freedom.

Media companies received assurances in an August meeting with the government that the law would protect press freedom, but not having a written carve-out for journalists like in the European Union, Singapore and Britain was alarming, India's Digital News Publishers Association (DNPA) said in a confidential filing at the Supreme Court, reviewed by *Reuters*.

The October 6 lawsuit, being reported for the first time and due to be heard on Tuesday, is the most high-profile challenge to Modi's privacy law. Until now, only free speech activists and a group of smaller news outlets had challenged it.

ACCOUNT AGGREGATOR NETWORK

New pricing model to now be rolled out from Dec 1

AJINKYA KAWALE
Mumbai, 26 October

Financial institutions tapping India's account aggregator (AA) network will get another month of free data access. This comes as industry alliance Sahamati defers the rollout of its new pricing model to December 1, 2026, from November 1, according to a circular seen by *Business Standard*.

THE DECISION COMES ON THE BACK OF REQUESTS FOR POSTPONEMENT AND THE UPCOMING FESTIVAL SEASON

The decision comes on the back of requests for postponement and the upcoming festival season, the circular said.

The deferred model will give the AA ecosystem a standard pricing structure for the first time, after three years of deliberation with the industry.

Under it, financial institutions requesting data will pay the institutions that hold it, with the fee shared among the data provider, the account aggregator and Sahamati.

"Keeping in mind the upcoming festival season and requests for postponement, all financial information users (FIUs), AAs and financial information providers (FIPs) are informed that rollout of the proposed economic model has been postponed to December 1, 2026," Sahamati said in a circular on Monday.

It is the self-regulatory organisation (SRO) for the AA ecosystem.

The organisation said the implementation and operational details of the rollout will be notified via subsequent circulars. As part of the new economic model, financial firms that pull customer data through the AA network will pay a standard fee. Entities participating in the AA ecosystem cannot directly charge customers for sharing data through the network.

AAs are entities that move a customer's financial data from one institution to another, such as from a bank to a lender, but only with the customer's consent.

They pass the data along without being able to read or store it.

Entities that hold customer data, such as banks, are called FIPs, and those that request it, such as lenders, are called FIUs. The main idea of AA is to create ease of credit facility or access to other financial services.

The lender or an FIU pays all three fees to the AA in a single bill. The AA keeps its share and passes the rest on to the bank and Sahamati. FIPs were not paid before, and the fee paid by an FIU would be passed on to AAs and technology service providers (TSPs).

Banks, lenders and AAs that use the network will move to common pricing under a single standard contract. It will replace the separate deals they had struck with each other so far, including those routed through intermediaries such as TSPs.

So far, these intermediaries have connected lenders and banks to the AA network and charged for that service. AAs can still charge lenders separately for extra value-added services such as custom software tools.

PM discusses ways to boost ties with Brics parliamentary teams

Prime Minister (PM) Narendra Modi (*pictured*) on Monday interacted with parliamentary delegations from BRICS nations, including Russia, China, Iran and the United Arab Emirates. The 12th BRICS Parliamentary Forum, which is being held at the Samvidhan Sadan here, has brought parliamentary leaders from BRICS member and partner countries together to discuss ways to strengthen parliamentary cooperation and advance people-centric development. Apart from PM, External Affairs Minister S Jaishankar, Congress MP Shashi Tharoor and other Indian MPs interacted with the visiting parliamentary representatives. PTI

Europe adding to regulatory burden on business: Goyal

Europe is adding to the regulatory burden on businesses, while the industry needs simpler processes and procedures, Union Commerce and Industry Minister Piyush Goyal said on Monday. He said that India is creating huge opportunities for companies by deregulating provisions. "Sadly, you need to take a lesson or two from us on that," Goyal said in a lighter vein. He added: "With Europe adding to the regulatory burden in businesses, I tell you that whenever I say that I become the darling of businesses in your countries... I have had so many occasions where I have talked about the huge regulatory overburden both at the European Commission level and at the state level in many European countries. The minister was speaking at the India-Netherlands Business Forum in Hague. He is there on a two-day official visit. PTI

Rahul Gandhi acquitted in defamation case

Congress leader Rahul Gandhi was acquitted by a special MP-MLA court in Uttar Pradesh' Sultanpur on Monday in a defamation case related to his remarks against then BJP president Amit Shah in 2018. Gandhi, the Leader of Opposition in the Lok Sabha and Raebareli MP, appeared before the court for the verdict. Plaintiff Vijay Mishra's lawyer Santosh Pandey said Gandhi has been acquitted by the court. The matter was being heard in the court of Special Judge for MP-MLA cases Shubham Verma. PTI

EC suspends 6 officers over UP repoll lapses

The Election Commission (EC) on Monday ordered the immediate suspension of six officers, noting lapses during a re-poll at two polling stations in the Agra Division Teachers' Constituency of the Uttar Pradesh Legislative Council. The repoll was held on Monday following complaints of irregularities during voting last week. The officers were found to have failed to ensure proper supervision and control at the polling stations. An officer each was identified as being at fault at polling stations 21 and 26 in Saiyan and Fatehabad. PTI

Strictly abiding by relevant border pacts with India: China

China on Monday said it is strictly abiding by the relevant agreements with India and conducts normal border patrols to safeguard its sovereignty. Chinese Foreign Ministry spokesperson Guo Jiakun made the remarks when asked about his Indian counterpart's statement that the situation along the Line of Actual Control (LAC) is disturbed from time to time when Chinese forces diverge from established patrolling patterns. "China strictly abides by the relevant agreements and common understandings reached between the two countries, and conducts normal border patrol and control activities to safeguard its territorial sovereignty and stability in the border areas," Guo told a media briefing . PTI

Centre gives green signal to E100 flex-fuel vehicles

DHRUVAKSH SAHA
New Delhi, 26 October

Moving ahead

- A vehicle's compatibility with E10 or E20 alone does not establish suitability for E85
- In an April draft notification, the ministry had proposed the inclusion of E100 in the testing and certification standards
- Ethanol use in suitably designed vehicles can help reduce certain exhaust pollutants and lower GHG emissions over the fuel's production and use, says govt

Amid the government's ongoing push to encourage flex-fuel vehicles and ethanol blending in conventional fuels, the Ministry of Road Transport and Highways (MoRTH) on Monday amended the Central Motor Vehicle Rules (CMVR) to allow vehicles running on 100 per cent ethanol (E100).

The amendments update the emission certification provisions by expressly including E100 alongside E85. Vehicles certified for these fuels must meet the emission and safety requirements applicable to their category, MoRTH said.

In an April draft notification, the ministry had proposed the inclusion of E100 in the testing and certification standards, replacing the current provision which only included E85.

Currently, oil marketing companies are selling E20 petrol with ethanol blending of up to 20 per cent.

The new notification also corrected provision of the MV Rules related to biodiesel.

The E85 is a petrol and ethanol blend containing up to 85 per cent ethanol by volume. "E85/E100 is intended only for vehicles specifically designed and certified to use it and will not be applicable to the other vehicles generally available in the market or used till date. A vehicle's compatibility with E10 or E20 alone does not establish suitability for E85," the ministry's statement said.

This notification does not require owners of existing vehicles to switch to E85 or modify their vehicles either at present or in the future, it added.

Flex-fuel technology is already used in countries such as Brazil and the United States. In India, ethanol blending in fuel recently raised a controversy after consumers complained of alleged damage to vehicle components. The government has been pushing the throttle on reducing fuel imports by increasing the adoption of ethanol, both via flex-fuel vehicles and increasing the blending of ethanol in petrol.

Parallelly, the Centre also aims to increase the blending of isobutanol in diesel. The notification also updates biodiesel-related provisions and makes technical corrections.

Greater use of domestically produced ethanol can reduce dependence on imported crude oil. Use of ethanol in suitably designed vehicles can help to reduce certain exhaust pollutants and lower greenhouse gas (GHG) emissions over the fuel's production cycle and use, depending on the feedstock and production process, the ministry said.

Flex-fuel vehicles are specifically designed with fuel-system components and materials compatible with ethanol blends from E20 to E100. "Vehicles designed as flex-fuel vehicles will not have material compatibility issues. Motorists should check the fuel compatibility sticker on their vehicle and follow the manufacturer's guidance in the owner's manual while opting for the fuel choice at the fuel station," an official said.

Ethanol has a lower fossil carbon footprint than petrol. The use of higher ethanol blends can help cut tailpipe emissions of carbon monoxide (CO) and certain hydrocarbons (HC), while contributing to lower lifecycle GHG emissions, depending on the feedstock and production pathway, an explanatory note by the ministry said.

IOB Q2 net jumps 56% on improved asset quality

SHINE JACOB
Chennai, 26 October

Chennai-based Indian Overseas Bank (IOB) has posted a 56 per cent rise in net profit to ₹1,963 crore during the second quarter (Q2) of FY27, up from ₹1,259 crore during Q2FY26, owing to a rise in interest income and improved asset quality.

The bank's total income during the period was up 13 per cent to ₹10,428 crore. The bank's interest earned for the period increased by 17 per cent to ₹9,201 crore in Q2FY27, versus ₹7,851 crore during the same period last year. "Our net interest income grew by 26 per cent during the quarter. Our asset quality was also good, and our slippages are one of the lowest in the system," said Ajay Kumar Srivastava, managing director and chief executive of IOB.

Net Interest Income (NII) for the quarter increased by 26.4 per cent during the September quarter to ₹3,867 crore from ₹3,059.3 crore earlier. "On the asset quality front, slippages remained under control at ₹240 crore, with the slippage ratio at 0.07 per cent, one of the lowest in the banking system. We have consistently maintained it at this level," Srivastava said.

The bank's gross non-performing asset (NPA) ratio reduced by 64 basis points (bps) year on year (Y-o-Y) to 1.19 per cent, and the net NPA ratio reduced by 12 bps Y-o-Y to 0.16 per cent. Credit cost also reduced by 1 bps Y-o-Y to 0.17 per cent. NPA recovery during the quarter stood at ₹647 crore, which is 2.95 times the quarterly slippages.

TMB posts record quarterly profit

SHINE JACOB
Chennai, 26 October

Tamilnad Mercantile Bank (TMB) reported its highest-ever quarterly net profit of ₹451.14 crore during the second quarter of the current financial year, up 42 per cent compared to the same time last year.

The bank's net interest income (NII) stood at ₹807 crore, up by ₹35.17 crore year-on-year (Y-o-Y), driving operating profit after expenses up 42 per cent to ₹642 crore. The bank's Return on Assets also touched a historic high of 2.18 per cent, while Return on Equity was seen up to 16.92 per cent.

The is our highest-ever quarterly net profit and is driven by higher interest income, business growth and cost control," said Salee S Nair, managing director and chief executive officer of TMB. He said TMB's expected credit loss requirement stands at ₹385 crore as Q2FY27. To meet this, TMB has already set aside ₹304 crore, already covering nearly 80 per cent of the requirement by fully provisioning for SMA1 and SMA2 accounts under ECL norms.

He added that the bank witnessed its highest annual growth in total business during the last 18 years.

DATANOMICS

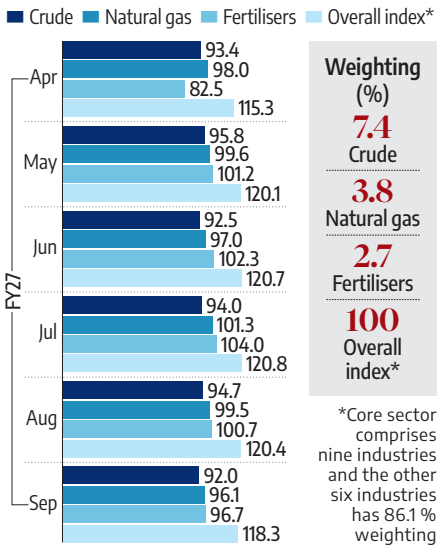
3 key industries fare poorly in new core sector series

INDIVJAL DHASMANA

The overall core sector output clocked a new 2022-23 series record growth of 7.9 per cent in September. However, the headline number masked the dismal performance of three crucial segments of the economy — crude oil, natural gas, and fertiliser — in the month. The output of each of these three industries was below the base year of 2022-23. Crude oil production was below the base year in all of the first six months of the current financial year of 2026-27 (FY27), and natural gas output outperformed the base year's production in only one of those six months. Fertilisers performed better, achieving this in four months. The year-on-year (Y-o-Y) growth story is worse. None of the three segments surpassed their respective year-ago performances in any of the first six months of FY27. The cumulative output since 2023-24 is equally dismal for crude oil. Natural gas and fertilisers joined crude oil in performing poorly during the first six months of FY27.

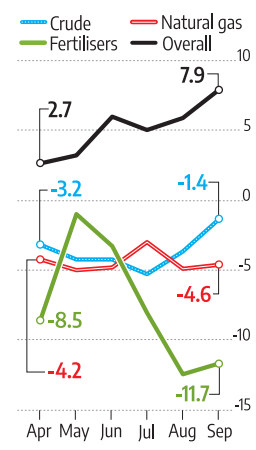
Output below FY23 in Sep FY27

Core sector index (in points)



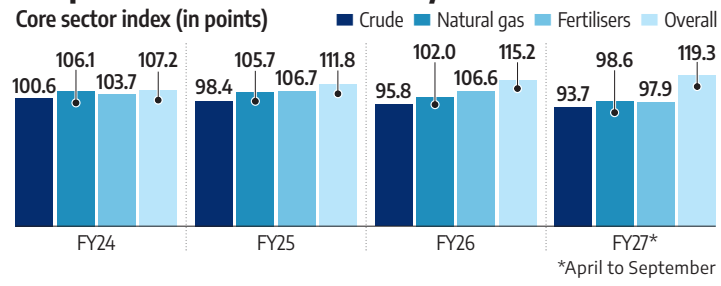
Output declines consistently in H1FY27

Core sector change (Y-o-Y %)



Output in H1FY27 below base year

Core sector index (in points)



All three show declining output in H1

Foreign assets disclosure scheme receives 1,100 declarations as Dec deadline looms

I-T dept nudges select UAE property owners

MONIKA YADAV
New Delhi, 26 October

The department is planning outreach programmes to raise awareness about Foreign Assets of Small Taxpayers – Disclosure Scheme, 2026

Around 1,100 taxpayers have filed declarations under the Foreign Assets of Small Taxpayers – Disclosure Scheme, 2026 (FAST-DS), as the Income Tax (I-T) department steps up efforts to encourage disclosures before the December 31 deadline, sources in the finance ministry said.

Announced in the Union Budget 2026-27, the scheme came into effect on August 16, 2026, offering eligible taxpayers a one-time opportunity to disclose specified foreign assets and income that were either not reported in tax returns or had not been offered to tax, subject to prescribed conditions.

The department has begun selectively reaching out to taxpayers who own residential or commercial properties in the UAE that may not have been disclosed to the tax authorities, urging them to use the one-time window to regularise eligible holdings, the sources said.

Following a high-level meeting on October 23, the department has also decided to share additional information on foreign assets with relevant taxpayers wherever possible, to help them identify holdings that may need to be disclosed under the scheme.

The department is planning outreach programmes involving companies, educational institutions, professional bodies, and industry associations to raise awareness of FAST-DS. The Central Board of Direct Taxes (CBDT) has also set up committees in each region under the Principal Chief Commissioner of Income Tax to address taxpayers' queries and concerns, the sources added.

The taxman has enabled a facility on its e-filing portal through which taxpayers can view and download information on foreign assets reported against their Permanent Account Numbers (PANs) by overseas jurisdictions under the Automatic Exchange of Information (AEOI) framework, including the Common Reporting Standard (CRS) and the Foreign Account Tax Compliance Act (FATCA).

Information for calendar years 2022, 2023, and 2024 is currently available on the portal. The facility displays only information received from jurisdictions that are signatories to the CRS/FATCA frameworks. Information obtained under other multilateral arrangements has not been displayed because of risk factors or non-disclosure commitments. The department also gathers information and intelligence from other sources. At the October 23 meeting, it decided that such additional information could be shared with relevant taxpayers wherever possible, according to the sources.

Under one category of the scheme, eligible taxpayers can declare specified undisclosed foreign assets or income with an aggregate value of up to ₹1 crore by paying tax at 30 per cent of the fair market value as on March 31, 2026, along with an equal amount as penalty, taking the combined levy to 60 per cent.

A separate category covers eligible foreign assets—acquired either out of income already subjected to tax or during the taxpayer's non-resident tenure—that were subsequently left unreported in Schedule FA of the I-T return. This category covers assets with an aggregate value of up to ₹5 crore and requires payment of a flat fee of ₹1 lakh, subject to the scheme's conditions.

A valid declaration and payment under the applicable category provide immunity from further assessment, penalty, and prosecution under the Black Money (Undisclosed Foreign Income and Assets) and Imposition of Tax Act, 2015.

"The restrictive monetary limits under FAST-DS may prevent a significant number of taxpayers from regularising their undisclosed foreign assets. Taxpayers with inherited foreign assets, in particular, may find it difficult to comply with the scheme because of the high tax and penalty burden on the current fair market value of assets, despite having limited liquidity to pay the amount," said Sandeep Bhalla, partner at Dhruva Advisors.

Bhalla suggested widening the scheme's eligibility criteria and removing value caps for inherited assets to encourage voluntary compliance and improve tax collections.

SC asks states, UTs to allocate funds to build basic facilities for women advocates

PRESS TRUST OF INDIA
New Delhi, 26 October

The Supreme Court (SC) on Monday directed all states and Union Territories to allocate funds to build bar rooms, washrooms and other basic amenities for women advocates in district and taluk courts.

A bench comprising Chief Justice of India Surya Kant and Justices Joymalya Bagchi and V Mohana disapproved of the lack of ladies' bar rooms and said facilities should be provided to women advocates regardless of their numbers.

"If there are no ladies' bar rooms, we strongly disapprove of it. It is the duty of all high courts and state governments to ensure that wherever women members are practising, they are provided an exclusive women's bar room with all facilities. This is the mandate. We do not want to deviate from that. It has to be complied with, whether additional funds or land are required. Whatever is required must be done," the bench said, posting the matter for hearing on December 2.

The top court was hearing a plea filed by a group of women advocates concerning the accessibility, inclusiveness and long-term sustainability of women lawyers in the legal profession.

Earlier, the court had stressed the need to create conditions that enable women advocates to discharge their professional responsibilities effectively, safely and on equal terms.

Taking note of issues raised in a plea that flagged the absence of adequately equipped ladies' bar rooms and other essential facilities in most courts, tribunals and commissions across the country, the apex court had said the concerns raised could not be brushed aside as a matter of mere convenience.

Advance Authorisation: Job work abroad and its tax implications

CHATROOM
TNC RAJAGOPALAN

We have an export order for an item. We have imported the materials required for manufacturing the item duty free under an advance authorisation. One of our machines to carry out a specialised process has broken down. It will take quite some time to send the machine abroad for repairs and get it back. Our customer cannot wait that long. So, we want to send the imported duty-free material abroad to get the specialised process done and re-import it for further manufacture at our factory. We refer to Paragraph 4.33 of the Handbook of Procedures (HBP), which allows the endorsement of the name of the supporting manufacturer in an advance authorisation. Can we get endorsement of the name of a supporting manufacturer abroad and if so, what are the tax implications?

■ Para 4.33 of the HBP does not expressly restrict endorsement only to supporting manufacturers or job workers located in India. You can therefore seek endorsement of the overseas job worker's name and address, explaining that the materials will return to India for further manufacture and subsequent export towards discharge of the export obligation. The proviso to condition (xii) of notification number 21/2023-Customs permits transfer of imported materials for job work subject to the relevant GST (Goods and Services Tax) conditions. Those provisions do not expressly prohibit overseas job work. You should comply with the applicable job-work-challan, recordkeeping, reporting and return-period requirements, and declare the purpose of the temporary export in the shipping bill. On re-import, the processed goods will attract duty under Section 20 of the Customs Act, 1962, read with any applicable exemption notification. The original duty-free import under the Advance Authorisation does not necessarily exempt this re-import. The invoice of the foreign job-worker will not attract IGST on reverse charge basis because where the specialized process is performed entirely abroad on goods physically made available to the foreign job worker, the place of supply is outside the taxable territory in accordance with Section 13(3)(a) of the IGST Act, 2017.

In the previous Foreign Trade Policy (FTP), capital goods could be imported under Export Promotion Capital Goods (EPCG) even if the same were financed by a leasing company. In the current FTP 2023, there is no such provision. Can we import capital goods on lease basis and clear under EPCG scheme even in current policy 2023?

■ Para 2.33 of the FTP permits import of capital goods under lease financing without specific DGFT permission. Also, the current definition of 'importer' in the Customs Act, 1962 covers the lessee even for import under the EPCG scheme.

Our customer wants us to raise the invoice but delay export shipment by two months. Can we do that?

■ Yes. Section 31(1) of the Central Goods and Services Tax (CGST) Act, 2017 requires you to raise the invoice before or at the time of removal. However, Rule 96A of the CGST Rules, 2017 requires you to export the goods removed under Letter of Undertaking or bond within three months from the date of invoice (not removal from the factory). The Commissioner may extend the period.

Business Standard invites readers' SME queries related to GST, export and import matters. You can write to us at *smechat@bsmail.in*

Notes:

1. The Board of Directors has declared an interim dividend of Rs. 4.00/- per equity share of Rs. 2/- each, aggregating to Rs. 62.38 crores.
2. The Company has commissioned following projects during the quarter ended September 30, 2026 :
   - Main Aluminium Extrusion Plant of 15,000 MT at its Fenesta Building System unit at Kota on September 01, 2026. However, the Surface Finish Plant is in the process of installation and commissioning.
   - Aluminium Chloride Plant of 100 TPD at its chemicals complex at Jhagadia, Bharuch District, Gujarat on September 30, 2026, thereby increasing the Aluminium Chloride capacity to 250 TPD at its Bharuch chemical complex.
   - Calcium Chloride Plant of 133 TPD capacity (out of total 266 TPD capacity) at its chemicals complex at Jhagadia, Bharuch District, Gujarat on September 30, 2026. The balance capacity of 133 TPD is expected to be commissioned in Q3' FY 2027.
3. The Company along with its wholly owned subsidiary namely, Shriram Polytech Limited executed a Joint Venture Agreement with Teknor Apex B.V. on April 16, 2026 and has sold 50% equity stake in Shriram Polytech Limited to Teknor Apex B.V. Accordingly, Shriram Polytech Limited (now Shriram Teknor Limited) ceases to be a subsidiary and have become a joint venture w.e.f. April 17, 2026. Accordingly, results for the half year ended September 30, 2026 includes line-by-line consolidation upto April 16, 2026 and equity accounting thereafter.
4. Exceptional items include:
   (a) Gain of Rs 11.74* crores recognized during the quarter ended June 30, 2026 pursuant to sale of 50% equity stake in its wholly owned subsidiary to Teknor Apex B.V. (also refer note 3).
   *(Rs. 38.35 crores in standalone financial results)
   (b) A gain of Rs 67.68 crores recognized during the quarter ended June 30, 2026 on sale of surplus land at Mokila village relating to Bioseed business.
   (c) On November 21, 2025, the Government of India notified the four Labour codes - The Code on Wages, 2019, The Industrial Relations Code, The code on Social Security, 2020, and The Occupational Safety, Health and Working Conditions Code, 2020. Based on the draft rules and best available information/ interpretation, the Company recognised an additional provision of Rs 55 crores during the quarter and nine months ended December 31, 2025. However, based on the FAQs issued by the Ministry of Labour and detailed exercise carried out with the help of consultants/actuaries during the quarter ended March 31, 2026, the impact got reduced by Rs 31.61 crores and the same was reversed during the quarter ended March 31, 2026.
5. The Company received a favourable judgement from the Income Tax Appellate Tribunal on July 3, 2026, relating to its claim under Section 80-IA of the Income Tax Act, 1961 for the FY 2021-22. Accordingly, basis the aforesaid judgement and favourable judgements in the similar matter in earlier years, the Company has reassessed its tax position in books and during the quarter ended June 30, 2026, reversed tax provisions of Rs. 98.05 crores and also recognised deferred tax asset related to MAT credit of Rs. 376.25 crores for the FY's 2020-21 to 2025-26, based on Company's assessment of future taxable profits for utilization of such MAT credit. These have been accounted for as tax adjustments related to earlier years during the quarter ended June 30, 2026.
6. The extract of standalone results is as under:

(Rs. in Crores)

PARTICULARS (Standalone)	Quarter Ended		Half Year Ended		Year Ended
	30.09.2026	30.09.2025	30.09.2026	30.09.2025	31.03.2026
Total income	4,107.96	3,477.31	7,796.45	6,847.70	13,995.33
Net Profit before exceptional item and tax	193.72	253.79	378.54	401.34	984.91
Exceptional items (Refer note 4)	-	-	(106.03)	-	23.38
Net Profit before tax	193.72	253.79	484.57	401.34	961.53
Profit after tax	144.35	168.47	855.78	265.20	837.55
Total Comprehensive Income [Comprising net profit and Other Comprehensive Income (after tax)]	144.72	168.17	855.25	264.80	835.29

7. The above results were reviewed by Audit Committee and then approved by the Board of Directors in their meetings held on October 26, 2026. The Statutory Auditors have carried out a Limited Review of the aforesaid results.
8. The above is an extract of the detailed financial results for the quarter and half year ended September 30, 2026 filed with the Stock Exchanges under Regulation 33 and 52 of SEBI (Listings and other Disclosure Requirements) Regulations, 2015. The full standalone and consolidated financial results in prescribed format are available on the Stock Exchanges websites (www.nseindia.com)/(www.bseindia.com) and Company's website (URL:https://www.dcmshriram.com/investors/result). The same can be accessed through the QR code given below.

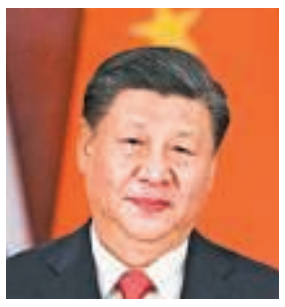
MACHADO RETURNS TO VENEZUELA

Tens of thousands of cheering supporters welcomed Venezuelan opposition leader María Corina Machado as she drove into Caracas on Sunday night PHOTO: REUTERS

Xi opens CCP plenum, aims for firm governance measures



China's Communist Party began a meeting of senior cadres on Monday aimed at tightening discipline and pressing officials to implement Beijing's orders, paving the way for a leadership reshuffle next year expected to extend President Xi Jinping's (*pictured*) rule for another five years. Xi briefed the party's four-day Central Committee meeting on a draft document centred on "full and rigorous party self-governance" that state news agency *Xinhua* said addressed the challenges the party faced, including growing its governing capacity, as well as guarding against complacency and combating corruption, the president's signature campaign. The Central Committee will convene in the closed-door meeting from Monday to Thursday. REUTERS

SK Hynix plans $12 billion dividend from Kioxia gains

SK Hynix plans to return about 80 per cent of the gains from selling down its stake in Japan's Kioxia Holdings to shareholders through a special dividend of about 16 trillion won ($12 billion), the *DongA Ilbo* newspaper reported. The South Korean chipmaker is expected to announce the payout when it reports third-quarter earnings on October 28, the newspaper said Monday, citing unidentified investment banking sources. SK Hynix is estimated to have generated about 20 trillion won in gains from the sale of its Kioxia investment during the first and second quarters, according to the report. AGENCIES

China's dam project in Tibet faces flood risks

Chinese researchers have warned that the Brahmaputra River in Tibet, where China is building the world's largest dam at an estimated cost of $168 billion, could experience increased runoff and heightened flood risks over the course of this century. Researchers from the Chinese Academy of Sciences and Yunnan University used tree-ring width chronologies from the southeastern Tibetan Plateau to reconstruct the river's runoff history from 1325 to 2020. PTI

US resumes warnings on strikes: Kyiv

Ukrainian President Volodymyr Zelenskyy said United States (US) warnings about imminent Russian ballistic missile strikes, critical to Ukraine's air defences, had been fully restored after recent issues. Speaking to Ukraine's *TSN* television channel, he said SpaceX's Starshield satellite internet had been working at speeds of up to 420 kilometres per hour since early on Saturday morning, after it had been throttled earlier in October. REUTERS

Algeria to deploy troops to Niger first such move in over 50 years

Algeria's parliament approved a resolution Sunday to send troops to Niger, making it the first time Algerian soldiers will be deployed abroad since 1973, when they were sent to support Egypt during the Arab-Israeli war. Authorities have not released any information about when and where exactly the Algerian army detachment will be deployed, or how many soldiers will be involved. Algerian Senator Belkacem Boulghiti said troops would be sent "to protect Algeria's economic and strategic interests, particularly its oil facilities in Niger." "We are not sending our soldiers to wage war in Niger, but for a mission to secure economic infrastructure". AP/PTI

Mecca pact members hold talks in Iran

REUTERS
26 October

Top officials from Saudi Arabia, Türkiye and Pakistan met Iranian officials in Tehran on Monday in a bid to de-escalate West Asia conflict, as Yemen's Houthis launched new attacks on Saudi Arabia and Egypt approved defence support for the Gulf kingdom.

The talks were the first high-level contact between Iran and the three nations — which signed the Mecca mutual defence pact in August — since a war that began with United States (US) and Israeli strikes on Iran also spread to Saudi Arabia and Yemen.

The Saudi Foreign Ministry said the visit was intended to open negotiating channels to "prevent the return of military escalation". Saudi Arabia was represented by Defence Minister Prince Khalid bin Salman, younger brother of Crown Prince Mohammed bin Salman; Pakistan by army chief Field Marshal Asim Munir; and Türkiye by intelligence chief Ibrahim Kalin, Saudi and Iranian officials said.

Iranian state media published pictures of Iranian President Masoud Pezeshkian, Foreign Minister Abbas Araghchi and Mohsen Rezaei, Secretary of the Supreme National Security Council, attending the meeting. Pakistan and Qatar have led mediation efforts in the war. Qatari mediators were in Tehranon Sunday, an official told *Reuters*.

Earlier efforts helped produce an interim peace agreement in June but fighting between Iran and the US soon resumed. Conflict then flared between the Iran-aligned Houthis and US ally Saudi Arabia, opening a new front.

Tensions between Washington and Tehran have sharpened in recent days. President Donald Trump said on Friday the US may carry out another military operation against Iran. Iranian security officials have told *Reuters* that Tehran has drawn up detailed plans to attack Gulf undersea cables if the United States and Israel attack again.

PHOTO: REUTERS

(From left) Saudi Arabia's Defence Minister Prince Khalid bin Salman, Pakistan's Chief of Defence Forces, Field Marshal Asim Munir, and Turkish intelligence chief Ibrahim Kalin at the meeting with Iranian President Masoud Pezeshkian in Tehran on Monday

The war, which earlier in the year also reignited fighting between Israel and the Iran-backed Lebanese Hezbollah militia, has eroded Trump's approval ratings ahead of the midterm elections that decide control of Congress.

Iranian Foreign Ministry spokesperson Esmaeil Baghaei said Monday's discussions would include "Israel's expansionist policies, developments in the Palestinian territories and Lebanon, and the repercussions of US and Israeli military action against Iran".

Baghaei said the meeting, proposed when Munir visited Tehran last week, could be a first step towards establishing regional security mechanisms. A senior Pakistani security official said the focus of Monday's meeting was to build a regional non-aggression network. The agenda also included US-Iran talks, Houthi attacks on Saudi Arabia, the Strait of Hormuz and a US blockade of Iranian ports, the official said.

An Iranian official said there would be no discussion of Iran's nuclear programme at Monday's meeting and the issue would not be addressed until Tehran's demands for ending the war were met.

Lula wins record fourth term in Brazil

Bolsonaro refuses to concede, vows to challenge the result after losing the runoff by 4 mn votes

Brazilian President Luiz Inacio Lula da Silva, the Workers' Party candidate for presidential re-election, after winning the presidential runoff election on Sunday PHOTO: REUTERS

REUTERS
26 October

Brazilian President Luiz Inacio Lula da Silva won a historic fourth term on Sunday, the country's electoral court said, in a shock result that defied polls, precedent and global anti-incumbent sentiment to put the brakes on a wave of right-wing election victories across Latin America.

However, his opponent Senator Flavio Bolsonaro, the eldest son of former President Jair Bolsonaro, refused to accept defeat and said he would ask for the result to be annulled due to a Sunday ruling from a Supreme Court justice that extended voting for two hours.

Bolsonaro led the election's first round but lost in the runoff by over 4 million votes, rattling Brazilian financial markets which had bet on his victory. His refusal to concede defeat has echoes of his father's reaction after losing to Lula in 2022. Jair Bolsonaro never accepted his loss and was later sentenced by the Supreme Court to 27-years in prison for plotting a coup to remain in power.

The scale of Flavio Bolsonaro's loss to Lula — by more than twice his father's losing margin — and the fact his campaign also asked for an extension due to rains in the conservative-leaning south make any annulment unlikely, analysts said.

Mario Braga, a Latin America analyst at the risk consultancy RANE, said potential right-wing protests will probably not "lead to the reversal of the result." Investors expect recent bets on a change of government to unwind in a volatile week ahead on financial markets.

Serbia's Vucic loses elections to students

Serbia's populist strongman Aleksandar Vucic dominated the Balkan country's politics for 14 years. Then came the students.

The long-ruling authoritarian leader on Sunday conceded the defeat of his right-wing Serbian Progressive Party to a grassroots movement of university students who led protests for almost two years against him before unseating him in a historic change of government.

The veteran leader easily outplayed political opponents in the past and thought he could do it again. Ahead of Sunday's ballot, he pulled a manoeuvre in the style of his ally, Russian President Vladimir Putin, when he resigned the presidency to pursue a bid to become the prime minister. AP/PTI

Israel heads to polls amid doubt over Netanyahu's future, coalition numbers

PRESS TRUST OF INDIA
26 October

Israel will hold parliamentary elections on Tuesday, with Prime Minister (PM) Benjamin Netanyahu seeking to retain power amid debate over the government's handling of the October 7, 2023, Hamas attack, the subsequent wars and its domestic and foreign policies.

The election is widely seen as a test of Netanyahu's leadership, as opposition leaders, including former military chief Gadi Eisenkot and former prime minister Naftali Bennett, seek to challenge his right-wing coalition.

Opinion polls indicate neither bloc is assured of the parliamentary majority needed to form a government.

Israel, roughly the size of north-eastern India's Mizoram state, uses a nationwide proportional representation system, with the entire country serving as a single electoral constituency to elect the 120 members of the Knesset, Israel's parliament.

Voters do not elect individual members of parliament.

Instead, they vote for closed party lists. This system allows numerous political parties to compete for seats in the legislature.

To enter the Knesset, a party must cross the 3.25 per cent electoral threshold, a requirement that often prompts pre-election alliances and mergers.

The Knesset serves a four-year term, but elections can be held early if it votes to dissolve itself, fails to approve the state budget within the prescribed period, or a new government cannot be formed.

The party winning the most seats does not automatically form the government. After the election, the president consults political factions and appoints a lawmaker to form a government. The candidate must secure the support of at least 61 lawmakers to form a government.

Netanyahu, leader of the right-wing Likud party, has served as Israel's prime minister for nearly 19 years across three separate periods since 1996.

He seeks to retain power after a period marked by the October 7 attack, which took place three years ago,. Security and accountability for the October 7, 2023, attack are central issues in the campaign.

Netanyahu also faces charges of fraud, breach of trust and bribery

Eisenkot, a former chief of staff of the Israel Defence Forces, leads the centrist Yashar party and has emerged as a principal challenger to Netanyahu. He previously served as an observer in Netanyahu's war cabinet but resigned in June 2024 after criticising the government for lacking a clear war strategy. He has positioned himself as an alternative on governance while maintaining a hard line on security.

AI giant Anthropic files for IPO

BLOOMBERG
26 October

Anthropic filed for an initial public offering (IPO), moving a step closer to being the first company focused primarily on developing the most advanced artificial intelligence (AI) models to go public.

The company behind Claude expects to begin trading on the Nasdaq Global Select Market under the symbol ANT, a filing Monday with the United States (US) Securities and Exchange Commission showed. Anthropic filed confidentially in June for a listing.

The IPO is being led Goldman Sachs Group and Morgan Stanley, along with 20 other banks, the filing shows.

Anthropic and some of its shareholders are offering stock in the IPO, the filing shows. The amount of shares they're offering will be disclosed in a later filing.

Anthropic had an $80.7 billion net loss on revenue of $16.3 billion in the first six months of 2026, versus a $13 billion net loss on revenue of $1.2 billion in the same period last year, the filing shows.

The company has mainly focused on serving the enterprise market. Anthropic's net revenue retention, a measure of its ability to keep its existing customers and increase their spending over time, is 900 per cent, the filing shows.

The company said 79 per cent of its revenue came from customers outside of its top five customers for the third quarter of the year.

Anthropic is seeking to tap the public market's ample funding capacity to maintain its lead over rivals, as AI companies burn through hundreds of billions of dollars to continue advancing their so-called frontier models. It is set to begin formally marketing for its IPO as soon as the week of November 9.

SpaceX bags $40 bn via debt for AI chip spend

REUTERS
26 October

Elon Musk said on Sunday that SpaceX had closed $40 billion in debt financing for graphics processing units (GPUs), underscoring the soaring cost of building AI computing capacity.

Musk, in a post on X, attributed the successful debt raise to the company's investment-grade status and revenue from its Starlink satellite internet and launch businesses. It was not immediately clear from Musk's post what he meant by the deal being "closed" or whether investors had agreed to pricing for the debt.

"This is primarily callable debt for GPU purchases that will arrive in Q1 and Q2. Not a major factor this quarter," Musk said in the post.

For the fourth quarter, the company expects $35 billion to $40 billion in capital expenditure, according to Chief Financial Officer Bret Johnsen.

> "THIS IS PRIMARILY CALLABLE DEBT FOR GPU PURCHASES THAT WILL ARRIVE IN Q1 AND Q2. NOT A MAJOR FACTOR THIS QUARTER"
>
> Elon Musk
> CEO & Founder, SpaceX

Reuters reported this month that SpaceX was in talks with banks and asset managers to raise $40 billion for to purchase Nvidia artificial intelligence (AI) chips. The funding highlights the enormous capital requirement of the AI boom, as technology companies race to secure advanced processors and build out the computing infrastructure needed to support AI development.

Musk said debt markets "have almost entirely shut off access to money for any company that doesn't have substantial revenueindependent of AI data centers." As a result, he predicted neocloud companies would face significant consolidation and failures.

Unlike larger cloud firms that serve a broad range of industries, neoclouds such as Nebius and CoreWeave mostly focus on tech customers and offer capacity tailored for AI technology. Investors have started betting against US neocloud and data centre companies, after fears that their debt-fuelled AI buildout was becoming unsustainable sparked a selloff.

SpaceX's revenue climbed 161 per cent from a year ago to $14.58 billion for the three months ended September 30. AI revenue surged by almost 10 times to $7.56 billion, the clearest evidence yet that SpaceX's heavy investment in AI was paying off. The shift is reshaping a company whose financial engine has long been its Starlink satellite internet services business and whose longer-term ambitions still hinge on getting Starship rockets into regular service.

Terafab, the chip manufacturing joint venture between SpaceX and Tesla in Austin, should produce its first test chip around May or June of 2027.

Meta eyes record $95 billion equity raise

REUTERS
26 October

Meta said on Monday it plans to raise up to $95 billion in its largest-ever equity fundraising, as the social media giant spends aggressively on its costly artificial intelligence (AI) infrastructure expansion.

The Facebook parent has launched public offerings worth about $35 billion in common and preferred stock, and said it also plans to launch a separate at-the-market share sale program worth up to $60 billion.

The company will launch the larger share sale program after its new non-voting Class C shares begin trading, which is expected in the first quarter of 2027, but said it has not yet finalised its timing and terms of the sale.

Meta's fundraising plan, which would rank among the biggest by an AI company, has also drawn interest of up to $5 billion in total from Nvidia, Advanced Micro Devices and Broadcom for Class A shares.

Their funding interest adds to concerns about an increasingly circular flow of capital in the AI industry, as chip suppliers help finance the expansion of one of their biggest customers.

> META HAS LAUNCHED PUBLIC OFFERINGS WORTH ABOUT $35 BN IN COMMON AND PREFERRED STOCK, AND PLANS TO LAUNCH A AT-THE-MARKET SHARE SALE PROGRAMME WORTH UP TO $60 BN

Meta has been pouring money into chips and data centers to compete better with OpenAI and Anthropic.

Its latest fundraising further underscores a shift among big technology companies increasingly tapping debt markets and raising equity to bolster their AI infrastructure, having previously relied on cash to fund their investments.

Earlier this year, Alphabet increased the size of its equity offerings to $84.75 billion.

Separately on Monday, SpaceX said an affiliate of Apollo Global Management will buy AI chips and server hardware and lease them to the rockets-to-AI firm, in a deal with total principal payments of about $40 billion.

Mark Zuckerberg-led Meta has committed to spend about $825 billion in the future, primarily driven by its growing investments in data centres, AI-related infrastructure and cloud computing power.

But the aggressive expansion has eroded its historically strong free cash flow.

The company reported a $2.12 billion cash burn in the third quarter, its first negative free cash flow in over a decade, compared with a positive cash flow of $10.63 billion a year ago.

Still, the early popularity of its consumer-focused AI agent Muse and release of a competitive new series of AI models have helped partly justify Meta's aggressive investments, although some enterprises are restricting Muse's access over security concerns.

The company had cash, cash equivalents and marketable securities of $82.45 billion, while it had long-term debt of $80.92 billion as of September 30, according to its latest quarterly filing. Last week, Meta raised the lower end of its annual capital expenditureforecast to a range of $135 billion to $145 billion from its earlier outlook between $130 billion and $145 billion.

Pricing pain points

Controls in health care are needed but come with risks

The government's admission before the Supreme Court that hospitals routinely overcharge customers for drugs and other products offers a faint hope for a healthier drug-price control regime. But establishing a comprehensive one could be tricky. Western countries that impose limits on drug-pricing margins and manufacturers' costs — such as Canada or nations of the European Union — do so via near-universal health care programmes that involve bulk (and in that sense monopoly) purchases. India's health system, on the other hand, is increasingly driven by private-sector delivery, where monitoring price caps is a challenging proposition and largely depends on forbearance on the part of hospitals, clinics and chemists. Nevertheless, the problem is serious enough for the government to consider some level of intervention following the public-interest litigation (PIL), seeking the apex court's intervention to regulate the prices of generic medicines, drugs and medical equipment. The affidavit had stated that hospital markups on many drugs range between 170 per cent and 700 per cent, while those on consumables range from 100 per cent to 1,000 per cent. The court itself had described as "dacoity" the markup on the maximum retail price of a range of life-saving drugs, especially cancer drugs. The government has acknowledged that the information asymmetry between patient and hospital is the chief reason for this blatant price gouging. At least part of the problem lies in the government's drug price-control regime. Medicines are divided into "scheduled" drugs, which are essential medicines that have ceiling prices set by the government — such as insulin, some antibiotics and anti-depressants, tuberculosis medications — and "non-scheduled" drugs, which allow manufacturers to set prices. Over 80 per cent of drugs fall in the non-scheduled category — and that includes cancer drugs. Facing up to this incontrovertible evidence of these pricing practices — that can often tip families into bankruptcy — the government machinery has moved to address the issue. With effect from November 9, 2026, the National Pharmaceutical Pricing Authority (NPPA) has capped the trade margins on 137 anti-cancer drugs at 30 per cent of the maximum retail price (MRP). The intervention is expected to lower the MRP on life-saving cancer drugs by up to 70 per cent. A parliamentary standing committee has recommended — not for the first time — standardising private-hospital costs, capping room rents to three-star hotel rates, and enforcing mandatory disclosure of upfront costs of medical procedures.

The obvious question is the efficacy with which such diktats can be imposed. Drug-price control runs the risk of being self-defeating. The supply of key molecules for several bulk drugs shifted to China after price controls made them unprofitable for local manufacturers. Today, India imports two-thirds of its active pharmaceutical ingredients from China, the impact of which was keenly felt during the Covid lockdown. Countries with price-control regimes have also felt the impact of manufacturers' reluctance to introduce the latest drugs into those markets. The government, therefore, needs to navigate between producer and retail profiteering and patients' interests. Widely disseminated education and a multilingual campaign on patient rights and price policies would go a long way in bridging the information gap. The fact that the NPPA falls under the Ministry of Chemicals and Fertilisers rather than the Ministry of Health and Family Welfare, which is responsible for health care delivery, suggests a fundamental policy disconnect, which too should be addressed.

Seamless credit network

Interoperability can enable inclusive lending

The Reserve Bank of India's (RBI's) decision to introduce interoperability among account aggregators (AAs) by December 31 seeks to simplify financial-data sharing, which could help reduce loan-application dropoffs. The need for this is underlined by the rapid growth of the AA ecosystem. According to the CRIF Credit Information Services and industry alliance Sahamati, the AA framework facilitated an estimated ₹3.82 trillion in loan disbursements across 36.8 million accounts in 2025-26, accounting for 8.4 per cent of retail lending and loans to micro, small and medium enterprises by value and 11.8 per cent by volume. By September, the ecosystem had fulfilled 595 million consents. More importantly, it is reaching borrowers often overlooked by conventional lending models. In the year ended June 2026, borrowers new to credit accounted for 28.5 per cent of business loans worth ₹10 lakh-25 lakh issued by AA-enabled lenders, against 8.6 per cent for other lenders. In personal loans, their share was 9 per cent, compared with 3.8 per cent through conventional channels. In 2025-26, the value of AA-enabled lending was estimated to be about 1.1 per cent of India's gross domestic product.

The framework addresses a longstanding problem in the Indian lending ecosystem. Individuals and small businesses without established credit histories often struggle to obtain formal loans even when they have regular incomes or viable businesses. Traditional assessments rely heavily on credit history and require borrowers to submit bank statements, tax documents, and other paperwork. The AA framework allows lenders to access financial information directly from participating institutions, with borrowers' consent. This enables a more comprehensive assessment of repayment capacity. Its benefits extend beyond loan approvals. The study found that, in lending for two-wheelers, the share of loans overdue by more than 90 days was 0.5 per cent for AA-enabled originations, compared with 5.3 per cent for conventional loans. Greater access, therefore, need not come at the cost of weaker credit quality.

However, differences in technical standards, system reliability, and integration costs could undermine the benefits. Banks, non-banking financial companies, and AA platforms must adopt common protocols, ensure reliable data transfers, and minimise transaction failures. Transparent pricing and clear accountability for failed consent requests or incomplete data sharing will also be necessary. Data protection is equally important. Financial information can reveal sensitive details about an individual's income, spending and liabilities. Strong encryption, access controls, independent security audits, and effective grievance redress are essential to maintain public trust. It is also important to ensure that smaller lenders are not disadvantaged by high integration costs. Research by the RBI-promoted Centre for Advanced Financial Research and Learning has associated greater exposure to the AA rollout with higher local economic activity. While this does not establish that AAs alone caused the increase, it points to their wider potential. Interoperability can help realise that potential provided efficiency is matched by safeguards. Better data sharing should make credit easier to access without compromising borrowers' privacy or financial security. With 17 AAs operating in the ecosystem, better connectivity with banks, insurers and pension-related institutions could enable consent-based sharing of a broader range of financial information for inclusion.

Risk of irrelevance?

The scale of the selling and the magnitude of the underperformance in Indian equities are unsustainable

I have been investing in Indian equities for over 30 years. Rarely have I seen foreign sentiment this bad. India no longer features in global conversations. What I am saying is not new. Since the Indian market's peak in September 2024, we have seen $65 billion in net outflows by foreign portfolio investors (FPIs). Over the last decade, India has received zero net-foreign flows.

The stock of Indian equities owned by foreigners has fallen from $930 billion to about $675 billion, and foreign ownership as a percentage of the market is now at a 15-year low. India is now a consensus underweight for all global investors and our weighting itself has shrunk from 21 per cent in September 2024 to about 10 per cent today (MSCI Emerging Market index).

AKASH PRAKASH

One company, TSMC, has a benchmark weight 50 per cent higher than that of all of India! The three EM heavyweights — TSMC, Samsung Electronics, and SK Hynix — together account for 30 per cent of the index, but have almost three times India's weighting.

We have also seen unprecedented underperformance. Since the peak in September 2024, Indian equities are down about 25 per cent in dollar terms, even as the EM indices are up about 50 per cent. We have, therefore, underperformed by 7,500 basis points (75 percentage points) in the last two years alone. I have never in my career seen this quantum of underperformance in this short a period. It has destroyed careers and blown up funds. There are numerous funds that have destroyed 10-year track records in the last 24 months by simply being overweight India.

Normally, I would look at these statistics and numbers as contrarian indicators. This is exactly why I would argue — and still do — that we will soon see a turnaround in India's relative and absolute performance. The scale of the selling and the speed and magnitude of the underperformance are unsustainable. How can three companies in Asia have three times the index weight of a country with India's size and potential?

How can these three companies have a combined index weight of 30 per cent, almost identical to the combined weight of India and China, at 30.5 per cent? Something is clearly wrong. It seems ludicrous that three Asian technology companies can have an index weight almost equivalent to 40 per cent of the world's population. A classic contrarian indicator, if there ever was one.

However, what troubles me is that for the first time I am now being asked about the need for an India-dedicated allocation. Many allocators no longer think India is important enough to warrant dedicated exposure. Why bother with sticking their neck out and betting on India specifically, especially given the extent of underperformance. This conversation has come up now after years. Twenty years ago, every allocator had dedicated money in China and Brazil, and India was a debate. Over time, it became conventional wisdom that to invest in EM, you needed dedicated pools of capital for India, greater China and Brazil. If allocators are now unwilling to make an India-specific bet, it is a big negative and will constrain the quantum of foreign equity as well as the diversity of capital into the country. Non-dedicated exposure by definition is more cyclical.

So why this change in thinking? First of all, it is the decline in India's EM weighting. At only 10 per cent, we are half what we used to be and three countries — Taiwan, Korea and China — are 70 per cent of the EM index. Do you really need to bother with India? Even getting India wrong will not really move the needle. Over the last 10 years, India has anyway underperformed the EM indices by about 180 basis points annually. Even on a 20-year basis, India has just marginally outperformed. The narrative that you need to be in India because of the quality of companies, sustainability of growth and entrepreneurial energy is getting lost. There is fundamentally less belief that we have decades of strong growth ahead of us.

Second, many investors have come to the conclusion that India may not deliver enough absolute returns. Their calculations are as follows. The Nifty index in rupees has delivered about 10.5 per cent per annum over the last 20 years. Assuming a capital gains tax impact of about 15 per cent (the average of the short-term rate of 20 per cent and the long-term rate of 12.5 per cent), this brings the return down to about 8.9 per cent. Then, assuming a near 4 per cent rupee depreciation (the average over the last 20 years), this brings the return down to about 6 per cent in dollar terms.

Why bother with 6 per cent when the 100-year annualised returns in US equities are about 10 per cent? I would argue that 25-year Nifty returns are near 13.5 per cent not 10 per cent. Nifty returns understate market returns and assuming continued 4 per cent currency depreciation makes no sense given the narrowing inflation differentials. Also, given the valuations, can you assume continued 10 per cent compounding in the United States? However, it does not matter what I think, this is what investors are saying.

All allocators are upset about the capital gains tax. They do not pay these taxes in any other major jurisdiction. It drops projected long-term annualised returns by about 2 per cent and that is a huge difference when comparing countries over long holding periods. There is also the perception that India remains a complex place to do business. Indian service providers do a good job of scaring the risk and compliance teams of global investors. While this may be unfair, the perception sticks.

India is also seen as the biggest global loser from artificial intelligence (AI), as our key advantages of demographics and a skilled white-collar workforce lose relevance in an AI-first world. Innovation and research & development, which are driving value creation globally, are seen as areas of weakness in India. One can refute this argument, but many allocators believe it.

India is also caught in a no-man's land, not cheap enough for value investors to pile in but not growing fast enough to attract growth investors either.

If India were to lose its attraction as an independent asset class that is a cause of worry. We will attract less structural capital and be of less relevance to global allocators. Not a good place to be for a country fundamentally short of capital. Equity markets are a competitive advantage for India, we weaken this if we lose access to dedicated pools of long-term capital.

I remain convinced that all this data is more a contrarian indicator and not a reason to turn more negative on India. Much of this is cyclical and the tide will turn. However, we must guard against slipping further down the investor consideration set in the meantime.

Uneasy lies the governance space

L'affaire Tata Sons has brought into focus the uneasy space between promoters, professional managers, and boards, that India Inc constantly negotiates. While there has not been much public comment from India Inc on the situation (and this columnist rushes in where angels fear to tread), there has been enormous private speculation about how this situation came to pass, and nervous conjecture on what the ripple effects of this will be in shaping the future governance space.

This is neither a spat among shareholder groups for control, nor a summary sacking of a chief executive officer by a promoter. We have seen those movies before. This is almost the first time that a professional manager-CEO, with the board on his side and non-shareholder government institutions weighing in, has sought to marginalise a 66 per cent-owning promoter in decision choices that impact not just the direction of the business (though we are not explicitly hearing from either side about strategic fault lines), but also the promoter's shareholding.

RAMA BIJAPURKAR

While CEOs pushing back publicly and openly fighting shareholders is common in bastions of capitalism like the United States, with widely distributed shareholding and boards playing a greater fiduciary role, in India such battles are rare, especially if it is a promoter shareholder. Indian promoters hold the hallowed place of a company's birth parents with special rights and responsibilities — some enshrined in law, others in culture.

ITC and Larsen & Toubro (L&T) are two unforgettable examples in India of CEO-shareholder battles. In the case of ITC, the battle was against promoter BAT's (British American Tobacco's) move to gain control of the company and stop diversification, while in the case of L&T, it was against a dominant shareholder group, with the CEO fighting to retain management control. In both cases, the government backed the CEO, but by weighing in through its 30 to 40 per cent shareholding via financial institutions it controlled, keeping within the legitimate norm of capitalism: *Jiski lathi, uski bhains* (whoever has the stick owns the buffalo).

What makes the present Tata Sons case different is that government-controlled entities do not own large chunks of shares, and the duelling ground is not an annual general meeting or extraordinary general meeting. That a CEO with no shareholding backing, along with board members who do not represent chunks of shareholding, can challenge a promoter with a 66 per cent holding and pressure it to dilute its stake, and not have sway over decisions is a first-time challenge to power structures — which have stood the test of time, tradition, convention, and culture, rightly or wrongly. It brings a fresh round of calibration, especially by promoters, of their terms of endearment and engagement with professional CEOs, not to mention boards. More so, if their shareholding is well below 51 per cent.

The relationship between professional managers and promoters in India has always had a degree of tension. The differences that typically end in the CEO quitting could be on several dimensions —differences in direction, risk appetite and prudence, business ambition, remuneration (less so of late as CEO salaries and stock options have zoomed upwards) and often over different perceptions of where the power to make what kind of decisions rests — the birth parent or the foster parent. Human resources consultants frequently counsel boards and CEOs that once the chemistry with the promoter has gone sour, there is no salvaging the relationship.

The separation of management from ownership is not common in India yet, though nascent examples are emerging. Big stock market influencers welcome owner presence in management because they feel a reassuring common focus on increasing shareholder value. Many employees also prefer a promoter at the helm, seeing this as offering more predictability and benevolence than the CEO or the board of the day. Even in a company like Infosys, set up by professionals, the "founders" (as they preferred to be called) took turns in running the company in accordance with their pre-agreed plan. The board went along with the frequent changes at the top, presumably because these were the promoters who had built an amazing company and it seemed only fair that they each had their turn.

Given the promoter-friendly, promoter-respectful and promoter-on-top ethos of corporate governance that has existed and continues to exist in India, this departure from the norm against none other than the venerated, iconic Tata promoter group with its track record of trusteeship and larger good over personal gain has rocked the comfort boat all around.

The ripples it will cause are yet to become clear — will promoters be nervous seeing such a coup by the professional hire? How will they respond? Will they pick boards like in the old days, based on loyalty and narrow subject-matter expertise? Especially as the law of the land and the market regulator push more power and accountability in the hands of independent directors? Will boards be now placed under more pressure from external directives on which way to vote, getting trapped between the rock and the hard place of the promoter and the proverbial hand of God? Will CEOs have less freedom to operate and more fetters? And does this add to the bad rap that India has been getting of late as a safe, stable place to invest in for the long term? Probably yes to all.

Since one big pillar of the argument is the national and systemic importance of Tata Sons, its board perhaps needs to be more transparent on the rationale for its many volte-faces.

The double-edged sword of a dual bottom line

BOOK REVIEW

M S SRIRAM

How do we structure organisations that have a commitment beyond maximising shareholder returns? Eric Ries explores this fundamental question in *Incorruptible*. The title assumes a solid fabric on which the corporations stay dedicated to maximising shareholder wealth and being a fair employer; fair to customers and the ecosystem. Mr Ries argues that such organisations deliver better shareholder returns in the long run; survive multiple cycles and have superior competitive strength.

The question is not about good intent and commitment. On this parameter, public-sector entities having multiple desirable objectives (non-extraction, fair play, equal opportunity) should be at the top of a list of desirable organisations. Barring a few exceptions, we do not discuss them as "good" companies delivering "value" at multiple levels.

It is, therefore, important to examine how businesses with a purpose are designed. The book notes that mission-driven organisations have a clear intent, etched in the organisation's muscle memory. They are accountable by regular "tests by fire".

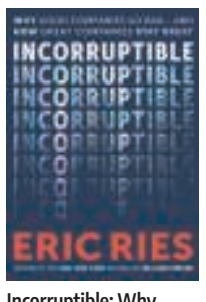
Mr Ries highlights examples of mission failure — Google moving from the tagline "do no evil" to "do the right thing". He talks about Johnson & Johnson (J&J) recalling $100 million worth of Tylenol capsules in 1982, following its credo of "first responsibility being towards the patients (and medical fraternity)" above shareholders. However, in 2009, when defective Mortin tablets were discovered J&J had lost its muscle memory and attempted a phantom recall of the drug before being caught. Using such counter-examples, Mr Ries builds stories of organisations that stuck to the mission and survived inter-generationally. In the process, he teases out the design elements.

The most valuable chapters look at alternative structuring of organisations such as Ikea, Patagonia and Mondragon. A common feature is they are all closely held or had supermajority voting rights. In cases where Mr Ries identifies a drift from the purpose, the ownership was wider. This helped the governance gatekeepers to focus on the purpose.

Mondragon is a co-operative, but others have an unlisted holding structure. The holding is a trust that has a larger purpose with the trustees having no pecuniary interests. The mission survives because there is a governance fortress that is difficult to breach. To replicate such mission-driven enterprises, we need a larger ecosystem to foster such organisations: Incorporation as Public Benefit Corporations; Certification as Benefit Corporations; listing on the social stock exchange (in the case of India) or long-term stock exchange, and creating a larger conversation for organisations with alternative outcomes that move beyond profits.

The problem with the book is the way it opens with contradictory outlandish claims — that purpose-driven companies are likely to systematically outperform conventional competitors and are more likely to endure over generations. This is quickly followed by illustrations of failure in spite of a clear purpose, but due to a lack of an appropriate design. Fedmart wanted to be fair to employees and customers; Sears vested 33 per cent of its shares with employees; Polaroid focussed on cutting-edge research; Cadbury was working with communities. These succumbed to the conventional framework of shareholder primacy, pressed by investors. They succumbed to factors that Mr Ries identifies: Friendly fire where the shareholders dismantled the ethos; hostile takeover where there was a breach by outside actors; betrayal in the boardroom; lacking a solid succession; mission drift or a temptation to harvest.

This book is contextually important to examine the current stress in the house of Tatas. Is this a case of weak fortification of the purpose? Possibly no. The Tatas did not begin as a purpose-driven conglomerate. It was structured as a regular company. Its purpose was later articulated by the will of Sir Ratan Tata and Sir Dorabji Tata, where the holdings in a profit-seeking commercial entity were transferred from individual holdings to a charitable purpose. The nature of the holding company with minority shareholders being profit-seeking (the SP Group) continued. The current structure of Tatas is of a double holding: The trusts (with charitable purposes and guardrails) hold a majority in Tata Sons — structured as a commercial holding company with other minority shareholders (SP Group). Given the sequence of events, the Tata group was not designed as purpose-driven commercial ventures. The structuring of charitable holdings is a post-facto event, and not integral to the design. In this context, two options available for defining Tatas as purpose-driven may be: (a) the SP group is fully on board regarding their charitable purpose or is given a fair exit; or (b) the trusts move towards demutualisation of charitable purpose from the commercial arm.



Incorruptible: Why good companies go bad and how great companies stay great
by Eric Ries
Published by Penguin Life, 2026
403 pages ₹1,299

We can see that in all the cases that drifted/failed, the root cause was a lack of a governance fortress around the purpose. Those who have survived without the fortress such as the Tatas (till recently) and Costco is because of the leadership's commitment rather than a design fence around the purpose. Mr Ries provides a good framework to construct our arguments on alternative positions.

Notes:-

a) The above is an extract of the detailed format of the Standalone & Consolidated Unaudited Financial Results for the Quarter and Half-Year ended September 30, 2026 filed with the Stock Exchange(s) under Regulation 33 and Regulation 52 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended, as prescribed in Securities and Exchange Board of India Operational Circular SEBI/HO/DDHS/P/CIR/2021/613 dated August 10, 2021. The full format of the Standalone & Consolidated Unaudited Financial Results for the Quarter and Half-Year ended September 30, 2026 are available on the website of BSE Limited (www.bseindia.com) and on the website of the National Stock Exchange of India Limited (www.nseindia.com). The same is also made available on the website of the Company (www.godrejastec.com).

b) The above Financial Results have been reviewed by the Audit Committee and approved by the Board of Directors of the Company at its Meeting held on Monday, October 26, 2026. The Statutory Auditors of the Company have carried out limited review of the aforesaid results and expressed an unmodified review conclusion.

c) Impact of Labour Codes : On November 21, 2025, the Government of India notified the four Labour Codes - the Code on Wages, 2019, the Industrial Relations Code, 2020, the Code on Social Security, 2020, and the Occupational Safety, Health and Working Conditions Code, 2020 - consolidating 29 existing labour laws. Considering the materiality and regulatory-driven, non-recurring nature of this impact, the Group had presented incremental impact of Rs. 209.43 Lakh under "Exceptional items" in the Statement of Profit and Loss for the year ended March 31, 2026.

REMINDER - IV
SPECIAL WINDOW FOR TRANSFER AND DEMATERIALISATION OF PHYSICAL SECURITIES

Notice is hereby given that Securities and Exchange Board of India (SEBI), vide its Circular HO/38/13/11(2)2026-MIRSD-POD/I/3750/2026 dated January 30, 2026 **("SEBI Circular")** has opened another special window for a period of one year from February 5, 2026 to February 4, 2027 for re-lodgement of transfer and dematerialisation (demat) of physical securities which were sold/purchased prior to April 1, 2019.
The said special window shall be available for transfer requests which were earlier lodged but were rejected, returned or remained unattended due to deficiency in documentation /process / or otherwise, subject to fulfilment of the requirements prescribed under the said SEBI Circular.
Such securities transferred under this facility shall be credited only in dematerialised form and shall remain under lock-in for a period of one year from the date of registration of transfer. During the said lock-in period such securities shall not be transferred / lien marked or pledged.
The requests shall be eligible under special window only where original share certificates are submitted as under:

Execution Date of Transfer Deed	Lodged for transfer before April 01, 2019?	Original Security Certificate Available?	Eligible to lodge in the current window?
Before April 01, 2019	No (it is fresh lodgement)	Yes	✔
Before April 01, 2019	Yes (it was rejected/ returned earlier)	Yes	✔
Before April 01, 2019	Yes	No	✘
Before April 01, 2019	No	No	✘

Further, the following cases shall not be considered under this window:
- Cases involving disputes between transferor and transferee.
- Securities which have been transferred to Investor Education and Protection Fund (IEPF).

Shareholders who have missed the earlier deadline for re-lodgement of transfer deeds are encouraged to avail this opportunity by submitting the requisite documents to the Company's Registrar and Transfer Agent (RTA):
NSDL Database Management Ltd. (NDML)
Unit: J. K. Cement Limited, 4th Floor, Tower 3, One International Center, Senapati Bapat Marg, Prabhadevi, Mumbai - 400 013
Email: investor.ndmlrta@ndml.in Contact No: 022-49142578/2700.
Alternatively, investors may also contact the Company at its Registered Office for assistance.
For further details, investors may refer the SEBI Circular available at https://www.jkcement.com/wp-content/uploads/2026/02/SEBI-circular-special-window-for-transfer-and-dematerialisation-of-physical-securities.pdf?pid=25798

UPDATION OF KYC AND CONVERSION OF PHYSICAL SHARES INTO DEMATERIALISED FORM:
Shareholders holding equity shares in physical form are requested to update their KYC details and convert their physical shares into dematerialised form at the earliest. Holding securities in demat form provides enhanced safety and eliminates risks associated with physical certificates.

NOTICE OF POSTAL BALLOT

Notice is hereby given pursuant to Section 110 read with Section 108 and other applicable provisions, if any, of the Companies Act, 2013, **("Act")** (including any statutory modification(s) or re-enactment(s) thereof for the time being in force), read with Rules 20 and 22 of the Companies (Management and Administration) Rules, 2014 ("Rules"), Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 **("SEBI Listing Regulations")**, Secretarial Standard on General Meetings issued by the Institute of Company Secretaries of India **("SS-2")** as amended, and in accordance with the requirements prescribed by the Ministry of Corporate Affairs **("MCA")** for holding general meetings / conducting postal ballot process through electronic voting (remote e-voting) vide General Circular Nos. 14/2020 dated April 8, 2020, 17/2020 dated April 13, 2020 and the latest being No. 03/2025 dated September 22, 2025 issued by MCA, read with other relevant circulars, issued from time to time, Regulation 44 of SEBI Listing Regulations and other applicable laws and regulations, as amended from time to time (including any statutory modification(s) or re-enactment(s) thereof for the time being in force, that the special business appended below are proposed to be passed by the Members of the HDB Financial Services Limited ("Company"), through postal ballot ("Postal Ballot") only by way of remote e-voting process ("remote e-voting"):

Item No.	Resolutions	Resolution Type
1	TO APPROVE THE RE-APPOINTMENT OF MR. JAYESH CHAKRAVARTHI (DIN: 08345495) AS AN INDEPENDENT DIRECTOR OF THE COMPANY	Special
2	TO APPROVE THE RE-APPOINTMENT OF MS. ARUNDHATI MECH (DIN: 09177619) AS AN INDEPENDENT DIRECTOR OF THE COMPANY	Special
3	TO APPROVE APPOINTMENT OF MR. JIMMY TATA (DIN: 06888364) AS A NON-EXECUTIVE DIRECTOR (NOMINEE OF HDFC BANK LIMITED) OF THE COMPANY	Ordinary

Pursuant to the MCA Circulars, the Company has sent the electronic copies of Notice of Postal Ballot ("Notice") along with the explanatory statement on Monday, October 26, 2026 to all the Members of the Company, who have registered their email address with the Depository Participant or Registrar and Share Transfer Agent of the Company i.e. MUFG Intime India Private Limited as on Friday, October 23, 2026 i.e. cut-off date.

The Notice of Postal Ballot is also made available on the following:

1) Website of the Company at https://www.hdbfs.com/investors/ under section 'Investor Services' / 'Postal Ballot'.
2) Website of Stock Exchanges where the Company's Equity shares are listed i.e. BSE Limited at www.bseindia.com and National Stock Exchange of India Limited at www.nseindia.com
3) Website of National Securities Depository Limited ("NSDL") at https://www.evoting.nsdl.com under section 'Notice Download'

Kindly note that in compliance with MCA circulars, the Company has sent the Postal Ballot Notice in electronic form only, instead of dispatching hard copy of the Notice along with the Postal Ballot Form.

Accordingly, Members can vote only through the remote e-voting process. Members whose names appear as per the records of the Depositories on Friday, October 23, 2026 (i.e. cut-off date) shall only be entitled to cast their vote(s) through remote e-voting and voting right shall be proportionate to their share of the paid-up equity share capital of the Company as on the cut-off date.

The Company has engaged the services of NSDL for providing remote e-voting facility to all its Members.

Some of the important details regarding the remote e-voting are provided below:

EVEN (E-Voting Event Number)	**143385**
Cut-off date for determining Members entitled to vote	**Friday, October 23, 2026**
Commencement of remote e-voting	**Wednesday, October 28, 2026 at 10:00 a.m. (IST)**
Closure of remote e-voting	**Thursday, November 26, 2026 at 5:00 p.m. (IST)**

During this period, the Members of the Company may cast their vote electronically and once the vote on a resolution is cast by the Member, such Member shall not be allowed to change it subsequently.

Members who have not registered their email address are requested to register their email address with respective depository participants. The link for updating email address and mobile number electronically on a temporary basis is available on the website of MUFG Intime India Private Limited https://web.in.mpms.mufg.com/emailreg/email_register.html. The instructions on the process of remote e-voting are provided in the Notice.

Mr. Mitesh Shah (FCS No.: 10070), of M/s. Mitesh J. Shah & Associates, Practicing Company Secretaries, has been appointed as the Scrutinizer for conducting the Postal Ballot in a fair and transparent manner.

In case of any queries relating to remote e-voting, you may refer to the FAQs for Shareholders and e-voting user manual for Shareholders available at the download section of https://www.evoting.nsdl.com or call on toll free no.: 022 - 4886 7000 or send a request at evoting@nsdl.com.You may also send an email to the Company at investorcommunications@hdbfs.com for queries/information.

The result of the Postal Ballot along with Scrutinizer's Report will be displayed through Notice Board at the registered office of the Company, on the Company's website at www.hdbfs.com, on the website of NSDL at www.evoting.nsdl.com and shall also be communicated to the Stock Exchanges where the equity shares of the Company are listed i.e. BSE Limited at www.bseindia.com and National Stock Exchange of India Limited at www.nseindia.com within two (2) working days from the date of conclusion of e-voting period.

NOTICE TO SHAREHOLDERS

(1) Notice is hereby given that the **Extra Ordinary General Meeting (EGM)** of the Company is scheduled to be held at **12:00 Noon** on **Tuesday, the November 17, 2026** through Video Conferencing / Other Audio Visual Means (VC/OAVM), in compliance with the General Circular No.09/2023 dated 25.09.2023 read with Circular No.20/2020 dated 05.05.2020 issued by Ministry of Corporate Affairs (MCA) and Circular No.SEBI/HO/CFD/CFD-PoD-2/P/CIR/2023/ 167 dated 07.10.2023 read with Master Circular No.SEBI/HO/CFD/PoD2/CIR/P/2023/120 dated 11.07.2023 issued by SEBI (hereinafter collectively referred to as 'Circulars') and also applicable provisions of the Companies Act, 2013 and the Rules made thereunder.

(2) In compliance with the above Circulars, electronic copies of the Notice of the EGM have been sent to all the Members on October 26, 2026 whose e-Mail IDs are registered with the Company / Registrar and Transfer Agent (RTA), M/s Cameo corporate services limited / Depository Participant(s) (DP).
However, members can also download the EGM Notice from the Company's website www.khazanchi.co.in and the website of Stock Exchanges at www.bseindia.com.

(3) The Members whose e-Mail addresses are not registered with the RTA / DP are required to follow the procedure laid down in the Notice of the EGM, in order to receive the Notice of the EGM.

(4) The Members holding shares as on the cut-off date (i.e.) **November 11, 2026,** may cast their vote electronically on the businesses as set out in the Notice of the EGM through electronic voting system of Central Depository Services (India) Limited (CDSL) either through remote e-Voting or e-Voting during the EGM.

(5) The Board of Directors have appointed M/s. A K Jain & Associates, Practising Company Secretaries, represented by Mr. Balu Sridhar as the Scrutinizer for conducting both the remote e-Voting and e-Voting during the EGM in a fair and transparent manner.

(6) The Members are hereby informed that:
- (i) The businesses as set out in the Notice of the EGM may be transacted through remote e-Voting or e-Voting during the EGM.
- (ii) The remote e-Voting shall commence at 9.00 a.m., on **Saturday, November 14, 2026.**
- (iii) The remote e-Voting shall end at 5.00 p.m., on **Monday, November 16, 2026**.
- (iv) The remote e-Voting module will be disabled after 5.00 p.m., on November 16, 2026.
- (v) The cut-off date for determining the eligibility to vote either through remote e-Voting or by e-Voting during the EGM is **November 11, 2026.**
- (vi) The Members may note that:
  - (a) The remote e-Voting module shall be disabled after 5.00 p.m., on November 16, 2026 and once the votes on the resolution is cast by the Member, the Member shall not be allowed to change it subsequently.
  - (b) The facility for voting will also be available during the EGM and those Members present in the EGM through VC / OAVM facility, who have not cast their vote on the resolutions through remote e-Voting and are otherwise not barred from doing so, shall be eligible to vote through the e-Voting during the EGM.
  - (c) The Members who have cast their votes by remote e-Voting prior to the EGM may also attend the EGM but shall not be entitled to cast their votes again; and
  - (d) A person whose name is recorded in the Register of Members or in the Register of Beneficial Owners maintained by the Depositories as on the cut-off date shall be entitled to avail the facility of remote e-Voting or e-Voting during the EGM.

(vii) The manner of voting remotely for Members holding shares in dematerialized mode and for Members who have not registered their e-Mail addresses is provided in the Notice of the EGM which is also available on the website of the Company www.khazanchi.co.in

(viii) For any queries or issues regarding attending EGM and e-Voting from the e-Voting System, you may refer the Frequently Asked Questions (FAQs) and e-Voting manual available at www.evotingindia.com under Help Section or write an e-Mail to helpdesk.evoting@cdslindia.com or contact Mr Rakesh Delvi (022 – 23058542) of CDSL or or call toll free no.1800 21 09911.

The above information is being issued for the information and benefit of all the Members of| the Company and is in compliance with MCA Circulars and SEBI Circulars.

A trial by fire

With thousands of youth set to complete their military training soon, the Agnipath policy's success now hinges on clarity and acceptance

PHOTO: REUTERS

Newly inducted Agniveer soldiers take part in a parade at a military garrison in Srinagar in December 2025

SATARUPA BHATTACHARJYA & MARTAND MISHRA
New Delhi, 26 October

On May 9 last year, Mood Muralinaik, an Agniveer cadet with the 851 Light Regiment, an artillery unit, died in action near the border, aged 24. A native of rural Andhra Pradesh, he was part of the Indian Army's deployment of thousands of soldiers during the India-Pakistan conflict. Among them, 3,000 were Agniveer (fire-warrior) cadets.

The cadets were recruited in late 2022 through the central government's Agnipath policy, the first such initiative outside the armed forces' regular employment channels.

At the time of Operation Sindoor, the cadets in army units helped operate an air defence system, handled weapons and military communication devices, and drove missile- and gun-mounted vehicles. Agniveer Vayu (air) cadets helped operate the Indian Air Force's missile systems that were extensively used. The Indian Navy, which had a carrier battle group on standby in the Arabian Sea, had Agniveer sailors aboard.

All these cadets came from Agnipath, a unique experiment that could benefit the country but whose success hinges on both government clarity and acceptance by the armed forces, neither of which exists in full measure, interviews with defence and government sources, Agniveer cadets, and military and paramilitary veterans show.

The start was stormy. Four years ago, Bihar was the epicentre of protests after the policy was announced. Some of the fears — short-term military recruitment potentially replacing permanent jobs and pensions — remain today. The policy has been mired in controversy, including court cases over monetary compensation and political mudslinging.

Many interviewees spoke on the condition of anonymity, owing to the sensitivity of the subject. The Indian Army had not responded to questions by press time.

After the cabinet approval in June 2022, a Ministry of Defence statement described the policy as a "transformative reform" that would make India's armed forces more youthful and technology-savvy. Each year since then, batches between the ages 17.5 and 21 have enrolled into the three services for four-year tenures.

A regular entry into the armed forces (soldier and common officer) covers the 17.5-25 age range.

The first batch of some 46,000 Agniveer cadets is set to complete its four-year service in the coming months, starting later this year. The army, the navy and the air force will release their merit and the exit lists soon. Only 25 per cent will remain, as mandated by the policy. The rest will be let go with a tax-exempted final settlement of ₹11.71 lakh for each cadet.

This is also where the defence ministry's role largely ends.

In July, the Ministry of Home Affairs announced a 50 per cent reservation for exiting cadets in two entry-level posts in a paramilitary unit and the Central armed police forces (CAPFs). State governments could also absorb them in local law enforcement but such decisions are voluntary.

Of the first batch, 40,000 cadets are in the army, and about 3,000 each in the navy and the air force. The army will retain almost 10,000, and the navy and the air force about 750 each. In theory, about 34,500 cadets, who will leave the services soon, can join the paramilitary, police, public and private defence companies, and other workplaces.

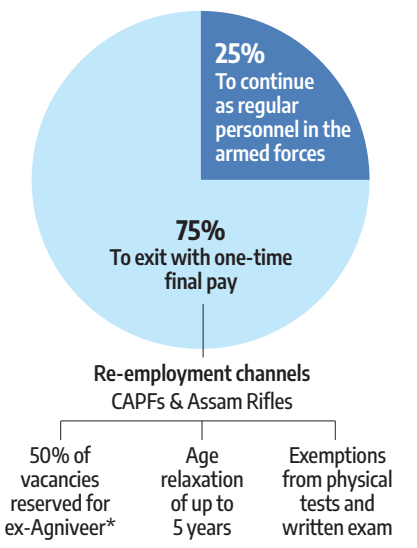
But potential hirers face a question: How to use the skillsets acquired in the armed forces in non-defence settings, including civilian work?

Some military veterans say the Central government should issue clear guidelines on Agniveer re-employment that states and enterprises can be urged to follow. But government sources say the policy "should evolve organically" from within the armed forces. That has not happened yet.

Fact box: Agniveer

- The programme was launched in 2022
- 4 years of service tenure
- The first batch comprises about 46,000 cadets
  Army: 40,000
  Navy: 3,000
  Air Force: 3,000
- About 11,500 cadets to get jobs in the services (25%)
- 15 years of minimum service after confirmation
- About 34,500 exiting cadets will get ₹11.71 lakh each
- 50% reservation of vacancies in the central armed police forces for former cadets
- 10-30% reservation also announced by several states for law enforcement jobs
- 175,000 cadet posts mentioned since 2022

Agnipath: What happens after four years?



Note: *50% of vacancies for constable/ rifleman/ riflewomen are reserved for ex-Agniveer. Operates within CAPF recruitment framework, which also follows existing caste-based reservations

Structural issues

Those selected as regular cadres in the armed forces would be required to serve at least 15 more years and be governed by the terms and conditions of service of junior commissioned officers or other ranks in the army and their equivalent in the navy and air force (but in non-combat roles in the air force). The selection is the exclusive jurisdiction of the armed forces.

Age criteria aside, induction is open to men and women with minimum schooling. A potential cadet must have completed grade 10 to apply for a general-duty soldier rank in the army. The policy expects the average age profile of the armed forces to come down by 4-5 years in the future.

The initial training of Agniveer cadets lasts for some months, followed by advanced training, depending on their aptitude and the requirements of the three services, military sources said. "They work like regulars for four years and undergo internal assessments before a merit list is drawn up," a source said.

Advanced training is essential in the navy and the air force because they have more technical roles, and make greater use of technology. The army has its own technical and technology-related training. So far, the Agniveer programme has been mostly useful in meeting the army's demand for more personnel.

"The focus of this policy is to optimise the army for employment," another source said. India has the world's second-largest standing army (1.4-1.5 million) after China (2 million).

Although the policy was announced by both civilian and military leaders, some of the interviews revealed that their views may not be fully aligned now. The fixed four-year service term and the 25 per cent retention rate – seen as too low – are areas where military planners seem to differ, even within the services.

The demands of the navy and air force are different from those of the army, often driven by the changing nature of warfare. The policy announcement itself was premised on the need to build a "tech-savvy armed forces".

The basic training period of Agniveer sailors, for instance, can last from four to six months. Although simulators are used during training, it takes time to understand the workings of naval ships, for which four years can be too short. And, if only 750 cadets are selected from 3,000, does the programme really benefit the navy? Or, the air force? Such questions have surfaced from inside the armed forces.

"What's the long-term impact on military professionalism?" Lieutenant General Deependra Singh Hooda (retired), former commander of the Indian Army's Northern Command, said, adding that the 25 per cent retention ceiling isn't pragmatic.

Hooda said so many cadets leaving the service each year could also affect the armed forces' ethos and work culture that are built on a strong sense of belonging.

The army's induction numbers are much higher than those of the other two services, but the exiting numbers are greater, too. Their resettlement might be tougher, sources said.

According to an estimate, of the almost 40,000 cadets in the army's first Agniveer batch, some 2,000 or fewer likely received full arms training. While the cadets in general develop an understanding of weapons, the so-called gunners are the ones with artillery training. Some are posted to border areas for patrolling; others have been trained in maintaining advanced military hardware, logistics, supplies and accounting; and yet others in support roles.

Inside the programme

Agniveer cadets literally wear the name tag at work. The rank is distinct from others in the Indian armed forces. Many join the programme right after school. Some come from poor families. A cadet could serve for 15 years if confirmed, but the first four years of the programme don't count for pension.

In the first year, Agniveer cadets earn a take-home salary of ₹21,000 per month, which, on paper, is not too far from the entry-level permanent cadre salary, with similar food, lodging, uniform and other expenses provided by the services. But, as the years go by, the cadre is much better placed financially than the Agniveer cadet. The cadets get 30 days of annual leave, the cadre can get up to 90 days.

An Agniveer army cadet, who joined the programme in 2012 and is posted near the western border, said his working hours are long. He supports his family financially, which means having to save as much as possible from his salary.

The policy gives risk and hardship allowances to the cadets.

Since the start of the programme, at least 24 cadet deaths, owing to different factors, including by alleged suicide, have been reported in the media. No cumulative number has been officially released.

According to official guidelines, for deaths on duty during combat or a terrorist attack or attributable to accidents, even during training, the government pays out a non-contributory insurance amount of ₹48 lakh, an ex gratia payment of ₹44 lakh, and full pay for the unserved period (of up to four years).

The cadet said he signed up knowing life in the military would be tough, but he had hoped the government would address concerns such as the retention rate. With no official word on this, and as the four years draw to a close, he and others from the first batch have started to think about the road ahead.

"As everyone knows, only 25 per cent can be retained, so naturally there is a sense of competition among us," he said. "We want to stay but we are also aware that most of our batchmates will eventually have to leave. I don't know for certain what work I will do if I am not retained."

An Agniveer sailor, who joined the programme in 2023 and has served on a naval ship in the Arabian Sea, said he received an initial training on INS Chilka, the Indian Navy's training platform for new sailors and cadets. After that, he undertook advanced training before his deployment.

"I have not made up my mind about whether I will continue," he said, but added that parts of his experience were memorable.

An Agniveer Vayu cadet, from the 2022 batch, who is serving in the western region, said the differences in income and benefits matter. "We are entitled to only 30 days of leave. Normal soldiers go on leave for an average 60 to 90 days. When you notice that difference while doing similar work, it does affect you."

The cadet said even though he lives in service accommodation, and gets food and clothing, the occasional weekend outings or hometown trips can cost him almost his full salary. "Compared to the risks and the working hours, it's peanuts," he said of his take-home salary, which is ₹28,000 in the fourth year of the programme. The salary rises incrementally each year for four years.

Former Agniveer cadets are not covered by the contributory health programme for veterans or the defence ministry's welfare retail network that provides consumer goods at concessional, tax-exempted rates. They do not qualify for veteran status.

In general, military personnel below an officer rank do not qualify for lifelong pension unless they have served at least 15 years and commissioned officers at least 20 years.

Major General Ranjan Mahajan (retired) has written in think-tank paper that "fierce competition for the 25 per cent retention pool" might not sit easy with the armed forces' team spirit. Another issue is assessment. Agniveer cadets, because of the 25 per cent cut-off mandate, are evaluated frequently through their four-year tenure, adding to the administrative workload of field commanders. The permanent soldier cadre is assessed annually and through periodic proficiency tests.

The systemic differences could lead to an Agniveer's sense of alienation, a military source said.

'Reorientation'

By the end of the year, more than 32,250 cadets will face a question at the heart of the programme: What happens to those who exit?

The home ministry's 50 per cent reservation of vacancies are for the post of general-duty constable or rifleman/riflewoman in the CAPFs and the Assam Rifles paramilitary force, respectively. Both are basic ranks with ground-based responsibilities that include public security, border patrol, counterinsurgency, law enforcement and VIP protection.

Apart from a relaxation in the age limit, former cadets selected for this position need not take the written exam and two physical tests — concessions that would make it easier for them to get a job. But conversely, they might feel, or be seen as, overqualified after spending four years in the military.

A reservation of vacancies will not automatically translate to 50 per cent jobs. That will rely on actual openings and reservations. For instance, while the armed forces follow an "all-India, all-class" approach when enrolling Agniveer cadets, the CAPFs and Assam Rifles will have to comply with the caste-based reservation system.

Former Agniveer cadets joining the CAPFs "would come from an organisation that has a much bigger role and a much more important role, and they might find it difficult to adjust", S K Sood, former additional director general, Border Security Force (BSF), said.

"My only fear is that once you are trained in a particular set-up, you are like a tree which cannot be replanted elsewhere," Sanjeev Raina, former additional director general, Indo-Tibetian Border Police (ITBP), said of organisational allegiances.

The BSF and the ITBP are part of the CAPF.

Several states have announced job reservations of 10-30 per cent for exiting Agniveer cadets in local police forces. The Maharashtra government has formed a study group for Agniveer re-employment. The state sent 2,839 cadets in the first batch.

A senior police officer in Madhya Pradesh said military veterans have successfully worked with the state police in the past. Training on civil and criminal law will be needed.

Captain Sarabjeet Singh Parmar (retired), a former naval officer, agreed military training cannot simply be transferred to law enforcement: "A degree of reorientation is required."

Parmar said the coming months would be "a litmus test" for the Central and the state governments: "How to absorb them?"

However, some veterans said an Agniveer cadet will be already skilled to work elsewhere. "This is not a military issue; the states should not have a decision dilemma" about employing them.

In March, a report of the parliamentary standing committee on defence said India faces security challenges that are "diverse and intricate". The army has designated 2022-32 as its decade of transformation. The committee said the army's personnel shortage would be met progressively through the Agniveer programme until optimised. Over the past four years, the Central government has capped the number of such posts at 175,000.

Hooda said recruiting from within might help to tackle the shortage. The initial exits will occur when the army is already trying to balance pandemic-era recruitment gaps with growing personnel demand.

Parmar said the Agnipath policy will not address the personnel shortfall because "you are going to lose them every four years". Potential cadets would feel discouraged, he said, if suitable jobs are not available even after four years of military training.

Many veterans say that for the policy to truly benefit the armed forces, a larger percentage of cadets should be retained. "That to me is the one fundamental thing the government needs to do," Hooda said.

Although the 2022 announcement did not mention any economic goals of the policy, analysts have previously said the Agniveer programme might help reduce defence pensions in the future. The ministry's allocation for defence pensions is ₹1.71 trillion in the current (2026–27) financial year.

But the economic argument cannot be heard in isolation. The anticipated long-term savings for the defence ministry would have to be measured against both increased short-term expenditure on the programme's recruitment and training cycles and the armed forces' ongoing modernisation.

All such concerns question the sustainability of the programme in its present form. Its future will be influenced by how the first batch does, inside — and mostly outside — the armed forces.

‘Looking at if we can have YONO Bharat’

Q&A State Bank of India (SBI) is working with National Payments Corporation of India (NPCI), merchants, and merchant acquirers to work out a model where the cost of the merchant discount rate is not passed on to the customer, **C S Setty**, chairman of the bank, said in a fireside chat at the *Business Standard* BFSI Summit 2026 on Monday. Setty also said that inflows under Foreign Currency Non-Resident (Bank), or FCNR(B) would ensure, at least for a couple of quarters, that there was no great competition for deposits. Edited excerpts:

PHOTOS: KAMLESH PEDNEKAR

Where do you want to see SBI in the next three to five years?

■ As far as what SBI has set out to do, it is an extension of years of our engagement with the Indian economy. I believe what SBI plans to do as an institution is no different from what India wants to do on the macro side. As the popularly known proxy for the Indian economy, I think SBI has a greater role to play. I keep telling my teams that we have a greater responsibility to play this role because almost one-fourth of household savings and the country’s savings are mobilised by SBI. If you expand that universe from banking to overall financial services, whether insurance, mutual funds or pension funds, our footprint is further enhanced in the overall financial ecosystem. So, while scale is an integral part of India’s growth story, that is also reflected in what SBI is doing. SBI came into existence in 1955, and we will reach 75 years of our journey in 2030. That also gives us a road map of almost four to five years. We started last year. We have enhanced that strategy and road map to “Road to 75”, what we call “Vision 2030”. We would like to play an important role in various areas of value creation in the country, whether micro, small and medium enterprises, corporate lending or housing loans. All of them create value in their own sense, and we would like to be part of that.

The interest-rate trajectory has changed. Do you think rising rates will impact credit growth, which has been robust this financial year so far?

■ Interest rates will influence competition as well as the amount of credit demand, though not necessarily immediately. They will have an impact as we go forward. If there is one more rate increase in December, the rate-sensitive sectors, particularly borrowing related to discretionary spending, will probably be moderated. I think we need to distinguish that. One important thing to recognise is that we are entering the rate-increase cycle with a robust growth rate. We have a rate increase as well as a prediction of 7.1 per cent growth. There will be sustained growth coming from the real economy’s demand for credit. So, as I mentioned, demand, especially financial demand, will probably be moderated if the rate goes up. But I don’t think the overall environment will see any less demand for credit.

Banks are facing challenges in mobilising deposits. Do you think this rate cycle will help attract more deposits, particularly when the stock markets are not doing that great?

■ At this stage last year, I said there was a structural shift in household savings. There could be some movement because of market sentiment. But we are seeing that, without realising what asset allocation means, most individuals and households are allocating their money to their savings. So, part of that would be this. Deposits will continue to be an important part of this allocation.

But on deposit mobilisation for banks, again, this is a repetition of what I have been saying: There is only so much that rates can do to propel deposits. What is important is the quality of service and the value proposition you offer customers in terms of maintaining the account. What we have also seen, fundamentally, is that the shift is not only happening from deposits to other active instruments. Within the bank too, there is competition. Moving from a savings account to a fixed deposit is so easy. These factors are also adding to the structural competition for deposits. But adequate liquidity from the Reserve Bank of India (RBI) has been supportive, and FCNR(B) flows, at least for a couple of quarters, will ensure that there is no great competition for deposits.

Where do you see the terminal rate in this cycle of rates going up?

■ The bank’s view is that we may have a 50 basis-point increase in December and then there is a pause before March 31. For this financial year we are expecting an increase of 50 basis points.

Is deploying FCNR(B) deposits going to be a challenge?

■ For FCNR(B), I don’t think it is a major issue because $10 billion works out to less than ₹1 trillion in a ₹60 trillion universe, which is what we have. It is providing short-term liquidity, but I don’t think there is a deployment issue. Even for the system, I believe that combined with robust demand and the RBI’s liquidity-absorption measures, we should not really worry about it. God will bless me that there will be a recovery in December. I don’t think we need to worry about that part. My view is that this kind of liquidity can be absorbed in two to three quarters, as I mentioned. Initially, as has happened, the RBI will do most of the absorption, and the RBI probably may be fine with it.

>
> “SBI WAS ONE OF THE FIRST FEW BANKS TO ADOPT AI IN A BIG WAY, IN THE CONVENTIONAL SENSE. OBVIOUSLY, WHEN WE TALK ABOUT AI NOW, WE TALK ABOUT GEN AI AND AGENTIC AI”
>
> C S SETTY, chairman, State Bank of India

Whenever the rate-cycle changes, there are concerns about asset quality because the borrower’s investment capacity is impacted. We are in the regime of external benchmark-linked rates (EBLR). This is the second rate cycle under the EBLR regime. Rates were pretty low. To what extent are higher interest rates a concern for banks in India?

■ I don’t think there will be system-level concerns, but there would be concerns for individuals and households, given the higher leverage now. I don’t know how much they can take absorption from the high interest rates. But broadly, from a system-level perspective, I don’t think we should be worried about asset quality on the retail front.

FIRESIDE CHAT

What is your take on the merchant discount rate (MDR) on Unified Payments Interface (UPI)?

■ UPI has transformed the way payment systems operate in India. It is a global success story in terms of the payment maturity that India has achieved. But it is also good for people to understand that we need a lot of investment to manage these systems. For instance, volumes are going up tremendously, and it is not merely about managing volumes; it is also about managing the risks associated with these transactions. Just to give you a picture, I must have mentioned earlier that SBI alone handles almost 400 million financial and non-financial transactions a day under UPI. In most of these transactions, above the threshold of ₹5,000, we carry out real-time monitoring. This means that we need to invest in proactive risk management. We also need to provide the computing capacity to handle this level of transactions. All of that requires investment.

Banks like SBI would never hesitate to invest to support their customer journeys. But, as a system, unless we provide some support, the economic value of this activity and the investment itself may be affected. This is where I think the MDR discussion is coming from. As has been widely mentioned, 98 per cent of transactions do not come under the MDR framework. Business-to-business transactions, which are predominant, are also exempted. In quite a lot of the scenarios we have run, we have seen that end users are not impacted as much as predicted. But the minimal MDR being discussed will be useful to the system.

Is there a way banks can ensure that merchants are not hostile to customers?

■ We need to work out the system, and need to look at the service-level agreement from merchants. We need to strengthen grievance redress in case merchants are trying to pass it (MDR) on. And we need to build systems to recognise what kind of granular external monitoring is needed. We are working with NPCI, merchants and merchant acquirers to build the ecosystem, to work out a model where it is not passed on to the customer, to the extent that it is technically feasible to monitor.

So you are in talks with banks, NPCI and other stakeholders too?

■ The Indian Banks’ Association too is working on that.

In this context, the revamped YONO app was launched. Can you tell us about the progress?

■ Digitisation is a prerequisite in India when you are handling this kind of service. We take private data from 530 million customers in India. The customer-acquisition engine at SBI is robust. We acquire about 75,000 customers every day. As you are aware, on deposits, we don’t charge our customers anything, such as minimum balance charges. Most of our journey started with zero balance. We want people to come and open accounts across the country. We have 23,000 physical outlets and about 160,000 digital touchpoints in the country. As your scale grows, how do you reduce or almost minimise the cost to serve? If you don’t do that, services either become inefficient or some cost falls on someone. So I believe a digital application is instrumental in reducing the cost to serve and reaching as many people as possible at a lower cost.

Just to give you an example, a visit to a branch for customer service costs about ₹40-50. On the digital platform, it is less than ₹1 even if you include capital expenditure. To serve that customer base, we would like to ensure that the number of registered users increases. We have 110 million registered users. I think having 200 million customers is immediately feasible. But beyond that, how do you make the app more inclusive? We are considering this too. For example, we do not make it available on certain categories of devices where the security features are not adequate, and feature phones do not have YONO. We are looking at whether we can have a variant called YONO Bharat, which we will focus on.

Of our 530 million customers, we have 173 million-180 million who are familiar with UPI apps. We would like to bring them on to a smaller, easy-to-use version that is device-neutral to reach all of them. I believe that, on the road map I mentioned, if we can introduce YONO Bharat, we can bring 300 million customers on board by 2030. This is something we would like to do to ensure that the mobile application does not strictly remain a mobile application. It becomes an empowerment.

YONO Bharat is the latest offer from SBI we should look forward to. Do you have a timeline?

■ We are working on various things: How device neutrality can be achieved and what simple and intuitive services we can provide to customers. Maybe six to 12 months is what we are looking at.

Speaking of technology, how do you plan to harness artificial intelligence (AI) for credit assessment and risk management? What is SBI’s strategy on AI?

■ SBI was one of the first few banks to adopt AI in a big way, in the conventional sense. Obviously, when we talk about AI now, we talk about Gen AI and agentic AI. In the previous versions of AI, we were among the biggest adopters. You are familiar with our three approaches. Purely based on AI models, we built almost 100,000 portfolios based on AI models and MS-related.

But when we talk about new-generation AI, Gen AI and agentic AI, we want to approach it in a calculated manner. I don’t think it should be a set of use cases. The approach to AI adoption should move away from experimenting with a bunch of use cases. How will you build the AI stack at enterprise level? I mention this because the enterprise AI stack is extremely important. It brings together governance, risk management, model efficacy and the constant monitoring of models. All of these are integrated into the AI stack. We are working on that. We have had some successes. For example, we now use Gen AI extensively for internal knowledge management. We are also moving to Gen AI for cheque clearing. We used to have 17 cheque-clearing centres; we are reducing that to four. We will be forming a national cheque-clearing centre run purely by Gen AI. This is improving efficiency and allowing the workforce to be redeployed where it is needed.

There is another element I would like to mention. When we talk about AI adoption, particularly in institutions with more than 100 years’ history, where processes have evolved over time, we need to re-engineer processes before deploying AI. Otherwise, AI becomes inefficient.

SBI has been a leading employer for the past couple of years, and there was concern that AI may affect manpower. Your views?

■ We have seen some impact on work. But nobody has seen the phenomenon of AI having an impact on the workforce. There are certain segments of work that will definitely move to AI. In financial services, given the volumes we handle, it is all about redeploying the humans as required and moving people out of jobs where they are no longer needed.

Universal banking is the goal, say SFB CEOs

KAIRAVI LUKKA
Mumbai, 26 October

Small-finance banks (SFBs) have made significant strides in bringing underserved customers into the formal financial system, but the scale of unmet credit demand means their financial inclusion mandate remains far from complete, according to Baskar Babu Ramachandran, managing director (MD) and chief executive officer (CEO) of Suryoday Small Finance Bank, and P N Vasudevan, MD and CEO of Equitas Small Finance Bank.

Speaking at a panel discussion at the *Business Standard* BFSI Summit on Monday on the topic “Mandate Fulfilled. Universal Bank Next?” they said that while SFBs had expanded access to credit and savings products, becoming universal banks represented a natural next step for the sector.

Vasudevan said unmet credit demand among informal and semi-formal borrowers in India was estimated at around ₹85 trillion, equivalent to one-third of the country’s banking credit.

“If you ask me whether SFBs have delivered the mandate at a universal or at a national level, the answer is obviously ‘no’. The size of the problem is just too huge. It’s impossibly huge,” he said.

Vasudevan said that if the country’s 11 SFBs continued to expand at a compound annual growth rate (CAGR) of 15 per cent, and unmet credit demand did not rise with inflation, it would take them 65 years to meet the entire demand.

However, the banks have made a meaningful contribution at an individual level, he said. While SFBs account for around 1.5 per cent of bank credit, they contribute almost 10 per cent of the banking industry’s client base, reflecting their progress on the financial inclusion mandate.

Ramachandran said financial inclusion needed to be viewed beyond credit, with greater attention paid to the gap on the savings side of the household balance sheet.

“As a microfinance institution you cater only to the small credit side and the rest has to be handed over to banks. That missing middle asset is famously called everywhere ‘a pipe’,” he said.

He said SFBs had expanded to offer products such as small-ticket and affordable home loans and vehicle loans, with many having grown at least fivefold in the last 10 years. The next step, he said, was to help customers move from being small-ticket borrowers to managing their household finances more holistically.

“Every Indian today probably has an operative savings account, which was a huge challenge before we became an SFB. Today that challenge does not really exist, 99.9 per cent have an operative savings account,” Ramachandran said.

The push towards universal banking is also driven by the limitations associated with the SFB tag, he said. The designation can influence how depositors perceive a bank.

“The tag ‘small finance’ makes us look risky, and sometimes we also start feeling risky. This puts in a weight in terms of cost of deposits, with everybody asking the question ‘small finance bank means what’.” Ramachandran said. “That’s one of the reasons why some of us SFBs want to move quickly to drop the tag of ‘small finance’.”

Vasudevan described the transition to universal banking as a natural progression for SFBs because their regulatory responsibilities were already broadly similar to those of universal banks, with relatively few corresponding advantages.

He said that the real benefit of an SFB was that the probability of getting the licence might be much more than that for applying directly for the licence to start a universal bank.

“If you ask me whether we aspire to be a universal bank, then the answer is a clear ‘yes’, because that is the natural maturity model for us,” he said.

'This credit-growth cycle is very different'

Q&A The Indian banking sector has growth potential despite its challenges, says Axis Bank Managing Director and Chief Executive Officer (MD & CEO) **Amitabh Chaudhry** in a conversation with **Manojit Saha** at the *Business Standard* BFSI Insight Summit. Chaudhry talks about the need to manage risks, boost the deposit base and enhance profitability while navigating tighter liquidity and rising interest rates. Edited excerpts:

PHOTOS: KAMLESH PEDNEKAR

Axis Bank has seen good progress including strategic, accelerated digital transformation and a landmark acquisition. What next?

■ I have to first admit that it is very easy to get caught up in the narrative and say, Oh, we have done a great job. Yes I think we moved the needle but, still, that macro objective of being able to catch up with some of the larger institutions has not happened. I see my job and the opportunity ahead as what more we can do rather than what we have done.

What about merger and acquisitions?

■ If the right opportunity comes along, either for us or for our subsidiaries, we will definitely consider it. We have looked at opportunities in the past. One acquisition that made sense was Citi; since then, nothing else has made sense.

What are some of the gaps that you want to address?

■ The core of any banking franchise is its deposit base, which represents a particular set of customers. When we compare our deposit franchise with the best in the banking system, we still have some distance to cover.

I am not saying that our deposit franchise is bad. Around 65 million customers have banked with us in some form. However, we need to improve the quality and granularity of our franchise, make it more premium, and increase our share in the corporate salary segment.

Our first priority is to strengthen the deposit franchise. That means working harder to increase our presence, connect more deeply with customers, improve the bank's proposition, and attract more premium and wealthier customers. We have launched initiatives such as Burgundy Private Wealth, which has done very well. We can still do more with the Citi acquisition that was also part of the premiumisation of our franchise.

Second, we need to ensure that our relationship with each customer extends across all the products and services that Axis Bank and its subsidiaries can offer. We call this approach One Axis. Our subsidiaries have a range of products, and we can do more to deepen customer relationships.

Third, when we look at our return on assets (ROA), return on equity (ROE), net interest margins (NIMs), and the cost of acquiring customers or delivering our franchise, there is still work to do. Our RoA may be lower, and our costs higher, than those of some peers.

We have moved from easy liquidity and lower rates to a very different environment. How difficult will the next few quarters be?

■ There is never a dull day in India, and the same applies to banking. Every day is a new day. After the FCNR(B) scheme, approximately $133 billion came into the system. Many of us thought that this liquidity would remain available for at least a couple of quarters. However, the RBI was concerned about excess liquidity and has withdrawn some of it.

There is also an expectation that interest-rate hikes could come sooner rather than later. The market has already started reacting, and incremental interest rates have risen. City rates have increased, and corporates are demanding higher rates on non-retail term deposits.

As liquidity has been withdrawn, incremental deposit rates have already increased. Economists and we believe that interest-rate hikes are needed because inflation is rising. As (Kotak Mahindra Bank founder and non-executive director) Uday Kotak also mentioned, the gap between US and Indian interest rates is at a historical low, and something needs to be done about it.

We also face risks from developments in West Asia, including supply disruptions and price pressures. Another phase of the war could be approaching.

These are interesting times. Interest-rate hikes will be passed on within the framework permitted by the RBI. However, this could push some customers to the edge and reduce demand. Banks must be very careful about where they lend. Some NBFCs have recently indicated that they are reducing lending.

At the same time, we must remain mindful of risks. In the last 30 days, there have been many public reports of cyberattacks in which customers' or banks' money has been taken. This is another risk emerging rapidly in the system.

The last time we saw this kind of credit growth was after the global financial crisis and we are again seeing growth close to 20 per cent. Is the Indian banking system better placed this time?

■ I would answer this in two parts. First, is credit growth sustainable? Second, is the banking system well-placed to manage a problem if one arises? As far as credit growth is concerned, I do expect slightly lower growth in the second half as the base effect from the first half fades. However, several factors could keep growth high.

> "AS LIQUIDITY HAS BEEN WITHDRAWN, INCREMENTAL DEPOSIT RATES HAVE ALREADY INCREASED. WE BELIEVE THAT INTEREST-RATE HIKES ARE NEEDED BECAUSE INFLATION IS RISING"
>
> "THESE ARE INTERESTING TIMES. INTEREST-RATE HIKES WILL BE PASSED ON WITHIN THE RBI FRAMEWORK. HOWEVER, THIS COULD PUSH SOME CUSTOMERS TO THE EDGE AND REDUCE DEMAND"
>
> AMITABH CHAUDHRY, MD & CEO, Axis Bank

FIRESIDE CHAT

First, global developments and the movement in the rupee have lengthened working-capital cycles. Firms are paying more to buy the same goods, receivables are increasing, and businesses are holding more inventory because of supply risks. As a result, working-capital needs have increased.

Second, RBI data suggests that if all project-finance and term-loan sanctions made in FY26 were implemented, they alone could lead to around 19 per cent growth in term loans. Not all of these sanctions will necessarily be implemented, and I am not including 2026-27 data. If you listen to what NABFID has said, it also has a large pipeline. Investment activity appears to be moving in the right direction, so demand for term loans could increase rather than decline. **Third, large parts of India remain unbanked. As more data becomes available, banks will be able to underwrite more customers, which should continue to support growth.**

NBFCs are growing at a rapid rate — 37 per cent year-on-year. Some of the top-tier NBFCs have the ability to raise funds, and they have not indicated that their growth rates will come down. They continue to guide towards decent growth, so NBFCs are also supporting the system.

The government continues to invest in infrastructure, which requires financing and supports the broader economy. GDP growth forecasts for India have also been revised upward slightly. These factors should support credit growth, although overall growth could moderate.

Rising interest rates may also have a tempering effect. There are four or five key differences between the current period and the earlier cycle.

First, earlier growth was driven heavily by lending to greenfield infrastructure projects, where risks were not always adequately covered. Today's growth is much more broad-based. Second, banks are better capitalised. There is roughly a 500-basis point difference between capital levels then and now.

Third, provision coverage ratios were around 40-45 per cent at that time. Today, most banks have coverage of around 70-75 per cent.

Fourth, underwriting has improved. We have much more data and greater information-sharing. Frameworks have been created so that problems cannot be hidden as they could in the past. Banks cannot avoid recognising emerging problems. Information is available quickly and more universally, so when a problem arises, it must be recognised promptly.

The ECL (expected credit loss) norms coming in April will push the banking system further in that direction.

In my view, the system is very different today. Banks have a much greater ability to absorb problems and have stronger credit-risk frameworks and more information for underwriting.

We did go through a brief credit cycle over the last couple of years, especially on the retail side. Banks absorbed it without too much difficulty. Profits declined, but no bank was in trouble. One or two NBFCs faced difficulties, but the broader system remained intact.

Overall, this credit-growth cycle is very different from the past.

Talent shortages and high attrition, particularly in branches, are frequently discussed. How does a bank address the talent challenge?

■ Our research suggests—and I am sure other banks and financial institutions see the same—that very few people are leaving the banking sector. Most attrition is of people moving to a bigger or similar job elsewhere within the large-bank ecosystem. Very few people say they no longer want to work in banking.

As more banks have emerged and expanded across the country, and as NBFCs have grown rapidly, they have all been looking for talent. When institutions expand into new regions, asset classes, or businesses, hiring people from elsewhere who understand that business is often the easiest way to do it.

Leadership succession planning — or the lack of it — is often cited as an issue in private-sector banks. Do you agree?

■ I do not think so. Every Board—and the regulator—expects and checks that succession planning is in place, at least up to a certain level in the organisation.

I am confident that every bank has a succession planning document that is actively maintained. Banks assess their talent and ask whether they have people internally who can replace leaders if they leave. If not, they consider what the alternative plan would be.

In recent years, many bank CEOs have been appointed from outside their institutions. You are also one example. What is your view?

■ It has happened in some cases, but there are also enough examples of CEOs being appointed from within the financial system. They may not necessarily come from the same institution.

Some changes have been driven by factors that were not planned for. In such situations, boards or the RBI may ask whether a sudden change requires a fresh face to lead the organisation or whether an internal candidate should continue.

Boards make those choices based on whether an internal or external candidate is better suited. I am not commenting on any specific situation, but such circumstances do arise.

Foreign investors have shown interest in Indian banks and NBFCs over the past year. Why is this the case?

■ Much of this interest is coming from West Asian and Japanese institutions. It is not that every country in the world is eager to invest in Indian banking. However, it clearly indicates that some parts of the world see significant opportunities in India. There are still institutions interested in India that may not yet have found the right opportunity. This is good for the Indian banking system because the capital strengthens the resources available to the ecosystem.

There are two points to make. First, investing in a bank provides equity and a strong partner. Equity is one thing; ultimately, banks need to generate deposits.

Generating deposits requires a franchise, work on the ground, and strong customer connections. Many of these institutions do not yet have a brand in India that will immediately attract deposits simply because they have entered the market. They will have to work hard to benefit from the equity and the partnerships they have secured.

Despite foreign investor interest, governance issues occasionally emerge. What is your view?

■ Ideally, we would like to reach a point where such incidents do not happen. I believe we have an extremely strong regulator that asks the right questions. In my experience, the regulator not only asks the right questions but also has a very good understanding of what is happening across the banking system.

Sometimes, however, certain practices do slip through. I believe the banking system is resilient enough to absorb these shocks. We have seen institutions suffer for a temporary period, recover quickly, change management teams, and begin moving towards recovery.

How do you view the proposal on insurance distribution norms?

■ Depending on the final regulations, we may sell different sets of products, focus on different customers, or decide not to sell certain products. If the remuneration does not compensate for the time spent selling the product and servicing the customer throughout its lifecycle, banking institutions may decide that the business does not make sense. I'm not saying that Irdai's approach is right or wrong. I am saying that institutions will make decisions based on where they can earn money and will act accordingly.

PAN, CKYC norms for lenders in 10-15 days: MFIN

ABHISHEK KUMAR & KAIRAVI LUKKA
Mumbai, 26 October

Microfinance industry body Microfinance Institutions Network (MFIN) will issue guidelines in the next 10-15 days for lenders to move towards using Permanent Account Number (PAN) and Central Know Your Customer (CKYC) records to identify borrowers.

MFIN is eyeing an aspirational target of completing the transition within one-and-a-half years.

The move aims to strengthen credit underwriting by helping lenders identify borrowers' exposure across microfinance and retail loans, Alok Misra, chief executive officer (CEO) of MFIN, said at the *Business Standard* BFSI Summit 2026 on Monday.

Misra was part of a panel discussion on 'Is diversification the way ahead?' alongside Ganesh Narayanan, managing director (MD) and CEO of CreditAccess Grameen, and Manoj Nambiar, MD of Arohan Financial Services.

"In 10-15 days, we will be coming out with the guidelines. We are taking an aspirational target that, along with voter ID, which is already there, the industry has to move towards PAN and CKYC within one-and-a-half years. That will make underwriting more robust because, in retail, 100 per cent of loans are seeded with PAN. So, you can find retail linkages also," Misra said.

He said some borrowers had multiple voter IDs, making it difficult for lenders to establish their identities and assess their total indebtedness. The Election Commission's website also lacks an application programming interface (API) through which lenders can link records directly. CKYC and the National Securities Depository Limited, by contrast, have APIs.

The proposed changes follow a period of stress in the sector, during which rapid lending growth exposed weaknesses in underwriting and collections. According to Nambiar, the industry's outstanding credit had expanded from around ₹2.5 trillion in March 2020 to ₹4.5 trillion within two years following the pandemic.

"The demand was so strong that a lot of institutions felt this was the right time to gain market share and grow. Unfortunately, while doing that, were they ready from a credit-underwriting perspective, whether ready from a collections and recovery perspective, essentially is what has caused the issue," Nambiar said.

MFIN subsequently prescribed minimum underwriting standards, including a maximum of three lenders per borrower, total indebtedness of no more than ₹2 lakh across microfinance institutions and restrictions on lending to borrowers who were 60 days or more delinquent.

Nambiar added that the industry had seen an improvement in collections since September last year following the implementation of these standards.

According to Narayanan, the recovery was also visible in business performance, with lenders filling some of the gap left by banks that had pulled back from the segment.

"As a company, we've had two very good strong quarters so far. We've seen a certain amount of pullback from banks, which are getting filled up by microfinance institutions (MFIs). Over the next few quarters, we should see how things evolve. But we've definitely seen the bottom of the crisis that happened in the last two financial years, and it's come up quite strongly now," Narayanan said.

Narayanan added that diversification was becoming important as borrowers' needs evolved. MFIs often help women with little or no credit history enter the formal credit system, but as their businesses grow, they seek individual loans and other products.

Nambiar said the RBI's 60:40 framework created greater room for microfinance institutions to develop secured-lending businesses, including loans against property, vehicle loans and gold loans, reducing their dependence on unsecured lending.

External risks remain. Narayanan said some stress had emerged in pockets of central Maharashtra, although the industry had not seen an impact elsewhere, including Karnataka.

The challenge for lenders will be to sustain the recovery while maintaining underwriting discipline and adapting to borrowers' changing credit needs.

"WE'VE SEEN PULLBACK FROM BANKS, WHICH IS GETTING FILLED BY MFIS. WE'VE SEEN THE BOTTOM OF THE CRISIS IN THE LAST TWO FINANCIAL YEARS, AND IT'S COME UP QUITE STRONGLY NOW"

GANESH NARAYANAN, MD & CEO, CreditAccess Grameen

"THE RBI'S 60:40 FRAMEWORK HAD CREATED GREATER ROOM FOR MFIS TO DEVELOP SECURED-LENDING BUSINESSES, REDUCING THEIR DEPENDENCE ON UNSECURED LENDING"

FCNR(B) bought India 3-5 years: Kotak

SUBRATA PANDA
Mumbai, 26 October

Veteran banker Uday Kotak on Monday cautioned that India must prepare for a repayment obligation of $160-170 billion over the next three to five years as foreign currency non-resident (bank), or FCNR(B), deposits mature. He said the inflows had bought the country time but had not eliminated its underlying macroeconomic (macro) challenges.

Describing the scheme as a "strong insurance policy" against global economic and geopolitical uncertainty, Kotak said the Reserve Bank of India (RBI) and the government had acted at the right time to bolster the country's foreign currency resources. However, policymakers, banks, and businesses must use the intervening period to prepare for the eventual repayment of the deposits and interest.

The RBI launched a special dollar-rupee swap facility on June 8 to attract foreign currency inflows, strengthen the country's external buffers, and support the balance of payments amid global uncertainty and pressure on the rupee. The facility reduced banks' currency hedging costs, making it more attractive for them to mobilise overseas deposits.

Banks mobilised $132.98 billion through FCNR(B) deposits under the facility by August 31, according to the RBI. Including overseas foreign currency borrowings and external commercial borrowings, total inflows under the broader facility reached $143.6 billion by September 18. The RBI closed the FCNR(B) window a month ahead of its original deadline following the strong response.

The deposits, which have tenures of three to five years, will eventually have to be repaid along with interest, creating a sizeable future foreign currency outflow. "We have bought ourselves three to five years with the FCNR(B). All policymakers and practitioners have to keep in mind... that the end date also comes. This will mature," said Kotak, founder and non-executive director of Kotak Mahindra Bank, at the *Business Standard* BFSI Insight Summit in Mumbai.

He said the repayment obligation could reach $160-170 billion, including interest, and called for a strategy to prepare for the outflows. "We don't need to panic today, but we must be strategic about how we build India's economic and financial structure for the time that will inevitably come," he said.

Kotak also commended the RBI for closing the FCNR(B) mobilisation window on August 31, saying India had locked in dollar funding before US bond yields rose sharply in early September. The five-year and 10-year US Treasury yields crossed 5 per cent after the window closed, he said. "India locked in foreign currency deposits relatively cheaply. Today, it would probably have cost us at least 100 basis points more," he said.

However, he flagged a disparity between returns on fully hedged US government bonds and Indian government securities. A 10-year US Treasury yield of around 5 per cent, combined with a currency hedge costing about 3.5 per cent annually, translated into a rupee return of 8.5 per cent, compared with around 7.4 per cent on India's 10-year government bond.

"The arbitrage favours foreign currency over domestic interest rates," he said, adding that the relative attractiveness of interest rates could influence financial flows.

Kotak called for a narrower gap between the tax treatment of interest income and capital gains, arguing that the difference was encouraging disproportionate investment in equity-oriented instruments while making deposits less attractive to larger savers. "Thirty-nine per cent versus 14-odd is a very wide gap," he said, referring to the tax rates faced by some larger investors on interest income and capital gains.

He welcomed the government's decision to make income of up to ₹12 lakh tax-free under the new tax regime, saying it would help smaller savers keep their money in bank deposits. However, he said the larger pool of savings needed more attractive interest-earning instruments. "The gap needs some reduction. It can never be zero, because equity risk is higher than debt risk. But 14 versus 39 is too wide, in my view," he said.

The tax differential, he argued, was contributing to a shift towards equity-oriented investments, even as foreign portfolio investors (FPIs) continued to sell Indian assets. Domestic investors were effectively providing an exit route for overseas investors, he said.

Kotak observed that India's price-to-earnings (P/E) ratio was the second-highest globally after that of the US, while Chinese P/E ratios were around half those of India. "I am not saying Indian markets are expensive, because India gives growth and stability," he said, adding that India had stronger growth prospects than some competing markets, including China.

However, he said Indian companies needed to grow faster in terms of revenue and earnings to sustain their valuations. He estimated that FPIs held around $700 billion in Indian assets, while the total stock of foreign investment, including foreign direct investment, stood at about $1.5 trillion.

"We need to think about our tax structures, interest rate structures, and capital gains structures, because we may get equity investors in rupees, but the foreign investor exits in dollars," he said.

Indian companies needed to invest in future-ready businesses and sectors, as well as in research, technology and innovation, to support stronger growth, he added.

Kotak also flagged gold imports as a source of pressure on India's external position, particularly at a time when foreign portfolio flows were under pressure.

He cited a current account deficit (CAD) of $26 billion for the year ended March, against gold imports of $72 billion. Excluding gold, India would have been in current account surplus, he said.

For the year ending March 2027, gold imports could rise to $90 billion, while CAD affected by oil imports, could widen to $60-65 billion, he said. "Even in this high-oil scenario, India would be in current account surplus but for gold," he said.

Kotak distinguished between households holding gold as a store of wealth and the financialisation of gold through investment products such as mutual funds and exchange-traded funds (ETFs).

"I do believe every Indian has a right to buy gold, particularly the Indian housewife, who is the backbone of India for her wealth and her protection," he said.

However, he cautioned against financialising gold at a time when India faced challenges on its capital and current accounts. He also questioned why financing against gold was easier than lending against shares.

Loans against shares, he said, were subject to a 50 per cent margin requirement and a ₹1 crore limit. Gold financing, by contrast, could cover 75-80 per cent of the collateral value, with no comparable limits.

"All I am saying is that we have made the financialisation of gold so significant that it has become a financial instrument rather than an instrument of household savings," he said.

Continued gold imports, combined with pressure on portfolio flows, could put the rupee under strain, he said. Kotak argued that the exchange rate should increasingly be determined by market forces rather than by the perception that policymakers were trying to keep it below a particular level.

"Then we give global financial players a very easy game of chicken. We should be careful about that," he said.

Asked what could complement the temporary support from FCNR(B) deposits, Kotak said India needed to strengthen its fundamentals and invest in areas that would be important to the global economy. "In these three to five years, we need to focus on what the world wants from India. We must have our economic negotiating leverage," he said.

He cited international interest in India's refining capacity as an example of how the country could strengthen its strategic position. India needed to become a country the world depended on for critical goods and services, rather than merely a market for global businesses, he said.

"It is time for Indian business to say we will get ourselves counted: what are we doing to make ourselves required by the world?" he asked.

Kotak said India needed to build strength in a few strategic areas over the next five years. Businesses, he added, should invest more in research, technology and innovation, with the financial sector supporting these efforts.

He also called for greater support for what he described as the "missing middle" in Indian entrepreneurship. While the country had a strong start-up ecosystem and large companies making substantial investments, the middle layer needed support to develop the businesses of the future.

"Startups have to get big, or the large players have to get into areas that are critical for India's strategic needs," he said.

Turning to the banking sector's credit-deposit mismatch, Kotak said FCNR(B) inflows had given lenders time to address the gap between loan growth and traditional deposits. "₹13 trillion has come into the banking system, giving banks stability to continue their business over the next three or four years while we solve the deposit puzzle," he said.

He reiterated that larger savers needed more attractive interest-earning instruments, given the tax differential between interest income and capital gains. The government's tax relief for incomes of up to ₹12 lakh was a positive step for smaller depositors, he said.

Asked whether banks needed to be more proactive in setting deposit rates to attract savings, Kotak disagreed with the suggestion that deposit pricing alone was the answer. Technology had made it easier for money to move between financial products, he said, adding that artificial intelligence could further change how savings were managed.

Despite the risks, Kotak said he remained bullish on India's long-term prospects, drawing on his experience of economic cycles, including the Asian financial crisis, the global financial crisis and the pandemic. "I am a deep believer that India will get it right," he said.

He stressed, however, that optimism needed to be accompanied by a strategy to address the country's macro challenges. "The time is for us to have a strategy, both as practitioners, to be awake to the reality of what is happening, and from a policy point of view, a strategic, structural answer to some of the challenges to our macroeconomy," he said.

Larger NBFCs stronger than in '19; risks remain: Fitch's Koh

Q&A India's larger non-banking financial companies (NBFCs) have significantly strengthened their risk profiles since the 2019 liquidity crisis, but rapid credit growth, rising household leverage and growing gold-loan exposure warrant monitoring, said **Elaine Koh**, senior director, financial institutions, Fitch Ratings. Speaking at the *Business Standard* BFSI Insight Summit 2026 in Mumbai, Koh discussed changing funding patterns, international investor appetite and emerging risks in the sector. Edited excerpts:

How have NBFC risk profiles changed since the 2019 crisis?

■ The risk profiles of the larger NBFCs we cover are like chalk and cheese compared to 2019. They have strengthened vastly over the past six or seven years. Earlier, there were underwriting gaps, long-term loans underpinned by short-term financing, and asset-liability mismatches that culminated in liquidity risks.

Today, there is greater awareness of these mismatches and a shift towards granular and secured financing. The RBI's scale-based regulatory framework has also introduced greater scrutiny. Structural reforms such as the Insolvency and Bankruptcy Code and Real Estate (Regulation and Development) Act (RERA) have strengthened resolution mechanisms.

FIRESIDE CHAT

Where do you see vulnerabilities emerging now?

■ Risks never really go away. Today, they are less about structural weaknesses in individual balance sheets and more about the broader economic environment. Credit demand, risk appetite and growth appetite remain strong.

Household leverage is approaching 45 per cent, as the RBI has pointed out. Despite restrictions on unsecured personal lending, substantial household credit continues to flow into non-mortgage loans. The quality of this growth needs monitoring. There is also interconnectedness between banks and NBFCs. We do not see major vulnerabilities about to crystallise, but vigilance is essential.

Has overseas investor appetite for Indian NBFCs improved?

■ Certainly, relative to 2019. Our rated NBFC portfolio has grown threefold, albeit from a small base. Earlier, international investors largely focused on established, top-tier names. There was considerable scepticism about lending quality and governance. Investors now recognise the fundamental strength of India's growth story and the value of NBFCs. They are differentiating between lenders based on governance and management quality. However, over the past one or two years, pricing has been the determining factor. Higher US dollar interest rates have made investors more selective.

Can GIFT City become a significant funding channel?

> "EARLIER, INTERNATIONAL INVESTORS LARGELY FOCUSED ON ESTABLISHED, TOP-TIER NAMES... INVESTORS NOW RECOGNISE THE FUNDAMENTAL STRENGTH OF INDIA'S GROWTH STORY AND THE VALUE OF NBFCs"

Elaine Koh
Senior director, financial institutions, Fitch Ratings

■ We are seeing increasing acceptance of GIFT City. Virtually all the issuance we have seen over the past three years has been through GIFT City and India INX, rather than offshore exchanges.

Tax benefits and extended trading hours are advantages. However, offshore funding rates and hedging costs remain challenges. GIFT City will probably remain a funding-diversification channel rather than a major source of funding in the near term.

Could tighter funding conditions widen the divide between larger and smaller NBFCs?

■ We have already observed a K-shaped funding environment, particularly since the RBI introduced scale-based regulations. Banks increasingly prefer larger upper-layer and middle-layer NBFCs. Smaller NBFCs can still attract funding by demonstrating credibility and underwriting acumen, but they face higher funding costs. Their challenge is finding profitable opportunities despite those costs.

What is your outlook for banks and NBFCs over the next 12-18 months?

■ Both sectors have performed strongly, barring a few NBFC segments. We expect India's GDP (gross domestic product) growth to remain above 6 per cent, supporting credit demand, asset quality and liquidity conditions.

This assumes continued sound economic and liquidity management and no major external shocks. India has navigated recent shocks better than many other emerging markets in the region.

What risks could the sector be underestimating?

■ Gold lending is one area we are monitoring. We still consider it relatively low risk. Even where delinquencies have doubled, they remain below 1 per cent. RBI loan-to-value limits also mitigate credit costs.

However, rapid growth raises questions about rising collateral valuations, credit shifting from microfinance into gold loans, and potential speculative borrowing to invest in gold.

El Niño is another downside risk, although we do not consider it systemic for larger, diversified lenders.

What would encourage lower-rated NBFCs to access the bond market?

■ That will take time. Smaller NBFCs must demonstrate three things: a sustainable strategy across market cycles, management structures that are not overly dependent on founders, and sound corporate governance.

Investors will assess their risk-management and compliance cultures. Ultimately, market access will also depend on pricing relative to domestic funding alternatives.

FCNR(B) not a short-term fix: PSB chiefs

PHOTOS: KAMLESH PEDNEKAR

(*From left*) Asheesh Pandey, MD & CEO, Union Bank of India; Ashok Chandra, MD & CEO, Punjab National Bank; Binod Kumar, MD & CEO, Indian Bank; Debadatta Chand, MD & CEO, Bank of Baroda; Rama Mohan Rao Amara, MD, State Bank of India, at the *Business Standard* BFSI Insight Summit in Mumbai on Monday

KRISHNA KANT
Mumbai, 26 October

Banks in India were able to mobilise a record $127 billion under the Foreign Currency Non-Resident (Bank) scheme in July and August owing to attractive yields on base deposits, a leverage facility for high-value depositors, a coordinated outreach, and a growing international interest in the country's economy, according to heads of public-sector banks (PSBs) at the *Business Standard* BFSI Insight Summit.

PSBs played a central role in deposit mobilisation.

The scale marks a sharp change from 2013, when banks rang up about $34 billion under a similar scheme.

Indian Bank Managing Director (MD) and Chief Executive Officer (CEO) Binod Kumar said: "The earlier mobilisation was equivalent to around 1.9 per cent of gross domestic product (GDP) compared with about 3 per cent this time."

Kumar said, "This was due to confidence in the economy and a concerted effort led by the Reserve Bank of India (RBI)".

The scheme came at a time when banks faced record-high credit-deposit ratios and intense competition for domestic deposits. The deposits offered access to foreign-currency funds for longer tenures while the RBI's swap facility helped banks manage the currency risk and made the landed cost competitive against comparable rupee bulk deposits.

"The rate of interest was an economic enabler, the hedging cost of the principal amount was fully covered by the RBI, and there was the multiplier effect of leverage," said Asheesh Pandey, MD & CEO, Union Bank of India. Union Bank mobilised $2.25 billion through and raised $600 million through its own paper.

Punjab National Bank MD & CEO Ashok Chandra pointed to India's growth story as a key draw. "With the economy growing at more than 7 per cent and corporate earnings rising in double digits, international banks and foreign institutional investors showed an interest in placing dollar funds with us," he said. According to him, the RBI's swap window was decisive because it helped address hedging costs, which can generally run at 3-3.5 per cent for dollar deposits.

Gujarat International Finance-Tec City (GIFT City) and its financial ecosystem also contributed in this.

Bank of Baroda MD & CEO Debadatta Chand described the mobilisation as a strategic response to global capital flows shaped by geopolitical developments and higher interest rates.

The bank raised about $8 billion. That was nearly four times the 2013 amount, he said, reflecting the resilience of India's economy and banking system. "This is not a playbook but rather a strategic move. It shows a sound and resilient Indian economy and a banking system that is healthy and agile and could handle such a large inflow seamlessly," he said.

> "BANKS LATCHED ON TO FCNR(B) TO AUGMENT THEIR LONG-TERM DEPOSITS AMID RECORD-HIGH CREDIT-DEPOSIT RATIO. BESIDES, THE LANDED COST OF THE DEPOSITS AFTER SWAPPING THEM WITH THE RBI WAS COMPETITIVE"
>
> RAMA MOHAN RAO AMARA
> MD, State Bank of India

Higher returns on deposits were a major attraction. State Bank of India MD Rama Mohan Rao Amara said the scheme offered depositors a yield of up to 7 per cent through the combination of deposits and leverage as against the 3.5-4 per cent that banks typically offered on three- to five-year dollar deposits. The effective return compared favourably with risk-free yields in the United States.

Unlike in 2013, leverage was clarified earlier. This appealed to depositors in Gulf countries.

"Banks latched on to the scheme to augment their long-term deposits at a time when the credit-deposit ratio was running at record-high levels. Besides, the landed cost of the deposits after swapping them with the RBI was competitive compared to the rupee cost of bulk deposits of a similar tenure," said Amara.

Leverage allowed eligible depositors to borrow against their initial deposits and place a larger amount with the bank, multiplying the funds mobilised. Leverage of up to nine times was available to eligible depositors subject to deposit size and assessment. SBI capped leverage at nine times and said about 80 per cent of its depositors opted for the facility. Among those who did, leverage ranged from four to nine times; at portfolio level, it averaged around five times. Of the roughly $11 billion SBI raised, about $2 billion represented primary deposits and the balance was leveraged.

Banks made the point that there was no leverage without checks.

Kumar referred to a proposal from an individual offering to deposit $100 million and seeking $900 million in leverage. The request prompted scrutiny of the source and nature of the funds. The bank sought net-worth certificates and conducted due diligence. "Nearly 90 per cent of the depositors were known to us or had some existing relationship with the bank," Kumar said.

According to Kumar, about 53 per cent of his bank's mobilisation came through leverage, with the rest from initial deposits. Leverage generally ranged from seven to nine times, with a few cases reaching 12 times for customers with established relationships and substantial existing deposits.

PNB raised about $2.7 billion, of which 67 per cent came through leverage and roughly a third from traditional Foreign Currency Non-Resident (Bank) deposits. Chandra said the bank conducted due diligence on the source and nature of initial funds. It also moved early to tap overseas investors, including in Taiwan, where a presentation to nearly 20 banks helped it raise close to $1 billion in 24 hours. The scheme had benefits beyond immediate deposit mobilisation. "The exercise enabled Indian banks to approach overseas markets for dollar loans after 15 to 20 years and helped restart the process of issuing dollar medium-term notes. The outreach also showcased Indian banks to foreign investors," he said.

Still, banks had to manage the cost and operational demands of the funds. Pandey said Union Bank assessed each transaction on a cost-benefit basis. Its all-inclusive cost was around 7.1 per cent as against 11-month certificate-of-deposit rates hovering between 7.5 per cent and 7.8 per cent. That made the deposits useful in managing the asset-liability position, he said. Indian Bank also had to generate dollars through GIFT City or overseas branches to support the arrangements, a substantial operational task.

The effect on domestic depositors is less clear-cut. Pandey said mobilisation under the scheme should be considered alongside the recent repo-rate increase and would not, by itself, determine the timing of retail deposit-rate changes. In rupee terms, the amount remains small relative to domestic deposits.

Amara said future movements in incremental deposits and credit would influence banks' decisions on deposit rates.

Kumar expected the impact to be felt more on bulk deposits than in retail deposits, noting that rate transmission depended on several factors.

Chand said the inflows arrived just before the busy credit season, when funding rates tend to rise, and provide price stability.

Chandra added that bulk deposit rates and certificate-of-deposit rates had moderated significantly, while lending rates had stabilised at lower levels. Banks may still raise retail term-deposit rates, he said, but the funds under the scheme had helped ease pressure on funding costs at a critical point in the credit cycle.

'Time to implement AI at scale, with clear objectives'

AATHIRA VARIER
Mumbai, 26 October

Indian banks need to move beyond experimenting with artificial intelligence (AI) and focus on implementing the technology at scale, with clear business objectives, stronger data practices, and safeguards to ensure accountability, private bankers said during the *Business Standard* BFSI Insight Summit.

While banks have kept pace with technological developments, translating AI pilots into measurable business outcomes will require careful selection of use cases, investment in data and cybersecurity, and continued human oversight of decisions.

R Subramaniakumar, managing director & chief executive officer (MD & CEO) of RBL Bank, said Indian banks were ahead in identifying AI use cases, but the focus now needed to shift from experimentation to practical deployment, which would bring greater responsibility for banks. "The Reserve Bank of India (RBI) is very clear: you have to move from experimentation to implementation," he said.

He also said that Indian banks had identified promising use cases and were not necessarily behind their global peers, but adoption remained at an early stage. Subramaniakumar said that "for AI to be successful, the underlying data has to be quantum-wise, volume-wise, value-wise, and quality-wise far superior".

Voicing a similar opinion, Rajiv Anand, MD & CEO of IndusInd Bank, said that over time, the benefits of AI is expected to be more fully realised. When it comes to the guiding principles for AI adoption, the foremost consideration should be identifying the problem that needs to be solved. Given the significant hype surrounding AI, it is essential to remain focused on its practical applications and business value.

"We have to get out of the mindset of pilots and go to scale execution and for that, we have to think in terms of what are the AI use cases that can be used," Anand said.

He also said that Indian banks should not be worried about if they are lagging or ahead in AI race, as they have demonstrated a fair amount of flexibility to be able to adopt new technologies. "As a banking system, there are various models that are currently playing out. Either they (the models) should change the customer experience or improve productivity. A large part of work in banks is happening in improving productivity," Anand said.

"AI is dramatically changing the way employees are working and how the customers are going to experience banking," said V Vaidyanathan, MD & CEO, IDFC First Bank.

Bankers also said that they could choose between different types of AI models — enterprise-based model as well as specialised models. However, ownership, accountability, and decision-making would continue to rest with the banks.

While banks can deploy AI across different functions, bankers said that its value would depend on identifying the right use cases and integrating the technology into business processes at scale. Anand said AI could help banks gain deeper insights into customers and assess creditworthiness, while enabling them to redesign customer journeys rather than merely automate existing processes.

"AI should not be viewed as a technology that can simply be added to an existing process. That is not the right way to approach it. The technology gives us the ability to completely reimagine customer journeys," Anand said.

For instance, a customer could upload documents through WhatsApp for a housing or auto loan, enabling the system to read the information and potentially pre-approve the application. This would change the existing process, in which customers submit physical documents at branches. Banks are also using AI agents and voice-based applications to automate routine work and improve productivity.

> "THE RBI IS VERY CLEAR (ON AI): YOU HAVE TO MOVE FROM EXPERIMENTATION TO IMPLEMENTATION... FOR AI TO BE SUCCESSFUL, THE UNDERLYING DATA HAS TO BE QUANTUM-WISE, VOLUME WISE, VALUE-WISE AND QUALITY-WISE FAR SUPERIOR"
>
> R SUBRAMANIAKUMAR
> MD & CEO, RBL Bank

> "AI SHOULD NOT BE VIEWED AS A TECHNOLOGY THAT CAN SIMPLY BE ADDED TO AN EXISTING PROCESS. THAT IS NOT THE RIGHT WAY TO APPROACH IT. THE TECHNOLOGY GIVES US THE ABILITY TO COMPLETELY REIMAGINE CUSTOMER JOURNEYS"
>
> RAJIV ANAND
> MD & CEO, IndusInd Bank

> "ALMOST ALL BANKS ARE INVESTING 10% OF OPERATING EXPENDITURE ON TECHNOLOGY. IT IS A GOOD NUMBER AND IT GIVES COMFORT THAT BANKS ARE INVESTING FOR THE FUTURE ... EVERY BANK HAS TO HAVE A POLICY ON AI BECAUSE IT IS SUCH A FAST-MOVING TECHNOLOGY"
>
> V VAIDYANATHAN
> MD & CEO, IDFC First Bank

Banks also needed to ensure that AI systems were transparent and their decisions explainable to regulators and customers. The economic benefits of AI may not necessarily translate into higher profits for lenders. It could improve operational efficiency while allowing customers to benefit through faster loan processing and lower borrowing costs.

The bankers also highlighted the need to invest in safeguards alongside AI deployment. Banks must assess business vulnerabilities, establish traceability, and ensure that AI-supported decisions could be audited. Resilience was equally important, particularly if a model failed, became obsolete, or developed a significant problem.

Cybersecurity and data governance are emerging as important considerations as banks deploy AI agents that can reason and access multiple sources of information. Banks need controls to prevent unauthorised access to data, while ensuring that the technology does not introduce bias or misinterpret regulatory requirements.

On technology spending, Vaidyanathan said banks needed to distinguish between investments in technology and the practices required to use data effectively. "Data practices are extremely important and are just as critical as having a good technology stack," he said.

He estimated that most banks were spending around 10 per cent of their operating expenditure on technology, which he considered a good level of investment. "Almost all banks are investing about 10 per cent of their operating expenditure on technology. It is a good number and it gives comfort that banks are still investing for the future," Vaidyanathan added.

Subramaniakumar also said that investment was also required in cyber-resilience, and data-layer security, and that the systems needed to deploy AI safely. The case for additional spending would depend on whether experimentation produced demonstrable business outcomes.

Banks are also exploring AI for customer grievance redress. Sentiment analysis can help categorise complaints received through social media, telephone calls, email, and other digital channels. AI agents can connect information across complaints and identify patterns, enabling lenders to take a more proactive approach to resolving customer issues.

The bankers attributed growing interest among foreign investors in Indian banks to India's growth prospects, demographic opportunity, formalisation of credit, and infrastructure development. Additionally, governance, market liquidity, and talent availability, among others, are also boosting investor confidence.

Even as banks discuss moving from AI experimentation to full implementation, they also believe that the lenders must establish clear AI policies and security protocols. "Every bank has to have a policy on AI because it is a fast-moving technology that requires strict security protocols and guardrails," Vaidyanathan said.

'Global cues to drive return of capital'

PHOTOS: KAMLESH PEDNEKAR

(From left) Hitendra Dave, CEO, HSBC India; K Balasubramanian, CEO, Citi India; P D Singh, CEO, Standard Chartered Bank, India; Tushar Vikram, CEO, Mashreq Bank; and Rajat Verma, CEO, DBS Bank India, at the *Business Standard* BFSI Insight Summit in Mumbai on Monday

AATHIRA VARIER
Mumbai, 26 October

India's long-term investment prospects remained intact despite recent foreign portfolio outflows, but the return of capital would depend on global financial conditions, relative valuations, and the country's ability to attract sustained foreign investment, foreign bankers said during the *Business Standard* BFSI Insight Summit. They also underscored the need to step up foreign direct investment (FDI) to support India's growth ambitions, with trade agreements offering opportunities to deepen cross-border business and investment flows.

"Probably too early to say, but perhaps stabilisation of the outflows has already happened. If that is the scenario, and the India story remains strong, then I think we're just waiting for some of these external factors to stabilise before capital comes back into the country," said P D Singh, chief executive officer (CEO) of Standard Chartered Bank India.

Singh attributed the recent movement of foreign capital to global developments, including the interest-rate differential between the US and India, currency depreciation driven by external factors, and the surge in overseas investment interest in artificial intelligence (AI). "In this kind of a scenario, you would expect reallocation of capital to where they can probably make the best quick buck," he said.

Singh said India's long-term investment case remained intact despite capital moving towards other markets. He also pointed to the possibility of Indian equity valuations becoming more attractive relative to global peers, which could help bring foreign investors back when external conditions stabilise.

Tushar Vikram, CEO of Mashreq Bank, said investors in West Asia continued to view India as a long-term opportunity, even though they reassessed their portfolios. He cautioned that this was based on his conversations with investors in the region, rather than a blanket assessment of all foreign investors. "I don't think any of them have taken their eyes off India or exited India. They are rebalancing their portfolio but if you talk to them, they find India as a long-term interesting story," Vikram said.

He said that India-UAE relationship and growing global trade links were important to Mashreq's strategy in the country. The bank was focused on supporting Indian companies expanding overseas and helping West Asian businesses enter India.

K Balasubramanian, CEO, Citi India, said foreign capital would continue to be important to India's growth ambitions, given the uncertainty over whether domestic savings alone would be sufficient to finance the country's expansion.

"If you look at the domestic savings in the country, I am not too sure whether there is enough domestic savings for us to accelerate and take the business from where it is to the next level as an economy," Balasubramanian said. "Therefore, there is going to be always reliance on foreign capital," he added.

> "FOREIGN BANKS CAN LEVERAGE THEIR STRENGTHS IN WEALTH MANAGEMENT AND DIGITALISATION TO INCREASE ACCESS TO GLOBAL GROWTH OPPORTUNITIES, EXPERTISE AND INSIGHTS"
>
> RAJAT VERMA
> CEO, DBS Bank India

Citi, which exited its consumer banking business in India, is focusing on institutional banking and facilitating capital flows into the country, including FDI and portfolio capital, Balasubramanian said. The bank's approach reflects the opportunities it sees in financing India's growth, including through manufacturing and other institutional businesses.

He said Citi had been pursuing this focus since 2023 and remained confident about the opportunities in its institutional businesses.

Balasubramanian said the free trade agreements (FTAs) with the UK and the European Union (EU) could open up significant opportunities for trade and investment. He said 99 per cent of India's exports and 90 per cent of its imports came under FTA trade. "Significant work is underway on both sides to identify eligible clients, locate clients outside of India, and determine how we can help them channel their investments into the country," he said.

Balasubramanian also said that the India-UK and India-EU FTAs have the potential to strengthen cross-border business and investment flows. He said the agreements could help banks identify companies that would benefit from the new trade arrangements and channel investments into India. It could potentially be worth around $90-100 billion, while the India-EU corridor could reach $220-250 billion if the full benefits of the agreements were realised. He described the agreements as a potential balancing factor amid delays in the India-US trade arrangement.

HSBC India CEO Hitendra Dave said the focus of trade agreements should extend beyond trade to the investment commitments they can attract. He said India needed about $200 billion in gross FDI annually over the next 21 years to meet its ambition of becoming a developed economy by 2047. Dave said foreign investment could help companies establish operations in India and export goods to markets such as North America, Europe, the UK, and East Asia. The agreements could make Indian industry more competitive and expose domestic producers to larger markets, while giving consumers access to better products.

However, Dave cautioned that India needed FDI inflows significantly higher than current levels, pointing to the difference between gross inflows and net figures, which are affected by outflows. "I am not talking about the current situation where the net numbers are small due to high gross inflows being offset by substantial outflows. (To achieve our goals) We need $200 billion of gross FDI every year," he said.

On the question of whether taxation was contributing to foreign portfolio investor (FPI) outflows, Dave said the debate around long-term capital gains (LTCG) tax had been in the public domain for some time. He did not attribute the outflows directly to taxation or predict when the tax regime might change.

"What is going to happen, when it is going to happen is anyone's guess. But if it happens, I think that is always going to be positive for the market," he said.

Dave also pointed to the growing role of domestic investors in India's primary markets, saying companies were increasingly able to raise capital even when the secondary market was under pressure. He said valuations had become somewhat more attractive compared with 18-24 months earlier, helping generate interest in new issuances.

He said HSBC had ranked first across initial public offerings (IPOs), G3 bond issuances, and syndicated loans between January and September, underlining the role global banks play in connecting Indian companies with international pools of capital. "From January to September, HSBC is number one across all three, IPOs, G3 bonds as well as syndicated loans," he added.

Dave said a key function of global banks was to take Indian companies to overseas markets and bring international companies and capital into India. Their knowledge of investors, track records in capital markets, and experience in structuring transactions helped issuers raise funds through equity, dollar bonds, and syndicated loans, he said. Dave also noted that domestic investors were playing a larger role in IPO pricing than in the past. While foreign investors had earlier often been crucial to the success of an issue, Indian investors now had a stronger say and were frequently among the main drivers of pricing, he said.

Rajat Verma, CEO of DBS Bank India, said facilitating foreign capital flows remained a central role for international banks, alongside helping Indian companies access funding from overseas investors and lenders. "The core purpose (dharma) of a foreign bank is to facilitate foreign capital flows. That remains a pivotal part of our role," Verma said.

He said DBS was also focusing on selected retail and small and medium enterprise (SME) lending opportunities where it believed it could build scale, rather than pursuing growth across every segment. "DBS and other foreign banks can leverage their global strengths in wealth management and digitalisation to increase access to international growth opportunities, expertise, and insights," Verma added.

Singh, meanwhile, pointed to foreign banks' role in financing infrastructure, renewable energy (RE), and Indian companies' overseas expansion. Standard Chartered had undertaken 19 RE and infrastructure finance transactions in the recent past, and helped raise about $16 billion through G3 bonds from January to the time of the discussion, he said.

He also cited the inflow of foreign currency non-resident (bank), or FCNR(B), deposits and merger-and-acquisition investment in the banking sector as indications that India continued to attract long-term investor interest.

The foreign bankers said that recent portfolio outflows did not necessarily signal a weakening of the long-term India investment case. However, executives pointed to global financial conditions, relative valuations, and the ability to attract more foreign investment as important factors shaping the pace at which capital could return.

'Fund diversification lot harder for smaller NBFCs'

SHARLEEN D'SOUZA
Mumbai, 26 October

(*From left*) Hitesh Sethia, MD & CEO, Jio Financial Services; Jairam Sridharan, MD & CEO, Piramal Finance; Raul Rebello, MD & CEO, Mahindra Finance; and Umesh Revankar, executive vice chairman, Shriram Finance, at the *Business Standard* BFSI Insight Summit in Mumbai on Monday

Smaller non-banking financial companies (NBFCs) face funding limits due to lower ratings and widening growth gaps, industry leaders said on Monday at the *Business Standard* BFSI Summit 2026 in Mumbai.

During a panel discussion titled *Is the NBFC advantage over?*, moderated by Manojit Saha, Hitesh Sethia, managing director (MD) and chief executive officer (CEO) of Jio Financial Services (JFS), Jairam Sridharan, MD and CEO of Piramal Finance, Raul Rebello, MD and CEO of Mahindra Finance, and Umesh Revankar, executive vice-chairman of Shriram Finance discussed the sector's role and the challenges faced in accessing funds.

From discussing rating disadvantages, to shrinking advantages with respect to distribution, industry leaders also talked about gold loans as a good entry point for new customers, the potential impact of the West Asia conflict on collections.

Jairam Sridharan, MD & CEO, Piramal Finance said, "Funding diversification is a lot harder for smaller companies. For larger companies, you just have to make a choice on which source of funds you want to tap into."

He added, "Banks are of course one source of funds, capital markets, local or domestic debt capital markets, international markets for debt, both on the syndication side as well as on the bond side, multilateral agencies, and securitisation markets."

Sridharan said it is the rating that drives fund sourcing and explained that if an NBFC is rated AA or better, then the company has access to a lot of markets to raise funds.

"But a vast majority of NBFCs... are rated A and below, and there the access to funds is limited to banks and some governmental institutions," he explained.

Sridharan added that the sector's share in lending has been broadly in the same range for four decades.

"NBFCs have been roughly 25 per cent of all lending; the other 75 per cent being banks. That sometimes goes up to 30 per cent, sometimes it goes down to 20 per cent. It has never actually gone too far away from that range. Today, we are maybe a little bit on the higher side, maybe at 26-27 per cent. But really, NBFCs have been there for a long time," he said.

Rumours of the industry's death are vastly exaggerated, he added.

Comparing the advantages that NBFCs enjoy when compared with banks, Raul Rebello, MD & CEO, Mahindra Finance said that when it comes to acquisitions, NBFCs have placed themselves in rural areas, where customers' economic viability far exceeded their document quality.

But he added that this advantage was declining as public and private sector banks opened new branches in these areas.

"Advantage on pure distribution, I think, is going away a little," Rebello said. He added that where it exists is in specialised finance categories.

While citing the example of auto finance for the industry in a specialised finance category he said, "In auto finance, NBFCs have embedded themselves even into the dealer ecosystem. Right there, it's much more nuanced, and I think the advantage still holds."

"With NBFCs, banks have been able to lean on a lot of alternative data and kind of create some of the gaps which existed in the past," Rebello added.

On collections, Rebello believes that the sector has an edge over banks as the sector is more embedded into the micro markets and it understands unseasonal variations.

While discussing the NBFC sector getting interest from foreign capital, Umesh Revankar, executive vice chairman, Shriram Finance said the sector has been playing a complementary role and continues to play a contemporary role as the country expands and people harbour ambitions and aspirations.

"Today, NBFCs in rural areas are able to customise and give services that are suited to the customer... that makes OUR role very important in the Indian financial system," Revankar said.

Customisation will continue to remain, he said, adding that foreign investors will look into this advantage since they chase high growth and also look for better margins so that their earnings or their potential investments make better returns.

Echoing Revankar, Hitesh Sethia, MD & CEO, Jio Financial Services said, "Firstly, foreign capital is looking for high growth. That's obvious, and they are looking for something where structural demand can be unlocked. Clearly, the financial services sector and within it, a non-bank sector presents that opportunity for regulated financial institutions world over."

> "FOREIGN CAPITAL IS LOOKING FOR HIGH GROWTH... WHERE STRUCTURAL DEMAND CAN BE UNLOCKED... NBFCs PRESENT THAT OPPORTUNITY FOR REGULATED FINANCIAL INSTITUTIONS GLOBALLY"

> RAUL REBELLO
> MD & CEO, Mahindra Finance

> "TODAY, NBFCs IN RURAL AREAS ARE ABLE TO CUSTOMISE AND GIVE SERVICES THAT ARE SUITED TO THE CUSTOMER... THAT MAKES OUR ROLE VERY IMPORTANT"
>
> UMESH REVANKAR
> Executive Vice Chairman, Shriram Finance

Piramal Finance's Sridharan said rating is the big driver of success.

"If you are AA rated or better, you have access to a lot of these markets. But a vast majority of NBFCs are not. They are rated A and below, and there the access to funds is limited to banks and some government institutions, let us say NHB (National Housing Bank) or some others, which are very use case specific. Ratings are going to be capped for the smaller NBFCs, and that is going to severely limit their ability to participate in a lot of the other sources."

He explained that this is why the upper layer NBFCs grow faster than middle and lower layer NBFCs.

Gold loans are attracting attention as borrowers are looking for ways to reduce their borrowing costs, JFS' Sethia said, adding that there was a shift from personal loans towards gold-backed loans. JFS is watching the gold loan segment, but has no immediate plans to enter it, he said.

"We are seeing other players rush into that area, and there is a migration from what we understand of personal loans to gold loans, which probably is good for the system," Sethia added.

Mahindra Finance's Rebello added that gold loans serve as a good entry point for rural and semi-urban areas and said that it has become the second largest category currently.

"I must mention that gold loan serves as a good entry point for customers whose assets are locked up in either land or gold. We all know that rural, semi-urban, self-employed folks have volatile income and why we should take comfort is that gold loan delinquencies are low." Rebello explained.

One shouldn't attribute delay to default since these customer segments have unseasonal and infrequent income sources, hence, gold loan as a category is important, he added.

Sridharan said lending growth remained strong for both banks and NBFCs despite several headwinds. However, he warned that the prolonged conflict in West Asia and higher oil prices could weigh on the economy if the situation continued. "The longer this thing stretches, the harder it gets for the economy," he said, adding that current growth rates should not be taken for granted if tensions remain elevated.

Rebello said rural demand had outpaced urban demand across vehicle-financing categories in the first half of the year. However, he said the full-year outlook remained uncertain due to risks such as El Niño and drought. "It's too early to call the full year," he said.

Meanwhile, Shriram Finance's Revankar said asset-quality pressures could emerge temporarily in regions where agricultural income was affected, but he did not see a serious, widespread challenge.

Economists divided over reliance on foreign funds

SHUBHAM KUMAR & KRITY AMBEY
New Delhi, 26 October

As the finance minister keenly watches the debate over taxation of foreign portfolio investors (FPIs) in equities, economists remain divided on how much India should rely on foreign capital to fund its growth ambitions.

At a panel discussion with Tamal Bandyopadhyay at the *Business Standard* BFSI Insight Summit in Mumbai on Monday, Aastha Gudwani, India chief economist at Barclays, said India could not achieve its goal of becoming a developed economy by 2047 without foreign financial inflows. Sonal Varma, managing director and chief economist for India and Asia ex-Japan at Nomura, and Samiran Chakraborty, managing director and India chief economist at Citibank, however, argued that India must reduce its dependence on foreign capital amid persistent geopolitical tensions and global financial volatility.

"India's journey from here to the Viksit Bharat goal that we have for 2047 cannot happen without participation of foreign financial capital," Gudwani said, adding that foreign capital also helped stabilise the currency, an important ingredient for financial stability.

According to Gudwani, a tax change may not be a reform in the grand scheme of things, but if it was suitable, considering it could remove the marginal hurdle for an FPI to undertake an investment position in India at a time when valuations were not very attractive, nor India was the front runner in the artificial intelligence (AI) hardware story, and currency stability lacked predictability.

"I would therefore be looking at some tax exemptions for FPIs in equity markets, and, of course, more currency stability, which is an overarching responsibility of policymakers," she said.

Nomura's Varma, however, said foreign investment was not the best source of capital in a world characterised by heightened uncertainty and volatility.

"One thing that has become very clear over the last 2-3 years is that we live in a world of increased volatility and uncertainty and geopolitical tensions are here to stay," Varma said. "So you don't want to have an economic model where your growth rates, your financial needs are continuously at risk of the mood of foreign capital. So I think from a more macro perspective, the reform that we need is to reduce the dependence on foreign capital."

The scale of India's investment needs, however, means that foreign inflows will remain important. Citing a Citibank study, Chakraborty said India's investment requirement was projected to rise from $1.5 trillion currently to $3.2 trillion over the next decade. Of the $3.2 trillion requirement, about $600 billion would need to come from foreign sources, implying an annual requirement of roughly $60 billion in foreign capital over the next 10 years.

"If you look at last 15 years average, we have got $80 billion (foreign capital) a year. So, compared to that, the $60 billion number is nothing, especially when the economy is growing. But if you look at last two years, we have barely had any capital account surplus. So, almost no inflow on capital account on net basis," Chakraborty added.

Varma explained that there were three major shifts underway globally — AI driving capital, geopolitical disruptions leading to constant supply chain shocks, higher inflation and interest rates, and Foreign Direct Investment (FDI) decisions increasingly being influenced by geopolitical alignment rather than manufacturing costs or ease of doing business.

Developed economies that were traditionally sources of capital were now attracting more of it, making it harder for emerging economies such as India to finance their investment needs while managing external-sector pressures, she said.

Chakraborty also argued that the debate focused too heavily on the supply of capital and not enough on whether India was creating projects that investors and lenders were willing to fund.

"We tend to always think of the supply of capital: How banks will supply capital, how foreigners will supply capital. We don't discuss enough about the demand for capital. How are we making our projects bankable? How are we making our projects investable?" Chakraborty said. "I think that the demand side of the problem is less discussed, and we should emphasise that part as well."

The question, therefore, is what should be India's strategy on the current account, capital account and domestic reforms to sustain its investment and growth needs despite the adverse global backdrop.

"From a medium-term perspective, I think having gross FDI inflows, or for that matter net FDI inflows which happens to be the most patient part of our capital account, is something that we need to strive for," Gudwani recommended. "Index inclusion, making it simpler to be a part of global indices, making securities more liquid, better tradable, is something that we can immediately look at to improve the foreign portfolio investments," she added.

Additionally, India should also strive to attract capital in labour-intensive low-tech industries, Varma said. "If we want to attract some of the capital in these labour-intensive low-tech industries, our relationship with China on non-strategic sectors is something we'll need to look at, because China is driving a lot of the inflows," she added.

At the same time, Icra Chief Economist Aditi Nayar raised the need for private investment to become broad-based in India. Public investment was the primary tool of the government to revive the economy after the Covid-19 pandemic, to induce a multiplier effect in private sector.

However, private investment has picked up in limited sectors, particularly data centres and those related to renewable energy and electric vehicle manufacturing, Nayar said. I think one side reform, which is also needed is expenditure management and rationalisation so that within the borrowing that you're (government) allowed to do, more of it can actually go towards capital spending, and less of it towards revenue expenditure," she added.

Ahead of the Union Budget for 2027-28 (FY28), the economists also outlined measures that can support investment, manage fiscal risks and boost growth. Gudwani called for the restoration of indexation benefits for debt instruments, while Varma said the government could send a positive signal to global investors by reducing its borrowing more than expected.

"There's a lot of focus on fiscal risk globally right now, and if we can surprise by cutting borrowing more than what is expected, I think that would be a positive signal in an otherwise very nervous global investor environment we are in," Varma said.

Nayar called for the upcoming pay revision by the Eighth Central Pay Commission to be implemented without a large build-up of arrears, allowing the economy to absorb the additional burden while supporting growth. This would help ensure the boost to consumption and growth comes next year itself, rather than leaving the government to absorb a larger arrear bill in a single year, she said.

Chakraborty, meanwhile, reiterated the need to focus on the demand side of investment by making projects more viable and attractive to lenders and investors. He said the finance minister could use the Budget to propose a common framework for improving the viability, bankability and investability of projects across the country.

Treasury heads see prolonged ₹, bond mkt strain

ANJALI KUMARI
Mumbai, 26 October

India's currency and government bond markets are likely to remain under pressure over the coming months as elevated crude oil prices, sustained foreign capital outflows, and high global bond yields weigh on sentiment, treasury heads of several banks said on Monday at the *Business Standard* BFSI Insight Summit.

While recent measures by the Reserve Bank of India (RBI) may help contain volatility and provide some breathing room, a durable improvement would depend on a moderation in oil prices and a recovery in capital flows, experts said.

India's dependence on imported oil makes the rupee particularly vulnerable to a sustained rise in crude prices, while global investors' preference for artificial intelligence (AI)-related investments has contributed to outflows from Indian equities.

The Indian crude basket was estimated at around $120 a barrel, one treasury head observed. Foreign investors have pulled out nearly $60 billion from Indian equities over the past two years, including close to $10 billion in the past two months, experts said.

"There are several factors leading to the rupee's weakness. Global oil and energy prices have stayed high for longer than most people expected. Since we are, of course, a very large importer of oil and energy, this affects us negatively. Second, while India has run a current account deficit in the past, I think our capital account has remained positive and has financed this deficit. But at least over the past couple of years, we have seen a lot of global funds chasing the AI story. Because of that, we have seen large outflows from foreign portfolio investments in India," said Aditya Bagree, head of markets, Citi India and the Indian subcontinent.

He explained that foreign currency non-resident (bank), or FCNR(B), deposits had exceeded market expectations, giving the RBI additional firepower to manage the rupee's depreciation. However, he said, these inflows only bought the country and the central bank time, as the funds would have to be repaid within three to five years.

(*From left*) Aditya Bagree, head of markets, Citi India and Indian Subcontinent; Arup Rakshit, group head treasury, HDFC Bank; Parul Mittal Sinha, head markets, India & South Asia and co-head, macro trading ASA, Standard Chartered Bank; Shailendra Jhingan, head of treasury & economic research, ICICI Bank, at the *Business Standard* BFSI Insight Summit

The changing hedging behaviour of importers and exporters, who are increasingly anticipating a depreciation of the rupee, has also played a role, he added.

On the RBI's foreign exchange risk reserve (FERR) measure to contain rupee volatility, Arup Rakshit, group head of treasury at HDFC Bank, said it was making imports and hedging more expensive. "Initially, when FERR was introduced, hedging continued because, if the rupee appreciates by 2 per cent, the cost of FERR is not equivalent to that 2 per cent. So, obviously, if the budget allows for it, importers will continue to hedge. Some of the potential speculation has gone out of the market. But as the currency stabilises, some of the demand may no longer be there," Rakshit said.

He added that demand could decline as the next trade cycle begins, potentially reflecting the impact of FERR.

The rise in US government bond yields has also made conditions more challenging for emerging markets (Ems), treasury heads said. While higher US yields in the past were often driven by stronger growth expectations, the latest increase has been accompanied by concerns over fiscal conditions and rising risk premiums in developed markets.

Parul Mittal Sinha, head of markets for India and South Asia and co-head of macro trading for Asia and South Asia (ASA) at Standard Chartered (StanChart) Bank, said the 10-year US Treasury yield had reached the psychologically important level of 5 per cent. "In this environment, the impact on emerging market economies is negative because the risk premium that investors start demanding, or are getting, in developed markets is also what they start demanding in emerging markets. That is where the impact on currencies in EMs starts becoming more negative," Sinha said.

Treasury heads were divided over the outlook for the 10-year Indian government bond yield.

Some experts said it could move towards 7.75-7.8 per cent over the next three to six months if current conditions persist, while another expected it to remain within a narrower range of 7.4-7.6 per cent.

Tighter liquidity and the possibility of further interest rate increases are also likely to influence the trajectory of yields.

Comparing the current FCNR(B) deposit mobilisation exercise with that of 2013, Shailendra Jhingan, head of treasury and economic research at ICICI Bank, said the interest rate differential between India and the rest of the world had been considerably wider at the time. The measures had also been introduced after several other steps had already been taken.

"This time, we are in a different world. US interest rates are already very high, and oil prices have risen recently. So the environment has suddenly become a little more challenging. The point is that FCNR(B) did not change the fundamentals even in 2013. It should be seen as something that buys you time. Last time, what changed was that oil prices started coming down and conditions in the current account began to improve. Capital flows also started picking up. Ultimately, those are the factors that matter. FCNR(B) is not going to change the outlook for the rupee permanently," Jhingan said.

Jhingan cautioned that large-scale AI-related borrowing was putting additional strain on dollar liquidity. "There is a scarcity of capital that is affecting capital flows around the world, and India is also facing that challenge. AI is a bigger challenge than even oil prices in today's world," he said.

Sinha, however, said the scale of FCNR(B) inflows had surprised everyone, demonstrating the strength of the Indian economy's fundamentals. India had managed to attract dollar inflows even as global investors competed for dollar funding, she added.

"There were three factors hitting India simultaneously over the past few months. The first was the US tariff story, which was completely unexpected. Then came oil, the war and the conflict in West Asia. The third was the AI story, or the lack of it for India. These three factors have combined. If one or two of them are resolved over time, we will see sentiment towards Indian markets improve," Sinha said.

Foreign investment in government bonds may take time to recover, experts said. Expectations of further interest rate increases in the US and relatively attractive yields in developed markets could limit immediate inflows. The interest rate cycle would need to stabilise before a clearer picture emerges.

The discussion also highlighted the challenges banks face in managing interest rate risk as a growing share of loans is linked to external benchmarks, while deposits tend to carry fixed interest rates.

"Sixty to 65 per cent of loans are now linked to external benchmarks, largely the repo rate. Of course, there will also be some repo-linked exposures. Deposits mobilised by banks, on the other hand, tend to carry fixed rates. That creates a challenge that can sometimes be very difficult to manage. The fact is that the only product available for hedging that is liquid and sees substantial trading volumes is the overnight index swap (OIS). But OIS is not a perfect hedge for repo-linked exposures," Jhingan said.

Treasury heads also discussed the potential for tokenisation to expand the use of digital settlement and improve secondary market transactions in corporate bonds.

The issuance of corporate bonds using distributed ledger technology and their settlement through the wholesale digital rupee were described as a major development.

‘Rarely easy to spot a multibagger stock’

Business Standard Smart Investor Arena

PUNEET WADHWA & SALONI GOEL
Mumbai, 26 October

PHOTOS: KAMLESH PEDNEKAR

“CAPACITY EXPANSION, GENERATIONAL CHANGE, CORPORATE TURNAROUNDS CAN CREATE OPPORTUNITIES FOR OUTSIZED RETURNS. HOWEVER, THESE REQUIRE PATIENCE, RESEARCH AND THE DISCIPLINE TO TRACK BUSINESS FUNDAMENTALS RATHER THAN REACT TO SHORT-TERM MARKET NOISE”

U R BHAT, Cofounder and director, Alphaniti Fintech

“DO YOUR HARD WORK, ANALYSE THE COMPANY, AND CONTINUOUSLY TRACK IT. AND HARD WORK DOES NOT ONLY MEAN LABOUR; IT ALSO MEANS APPLICATION OF MIND. IF THAT IS IN PLACE, ALONG WITH POSSIBLY SOME LUCK, YOU COULD HAVE A MULTIBAGGER”

AMBAREESH BALIGA, Independent market analyst

In the world of investing, spotting a multibagger stock is rarely a straightforward exercise. A company that eventually delivers returns that are several times its original share price may, at the outset, look no different from one that struggles to survive. Identifying the eventual winners requires fundamental research, patience, and a bit of luck, experts said at the *Business Standard* BFSI Insight Summit’s Smart Investor Arena in Mumbai on Monday.

While a sufficiently large addressable market, a differentiated product or service, and the ability to capture market share are also essential considerations for a multibagger, forming the foundation of fundamental research, strong fundamentals alone do not guarantee that a stock will become a multibagger, experts said.

At an early stage, the characteristics of a firm that eventually succeeds may not be dramatically different from those of one that fails. The difference often only becomes apparent over time, as the management’s ability to execute its plans determines the business trajectory.

During a panel discussion on *Hunting for Multibaggers: Skill, Luck or Patience?*, Ambareesh Baliga, independent market analyst, said a stock gradually evolves into a multibagger. “You cannot say on day one that a stock is a multibagger. They evolve,” he said. Alphaniti Fintech Cofounder and Director U R Bhat said identifying investors must look beyond short-term share price movements and assess a company’s underlying business prospects to identify potential multibaggers.

Baliga added that contrarian thinking, management quality, and the ability to execute growth plans are important for identifying a multibagger. Investors must also remain patient enough to allow their investment thesis to play out, he said. While “luck plays a part, no doubt,” Baliga emphasised that investors must “do your hard work, analyse the company, and continuously track it.”

“Hard work does not only mean labour; it also means the application of the mind. If that is in place, along with possibly some luck, you could have a multibagger,” he said.

Bhat identified three key drivers of a company’s value: revenue growth, margins, and asset intensity. “First, the company has to keep growing its top line. Second, it needs good margins, and preferably improving margins. Third is asset intensity. The company has to generate sales and better margins with as little investment as possible,” he said.

Bhat said investors must conduct thorough research before investing and continue to monitor a company’s performance thereafter.

Earnings growth

Share prices are influenced by both earnings growth and changes in the price-to-earnings (P/E) multiple that investors are willing to pay for those earnings. Bhat argued that while earnings growth can generate attractive returns, dramatic multibagger gains often require a significant expansion in the valuation multiple.

A company that grows its earnings by 15-30 per cent annually for a limited period may deliver good returns, but such growth alone may not necessarily make it a multibagger.

A substantial re-rating can amplify the gains, particularly when market perception of the business changes. This may be driven by factors beyond the company’s immediate operations. Changes in the macroeconomic environment, the emergence of a new market, or a shift in investor sentiment can alter how the market values a business.

Contrarian investing

Contrarian investing can also help investors to identify such opportunities early, Baliga said. His approach involves looking for companies or sectors that have fallen out of favour and are trading at a discount to their potential. If business performance improves subsequently and the market begins recognising the opportunity, investor interest can build up.

As the company continues to deliver, the initial recovery can turn into broader market enthusiasm, potentially leading to a sharp expansion in its valuation multiple. However, this is far from assured. A company may recover sufficiently to deliver a decent return without becoming a multibagger.

Baliga cited cyclical sectors such as steel and sugar, which have moved in and out of favour over time. Buying when sentiment is depressed and selling when it recovers can be profitable, but such a cycle does not necessarily produce the fundamental transformation required for a stock to be identified as a multibagger. The more significant opportunities arise when the underlying business or its prospects undergo material change.

Situations that create multibaggers

According to Bhat, three circumstances in which investors may find opportunities for substantial long-term returns are: A successful company undertaking a major capacity expansion, a generational change in a promoter-led business, and the turnaround of a company facing financial or operational difficulties.

The first situation involves companies that invest heavily to expand their production capacity.

“Consider a business that increases its capacity from 100 units to 300 or 400 units. Once the new facilities are commissioned, it begins incurring interest and depreciation costs, even if demand has not yet grown sufficiently to utilise the additional capacity,” he said.

Consequently, reported profits can come under pressure for several quarters. The market, which often focuses on recent earnings and near-term expectations, may react by pushing the stock price down sharply. This can create an opportunity for investors who believe the company will eventually utilise its expanded capacity and generate higher revenue.

The crucial questions are: Whether the demand can absorb the additional production? And whether the company can improve profitability as utilisation increases? If the investment is successful, the initial period of weak earnings can give way to a sharp improvement in profits as the additional capacity starts contributing meaningfully to revenue.

Investors willing to look beyond near-term earnings weakness, Bhat said, may find attractive opportunities in such businesses.

Baliga added that investors should track a firm’s revenue and volume growth, gross margins and market share after a major capacity expansion: Revenue and volumes, whether quarter-on-quarter or year-on-year, should show a positive trend. Margins should improve as economies of scale begin to take effect, and the company should also gain market share as capacity rises. If these indicators move in the right direction, the business may be on course for sustained growth.

Secondly, when leadership is passed on to a new generation in a promoter-led company, such a transition can either strengthen or weaken a business.

A business that has operated under the same leadership for decades may be entering a phase in which its industry is expanding, competition is changing, or new markets are opening up. If the next generation brings fresh ideas, adopts more effective operating practices and pursues market-share gains aggressively, the firm could enter a new growth phase.

A corporate turnaround can also offer a multibagger opportunity. This could particularly be the case when a firm has run into trouble owing to external circumstances instead of any fundamental weakness in its product or market.

A change in management, better working-capital discipline or a shift towards private-sector customers can, however, create substantial value.

‘₹3 crore retirement corpus can be enough’

Q&A The first step in financial planning is to understand where one stands financially and where one wants to be, said **Neha Nagar**, content creator and financial educator, in a conversation with **Puneet Wadhwa** at the *Business Standard* BFSI Insight Summit’s Smart Investor Arena. The younger cohort, she said, should not rush into investing before focusing on their personal development. Edited excerpts:

“FINANCIAL FREEDOM IS NOT ABOUT HAVING A LOT OF MONEY... IT IS ABOUT NOT HAVING TO WORK JUST FOR MONEY”

NEHA NAGAR, Content creator and financial educator

How do you define financial freedom, and how does it change across age groups?

■ Financial freedom is not about having a lot of money, because everyone has a different definition of wealth. It is about not having to work just for money. For some, it means being able to quit a toxic job whenever they want; for others, it means having the freedom to start a business or work on their own terms. Financial independence does not necessarily mean stopping work. It means having the financial security to decide how you want to live. For many Indians, I believe a corpus of ₹3 crore can be a useful starting benchmark, depending on their expenses and lifestyle.

Is ₹3 crore really enough to retire, considering inflation and rising expenses?

■ The ₹3 crore figure is a starting benchmark, not a universal retirement number. One way to estimate the corpus needed for financial independence is to calculate your annual expenses and multiply them by 25. A ₹3 crore corpus could therefore be sufficient for someone whose expenses and circumstances fit that estimate. However, expenses change as life progresses. Inflation also affects purchasing power. That is why regular review of financial plans is important and should be done yearly as circumstances change.

Young Indians are earning more at the start of their careers than previous generations did. Are they getting closer to financial freedom?

■ Saving has become much more difficult because companies are constantly encouraging us to spend. Previous generations could often save for major goals with a few years of earnings, but housing costs and lifestyle expectations have changed significantly. We also need to distinguish between luxury and affordable housing. A large part of the real estate market caters to premium buyers, while affordability remains a challenge for many young people. Higher salaries do not automatically translate into financial independence if expenses and aspirations rise just as quickly.

FIRESIDE CHAT

How is social media influencing financial decisions, particularly among GenZ?

■ Social media has become part of our everyday lives. We see someone vacationing, buying a house or purchasing a car and start comparing their lives with ours. When we feel inadequate, we often try to make ourselves feel better by shopping online or ordering food. Initially, this comparison may be aspirational. But when we work hard and see our salaries increase by only 5 per cent, 6 per cent or 10 per cent annually, those same videos can make us feel worse about ourselves. That is when aspiration can turn into a fear of missing out, impulsive spending and, in some cases, debt.

How can youth break the cycle of comparison and overspending?

■ The first step in financial planning is to understand where one stands financially and where one wants to be. Financial planning should be linked to life planning. Calculate your financial independence target and identify your other goals, whether buying a car or a house, getting married, supporting your parents or funding your children’s education. Write these goals down and plan for them. I am not saying people should stop spending or enjoying life. Spend your money, but understand how much you can afford to spend. When you know your financial goals are being taken care of, you can enjoy spending without constantly worrying about the future.

Should young earners start investing with their first paycheck, or build an emergency fund first?

■ The younger cohort should not rush into investing before focusing on their personal development. If you are under 20, prioritise developing your skills, improving your personality, maintaining your health, spending time with family and friends, and exploring the world. These investments in yourself can potentially improve your earning capacity far more than putting a small amount into a financial product at that stage. Once you have developed these foundations and can save consistently, you can start investing with even ₹500 or ₹1,000 a month. A simple index fund or mutual fund can be a starting point, provided you understand the risks and suitability of the investment.

Doesn’t starting early give investors a greater benefit from the power of compounding?

■ Compounding is important, but we often look at it too narrowly. Suppose you spend ₹5,000 on an artificial intelligence (AI) course that helps you develop a skill, improve your confidence and secure a better job or client. The additional income you earn over the next decade could potentially outweigh the returns from investing that amount alone. This is why I believe people under 20 should focus on themselves first. Once they are earning, saving consistently and ready to invest, they can begin with simple financial products and allow compounding to work over time.

With AI reshaping careers, how important is it to have a second source of income?

■ Job losses are happening, sometimes on a significant scale. These developments can be frightening, but we should not assume that AI will only destroy jobs. New opportunities will also emerge. Instead of reacting entirely out of fear, focus on improving your position. Upgrade your skills, become more efficient at your current job and explore opportunities to freelance alongside your employment. Once your additional work or business becomes sustainable, you can consider making a transition. Building a second income stream can be useful, but strengthening your existing skills and employability should come first.

EMI the biggest enemy of financial freedom, says Anant Ladha

ABHINAV RANJAN
New Delhi, 26 October

The first ₹1 crore is always earned through active income and skills, said Anant Ladha, financial educator and creator, in a conversation with Khushboo Tiwari at the *Business Standard* BFSI Insight Summit 2026’s Smart Investor Arena on Monday.

He said “the biggest asset class available right now is ourselves”, but people often fail to invest in themselves. He urged young people to focus on building their skills and increasing their active income to reach the first ₹1 crore.

“As a youngster, if you are not investing in yourself and your active income, you will not be able to reach the first ₹1 crore mark. Once you reach that mark, the journey from ₹1 crore to ₹10 crore may be comparatively easy,” he said.

Ladha said that while the younger generation’s SIPs and saving habits have no competitor in terms of asset classes, their biggest competitor is their lifestyle. Equated Monthly Instalment (EMI), he said, is the biggest enemy of financial freedom.

“We want financial freedom, but we are not able to get ourselves free from our own EMI,” he said during the discussion on How should young Indians approach wealth creation?. “Inflation may be at 6 per cent, but the lifestyle inflation among India’s youth is at 15-20 per cent.”

Ladha advised people not to treat every investment option as either completely good or completely bad. He said that "it is fine to explore new asset classes, but take risks only when you can afford them and understand what you are investing in.”

“Spending is not necessarily a problem. The risk arises when expenses and debt become excessive,” Ladha said, adding that he never recommends taking a loan against investments to meet daily expenses.

“The consumption market in India is growing at a great pace because of changing habits, and that is a good thing. Someone’s expenditure is someone else’s income. Spending is good for the economy, provided it is not funded by debt,” he said.

On portfolio diversification, he said that an investor may consider allocating around 5-10 per cent of funds to international markets. At the same time, he said that fixed deposits (FDs) are not bad investments. “What matters is the asset allocation. Different investments serve different purposes.”

“INFLATION MAY BE AT 6%, BUT THE LIFESTYLE INFLATION AMONG YOUTH IS AT 15-20%”

ANANT LADHA, Financial educator and creator

“An FD may provide stability when equity markets are weak, while equities may be more suitable for long-term goals. The right choice depends on the investor’s time horizon, goals, and risk tolerance. Listed bonds, non-convertible debentures and structured products also carry different risks, which investors should understand before investing,” he said.

Responding to a question on the prolonged Indian market consolidation, Ladha said that investors need to understand that markets move in cycles. “This kind of shift is normal. An economy and its companies cannot grow at the same pace forever. Investors need to understand that earnings growth and market returns change over time. They should not assume that recent performance will continue indefinitely,” he said.

“We should try to make decisions logically and use historical data, rather than reacting to every market move,” he advised.

‘Retail participation has been very strong in India’

Business Standard Smart Investor Arena

“IF YOU TAKE ANY DECADE ACROSS THE GLOBE, IT’S ALWAYS EQUITIES THAT HAVE DELIVERED THE MAXIMUM RETURNS AS AN ASSET CLASS”

VIKAS SATIJA, MD & CEO, Shriram Wealth

Q&A Long-term investors don’t need to be worried about the present volatility and when it comes to jobs in the wealth management industry, **Vikas Satija**, managing director and chief executive officer, Shriram Wealth, said in an interaction with **Pravin Palande** at the *Business Standard* BFSI Insight Summit 2026 Smart Investor Arena in Mumbai on Monday. The industry is growing fast and, even with artificial intelligence (AI) coming in, the need for relationship managers (RMs) and wealth managers is only going to increase, he said. Edited excerpts:

Do you actually start your day looking at where the Nifty is, where oil prices are? Is it like that?

■ I think you want to watch the key barometers — you want to check how the oil price is behaving. Where is forex at the moment? What happened to the US markets yesterday? Are there any policy decisions which are coming in? I think these are all short-term numbers to be seen. I don’t think one needs to get paranoid about markets that overnight.

The long-term objectives have to be still set up on asset allocation, and long-term asset allocation is what drives portfolios. So I keep telling clients: Don’t get so jittery if you see some movement here and there. Yes, if there is a structural movement, you need to see it. But if it’s a movement momentarily for news which has flown last night, don’t get so worried about it. I think long-term investors will still have a better bet to be in the markets.

Since 2024, the markets have become volatile — especially after the West Asia crisis. How have your investors behaved and what is it that you are telling them?

■ Let me just take you back to some history. First, look at the ’90s — you had the Asian crisis, 2008 you had the Lehman crisis, 2020 you had Covid and, in between and in the last two years markets have not performed. The US might have done better; Korea doing better was the AI-player. I think the thesis in various markets at various points of investment still remains intact.

The good part I think this time in the markets, which we see here in India, is that retail participation has been very strong. And if you see this, it’s the SIP (systematic investment plan) numbers — the way it has been, it’s been consistent, it’s not gone down even till now. If you look at the growth, it has been consistent and I think that speaks volumes. I think everybody is looking at various opportunities and trying to rebalance portfolios based on how the markets are behaving.

Post-Covid we have seen that the risk-taking ability of an average Indian has gone up. How do you explain that?

■ Equity investments are a very small portion of the total investments as far as the savings of Indians are concerned. I think what’s good is, as I mentioned, systematic investment plans have made sure that the retail participation increased, and I think that’s the right way to go ahead. Which is the reason you see equity participation going up long term. And forget about just Indian markets — globally if you take any decade across the globe, it’s always the equities which have delivered the maximum returns as an asset class.

How much does age matter? Do you follow that rule where you say that the older you are the more you stay in conservative assets?

■ In the earlier times, when all of us were growing up and studying, I think there used to be one thumb-rule everybody used to follow: Whatever is your age, minus (it) from 100, and that should be the debt and equity allocation to go by.

I think the times have changed. People have understood that ‘I need an X amount of liquidity and money for my day-to-day living. Beyond that, if I have a decent amount of cash flows, I can take higher risk’.

So coming back to your point – what risk I could have taken at 25–30. Obviously I had an earning capacity ahead. Maybe at 60 it has not come down – it may go up – because at that point of time if I have enough savings which is taking care of my day-to-day needs and I still want to maximize wealth and leave a legacy for my family, I may want to do it. So if you look at typical HNI and UHNI (high and ultra-high net worth individual) portfolios, you won’t see that the equity component is coming down.

I think it’s about asset allocation at that point of time – what is the financial goal which I have in mind and what is the risk appetite basis that.

Earlier around 2012 we have seen bankers and distributors selling derivative products even to older people who did not understand the risks. Do you think in today’s world bankers and distributors have become very conscious about these things?

■ I think it’s very important to be cautious about the same because at the end of the day derivatives have to be played by institutional players. As individuals, if I have to go and use options, I think it has to be used more for hedging part of the business or (if) at certain places I have more than X amount of corpus and I want to play around by playing into premiums. Ideally, I think from a retail investors’ point of view, the right thing has to be to be making long-term investments directly into instruments which are long-dated. Let’s not try the derivatives options to do that. And I think if you look at the regulators, I think whether it’s Sebi (Securities and Exchange Board of India), whether it’s the National Stock Exchange, they’ve been coming again and again saying it’s not a play for the retail investors — avoidable as much as possible.

How is your firm using AI and how is it going to help your RMs, and, say maybe three years down the line, how do you see this space evolving as an AI-plus advisory?

■ I think what artificial intelligence brings on the table, and what people have to realise, is that you can get any and every data that you want across the table in a few minutes – which we would have taken hours together to put it on Excel. Will AI change over and remove the RM? No. Relationship management is still going to stay. I don’t think that is going to change. It’s the mundane operational jobs or certain jobs which were there to put across on Excel — I think those will go.

Do youngsters have a career in finance and markets in a world of AI? How do you look at it?

■ Oh, big time. It again depends upon which part of the segment you are getting in. If you’re coming into a segment of operations, if you’re getting into a separate session where it’s going to be more back- office, I think those jobs will keep getting reduced. But relationship management, if you look at fund management, I think these things will continue to grow. I don’t think so there is a problem. And look at what’s happening in India — the kind of wealth management firms are entering in today, the kind of opportunities which it is throwing about, is crazy.

Today even after so many years we have only 15 per cent of our wealth which is getting professionally managed. The same number globally is at 60 to 70 per cent. So there’s no reason why India would not show this, and that’s the reason why you’re seeing so many wealth management firms entering it.

Would you hire people with psychology degrees? Because maths, finance — a lot of these things – would be moving to AI, but understanding the psychology or behavior of clients may not...

■ It’s a very interesting point you’re bringing about. We’ve not thought through on those lines, but frankly speaking I think more and more that will become prevalent and important, especially in our wealth industry, because the relationship will matter — how well I can understand the client’s intrinsic value and understand what the client is looking for. I think that becomes important. Not that it was not important, but we never thought on the lines that we should be hiring people with a psychology background. I think it will become an important part. So behavioral sciences will become a far more important part in this business.

Roongta: Personalised investment advisory ensures accountability

SANJAY KUMAR SINGH
New Delhi, 26 October

“KNOWING THE REMUNERATION MODEL HELPS ASSESS THE QUALITY OF THE ADVICE YOU ARE LIKELY TO GET”

“DO NOT EXPECT AN ADVISOR TO DELIVER HIGHER RETURNS WHILE PREVENTING LOSSES WHEN MARKETS FALL”

HARSH ROONGTA
Founder, Fee Only Investment Advisers LLP

Retail investors with adequate resources should always prefer financial advice that is personalised in nature, said Harsh Roongta, founder, Fee Only Investment Advisers LLP during a fireside chat with Vedant Vichare at the *Business Standard* BFSI Insight Summit 2026 Smart Investor Arena in Mumbai on Monday.

When selecting an advisor, investors should ensure that the individual has a long-term stake in the relationship, Roongta added, while sharing insights on what young investors should focus on before starting their investment journey. Roongta, a Sebi-registered investment advisor laid emphasis on ensuring that one is adequately insured and in the habit of saving a portion of their salary before embarking on investments in equity.

Talking about investment advisory, Roongta said the biggest value addition that an advisor provides is behavioural in nature, offering the analogy of a personal fitness trainer. When a trainer rings the doorbell at 7 am, he nudges the client to get up and exercise. He also encourages the client to put in extra effort, shares new developments, and removes flaws that may creep into the exercise routine. “An advisor provides similar encouragement, discipline and emotional support in financial matters,” Roongta said.

FIRESIDE CHAT

An ideal advisor will aim for optimisation instead of maximisation of returns. “He should push you towards a plan that offers a higher probability of achieving a moderate return over the long term, rather than towards one that tries to maximise return but increases the risks,” he said.

Since customised advice takes considerable time it comes at a higher cost, Roongta said. “Its high cost has made personalised investment advice an elitist profession, despite advisors looking to help more people,” he conceded.

He asked investors to have a transparent conversation about the advisor’s compensation structure. “Knowing the remuneration model helps assess the quality of the advice you are likely to get,” he said.

Driving home the point of personal investment in a relationship, Roongta vehemently opposed taking investment advice from bank relationship managers (RMs) since they may no longer be there when you visit the branch the next time.

He was also skeptical about receiving advice from unregistered online advisers. “They are likely to provide generic, rather than customised advice. Who will determine whether the generic advice they are offering is suited to your circumstances?” Roongta said.

Investors must also set the right expectations for their advisors. “Do not expect an advisor to deliver higher returns while preventing losses when markets fall,” Roongta said. When investors have unrealistic expectations, they attract people who promise outcomes they cannot deliver, he added.

Before starting their investment journey, investors should derisk by repaying their loans and buying requisite protection plans.

“Repaying any outstanding loan should be the priority. Also obtain all the right types of insurance — term, health, critical illness and disability insurance,” he said.

“While equities can offer higher returns, the returns are not consistent. They could even be negative in some years. Just as you would not borrow to invest in equities, similarly, you should not invest in equities before you have repaid your loans,” he added.

Developing the habit of saving at least 20-30 per cent of income should come next. Young investors should focus on saving instead of worrying about investment returns. “Returns on a small initial investment are unlikely to change your life, but the saving habit will,” Roongta said.

‘Tokenisation offers common ledger for real-world assets’

“IN AN INCREASINGLY CHAOTIC WORLD, IT IS BETTER TO HAVE MORE HEDGES. THAT’S THE BACKGROUND DRIVING ALL OF THIS”

EDUL PATEL, Cofounder & CEO, Mudrex

Q&A Tokenisation, the idea of recording real-world assets such as bonds, real estate and gold on a shared digital ledger, is fast emerging as one of the most talked-about shifts in finance, with the promise of making investments more accessible, liquid and cheaper. In a conversation with **Ajinkya Kawale** at the *Business Standard* BFSI Insight Summit 2026 Smart Investor Arena, **Edul Patel**, cofounder and chief executive officer of Mudrex, talks about what tokenisation means for Indian investors, where the opportunity lies, and the role regulators will play in building trust. Edited excerpts:

How would you explain tokenisation to investors?

■ Before we talk about what tokenisation is, the underlying difference is this: We are saying that these financial assets will be logged, made available, traded and transacted on a new technology infrastructure that is decentralised, and as a result more accessible, and available on a platform that is cheaper and easier to offer. I can start off with some examples of what this means. Today, most of the bond offerings that people get access to in the debt markets are secondary offerings. Primary issuance is very limited, and the secondary market lacks liquidity. As a result, all the newer, younger platforms that come in are effectively resellers of those bonds. That reduces liquidity, because the same bond is being sold in different places and effectively multiple markets are being maintained. So there is no liquidity, there is no transparency in pricing, and accessibility to the same bond also goes away. The promise of tokenisation is that all of this coordination, where different sellers are selling can happen on a single common ledger, just like how equities in the country get traded on a common, single ledger in the format of an exchange.

At what point would investors be able to transact using tokenised assets?

■ The time frames for different asset classes vary. Tokenisation now enables us to divide our wealth across non-correlated asset classes, offering greater protection and security through portfolio diversification. That’s fundamentally why you should invest across a wide set of asset classes. Otherwise, your portfolio becomes too concentrated. In an increasingly chaotic world, it is better to have more hedges. That’s the background driving all of this. Some formats of these assets are already available. Today, you can’t do tokenised real estate or tokenised Indian equities because the regulatory pathway is still evolving.

How important is the element of trust when it comes to tokenised assets?

■ In India, trust in an asset comes from the regulatory umbrella and the regulatory coverage around it. People don’t trust buying land from someone until they’ve done a year-long study of every ownership transfer in its history. This is going to be no different, so the regulatory and enforcement infrastructure around it is important. I believe our regulators are among the finest in the world, because they constantly have to balance opening up access to new-age infrastructure with making sure nothing goes wrong for India’s mass populace. It’s up to builders to help drive the conversation.

‘CEOs need to pay more attention to succession’

RUCHIKA CHITRAVANSHI
Mumbai, 26 October

Succession and transition is a critical area to which founder CEOs need to pay more attention to create institutions that go beyond their leadership, Joydeep Sengupta, senior partner at McKinsey & Company and co-author of the book *Shapers and Founders : The Untold Stories of Asia’s Extraordinary Owner CEOs*, said on Monday.

Speaking at the *Business Standard* BFSI Insight Summit 2026, Sengupta said: “Our research shows that two-thirds of them (owner-CEO) don’t manage the succession very well. Sometimes they look for folks who are in their own image, or sometimes they leave it too late, you know. And sometimes they find it hard to let go.”

Sengupta said managing talent is going to be the critical factor and the difference between winning and not. “The way founder-CEOs manage talent is dramatically different, somewhat uncomfortable for those of us who have grown in professional environments, but it is extraordinarily effective,” he added.

Referring to his book, Sengupta said talent was the single biggest issue for most of the founders except for those in India.

Reshaping for AI

On the technological transformation happening through artificial intelligence (AI), he said the attributes of the successful owner-CEOs such as being comfortable with uncertainty, making quick decisions are becoming increasingly more important amid complexity of politics and the pace of technology evolution.

“People are willing to take decadal views on the fact that this technology will transform, recognising that every day you need to navigate the mess that comes with it,” Sengupta said.

He added that in an environment where AI is rapidly reshaping the workforce, reshaping the opportunity would require skills to take big bets, think about risk management differently and innovate at pace. “Many of the founders that we talk about and the mindsets that they demonstrate are going to be very valuable for us,” Sengupta said.

The book has interviewed 30 founder CEOs across Asia, including Kotak Mahindra Bank’s Uday Kotak, Reliance Industries’ Mukesh Ambani, Mahindra & Mahindra’s Anand Mahindra, Biocon’s Kiran Mazumdar Shaw and Nykaa’s Falguni Nayar among others from India.

“THE WAY FOUNDER-CEOs MANAGE TALENT IS DRAMATICALLY DIFFERENT, SOMEWHAT UNCOMFORTABLE FOR THOSE OF US WHO HAVE GROWN IN PROFESSIONAL ENVIRONMENTS, BUT IT IS EXTRAORDINARILY EFFECTIVE”

JOYDEEP SENGUPTA
Senior partner, McKinsey & Company

Cap on cancer drug margins may not lower medical bills

Benefit could be limited as patient-assistance programmes have been left out: Experts

SANKET KOUL
New Delhi, 26 October

Cancer patients may not gain proportionately from the Centre's decision to cap trade margins at 30 per cent of the maximum retail price (MRP) for 137 anti-cancer drugs.

The concern is on account of the fact that the patient-assistance programme (PAP) has been left out of price calculations.

PAPs are manufacturer-funded programmes offering free or discounted medicines to eligible patients.

The revised prices take effect on November 9.

"The trade-margin cap is unlikely to reduce costs for patients enrolled in PAPs, because their medicines are already being provided free or at heavily discounted rates," said Tanvi Singh, medical oncologist at MOC Cancer Care, Pusa Road, New Delhi.

She said patients buying medicines outside PAPs, such as through hospitals or pharmacies, would benefit more.

PAPs can reduce expenditure by 30-60 per cent for some expensive immunotherapies and targeted therapies.

Officials told *Business Standard* the intervention could reduce MRPs by 20-70 per cent, depending on the existing prices, generating estimated annual savings of ₹2,500 crore.

"PAPs are market-expansion strategies which operate by providing discounts or buy and get some free deals", said Malini Aisola, co-convener of the All India Drug Action Network (AIDAN).

She said excluding PAP volumes understated trade margins and diluted MRP reductions. Aisola also questioned the methodology, calling markups of 42.86 per cent in direct hospital sales or shorter supply chains "extremely liberal".

According to the notification of the National Pharmaceutical Pricing Authority (NPPA), the 30 per cent cap on the MRP, excluding goods and services tax, translates into a 42.86 per cent markup on the price to a stockist or distributor (PTS/PTD).

PAP arrangements vary by manufacturer, distributor, eligibility and treatment cycle, making their overall scale difficult to quantify. Free quantities supplied under qualifying PAPs are excluded from price calculations.

Drug	MAT (in ₹ cr)	Included in NLEM/TMR list
Mycophenolate mofetil*	438.51	NLEM
Bevacizumab	426.47	TMR
Nivolumab	366.76	TMR
Trastuzumab	330.35	NLEM
Tacrolimus*	301.06	NLEM
Rituximab	276.72	NLEM
Adalimumab*	236.07	NA#
Filgrastim*	203.12	NLEM
Abiraterone acetate	191.25	TMR
Paclitaxel	184.73	NLEM

MAT: Moving annual turnover, or the rolling sales figure over the last 12 months (until Sept 2026); NLEM: National List of Essential Medicines; TMR: Trade Margin Rationalisation; *Drugs not primarily used for cancer treatment only; sales figures may include other inidications; #Not listed in either NLEM or the TMR list
Source: Pharmarack

Lack of a fail-safe

The NPPA requires manufacturers seeking PAP exemption to maintain records on the identity of the patient, diagnosis, dosage and medicines received and consumed, alongside undertakings on accuracy.

"The authority can seek further detail, conduct audits or inspections, and verify programmes through third-party agencies," the senior official quoted above said.

Manufacturers must also report PTS/PTD and MRP data through the NPPA's Integrated Pharmaceutical Database Management System (IPDMS) and submit revised price information within seven days of the notification, even where MRPs remain unchanged.

In an affidavit before the Supreme Court, the Centre acknowledged hospital markups of 170-700 per cent or more on anti-cancer drugs and 100-1,000 per cent or more on medical consumables. It said it lacked the data to assess hospital-supply margins and would need to compare procurement prices with patient charges before considering further controls.

Mandeep Singh Malhotra, director of surgical oncology at Delhi's CK Birla Hospital, said hospitals and doctors often facilitated PAP enrolment and administration, while eligibility and benefits varied.

"An independent verification of sales data, transparent disclosures and periodic audits would help ensure the exemption did not obscure commercial sales or dilute intended price reductions," he added.

Only three top-selling drugs covered by new cap

Six of India's 10 top-selling anti-neoplastic drugs in the retail channel are price-capped under the National List of Essential Medicines (NLEM).

According to Pharmarack, only three top-selling cancer drugs by moving annual turnover (MAT) as of September 2026 — bevacizumab, nivolumab and abiraterone acetate — are covered by the new trade-margin rationalisation (TMR) order.

Industry estimates put hospitals' share at nearly 70 per cent of cancer-drug sales. Retail rankings exclude institutional sales and PAP distribution. "Margin capping and price capping are two different things. The former includes drugs whose MRP could still be raised by 10 per cent every year with only the trade margin being capped," a Delhi-based pharma executive said.

A single 10-millilitre injection of nivolumab costs ₹1.09 lakh. Its trade margin may be capped at 30 per cent of the MRP, but the MRP can still rise under the Drug Pricing Control Order (DPCO).

The exercise follows a 2019 pilot covering 42 non-scheduled anti-cancer drugs, reportedly generating ₹984 crore in annual savings across 526 brands.

Concerns also persist that hospitals could offset the lost pharmaceutical margins through higher admission or chemotherapy charges. An executive at an unlisted hospital chain in the Delhi-National Capital Region said reducing one revenue component without addressing underlying costs would require recalibrating economics elsewhere.

Do not release provisional Census data to press: RGI to states

The Registrar General of India (RGI) has directed its country-wide units in states and union territories not to use or release to the press any data or population figures collected during the Census 2027.

RGI and Census Commissioner Mrityunjay Kumar Narayan also underlined that information collected during Census operations is confidential and protected under the provisions of the Census Act, 1948. PTI

Mkts rebound after 4-day slump

PRESS TRUST OF INDIA
Mumbai, 26 October

Snapping the four-day losing streak, the benchmark stock index Sensex jumped 483 points and the Nifty closed above 22,750 on Monday on value buying and a rally in metal, telecommunication, and healthcare shares.

Recovering from early losses, the 30-share BSE Sensex ended 482.92 points, or 0.66 per cent, higher at 73,606.75. During the day, it hit a high of 73,606.75 and a low of 72,514.57, a range of 1,092.18 points.

The 50-share NSE Nifty rallied 153.20 points, or 0.68 per cent, to settle at 22,753.20, ending its four-day slide.

Sensex tanked 1,605 points, or 2.16 per cent, while Nifty fell 546 points, or 2.38 per cent, in four straight sessions through Friday.

Of the 30 Sensex firms, Adani Ports jumped the most, gaining 2.72 per cent. Eternal jumped 2.56 per cent, Kotak Mahindra Bank by 2.53 per cent, Trent 1.73 per cent, Tata Steel 1.52 per cent, Bharti Airtel 1.43 per cent, InterGlobe Aviation 1.39 per cent, and ITC by 1.24 per cent.

Bajaj Finance, HDFC Bank, Maruti, HCLTech, and Power Grid were the laggards.

Indian equities recovered from early losses, supported by value buying and strength in metal, power, and healthcare. However, elevated crude prices, geopolitical uncertainty and caution ahead of the Fed, ECB (European Central Bank) and BoJ (Bank of Japan) policy decisions kept sentiment measured.

"Mid and smallcaps also witnessed some recovery after last week's sharp correction, although investors remained selective, favouring earnings visibility and valuation comfort," Vinod Nair, head of research, Geojit Investments Limited, said.

Brent crude, the global oil benchmark, declined 1.60 per cent to $114.8 per barrel.

The BSE Midcap Select index jumped 1.48 per cent and SmallCap Select index was up 1.45 per cent.

Among BSE sectoral indices, metal jumped 2.55 per cent, telecommunication 2.07 per cent, healthcare 1.85 per cent, services 1.79 per cent, energy 1.49 per cent, commodities 1.43 per cent and capital goods 1.35 per cent. MidSmall Private Banks, Insurance, Private Banks index and Housing Finance were the laggards.

"Indian equities recovered from a weak opening and snapped a four-session losing streak, with the Nifty closing at 22,753.20. The rebound was triggered by buying near the recent support zone, a pullback in crude from last week's high and strength in healthcare and select heavyweight stocks," Hariselvan Radhakrishnan, founder & chief executive officer (CEO) of HST Wealth, a research analyst firm, said.

The recovery, however, remains tentative, with elevated crude oil prices, geopolitical uncertainty and concerns over the global interest-rate outlook continuing to weigh on sentiment, Ajit Mishra, SVP Research, Religare Broking, said.

In Asian markets, South Korea's Kospi and Nikkei 225 ended lower, while Shanghai's SSE Composite index and Hang Seng index settled in positive territory.

Markets in Europe were trading higher. The US markets ended lower on Friday.

Foreign portfolio investors (FPIs) bought equities worth ₹887.65 crore on Friday, according to exchange data.

Benchmark bond yield nears 7.5% on oil, US cues

ANJALI KUMARI
Mumbai, 26 October

Government bond yields rose on Monday as persistent selling pressure, elevated crude oil prices and firm US Treasury yields weighed on the market.

Yield on the benchmark 10-year government bond rose to 7.48 per cent, its highest level since October 21, 2022, from 7.47 per cent on Friday.

"We might soon touch 7.5 per cent and the yield will then move towards 7.75 per cent," a dealer at a primary dealership said.

Brent crude futures were trading at $114.93 per barrel, down around 1.8 per cent from Friday's settlement of $116.72, after touching $117.41 earlier in the session. The pullback followed a rally of more than 6 per cent last week amid concerns over disruptions to West Asia oil supplies.

However, crude prices remained elevated amid continuing geopolitical risks.

The benchmark 10-year government bond yield has risen 95 basis points (bps) over the past year and 90 bps so far in the current calendar year. It is up 30 bps in October and 82 bps since the Iran war began.

The five-year government bond yield also rose to 7.21 per cent. It has increased 106 bps over the past year and 90 bps so far in the current calendar year.

The rupee, meanwhile, remained under pressure, moving between 94.9050 and 95.2650 against the US dollar during the session.

It initially strengthened before weakening as dollar demand from importers and concerns over elevated crude prices weighed on the currency.

The fading support from inflows linked to the Jio Platforms initial public offering also added to the pressure.

The rupee is likely to remain under pressure due to elevated oil prices and sustained importer demand for dollars.

Market participants expect the currency to trade in the 95-95.5 per dollar range in the next session, with dollar demand from oil companies and foreign portfolio investors likely to keep the greenback supported. The one-year forward premium eased to 4.05 per cent.

Jio BlackRock launches Advantage World Equity Fund

Jio BlackRock International AMC (IFSC) on Monday announced the launch of Jio BlackRock Advantage World Equity Fund, which will offer investors access to a globally diversified equity portfolio.

Jio BlackRock International AMC (IFSC) is a wholly owned subsidiary of Jio BlackRock Asset Management.

The new Jio BlackRock Advantage World Equity Fund (IFSC) is an open-ended fund-of-funds retail scheme and is designed to provide investors access to global equity markets through a feeder-fund structure that invests primarily in the BlackRock Advantage World Equity Fund, a globally diversified active equity strategy, the firm said.

The minimum initial investment in the fund would be $5,000, and $1,000 would be the minimum additional investment. About 90-100 per cent of the investments would be in units of the underlying BlackRock Advantage World Equity Fund. The launch will widen access to investment opportunities for Indian investors by giving a path to global markets through GIFT City, it added.

The fund has a history of over 8 years and seeks to complement investors' domestic portfolios with exposure to global firms, sectors and long-term growth across developed markets, including the US, Europe and Japan. PTI

Jio Platforms IPO falls short of record payday for bankers

BLOOMBERG
26 October

Jio Platforms raised a record amount of funds for billionaire Mukesh Ambani's digital and telecommunications giant, but it proved to be far less lucrative for the bankers handling the deal.

The company is paying about ₹196 crore ($20.7 million) in fees to the 19 banks on the roughly $3.1 billion IPO, according to filings. That amounts to about 0.65 per cent of the issue size, trailing the fee pools of several previous offerings in India.

Fierce competition among investment bankers in India has compressed fees, particularly for marquee deals. Firms are often willing to accept thinner economics for a coveted role on high-profile transactions. The payoff can instead come through league-table rankings, bragging rights and credentials that help win the next big pitch.

That's a far cry from the days when Hyundai Motor India paid about ₹490 crore to bankers for its then-record ₹27,800 crore IPO in 2024. Paytm parent One 97 Communications paid about ₹320 crore for its ₹18,300 crore offering in 2021, while Swiggy Ltd handed out about ₹280 crore for its ₹11,300 crore share sale.

Those types of windfalls have been elusive of late. National Stock Exchange of India, another blockbuster IPO this year, paid about ₹190 crore to a syndicate of 20 banks that worked on its roughly $2.4 billion offering, equivalent to about 0.8 per cent of the issue size. Bankers split fees of just ₹4.63 crore for SBI Funds Management of India's billion-dollar offering in July.

Investor enthusiasm, meanwhile, has been anything but restrained. Jio's IPO was fully subscribed within the first 100 minutes of bidding and had attracted bids for nearly 22 times the shares on offer by Friday, according to BSE data.

Top IPOs & how much i-bankers earned

	Bankers' fee (₹ crore)	% of issue size
Hyundai Motor India	493	1.77
One 97 Communications	324	1.77
Swiggy	275	2.43
Eternal	229	2.44
LG Electronics India	226	1.95
Jio Platforms	196	0.65

EAAA India IPO booked 11% on Day 1

The initial public offering (IPO) of EAAA India Alternatives, an arm of Edelweiss Financial Services, was subscribed 11 per cent on the first day of bidding on Monday. The IPO got bids for 5,89,347 shares against 52,99,684 shares on offer, according to NSE data. PTI

YOUR MONEY

Don't let erroneous hospital records hold up your claim

SANJAY KUMAR SINGH & KARTHIK JEROME

When 76-year-old Madhu Sawhney entered Max Super Speciality Hospital, Shalimar Bagh, New Delhi, on December 23, 2023, an emergency assessment incorrectly recorded that she was suffering from chronic kidney disease. Her treating doctor later clarified she had no history of renal dysfunction, and the hospital corrected the entry. Sawhney held two Niva Bupa Platinum policies. Between January and April 2024, the insurer sought further records, including a doctor's affidavit about the entry, before rejecting her claim.

In *Madhu Sawhney vs Niva Bupa Health Insurance Co Ltd & Anr.*, the District Consumer Disputes Redressal Commission-VIII (Central), Delhi, ruled in her favour.

"The Commission found that the insurer had not adequately explained why the documents provided were insufficient to process the claim," says Sonam Chandwani, managing partner, KS Legal & Associates.

The verdict holds important lessons for policyholders. "While insurers can verify claims, they must make reasonable, evidence-based document requests and cannot indefinitely delay decisions over paperwork that has already been supplied or cannot reasonably be obtained," says Arun Ramamurthy, cofounder, Staywell.Health.

Medical records matter

A claim rests on more than the hospital bill. Insurers also scrutinise the initial diagnostic note, the discharge summary and, in many cases, doctors' internal daily case reports. "The doctor's written records determine whether a claim is paid," says Kapil Mehta, cofounder, SecureNow.

At the same time, errors in hospital records are not uncommon. Discharge summaries deserve particular attention. "They are often written by a junior doctor who may not be the treating doctor," says Mehta. Such errors often prompt insurers to investigate claims, delaying settlement.

Spot errors before submission

Check the medical records carefully, particularly the discharge summary. "Read what the doctor writes before it is submitted to the insurance desk," says Shilpa Arora, cofounder and chief operating officer (COO), Insurance Samadhan.

If you spot an error, approach the hospital's medical records department and treating doctor promptly. The hospital should ideally issue a fresh discharge summary. Alternatively, obtain a letter. "It should explain why the mistake occurred and state the correct medical position," says Mehta.

The correction should be formally authenticated. "It should be on letterhead and should be dated, signed and stamped by the treating doctor or an authorised hospital representative," says Arora.

The correct medical position should be supported by relevant investigation reports. Send the documents to the insurer with a written request to reconsider the claim, and retain proof of submission.

Essential documents

For cashless treatment:
Insurance card, identity proof, medical records

For reimbursement:
Claim form, discharge summary, itemised bills, payment receipts, prescriptions, investigation reports, relevant medical records

Errors to avoid:
Missing bills, incomplete forms, inconsistent records, incorrect diagnoses

Source: Staywell.Health

When demand is justified

An insurer may at times reasonably seek additional documents that are relevant to the claim. "The question is whether a further request helps verify the claim or creates an unnecessary procedural hurdle," says Chandwani.

Mehta adds that generally a doctor's affidavit is unnecessary if the doctor has already confirmed the correct position on letterhead. "Respond to reasonable requests and submit missing evidence promptly. Keep a record of every request and your response," says Arora.

Seek an explanation

If the insurer delays, partly pays or rejects your claim, or makes a deduction, ask for a specific written explanation. The insurer should clarify whether the claim is pending submission of documents, partly settled or rejected.

"Ask for a written explanation identifying the specific policy clause relied upon," says Chandwani.

If the issue remains unresolved, lodge a complaint with the insurer's grievance redressal officer. Grievances should ordinarily be resolved within 14 days. If the response is unsatisfactory, escalate the complaint through the regulator's Bima Bharosa portal. You may also approach the Insurance Ombudsman within one year of the insurer's rejection or unsatisfactory response, or after one month without a response to your written representation. Alternatively, approach the appropriate Consumer Commission within two years of the date the cause of action arose.

THE COMPASS | DECODING MARKET DIRECTION

Muted asset quality outlook may weigh on Shriram Finance stock

DEVANGSHU DATTA

Shriram Finance reported mixed numbers in the July-September quarter of 2026-27 (Q2 FY27). It is likely to miss the previous guidance on credit costs and asset quality deterioration is a serious concern. The management believes that high credit costs will continue through the second half of FY27 but estimates this is a temporary, near-term issue.

While the market reacted negatively selling the stock lower (down over 8 per cent to ₹823.50 apiece post results), some analysts pointed to strong net interest income (NII) growth, net interest margin (NIM) expansions, good pre-provision operating profit (PPOP) returns and assets under management (AUM) growth. AUM growth projections and guidances are moderate and may be exceeded.

An erratic monsoon and continuing stresses caused by the West Asia war are among the root causes for stress. Weak monsoons led to higher slippage and hike in credit cost guidance.

Among India's leading non-bank lenders, Shriram Finance's Q2FY27 profit after tax (PAT) rose 60 per cent year-on-year (Y-o-Y) to ₹3,680 crore and NII grew 40 per cent Y-o-Y to ₹8,410 crore. Other income grew 15 per cent Y-o-Y to ₹420 crore. The cost-to-income (C/I) ratio dipped 290 basis points (bps) quarter-on-quarter (Q-o-Q) to 22.9 per cent. The company's guidance is that the C/I ratio will normalise at 25 per cent and operating expenses/AUM will be around 2.5 per cent over the long term.

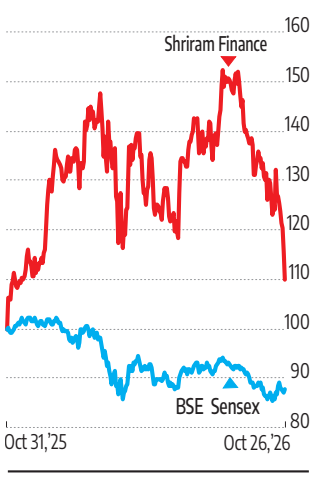
The PPoP grew 53 per cent Y-o-Y to ₹6,810 crore. Credit costs hit ₹1,880 crore, annualising at credit costs of 2.35 per cent compared to 1.9 per cent each in Q1FY27 and FY26. The FY27 AUM growth guidance was reset at a band of 15-17 per cent from 18 per cent earlier.

Disbursements grew 25 per cent Y-o-Y to ₹54,100 crore in Q2FY27 with AUM up 4.9 per cent Q-o-Q and up 17 per cent Y-o-Y at ₹3.29 trillion. Growth was driven by commercial vehicles (CV), passenger vehicles (PV), gold loans and personal loans, but growth in farm equipment, and two-wheelers (2W) was weak. Disbursement growth was supported by expansion to create an all-India footprint in the micro, small and medium enterprises (MSME) segment.

Shriram Finance is cautious in projections across drought-affected Maharashtra, Karnataka, and Telangana. Management cautioned credit costs could rise temporarily by 30-40 bps over the next one or two quarters due to seasonal stress in affected geographies, but there is a ceiling of 2.3 per cent for FY27 which will not be exceeded.

The asset quality outlook is cautious. Analysts are assuming higher credit costs alongside higher NIM and lower operating expenses. AUM and PAT could grow by high teens and over 30 per cent, respectively, over FY26-28, with return on asset (RoA) at 4.1 per cent and return on equity (RoE) of 13.7 per cent by FY28.

COMPANY: Shriram Finance
Base=100



Reported NIM improved 50 bps Q-o-Q to 9.52 per cent, due to utilisation of equity infusion proceeds received from Japan's MUFG on account of a stake purchase by the latter. Yields as calculated declined 10 bps Q-o-Q to 16.65 per cent while cost of borrowing as calculated declined 15 bps Q-o-Q to 8.47 per cent. The spread was 8.18 per cent as compared to 8.15 per cent in Q1FY27. The shift in the rate cycle following the hike in Reserve Bank of India's (RBI's) latest monetary policy makes earlier expectations of 100 bps reduction in cost of funds unlikely.

Management expects NIM to remain broadly stable at current levels over the next two quarters, before moderating to 9 per cent in FY28 and 8.5 per cent longer-term. The FY26 NIM was 8.2 per cent.

The market was spooked by rising credit costs. Gross Stage 3 (GS3) and Net Stage 3 (NS3) were held at 4.65 per cent and 2.3 per cent, respectively. Net slippages increased 12 bps Q-o-Q to 2.06 per cent (Q2FY26 was 1.6 per cent and Q12FY27 was 1.93 per cent). Stage 2 assets rose 10 bps Q-o-Q to 7.05 per cent from 6.95 per cent Q-o-Q and 6.9 per cent Y-o-Y. Write-offs amounted to 1.1 per cent of trailing 12 month AUM, of about ₹800 crore. The Stage 2 stress was visible in 2W, CVs, MSME, tractors, and gold loans. Stage 3 also rose in 2W, gold and personal loans.

The management said that monsoon stress has hurt production of rice, soybean, maize, cotton, and pulses, and West Asia tensions have led to fertiliser shortages. This is affecting rural consumption demand. The company is trying to diversify the rural portfolio into coverage of non-farm activities.

The lowering of AUM guidance and warnings about continued elevated credit costs have already resulted in a correction. Long-term credit cost guidance stays at 2 per cent, implying credit cost normalisation in FY28. Shriram Finance looks to double the gold loan portfolio over three years, increasing share of AUM to 5 per cent. MSME growth will accelerate but the segment has 28 per cent unsecured loans with stress concentrated in drought-affected regions. The proposed Irdai draft guidelines may result in reduction of insurance commission income by up to ₹100 crore (₹350 crore in insurance commissions was received in FY26).

While analysts have reduced target prices and downgraded earnings, many remain positive on the stock which trades at moderate valuations. According to *Bloomberg*, 35 of 36 analysts polled post results are bullish. Their average one-year target price is ₹1,129.

ASUSE to now track hurdles women entrepreneurs face

HIMANSHI BHARDWAJ
New Delhi, 26 October

The government's annual survey of unregistered businesses will, for the first time, ask about the constraints faced by women entrepreneurs and will move to an April–March financial year cycle from 2027, the National Statistics Office (NSO) said on Monday.

As part of a larger overhaul, the Annual Survey of Unincorporated Sector Enterprises (ASUSE) will introduce questions aimed to capture gender-specific constraints faced by female entrepreneurs in operating and managing their establishments.

"Such information can support a better understanding of the constraints faced by female-led enterprises and provide a useful evidence-base for examining the factors affecting their business operations," the NSO said.

It is also expected to broaden the scope of information available from ASUSE for analysing the challenges of female entrepreneurs and for informing policy discussions relating to women's participation in economic activity. Further, the new gender-focused questions are aimed at filling a data gap on the challenges faced by female-led enterprises.

Widening scope

- Gender-focused questions to be introduced
- Will move to an April-March financial-year cycle from 2027
- Switch to financial-year expected to align ASUSE with other enterprise surveys such as the ASI and ASISSE
- Jan-Mar '27 quarter to be surveyed using the existing questionnaire to avoid a gap in the numbers

ASUSE has so far tracked businesses over a calendar year. The 2027-28 round is proposed to run from April 2027 to March 2028.

The Ministry of Statistics and Programme Implementation (MoSPI) said this would bring ASUSE in line with other enterprise surveys, such as the Annual Survey of Industries (ASI) and the Annual Survey of Incorporated Services Sector Enterprises (ASISSE).

"Financial year alignment is expected to facilitate the use of survey information in conjunction with other economic statistics compiled on a financial year basis," the ministry added.

To avoid a gap in the quarterly numbers during the switch, the January-March 2027 quarter will be surveyed using the existing 2026 questionnaire.

The new cycle will begin in April 2027. NSO has put the draft questionnaire for ASUSE 2027-28 on the ministry's website. "The proposed changes seek to improve the policy relevance of the survey while retaining its role as a key source of official statistics on the unincorporated non-agricultural sector," the ministry added.

The draft also adds questions on the sources of electricity establishments use, to build a clearer picture of their energy arrangements. It also adds a question on investment in fixed assets over a longer reference period than the current schedule covers to provide a broader perspective on the investment trajectory of establishments.

"It will also enhance the analytical utility of ASUSE data for understanding investment patterns in the unincorporated sector," the NSO added.

At the request of the Ministry of Textiles, two questions have been included to identify handloom, power-loom and handicraft establishments.

"Taken together, the changes are intended to enhance the policy orientation of ASUSE and improve its responsiveness to the information needs of different ministries and other data users," the statistics ministry highlighted.

ASUSE has been conducted since 2021-22. The survey provides information on the characteristics and economic operations of unincorporated establishments. It contributes to the availability of data for economic analysis, policy formulation and national accounting purposes.

Decisions taken collectively: EC to SC

Poll body says didn't change Form 6, introduced separate declaration form

BHAVINI MISHRA
New Delhi, 26 October

The Election Commission of India (ECI) has told the Supreme Court (SC) that it did not change the statutory Form 6 used to enrol new voters, but introduced a separate declaration form during the Special Intensive Revision (SIR) of electoral rolls to help establish applicants' eligibility.

In a counter-affidavit filed on Monday, the poll panel also defended its decision-making process, saying the Commission's decisions are taken collectively and recorded in official files.

The affidavit comes amid allegations that Chief Election Commissioner (CEC) Gyanesh Kumar took key decisions relating to the electoral roll revision without the approval of the other two election commissioners, Sukhbir Singh Sandhu and Vivek Joshi.

The apex court had earlier said it would examine the Commission's records to determine whether decisions had been taken in accordance with the law. It also clarified that it had not approved any modification to Form 6.

Why the Form 6 dispute matters

Form 6 is the application used by eligible citizens to seek inclusion in electoral rolls. During the SIR, the ECI introduced an additional declaration, asking applicants to provide details linking themselves or their parents or grandparents to an earlier electoral roll. The petitioner has questioned the legality of this requirement, arguing that the prescribed form cannot be altered without following the statutory procedure.

The ECI, however, said the declaration was a separate document introduced under its SIR orders and not an amendment to Form 6 itself. It said the declaration was subsequently modified to make it easier for applicants to establish their links with earlier electoral rolls.

Under the revised procedure, applicants can provide details of themselves or their relatives appearing in previous electoral rolls.

Those unable to furnish such details must submit Form 6 along with the prescribed supporting documents, the Commission said.

The poll panel maintained that the changes did not alter the underlying requirements for voter enrolment.

Election body defends decision-making process

The affidavit also rejected allegations that decisions were being taken unilaterally by the CEC. It said the views, suggestions, and queries of individual election commissioners are considered during deliberations, but do not themselves constitute a decision of the Commission.

Under the Chief Election Commissioner and Other Election Commissioners Act, 2023, the ECI's business must, as far as possible, be conducted unanimously. Where the commissioners disagree, the matter is decided by majority.

The ECI said decisions are taken at meetings of the commissioners and recorded in official files.

Govt may extend duty-free cotton imports till Dec

SANJEEB MUKHERJEE & AGENCIES
New Delhi, 26 October

With cotton production projected to fall by 12-18 per cent in the new 2026-27 season that started in October to around 29 million bales (1 bale equals 170 kilograms), the Central government is poised to extend the duty-free cotton imports for another two months through December, trade sources and news reports said on Monday.

The move could cut costs for textile mills, curb domestic prices and boost imports from the United States, Brazil, and Australia. However, a section of the traders argues that the move (extending duty-free imports by two months) could hurt farmers particularly in drought-hit zones. Their argument is also that state-run firms like Cotton Corporation of India (CCI) have reasonable cotton stocks that could tide over any immediate low supply concerns. Sources said domestic cotton prices are above ₹9,000 ($94.80) per 100 kg, higher than the government-set floor price of ₹8,717 for the new season.

"Domestic prices usually ease when the new-season arrivals begin in October, but have remained firm this year amid lower output prospects, prompting mills to seek a longer duty-free import window. After completing inter-ministerial consultations, the government is expected to issue an order soon extending the duty exemption at least until December end," news agency *Reuters* reported on Monday quoting unnamed government and industry sources.

Govt clears proposals to buy military hardware worth ₹2.12 trillion

MARTAND MISHRA
New Delhi, 26 October

The Ministry of Defence on Monday accorded Acceptance of Necessity (AoN) approvals worth ₹2.12 trillion for the Indian Army, Navy, and Air Force, with around 82 per cent of the proposed procurements to be sourced from Indian industry, according to a statement by the ministry. The proposals cover a range of military equipment, including artillery systems, helicopters, air defence systems, unmanned aerial vehicles and naval platforms.

The AoNs, cleared by the Defence Acquisition Council, are in-principle approvals for proposed defence procurement of equipment and systems and do not represent the actual award of contracts.

For the Indian Army, clearance was given for high-mobility vehicles, a self-propelled tracked gun system, a gunshot response system, light multi-role helicopters (LMRH), very short-range air defence systems (VSHORADS) and a platform-based counter-unmanned aerial system. It also covers long-range drones, surveillance unmanned aerial vehicles (UAVs), systems combining surveillance with strike capabilities, and long-range kamikaze drones designed to hit targets by crashing into them.

"The LMRH will be used by both the Indian Army and the Indian Air Force for reconnaissance and surveillance, combat, search and rescue of troops, humanitarian assistance and disaster relief," the statement read.

The high-mobility vehicles are expected to improve logistics and mobility in difficult terrain, while the tracked gun system will provide mobility and firepower for armoured regiments. The gunshot response system will help in situational awareness. VSHORADS will help counter small aerial threats with a range of about eight kilometres. The approved procurement for the Navy includes an active off-board decoy system (AODS) and other major naval platforms. The AODS is intended to strengthen protection against adversary anti-ship missiles, while the indigenously designed and constructed naval platforms will improve the combat capabilities.

For the Air Force, the approvals include helicopters, air defence systems, weapons and a mobile X-band Doppler weather radar system.

Rajnath calls for 'Aatmanirbharta 2.0' in defence

Defence Minister Rajnath Singh (*pictured*) on Monday called for "Aatmanirbharta 2.0" in the defence sector, emphasising the development of advanced technologies, strengthening research, and building supply chains to reduce import dependencies. He spoke at this year's Swavlamban, the Indian Navy's annual seminar on innovation and indigenisation. It has been 10 years since the government launched the Make in India campaign. OUR BUREAU

- **MARKET MAKER PORTION :** UP TO 1,45,200 EQUITY SHARES OR 5.04% OF THE OFFER

IN MAKING AN INVESTMENT DECISION, POTENTIAL INVESTORS MUST ONLY RELY ON THE INFORMATION INCLUDED IN RED HERRING PROSPECTUS AND THE TERMS OF THE OFFER, INCLUDING THE RISKS INVOLVED AND NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION ABOUT THE OFFER AVAILABLE IN ANY MANNER.

IN RELATION TO PRICE BAND, POTENTIAL INVESTORS SHOULD ONLY REFER TO THIS PRE-ISSUE AND PRICE BAND ADVERTISEMENT FOR THE OFFER AND SHOULD NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION AVAILABLE IN ANY MANNER IN RELATION TO THE VALUATION OF THE COMPANY AS THESE ARE NOT ENDORSED, PUBLISHED OR CONFIRMED EITHER BY THE COMPANY OR THE BOOK RUNNING LEAD MANAGERS TO THE OFFER ("BRLM").

In accordance with the recommendation of a committee of Independent Directors of our Company, pursuant to their resolution dated October 26, 2026 the above provided price band is justified based on quantitative factors/ KPIs disclosed in the **'Basis for Offer Price'** section beginning on page 112 of the Red Herring Prospectus ('RHP') vis-a-vis the weighted average cost of acquisition ('WACA') of primary and secondary transaction(s), as applicable, disclosed in ***'Basis for Offer Price'*** section beginning on page 112 of the RHP and provided below in the advertisement.

RISKS TO INVESTORS

For details, refer to the section titled "Risk Factors" on page 22 of the RHP.

1. Risk to investors summary description of key risk factors based on materiality

1. *Our business is dependent on the sale of our products to certain key customers and we do not have any long term contracts with any of these customers. The loss of any of these customers or loss of revenue from sales to these customers could have a material adverse effect on our business, financial condition, results of operations and cash flows.*
2. *We derive a portion of our revenues from exports and are subject to risk of international trade in multiple countries including Netherlands where our wholly owned subsidiary is located.*
3. *We derive a significant portion of our revenue from the sale of our key product i.e. Geophones Strings/Harness and Seismic Cables. An inability to anticipate or adapt to evolving upgradation of the required products or inability to ensure product quality or reduction in the demand of these products may adversely impact our revenue from operations and growth prospects.*
4. *The impact of the USA- Iran War, Russian invasion of Ukraine, the Israel-Hamas war and the Iran-Israel conflict on the global economy is uncertain, but may prove to negatively impact our business and operations.*
5. *Under-utilization of our manufacturing facility and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.*
6. *Our reliance on certain industries for a significant portion of our sales could have an adverse effect on our business.*
7. *We are subject to strict quality requirements, customer inspections and audits, and any failure to comply with quality standards may lead to cancellation of existing and future orders and could negatively impact our reputation and our business and results of operations and future prospects.*
8. *We may be subject to risks associated with product warranty.*
9. *Our business is dependent on our manufacturing facility and we are subject to certain risks in our manufacturing process. Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same or technology failures could disrupt our operations and have a material adverse effect on our business, results of operation or financial condition.*
10. *The industry where our Company operates requires deployment of skilled and technical employees including labour workforce and our success depends largely upon our ability to attract and retain these personnel.*

- *Average cost of acquisition of Equity Shares held by the Individual Promoters is:*

Sr. No.	Name of Promoter	No. of Shares held	Average Cost of Acquisition (in ₹)
1	Sowar Private Limited	40,80,672	0.35
2	Cecilia Margareta Singh Ramel	7,03,338	18.74
3	Anil Dass	5,48,640	1.52
4	Shashi Singh	4,29,382	Nil

And the Issue Price at the upper end of the Price Band is ₹120 per Equity Share.

- The Price/ Earnings ratio based on Diluted EPS for Fiscal 2026 for the company at the upper end (₹120) of the Price Band is 8.80
- Weighted Average Return on Net Worth for Fiscal 2026, 2025 and 2024 is 11.33%.

2. Details of suitable ratios of the company and its peer group for the latest full financial year:

There are no listed companies in India that are engaged in a business similar to that of our Company accordingly it is not possible to provide an industry comparison in relation to our Company.

3. Return on Net worth (RoNW):

Sr. No.	Period	RONW (%)	Weights
1.	Financial Year 2023-2024	4.21%	1
2.	Financial Year 2024-2025	12.34%	2
3.	Financial Year 2025-2026	13.04%	3
4.	April 30, 2026	1.23%	
	Weighted Average	**11.33%**	**6**

Note:

i. The RoNW has been computed by dividing net profit after tax (excluding exceptional items) with restated Net worth as at the end of the year/ period
ii. Weighted average = Aggregate of year-wise weighted RoNW divided by the aggregate of weights i.e. (RoNW x Weight) for each year/ Total of weights.

4. Weighted average cost of acquisition of all the shares transacted in the one year, 18 months and three years preceding the date of the RHP-

Period	Weighted average cost of acquisition per Equity Share (in ₹)	Cap Price (₹120) is 'x' times the weighted average cost of acquisition*	Range of acquisition price per Equity Share: lowest price – highest price (in ₹)^
Last one year and 18 months preceding the date of this RHP	8.72	13.76	0-147
Last three years preceding the date of this RHP	8.72	13.76	0-147

5. Disclosures as per clause (9)(K)(4) of Part A to Schedule VI:

a) The price per share of our Company based on the primary/ new issue of shares (equity/ convertible securities)

There has been no issuance of Equity Shares, other than Equity Shares issued pursuant to a bonus issue on March 17, 2026 during the 18 months preceding the date of this Red Herring Prospectus, where such issuance is equal to or more than 5% of the fully diluted paid-up share capital of the Company (calculated based on the pre-Offer capital before such transaction(s) and excluding employee stock options granted but not vested), in a single transaction or multiple transactions combined together over a span of 30 days. ("Primary Issue"):

b) The price per share of our Company based on the secondary sale/ acquisition of shares (equity shares)

There have been no secondary sale/ acquisitions of Equity Shares, where the promoters, members of the promoter group, Selling shareholders or shareholder(s) having the right to nominate director(s) in the Board of Directors of the Company are a party to the transaction (excluding gifts of shares), during the 18 months preceding the date of this certificate, where either acquisition or sale is equal to or more than 5% of the fully diluted paid up share capital of the Company (calculated based on the pre-offer capital before such transaction/s and excluding employee stock options granted but not vested), in a single transaction or multiple transactions combined together over a span of rolling 30 days. ("**Secondary Transaction**").

c) Since there are no such transactions to report to under (a) and (b) therefore, information based on last 5 primary or secondary transactions (secondary transactions where Promoter / Promoter Group entities or shareholder(s) having the right to nominate director(s) in the Board of our Company, are a party to the transaction), not older than 3 years prior to the date of this certificate irrespective of the size of transactions, is as below:

Primary Transactions:

Date of Allotment	No. of equity shares allotted	Face value	Issue Price per equity shares (₹)	Nature of Allotment	Nature of consideration	Total Consideration (in ₹ lakhs)
March 17, 2026	14,22,113	10	Nil	Bonus Issue	Other than Cash	Nil

Secondary Transactions:

Date of Transfer	Name of transferor	Name of transferee	No. of equity shares allotted	Face Value	Issue Price per equity shares (₹)	Nature of Allotment	Nature of consideration	Total Consideration (in Lakhs)
February 09, 2026	Late Major Brijendra Singh	Cecilia Margareta Singh Ramel	4,96,434	10	Nil	Transmission	NA	Nil
March 10, 2026	Queensgate Holdings (India) Private Limited	Cecilia Margareta Singh Ramel	89,681	10	147	Transfer	Cash	131.83

d) Weighted average cost of acquisition & Issue price

Types of transactions	Weighted average cost of acquisition (₹ per Equity Shares)	Floor Price (i.e., ₹ 114)	Cap price (i.e., ₹ 120)
Weighted average cost of acquisition of primary / new issue as per paragraph 8(a) above.	NA^	NA^	NA^
Weighted average cost of acquisition for secondary sale / acquisition as per paragraph 8(b) above.	NA^^	NA^^	NA^^
Weighted average cost of acquisition for secondary sale / acquisition as per paragraph 8(c) above.	8.72	13.07	13.76

^There were no primary/ new issue of shares (equity/ convertible securities) as mentioned in paragraph 8(a) above, in last 18 months from the date of this Red Herring Prospectus.
^^There were no secondary transaction of shares as mentioned in paragraph 8(b) above, in last 18 months from the date of this Red Herring Prospectus.
** To be updated at Prospectus stage.*
*** Amount determined after considering the impact of issue of 14,22,113 bonus shares*
Note:

The Issue Price shall be determined by our Company in consultation with the BRLM, on the basis of the demand from investors for the Equity Shares through the Book Building Process.

ADDITIONAL INFORMATION FOR INVESTORS:

1. **Details of proposed /undertaken pre-Issue placements from the DRHP filing date -** Not Applicable.
2. **Transaction of shares aggregating up to 1% or more of the paid-up equity share capital of the company by promoter(s) and promoter group(s) from the DRHP filing date:** Not Applicable.
3. **Pre & Post-Issue Shareholding of our Promoter(s), Promoter Group and Additional Top 10 Shareholders of the Company:**

The aggregate Pre & Post-Issue shareholding of our Promoter(s), Promoter Group and the additional top 10 Shareholders as a percentage of the pre-issue Paid-up Equity Share capital of our Company is set out below:

ASBA*

Simple, Safe, Smart way of Application- Make use of it!!!

***Applications Supported by Blocked Amount (ASBA) is a better way of applying to issues by simply blocking the funds in the bank account; investors can avail the same. For details, check the section on ASBA below.**

Mandatory in Public Issues from January 01, 2016. No cheque will be accepted

UPI – Now available in ASBA for Individual investors and non-institutional investors applying for amounts up to ₹5,00,000/- applying through Registered Brokers, DPs & RTAs. UPI bidders also have the option to submit the Application directly to the ASBA Bank (SCSBs) or to use the facility of linked online trading, demat and bank account. Investors are required to ensure that the Bank Account used for bidding is linked to their PAN. Bidders must ensure that their PAN is linked with Aadhaar and are in compliance with CBDT notification dated February 13, 2020, issued by the CBDT and the subsequent press releases, including press releases dated June 25, 2021 and September 17, 2021 and CBDT circular no. 7 of 2022, dated March 30, 2022, read with the press release dated March 28, 2023 and any subsequent press releases in this regard.

ASBA has to be availed by all the investors except anchor investors. UPI may be availed by (i) Individual Investors Portion. (ii) Non-Institutional Investors with an application size of up to ₹5,00,000 in the Non-Institutional Portion. For details on the ASBA and UPI process, please refer to the details given in the ASBA form and abridged prospectus and also please refer to the section ***"Offer Procedure"*** on page 312 of the RHP. The process is also available on the website of the Association of Investment Bankers of India ("AIBI") and Stock Exchanges and in the General Information Document. ASBA bid-cum-application forms can be downloaded from the websites of Stock Exchanges and can be obtained from the list of banks that is displayed on the website of SEBI at https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=35 and https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=43, respectively, as updated from time to time. For the list of UPI apps and banks live on IPO, please refer to the link: www.sebi.gov.in. UPI mechanism may apply through the SCSBs and mobile applications whose names appear on the website of SEBI, as updated from time to time. Kotak Mahindra Bank Limited has been appointed as Sponsor Bank for the Offer, in accordance with the requirements of the SEBI Circular dated November 1, 2018, as amended. For Offer -related queries, please contact the BRLMs on their respective email IDs as mentioned below. For UPI-related queries, investors can contact NPCI at the toll-free number: 18001201740 and email ID: ipo.upi@npci.org.in.

In case of any revision in the Price Band, the Bid/ Offer Period shall be extended for at least three additional working days after such revision of the Price Band, subject to the total Bid/ Offer Period not exceeding 10 working Days. In cases of force majeure, banking strike or similar circumstances, our Company, in consultation with the Book Running Lead Manager, for reasons to be recorded in writing, shall extend the Bid/ Offer Period for a minimum of one working Day, subject to the Bid/ Offer Period not exceeding 10 working Days. Any revision in the Price Band, and the revised Bid/ Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchange by issuing a press release and also by indicating the change on the website of the Book Running Lead Manager and at the terminals of the Syndicate Members and by intimation to Self-Certified Syndicate Banks ("SCSBs"), other Designated Intermediaries and the Sponsor Banks, as applicable.

This Offer is being made through the Book Building Process, in terms of Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended (the "SCRR") read with Regulation 229 of the SEBI ICDR Regulations and in compliance with Regulation 253(1) and 253(2) of the SEBI ICDR Regulations read with SEBI ICDR (Amendment) Regulations, 2025, wherein not more than 50.00% of the Net Offer shall be available for allocation on a proportionate basis to Qualified Institutional Buyers ("QIBs") (the "QIB Portion"), provided that our Company in consultation with the BRLMs may allocate up to 60.00% of the QIB Portion to Anchor Investors on a discretionary basis ("Anchor Investor Portion"). 40% of the Anchor Investor Portion shall be reserved for (i) 33.33 % for domestic Mutual Funds; and (ii) 6.67% for Life Insurance Companies and Pension Funds and subject to valid Bids being received from the domestic Mutual Funds and Life Insurance Companies and Pension Funds, as applicable, at or above the price at which allocation will be made to Anchor Investors ("Anchor Investor Allocation Price") in accordance with the SEBI ICDR Regulations and any under-subscription under (ii) may be allocated to domestic Mutual Funds. In the event of undersubscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the QIB Portion (other than the Anchor Investor Portion) ("Net QIB Portion"). Further, 5.00% of the Net QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only, and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIB Bidders, other than Anchor Investors, including Mutual Funds, subject to valid Bids being received at or above the Offer Price. However, if the aggregate demand from Mutual Funds is less than 5.00% of the Net QIB Portion, the balance Equity Shares available for allocation in the Mutual Fund Portion will be added to the remaining Net QIB Portion for proportionate allocation to QIBs. Further, the SEBI ICDR Regulations read with SEBI ICDR (Amendment) Regulations, 2025, state that not less than 35% of the Net Offer shall be available for allocation to Individual Investors who apply for minimum application size. Not less than 15% of the Net Offer shall be available for allocation to Non-Institutional Investors of which one-third of the Non-Institutional Portion will be available for allocation to Bidders with an application size of more than two lots and up to such lots as equivalent to not more than ₹10.00 Lakhs and two-thirds of the Non-Institutional Portion will be available for allocation to Bidders with an application size of more than ₹10.00 Lakhs and under-subscription in either of these two sub-categories of Non-Institutional Portion may be allocated to Bidders in the other sub-category of Non-Institutional Portion. Subject to the availability of shares in non-institutional investors' category, the allotment to each Non-Institutional Investor shall not be less than the minimum application size in Non-Institutional Category and the remaining available Equity Shares, if any, shall be allocated on a proportionate basis in accordance with the conditions specified in this regard in Schedule XIII of the SEBI (ICDR) (Amendment) Regulations, 2025. All Potential Bidders, other than Anchor Investors, are required to participate in the Offer by mandatorily utilising the Application Supported by Blocked Amount ("ASBA") process by providing details of their respective ASBA Account (as defined hereinafter) in which the corresponding Bid Amounts will be blocked by the Self-Certified Syndicate Banks ("SCSBs") or under the UPI Mechanism, as the case may be, to the extent of respective Bid Amounts. Anchor Investors are not permitted to participate in the Offer through the ASBA process. For details, please refer to the chapter titled ***"Offer Procedure"*** on page 312 of the RHP.

Bidders/ Applicants should note that on the basis of PAN, DP ID and Client ID as provided in the Bid cum Application Form, the Bidders/Applicants may be deemed to have authorized the Depositories to provide to the Registrar to the Offer any requested Demographic Details of the Bidders/Applicants as available on the records of the depositories. These Demographic Details may be used, among other things, for the unblocking of ASBA Account or for other correspondence(s) related to an Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Applicants' sole risk. Bidders/Applicants should ensure that PAN, DP ID and the Client ID are correctly filled in the Bid cum Application Form. The PAN, DP ID and Client ID provided in the Bid cum Application Form should match with the PAN, DP ID and Client ID available in the Depository database; otherwise, the Bid cum Application Form is liable to be rejected. Bidders/Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Investors must ensure that their PAN is linked with AADHAAR and are in compliance with CBDT Notification dated February 13, 2020 and press release dated June 25, 2021.

CONTENTS OF THE MEMORANDUM OF ASSOCIATION OF THE COMPANY AS REGARDING ITS OBJECTS: For information on the main objects and other objects of our Company, see "History and Corporate Structure" on page 172 of the RHP and Clause III of the Memorandum of Association of our Company. GOLD AUCTION CUM INVITATION NOTICE

The below mentioned borrower has been served with margin call notice to pay Margin amount towards the loan facility against gold ornaments ("Facility") availed by them from RBL Bank Limited. Since the borrower has failed to repay Margin amount under the Facility, we are constrained to conduct an auction of the pledged gold ornaments on dates mentioned in the below table.
In the event any surplus amount is realised from this auction, the same will be refunded to the concerned borrower and if there is a deficit post the auction, the balance amount shall be recovered from the borrower through appropriate legal proceedings. RBL Bank has the authority to remove following account from the auction without prior intimation. Further, RBL Bank reserves the right to change the Auction Date without any prior notice.

NOTICE TO SHAREHOLDERS
Special Window for Transfer and Dematerialisation of Physical Securities

Pursuant to SEBI Circular No. HO/38/13/11(2)2026-MIRSD-POD/I/3750/2026 dated January 30, 2026, ("Circular"), to facilitate ease of investing for investors and to secure the rights of investors in the securities which were purchased by them, another special window for transfer and dematerialization ("demat") of physical securities which were sold/ purchased prior to April 01, 2019, has been opened for a period of one year from February 05, 2026, till February 04, 2027. The special window shall be available for transfer requests which were submitted earlier and were rejected/ returned or remained unattended due to deficiency in the documents/ process or otherwise and the shareholder is holding original share certificate(s).

Shareholders who wish to avail this opportunity are requested to contact Company's Registrar and Share Transfer Agent ("RTA"), MUFG Intime India Private Limited at their email id: mumbai@in.mpms.mufg.com or send the requisite documents at their office at C-101, Embassy 247, L.B.S. Marg, Vikhroli (West), Mumbai – 400083, Maharashtra, India or contact the Company at shares@sudarshan.com

Please note that the securities so transferred shall be mandatorily credited to the transferee only in demat mode once all the documents are found to be in order by the RTA and shall be under lock-in for a period of one year from the date of registration of transfer. Such securities shall not be transferred/ lien marked/ pledged during the said lock-in period. The transfer would be considered subject to compliance with the conditions as mentioned in the aforesaid circular.

This is for your information.

(Applicant Company 1, 2, and 3 shall hereinafter be jointly referred to as the 'Applicant Companies')
(Transferor Company 1 and Transferor Company 2 shall hereinafter be jointly referred to as the 'Transferor Companies')

NOTICE AND ADVERTISEMENT OF THE MEETINGS OF UNSECURED CREDITORS OF APPLICANT COMPANIES

Notice is hereby given that by an Order dated 01.09.2026 read with Order dated 25.09.2026, the New Delhi Bench of the National Company Law Tribunal **("NCLT/ Tribunal"),** passed in Company Application no. No. CA(CAA) No. 51/230-232/ND/2026, has directed the meetings of the unsecured creditors of both the Transferor Companies and the Transferee Company be convened for the purpose of considering, and if thought fit, approving with or without modification(s), the Scheme of Amalgamation between JCB Industries Private Limited, JCB Power Products India Private Limited with JCB India Limited and their respective shareholders, pursuant to the provisions of Sections 230 to 232 of the Companies Act, 2013 **("Act"),** and any other applicable provisions of the Act (including any statutory modification(s) or re-enactment thereof, for the time being in force) (the **"Scheme"**).
In pursuance of the said Order, notice is hereby given that the meetings of the unsecured creditors of the Transferor Companies and the Transferee Company will be held as through VC on the platform and facilities provided by NSDL, for the purpose of considering, and if thought fit, approving with or without modification, the Scheme of Amalgamation. The details (date and time) of the meetings are as under:

Company	Meeting of Unsecured Creditors
JCB Industries Private Limited	At 10:30 am on 28.11.2026
JCB Power Products India Private Limited	At 11:30 am on 28.11.2026
JCB India Limited	At 12:30 pm on 28.11.2026

Additionally, remote e-voting facility will be available to the creditors between 10:00 AM on 25 November 2026 till 05:00 PM on 27 November 2026.
The username and password will be generated by NSDL and shall be sent separately well in advance before the NSDL portal is open for remote e-voting.
Copies of the said Scheme of Amalgamation and the explanatory statement under section 230 r.w. 232 can be obtained free of charge at the registered office of the respective Applicant Companies or at the office of its advocates, Shri Dhritiman Bhattacharyya/Ms. Deeti Ojha, Advocates, Unity Legal S 369, GK 2, New Delhi 110048 **(documents@unitylegal.com)**.
In accordance with the direction of the Tribunal, individual notices of the said meetings, is being sent through email by NSDL to all the unsecured creditors as per the list filed with the joint application with NCLT.
Pursuant to the provisions of the act, a creditor entitled to attend and vote at the meeting is entitled to appoint a proxy to attend and vote at the meeting on his/ her behalf and the proxy need not be an unsecured creditor of the company. Since this meeting is being held through VC facility, the requirement of physical attendance of creditors has been dispensed with. Accordingly, the facility for appointment of proxies by the creditors will not be available.
Further, pursuant to the provisions of the Act, the Institutional/ Corporate creditors (i.e., other than individuals, HUF, NRI, etc.) are required to send legible scan of certified true copy of its Board or governing body resolution/ power of attorney/ authority letter etc., together with the ID of the duly authorised representative(s), to attend the Meeting through VC on its behalf and vote at the Meeting. The said resolution/ authorisation, self-attested by the person so authorized to attend the Meeting, shall be sent to the Company at **contact.company@jcb.com** with a copy marked to the Ms. Sharanya Sinha, Scrutinizer at **sharanyasinha.adv@gmail.com**
Any unsecured creditor requiring any assistance/clarification regarding the meetings may write to the Company on **contact.company@jcb.com**

11. The successful highest bidder shall deposit the balance 75% of final bid amount on or before 15th day from the date of sale of the property. If the 15th day is Sunday or other Holiday, then on the first bank working day after the 15th day by prescribed mode as stated in above para. In addition to the above the purchaser shall also deposit poundage fee with Recovery Officer-II, DRT-II @2% upto Rs. 1,000/- and @1% of the excess of said amount of Rs. 1,000/- through DD in favour of Registrar, DRT-II, Delhi, within the period of 15 days as stated above.
12. In case of default of payment within the prescribed period, the deposit, after defraying the expenses of the sale, may, if the undersigned thinks fit, be forfeited to the Government and the defaulting purchaser shall forfeit all claims to the property or the amount deposited. The property shall be resold, after the issue of fresh proclamation of sale. Further the purchaser shall also be liable to make good of any shortfall or difference between his final bid amount and the price for which it is subsequently sold.
13. The Recovery Officer retains the statutory power to accept or reject any bid, to decline to confirm the sale, or to postpone or cancel the e-auction at any time, in exercise of the powers vested under the Second Schedule to the Income Tax Act, 1961. The exercise of this power shall not be affected or limited by any action taken by the BAANKNET portal or the CH Bank in the conduct of the e-auction.
14. Unsuccessful bidder/s are directed to file an application along with identity proof in the Registry of DRT-II on or before the schedule date of hearing of the RC for refund of their EMD which shall be refunded on the schedule/subsequent date of hearing of the RC accordingly.
15. There is no other detail of revenue/encumbrance or other claim against the properties in the knowledge of undersigned at this stage. However, prospective bidders are advised to make their own due diligence w.r.t dues of electricity/water/house tax bills or any other encumbrance etc., in their own interest, before deposit of EMD.
16. CH Bank to publish the e-auction notice in English as well Vernacular language in the news papers widely circulates in the area / having sufficient circulation in the locality where the property situates and CDs reside or work for gain. CH Bank may also give wide publicity by way of circulating Pamphlets and Beat of Drum etc. till the date of auction and submit a report to this Tribunal.
17. The CH bank is directed to authenticate the veracity of the paras hereinabove and also to cross verify their consistency with the terms and conditions of BAANKNET portal so as to ensure the auction proceeds seamlessly and fairly.
18. No money received by the BAANKNET portal in the course of this auction process, whether on account of EMD or otherwise, shall be returned to any bidder or any other person without the express written order of the Recovery Officer. The CH Bank is directed to communicate this restriction to the concerned officials of BAANKNET and to ensure that the portal is configured accordingly, so that no refund or return of any amount is processed at the portal level without prior authorization from the Recovery Officer.

That the above named borrower(s) have failed to maintain the financial discipline towards their loan account (s) and as per books of accounts maintained in the ordinary course of business by the Company, Column D indicates the outstanding amount.
Due to persistent default in repayment of the Loan amount on the part of the Borrower(s) the above said loan account has been classified by the Company as Non Performing Asset (as on date in Column C) within the guidelines relating to assets classification issued by Regulating Authority. Consequently, notices under Sec. 13(2) of the Act were also issued to each of the borrower.
In view of the above, the Company hereby calls upon the above named Borrower(s) to discharge in full his / their liabilities towards the Company by making the payment of the entire outstanding dues indicated in Column D above including up to date interest, costs, and charges within 60 days from the date of publication of this notice, failing which, the Company shall be entitled to take possession of the Mortgaged Property mentioned in Column B above and shall also take such other actions as is available to the Company in law.
Please note that in terms of provisions of sub - Section (8) of Section 13 of the SARFAESI Act, "A borrower can tender the entire amount of outstanding dues together with all costs, charges and expenses incurred by the Secured Creditor only till the date of publication of the notice for sale of the secured asset(s) by public auction, by inviting quotations, tender from public or by private treaty. Further it may also be noted that in case Borrower fails to redeem the secured asset within aforesaid legally prescribed time frame, Borrower may not be entitled to redeem the property."
In terms of provision of sub-Section (13) of Section 13 of the SARFAESI Act, you are hereby prohibited from transferring, either by way of sale, lease or otherwise (other than in the ordinary course of his business) any of the secured assets referred to in the notice, without prior written consent of secured creditor.
