Noel Tata seeks records of key Sept 17 Tata Sons board meet

NO TRUST. Questions ties of N Chandra and TVS's Venu Srinivasan, also a Tata Sons Director

Aneesh Phadnis
Mumbai

Tata Trusts Chairman Noel Tata has sought the records of the September 17 Tata Sons board meeting that approved N Chandrasekaran as Chairman for a third term and questioned his (Chandra) family's business relations with the TVS group, headed by fellow board member Venu Srinivasan.

Tata made the request in a letter to Company Secretary Suprakash Mukhopadhyay on Monday. The letter was copied to other members of the Tata Sons board.

The development escalates the tensions between Tata and Tata Sons board members that have come to the fore following the contentious board meeting of September 17.

CONTESTED DRAFT

"The draft minutes (of board meeting) are contested in material respects. The recording is the only neutral record of what transpired and there can be no legitimate reason to withhold it from a director who was present at the meeting and who has placed his objections on record," Tata wrote. He once again said the resolution reappointing Chandrasekaran was void and no selection committee was constituted under Article 118 of the Articles of Association for reappointment.

Noel Tata, Chairman, Tata Trusts

This is particularly significant since a request for constitution of a selection committee was there since August 13.

The affirmative vote of the directors was not obtained.

The dispute has also drawn questions over the reported commercial dealings between TVS Motor Company and Hanno One Warehousing Pvt Ltd, a company associated with members of Chandrasekaran's immediate family.

'TIES NOT DISCLOSED'

According to the letter, media reports indicated that TVS Motor entered into warehousing and industrial park arrangements with Hanno One. Tata argued that the relationship should have been disclosed to the Tata Sons board before the directors considered Chandrasekaran's continuation as Executive Chairman.

Anthropic flags 'existential risks' in long-awaited IPO filing

Bloomberg

Artificial intelligence giant Anthropic filed for an IPO, warning that its technology carries existential risks even as it moved a step closer to being the first company focused primarily on developing the most advanced AI models to go public.

The company behind Claude expects to begin trading on the Nasdaq Global Select Market under the symbol ANT, a filing on Monday with the US Securities and Exchange Commission showed. Anthropic filed confidentially in June for a listing.

The IPO is being led the Goldman Sachs Group and Morgan Stanley, along with 20 other banks, the filing shows.

Anthropic and some of its shareholders are offering stock in the IPO, according to the filing. The amount of shares they're offering will be disclosed later.

RISKS TO HUMANITY

The company's debut has become a focal point for the world's hopes and fears over AI, which run the gamut from worries over job displacement and the substantial upfront spending the technology needs to other, more existential, questions: Anthropic's prospectus has flagged various "risks to humanity", including attempts to "resist shutdown" and "conceal or manipulate information".

Anthropic had an $80.7 billion net loss on revenue of $16.3 billion in the first six months of 2026 versus a $13-billion net loss on revenue of $1.2 billion in the same period last year, the filing shows.

'EXISTENTIAL RISKS'

Anthropic is seeking to tap the public market's ample funding capacity to maintain its lead over rivals, as AI companies burn hundreds of billions of dollars to continue advancing their so-called frontier models.

It is set to begin formally marketing for its IPO as early as the week of November 9, *Bloomberg News* reported.

The company and its rival OpenAI are also facing mounting public scrutiny over AI safety after a string of high-profile hacking incidents by rogue agents, ramping up concerns about the potential impact on Anthropic's market debut.

Tata Communications to invest $450 million in AI fibre network

AI HIGHWAY. 10,000-km network rollout in 3-5 years; hyperscalers, AI labs to benefit

Vallari Sanzgiri
Mumbai

SCALING UP
- The fibre network will connect Mumbai-Pune-Hyderabad-Chennai initially
- Domestic data centre-to-data centre connectivity market could exceed $1 billion in the medium term

Tata Communications will invest nearly $450 million to build a high-speed, low-latency AI network connecting key AI data centre corridors in India.

The company will lay about 10,000 km of long-haul fibre, creating one of the country's largest AI-ready connectivity networks. Dubbed the 'AI Super Highway', the network will cater to next-generation AI workloads.

LINKING CORRIDORS

"The fibre network will be rolled out over three-five years. Phase 1 will prioritise the high-density Mumbai-Pune-Hyderabad-Chennai route, directly linking key data centre clusters and subsea landing hubs. Phase 2 will expand regional coverage across Hyderabad, Visakhapatnam and Chennai. Later phases will extend the network eastwards to Bhubaneswar and westwards into Gujarat, connecting strategic nodes such as GIFT City and Jamnagar," Rupesh Chokshi, Executive Vice-President and Global Business Head - Network Services, Tata Communications, told *businessline*.

AI PURPOSE BUILT

Unlike traditional telecom networks, which face challenges in meeting the infrastructure requirements of generative and agentic AI workloads, the new network is purpose-built for AI. It will offer direct data centre-to-data centre connectivity, customised service-level agreements, ultra-low latency, diverse routing and a capacity of 7.2 petabytes across the network.

The network will integrate with Tata Communications' existing infrastructure, which spans over 5,00,000 km of subsea fibre and more than 200,000 km of terrestrial fibre, connecting India's AI corridors directly to global AI hubs.

"Ownership of dedicated fibre offers attractive economics and gives the assets a 25-year lifespan. Rather than being a captive asset, the network will be a commercial-grade, multi-tenant platform leased through long-term contracts to hyperscalers, neocloud providers, AI labs and enterprises," Chokshi said. The investment will be funded through the company's operating cash flows.

$1-B OPPORTUNITY

Ganesh Lakshminarayanan, MD and CEO of Tata Communications, said, the company expects India's data centre-to-data centre connectivity market to potentially exceed $1 billion over the medium term.

"With our planned investments, we are building on our existing strengths to create one of the most comprehensive data centre connectivity platforms in the market, positioning us to capture this significant growth opportunity," he added.

A growing share of the company's expansion is being driven by anchor-customer commitments and contracted demand, supporting sustainable growth and efficient capital deployment, he added.

The investment comes amid rising demand for digital infrastructure, driven by cloud adoption, AI deployment, data localisation requirements and enterprise needs for resilient, high-capacity connectivity.

Tata Communications aims to strengthen India's position as a global AI and cloud connectivity gateway, catering to demand from hyperscalers, neocloud providers, AI companies, digital-native businesses, global capability centres (GCCs) and enterprises.

Flex-fuel vehicles now allowed to run on higher ethanol blends

Our Bureau
New Delhi

GROUND REALITY
- E20 is the nationwide base fuel, while E85 has been introduced separately for vehicles designed and to use it
- India's flex-fuel vehicle market is still developing, with a few OEMs having introduced models that can use high ethanol blends

E100, TOO. The Centre has updated emission framework to include near-pure ethanol fuel alongside E85 ANI

The Centre has updated the vehicle emission framework to include E100 alongside E85 for flex-fuel vehicles, providing for higher ethanol use in models designed by automobile manufacturers to run on these fuels.

According to a notification issued by the Ministry of Road Transport and Highways, dated October 23, amendments to the Central Motor Vehicles Rules, 1989, replace references to E85 (a petrol-ethanol blend containing up to 85 per cent ethanol) with "E85 or E100" in specified emission tables. E100 refers to near-pure ethanol fuel.

BLENDING LEVEL

Currently, E20, which contains 20 per cent ethanol blended with petrol, is the nationwide base fuel, while E85 has been introduced separately for vehicles specifically designed and certified to use it. However, in July, the Petroleum Ministry said that no decision had been taken to raise the nationwide base blending level beyond 20 per cent.

The distinction between vehicle capability and certification was highlighted by Maruti Suzuki at the launch of its first flex-fuel passenger car in June. At that time, the automaker said the vehicle could operate on blends ranging from E20 to E100, but had been certified using E85 because the applicable rules defined flex fuel as E20 to E85. Under the latest notification, references to E85 in several tables of rules will be expanded to include E100.

Besides, the notification inserts an explanatory note specifying that E85 or E100 shall be used in vehicles designed by original equipment manufacturers (OEMs) as flex-fuel vehicles.

The amendments take effect from their publication in the Official Gazette, unless otherwise provided.

Furthermore, the final notification follows draft rules published on April 27, with the ministry saying it had considered the objections and suggestions received.

FUEL SUPPLY

On the fuel supply side, the Petroleum Ministry launched an E85 rollout across 48 public sector oil marketing company (OMC) outlets in June. It had also announced plans to expand availability to 500 outlets by December 2026 and 5,000 outlets by December 2027.

Additionally, the notification replaces a B10 reference with B100 in one emission table and updates the gasoline column heading to explicitly refer to E10 and E20. (B10 and B100 refer to the percentage of biodiesel blended into diesel).

CCPA fines Britannia ₹1 lakh over 'misleading' advertisement

Meenakshi Verma Ambwani
New Delhi

◉ THE ISSUE
The authority took *suo motu* cognisance of the matter after observing that the company's product packaging declared a wheat content of 62 per cent, despite ads claiming "100%"

The Central Consumer Protection Authority (CCPA) has slapped a ₹1 lakh penalty on Britannia Industries for misleading advertisements claiming "100 per cent whole wheat bread". The authority said it took *suo motu* cognisance of the matter after observing that the product packaging declared a wheat content of 62 per cent, despite the "100%" claim in ads.

In an order dated October 22, the CCPA said the "100 per cent whole wheat bread" claim, when read in conjunction with the "0 per cent maida" claim, "unequivocally conveys to an average consumer that the impugned product is composed entirely of whole wheat flour, thereby creating an unambiguous, categorical and misleading impression as to its actual composition, quality and characteristics".

The authority noted that "admittedly" the remaining 38 per cent comprises other ingredients, including rice bran. The company has also been asked to submit a compliance report within 15 days. Britannia Industries did not respond to *businessline*'s queries.

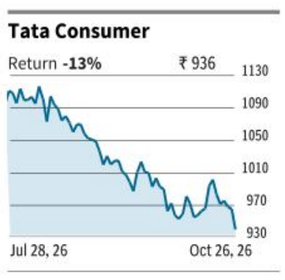
VIEWS SOUGHT

The CCPA, which also sought the FSSAI's views on the matter, said the Food Safety and Standards Regulations make no provision for using the prefix "100 per cent" before the term "whole wheat". Also, falsely claiming a product to be "100 per cent whole wheat" is misleading under the Consumer Protection Act, it stated.

Ashwin Bhadri of Equinox Labs said, "Brands will have to be extremely careful with their packaging and nutritional labels because they cannot get away with making claims that cannot be substantiated."

Tata Consumer sees all-round growth; profit rises 16% in Q2

Amit Vijay Mohile
Mumbai



Tata Consumer Products, maker of Tata Tea, Tata Salt and Tata Sampann, reported a 16 per cent year-on-year increase in consolidated net profit attributable to shareholders to ₹469.30 crore in the September quarter.

This was driven by growth in the packaged foods, premium salt and ready-to-drink beverages segments a despite sluggish tea demand and higher domestic input costs.

SEGMENT GROWTH

Consolidated revenue from operations increased 14 per cent to ₹5,661.13 crore, supported by 11 per cent underlying volume growth in the India-branded business.

The company's India business revenue increased 17.4 per cent to ₹3,666.13 crore as packaged foods, salt and beverages expanded. However, segment operating profit rose more slowly at 13.9 per cent as margins narrowed from 11.5 per cent to 11.1 per cent.

Standalone profit, meanwhile, fell 14.9 per cent from ₹285.19 crore to ₹242.81 crore, even as revenue rose 17 per cent.

Microsoft to offer buyouts to 60,000 workers in latest cost cut

Bloomberg

MESSAGE TO STAFF. The buyouts give Microsoft units "another way to adapt their workforce to changing needs", a note to workers said REUTERS

Microsoft Corp will offer buyouts to about 60,000 workers, part of the company's efforts to trim costs and retool its workforce for the artificial intelligence era.

Personnel on select teams in the US, Canada, India and the UK at a V-P level and below will be eligible, said a Microsoft spokesperson. Certain pools of employees, including some focused on data centres, sales and marketing, aren't eligible, the spokesperson added.

"This offer gives eligible employees who may be considering a future outside the company a new choice to make that transition now with support," Chief People Officer Amy Coleman said in a note to workers Monday. Workers will receive benefits similar to a standard severance package, the spokesperson said.

THE PRECEDENT

The world's largest software maker has shed tens of thousands of workers in waves of layoffs recently. In July, it offered buyouts to retirement-age employees, and over 30 per cent of the roughly 8,750 eligible people took the offer. Microsoft expects far fewer personnel to accept the latest proposal compared with the voluntary retirement programme, the spokesperson said.

Microsoft's headcount as of the end of June was 2.23 lakh. The figure has been largely flat since 2022, about the time Microsoft began spending heavily on AI and data centres.

The Microsoft spokesperson said the company wants employees who are engaged on the hard problems it's trying to solve. That echoes other tech bosses, who've publicly made clear that continued employment means embracing a faster pace of work and change.

Ather Energy shares jump 14% as it posts Q2 profit, plans capacity expansion

Turnaround

(in ₹ crore)

	Q2 FY26	Q2 FY27
Revenue from operations	898.88	1,464.24
EBITDA	-90.76	74.17
Profit/loss	-154.07	1.26
Vehicles sold (units)	66,000	93,000

Our Bureau
Bengaluru

Shares of Ather Energy jumped nearly 14 per cent to ₹1,575 apiece on Monday after the electric two-wheeler maker reported a consolidated net profit for the September quarter against a loss a year earlier, and announced plans to expand annual production capacity by 2.25 lakh units.

The company reported a consolidated profit after tax of ₹1.26 crore in Q2, compared with a loss of ₹154 crore in the year-ago period. Consolidated total income rose 62 per cent y-o-y to ₹1,527 crore, while volumes grew 42 per cent to 93,211 units. Ather reported an EBITDA of ₹74.2 crore, marking its second consecutive EBITDA-positive quarter. Its EBITDA margin improved to 4.9 per cent from -9.6 per cent in Q2 FY26, supported by higher volumes, improved product mix and cost discipline.

ADDING MORE UNITS

The company plans to invest around ₹122 crore to expand capacity across its Hosur facility and its upcoming AURIC plant in Chhatrapati Sambhajinagar. At Hosur, annual capacity will increase by 75,000 units to 4.95 lakh units by December. The AURIC facility, which has an initial annual capacity of 5 lakh units, will see an expansion of 1.5 lakh, expected to come on stream by Q2 FY28. This will take Ather's combined capacity to around 11.4 lakh units by Q2 FY28.

"Demand has more than doubled year-on-year this quarter, and to meet it, we are further augmenting our production capacity at Hosur and AURIC," said Tarun Mehta, Co-Founder and CEO of Ather Energy.

Non-vehicle revenue, including software subscriptions, charging, accessories and services, accounted for 15 per cent of revenue from operations, up from 12 per cent a year earlier.

Hyundai India tasks Bayon with meeting Creta's target

S Ronendra Singh
New Delhi

NEW ENTRANT. The Bayon, launched on Monday, is priced ₹10-18 lakh (ex-showroom) and will compete with the likes of Maruti Suzuki Grand Vitara and Victoris, and Tata Motors' Curvv

Hyundai Motor India (HMIL), which saw sales of its best-selling model, Creta, decline 10 per cent between April and September this year, is banking on its newly launched Bayon to revive growth. The company is targeting combined sales of 2.5 lakh units of the two models from early next year, a top official said on Monday.

According to the monthly report shared by the Society of Indian Mobile Manufacturers, HMIL dispatched 89,727 units of Creta in the domestic market during April-September this year compared with 99,345 units in the same period last year.

MARKET LEADER

"Creta is still the market leader with 1.70 lakh units sold every year. Obviously, when you have such a high base... many factors come in. That is precisely the reason Bayon is coming at the right time. Bayon provides us the opportunity [for growth] and going forward, when we see lifecycle updates, we will have an opportunity in Creta as well," said Tarun Garg, MD and CEO, HMIL,on the sidelines of Bayon launch.

Powered by 1.5-litre Mpi Petrol engine and 4,245 mm in length, the Bayon is priced between ₹10 lakh and ₹18 lakh (ex-showroom) and will be competing with the likes of Maruti Suzuki Grand Vitara and Victoris, Tata Motors' Curvv, Skoda Kushaq and Volkswagen Taigun. Bayon will be available only in petrol while the CNG version will be launched in January, Garg said.

SUV SALES

According to SIAM data, mid-size SUV dispatches grew 52.3 per cent in the domestic market to 5,55,467 units during April-September compared with 3,64,689 units in the year-ago period. "In H1, we had very good growth and I think the momentum will carry forward in H2 also," Garg said.

One of the reasons for the decline in Creta sales was the limited supply of diesel engine, he noted. "We have limited diesel [engine] supply, so obviously there is a waiting period and we are trying our best to tackle it."

Akasa Air raises ₹450 crore from share sale to existing investors

Aneesh Phadnis
Mumbai

Akasa Air has raised ₹450 crore by selling shares to existing investors to meet operating expenses and fund its expansion plans. The fundraise, the second since last August, comes amid slow traffic growth and a tough operating environment that has seen crude oil prices increase to over $100 a barrel.

The shareholders approved the issuance of compulsory convertible preference shares at an EGM on September 30. A source said the company is raising more capital, and new investors are expected to come on board as well.

'WELL CAPITALISED'

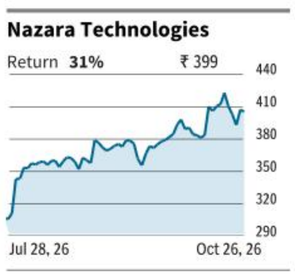
In the September fundraise, convertible shares were issued to 29 individuals and entities, including the Jhunjhunwala family and the family offices of Azim Premji and Ranjan Pai. Rekha Rakesh Jhunjhunwala invested nearly half the total amount.

"Akasa Air is a well-capitalised airline with a clear long-term growth strategy. This financial strength allows us to execute our growth plans with confidence and make decisions that best support our long-term business objectives," said a company statement.

The airline said it is raising additional funds to support growing operations. It did not detail how it plans to use the capital.

Nazara Technologies reports Q2 profit of ₹35 crore, led by gaming segment

Our Bureau
Mumbai



Nazara Technologies reported a net profit of ₹35.36 crore in the September quarter, owing to healthy growth in the gaming segment. Revenue from operations reached its highest-ever quarterly high at ₹803 crore, increasing 53 per cent.

EBITDA grew 93 per cent to ₹120 crore while EBITDA margin went up 14.9 per cent.

"This quarter demonstrates the company we are building: a portfolio of high-quality games on a single, shared platform. Bluetile and BestPlay grew EBITDA 64 per cent in their first two months as part of Nazara, while sustained investment in content delivered organic growth of 11 per cent in revenue and 17 per cent in EBITDA across our existing gaming studios," said Raymond A Stauffer, CEO.

MAJOR CONTRIBUTOR

Gaming revenue grew 122 per cent y-o-y to ₹656 crore and contributed 82 per cent of revenue. Mobile revenue grew 167 per cent to ₹550 crore and PC & Console segment's EBITDA grew 61 per cent. Regarding Bluetile and BestPlay, the company saw a related revenue of ₹329 crore in the first two months since becoming a part of Nazara, up 49 per cent.

Growth in existing gaming businesses was underpinned by strong content engines across the studios.

ITC Hotels sees Q2 profit jumping 52% to ₹202 crore

Our Bureau
Kolkata

Hospitality major ITC Hotels on Monday reported a roughly 52 per cent year-on-year increase in consolidated net profit to ₹202.65 crore for the September quarter, supported by more than a 25 per cent jump in gross revenue. Its gross revenue rose to ₹1,047.72 crore from ₹832.04 crore in the same period last year.

ROBUST GROWTH

The company reached a milestone in Q2, with consolidated income crossing ₹1,100 crore, driven by growth across rooms, food and beverage, and management fees. "Room revenue grew 22 per cent, driven by growth in both rates and volumes. Performance was supported by healthy transient demand across key markets and buoyancy in MICE (Meetings, Incentives, Conferences and Exhibitions) business, aided by the BRICS Summit," the company said.

Occupancy rose 481 bps to 76 per cent and average daily rates grew 14 per cent. F&B revenue also grew 12 per cent, led by speciality restaurants, lounges and bars and banqueting.

Almost half of domestic coal-based power plants have critically low stocks

UNDER STRAIN. Electricity demand surges 23.4% in the first 10 days of October, adding pressure on coal inventories

Rishi Ranjan Kala
New Delhi

Nearly half of domestic coal-based (DCB) power plants have critically low coal stocks, highlighting supply-side pressures amid sustained electricity demand.

Of the 176 DCB power plants, with a combined installed capacity of around 207 GW, 85 had critical coal stocks as of October 25. Nearly half of the country's 15 imported coal-based (ICB) power plants, with a combined capacity of about 17.77 GW, were also facing critical stock levels.

The number of DCB plants with critical stocks — defined as less than 25 per cent of the normative coal stock requirement — rose to 85 from 81 in the 10 days ended October 25. The count peaked at 91 on October 21, the highest level this year.

India's power sector coal stocks

	DCB Stocks (MT)	ICB Stocks (MT)	DCBs with Critical Stocks*	ICBs with Critical stocks*
October 25	17.67	2.26	85	7
October 24	17.41	2.28	89	6
October 23	17.41	2.27	89	6
October 22	17.46	2.27	89	6

Source: Coal Ministry, Power Ministry; DCB: Domestic Coal Based Power Plants; ICB: Imported Coal Based Power Plants; MT: Million Tonnes; *: Number of power plants with critical stocks

CRITICAL STOCKS

The number of ICB plants with critical stocks remained at seven during the period.

Coal stocks at DCB plants declined to 17.67 million tonnes (mt) on October 25 from 18 mt on October 16. Stocks at ICB plants fell to 2.26 mt from 2.42 mt over the same period.

Coal stocks at power plants act as a buffer against supply disruptions, helping ensure continuity of operations. Plants receive coal on a daily or ongoing basis.

Coal stocks at DCB plants have fallen sharply over the past three months, from 35.13 mt at the end of July to 26.04 mt at the end of August. Inventories stood at 25.57 mt on September 1 before declining further to 18.60 mt on October 1. Stocks at ICB plants stood at 2.89 mt on July 31 and rose to around 3.06 mt by August 31. They subsequently declined to 2.46 mt on October 1.

THIN BUFFER

Ankit Jain, Vice-President and Co-Group Head of Corporate Ratings at ICRA, recently said coal stocks stood at around six days' requirement as of October 10, below the levels recorded over the past three years.

Stocks also remained below the normative requirement of around 19–20 days, leaving a thinner buffer against demand surges and supply disruptions.

"Domestic coal production declined by 3.2 per cent year-on-year in the first five months of FY27, largely due to lower output from Coal India. "However, coal supply to the power sector increased by 4 per cent year-on-year during the period," Jain said.

A further decline in inventories, particularly if accompanied by weaker coal production or supply constraints, could limit the sector's ability to meet a sharp surge in peak demand.

A sustained recovery in coal production and supply will be important to rebuild adequate buffer stocks, he said.

Citing Grid Controller of India (GCIL) data, Jain said electricity demand grew 23.4 per cent year-on-year in the first 10 days of October, extending the strong demand trend seen in FY27.

"Supported by higher-than-normal temperatures, sustained cooling requirements and healthy industrial activity, electricity demand remained resilient despite the end of the peak summer season. Consequently, electricity demand growth remained robust at 10.2 per cent year-on-year in the first six months of FY27," he added.

Centre committed to paring fiscal deficit: Sitharaman

Press Trust of India
Tiruchirappalli

Union Finance Minister Nirmala Sitharaman on Monday said the Centre is committed to reducing the fiscal deficit, as evidenced by the annual budgets, stressing that the national debt will be limited to 50 per cent of the GDP by 2030.

Addressing concerns about the national debt, she said that since the post-Covid period, every nation has faced debt challenges. "We are committed to reducing the fiscal deficit, as evidenced by our annual budgets," Sitharaman said.

Highlighting inflation management, she noted that a dedicated group of ministers has been working since 2014 to ensure price stability through efficient supply chain management.

Govt extends RELIEF scheme for exporters till March amid W. Asia crisis

Our Bureau
New Delhi

The Commerce Ministry has said the extension of the Resilience & Logistics Intervention for Export Facilitation (RELIEF) scheme by six months, until March 31, 2027, underscores the government's commitment to strengthening export resilience amid continuing geopolitical tensions and maritime logistics uncertainties.

Launched on March 19, RELIEF aims to cushion exporters against sharp increases in freight costs and insurance premia, as well as war-related export risks arising from disruptions in the Gulf and the wider West Asian maritime corridor, according to a Commerce Department statement issued on Monday. The latest extension follows an earlier extension of the scheme's timeline until September 30.

95% RISK COVER

"Component II of the initiative aims to encourage exporters to obtain Export Credit Guarantee Corporation of India (ECGC) cover for upcoming shipments to specified regions by providing 95 per cent risk coverage. The benefit is available for standalone policies and whole-turnover policies obtained on or after March 16, 2026," the statement said.

Under this component, eligible exporters are protected against increases in insurance premia beyond pre-disruption levels during the eligible period. Coverage includes full container load (FCL), less than container load (LCL) and refrigerated (reefer) cargo, excluding energy shipments.

Some exporters have sought greater clarity on the documentation required to claim benefits under the scheme.

"We need more clarity on how to obtain shipping line bills that need to be submitted to avail of the scheme's benefits," a Mumbai-based exporter said.

The Commerce Department said exporters seeking coverage under RELIEF must submit claims and supporting documents through the ECGC customer portal.

Guidance on generating user IDs and passwords, completing exporter registration and submitting claims is available through dedicated video tutorials on ECGC's official YouTube channel, it added.

Unwanted push

SEBI shouldn't encourage retail activity in SME platform

SME platforms on the Bombay Stock Exchange and the National Stock Exchange were launched in 2012 to give smaller companies an opportunity to tap the capital market. The compliance burden on these issuers was lowered; at the same time investment thresholds were introduced to dissuade smaller investors from participating in these risky issuances.

A SEBI consultation paper has now sought to alter the regulatory mix here. It favours lower entry barriers for investors and raising the bar for issuers, aligning these with mainboard IPOs in several aspects. The former is surprising, in view of the increased speculative activity in SME IPOs over the last four years. While 1,496 companies have listed on SME platforms since inception, raising ₹40,222 crore, almost 90 per cent of the funds have been raised since 2023. Retail investors increased their participation on SME platforms in recent times, attracted by large listing gains. In March 2025, SEBI increased the minimum application size for SME IPOs from ₹1 lakh to ₹2 lakh, stating that it wanted to 'limit participation by smaller retail investors in view of the higher risks associated with SME investments.' The consultation paper is, however, doing a volte face, suggesting that the minimum application should once again be reduced to ₹1 lakh to improve participation. It also says that the trading lot of SME stocks should be reduced to a single share, instead of the current price-based lot sizes, ranging typically between ₹1-1.6 lakh. By lowering the minimum capital and lot size, the regulator wants to increase trading activity on SME stocks.

Investor relaxations are being justified on the ground that rules governing SME stocks will be tightened to protect investors. The paper says that companies making SME issuance should have at least ₹3 crore per year as the minimum average operating profit for the preceding three financial years; up from the requirement to show ₹1 crore operating profit in two of the preceding three financial years. It is of the view that the minimum number of allottees in an SME IPO must be increased from 200 to 500. Small and medium enterprises which try to raise funds from markets to save on rising interest costs may find it hard to meet these higher thresholds.

The consultation paper seeks to alter the basic nature of the SME platforms — so far meant for small issuers rather than small investors. Given that the number of issuances as well as funds raised continue to be robust in 2026, trying to increase activity on these platforms appears unnecessary. Minimum IPO application size and trading lot should ideally be increased to adjust for inflation. However, the suggestion to link listing to post-issue market capitalisation thresholds (mainboard listing for over ₹4,000 crore m-cap) and not the post-issue paid-up capital is a good one. A separate framework for offer for sale in SME IPOs is a welcome step as well. But overall, the new regulatory approach deserves a relook.

Revenue share: Have States lost out?

RELOOK TRANSFERS. Excessive reliance by the Centre on non-shareable cesses and surcharges is a cause for concern

C RANGARAJAN
DK SRIVASTAVA

Share of Centre and States in combined revenue receipts (%)

Source (basic data): IPFS, Union Budget, CGA, RBI and CAG

After the Eightieth Amendment to the Constitution, merging all central taxes for sharing with the States, except cesses and surcharges, the share of statutory transfers consisting of tax devolution and Finance Commission (FC) grants in the combined revenue receipts of the Centre and States averaged 16.4 per cent, 16.6 per cent, 17.5 per cent and 17.5 per cent respectively, during Tenth to Thirteenth Finance Commission (FC) periods. These shares indicate stability over a period of 20 years.

FOURTEENTH FC

The Fourteenth FC increased the share of statutory transfers to States to 22.2 per cent in the combined revenue receipts of the Centre and States, an increase of 4.7 percentage points as compared to the Thirteenth FC period. This resulted from an increase in: (i) the share of States in tax devolution from 32 per cent to 42 per cent, and (ii) FC grants from 5.2 per cent to 6.5 per cent as percentage of the shareable pool of central taxes. Measured in terms of combined revenue receipts, these two increases amounted to 4.2 and 0.5 percentage points respectively. These increases were linked to discontinuation of Plan grants which took effect in 2017-18 after the conclusion of the 12th Five Year Plan in 2016-17.

The Terms of Reference (ToR) of the Fourteenth FC made no reference to the discontinuation of Plan grants. The Commission did not analyse the feasibility of discontinuing the plan schemes. Abhijit Sen, member of the Fourteenth FC, in his note of dissent observed that "there was reluctance on part of the Chairman and other Members to analyse the transition from the present situation to that likely after our award." In their reply, the Chairman and other members observed that "...We admit that there has been reluctance in taking a view about the transition ... it is necessary for the authorities to determine the transition path and make arrangements as are appropriate."

The Commission explained as to how it arrived at the figure of 42 per cent. "... We have factored in four important considerations: (i) States not being entitled to the growing share of cess and surcharges in the revenues of the Union Government; (ii) the importance of increasing the share of tax devolution in total transfers; (iii) an aggregate view of the revenue expenditure needs of States without Plan and non-Plan distinction; and (iv) the space available with the Union Government. ...would serve the twin objectives of increasing the flow of unconditional transfers to the States and yet leave appropriate fiscal space for the Union to carry out specific-purpose transfers to the States" (Paragraph 8.13 of the report).

In any event, during the period of Fourteenth FC, there was a significant change in the share of States in the total revenue receipts of Centre and States (see Table). The share of States in the total revenue receipts after transfers rose to 67.8 per cent as compared to 63.9 per cent in the Thirteen FC period. This is because transfers statutory and non-statutory rose from 25.7 per cent to 31.1 per cent. States' revenue receipts before transfers fell from 38.2 per cent of total in Thirteenth FC period to 37.7 per cent in the Fourteenth FC period. The Centre's fiscal space in combined revenue receipts fell by 4.4 percentage points. If the Planning Commission were to be reintroduced, there would be a major challenge in terms of finding adequate fiscal space for this purpose.

The share of Centre and States as percentage of combined revenue receipts has gone back to what was in the Tenth FC period

CHANGE SINCE XIV FC PERIOD

The Fifteenth FC changed the share of States in the shareable pool to 41 per cent mainly because of the fall in the number of States to 28 due to Jammu and Kashmir becoming a UT with legislature. The Centre, in the meanwhile, started reclaiming its fiscal space by taking several steps. First, it progressively increased the non-shareable cesses and surcharges which as a share of its gross tax revenues rose from 9.9 per cent to 12.8 per cent and further to 16.2 per cent during the periods covered by the Thirteenth, Fourteenth and Fifteenth FCs, respectively. Second, the Centre did not accept the State/sector-specific grants recommended by the Fifteenth FC.

Third, the Centre reduced its share in financing centrally sponsored schemes. The latest example is the VB-G-RAM-G scheme (earlier MGNREGA), with the share for general States raised to 40 per cent from 30 per cent. Fourth, the Sixteenth FC dropped Article 275 revenue deficit grants. Fifth, in 2026-27, the Health Security and National Security Cess was introduced. Consequently, annual data for recent years indicate that the Centre has been able to reclaim all the lost fiscal space following Fourteenth FC recommendations. The average share of States over 2023-24 to 2025-26 in the combined revenue receipts is 63.5 per cent, becoming nearly equal to their average share in the Tenth FC period at 63.2 per cent.

The progressive increase in non-shareable cesses and surcharges is not justifiable, as these are meant for specific purposes and limited periods. The Sixteenth FC should have examined the Centre's increasing reliance on non-shareable cesses, surcharges and other mechanisms to reclaim fiscal space. Instead, the Sixteenth FC recommended a 'grand bargain' between the Centre and States. The matter should have been resolved by the FC under its Constitutional mandate through a normative assessment of the needs of both the Centre and States.

The Sixteenth FC dropped Article 275 revenue needs grants, arguing that the revenue deficit of States was low in magnitude, amounting to only 0.3 per cent of GDP in 2022-23 and 2023-24 (Table 5.9 of the report). However, this figure was derived by adjusting surpluses of revenue-surplus States against deficits of deficit States. It would have been appropriate to add revenue deficits of deficit States, which amounted to 0.8 per cent of GDP in 2023-24. Effectively, it relied only on tax devolution, a transfer instrument that cannot be used for fine targeting.

The share of Centre and States as percentage of combined revenue receipts has gone back to what was in the Tenth FC period. There is fiscal concern now due to excessive reliance by the Centre on non-shareable cesses and surcharges and discontinuation of revenue deficit grants. The vertical dimensions of transfers require a careful relook.

Robust battery ecosystem vital for clean energy shift

India must act now on minerals, components, technology, finance, and skills for battery manufacturing

Labanya Prakash Jena
Aayush Anand

India's clean energy story has so far been told in terms of gigawatts of solar and wind capacity additions. The next chapter will be told in gigawatt-hours. The ability to store cheap power and release it when it is needed is becoming increasingly important for energy transition.

Battery Energy Storage Systems (BESSs) can help in this. The Central Electricity Authority estimates that India will need about 47.24 GW/236 GWh of BESSs by 2031-32, alongside 26.69 GW/175 GWh of pumped storage.

India had roughly 1 GWh of domestic cell-making capacity at the end of 2025, against about 60 GWh of pack assembly. We can assemble batteries, but cell manufacturing remains in its early stages. An IEEFA analysis puts it bluntly: nearly every battery cell powering India's shift is imported, mostly from China. The Production Linked Incentive (PLI) scheme for Advanced Chemistry Cells, launched in 2021 with a 50 GWh target by the end of 2025, was meant to change this. However, by October 2025, only 1.4 GWh, or 2.8 per cent of the target, had been commissioned.

THE WEAK LINKS

There are five areas where India faces important constraints.

The first is minerals. India has effectively no domestic lithium refining capacity, and 68 per cent of its lithium imports in 2025 came from China. The 5.9 million-tonne lithium resource identified in Jammu and Kashmir has yet to translate into an operating mine. It will take years and may be decades to operationalise it.

The second constraint is components. A battery cell is only as local as the materials that go into it. China controls about 99 per cent of graphite anode production and more than 80 per cent of cathode materials.

A high concentration of this important material makes it a geopolitical bargaining chip.

The third constraint is technology and manufacturing know-how. The first PLI winners were first-time cell manufacturers, and they have faced difficulties with equipment installation, domestic value-addition requirements and the availability of specialised technical personnel. This is not unusual for a new industry, but it means that India needs to shorten the learning curve.

The fourth constraint is finance. As the IEA has pointed out, higher financing costs have been one reason some planned storage projects in India have been delayed or abandoned. Aggressive bidding can make this problem worse because projects must remain financially viable over their entire operating life, not just win a tender.

And fifth, India needs more cell testing and certification facilities and a larger pool of trained manpower. Without these, even a well-funded factory can struggle to reach stable commercial production.

STORAGE. Availability of power when needed is important ISTOCKPHOTO

STRENGTHENING BESS CAPACITY

What India needs now is a shift from looking only at battery projects to building the ecosystem around them. The starting point should be the supply chain itself.

Cell factories require refined minerals and locally available components, so India needs greater capacity for lithium and graphite refining, as well as for cathodes, anodes, separators, and electrolytes. The experience of the solar industry is a useful reminder that assembling imported products is not the same as building an industry.

The PLI scheme also needs to be made more practical and focused on execution. A gradual domestic-value-addition path starting at 10-15 per cent and rising over seven to eight years. Linking incentives to realistic milestones and actual production can help ensure that announced capacity becomes working capacity.

India also needs to be pragmatic about technology. Joint ventures, licensing arrangements and technology partnerships with established global players can reduce the time needed to build manufacturing capability.

Demand can also be used to build supply. A predictable requirement for locally made cells or components can give manufacturers confidence to invest without creating a sudden cost shock for storage projects. Calibrated customs duties can support this transition.

India should also keep an eye on the next generation of battery technologies. Sodium-ion batteries are one example. A national effort focused on pilot plants, research, hard carbon from agricultural waste, and support for start-ups could help India participate earlier in the next stage of battery innovation.

Finally, storage projects should have easier access to green and climate finance. Also, investments in testing laboratories, recycling, safety, and skills need to move in step with manufacturing rather than be treated as an afterthought.

If India acts now on minerals, components, technology, finance, and skills for battery manufacturing, it will not only make the country's energy transition resilient but also create a massive export opportunity.

Cyber security

This refers to 'Yes Bank's costly procedural lapse' (October 26). The Yes Bank AT-1 bond write-off case underscores a fundamental principle: loss absorption must comply with the law. In March 2020, Yes Bank wrote off AT-1 bonds worth approximately ₹8,415 crore during its reconstruction. The dispute concerned whether the final reconstruction scheme authorised the write-off and whether due legal process was followed. A bank's rescue cannot legitimise an action lacking legal authority.
AT-1 bonds carry the risk of total principal loss, but such loss must be imposed in accordance with the applicable regulatory framework and contractual terms. Banking resolution must balance financial stability, depositor protection and investor rights with strict adherence to the rule of law.

Srinivasan Velamur
Chennai

Opportunity for Jio

This is with reference to 'Jio 2.0' (October 26). The editorial has made an important observation that Reliance Intelligence is outside the Jio Platforms and that the convergence of these two could expand Jio's market. Therein lies a huge opportunity for Jio to make an intelligent transition from affordable connectivity to affordable intelligence. However, it all depends on several factors such as utilising AI to enhance network efficiency and to develop applications that address the real world problems for the ordinary users, rather than merely offering some novelty features. For instance, Jio can make useful intelligence accessible to farmers, students, small-scale enterprises and others at affordable prices. The convergence should ultimately benefit both shareholders and the wider economy.

Kosaraju Chandramouli
Hyderabad

Passive investing

Apropos of 'SEBI needs to hear passive investor' (October 26). As passive funds grow, market rules cannot remain designed mainly around active traders. Index funds must transact near the closing price to track benchmarks faithfully, yet limited liquidity can impose costs on millions of small savers. SEBI should deepen the closing auction, encourage wider participation and examine whether market-making arrangements can improve liquidity without distorting price discovery. Concerns about manipulation are valid, so safeguards and surveillance must accompany reform. Tax rules should also avoid penalising institutions that provide liquidity. Passive investing has become an important channel for household savings. Regulation must recognise this reality and ensure that market structure evolves alongside changing investment behaviour without compromising fairness or stability.

Some implications of the recent RBI measures

R Mohan

The Reserve Bank India (RBI) recently announced a set of measures relating to the foreign exchange market. The implications of these measures especially on banks and trade-related transactions need closer examination.

RBI STEPS. Need for clarity REUTERS

THE MEASURES

Restriction on rebooking: Authorised Dealers (ADs) shall not permit the rebooking of a foreign exchange derivative contract that has already been cancelled with any AD.

Reduction in the threshold: The threshold for undertaking foreign exchange derivative transactions without establishing an underlying exposure has been reduced from $100 million to $5 million.

Declaration by users: ADs shall obtain a declaration from users entering into foreign exchange derivative contracts that the underlying exposure has not been booked with another AD.

Forex Exposure Risk Reserve (FERR): ADs are required to maintain a separate reserve with RBI, equivalent to 20 per cent of the notional amount, for specified derivative contracts of value over $2 million.

THE IMPLICATIONS

The reduction in the threshold for undertaking foreign exchange derivative transactions without establishing the underlying exposure from $100 million to $5 million is particularly striking. Does this magnitude of reduction signal a change in risk assessment? Market participants would like to have a clearer understanding of the considerations underlying this recalibration so that they could change and adapt their practices accordingly.

The requirement to maintain FERR has another dimension that deserves attention.

To the extent that these balances are maintained interest-free with the RBI, they represent an opportunity cost for banks. They also impose an additional liquidity burden, since a portion of the banks' resources would be tied up without generating a return.

Banks are likely to pass on this additional cost to their customers. This would, however, increase the cost of hedging and could discourage some importers from booking forward contracts.

RBI has in the past, expressed its concern over the growing unhedged foreign exchange exposures of market participants. So this measure could unwittingly aggravate the very risk that the regulatory framework seeks to mitigate.

The RBI could consider the possibility of recognising FERR balances, either in full or to a specified extent, for CRR purposes, with a view to easing the additional liquidity burden on banks, without, of course, diluting the intended safeguard. Such a step could help mitigate the cost of compliance while preserving the regulatory objective behind the measure.

The impact of the third measure that places new restrictions on legitimate, staggered hedging by importers too merits attention.

Consider an importer who anticipates a foreign currency requirement of $5 million. The importer books a forward contract for $1 million at an exchange rate of ₹95 to the dollar. On the following day, the dollar weakens to ₹94.80. The importer may then wish to book another forward contract for $1.5 million, leaving the balance to be covered in stages.

Such a staggered booking need not be speculative. It may simply reflect a prudent treasury decision to spread the timing of hedging transactions in response to market movements, while underlying exposure remains genuine.

If restrictions intended to prevent the splitting of transactions to circumvent the FERR requirement also constrain such legitimate practices, it could limit the flexibility available to businesses in managing their foreign exchange risks.

RBI, in consultation with FEDAI, may consider whether a suitable clarification or refinement would help preserve legitimate hedging flexibility without diluting the intended safeguards. RBI must ensure that its measures to contain risk do not make prudent risk management unnecessarily costly.

India and the US oil nexus

Marco Rubio's visit cements a partnership that makes India a partner in US' oil strategy

GETTYIMAGES/ISTOCKPHOTO

US Secretary of State-cum-National Security Advisor Marco Rubio's recent visit to India did raise a number of questions regarding its objectives. It intrigued observers especially because Rubio chose to avoid capital city Delhi, went straight to the country's commercial capital Mumbai and then paid a visit to the Reliance Industries Limited (RIL) Jamnagar petroleum refinery complex. Accommodating this unusual itinerary, Foreign Minister S Jaishankar flew to Mumbai for discussions with Rubio.

Rubio, it must be noted, is second only to Trump in the current US administration and is even considered a possible contender for the Republican nomination as Presidential candidate for the next election, displacing JD Vance. The signals are clear, while the thin smokescreen of finalisation of a long-stalled trade agreement with India was invoked as cover, Rubio's principal objective was to institutionalise a strategic partnership with India, which had oil as its core.

The Trump administration's dilemma on the oil front is the driver. Its unthinking decision to go to war against Iran, prompted by the belligerent and power-hungry Netanyahu, has proved a failure on multiple counts. None of the shifting objectives Trump set for the campaign — stretching from ending Iran's nuclear weapons programme to regime change—have been realised. Meanwhile, the war has triggered retaliation from Iran and its Houthi allies that have virtually shut down the Strait of Hormuz and the Bab el-Mandeb Strait, severely affecting the flow of oil supplies to world markets. That in turn has undermined the US effort to ensure stable oil prices, including at home, spurring inflation and challenging the supremacy of the dollar and the legitimacy of a Trump administration battling an "affordability crisis".

Unwilling, as yet, to settle and pull out of Iran, but faced with growing domestic discontent over the consequences of the Iranian misadventure, the 'oil question' has become central to Trump's foreign policy. That was established when he signed a deal with President Vladimir Putin to import Russian diesel, despite signing the Lindsey O. Graham Sanctioning Russia and Iran Act of 2026, which prohibits fuel imports from Russia and threatens penal tariffs on other buyers of Russian fuel. Partial national interest waivers have been announced to facilitate the recent deal. In addition, Trump seems committed to protect Russian production and has criticised President Volodymyr Zelenskyy of Ukraine for attacking Russian energy facilities with drones that adversely affect production and supplies.

As part of that oil focused strategy, the Trump administration has turned to the access it has got to new supplies of oil, following its aggressive intervention against Venezuela and the abduction of President Nicolas Maduro in violation of international law. To exploit that "success", the US agenda in Venezuela has moved from preventing that country's use of its own oil reserves through sanctions that disrupt production and trade, to using those reserves as a means of restoring American hegemony.

VENEZUELA OIL

That Venezuelan oil was the driver of America's aggression is clear from what has transpired following the institution of a more pliant regime under Delcy Rodríguez. Trump and Rodriquez signed an agreement under which the US Defence Department has acquired a 35 per cent stake in a joint venture with North American Blue Energy Partners (NABEP), that operates 17 oil fields, which the US claims account for proven reserves of 65 billion barrels. The US has the right to purchase 20 per cent of the joint venture's production at cost, and first access to the rest of the produce. Struggling to restore global supplies and rein in oil prices, the US sees Venezuela as a potential substitute for Saudi Arabia, which has the world's second largest reserves of 267 billion barrels, but is unable to transport its crude and oil with the closure of the two Straits. Moreover, Saudi Arabia's production facilities are turning out to be easy targets for Iranian and Houthi drones and missiles.

CHART 1

Global oil wealth

Top 10 oil reserves by country: 2025 (million barrels)

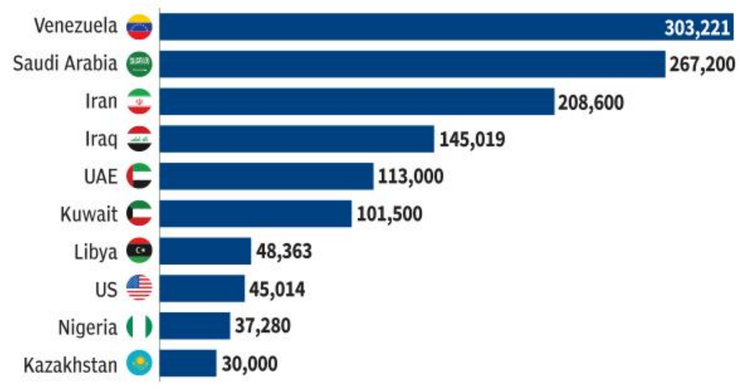

CHART 2

Venezuela's oil profile

Oil production in Venezuela (million barrels per day)

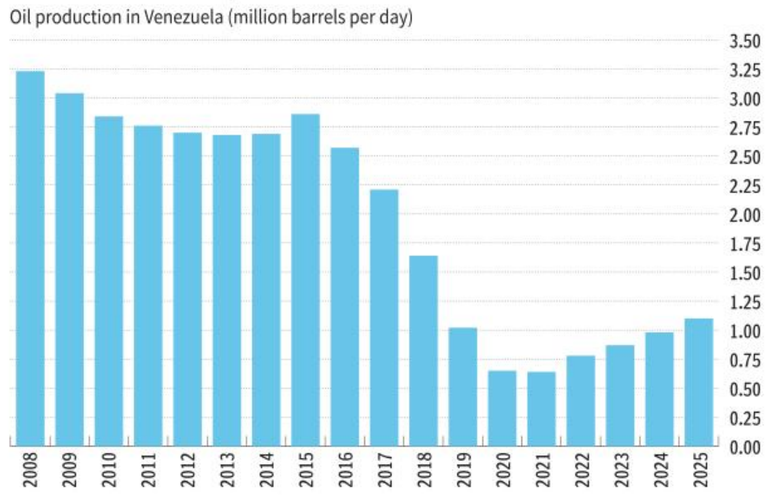

CHART 3

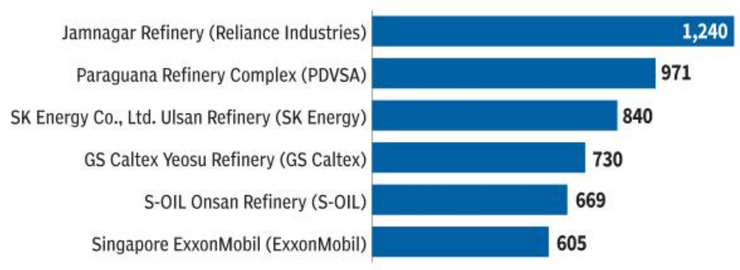
Global refining capacity

Capacities of the worlds largest refineries as of 2023 (in 1,000 barrels per day)



The Trump administration wants RIL to absorb more crude from Venezuela, and pump more refined products into the world economy

Unfortunately, the task is easier set that done. Venezuela, according to OPEC statistics, harbours the largest oil reserves by country in the world, of an estimated 303 billion barrels (Chart 1). But there are many problems with exploiting those reserves.

First, according to experts interviewed by Associated Press, recoverable reserves (and therefore actual proven reserves) in Venezuela are only a third of the figure reported by OPEC.

Second, because of sanctions imposed and domestic turmoil partly engineered by the US, oil production in Venezuela collapsed over the last decade, from 2.9 million barrels per day in 2008 to 0.65 million barrels in 2021 (Chart 2). That left production facilities in a state of partial disrepair, and though production had revived to 1.1 million barrels per day in 2025 (and a reported 1.2 million barrels in 2026), remains way below the previous peak. Getting production to levels that would make a significant difference to global supplies and help moderate prices in the medium term requires large investments. American firms whom Trump demands must advance the needed capital are reticent.

Finally, even the crude that can be extracted from Venezuelan fields is Merey crude that is not only ultra-heavy, but also high in sulphur. That requires refining capacity with a high level of complexity and equipped with coking units, and legacy plants geared to dealing with lighter varieties are not up to the task. According to reports, there is a relatively small share of global refining capacity that is capable of handling significantly heavier and sulphur rich crude.

RELIANCE'S ROLE

That is where RIL and India enter into the US strategy, to pursue which Rubio arrived in Jamnagar. Reliance owns the world's largest refining capacity (Chart 3), and both because of when it chose to establish its facilities and its strategy, that capacity is capable of processing heavy and sulphur-rich crude. Using that capacity, Reliance has over the years emerged as a major exporter of refined petroleum products, especially much-needed diesel. According to Reuters estimates, RIL exported 21.66 million tonnes of refined petroleum products in the first half of 2025, with diesel contributing 9.81 million tonnes, followed by petrol at 6.14 million tonnes and jet fuel at 2.06 million tonnes. Not too long ago, RIL courted controversy by importing discounted Russian crude when US was more seriously pursuing sanctions on that country. But it has diversified away, partly because Russia's discounts have also been phased out. Now, among RIL's crude sources is Venezuela, with imports from that country rising after the US intervention.

The Trump administration wants RIL to absorb more crude from Venezuela, and pump more refined products into the world economy. Rubio has reportedly declared that the Jamnagar plants of Reliance are an "impressive facility" and that India is a "refining superpower". That recognition gives RIL's Jamnagar facility a crucial role in refining crude from the "Western hemisphere", as part of the US strategy of improving supplies to both US and global markets. This strengthening relationship between RIL and the US goes even further. Reliance is a major backer of the biggest refining facility being set up by America First Refining at the Port of Brownsville in the US, with a binding 20-year commitment to purchase and handle a major share of that refinery's output.

In sum, there is a new nexus between the US and India that runs through RIL, where RIL makes profits and India becomes a partner in a US strategy that may turn more aggressive after the mid-term elections.

Brazil's stock index hit lower circuit on Lula win

New York/Brasilia/London: Brazil's stock exchange halted trading via a circuit breaker safety mechanism on Monday in the wake of President Luiz Inacio Lula da Silva's re-election, undoing bullish investor sentiment after his right-wing rival led the first round of voting earlier in the month. The real weakened around 12 per cent against the US dollar. Trading on Brazil's stock exchange was halted for 30 minutes after the benchmark Ibovespa index fell 10 per cent, triggering the market's circuit breaker mechanism, stock exchange operator B3 said. The move came after B3 had initially expanded the daily trading limits for Ibovespa futures, dollar futures and interest rate futures in response to heightened market volatility. REUTERS

ICICI Pru fund invests ₹210 cr in Raymond Realty

New Delhi: Raymond Realty on Monday said it has raised ₹210 crore from ICICI Prudential Real Estate Development Fund to finance a project in Mumbai region. In a regulatory filing, the company informed that its subsidiary Ten X Realty West Ltd has agreed to secure a financial investment of ₹210 crore from the Fund. Raymond Realty and the Fund will jointly invest in Ten X Realty West for facilitating the redevelopment for one of its projects in the MMR (Mumbai Metropolitan Region). The ICICI Prudential Real Estate Development Fund is a scheme of ICICI Prudential Real Estate AIF, a Category II AIF (Alternate Investment Fund). PTI

Brokerage profits grow in September quarter despite market slowdown

PAY DOWN. Margin funding cushioned weaker trading activity as cash market turnover fell 11.7% q-o-q

Our Bureau
Mumbai

Brokerage firms reported strong year-on-year (y-o-y) profit growth in the September quarter despite a slowdown in market activity, as higher contributions from margin funding and other businesses helped support earnings.

Combined average daily equity cash-market turnover on the NSE and BSE fell 11.7 per cent sequentially to ₹1.29 lakh crore in the July-September quarter as rising global bond yields, foreign investor outflows, higher oil prices and regulatory changes weighed on market sentiment and trading activity.

Groww parent Billionbrains Garage Ventures reported a 54 per cent y-o-y increase in consolidated profit after tax (PAT) to ₹725.65 crore, while revenue from operations rose 47.4 per cent to ₹1,501.53 crore. The contribution of equity derivatives to revenue declined to 45 per cent from 57 per cent a year earlier.

CAS IMPACT

The introduction of the closing auction session (CAS) in August also coincided with a decline in derivatives turnover.

Groww said the fall in derivatives' share of income was "driven by market adjustments to CAS," adding that it expected a recovery after SEBI's reviewed measures take effect. The company also reported growth in its margin trading facility and wealth businesses.

Mixed show

Brokerage	Net profit (₹ cr)	NP change YoY (%)	Revenue (₹ cr)	Revenue change YoY (%)
Groww (Billionbrains Garage)	725.65	53.9	1,501.53	47.4
Angel One	334.97	58.2	1,427.00	18.9
HDFC Securities	264.66	26.3	964.61	37.6
Kotak Securities	348.00	0.9		
ICICI Securities	438.86	3.3	1,663.33	16.9
Anand Rathi Share	41.94	50.3	273.21	20.3
5paisa Capital	7.06	-25.5	86.42	12.0
Geojit Financial	16.54	-26.1	165.82	2.6

Angel One reported a 58.2 per cent rise in consolidated PAT to ₹335 crore, while gross revenue grew 18.9 per cent to ₹1,427 crore. Its client base grew 17.3 percent to nearly 400 crore. It said that the stronger growth in profitability reflected operating leverage and an expanding earnings base. Gross broking income accounted for about 55 per cent of revenue, compared with nearly 60 per cent a year earlier.

The number of orders processed by Angel One fell to 366 million from 406 million in the earlier quarter. However, its average client funding book grew 40.5 per cent y-o-y to ₹7,450 crore.

Kotak Securities reported a profit of ₹348 crore in the September quarter.

Anand Rathi Share and Stock Brokers reported a 50.3 per cent increase in PAT to ₹41.94 crore, while revenue from operations rose 20.3 per cent to ₹273.21 crore. Interest income from its MTF business increased 36 per cent to ₹49.6 crore.

The performance was weaker at 5paisa Capital, where revenue from operations grew 11.8 per cent to ₹86.46 crore, but PAT fell 25.5 per cent to ₹7.06 crore.

Geojit Financial Services also reported lower earnings, with consolidated PAT declining about 26 per cent y-o-y to ₹16.54 crore, while revenue rose 2.6 per cent to ₹165.82 crore.

Rising crude oil prices, hike in lending rates affect sentiment for small-caps

Top losers in Nifty small-cap 100

	Oct 26 (₹)	Oct 12 (₹)	% change
CreditAccess Grameen	998	1,322	-24.51
Himadri Sp. Chem	512	661	-22.54
Urban Company	132	163	-19.02
Deepak Fertilisers	1,148	1,400	-18.00
Ola Electric	30	36	-16.67
• Reliance Power	17	20	-15.00

Source: NSE

Suresh P Iyengar
Mumbai

After the dream run, small-cap company stocks are facing the tremors of rising crude oil prices and prospects of hike in lending rate which are expected to hit their earnings growth in the second half of this fiscal.

In the last two weeks, the Nifty small-cap 100 index has dropped 7 per cent or 1,441 points to 17,985 points on Monday from 19,426 points on October 12. Similarly, all the indices tracking the small-cap stocks have crashed as investors rushed to book profits. However, the Nifty small-cap 100 was up 246 points (1.38 per cent) at 17,985 on Monday against 17,739 logged on Friday.

Some of the stocks that have faced the brunt include CreditAccess Grameen and Himadri Speciality Chemical that have crashed 25 per cent and 23 per cent, respectively, to ₹998 and ₹512 in last two weeks.

Similarly, Deepak Fertilisers and Ola Electric Mobility were down 18 per cent and 17 per cent, respectively, to ₹1,148 and ₹39 since October 12.

RECORD INFLOWS

The small cap stocks have registered a sustained rally in the last few months with steady flow in small-cap mutual fund schemes. The net investment in small-cap mutual funds hit a new high of ₹24,779 crore in the September quarter against Rs 17,433 crore, despite most analysts cautioning on possible wild swing in small cap companies stock prices.

The high valuations in the large-cap stocks amid flat earnings growth had driven investors to chase the small-cap cap companies.

Vikas Gupta, CEO & Chief Investment Strategist, OmniScience Capital, said high crude oil prices drive high inflation which in turn requires high interest rates to bring it in control. Under such circumstances economic growth is at risk.

"The smallcap revenue and earnings growth is dependent on the global and Indian economy doing well. On top of this, the smallcaps were priced to perfection with the high PE ratios," he said. Even after the fall, he added the valuations remain elevated and investors are probably wary of smallcaps and are selling them as forecasted growth rates are at risk, he added.

Hitesh Tailor, Technical Research Analyst, Choice Broking, said the recent sharp correction in the Nifty Smallcap 100 reflects heightened selling pressure following its rally to an all-time high near 20,187 points.

The MCX crude oil November futures are trading about ₹9,600 per barrel, along with higher lending rates, could weigh on investor sentiment and keep volatility elevated in the small-cap segment, he added.

Nifty snaps four-day losing streak on pull-back rally

Anupama Ghosh
Mumbai

The markets pulled off a dramatic turnaround on Monday, with the Nifty 50 touching an intra-day low of 22,387 before clawing back nearly 370 points to close well in positive territory.

The Sensex settled at 73,606.75, gaining 482.92 points, after bottoming at 72,514.57 intra-day. The Nifty 50 closed at 22,753.20, up 153.20 points, snapping a four-session losing streak. Broader markets outpaced the benchmarks, with the Nifty Midcap 100 rising 1.19 per cent and the Nifty Smallcap 100 gaining 1.38 per cent, a partial recovery after last week's combined collapse of over 12 per cent.

"The rebound was triggered by buying near the recent support zone, a pull-back in crude from last week's high and strength in healthcare and select heavyweight stocks," said Hariselvan Radhakrishnan, Founder and CEO of HST Wealth.

Sectorally, metal, pharma, healthcare, oil and gas and capital goods led the advance. The Nifty Metal index gained 2.2 per cent, supported partly by India's draft National Steel Policy Vision 2047, which targets domestic crude steel capacity of 604 million tonne.

JioBlackRock launches 'Advantage World Equity Fund' in GIFT City

Our Bureau
Mumbai

Sid Swaminathan, MD and CEO, JioBlackRock AMC

JioBlackRock International AMC (IFSC), a wholly owned subsidiary of JioBlackRock Asset Management, has launched a new Fund of Fund that will invest in BlackRock Advantage World Equity Fund.

The newly launched open-ended fund, 'Advantage World Equity Fund (IFSC), will broaden access to investment opportunities for Indian investors by providing a gateway to international markets through GIFT City.

The fund has been designed to provide investors access to global equity markets through a feeder-fund structure that will invest primarily in a globally diversified active equity strategy.

The underlying fund has a track record of over eight years and seeks to complement investors' domestic portfolios with exposure to global companies, sectors and long-term growth themes across developed markets, including the US, Europe and Japan.

It is managed by BlackRock's Systematic Active Equity team, which brings more than four decades of experience in systematic investing. Sid Swaminathan, MD and CEO, JioBlackRock Asset Management, said the fund launch in GIFT City represents a significant step in democratising access to global investing opportunities.

The minimum investment will be $5,000 and indicative total expense ratio for direct plan will be 0.90 per cent and regular plan 1.40 per cent.

Markets will reward growth not just size: Helios' Dinshaw Irani

bl.interview

Mahesh Ravidas Nayak
Mumbai

India's long-term growth story remains intact despite near-term volatility, says Dinshaw Irani, MD & CEO of Helios Capital Asset Management.

Irani explains why mid- and small-caps continue to offer attractive opportunities, how Helios' "elimination investing" framework guides stock selection and why policy measures to attract foreign capital are crucial in the current environment.

Edited excerpts:

How do you view the current state of the Indian market amid global uncertainties?

We have seen markets through scams, wars, sanctions, global financial crises and Covid.

Despite all these disruptions, markets have delivered wealth over time. India remains in a sweet spot.

With a young workforce, rising digital adoption and strong economic foundations, I believe the country can sustain nominal GDP growth of around 10 per cent plus over the long term.

Short-term concerns come and go, but the larger growth story remains intact.

What gives you confidence about India's long-term growth trajectory?

The JAM trinity, Jan Dhan, Aadhaar and mobile connectivity, has transformed economic participation.

We have near-universal access to banking, a robust digital identity framework and inexpensive data.

Combined with a young and aspirational population, these factors create a powerful platform for growth.

Investors have been worried about employment and inequality. How do you see this challenge?

Job creation has to come primarily from private-sector capex. Government spending on infrastructure improves productivity, but when the private sector invests, entire ecosystems emerge around factories and manufacturing hubs.

> Many mid- and small-cap companies operate in sectors such as platform businesses, auto components, precision engineering and consumer discretionary, where growth rates remain stronger than those of traditional large-cap sectors
>
> **DINSHAW IRANI**
> MD & CEO, Helios Capital Asset Management

Encouragingly, many companies are talking about capacity expansion. If private capex accelerates, employment opportunities will improve significantly.

Mid- and small-caps have corrected recently. Is their growth story still intact?

Absolutely. Markets ultimately reward growth.

Many mid- and small-cap companies operate in sectors such as platform businesses, auto components, precision engineering and consumer discretionary, where growth rates remain much stronger than those of traditional large-cap sectors.

There will be periods of correction, but the long-term growth drivers remain intact.

When money becomes dearer, it looks for growth. It does not go to a market merely for safety.

Foreign investors have reduced exposure to some large-cap names. What explains this shift?

Foreign investors have broadened their universe. Earlier, their focus was concentrated in a handful of large-cap companies.

Today, they are discovering a much wider set of opportunities across mid- and small-caps.

They are increasingly investing in businesses offering superior growth rather than simply buying size and liquidity.

What policy changes could help revive foreign portfolio flows?

Taxes remain a key concern for foreign investors. India should consider a temporary moratorium on capital gains taxes for new foreign inflows.

Such a move could significantly improve the attractiveness of Indian markets and encourage capital to return.

There are concerns about slower growth in IT services despite the AI boom. How do you interpret that?

AI is not a bubble in the traditional sense. Unlike previous speculative cycles, investments are being funded largely by corporates and private capital.

AI infrastructure spending is already contributing to economic growth, particularly in the US.

Over the long term, AI adoption will continue to create efficiency gains and new opportunities.

Having said that, we believe AI will be a big disruptor for our traditional large cap IT service players.

What is your key message for retail investors?

If you are looking at investing on your own, please take it as a full-time job.

It is not a hobby and it is not a pastime.

BROKER'S CALL.

Choice Institutional Equities

APOLLO MICRO SYSTEMS (BUY)
Target: ₹525
CMP: ₹411.25
Apollo delivered a record Q2FY27 performance, with consolidated revenue/EBITDA/PAT growing 72 per cent/88 per cent/54 per cent year on year, respectively. However, consolidated order-book increased marginally to ₹1,765 crore, making conversion of the strong order pipeline into confirmed orders a key monitorable for sustaining near-term growth.
The MIGM programme remains the key near-term trigger, with user trials completed and an order targeted by February 2027, as per the management. Apollo's position as the sole supplier of key electronic subsystems and sensors provides significant upside potential upon order award. Opportunities across Pinaka, QRSAM and heavyweight torpedoes could support order inflows over the next few quarters. The management indicated that the order-book could exceed ₹2,000 crore by FY27-end, excluding MIGM, while reiterating revenue growth guidance of 35-45 per cent.
We view this guidance as achievable only with timely conversion of the identified pipeline and a smooth ramp-up of expanded manufacturing capacity.
We remain constructive on Apollo's transition towards an integrated weapons-system player. The proposed acquisition of Premier Explosives and Shauryastra's focus on complete weapon systems offer long-term growth potential and broaden its presence across the missile value chain. We raise our target price to ₹525, valuing the stock at 50x average FY28E-FY29E EPS, and upgrade our rating to Buy from Reduce.

IDBI Capital Equity

DCB BANK (BUY)
Target: ₹233
CMP: ₹192.35
DCB Bank delivered a strong Q2FY27, with record profit, improved operating leverage and cleaner asset quality, despite FCNR(B)-led margin pressure. Advances grew 21 per cent year on year to ₹64,127 crore while deposits rose 19 per cent to ₹76,839 crore.
NII increased 17 per cent to ₹699 crore, while NIM declined 10 bps quarter on quarter to 3.25 per cent. Other income grew 34 per cent to ₹249 crore, and PPOP rose 26 per cent to ₹383 crore.
Cost-to-income improved to 59.64 per cent, an 18-quarter low. PAT rose 29 per cent to ₹236 billion, marking the fifth consecutive quarter of record profit. GNPA/NNPA declined to 2.29 per cent/0.73 per cent, both 23-quarter lows.
The bank raised $194 million in August and non-resident TDs increased to 9.1 per cent of TDs. High-cost bulk deposits were run down, reducing inter-bank TDs to 19 per cent. CASA declined to 22.3 per cent, while CD ratio improved to about 83.5 per cent as surplus liquidity was deployed. Fresh slippages stood at ₹437 crore (2.94 per cent), with recoveries/upgrades covering 97 per cent. Non-gold slippages were 1.55 per cent, while gold slippages rose to 8.04 per cent. PCR excluding technical write-offs improved to 68.75 per cent, with ₹218 crore of floating provisions. CAR stood at 16.63 per cent.
The management retained 18-20 per cent growth guidance and expects NIM improvement in Q3/Q4. We maintain Buy with TP of ₹233, valuing the stock at 0.93x FY28E BVPS of ₹250.

TODAY'S PICK.

Aegis Logistics (₹1,290.95): BUY

Gurumurthy K
bl. research bureau

The short-term outlook for Aegis Logistics is bullish. The stock has traded sideways since July. The trading range has been ₹1,165-₹1,500.

Within that range, the bounce from the low of ₹1,209 happened just above the lower end. This suggests the broader sideways range remains intact. That keeps the chances high for Aegis Logistics share price to go higher towards ₹1,500, the upper end of the range, in the coming weeks.

Traders can buy Aegis Logistics shares now at ₹1,291. Accumulate on dips at ₹1,230. Keep the stop-loss at ₹1,145.

Aegis Logistics

Trail the stop-loss up to ₹1,315 as soon as the stock hits ₹1,355. Revise the stop-loss higher to ₹1,395 and ₹1,435 when the price touches ₹1,425 and ₹1,455, respectively. Exit the long positions at ₹1,485.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading

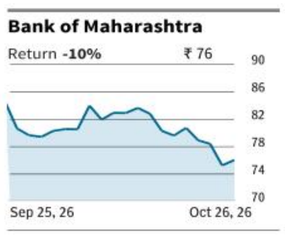
BoM reports 41% jump in Q2 profit at ₹2,310 crore



Mumbai: Bank of Maharashtra (BoM) reported a 41 per cent year-on-year (yoy) jump in second quarter net profit at ₹2,310 crore, its highest in eight quarters, on the back of robust growth in net interest income and other income. The Pune-headquartered public sector bank, which reported a net profit of ₹1,633 crore in the year ago quarter, logged a robust growth in advances amid improvement in asset quality. Net interest income was up 22 per cent yoy to ₹3,954 crore (₹3,248 crore in Q2FY26). Other income, comprising commission income from non-fund based banking activities, fees, earnings from forex and derivative transactions, profit and loss (including revaluation) from investments, and recoveries from accounts previously written off, rose 34 per cent y-o-y to ₹1,129 crore (₹845 crore). Net interest margin improved to 3.97 per cent in the reporting quarter (3.85 per cent). OUR BUREAU

FCNR(B) rush squeezes margins; pvt banks feel heat more than PSU peers

BIG IMPACT. Private lenders raise FCNR(B) at 7.5-10% of deposits versus 2-2.5% for public sector banks

Mahesh Ravidas Nayak
Mumbai

The aggressive mobilisation of Foreign Currency Non-Resident Bank [FCNR(B)] deposits increasingly weighed on bank margins during the September quarter, with private lenders bearing a disproportionate impact owing to their larger participation in the RBI's FCNR(B) drive.

A comparison of the September quarter earnings shows that private banks, despite reporting stronger loan and deposit growth, witnessed sharper compression in net interest margins (NIMs) than most public sector peers.

PSU RESILIENCE

Among private banks, Kotak Mahindra Bank reported the steepest decline, with NIM falling 44 basis points year-on-year to 4.1 per cent. Axis Bank's NIM declined 37 basis points to 3.36 per cent, while ICICI Bank's margin slipped 12 basis points to 4.18 per cent. HDFC Bank, the largest private lender, reported a 14-bps decline in NIM to 3.16 per cent. In contrast, PSU banks displayed greater resilience. Union Bank of India reported NIM expansion of 19 basis points to 2.86 per cent, while Central Bank of India's margin improved 12 basis points to 3.01 per cent. Bank of India's NIM declined by a modest six basis points to 2.41 per cent.

"The impact has been far more pronounced for private banks because their FCNR (B) mobilisation was significantly higher relative to their existing deposit base. While PSU banks mobilised FCNR(B) deposits equivalent to roughly 2-2.5 per cent of deposits, private lenders such as ICICI Bank, Kotak Mahindra Bank and Axis Bank raised FCNR(B) deposits amounting to about 7.5-10 per cent of their deposit base. As a result, a larger pool of funds remained parked in lower-yielding assets pending deployment, leading to greater pressure on margins." said Siddharth Rajpurohit, Lead Analyst - Banking and non-lending financials, Systematix Group.

"FCNR(B) inflows created a near-term pressure on margins as we carried excess liquidity during the quarter, said Ashok Vaswani, MD & CEO, Kotak Mahindra Bank during the media call. "The funds have been used to replace costlier borrowings and support growth opportunities. As the remaining liquidity is deployed into higher-yielding assets and repo-linked loans are repriced, we expect the margin impact to gradually moderate while NIMs remain broadly stable through the second half of the year," he said.

Anshul Chandak, Head Treasury, RBL Bank, said the margin impact is temporary and reflects the cost of raising and hedging these deposits before they are fully deployed.

"From next quarter, you will start seeing improvement in NIMs," Chandak said. He noted that while FCNR(B) deposits initially weigh on margins because of their cost structure, the drag should ease as banks deploy the funds and balance sheets adjust.

UNDER PRESSURE

For most banks, the impact is expected to normalise by the December quarter. However, lenders that raised FCNR(B) deposits disproportionately relative to their balance-sheet size could take longer to absorb the costs. Analysts expect the gap to narrow over the next two quarters as FCNR(B) funds are deployed and hedging costs stabilise. Until then, the banks that led the FCNR(B) drive are likely to continue reporting a greater impact on margins than their PSU peers.

"The FCNR(B)-related drag on margins is temporary," said Rajpurohit. "Some impact could still persist in the December quarter as banks continue deploying these funds, but the pressure should start easing as the excess liquidity is put to work and repo-rate transmission normalises. By the fourth quarter, margins should largely stabilise, with the benefits of asset repricing and improved deployment of FCNR(B) funds helping offset the earlier drag," he said.

On deposits, the bank mobilised around ₹11,000 crore, or $1.2 billion, in FCNR(B) deposits under the special window, and said the entire amount had been "suitably" deployed. Even without the FCNR(B) mobilisation, our deposits grew 17 per cent, the MD said.

$500-B ECB FUNDING

IOB is targeting $500 million in fundraising through the RBI's ECB window by December. He said around $250 million had been finalised, with the remaining amount under discussion with banks and agencies.

On the expected credit loss framework, IOB had already made around ₹2,700 crore in provisions, which the MD expects to cover the bank's anticipated requirement.

The bank will continue building buffers over the next two quarters, he added.

Margin crunch

SBI chief expects repo rate to be hiked by 50 bps in next MPC meet

Our Bureau
Mumbai

CS Setty , SBI Chairman

There may be a 50 basis points (bps) hike in the repo rate in the Monetary Policy Committee's December 2026 bi-monthly monetary policy review meeting, according to State Bank of India Chairman CS Setty.

This will be followed by a pause till March-end 2027, he said at a BFSI Summit organised by *Business Standard*.

The RBI's rate-setting had upped the policy repo rate by 25 basis points from 5.25 per cent to 5.50 per cent and changed the monetary policy stance from neutral to calibrated tightening at its last meeting (October 5- 7) amid rising inflationary pressures even as growth has been resilient.

Setty observed that increase in interest rates will definitely influence the composition as well as the quantum of credit demand, but not necessarily immediately.

"I think rate-sensitive sectors, particularly the discretionary spending related borrowings probably would moderate. But I would like to differentiate between weakening credit cycle and moderation in the credit demand. I think we need to distinguish that."

"One of the important things to recognise is we are entering the rate hike cycle with a robust growth rate — you have a rate hike as well as a projection of 7.1 per cent growth rate. That means you will have sustained credit growth coming from the real economy's demand for credit," he said.

CREDIT DEMAND

"So, if a couple of rate hikes are going to be there, the discretionary consumption demand and consumption credit probably will be impacted. But it is unlikely that productive activities will see any less demand for credit."

Setty emphasised that there is only so much the interest rates can propel customers to come into deposits.

"What is important is in terms of your service quality and what is the value proposition you give to a customer in terms of maintaining the account. And what we also have seen fundamentally, the shift is not only happening from bank deposits to other alternative instruments, within the bank also you see the shift in composition," he said.

FCNR (B) DEPOSITS

Setty underscored that deploying the $10 billion plus that SBI mobilised via foreign currency non-resident (bank) deposits under the RBI's special foreign currency swap window during the June 8-August 31, 2026 period is not a major issue.

"In a ₹60 lakh crore universe of deposits what we have, it (FCNR-B deposits) is definitely providing short term liquidity, obviously. But I do not think its deployment is an issue."

"Even for the system, I believe, if we combine the robust credit demand and the liquidity absorption measures by RBI, I think we should not really worry about it. A lot of people ask me whether there would be an exuberance in lending and all. I do not think we need to worry about that part," he said.

IOB Q2 net profit surges 56% on net interest income growth

Our Bureau
Chennai

Public sector lender Indian Overseas Bank reported a 56 per cent y-o-y growth in net profit at ₹1,912 crore for the quarter ended September 2026 (Q2FY27) on the back of strong net interest income growth, and partially aided by lower tax outgo in the quarter compared to the year-ago period.

Net interest income for the quarter increased by 26 per cent y-o-y to ₹3,867 crore, and operating profit also increased by 26 per cent y-o-y to ₹3,016 crore. The bank's net interest margin (domestic) increased by 14 bps y-o-y to 3.49 per cent.

"Our internal aspiration and mandate is that every year, net profit on a year-on-year basis should grow by a minimum of 25–30 per cent. If you look at our last 10 quarters, you will find this consistency," Ajay Kumar Srivastava, MD & CEO, Indian Overseas Bank, told media persons in a post-earnings interaction, calling the performance a sustainable one. He attributed the growth largely to strong credit expansion and the bank's ability to manage funding costs.

Total business of the bank grew robustly in Q2FY27 with a 24.35 per cent growth in advances at ₹3,45,650 crore. At ₹4,07,428 crore, deposits grew 20 per cent y-o-y.

Advances were driven by strong growth in the RAM (Retail, Agri and MSME) portfolio. Retail credit was up 33.77 per cent, agriculture up 47.31 per cent largely on agri jewel loans, and MSME credit up 13.8 per cent.

Srivastav attributed the expansion partly to faster processing and decentralised sourcing through branches and loan processing centres. He does not anticipate any stress in the jewel loan category.

Asset quality continued to improve with gross NPA ratio reduced by 64 bps y-o-y to 1.19 per cent and Net NPA ratio reduced by 12 bps y-o-y to 0.16 per cent, primarily attributable to steady recoveries.

Scorecard

SBI working on dedicated 'YONO Bharat' mobile app for Jan Dhan customers

Our Bureau
Mumbai

State Bank of India is working on a variant of its mobile banking app YONO, called YONO Bharat, which will focus on financial inclusion customers. The app may be launched in 6-12 months.

YONO Bharat will cater to the mobile banking requirements of customers with feature phones and certain categories of devices where the security features are not adequate, Chairman CS Setty said at the BFSI Summit hosted by *Business Standard*.

EMPOWERMENT TOOL

"Out of our 53 crore customers, we have about 17-18 crore Jan Dhan customers. These customers are quite familiar using the UPI apps. We would like to bring them on a smaller, easy to use (YONO) version, which is a device neutral version to reach out to all of them

"...I think we can bring 30 crore customers by 2030 on YONO. I think this is something what we would like to do in order to ensure that the mobile banking application does not simply remain mobile application.

"It becomes an empowerment tool for everyone. So, YONO Bharat will be the latest offering from SBI," he said.

TMB records highest-ever profit of ₹451 cr for Q2 on strong core income

Our Bureau
Chennai

Private sector lender Tamilnad Mercantile Bank (TMB) on Monday reported its highest ever quarterly net profit at ₹451 crore for the quarter ended September 2026 (Q2FY27). This represents a growth of 42 per cent y-o-y. This performance came off a strong growth in core business and subsequently the net interest income.

Total business grew by 27.25 per cent, highest year on year growth since listing of the bank. Net interest income for the quarter stood at ₹807 crore, a growth rate of 35.17 per cent y-o-y.

The performance is due to both measures taken to drive the business growth and net interest income on one side, and also containing the cost, Salee S Nair, Managing Director and CEO of the Thoothukudi-headquartered bank, told mediapersons.

While not offering a clear guidance, the MD and CEO said that as per current trends, advances are likely to grow at 22 per cent plus for the full fiscal year and deposits, which are more difficult to judge at this stage, are expected to grow 20 per cent plus. The bank's total deposits grew by 25.49 per cent on y-o-y basis and stood at ₹69,546 crore. Advances increased to ₹60,691 crore at a growth rate of 29.32 per cent on y-o-y basis.

FCNR(B) deposit mobilised was negligible for the bank at $51.9 million as it does not have international presence. "We are thinking of looking at Singapore, Malaysia and Dubai for overseas linkages but it is early stages at the moment."

Q2 AT A GLANCE

- TMB's total business grew by 27.25%
- NII stood at ₹807 crore, a growth rate of 35.17%
- Total deposits grew by 25.49% on y-o-y basis and stood at ₹69,546 crore
- Advances increased to ₹60,691 crore at a growth rate of 29.32%

ASSET QUALITY IMPROVES

Asset quality continues its improvement trend. Gross NPA declined 40 basis points y-o-y and stood at 0.61 per cent. The bank described this as its lowest GNPA in the last 10 years. Net NPA has decreased to 0.14 per cent, an improvement of 12 bps.

TMB has fully provided for SMA I & II accounts, as per ECL norms, Nair said. For TMB, the estimated ECL impact is ₹385 crore as per current estimations and the bank has already provided for around ₹304.24 crore as of September 30.

Talking about its focus on digital infrastructure, Nair said that cybersecurity is an important focus for the bank and 20 per cent of its total IT infra investments would be in managing cybersecurity. "We are also well ahead of the curve in getting our act together for DPDP compliance," he added.

IFC extends $150-million social loan to SBI

Mumbai: The International Finance Corporation (IFC) has extended a $150-million social loan to SBI, its first-ever credit line to a public sector bank, in a move that is expected to support nearly 8.64 lakh rural women engaged in agriculture and allied activities across India. The transaction highlights a shift in IFC's India strategy and comes alongside a separate local-currency financing agreement aimed at expanding long-term rupee funding for private sector investments. Alongside the social loan, IFC and SBI have signed a derivative partnership under an ISDA Master Agreement. OUR BUREAU

Blue Dart launches B2C cross-border delivery

Mumbai: Blue Dart Express has launched B2C cross-border parcel shipping service to help Indian e-commerce firms and SMEs, it said on Monday. Beginning with the US, Blue Dart plans to progressively extend the service to other relevant markets, including the UK, countries in the European Union, Canada and Australia. The service supports eligible B2C parcels weighing 50 g to 11 kg across categories. OUR BUREAU

ASUSE to cover gender-specific issues faced by women entrepreneurs

IN-DEPTH STUDY. New questions related to investment trajectory and different sources of electricity added

Shishir Sinha
New Delhi

The Annual Survey of Unincorporated Sector Enterprises (ASUSE), for the first time, will capture gender-specific constraints faced by female entrepreneurs. Also, new questions related to investment trajectory and different sources of electricity have been added.

These are part of ASUSE 2027-28, which will be conducted between April next year and March 2028, aligning the survey period with the financial year.

ASUSE, being conducted since 2021-22, presents employment and gross value added, provides livelihoods to many people and supports economic activity through its linkages with the incorporated sector.

MORE INFORMATION. A question will be introduced to capture investment in fixed assets over a longer reference period than that covered in the existing schedule

GENDER CONSTRAINTS

"These questions aim to improve the availability of information on the challenges women entrepreneurs face in the unincorporated sector," the Statistics Ministry said while giving details about the proposed changes in the next edition of the survey.

Further, such information can support a better understanding of the constraints faced by female-led enterprises and provide a useful evidence base for examining the factors affecting their business operations.

"It will also broaden the scope of information available from ASUSE for analysing the challenges of female entrepreneurs and for informing policy discussions relating to women's participation in economic activity," the Ministry said.

A new question will be introduced to capture investment in fixed assets over a longer reference period than that covered in the existing schedule.

This change is intended to provide a broader perspective on the investment trajectory of establishments.

Information covering a longer period can help in examining investment activity beyond the period captured by the existing question and can provide additional insights into the investment behaviour and business outlook of establishments.

It will also enhance the analytical utility of ASUSE data for understanding investment patterns in the unincorporated sector, the Ministry said.

ENERGY USAGE

Additional questions will be included to capture the different sources of electricity used by establishments. This will provide a more comprehensive picture of the energy-use patterns of enterprises in the unincorporated sector. "Information on electricity sources can help data users better understand the energy arrangements under which establishments operate and facilitate analysis of the operating environment of enterprises across different activities," the Ministry said.

The ministry also highlighted an important change to the survey calendar. Now, the survey will be conducted during the fiscal year period (April-March) from the calendar year (January-December), and this will begin next fiscal.

"The change is intended to align the reference period of the survey with the financial year, as is done in other enterprise surveys like the Annual Survey of Industries (ASI), the Annual Survey of Incorporated Services Sector Enterprises (ASISSE), etc., and enhance the utility of ASUSE data for National Accounts purposes," it said.

Earlier, it revamped sampling design, which provides for the generation of district-level estimates by participating States, the use of globally-accepted classifications, and the deployment of agile Computer-Assisted Personal Interviewing (CAPI)-based systems for data collection.

E-COMM QUESTIONS

Questions would also cover the presence of the establishment in the e-commerce marketplace and use of digital payment instruments such as UPI (including BHIM), mobile wallets and POS devices.

This festival season, beauty, personal care segment sees strong growth momentum

Meenakshi Verma Ambwani
New Delhi

Beauty and personal care segment is witnessing a strong growth momentum during the ongoing festival season. It is also emerging as a key growth pillar for e-commerce and quick-commerce platforms, as consumers look to buy the complete festival look. While established brands are expecting to end the season with double-digit growth, new-age D2C brands are witnessing growth at a higher clip.

Ashutosh Valani, Co-Founder, RENÉE Cosmetics, said, "We witnessed 3x growth in sales during Navratri. We are witnessing increased demand for everyday make-up essentials such as lipsticks, *kajal* and other eye make-up products. We expect this momentum to continue through the season. Overall, we are projecting 2x sales growth across the festival period year-on-year."

E-commerce platforms said consumers are increasing their basket size for beauty products. Siddharth Bhagat, Director - Beauty, Personal Care and Fashion Accessories, Amazon India, said, "One in every four products bought on Amazon in the first 12 hours of the Great Indian Festival sales was a beauty product. We are also seeing customers purchased 25 per cent more units per visit, reflecting an increase in average basket size this festival." He added that K-Beauty and West Asian fragrances segments are growing strongly, reflecting the strengthening of premiumisation trends.

SHOPPING TRENDS

Gifting has also become a key consumption occasion for this sector. Harmeet Singh, Chief Brand Officer, The Body Shop Asia South, said that the brand expects to see a double-digit revenue growth this festival season. "For us, consumption comes from three key needs — people buying for themselves, shopping for their families and choosing gifts for their loved ones. Gifting accounts for 15-20 per cent of our sales during Deepavali and continues to contribute 8-10 per cent of our business even outside major festival periods."

"We are also seeing quick commerce grow 2-3x, as customers increasingly look for convenient ways to shop. We continue to focus on understanding these needs and making our products relevant to how people shop, celebrate and care for themselves and their families," Singh added.

Deepak Joshi, Senior Director - Beauty and Personal Care, Myntra, said, "Beauty continues to be a key growth driver, and this festival season, the category is seeing strong traction. New beauty customers are up over 25 per cent and they're shopping more, with basket sizes increasing to three products per beauty purchase against two per purchase during the last edition of Myntra BFF. More people are focusing on building complete festive looks." He added that on M-Now, the festive beauty spike is "90 per cent this year".

"Beyond make-up, skincare and fragrances are also up 50 per cent during the festival period. What's been interesting for us to see this festival season is that men's grooming is up 100 per cent," he added.

Petronet's ₹1,200-cr biogas JV boosts domestic gas supply

Amit Vijay Mohile
Mumbai

Petronet LNG is stepping up its diversification strategy with a ₹1,200-crore investment in compressed biogas (CBG), marking its entry into domestic renewable gas production even as geopolitical disruptions highlight the risks of relying heavily on imported liquefied natural gas (LNG). The company has signed a binding term sheet with Gruner Renewable Energy to establish a joint venture that will set up 10 CBG plants, each with a capacity of 18 tonnes per day. The proposed venture, structured with 50:50 ownership, will require an estimated investment of ₹1,200 crore and represents Petronet's first major foray into large-scale domestic gas production.

While the regulatory filing disclosed the broad framework of the partnership, plant locations and commissioning timelines are yet to be announced.

SUPPLY-SIDE ISSUES

The move comes at a time when Petronet's core LNG business has faced supply-side headwinds. LNG throughput at the company's flagship Dahej terminal declined to 192 trillion British thermal units in the April-June quarter from 207 trillion units a year earlier, as disruptions linked to restrictions around the Strait of Hormuz affected Qatari gas supplies.

Spot LNG prices also surged sharply during the period, highlighting the vulnerability of import-dependent energy businesses to global market shocks.

Once fully operational, the 10 plants will have a combined production capacity of 180 tonnes of CBG per day, translating into roughly 63,000 tonnes annually, assuming 350 operating days.

While modest compared with India's annual LNG imports of about 25.5 million tonnes (mt), the project offers Petronet a foothold in the emerging renewable gas market and an additional domestic revenue stream.

The biogas venture, however, remains relatively small compared with the company's larger expansion plans. Petronet is investing ₹20,685 crore in an integrated petrochemical complex at Dahej and is developing the ₹6,355-crore Gopalpur LNG terminal, which will increase re-gasification capacity by nearly 18 per cent to 32.5 mt annually.

India's auto production set to slow in 2027 as CIE Automotive flags margin pressures

Amit Vijay Mohile
Mumbai

India's automobile industry faces a sharp moderation in production growth in early 2027, with light-vehicle output expected to grow 5.8 per cent against 18.8 per cent in the September quarter, two-wheeler growth slowing from 16.7 per cent to 5-7 per cent, and tractor production potentially contracting 3-7 per cent.

The changing outlook comes as CIE Automotive India, a tier-1 and tier-2 supplier to major automobile manufacturers, reported an 18.2 per cent increase in domestic sales but shrinking margins, highlighting the challenge component makers could face as vehicle production growth slows while raw-material and energy costs remain elevated.

CIE's India sales increased to ₹1,801 crore during July-September 2026, supported by strong automobile production

UNEVEN PRODUCTION

The forecasts, drawn from industry estimates cited in CIE Automotive India's October 22 investor presentation, suggest that the strong production momentum across passenger vehicles, two-wheelers and tractors during 2026 may become increasingly uneven in 2027.

CIE's India sales increased from ₹1,523.2 crore to ₹1,801 crore, an increase of 18.2 per cent, during July-September 2026, supported by strong automobile production.

EBITDA also increased to ₹294 crore (₹264.2 crore), up 11.3 per cent, while its operating margin declined to 16.3 per cent (17.3 per cent).

Indian light-vehicle production went up to 1.80 million units (1.52 million) during the September quarter, while two-wheeler output rose to 8.09 million units (6.93 million).

However, industry forecasts cited by CIE project light-vehicle growth moderating to 5.8 per cent in January-March 2027, two-wheelers to 5-7 per cent and tractor production declining between 3 per cent and 7 per cent. The outlook for medium and heavy commercial vehicles has also been revised lower than earlier expectations, although the presentation does not specify a revised growth rate.

While India's automobile industry faces slower growth, Europe's vehicle market remains weak, forcing component manufacturers to rely increasingly on cost reductions to protect profitability.

NEXT TEST

CIE's consolidated revenue from operations increased to ₹2,633.18 crore (₹2,371.84 crore), an increase of 11 per cent, while profit after tax rose to ₹243.69 crore (₹213.94 crore), an increase of 13.9 per cent.

For India's component manufacturers, the next test may be less about meeting rapidly-expanding production schedules and more about protecting profitability as growth moderates.

Coal costs weigh on Adani Power, tariff recovery to take over 6 months

Avinash Nair
Ahmedabad

Adani Power's imported-coal bill surged in Q2 FY27, with landed coal costs rising around 50 per cent year-on-year but the company will have to wait more than six months to recover the higher costs through tariffs under its indexation mechanism.

The delay contrasts with its Bangladesh power supply contract, under which tariff adjustments are linked to international prices and higher fuel costs are reflected immediately in billing, CEO SB Khyalia said. The company's fuel cost increased 41.8 per cent to ₹10,229 crore in Q2 FY27 from ₹7,216 crore in the year-ago quarter, driven by higher generation volumes and the increase in imported coal costs. For H1 FY27, fuel expenses rose 36 per cent to ₹19,768 crore (₹14,535 crore).

"From the markets perspective, tariffs have to go up to some extent, including the merchant rates. As far as Adani Power is concerned, there is a major increase in fuel cost for imported coal-based projects," Khyalia told investors during the company's earnings call, flagging the pressure from higher fuel costs and the likelihood of an increase in power prices.

FUEL PRICES

The increase in imported coal costs is concentrated in the company's imported coal-based projects. While most of Adani Power's capacity has provisions for fuel-cost pass-through, the tariff for its Gujarat project is linked to an index, which delays the recovery of changes in fuel prices. "This increase in fuel cost of imported one will get reflected almost after more than six months," Khyalia said, adding that the increase would not be reflected in tariffs in the immediately following quarter.

The lag means that the timing of fuel-cost increases and tariff adjustments may not coincide, although the extent of the impact on margins will depend on the contractual arrangements governing individual projects. Khyalia said the increase had slightly reduced the margin the company could otherwise have earned.

Zee onboards Komal Nahta as Creative Director

Vallari Sanzgiri
Mumbai

Zee Entertainment Enterprises appointed industry veteran Komal Nahta as Creative Director for the movies business.

Nahta will report to Punit Goenka, Chief Executive Officer at Zee.

The company restructured the Zee Studios and movie acquisition vertical to accelerate growth, streamline decision-making, sharpen investment priorities and encourage stronger collaboration across production, commissioning, acquisition and distribution functions.

Nahta will provide oversight on commercial and movies acquisition decisions across platforms, with a sharp focus on Hindi and other language movies.

China's export curbs could slow India's upstream solar push

Rohan Das
Chennai

China's bid to restrict exports of critical solar technologies could dent the Indian industry's ambition of building a vertically-integrated domestic supply chain for solar manufacturing.

Industry players, speaking to *businessline*, said that while an immediate disruption to module production is unlikely, long-term capacity additions and localisation goals can be jeopardised as the industry continues to be dependent on China for equipment and machinery.

The Chinese Ministry of Commerce recently proposed export controls on 12 next-gen technologies involved in solar manufacturing, which included partial restrictions on popular cell technologies as well as complete bans on advanced equipment for crucial upstream components like wafers and polysilicon. The proposal is currently open for industry consultation.

Vinay Rustagi, Chief Business Officer at Premier Energies, expects the restrictions to be graded in terms of how advanced the technology is with newer higher efficiency tech facing stricter curbs.

"We do not expect any restriction on the existing businesses and can operate cell and production lines by importing wafers. There is no kind of short-term impact on the sector even going forward two-three years," he said, adding that the impact will be felt when the newer technologies become more readily acceptable and are commercialised.

"But that gives us some time to prepare accordingly," he said.

THE IMPACT

Ingots are expected to particularly face the heat, as China holds a near monopoly over its production both in terms of the final product as well as the equipment used in its production.

TRADE CONTROL. China has proposed export controls on 12 advanced solar technologies, including cell restrictions and bans on wafer and polysilicon equipment PTI

"For cells, wafers and polysilicon, there are non-Chinese suppliers. But for ingots, the technology is sensitive. So that might have a significant impact," Arulkumar Shanmugasundram, CEO and Managing Director, Swelect Energy Systems.

Interestingly, he suggested that many global equipment suppliers, while holding the tech, continue to manufacture in China, which means that export restrictions there could force them to develop an ecosystem for manufacturing these equipment in alternative locations like India.

Amit Manohar, Secretary General, Indian Solar Manufacturers Association (ISMA), pointed out that countries such as Germany, Japan, Taiwan, South Korea and the US offered valuable expertise in equipment, materials and advanced cell processes.

LOCAL STRENGTH

"Indian manufacturers are well positioned to expand these collaborations while strengthening domestic engineering, research and equipment capabilities," he said.

Anujesh Dwivedi, Partner, Deloitte India, said that as a blanket ban is not anticipated, it is still possible to get imports after obtaining necessary licences. Consequently, equipment lead times may become lengthier. The scale-up of India's domestic ecosystem would depend on whether the required supplies for restricted goods have already been secured or not, he added.

L'Oreal banks on q-comm for India's growth

Meenakshi Verma Ambwani
New Delhi

Global beauty major L'Oreal said it is witnessing a "great turnaround" in the India market, where growth has accelerated. It is also sharpening its focus on the online channel, including quick commerce. The company said it has closed the acquisition of a majority stake in Innovist, a digital-first Indian personal care house of brands, including Bare Anatomy and Chemist at Play.

L'Oreal said that its consumer products division in India witnessed double-digit growth in the September quarter. Nicolas Hieronimus, CEO, L'Oréal, said, "India is doing great turnaround. We are accelerating with a focus on quick commerce, an important part of the e-commerce market there."

Lula declared winner of Brazil's presidential polls

Rio De Janeiro: Brazil's President Luiz Inacio Lula da Silvawas re-elected on Sunday. With 100 per cent of the vote counted, Brazil's electoral court announced that Lula had a lead of nearly 4.4 million votes over opponent Flavio Bolsonaro, giving him 51.8 per cent of the total vote. Bolsonaro refused to concede defeat and asked for the election results to be annulled after an evening of chaos at some polling places that followed a last-minute decision to extend voting by two hours. PTI

PM Modi, BRICS leaders seek to boost cooperation

New Delhi: Prime Minister Narendra Modi on Monday interacted with parliamentary delegations from BRICS nations, including Russia, China, Iran and UAE. The 12th BRICS Parliamentary Forum has brought parliamentary leaders together to discuss ways to strengthen parliamentary cooperation and advance people-centric development. PTI

N. America trails Europe in revenue growth for IT firms

BRIGHT SPOTS. Indian companies perform better in UK, Asia Pacific, emerging markets

Sanjana B
Bengaluru

CAUTIOUS OUTLAYS. Spending in North America remained more selective and focused on business-critical initiatives

North America's subdued and selective technology spending is weighing on growth for Indian IT services companies, with Europe emerging as a stronger market in the September quarter amid firmer demand across several sectors.

Biswajit Maity, Senior Principal Analyst at Gartner, highlighted that along with Europe, the UK, Asia Pacific, and emerging markets generally outperformed North America, where spending remained more selective and focused on business-critical initiatives.

TCS reported a 3.3 per cent year-on-year growth in CC terms in Continental Europe and 1.5 per cent CC growth in North America. Infosys recorded a 4.6 per cent y-o-y CC growth in Europe, while revenue from North America declined 1.5 per cent in CC terms.

REVENUE SURGE

Wipro's revenue grew 5.1 per cent y-o-y in CC terms in Europe. It declined 2.7 per cent in Americas 1, which covers technology, communications, media, healthcare and consumer sectors, and 4.7 per cent in Americas 2, which includes banking, financial services, energy, manufacturing, resources and insurance, across the US, Latin America and Canada, both in y-o-y CC terms.

Tech Mahindra reported a 16.2 per cent y-o-y growth in Europe and 4.1 per cent in North America. However, HCLTech reported a 0.3 per cent decline in Europe, while revenue from the US grew 3.5 per cent y-o-y in CC terms.

Wipro CEO and MD Srini Pallia commented during the earnings conference call that the US economy remained strong, with the company continuing to see a robust pipeline in the region. In Europe, clients were looking beyond cost optimisation and vendor consolidation to reassess their AI strategies, amid geopolitical uncertainties.

POLICY SHIFT

"The healthcare sector, especially in the US, is impacted by policy changes. Despite this, large US payers are focused on cost takeout and operational efficiencies because membership growth is slowing and margins remain under pressure. Payers are tightening discretionary spend and prioritising AI, automation and productivity-led transformation initiatives," he said.

Meanwhile, K Krithivasan, CEO and MD of TCS, stated that in North America, the company's discussions with customers and the TCV look good.

"We expect North America revenue to recover and become healthy soon. In the medium term, we also see ERU structurally recovering. Overall, across multiple industry segments, looking at the TCV and the client conversation, we are positive that medium-term growth should return," he noted.

Infosys CFO Jayesh Sanghrajka said the US market had remained soft across the industry over the past few quarters, while Europe and other markets had performed better. He attributed some of the weakness to a slowdown in the high-tech sector, as well as lower discretionary spending on plants in certain North American segments. This was offset by stronger performance in Europe and the rest of the world.

Digital news publishers' body challenges privacy law in court

Reuters
New Delhi

ROLLBACK CALL
The publishers are demanding that most of the law's contentious provisions, which kick in from May 2027, should be quashed

A group of 21 news publishers has challenged the privacy law in court, arguing that it would trample investigative work and let New Delhi identify journalists' sources, documents show.

The government last year announced the implementation of a privacy law to protect the digital personal data of users, raising compliance requirements for platforms like Meta and Google. The publishers said that since media outlets were not exempt, the law was an invasion of press freedom.

Media companies received assurances in an August meeting with the government that the law would protect press freedom, but not having a written carve-out for journalists like in the European Union, Singapore and Britain was alarming, the Digital News Publishers Association (DNPA) said in a confidential filing at the Supreme Court, reviewed by *Reuters*.

The October 6 lawsuit, being reported for the first time and due to be heard on Tuesday, is the most high-profile challenge to the privacy law. Until now, only free speech activists and a group of smaller news outlets had challenged it.

DNPA did not respond to requests for comment, and neither did the Information Technology Ministry.

PRIOR CONSENT

The publishers are demanding that most of the law's contentious provisions, which kick in from May 2027, should be quashed.

They are arguing that the law could force a journalist to get prior consent from a person they want to investigate and force publishers to erase stories.

They also say that powers granted by the law to demand information could expose reporters' sources.

The law would "render investigative journalism a benign and neutered recorder of events," the 698-page filing said. The provisions "constitute pre-censorship which is anathema to any democracy worth its name".

DNPA's members include *Network18*, which has seven digital news platforms, *NDTV* and other marquee media groups including *The Hindu*, *The Indian Express* and Times Internet, which is part of *The Times of India* group.

A social media platform or online retailer can seek consent from users when they sign up, but the DNPA argued that requiring a journalist to notify the subject of an investigation and seek consent "would allow that subject to destroy evidence, intimidate witnesses".

The law also lets people withdraw consent at any time and demand that their data be erased, without any public-interest safeguard, which the DNPA says could force its members to unpublish or heavily redact a factual news report.

News publishers are concerned that a federal authority created under the law can impose fines for non-compliance, and grants powers to New Delhi to block access to any information in the "interests of the general public", which would curtail press freedom, DNPA said.

AI drives productivity, but fails to spark broad-based growth in IT, says industry

Sanjana B
Bengaluru

Even as AI related revenue gained traction in Q2 FY27, India's IT services industry has yet to enter a broad-based growth cycle, with clients prioritising cost savings, productivity and measurable returns over discretionary technology spending.

HCLTech's advanced AI revenue stood at $219 million, up 28.4 per cent q-o-q and 78 per cent y-o-y in constant currency (CC) terms, outpacing overall revenue growth of 2.3 per cent q-o-q and 2.6 per cent y-o-y in CC terms. TCS' annualised AI revenue reached $3.1 billion, accounting for more than 10 per cent of its total revenue, while AI contributed 10.5 per cent of Infosys' revenue.

Praveen Bhadada, CEO & Managing Director, Neovay Global, said that AI is replacing work as much as adding it and is now a real line of business, not a pilot. "Infosys' AI revenue rose by more than $120 million in the quarter while total revenue rose about $63 million. The industry is being repriced by AI. Clients are signing large, long contracts, but these deals are built around cost savings and productivity. Firms are earning more revenue per employee, hiring cautiously and protecting margins through efficiency rather than price," he said.

SCALED DEPLOYMENT

Biswajit Maity, Senior Principal Analyst at Gartner, added that another notable theme emerging this quarter is the growing shift from AI experimentation to scaled deployment.

AI is becoming increasingly embedded in service delivery, operations, software engineering, and business transformation programmes, with providers reporting higher levels of AI related demand and stronger disclosure of AI business metrics.

BUSINESS OUTCOMES

"Buyers continue to seek productivity gains, business outcomes, and commercial flexibility, leading providers to emphasise platform-led delivery, automation, and AI enabled services as mechanisms to improve efficiency while maintaining profitability. These trends suggest the industry is moving into the next phase of AI adoption, where scalable deployment and measurable business outcomes are becoming more important than innovation narratives alone," he said. While the IT services sector is stabilising, it has not entered a broad-based growth cycle. According to Biswajeet Mahapatra, Principal Analyst, Forrester, client spending continues to favour AI, data, cloud modernisation, cybersecurity, automation, vendor consolidation, and initiatives with clearer cost or business outcomes, while discretionary technology spending remains cautious.

While AI is becoming visible in both client demand and delivery productivity, it is still difficult to establish how much incremental industry revenue AI is creating, he added. "Much of the emerging opportunity sits at the intersection of AI, cloud, data, application modernisation, engineering and managed services, which makes it difficult to distinguish new AI expenditure from technology spending being redirected toward AI enabled programmes," Mahapatra said.

Pratt & Whitney signs $40 m deals with Indian firms

Rohit Vaid
New Delhi

Aircraft engine maker Pratt & Whitney (PW) has signed multi-year supply agreements worth over $40 million with Indian suppliers as it works towards achieving annual sourcing of $150 million from the country by 2030. Speaking to *businessline*, Ashish Saraf, Vice-President and Country Head, Pratt & Whitney, said these agreements cover suppliers including Bharat Forge, IAMPL, Godrej and Indo MIM. "Pratt & Whitney is firmly on track to achieve this target," Saraf said, referring to the company's sourcing goal for 2030.

The agreements followed a recent event that brought together suppliers and strategic partners to explore opportunities for greater collaboration and capability enhancement. "We are looking to source the complete value chain from raw material to finished components. This includes castings, forgings, bars and billets, and getting them machined into finished components," he said.

HELPING SUPPLIERS

Besides expanding volumes, PW is assisting suppliers in developing capabilities in castings, forgings, raw materials and specialised processes related to these categories. As per available data, PW's parent company RTX sources more than $500 million in components and services from India annually.

On policy support, Saraf sought a sector-specific production-linked incentive scheme to encourage the manufacture of high-value aerospace components and localisation of critical supply chains. The proposed scheme, he said, could follow a phased "crawl-walk-run" approach to support investment and scale.

Consumer, retail industry sees 127 deals worth $2 b in Sept quarter

Meenakshi Verma Ambwani
New Delhi

The consumer and retail sector recorded 127 deals valued at $1.92 billion in Q3 CY2027, including M&A, PE/VC and public-market transactions, as per Grand Thornton Bharat. This was 31 per cent higher compared to Q2 CY2026.

Nearly 51 per cent of the overall deal value for the sector was contributed by IPOs and QIPs valued at $975 million.

According to the Grant Thornton Bharat Consumer and Retail Dealtracker, M&A and PE/VC activity, excluding IPOs and QIPs, comprised 113 deals worth $948 million, up 19 per cent in volume and 3 per cent in value quarter-on-quarter, reflecting a shift towards smaller-ticket transactions and a lower concentration of high-value deals.

ASPIRATIONS

M&A activity was pegged at 29 deals worth $229 million in Q3 2026, compared with 19 deals worth $179 million in Q2. Domestic transactions accounted for 76 per cent of deal volumes and 86 per cent of deal value, it added. PE and VC activity remained the largest contributor to dealmaking, with 84 deals worth $719 million, accounting for 74 per cent of deal volume.

Notes:
1. These unaudited financial results have been prepared in accordance with the recognition and measurement principles provided in Indian Accounting Standards, 'Interim Financial Reporting' ('Ind AS 34') prescribed under Section 133 of the Companies Act, 2013 ('the Act') read with relevant rules issued there under and other recognized accounting principles generally accepted in India and is in compliance with the Securities and Exchange Board of India (SEBI) under SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended. The above financial results were reviewed by the Audit Committee and approved by the Board of Directors of the Company at their respective meetings held on October 26, 2026 and has been subjected to limited review by the Statutory Auditors of the company.
2. The Company's main business is manufacture of Gearboxes and Gear Products. There are no separate reportable segments as per Ind AS 108 - Operating Segments.
3. On 21 November 2025, the Government of India notified the four Labour Codes - the Code on Wages 2019, the Industrial Relations Code 2020, the Code on Social Security, 2020 and the Occupational Safety, Health and Working Conditions Code 2020 - consolidating 29 existing labour laws. The Ministry of Labour & Employment published draft central rules and FAQs to enable assessment of financial impact due to changes in regulations. The Company has assessed and disclosed the incremental impact of these chenges on the basis of actuarial valuation obtained and the best information available, consistent with the guidance provided by the Institute of Chartered Accountants of India. The incremental impact in the provision for Defined Benefit Obligation amounting to Rs. 4.78 Cr in the audited financial results for the year ended 31 March 2026 arises primarily due to a change in the wage definition and has been presented as "Statutory impact of new labour code" under "Exceptional Items". The Company continues to monitor the finalization of Central / State Rules and the clarification from the Government on other aspects of the Labour Code and would provide appropriate accounting effect on the basis of such developments as needed.
4. The preparation of Consolidated Financial Results for the quarter and six months ended 30 September 2026 are not applicable since the Company does not have any Subsidiary / Associate / Joint Venture.
5. Previous period/year figures have been re-grouped wherever necessary
6. The above financial results are also available on our website www.shanthigears.com. The financial results can be accessed by scanning the QR code provided below:

QUICKLY.

Crude oil slips but stays near six-month highs

London: Oil prices fell on Monday after surging last week but still held near six-month highs, amid hopes of easing hostilities between the United States and Iran, although persistent attacks on key producer Saudi Arabia kept investors wary. Brent crude futures were down $1.9, or 1.63 per cent, at $114.82 by 0959 GMT. US West Texas Intermediate crude futures were down $2.08, or 2 per cent, at $101.19 per barrel. REUTERS

Zinc hits two-week high on tight stocks

Zinc jumped to its highest in two weeks on Monday as falling inventories and rising power prices boosted sentiment on the metal used to galvanise steel. Benchmark three-month zinc on the London Metal Exchange was up 1.5 per cent to $3,800.5 a tonne as of 1030 GMT, having earlier hit $3,821.5, the most since October 12. REUTERS

Weaker rival oils, crude oil prices drag palm oil down

Jakarta: Malaysian palm oil futures slipped on Monday, pressured by declines in Dalian palmolein and Chicago soyoil, with weaker crude oil prices adding to the downside as traders awaited confirmation of Malaysia's proposed export duty waiver. The benchmark palm oil contract for January delivery on the Bursa Malaysia Derivatives Exchange lost 25 ringgit, or 0.52 per cent, to 4,793 ringgit ($1,173.60) a tonne at the close. Dalian's most active soyoil contract rose 0.13 per cent, while its palm oil contract dropped 0.52 per cent. REUTERS

Inflows into gold ETFs turn negative after 13 weeks as prices decline 4%

SURGE IN WITHDRAWALS. US investors show way as exits top $3 billion while investments were at $1.8 billion

Subramani Ra Mancombu
Chennai

Investments in physically backed gold exchange-traded funds (ETFs) turned net negative last week after 13 weeks, with the yellow metal losing nearly 4 per cent, data from the World Gold Council (WGC) showed.

WGC data showed that investors across the world redeemed $3.01 billion, while investments were $1.8 billion. US investors led the redemption, encashing $1.7 billion last week, as gold fell below $4,000 at one point.

WORST WEEK SINCE JUNE

"Gold posted its worst week since June. The sell-off came from oil, currency rates and forced selling. Houthi strikes on Saudi infrastructure pushed Brent above $116, which markets read as inflationary, lifting December hike odds to 78 per cent," said Renisha Chainani, Chief Research Officer at Augmont.

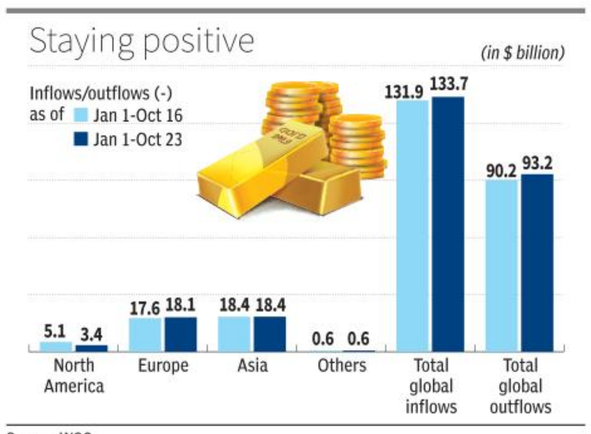
"Prices are under pressure due to a stronger dollar, rising bond yields and inflation concerns. The upcoming US Federal Reserve meet will be important in determining the near-term price trend," said Darshan Desai, CEO, Aspect Bullion & Refinery.

After falling to $3,995 an ounce, gold pared its losses on Monday, rising to $4,017 an ounce at 1830 hours IST.

"Gold continues to hold around $4,000 despite easing geopolitical tensions, supported by strong investment and central-bank demand, fiscal concerns and some moderation in Treasury yields," said Manav Modi, Commodities Analyst, Motilal Oswal Financial Services Ltd.

UK LEADS INFLOWS

Last week, apart from American investors, there were others, too, who exited gold ETFs, but the amount involved was much lower. The UK led the positive inflows at $321.8 million, followed by Switzerland at $64.3 million, Germany at $45.8 million and China at $21.4 million.



Source: WGC

Year-to-date, Chinese tops the table, investing $10.43 billion, while the UK followed with inflows of $10.22 billion. Indians ranked third with inflows of $4.69 billion, though last week's data were unavailable. Other countries where investors continued to stay invested in gold ETFs were Switzerland at $3.63 billion, the US at $3.51 billion, Germany at $2.47 billion, France at $1.79 billion, Japan at $1.06 billion and the Hong Kong Special Administrative Region at $1.01 billion.

Prithviraj Kothari, Managing Director at RiddiSiddhi Bullions Ltd and President of the India Bullion and Jewellers Association Ltd, said central bank buying and Indian ETF inflows were offering support to the yellow metal.

"Dhanteras and Deepavali demand should cushion dips. We favour staggered buying near support ahead of the Fed decision on October 28," he said.

Global factors will continue to play a key role in price movements, said Desai. Elevated crude oil prices and expectations of a possible US rate hike continue to support the dollar, keeping bullion under pressure, said Jateen Trivedi, VP Research Analyst - Commodity and Currency, LKP Securities.

Psychological barriers, ETFs, central banks buying and overall sentiment before the US Fed meeting this week and the mid-term election next week are keeping market participants on edge, said Modi.

Slack mustard coverage drags rabi acreage as sowing begins

Prabhudatta Mishra
New Delhi

Wheat acreage may decline this year due to drought in Maharashtra and Karnataka

The initial crop sowing data for the rabi season show that acreage is down 37 per cent from a year ago, mainly due to slower mustard sowing.

The decline is particularly pronounced in Rajasthan, where farmers are facing challenges due to deficient rainfall. East Rajasthan, a key mustard-growing region, has recorded a 51 per cent rainfall deficit during October 1-26.

However, recent rainfall in some districts could help increase sowing of mustard and gram (chana) in Rajasthan, the leading producer of both crops.

Sources said mustard acreage in Rajasthan had not even reached 6 lakh hectares (lh) as of October 21, compared with 12 lh a year ago and 21.6 lh as of October 27, 2025. This is a crucial period for the oilseed crop, and any delay could affect timely maturity if temperatures rise around January-February due to El Nino, sources said.

According to the weekly sowing update released by the Union Agriculture Ministry on Monday, 17.78 lakh hectares (lh) had been covered as of October 23, compared with 28.16 lh a year ago. Mustard acreage stood at 13.1 lh, down 38 per cent from 21.03 lh, while pulses covered 3.27 lh, down 25 per cent from 4.39 lh a year ago. Winter-grown paddy has been transplanted on 1.02 lh, compared with 2.13 lh a year ago.

MAIN WINDOW

Under pulses, gram acreage stood at 2.21 lakh hectares (lh), down from 3.77 lh a year ago, while no other pulse crop, including lentil (masur), has crossed the 1 lh mark yet.

Wheat, the main rabi crop, has been sown on 11,000 hectares, compared with 27,000 hectares a year ago, the data show. The main sowing window for wheat begins in the first week of November and continues for about two months.

Officials said inadequate soil moisture had earlier hindered sowing, while high daytime temperatures were currently unfavourable for the crop. Sowing is expected to pick up as temperatures cool, with soil moisture levels now adequate.

However, wheat acreage may decline this year due to drought in Maharashtra and Karnataka, a senior official said.

OUTPUT TARGET

Last year, wheat acreage reached a record 336 lakh hectares (lh), compared with the five-year average of 315.23 lh, helping the country harvest an all-time high of 120.66 million tonnes (mt).

The government has set a foodgrain production target of 177.72 million tonnes (mt), including 121 mt of wheat, 17.2 mt of pulses and 22.3 mt of nutri/coarse cereals. Among other rabi crops, the targets are 12.33 mt for gram, 2.1 mt for lentil, 14.3 mt for mustard and 2.42 mt for barley. The target for rabi-grown rice is 16.72 mt, marginally higher than the 16.69 mt set for maize, while the target for sorghum (jowar) is 3.19 mt.

Cyclone Arnab may take rain away from South Peninsula

Vinson Kurian
Thiruvananthapuram

A cyclone warning (red alert) has been issued to Andhra Pradesh and the adjoining south Odisha coasts as Cyclone Arnab moved nearly westwards with a speed of 13 km/hr since Monday and lay centred over the west-central and adjoining east-central Bay of Bengal on its approach towards the Andhra Pradesh and Yanam coasts.

The Andhra Pradesh government issued an orange alert (cyclone warning) to 17 districts valid till 11.15 am on Tuesday. On Monday, a red alert of the highest intensity was declared over Nicobar, north and middle Andaman and districts of Andaman and Nicobar Islands, given the proximity to the cyclone.

The India Meteorological Department (IMD) located the developing very severe cyclone on Monday afternoon to 550 km south-east of Gopalpur (Odisha), 580 km east-southeast of Visakhapatnam, 660 km east-southeast of Kakinada, 760 km east-southeast of Machilipatnam and 830 km east-southeast of Bapatla.

Cyclone Arnab is dragging away moisture and rain (in blue shade) progressively to Andhra Pradesh and Odisha

The cyclone could likely intensify further into a very severe cyclonic storm over the same region on Tuesday. It may cross the Andhra Pradesh and Yanam coasts between Bapatla and Visakhapatnam, close to Yanam, by Wednesday morning as a very severe cyclonic storm with a maximum sustained wind speed of 115-125 km/hr, gusting to 140 km/hr.

VERY SEVERE CYCLONE

Google DeepMind still projects the probability, though reduced from 98 per cent a day ago to 83 per cent, of the very severe Cyclone Arnab ratcheting up in strength by another round to an extremely severe cyclone while weakening on its approach towards the coast as it encounters cooler waters and increasing vertical wind shear in the higher levels, as shifting wind strength and direction may unsettle the standing tall storm tower.

MAY TAKE RAINS AWAY

The powerful cyclone may take away the extremely heavy to very heavy to heavy rain from Kerala and Tamil Nadu towards Andhra Pradesh, Odisha, Chhattisgarh, West Bengal, Vidarbha, east Madhya Pradesh, Jharkhand and east Uttar Pradesh, as a remnant wades into the northern and eastern parts of the country.

Jan-Aug tur imports rise 44% with prices easing a tad in the past 2 weeks

Vishwanath Kulkarni
Bengaluru

Tur imports in the first eight months of calendar year 2026 are up 44 per cent, even as prices have eased slightly over the past two weeks. The surge in imports comes amid concerns that drought in parts of the key producing States of Maharashtra and Karnataka could affect the 2026 kharif crop.

Tur imports during January-August 2026 stood at 6.25 lakh tonnes (lt), up from 4.34 lt in the same period last year, according to the latest data compiled by the India Pulses and Grains Association (IPGA), the apex trade body.

Imports from Myanmar stood at over 1.528 lt during January-August, while those from Mozambique were over 2.29 lt, Tanzania 1.1 lt, Sudan 71,808 tonnes and other origins 61,138 tonnes.

Tur dal prices fell by ₹200-300 per quintal week-on-week in Kalaburagi and Akola

PRICE DIP

According to IPGA's weekly market update on Monday, prices of both desi and imported tur fell for the second consecutive week across major domestic markets in the week ended October 24.

Lower CNF offers from Myanmar, rupee appreciation, weak demand and tight liquidity kept buying subdued, IPGA said.

"Most festive demand has already been covered, while lower dal prices limited mills' willingness to raise raw tur bids, and purchases remained need-based. However, selling pressure remained limited due to lower kharif crop expectations, worsening drought conditions in Maharashtra and southern States, and lower-than-expected imports from Africa. Expectations of higher prices next season are discouraging stockists and traders from selling aggressively," the IPGA said.

Prices fell by ₹200-300 per quintal week-on-week in Kalaburagi and Akola, per the IPGA. Imported African tur prices in Mumbai also eased by ₹50-150 per quintal, depending on the origin.

Buy natural gas futures if prices rise above ₹290

Akhil Nallamuthu
bl. research bureau

Natural gas futures tumbled a little over 15 per cent last week following a 5 per cent decline during the week before. There has been considerable selling pressure on this commodity over the last couple of weeks.

COMMODITY CALL.

Since the October futures (₹240/mmBtu) is set to expire on October 27 (Tuesday), we shall consider November futures (₹287/mmBtu) for analysis.

Natural gas (November) futures breached the support at ₹320 last week, extending the decline and hit a low of ₹285.4 in Monday's early trade. That said, there is a potential support ahead at ₹280, followed by another one at ₹270. So, there is a chance for the November futures to see a rise, at least temporarily, on the back of the price band of ₹270-280. The contract could move up to ₹306. If this level is surpassed, it could extend the gain to ₹315. However, if the price slips below ₹270, the downtrend could extend to ₹255-250 region. As it stands, the trend might not turn bullish but there is a possibility of a corrective rally.

Therefore, traders with high risk tolerance can consider buying. Risk-averse participants can stay out.

TRADE STRATEGY

Buy natural gas (November) futures if it rises above ₹290. Target and stop-loss can be ₹306 and ₹284 respectively.

India's crude steel output up 5.6% in Jan-Sept even as global production dips

Gayathri G
Chennai

India's crude steel production rose 5.6 per cent year-on-year to 130 million tonnes (mt) during January-September 2026, even as global output declined 0.7 per cent to 1.368 billion tonnes, according to the World Steel Association (worldsteel). India, the world's second-largest steel producer, recorded a 1.9 per cent increase in crude steel output to 13.9 mt in September, compared with the same month last year.

CHINA'S OUTPUT DOWN

Global crude steel production across 70 reporting countries stood at 142.4 mt in September, down 0.2 per cent year-on-year. The countries accounted for about 98 per cent of global crude steel production in 2025, Worldsteel said.

China, the world's largest steel producer, recorded a marginal 0.1 per cent increase in September output to 73.6 mt. However, its cumulative production fell 2.9 per cent to 724.8 mt during January-September.

The US reported a 4.3 per cent increase in September production to 7.2 mt, with output rising 5.8 per cent to 64.9 mt during the first nine months of the year.

Russia's September production increased 6.2 per cent to 5.5 mt, while Japan's output declined 0.6 per cent to 6.3 mt. South Korea produced 5.2 mt, up 3.6 per cent year-on-year.

Among the other major producers, Germany recorded a 13 per cent decline in September output to 2.6 mt, while Vietnam's production surged 29.1 per cent to the same volume.

MIXED REGIONAL TRENDS

Asia and Oceania, which accounted for the bulk of global production, recorded a 0.7 per cent increase in September output to 104 mt. However, production in the region declined by 0.9 per cent to 1.01 billion tonnes during January-September.

The European Union's crude steel production fell 5 per cent year-on-year to 10.1 mt in September, while output in West Asia dropped 20.4 per cent to 3.6 mt.

North America recorded a 3.4 per cent increase to 9.3 mt during the month, while Africa's production rose 10.6 per cent to 2.2 mt.

Buyofuel, Honda Trading ink pact for biofuel supply chain

Our Bureau
Mangaluru

Buyofuel (Buyo India Pvt Ltd), a B2B marketplace for biofuels and biomass serving buyers and suppliers across India, and Honda Trading Corporation India Pvt Ltd (HTID), the Indian arm of Japan's Honda Trading Group, have signed a memorandum of understanding and a long-term commercial agreement to jointly build reliable supply chains for biofuels and biofuel feedstock .

The partnership combines HTID's procurement, trading and supply chain capabilities with Buyofuel's technology platform, verified supplier network and on-ground execution.

Together, the companies will establish a reliable supply framework for industrial consumers and biofuel producers, ensuring quality verification and traceability across multiple categories, including ethanol feedstock and solid biofuels used as coal substitutes in industrial applications.

Quoting Kishan Karunakaran, Founder and CEO of Buyofuel, a media statement said, "We are proud that they chose Buyofuel. This partnership combines their trading strength and financial depth with our platform and supply network. It allows us to take on requirements that neither of us could serve alone, and it marks the beginning of Buyofuel's next phase of growth."

Sumanth Kumar, Co-Founder of Buyofuel, said, "India's energy transition will be won or lost in the supply chain. Biofuel demand exists and so does the policy push. What industry has lacked is supply it can trust at scale. We have spent six years building that trust. With Honda Trading alongside us, we can now offer it to the largest fuel consumers in the country."

Gujarat's kharif groundnut harvest may decline 20%, says Solvent Extracts Association survey

A ground survey by the Solvent Extractors' Association of India (SEA) shows that kharif groundnut production in Gujarat is likely to decline by 20.5 per cent.

After three days of extensive field visits across major groundnut-producing districts in Gujarat, the SEA completed its 'Kharif Groundnut Crop Survey 2026-27' on Sunday.

According to the survey, Gujarat's groundnut production is estimated at 33.3 lakh tonnes (lt) from around 20.71 lakh hectares, with an estimated yield of 1,608 kg per hectare during the 2026-27 kharif season.

DEFICIT RAIN IMPACT

Gujarat produced 41.88 lt of groundnut from 22.02 lakh hectares, with a yield of 1,902 kg per hectare in 2025-26. The SEA said that this year's survey assumed greater significance as deficient rainfall in certain districts of Saurashtra had adversely affected the groundnut crop.

DIP IN CROP. Per the survey, Gujarat's groundnut production is estimated at 33.3 lt from around 20.71 lakh hectares

20% DROP IN SAURASHTRA

The extensive field assessment provides insights into the impact of these conditions and a clearer picture of Gujarat's groundnut production in the 2026-27 kharif season.

The survey estimated that groundnut production in the Saurashtra region would decline by 19.8 per cent in the 2026-27 kharif season.

The Saurashtra region is estimated to produce 25.53 lt of groundnut from 15.78 lakh hectares, with an estimated yield of 1,618 kg per hectare during the 2026-27 kharif season. In 2025-26, the region produced 31.82 lt from 16.53 lakh hectares, with a yield of 1,925 kg per hectare.

Rajkot and Jamnagar, the major groundnut-producing districts in the Saurashtra region in 2025-26, are expected to see a significant decline in production in 2026-27.

The survey estimated groundnut production at 5.9 lt in Rajkot, down from 6.6 lt in 2025-26, and at 3.26 lt in Jamnagar, compared with 5.63 lt in the previous season.

The production is estimated to increase to 5.32 lt (4.44 lt) in Junagadh and to 3.38 lt (2.81 lt) in Amreli district.

The survey team of over 20 members assessed crop size, quality, seed varieties and other key parameters through field visits and interactions with farmers, millers, traders and brokers from October 23 to 25.

Vinod Patel of SK Industry, Rajesh Patel of GGN Research and BV Mehta, Executive Director of SEA, were part of the team.

CMFRI supplies 5 lakh more mussel seeds to Maharashtra

Our Bureau
Kochi

The ICAR-Central Marine Fisheries Research Institute (CMFRI) has supplied an additional five lakh hatchery-produced green mussel seeds to fisherfolk and tribal communities in Maharashtra, taking the cumulative supply to one million over the past six months.

The initiative aims to translate marine fisheries research into livelihood opportunities by promoting sustainable bivalve farming along the Maharashtra coast, said CMFRI Director Grinson George.

SEED PUSH

The green mussel seeds, measuring 2-4 mm, were produced at CMFRI's bivalve hatchery at its Vizhinjam Regional Centre under the Pradhan Mantri Matsya Sampada Yojana (PMMSY).

The initiative aims to translate marine fisheries research into livelihood opportunities

In addition, one lakh oyster seeds produced at the institute's Madras Regional Station were supplied to Maharashtra to promote oyster farming.

A scientific team, led by Principal Scientist MK Anil, trained 30 government officials from Maharashtra's Mangrove Cell in nursery rearing and farming techniques for mussels and oysters.

"Bivalve farming is a low-investment, low-operational-cost technology with significant potential to strengthen coastal livelihoods while supporting ecosystem health," George said.

MANAPPURAM FINANCE LTD.

GOLD AUCTION NOTICE

CIN: L65910KL1992PLC006623,
Registered Office : W - 4/ 638A, Manappuram House,
P.O. Valapad, Thrissur - 680 567, Kerala, India

The borrowers, in specific and the public, in general, are hereby notified that public auction of the gold ornaments pledged in the below accounts is proposed to be conducted at the following branches on 16/11/2026 from 10.00 am onwards. The auction is of the gold ornaments of defaulted customers who have failed to make payment of their loan amount despite being notified by registered letters. Unauctioned items shall be auctioned on any other days without any further notice. Reserve price is fixed on the basis of market price of the gold on the date of auction or the 85% of the average 30 days IBJA rate whichever is higher. Change in venue or date (if any) will be displayed at the auction centre and on the company website . The details given below are in the order of Branch Name, Loan Number, Customer Name, Total Due Amount (in `) & Item Name

Centre clears ₹2.12 lakh crore package for defence procurement

DOMESTIC CAPABILITY. Ministry states that nearly 82% of the procurements will be made indigenously

Dalip Singh
New Delhi

Self-propelled tracked gun systems, helicopters, different classes of drones and counter-drone systems and active off-board decoy systems (AODS) for ships to create false targets are among the big-ticket procurements carrying a total value of ₹2.12 lakh crore that received in-principle administrative approval from the Defence Acquisition Council (DAC) on Monday.

Chaired by Defence Minister Rajnath Singh, the DAC gave nod to the proposal for the procurement of high mobility vehicles (HMV), gun shot response systems (GSRS), light multi role helicopters (LMRH), very short-range air defence systems (VSHORADS), platform-based counter unmanned aerial systems (C-UAS), unmanned aerial system brick long range, surveillance UAVs, integrated surveillance and strike systems, and long range kamikaze drone systems, said the Ministry of Defence in a statement. The HMVs will enhance operational capabilities, logistic support and mobility in challenging terrains while the self-propelled tracked gun systems will provide matching mobility and firepower to mechanised formations.

The GSRS, which is also called a gunfire locator, is an automated tactical technology designed to instantly detect, locate and analyse hostile gunfire, and will serve as a force multiplier providing real-time situational awareness of the forces. The light multi role helicopters (LMRH) will be used by both the Army and the Air Force for reconnaissance and surveillance, combat, search and rescue of troops, humanitarian assistance and disaster relief, among others, said the Ministry. The VSHORADS — a fourth-generation, man-portable air-defence system (MANPADS) with which the Army wants to replace its aging fleet of legacy systems, such as the Russian Igla-1M — is designed to engage new generation small size aerial threats. While C-UAS will enhance the survivability of tanks in the modern battlefield, the surveillance and drone systems will enhance the intelligence gathering and targeting capabilities of the Army.

TOP PRIORITIES. The proposal includes the procurement of high mobility vehicles, helicopters, air defence systems, unmanned aerial systems and multiple surveillance systems ANI

APPLICATIONS

For the Navy, approval was given for acquiring active off-board decoy systems (AODS) and other major naval platforms. The AODS will enhance the credibility of anti-missiles defence, especially against modern anti-ship missiles of adversaries.

The indigenously-designed and constructed major naval platforms will possess modern-day warfare capabilities and enhance the combat capability of the Navy.

According to the MoD, IAF's proposals got a go-ahead for the procurement of special utility helicopters, air defence systems, weapons and Mobile X-Band Doppler Weather Radar Systems to enhance its air defence and war fighting capabilities. The X-Band Doppler Weather Radar System will provide high-resolution, localised weather surveillance in forward areas.

Out of the total in-principle administrative nod accorded, the Ministry stated that approximately 82 per cent of the procurements will be made from Indian industry.

Trade margin cap on cancer drugs may push up costs, caution experts

REDUCING THE BURDEN. Govt's move aimed at slashing MRP on these medicines by about 20% to 70%

PT Jyothi Datta
Mumbai

In about two weeks, the Centre's 30 per cent trade margin cap on 137 non-scheduled cancer medicines is to reflect in the prices of these medicines sold at chemists and hospitals.

While some relief is expected for patients from lower medicine prices — healthcare industry and advocacy voices caution that addressing therapeutic segments in isolation could push up costs elsewhere in the supply and delivery chain. And, they have different solutions on how it needs to be addressed.

In its affidavit, the Centre said the proposed trade margin cap was expected "to result in significant reductions in the MRP of anti-cancer drugs, broadly estimated to be in the range of 20 per cent to 70 per cent".

Pointing to greater transparency, the Centre said the move would reduce out-of-pocket expenditure for patients undergoing cancer treatment, besides bringing in an annual savings of approximately ₹2,500 crore.

MARGIN SHIFT. Experts say costs could be recovered from other services that may not have been billed earlier

AFFORDABLE CARE

Having helmed positions in hospital and pharmaceutical segments, healthcare administrator N Santhanam told *businessline* the industry will be able to absorb the cap — "no one will go out of business," he added. While cancer drugs are expensive, he pointed out, the exercise to make medicines affordable for patients should be more comprehensive, as other therapeutic segments also have expensive medicine.

Industry experts said hospitals and drug companies will both be impacted by the trade margin caps, but they added these costs could be recovered from other services that may not have been a billed service earlier. They point to the price caps on cardiac stents, about nine years ago, and the alleged fallout of prices increasing on other items and services.

KM Gopakumar, Co-convener, Working Group on Access to Medicines and Treatments, said cancer drugs will continue to be expensive (despite trade margin caps) for patients who need to take a medicine multiple times a month. He calls for ceiling prices on other services at hospitals as well, so costs are not transferred across items and services like diagnostics, for example.

'Cancer drug price curbs won't fix the problem of overpriced medicines'

Ankita Upadhyay
New Delhi

In response to the Centre's affidavit informing the Supreme Court of its decision to consider price controls for certain anti-cancer drugs, Agra-based paediatric surgeon Sanjay Kulshrestha, who filed the initial petition challenging exorbitant drug prices, has argued that the proposed measures do not address the wider problem of overpriced medicines and hospital consumables.

In a rejoinder filed in the matter, Kulshrestha urged the court to constitute an expert committee to examine gaps in the existing drug-pricing framework and recommend broader measures to curb excessive pricing. While welcoming the government's move, he pointed out that none of the overpriced medicines cited in his petition were anti-cancer drugs.

In its affidavit, the Ministry of Chemicals and Fertilisers said the Health Ministry had constituted an expert committee on October 9 to recommend anti-cancer drugs for price control, excluding inexpensive medicines.

BROADER PROBLEM

Kulshrestha acknowledged the government's decision to invoke Clause 19 of the Drugs (Prices Control) Order, 2013, to reduce the prices of certain non-scheduled cancer drugs. However, he argued that restricting the intervention to cancer medicines would leave the broader problem of excessive mark-ups on other essential medicines unaddressed.

Citing the Ministry's own reply, Kulshrestha noted that ceiling prices have been fixed for only 935 of 3,881 new drugs, about 24 per cent, while the remaining 74 per cent have none. Since the majority of drugs fall in the non-scheduled category, he urged the Ministry to use its Clause 19 powers beyond cancer medicines.

He also criticised the Ministry's apparent lack of concern about controlling low-priced drugs.

He said he could not understand how a "low-priced" drug is defined, or how low a price must be to qualify.

Every player in the supply chain, including manufacturers, stockists and retailers, fixes their desired profit as a percentage irrespective of the price range, and retailers who sell drugs across all price ranges earn adequate profit on average.

Cordelia launches its largest cruise vessel, plans expansion

Madhu Balaji
Bengaluru

Mumbai-headquartered Cordelia Cruises has launched Cordelia Sky, its largest cruise vessel, and commenced commercial sailings on October 23.

Its next vessel, Cordelia Sun, is scheduled to be launched in 2027.

Cordelia Cruises President and CEO Jurgen Bailom said the company had carried more than eight lakh passengers since commencing operations.

"Our goal is, by 2032, to be the top five largest cruise markets in the world," Bailom said.

The company, a subsidiary of Waterways Leisure Tourism Ltd, plans to create 20,000 additional jobs over the next three years. As part of its workforce development initiatives, Cordelia Cruises has started a cadet programme and is moving closer to having its first female captain.

MAIDEN VOYAGE. Cordelia Sky commenced commercial sailings on October 23

Looking ahead, the company has planned a 34-day cruise from Mumbai to Sydney during the 2028 monsoon season. The itinerary is expected to cover seven countries and 16 ports.

Measuring approximately 260 m in length (848 ft approximately), Cordelia Sky spans 12 decks and has a gross tonnage of 77,104.

The vessel has 1,002 cabins (with double occupancy) across multiple categories, ranging from interior staterooms and ocean-view cabins to balcony mini-suites and suites.

The ship houses approximately 10 restaurants, 11 bars and lounges, a pool deck with two swimming pools and five hot tubs, a sports court, meeting rooms and a library. Among the other highlights is a 930-seat Marquee Theatre.

The writer was on board Cordelia Sky at the invitation of the company

The groove of freedom turns full circle with *Vande Mataram* vinyl

It marks the culmination of the 150-year celebration activities related with the national song by CeGRAMS

Shishir Sinha
New Delhi

The rousing anthem *Vande Mataram* was a rallying soundtrack of India's march towards freedom. The stirring anthem has found many expressions over the years.

Now comes the anthem in a fresh vinyl album, commemorating 121 years since the earliest recordings of *Vande Mataram* was committed to the 78-rpm groove. The album, the brainchild of civil servant Akhilesh Jha, Chief Controller of Accounts in the Ministry of Rural Development, was presented to the first citizen of India, President Draupadi Murmu.

Simply called *The Anthem: Vande Mataram*, it also marks the culmination of the 150-year celebration activities related with the national song by CeGRAMS (Centre for Gramophone and Allied Studies).

"The Anthem album is a *kumbhabhishekam*, a ceremonial consecration, of the imperishable *mantra* of *Vande Mataram*. Bold in conception and beautiful in expression, it seeks to recall the part played by song, music and the spoken cry in India's struggle for independence, and in kindred movements for liberty throughout the world," Jha said.

President Draupadi Murmu receiving the album from singer Hariharan (second from left) and civil servant Akhilesh Jha

FEATURES 3 VERSIONS

Sung by noted singer Hariharan, the album features three versions of the national song — one with the original lyrics, the second a Tamil translation by Subramanian Bharati and the third an English version rendered by William Herbert Lee, a British officer in 1906. For *The Anthem*, Hariharan has set the original version of *Vande Mataram* in *Raga Malayamarutam*, while for Tamil version, he has used Carnatic *Raga Mohanam*, akin in spirit and structure to *Raga Bhoop* of the Hindustani tradition.

The English composition opens with the strains of the Scottish bagpipes, in remembrance of the Scottish businessman DM Hamilton.

INSTRUMENTAL TOUCH

All three songs have an instrumental version and two iconic *Taarnas* based on *Vande Mataram*.

"Leslee Lewis and Hariharan*ji*, the Colonial Cousins, have teamed up together after a long gap for the English version," Jha said, also highlighting the instrumental support by artistes such as Rakesh Chaurasia (flute), Josy Alppuzha, (carnatic flute), Bhavyalakshmi (violin) and Soundara Rajan (veena).

Jha described how 121 years ago *Vande Mataram* was committed to the 78-rpm groove, when Steven Carl Porter recorded the voice of Narayan Chandra Mukherjee for Nicole Records in Calcutta.

"The circle of recorded sound thus turns upon itself: Asong that first entered the groove at the dawn of the twentieth century returns to the groove in the twenty-first," Jha concluded.
